SIU open to city grads

Entry squeeze discounted

By Les Chudik
Daily Egyptian Staff Writer

SIU's proposed new admission standards would probably not significantly affect the number of Carbondale high school graduates eligible to attend the University, said Steven E. Mahan, director of pupil personnel services at Carbondale Community High School.

The proposed admission standards would stiffen SIU's entrance requirements. According to Jerre C. Pfaff, associate director of admissions, the new standards, if approved, would require that applicants for admission achieve a composite American College Test (ACT) score of 16 or higher. A composite score of at least 20 would be required of students who do not rank in the upper half of their class.

Mahan contends that Carbondale students have traditionally scored higher than the national average on the ACT exams. "Our students average 21 or 22 on the ACT. I'd be surprised if it (the proposed requirements) would affect as many as four or five students in a graduating class," he said.

Mahan attributes the students' higher scores to Carbondale's being a college town.

"We're unique in Southern Illinois, but I don't think we're atypical of college towns. Carbondale has a major university and clinic and the professional people working at them want their sons and daughters to get a good education," he said.

He estimated that about 40 percent of Carbondale's high school students' parents are employed by SIU in addition. Carbondale is the largest business center in Southern Illinois, he said.

"Management people have higher goals for their children in school," he said.

A 1976 survey of 215 of Carbondale's 248 graduating seniors determined that 72 percent to attend a post-secondary educational institution. Of these students, 51 percent per cent to attend a four-year school, 19 percent per cent to attend a community college and 1 percent per cent to attend a vocational school.

"Three of every four students planning to attend a four-year school in the fall said they will go to SIU," Mahan said.

He feels the major reason for this is the cost factor. According to the Illinois State Scholarship Commission, the annual cost for a student to attend SIU-C is $2,300, he said.

With financial conditions such as these, students can't afford to go to a small private liberal arts school. Financial factors influence where students go to school. Our students can live at home and commute to SIU which is less expensive," he said.

Since the new admissions requirements are still only a proposal, current standards are being used for fall enrollment.

Bargain hunters

While waiting for an auction to begin at Logan House Restaurant, Murphysboro, potential buyers check out the fixtures and furnishings to be sold before the fire gutted building is demolished. See related story on page 10. (Staff photo by Carl Wagner)

GSC helps infant care

infant care with funds

By Matt Coulier
Daily Egyptian Staff Writer

A $5,000 contribution to a committee planning an infant care center on the SIU-C campus has been approved by the Graduate Student Council (GSC).

Jacqueline E. Eddleman, a member of the care center committee and an Associate Professor in Child and Family Studies, explained the plans for the center at a GSC meeting Thursday.

The care center could cost between $200,000 and $300,000 and would accommodate over 30 infants, Eddleman said.

Several sites are being considered but final selection will depend on the amount of funds raised. Eddleman told the GSC members that $5,000 contribution may be used to finance travel expenses as committee members search for more funding.

"The GSC unanimously approved a motion "Yes, support the center." The establishment of the infant center. The $5,000 funding motion passed with 19 yes votes and one abstention.

"The motion stipulates the GSC treasurer as fiscal officer in charge of the $5,000, and adds two GSC members to the infant care center committee.

The University presently operates a day care center for children from three to five-years-old. The infant care center would care for children from birth to 1 year old, according to Jeanette Endres, a graduate assistant in food and nutrition.

Endres said Friday that she has been working closely with the committee but it is not actually a member.

Endres said the $5,000 contribution would "definitely speed up the opening of the center. The committee will try to open the center before fall semester 1987.

"Now that the Graduate Student Council has approved a source of funds, we will be closer to bringing the center to the campus," Endres said.

"It hasn't been decided yet what type of center we will be supervising the center," she said.

Eddleman said the amount of training and qualifications necessary for infant care staff members will also affect the cost of operation.

Besides Eddleman, other committee members are Shirley Rogers, assistant professor in the College of Human Resources; Melvin L. Noe, lecturer in elementary education, Jenny Y. Jones, assistant professor in child & family, and Carian Williams-Phifer, graduate student, in Elementary Education.

New UCHS head must deal with debt

Reid Martin, newly appointed superintendent of Carbondale Community High School District 185, said Friday that the greatest challenge facing him will be dealing with the district's poor financial condition.

He said the district has loans from local banks totaling $506,000. He said the debt will be even higher at the end of the school year 1977-78.

"The problem is that we have more expenditures than revenue. We have set revenue," said Martin.

He said he didn't foresee any immediate cut-backs in faculty or programs. "I think those decisions have to be met after a good look at the total program," he said.

Martin said he will hire a business manager for the district and will work closely with him. He said he has received five applications for the position and said he will have someone hired by the end of the year. Martin was approved as superintendent by a unanimous vote of the school board Thursday night. Martin, 44, received a four-year contract of $47,000 an year. He has been acting superintendent since former superintendent Melvin Spence resigned June 1.

"We are very fortunate that we don't have the other kinds of problems that other schools have," said Martin. "It's a good system. The faculty and students as a whole do a good job.

Martin said he plans to be in the school system for at least 10 years. After that, he will have worked in the district for 35 years and will be ready to retire, he said.

"I hope I offer something to the school system. I hope that is why I was hired. I plan to do the important work hard and be fair and honest with relationships.

In other action Thursday, the board approved continued participation in the federally funded Career Opportunities Program, run by the City of Carbondale.

The board approved the employment of two government teachers, Harold Endres and Charles Flemming, and added a media specialist for the summer school session, Leonard Nickel.

The board avoided having to issue an anticipation warrant for the education fund due to budget cuts. Martin told the board the district had a special fund $32,000. He said the combined June and July contribution to the fund. Martin said he'd only expected a June payment of $60,000.
Chemistry teacher finds museum spoo in Holland

By Debbie Hale

While viewing a museum exhibit in Holland of portraits of famous scientists, an English chemistry professor uncovered a "spoo" that had been overlooked by the public for nine years.

The professor, John H. Wolitz, made his discovery while viewing portraits of scientists such as Alessandro Volta and Andre Ampere, who gained names to the electrical terms "volt" and "amp."

But what shocked Wolitz was a portrait of a curly-haired, low-born, curvaceous lady identified as "Milli Miller.

The caption below read: "Milli Miller, Daughter of a Dutch woodcutter. Attracted the attention of the electro-technical assistant and 15 library services different just a few of the things available for the record library. Their readings printed in these libraries are high musical tastes, contemporary music and unusual sound effects are just a few of the things available for listening at the record center, in the Morris Library.

Record center meets varied musical tastes

Popular operas, contemporary music and unusual sound effects are just a few of the things available for listening at the record center, in the Morris Library.

Located on the second floor of the Humanities office, the record library serves different types of students in different ways. Ted Otto, assistant professor at Morris Library, said that although this "the record library is designed to help music students, it also is utilized by English students, foreign language students and those interested in visual and audio arts.

There are approximately 15,000 records in the library. The records can be checked out for one week or can be listened to at the library through headphones and other audio equipment.

Included in these records are symphonies, operas, ballets, plays and sound effects records. Otto said the record library has a limited budget where they may determine what records they can't afford to buy. The required readings for classes of music and English students are given first priority.

Ted Otto and Alan Cohn, Morris Library professor, are in charge of the record library. Their staff consists of five librarians, one library assistant technical assistant and student workers.

for her beauty. Fell into disgrace after Napoleon's downfall and died penniless, in Menton, 1872-1877.

A millimeter, of course, is a metric system measurement for length. A millimeter is one-thousandth of a meter.

Wolitz thought something was wrong, although at the time he did not want to question the officiality of the Evolution Science Museum in Eindhoven, Holland.

However, after returning to SIU last year, Wolitz spent several hours doing research in Morris Library to make sure that "Milli Miller" ever existed. Assured that it was a spoof, Wolitz wrote the museum.

He finally got a reply from a museum official who said that the exhibit's designer included the fake information and picture to bring amusing relief to the exhibits on such serious topics.

However, Wolitz said he was the first person from the viewing public to let the museum know he caught the joke.

He said they took an authentic 19th century portrait and passed it off as the "Milli Miller." Now, Wolitz said the museum staff does not know whose portrait they sold.

Wolitz wanted to make a positive identification, so he published the article with the portrait in the Journal of Chemical Education last May. However, so far he has not received any suggestions on who the "curvaceous beauty" is. Wolitz is still trying to find her true identity.

He presented the same article in a speech to the International Conference of Measurements in Budapest, Hungary in April.
FBI director joins tick recipients

WASHINGTON (AP)—FBI Director Clarence M. Kelley Friday added himself to the list of recipients of ticks in the mail but said the insects apparently are harmless.
Kelley said in a statement that "a number" of the approximately 200 companies or individuals who received extortion letters last fall have gotten letters recently containing ticks. The FBI director did not say how many letters-containing ticks have been received. Eighteen of the companies or individuals also received letter bombs this week, an FBI spokesman said.
Kelley said that the ticks in each instance were accompanied by a note saying they were carriers of dangerous diseases. "The letter also referred in specific detail to the earlier extortion demands made of the recipients," Kelley said.

Italians to decide on communism

ROME (AP)—Italy's bitter and violent electoral campaign drew to a close Friday night, leading the way to parliamentary elections judged tantamount to a referendum on communism. Up to the midnight deadline, nine national parties vying for 430 Chamber and 315 Senate seats had their big names speak at rallies. After a day-long pause Saturday, about 4 million Italians vote Sunday and Monday for a new parliament, the 30-year-old republic's seventh legislature.
Violence continued to the final day of a 45-day campaign period marred by four deaths. In industrial Milan, leftist gangs tossed fire bombs at the offices of the right-wing Italian Social Movement—MSI—party. In the southern town of Catanzaro, three leftists and a policeman were hospitalized after street fighting near an MSI branch. The Vatican weekly, Osservatore della Domenica, urged Italians to vote "against the MSI." A Catholic Church-backed Christian Democrat party.

Fleeing Americans caught in shelling

BEIRUT, Lebanon (AP)—The first group of Americans fleeing war-torn Beirut was caught in an artillery crossfire Friday as the convoy drove to Damascus with the bodies of two slain U.S. diplomats. Shells fragment hit one car, but no one was hurt. More than 100 Americans signed up for another overland run to Damascus Saturday morning on the same narrow mountain road that the test convoy followed on Friday.

There were other developments: —In Washington, State Department spokesman Robert Funsseth said the United States had received "assurances for the safe conduct" of the Americans on the weekend bus convoy organized by the British Embassy.
—In Paris, a Palestine Liberation Organization spokesman said the PLO was willing to "facilitate the evacuation of foreigners from Lebanon" as long as this did not lead to foreign intervention.

Walking, watching, sitting: weekend pastimes at Mall

By Jean S. Taylor
Daily Egyptian News Editor

The gathering is reminiscent of a church social, town meeting and junior high sock-hop.

Sure, occasionally there are small packages clutching under arms—but this is not really a business day. It is Sunday afternoon. It is time for ice cream cones, cotton candy, balloons, walking and sitting around in the University Mall on the east edge of Carbondale on Illinois 13.

The spacious walkways and benches are filled with walkers and walk watchers. Folks aren't rushing to the "special clearance" tables, they are window shopping, talking and catching the drops on their ice cream cones.

Not unlike thousands of malls across the country, the University Mall is a show place for businessmen. But for Carbondale and area residents, it is also a weekend social gathering center.

The downtown area of Carbondale has its Sunday afternoon strollers, but perhaps because its bar lined streets are suffering a hangover from the night before, it is subdued and quiet by comparison.

The center of activity at the Mall is the brick, plant filled water fountain. Its spray reflects the orange light at its base. A small sign reads: "Care in fountain to help local charities."

Young parents and not-so-young grandparents are pushing children along the walkways in shopping carts—very few of the carts contain packages.

A small group of elderly gentlemen sit together at the fountain—exchanging bits of information and alerting one another with a notify of the foot when an attractive young woman comes into view.

A bare legged man in a tan trench coat, white socks and sneakers wanders through the crowd and into a men's clothing store. He catches the attention of an SIU theater student/part-time cleanup man, who comments, "This is a great place to watch humanity walk by. There are too many unclassifiable people."

A merchant in a dark blue suit stands outside the entrance to a clothing store: "Hello there young man," to a grey haired man passing by. "Hello. How are you?" to a middle aged woman in a jersey dress.

A flashing railroad light entices fans of "of-chance into a pinball arcade. And—perhaps eager to try his hand at "Speed King" or "Target Zero"—a boy in a jean jacket stops a teenage buddy, "Hey, pal, can you spare a quarter?"

A grey-haired man with a neatly trimmed mustache glances down the walkway and sits on a wooden bench. Shielded by the foliage of a rubber tree, he pulls out a cigarette and lights up. "My wife doesn't know I smoke and I have to sneak one when I can," he admits. He has time to enjoy a leisurely smoke. Two whispering, giggling young girls rush past. "I really do enjoy coming here and watching the people," he says.

A little girl walking past stumbles and begins to cry. There is almost four o'clock and the gentleman at the fountain stand and walk towards the door. The crowd is thinning out. The cigarette smoker's wife walks over and meets him.

There are other things to do. And besides, it's almost time for Sunday supper.

Chance meetings of friends and relatives make the mall a center for shopping and visiting. Rachel Caldwell (left) and her sister Ann Youngman of Murphysboro accidentally met at the mall last Saturday and filled each other in on the latest family news.

"The Last Hard Men" is truly an imaginative movie. It's uncanny how well filmakers think of so many bizarre obstacles keeping the good guy from the bad guy for two long hours.

Charlton Heston and James Coburn star in this latest western film. Even though there are many contrasting roles, their personalities are amusing, similar, bright, and very attractive. The dialogue is one of the best ones of recent times.

The saga begins on a sweat soaked day. Our bad guy, Coburn, manages to pick his chain gang guard to death with a train track spike. After several more witty maneuvers he manages to free the entire chain gang and escape into the mountains to find his beloved treasure.

So much for Coburn. Heston, the good guy, is a retired lawman frustrated with the current slow pace of crime. When he hears Coburn, his arch enemy, has escaped he is overjoyed. He immediately changes from suit to saddle and prepares for battle.

In the meantime, on the way to the mountains, Coburn murders a few bystanders and watches his pal's munch raw beef on a bsacon. Hard men, hard stomachs. Before reaching his destination, he manages to outwit Heston by kidnaping his 23 year old daughter, Heston, during this nefarious escapade, is setting a trap for Coburn which obviously fails through.

But so much for details. The remaining scenes are just wild attempts to keep the good guy from the bad guy even though they are madly pursuing one another.

Coburn and Heston seem to know each other well. Theyectioner each other into near fatal accidents by preying on weaknesses. Heston's weakness, of course, is the fact his daughter is being held captive by long-term prison escapees. Coburn's weakness is his narrow pursuit of Heston's life. Coburn won't give up.

The watery blood spurts freely, the guns click constantly, and everyone misses the ideal target until the last fatal scene. But of course the ending is supplied with terribly efficient paramedics.

If you're game for a slow speed trek girl commercial that develops into rape, or a brush fire complete with charred bodies, or if you just want an evening charged with literally gutty excitement catch "The Last Hard Men."

Coburn summed it up where he said, "Get rid of the sheep, and keep the goats. You won't be let down."

Hollywood rarely changes its standing, all-purpose western saga script.

Japanese predict major earthquakes

HAKONE, Japan (AP) — Earthquake predictions soon will be as precise as forecasting a shower in the rainy season, an organization of amateur seismologists here claims. An equipment, members of the Namae University of western sa ga. The equipment is a piece of cake worth eating.

"Total Fitness" is also a well written account on the critical role your heart plays in building and maintaining physical endurance during the adult years.

Japanese predict major earthquakes

HAKONE, Japan (AP) — Earthquake predictions soon will be as precise as forecasting a shower in the rainy season, an organization of amateur seismologists here claims. An equipment, members of the Namae University of

Oki said in an interview that well groups have received encouragement.

The quakes, which registered 4.4 and 3 on the Japanese scale of 7, were two days in advance of the, said Yusuke Oki, 43, founder and president of the Earthquake Information Center.

Oki said in an interview that well groups have received encouragement.

The quakes, which registered 4.4 and 3 on the Japanese scale of 7, were two days in advance of an earthquake in the Tokyo-Yokohama region May 13 and June 21.

Chinese seismologists recently claimed to have predicted several major quakes by changes in water level and in the particular behavior of animals prior to an earthquake.

This approach to forecasting quakes has brought some criticism from established seismological research institutes, but mainly the group has received encouragement, Oki said.

Launched in April, the club already has members in seven prefectures surrounding Tokyo. Oki said he hopes to have chapters nationwide by January.

Oki said the group has been successful in the legend that cats which reside under the earth and create tremors when angry. The Japanese people believe this for thousands of years.

Earthquakes are a major concern in Japan, where in 1923 144,000 people were killed in a massive earthquake and fire that destroyed much of Tokyo and Yokohama. The government supports some earthquake research, but so far no money has gone to the Earthquake Information Center.

"Total Fitness" is also a well written account on the critical role your heart plays in building and maintaining physical endurance during the adult years.
Doctors outline steps to reduce medical bills

By Louise Cook
Associated Press Writer

Consumers faced with soaring medical bills can save more than $100 a year by cutting out some visits to the doctor and learning to rely on home remedies instead, according to two physicians.

The doctors also say that contrary to popular belief, most people do not need an elaborate and expensive medical checkup every year.

"The Council on Wage and Price Stability reported recently that the care center went up 10.1 per cent last year. Other service items in the Consumer Price Index were up 7.7 per cent.

The council also said the average American spent $457, or almost 10 per cent of his income, on health care in 1975.

Dr. John F. Fries, coauthor of "Take Care of Yourself," says that the average family of four now sees the doctor 12 times a year.

The average cost of the visit is $15 for an annual expenditure of $420.

And that's just for the doctor's bill.

Fries and his coauthor, Dr. Donald Vickery, estimate that two-thirds to three-fourths of the visits—eight or nine times—turn out to be unnecessary. Eliminate even half the unnecessary visits and you have saved $150.

"One of the biggest problem areas in medicine is when two see the doctor," says Fries, an assistant professor of internal medicine at the Stanford University Medical Center in California.

Fries and Vickery have provided the guide to help consumers decide whether they need the aid of a physician. It lists dozens of common symptoms and ailments and includes basic yes-or-no questions about each one. Depending on the answers to the questions, the reader is advised to see a doctor immediately, make an appointment with a physician or simply apply the home treatment described by Fries and Vickery.

A separate section tells you what sort of tests, etc. to expect if you do go to the doctor.

The American Medical Association has no comment on the book because no one in the group had issued an official review, according to two physicians.

Historic landmark to be demolished

By Dennis DeRossett
Student Writer

Plans for the demolition of the Logan House Restaurant in Murphysboro are being made for the owners, as a result of the building being condemned by city officials.

The restaurant is the only remaining part of the historic Logan Hotel which was destroyed by fire on March 21, 1978.

According to Murphysboro Mayor Michael Bowers, a city statute gives a specific time limit for the owners of the property to rebuild or demolish the building.

"They did not take action within the time limit, so the property was condemned," Bowers said.

The owners of the property, the Logan House Restaurant Inc., were notified that the building was being condemned on May 21. The notice was signed by the city of Murphysboro, the Murphysboro Fire Department and the Jackson County Health Department.

Agriculture scholars honor science teacher

Donald M. Elkins, professor of plant and soil science at SIU, was presented the Illinois Region Distinguished Teacher Award of the National Association of College Teachers of Agriculture (NACTA) Thursday, at Texas Tech University.

Elkins was nominated for the honor by the plant and soil science department. The Central Region of NACTA includes university departments and state and local agricultural extension agencies in Illinois, Indiana, Michigan, Minnesota, Missouri, Ohio, Pennsylvania, Wisconsin, Iowa and Wisconsin. Elkins was a member of the program committee, which is composed of a specialist in field and forage crops, agricultural education and agricultural agents and teachers of Mr. and Mrs. Louis Elkins of E制服 Spring, Tenn.

In addition, Elkins is a member of the School of Agriculture faculty for the year's Outstanding Teacher Award from the Standard Oil of Indiana Foundation. Last March he was chosen by the School of Agriculture students for the 1976 Faculty Service Award.

Research articles by Elkins have been published in current editions of professional journals. One article, "Effects of Lime and Lime-Peletted Seed on Legume Establishment and Growth in Southern Brazil," co-authored with Faizel Olsen, is a newly published article in Great Britain's professional journal. Experimental Agriculture: The other article, "Effect of Cropping History on Soybean Growth and Nutodulation and Soil Bacteria," appears in the May-June issue of Agronomy Journal.

Bicentennial grants awarded

The Carbondale Bicentennial Commission awarded two grants to local groups for bicentennial projects totaling $600, said Nancy Reball who is a member of the commission.

The first grant went to the Centralia Historical Society, a member of the Association for the construction of markers which will be placed on 35 of the city's historic buildings. The grant was for $175.

The second grant will be used for a 4th of July celebration planned by the Ad Hoc Freedom Fest Steering Committee, which will include an arts and crafts sale, games, races, music and a children's program. The commission's grant was for $25.

---

Local group designs Bicentennial medal

By Chris Moenlech

Last April Don Stricklin and Jerry Compton, both of Carbondale, approached 12 people and asked them to form a Jackson County Bicentennial Commission. All accepted and decided on creating a medalion depicting Jackson County history.

Stricklin, vice-president of the commission, said, "The medalion captures a significant landmark and moments that can be passed from generation to generation."

The bust of George Rogers Clark was chosen because of his march through Jackson County on his way to Kaskaskia in 1778. Pomona Natural Bridge is a forested, geographical landmark in Jackson County near Murphysboro.

Richard Hunter, publicity chairman of the commission, said Jackson elementary school children decided on the wording. The commission conducted a contest and the child who wrote the winning Pomona Natural Bridge phrase will receive a silver medalion.

Terry Gillespie of Carbondale did the preliminary artwork. The Jackson County Historical Society will display the silver medalions in its archives. The medallions range in price from $2 to $250. The gold and silver medalions will be con-secutively numbered and the design is in the process of being copyrighted.

The 14-member commission, will dissolve in August. Deadline for ordering the medalion is June 30. The Jackson County Bicentennial Medallion Commission is organized under the Illinois General Not For Profit Corporation Act, any profits from the medallion will be given to the Jackson County Historical Society.

Order forms can be found at financial institutions in Jackson County and the historical society.
Grain companies accused of supplying false data to Senate

WASHINGTON (AP) — Four giant corporations in a position to manipulate world grain prices by their control of the data used to set the prices, Senate investigators said Friday.

They made public a nine-year-old memoir in which an Agriculture Department attaché in Europe accused the companies of supplying false data in order to influence pricing decisions.

Staff members of the Senate Foreign Relations subcommittee on multinational corporations, which conducted the investigation, said the companies have denied the allegations.

Reporting on a year-long examination of the complex international grain trade, staff member Richard Gilmore said that every morning the European grain exchanges phone the four major grain companies for that day's lowest offer price in each Commodity Market country.

By using the "lowest offer price" in Rotterdam in the Netherlands because the base line on which grain prices around the world converge.

The data is relayed to the grain offices of the European Economic Community in Brussels where it is used to fix the market, export subsidies and EEC prices, Gilmore said.

The information is then relayed back to the United States where it is available by the opening of the Chicago Board Exchange.

Thus the manipulation of the basic data has an effect: grain prices throughout the world, distort grain markets in the United States and affect adversely the interests of American farmers and consumers, Gilmore said.

Igor is pleased to announce that he and Dr. Wrench are presently providing full service care at Ace Automotive Service.

Lockcd behind door 103 in the Home Economics Building, Sharon Harrigan is a senior, economical soybean product.

Harrison, Food and Nutrition masters student, and Frank Konishi, Department of Food and Nutrition chairman, are involved in promoting youth activities and interests, in the Illinois Soybean Program Operating Board.

It's a three-year award and Konishi is developing a method for preparing, readily available, nutritious soybean product.

Even though the food is geared toward children, Konishi said that the product will be good for any age group. He said that if kids take to it, the elderly may be interested too.

Better nutrition, lower price are targets of soybean study

The council is also expected to set up a special advisory panel to discuss the role of such groups in the city building and zoning projects.

City expected to reallocate federal funds

The city Council is expected to table the citizens advisory committee's recommendations for the reallocation of some $7,000 in government Model Cities funds at a formal council meeting Monday.

According to a memorandum from Robert Stalla, director of human resources, there have been several changes in the requirements for city Model Cities money and in increased enrollment under several state service programs.

There is also expected to set a date for a joint meeting with the consumer advisory commission to discuss the role of such groups in the city building and zoning projects.

Library friends to elect officers

The Friends of the Carbondale Public Library will have an election of officers at their final organizational meeting Tuesday at 7:30 p.m. in the Carbondale Savings and Loan community room.

The probable level of assessment in 1976 will be $6.00, down from 1975's $7.50.

The likely level of assessment for 1977 will be $6.00, down from 1976's $7.50.

Finley angered at ruling

Chicago (AP)—Shocked and angered, Charles O. Finley, owner of the Oakland A's, first ordered his manager, Chuck Tanner, not to use any of the three players he had sold for $3.5 million, and then consulted Friday with his attorney who agreed with Finley's action.

"I don't even want them in uniform," said Finley after learning that baseball Commissioner Bowie Kuhn had blocked the sale of the three players.

Finley last Tuesday had sold Joe Rudi and Rollie Fingers to the Boston Red Sox for $1 million each and pitcher Vida Blue to the New York Yankees for $1.5 million.

Kuhn, however, ordered the three players back to the Oakland roster.

"We're not going to use the three players," said Finley. "We're going to court Monday morning for an injunction." Finley told Tanner.

"You should own the American League after you get through with this one," said Tanner, who then was cut off in favor of Neil Papiano, Finley's attorney in Los Angeles.

Papiano not only agreed that the A's not use the three players but went as far as to say they shouldn't be allowed in the locker room.

"If Charlie uses any of the players then, in essence, he is ratifying the commissioner's position," said the attorney.

"Also, what if the A's play Rudi and he breaks a leg and then the courts rule Rudi belongs to Boston. Who is to determine who will compensate Boston for the loss of Rudi?"

The courts have ruled these players can play out their options and become free agents in a position to sell themselves.

Papiano said he didn't know exactly what Kuhn had in mind because his telegram said the A's wouldn't be able to compete without these players. "How does he expect the A's to compete next season without the same players?" said Papiano. "I assume he has something in mind. What it is, I don't know."

Finley not only brought up other great sales of the past involving Babe Ruth from Boston to the New York Yankees, Joe Cronin from Washington to Boston and Dizzy Dean from the St. Louis Cardinals to the Chicago Cubs, but also consulted an economist to bring into perspective the amounts involved.

"Dean went for $185,000 in 1938," said Finley. "Today that amount would be $737,000. Cronin went for $250,000 in 1934 and today that would amount to $1,048,000 and that doesn't include Lynn Lary who was tossed into the deal by the Red Sox."

"I don't know what Kuhn is trying to do but it seems to me he is going against the law of the land when the courts have ruled these players can play out their options."

Hey, we could never ask our football players to dive nose first on the concrete like that!

This comment was expressed by a male spectator watching high school girls practicing dives and rolls on the concrete concourse in the SIU Arena.

The concrete-diving girls weren't practicing a new dangerous entertainment act, they were participating in the SIU volleyball camp for players and coaches.

Putting them through the ropes were coordinators Debbie Hunter, and Gene Kornieke. Hunter is the coach of the women's volleyball team. Kornieke is the coach of the SIU Volleyball Club.

Hunter talked about the camp's success as her fellow-coordinator put a groaning line of high school coaches through a series of rolls and dives.

"We planned for about a 100 total, and we thought to ourselves that we were overshooting, because the other women's camps were getting no response," Hunter said.

Hunter's fears were unfounded as a 100 players and 14 coaches signed up for the two-day camp, which started Friday. Players are charged $12, while the coach's fee is $15.

Two of local participants are Anna Maxwell and Nancy Thalman from this year's Carondealt team. Maxwell is a senior next year and Thalman has graduated this year.

Thalman said she was going to enroll at SIU in the fall with the thought of making Southern's team. She said the camp would give her a chance to polish her volleyball skills before trying out. Maxwell's objectives this weekend will be "to learn how to spike better and gain more consistency in my serve."

Carondealt's volleyball team this year ran up a 11-2 record. The Terriers made it to the sectional finals were they were beaten by Red Bud.

Maxwell said Carondealt's success was helped because of some of their opponents didn't even know how to spike. "One of the teams we played was so scared of our spikers they would back up a step when we would go into the air.

Many of the high schools in the Southern Illinois are just getting started in the sport. One spectator said the farther you go up the scale, the better the volleyball competition.

One school just getting into volleyball is Salem High School. After only two years of volleyball, Salem has put together winning seasons of 15-2 and 13-3.

Finley's volleyball background has been high school play in Louisville, Ky., and intramural competition at Murray State University.

In Salem's first year, Finley said 50 girls tried out for the team. This year 60 tried out. Finley said the fan support has really picked up especially since the regional tournament was played at Salem this year.

Finley was enthusiastic about the two days of intensive training scheduled at Southern.

"I'm learning what the players are doing wrong, especially in their sets. Plus it (the camp) is good for meeting the other coaches."

Finley also said the additional knowledge she's picking up will help her deal with the inconsistent referees, which her team has had to put up with this year.

Almost the entire team of Lincolnwood High School near Springfield is present for the camp. The coach and four of the players are receiving their bumps and bruises at the Arena.

Lincolnwood junior Debbie Robinson said her team was 11-10 last season. Robinson is concentrating on the setting techniques of the game since her coach said that's the role she'll be playing next year.
