Escaped convict hired as policeman

By Jim McCarthy  
Staff Writer

The question of an escaped convict from Tennessee being hired as a policeman in Dowell about 20 miles north of Carbondale, has led to a bitter debate among politicians, university officials, and the media. The escapee, Buck Williams, was allegedly involved in the theft of a car and was later convicted of murder. According to reports, Williams was hired as a police officer by the city of Dowell despite his criminal record.

His performance was excellent

—Jerome Nelligan

Nicholson worked in Grand Tower from late December, 1978 through mid-February, 1979. He was commanding the Traffic Division's parking office. This office is responsible for ensuring that students, faculty, and staff members comply with parking regulations. Nicholson's role is advisory and his decisions are not final, according to the Board of Trustees. He was the former police chief of Dixon County, and he came in, he said, to help with parking enforcement.

Unpaid traffic fines may come out of faculty's pay

By Bill Crowe

Staff Writer

A motion to deduct fines for parking and traffic violations out of faculty and staff salaries is pending, according to Chancellor Doughart, vice president for campus services. The motion was passed at the Board of Trustees meeting and is currently under review by the university's legal counsel. The university's policy is to deduct unpaid fines from the paychecks of faculty and staff members.

July as date to select chancellor

By Jack Robinson  
Staff Writer

The Chancellors Search Assistance Committee met for the first time Wednesday in the Student Center, with the mission of finding a new chancellor to replace the outgoing chancellor. The committee is tasked with determining the qualifications and preferences of the next chancellor.

Gus Bode

Gus says professors are great believers in equality, except when it comes to library fines and parking tickets.
Officials warn blackouts could happen more often

By Ray Robinson

Staff Writer

A major power failure that hit the SIU campus last week have University officials concerned that such incidents could happen more frequently in the future.

Surgeon General Dwayne House told the Daily Egyptian that the blackout, which occurred Feb. 25 when lightning struck a Physical Plant transformer, caused the loss of power to the tower switch plant.

"It could just be a coincidence," Engram said. "When it rains, it pours."

Engram said SIU has one of the largest underground electrical systems in the country, one that the people who make the estimates are the same ones who are busy trying to restore power after the blackouts.

The first blackout cut power to the building's air pumps, which caused the water in the basements to rise. The loss of electric heat caused a damaging buildup of humidity in the buildings.

Dougherty said he expects the final damage and repair bill to be a "tough blow" to the Physical Plant.

"We have an estimate of what the three blackouts cost the University to repair," Dougherty said. "So far, that number stands at $5,000."

Dougherty said that several significant recommendations were made by the electrical department the day after the storm.

The three blackouts cost the University $8,700, which doesn't include the labor of the Physical Plant employees—all of whom worked around the clock.

For the first two blackouts, the campus was divided into three sections. dougherty said he hopes that last week's last place will begin the process of modernization and improvement of the system.

Search council nominees, bond fee await board OK

By Donna Kunkel

Staff Writer

Approval of the nominees to the Champaign County Assistance Board will begin the first two of the Board of Trustees' meetings Thursday.

During the second session, the Board will make final decisions on the implementation of the bond retirement to which would cost students an additional $75 per year.

The board will also discuss a possible tuition increase and the amendment of board bylaws and statutes to make them consistent with the new governance system.

The Search Council, chaired by Keith Sanders, professor of speech, met for the first time last Wednesday. The council will make recommendations to the board for a chancellor for the SIU system. Harris Rowe, chairman of the board said earlier that a chancellor should be named by July 1.

Dougherty said he has been encouraging student and faculty groups to offer their opinions on the possible candidates, but that he, as the University's general counsel, would be meeting with the board to discuss their recommendations.

"I think at first glance, it is going to be popular with students," Dougherty said. "But I am not sure whether or not to raise tuition for 1979-1980. The SIU appropriation bill for fiscal year 1980 may include a tuition increase which would be introduced to the legislature sometime in March."

The discussion concerning the revisions of the board's bylaws and statutes will deal with changing the documents so they properly describe the organization's procedures and functions of the new governance system which was approved by the board Feb. 8.

The board will be one member short of its 11-member board. Margaret Blackshear, former secretary to the board, was not reappointed by Gov. James Thompson earlier this week. Her replacement, Dr. David Rendleman, a Carbondale surgeon, will be unable to attend because he will be in surgery.

Warmer weather brings auto burglars out in force

By Bill Threshold

Although the official date for the beginning of spring is still 13 days away, the Carbondale police believe the recent warm weather is responsible for a rash of automobile break-ins.

Four automobile break-ins were reported to the Carbondale police last week. In three of the cases automobiles were broken into in the 600 block of West Freeman street; in the other two instances, the fourth automobile was broken into in the 800 block of West Freeman street, only two blocks away from some of the others.

Lt. Terry Murphy of the Carbondale police said reports of auto break-ins had decreased during the bad weather but are beginning to pick up now that the weather is getting warmer.

"Thieves don't like to work when the weather is cold, so evidently crimes such as auto burglaries have a tendency to increase in warmer weather," he said.

David Glasser, SIU's 800 W. Freeman St., told police someone had pried open the dash board of his car and his radio was stolen. Police said there was extensive damage to Glasser's car and his radio was valued at $25.

A CB radio and a stereo radio was also stolen Tuesday night from a car owned by Patrick Murphy, junior in industrial technology. Police said someone pried open a vent window to gain entry to Murphy's car. Murphy said the approximate loss is valued at $220.

There is no estimate yet of the damage to buildings in Small Group Housing and Thompson Dorm because, Dougherty said, the people who make the estimates are the same ones who are busy trying to restore power after the blackouts.

The first blackout cut power to the building's air pumps, which caused the water in the basements to rise. The loss of electric heat caused a damaging buildup of humidity in the buildings.

Dougherty said he expects the final damage and repair bill to be a "tough blow" to the Physical Plant.

Murphy said that although the recent thefts have all been concentrated in one area, "a stakeout would not be productive in apprehending the thief or thieves because the suspects will not remain in the area very long."

According to Murphy, the police are going to stop and question anyone seen in the area of Freeman Street if they look suspicious.

"We hope that students will cooperate with the officers when they stop and question them and ask for identification," Murphy said. "We just want to find the person or persons who are responsible for the recent auto break-ins— and whether they know it or not, any theft over $50 is considered a felony crime."
City to receive funding for new depot

By Ed Lempen
Staff Writer

City officials announced Wednesday that Carbondale has received funding automatically from the Illinois Comprehensive Rail Construction and Maintenance Administration for more than $1 million for planning purposes for the railroad relocation project.

The funding totaling $1,681,322 will be used for the purchase of land on the proposed site of the new depot, and for the acquisition of the 13.6 acres of land that will be displaced in the process. Plans call for construction of the depot on land between Elm and Perry streets on the east side of Illinois Avenue.

At the biennial Rail Conference, Eileen Gonnell, director of the Railroad Relocation Demonstration Project in Carbondale, said an agreement has been reached with the牢牢 with the Illinois Central Gulf Railroad for approval of railroad relocation project. The next major phase of the project is for the city to receive funding for new depot in the fall.

Gonnell said that the FRA funding approval was expected to be granted as early as next week, allowing the city to move forward on the construction of the depot.

"This is a really significant step toward construction of one phase of this project," Gonnell said.

With funding approved, the city will proceed with the appraisal of land and businesses affected by the railroad relocation project. The city is located south of Merwin’s night club and on the north side of Carbondale gas station on Illinois Avenue.

Construction of the railroad depot is scheduled to be completed in 18 months.

The city received notice of the FRA’s decision last Thursday, Gonnell said.

The entire project, including construction of the new depot, is expected to take a total of 18 months.

By Bill Theobald
Staff Writer

Despite finding a place to park, there are other parking problems on campus.

Parking in Lot 106, south of Brush Towers, was an issue when the Illinois University police are not only average five to six break-ins a night, but are also surrounding on the campus lots.

During the past two weeks there have been seven reported auto break-ins in Lot 106. All of the break-ins are at night when only an average of five to six University patrol officers are on duty.

All auto break-ins are on the east side of campus but if an officer gets tied up with other calls like a traffic accident, the reports or parking violations, then he may not have time to

Chancellor Search Committee meets, sets target date to fill new position

(Continued from Page 1)

obligated to discuss in public session all matters except those pertaining to the most recent applications of candidates. He said subcommittee meetings on the decisions will be "closed," but that the people involved will be "amused." Sanders later announced the formation of four-member subcommittees.

They are:

- Development and acquisitions of a set of rules, and procedures which will be presented to the council when it meets again, in about six weeks.

- Legal and affirmative action: to establish a committee for consideration of affirmative action and other laws pertaining to public employment.

The subcommittee plans to have guidelines to present to the Board of Trustees by the April meeting.

Long-term plans: to create a "transition plan" which will be presented to the council in two weeks.

- Prospectus: to write a description of the chancellor for distribution to potential candidates.

Sanders said the Board of Trustees has yet to decide on the salary and fringe benefits for the position of chancellor. But he said he did not expect the chancellor and town screen to select Chancellor James Brown.

"He is currently at $84,000 a year, plus a car and a house.

Thurday's forecast is calling for rain in the mid or lower 30's under cloudy skies. The mercury is expected to sink into the low 30's with cloudy skies continuing and a chance of rain.

"There is a good chance for a return of the 'cloudy' concept during the weekend," said Harren.

The study found that a person's attitude toward what is masculine or feminine regarding their role major they chose. Harren said, "It isn't really clear what those attitudes of what is appropriate for men and women."

The information obtained from "The Effects of Sex Role Stereotypes on Men and Women's Career Choices."

The program will begin next year at SIU and at other univer-
sity campuses. The program will teach students that they are necessary to make decisions such as change of course major and to expand the career options available to men and women.

"More women are entering the work force in fields like nursing and education and are competing against men for these careers. They're re-limiting themselves to certain careers," Harren said.

"Women that are male dominated are dental hygiene (98.6 percent), food and nutrition (98.6 percent), interior design (98.9 percent), nursing (98.7 percent) and secretarial and office specialties (98.7 percent)."

Carter depending on Middle East trip

WASHINGTON (AP) - President Carter depends on Middle East trip.

WASHINGTON (AP) - President Carter depends on Middle East trip.

"This, and his fervent desire to be the peacemaker between the Arabs and Israelis, are driving him to the Middle East this week on what appears to be an official mission.

It is not so risky, however, if the basis for his efforts in the Middle East have already been struck with Israeli Prime Minister Menahem Begin and Egyptian President Anwar Sadat over the telephone, and is being kept under Carter's track record shows a gain.

He brought Begin and Sadat to Camp David, but not for the starting prac-

tical from scratch.

The governor goofed

On Tuesday, Gov. James Thompson announced his plans to replace Margaret Blackshear, a 4-year-old surgeon and a clinical associate professor at the SIU School of Medicine in Carbondale. The loss of Blackshear is lamentable. Throughout her six-year term, she has stood head and shoulders above her colleagues in representing the interests of students and faculty.

Thompson says he decided to dump Blackshear largely because he "had a prob'le'm" with her position as director of political action for the Illinois Federation of Teachers. That concern seems unfounded.

The SIU Board of Trustees does not even recognize the JFT as a colle'age bargaining agent, and Blackshear has said she would abstain from voting on any issue of interest to the JFT.

So, if Margaret Blackshear caused a thin stream of worry to pass through the governor's mind, we suspect that soon his appointment of Rendleman will be cutting a channel.

Rendleman is a prominent physician, and there is no tighter-knit fraternity than the medical community. The medics are a union unto themselves.

Memories of the WTA

While the University is to be commended for filling the void left by the passing of the Women's Transit Authority, it is quickly finding out that the sea is filled with hazards no matter who the captain of the ship is.

The iceberg the University is trying hardest to avoid is the problem created by piecemeal funding. The Women's Transit Authority filled the same problem—a few thousand here, a few thousand there—scraping for survival when that funding was desperately needed.

When funding for the WTA finally ran out for good, the University stepped in with the Women's Interim Nighttime Transit. The program was initially funded with $6,000 from the office of Bruce Swinburne, vice president for administration. Swinburne said there is no money in his budget for continued funding of the program. Clarence "Doc" Daugherty, president for campus affairs, also said there is no money in his budget for funding.

So, to keep up the transit service, Swinburne has suggested what has almost come to be regarded as a cure-all—a new student fee. The suggested fee would be $0.00 per semester and would generate in excess of $20,000 for the University to operate the women's transit service.

There are several questions that have to be asked before such a fee is considered. For instance, is there absolutely no other source of funds in the budget which could be diverted for the transit service? It seems that administrators have no problem coming up with $6,000 when the chips are down, but hedge on making any long-term reallocations.

But what is even more striking is the fact that Rendleman is a faculty member—albeit in an unpaid volunteer position. Was it not evident to the governor that a member of the medical school faculty is more likely to be faced with the difficult task of avoiding a conflict of interest, than was Blackshear in her position with the JFT? In fact he resigned his position with the medical school, Rendleman will not have severed his friendships.

Dr. Rendleman has already been quoted as saying he hopes to use his background in medicine "to continue to develop the medical school into a fine school."

His intentions are noble, but as one constituent head at SIU-C recently remarked, "If there's one school in this University that doesn't need any help, it's the School of Medicine."

Before Rendleman's appointment is made official, the Illinois Senate must grant its approval. Normally, that process would be merely a rubber stamp. But lawmakers in the Senate need to take a careful look at the appointment to determine whether he will serve the University community better than Blackshear, and if, indeed, the possibility of conflict of interest will be greater with Rendleman on the board.

Also, the University should ask whether or not the increased service provided by the WINT justifies the increased cost when compared with the WTA. The WTA operated on an annual budget of $12,000, while the University needs almost twice that amount. Does that mean the program will provide twice as much service?

If the administration and constituency groups feel the answers to these questions are satisfactory, then a fee similar to that of the WTA could be imposed.

However, the argument can be made that almost half the student population—males—will be unable to use the service provided by the fee. Also, there is probably a large portion of the female student population who wouldn't use the transit service.

But in this case, the importance of providing a safe campus and educational environment doesn't depend on the number of students whose safety would be enhanced. For men who would be unable to use the service, there is the argument that equality, or in this case security, for women is equally important for this reason.

It seems the best solution would be to make the fee refundable. That way, any students who did not feel served by the transit program could get their money back. It is also likely that most students would not bother filing a refund, so the service would still be adequately funded.

The University can then add on another student fee, but students won't be able to claim that they are being taken to the cleaners since the fee will be refundable. In other words, the University will be able to have its transit service and run it too.

Letters

Pigs aren't students

I would like to enlighten Mr. Millisop (Letters, Feb. 23, 1979) in view of his recent attack on the issue of the domestic pig. His basic premise, closely relating animals to the pig, may very well be true. Current surgical techniques include using porcine skin for grafting on humans and even directly transplanting pig kidneys into human patients.

I believe that a pig was responsible for throwing up on his back porch. I would not expect that of a pig. Deprived of its natural habitat, the pig would simply be£*£ to itself.

Gallup reforms needed

"...you know that as of last week, 27 of the needed 34 states have called for a constitutional convention to amend the Constitution of the United States anxious issue in this call for change is to force the government to balance its budget. I feel that if such an amendment is made, it would be the only way the government could find itself not violating the law.

However, a change is needed. I still call for a constitutional convention and I would suggest George Gallup's "Six Political Reforms Most Americans Want" as an article that appeared in the opinion section of the New York Times. It is an article that is very much taken to heart. The six reforms are recommended:

1. Federal funding of Congressional election campaigns—funds from all other sources prohibited.
2. Primary elections to be held on the same day as the general election, with the general election to be conducted only by popular vote rather than by election or caucus.
3. Amending the campaign period by holding election day on the first Tuesday after the November election.
5. Allow voters to introduce legislation by referendum.

Drinking age helps

In response to Mr. Crockett's letter, society has a duty to protect minors from their own ignorance. By having a drinking age, society can move, not against the minor, but against the parent or guardian who is responsible for the minor.

It is silly to think that society (as much as I would like this happen) can attack the use of alcohol. By having a drinking age, we are potentially preventing unhappy occurrences, such as accidents caused by driving under the influence of alcohol. People would be better off to deal with their problems through responsible means such as the "network" or one's religious or moral counselor.

Dental Hygiene students clean the teeth of local residents and students in one of four new rooms provided at the Technology building.

STC 'Tooth Fairies' find new home

Dental Hygiene students of the School of Technical Careers are finally settling into the new facility across from the Arena. The STC wing of the Technical building cost approximately $7 million and was two years in the making.

Better facilities and more room are some of the welcomed improvements, according to students. The on-campus location is also a big advantage for the students who traveled 10 miles to the school's previous location at Carterville.

The location has provided the students with more patients and fewer cancellation problems. Dental students used to be idle for an hour if a patient missed the bus or had car trouble. Now the dental hygiene students simply call numbers on a cancellation list because patients do not have the half-hour drive.

Students and local residents may have their teeth cleaned free of charge by dental hygiene students. This service also includes a check for possible disorders prior to the cleaning. There is a Student Emergency Dental Service that is offered only to students because it is funded through student medical fees.

Students and local residents have been quick to respond to the new facility. The amount of people inquiring about the services offered has increased 100 percent, according to a school spokesman.

The dental hygiene students began the semester in the new STC wing along with three other programs. Two more programs are scheduled to be moved to the new facility in the summer.

Rita Dombrowski, x-ray assistant, views a set of freshly processed x-rays.

Nora Sloan, senior in Dental Hygiene, (above) concentrates on the mouth of Richard Hey, graduate student in Political Science. Renee Testery, (left) provides instruction on the techniques of dental x-ray to Rita Dombrowski using "Dexter," a training model.

Opera performer enjoys field

By Deas Psess

Randall Black, a graduate student in opera at St. Louis University, has followed a yellow brick road studied with honors and awards since his singing debut as a 5-year-old in his church's children's choir.

Black's accomplishments have ranged from "outstanding young boy' at the 10th Annual Festival of Fountains in 1972 to "duet with the world-renowned Arturo Toscanini at the annual spring concert of the New York Philharmonic in 1973.

His latest success was being selected as a contestant in the Arthur Rubinstein international piano competition in Helsinki, Finland, and he will be playing a concerto in the final round of the competition.

Black's work has been promoted by the St. Louis Symphony Orchestra, and he has performed as a soloist with the St. Louis Philharmonic and the St. Louis Chamber Orchestra.

Black said he feels most satisfied when he has done his best and works well with his partners in a performance.

"One perfect duet where the emotions flow right can make months of work worthwhile," he said.

Black is very excited about the upcoming concert at the St. Louis Symphony Center. Heen the opportunity to gain experience in new roles, Black will be in four of the five operas performed between June 7 and Aug. 15.

He said he is trying to avoid working on a "short-range goal" while keeping in mind the long term goal of developing his voice and repertoire.

Black said he also tries to remember the three loves that David Lloyd of the University of Wisconsin music school said are essential for a singer.

"Loyd said that you must love music, the words and the audience," Black said. "Music is meant to communicate, feeling is for the performer and the audience. You must love the people if you don't, they'll know it and they won't respond."

Concerts to be held

Two rock concerts will be held in St. Louis, one this Sunday and the other next Sunday.

Naziherz, along with Brownsville Station, will be playing an all-day concert June 10-11 at Kiel Auditorium. The reserved seats are $7.50 and $8.50, Supertramp will be performing at 8 p.m. on Aug. 19 and 20 at Checkerdome. Tickets are $7.50 and $9.50.

Halloween’ classic horror film

A Review

where homocidal maniac Michael Myers is chased by a 20-year-old German tourist who has just escaped from a sanitarium and is returning to his old home where he slaughtered his sister 15 years earlier.

Secondly, the editing was quite poor on occasions and at one point the scenes even occasionally changed between the time one of the young ladies entered her house and Pereira in the lift. Granted, this is not picking but from such an overall effective film such lapses come as needless distraction.

Toward the end, the story begins to bog down but the effects are so good it doesn’t really matter that the characters are doing such stupid things as hiding in closets when they could easily be running to safety or that the boogie man himself has been “hyped” to such an extent that the film is beginning to resemble a “Halloween” light show at the death of Dr. Spade.

All in all, “Halloween” is a fine little film that will forever have the bravest of the brave on their way home.

Author's Note:

The 1979 Playwright's Workshop New Play Contest is offering cash prizes for both full length and one act plays by anyone of STU during the 1978-79 academic year. The Best full-length play will receive a first prize of $1,000.00, a trip to London, and will be awarded a Best One-act play of the Quarter Night program will also be awarded to the best one-act play, according to Theater Department professors. And, whenever possible, the full-length play will be considered for production in the same program.

The contest is open to students in PHI and to any student submitted to: Christian H. Mar, Playwright's Workshop—New Play Contest, Theater Department, State U. School of Fine Arts, $29.

Both full-length and one-act plays must be submitted with one copy of a 40-page script and a second copy of the script will be returned. Adaptors are acceptable. However, scripts produced outside of STU according to the rules, previous winners in outside playwriting competitions are eligible.

One-act plays will not exceed 45 pages in length. The one-act play must not exceed one page per 100 words. Pages will not be counted less than 1,000 words. The script should be typed on single-spaced with double spacing between the lines. The text should be typed on standard 8½ by 11-inch paper, on one side of the paper only. A typed title page should be placed only on one page.

The name, return address, phone number, and department affiliation of the author is on the title page should be included with the script. The title page should be typed on the first page of the script.

Awards will be announced and prizes will be awarded through the University in May, the exact date will be announced. The name of the winner will be two STU faculty members and three students. The decision of the judges is final and the judges reserve the right to award no prizes if no entry meets prize-winning standards.

The 1978 award winners were: "Backyard Story," by Charles Perdue for the full-length category, and "What Ever Happened to Ama Mac," by John C. Wright for the one-act play category.

REGISTRATION INFORMATION

WALK-IN registration can be made at the Continuing Education Office at Washington Square C. Monday-Friday from 8:00-5:00 p.m.

You telephone your registration and we'll hold a place for you in the class. Call 536-7751.

ADVANCE REGISTRATION ARE ENCOURAGED, For more information call Mary Beth Logue, 536-7751.
We have positions to fill.

President Carter has called the fight for tomorrow's energy 'the moral equivalent of war.' The front-page industry that's tackling that nation's greatest challenge needs superior engineering graduates.

We can put your skills to work NOW. Kansas City Power & Light has choice career openings that place you now where your classmates will be in five years: at high levels of authority and responsibility with earnings and benefits to match.

Because of growing energy demand, expansion, and promotions, we need engineers with leadership capabilities to take over in these key areas:

**Electrical Engineers**

- Plant Construction and Engineering responsibilities involve power plant design review and modification, managing construction projects, work scheduling (critical path), cost estimating, preparing plant equipment, overseeing contractor performance, cost and budget estimating.
- System Planning Department requires performing and analyzing power systems, identifying potential problems, developing alternatives, ensuring reliability and economy. Familiarity with FORTRAN programming is preferred for developing and modifying computer models in economic and reliability studies.
- Rates and Regulation Department needs sharp engineers to carry out analyses of Cost of Service, Rate Value, Load Research, Rate Design and related financial analyses. Proficiency in FORTRAN programming is preferable, as well as ability to deal effectively with both management and corporate needs.

**Masters of Business Administration**

- Rates and Regulation Department requires economics or financial oriented MBA's with baccalaureate in Electrical, Mechanical or Industrial Engineering to conduct economic research in areas of Cost of Service, Rate Value, Load Research, Rate Design and related financial analyses. Proficiency in FORTRAN programming is preferable, as well as ability to deal effectively with both management and corporate needs.

**Mechanical Engineers**

- Plant Construction and Engineering involves power plant design reviews and modification, managing construction projects, work scheduling (critical path), cost estimating, preparing plant equipment, overseeing contractor performance, cost and budget estimating.
- Power Plant Maintenance means troubleshooting. KCPL is a billion-dollar utility and energy supplier to over a million people in a major commercial and industrial center encompassing 23 counties in two states.

Kansas City Power & Light Company is a billion-dollar utility and energy supplier to over a million people in a major commercial and industrial center encompassing 23 counties in two states.

These select positions offer immediate fulfillment to career oriented graduates and provide excellent opportunities for continued development toward top management positions.

A year from now, your friends will still be talking about the energy crisis... YOU will be solving it.

Our personnel representative will be on campus March 21st. For more information or an appointment call the placement office.

KANSAS CITY POWER & LIGHT

Honor society hasn’t suffered from ‘animal’ image

By Rick Becker

Student Writer

Believe it or not, there are Greek secretaries on campus and even party at the drop of a hat, or in any other way involved in what’s been seen in the movie “Animal House.”

Despite the initial attention given to these honor societies by students, faculty and the general public, they are not declining according to two SIU faculty members. The CCE was usually elect members first, and then satisfy the individuals that they are in the organization.

The 31 different honor societies at SIU have traditionally been groups which honors scholastic achievers from the chemistry department, in the Zoology Honors Society.

Jack Lane, director of high education and president of Phi Kappa Phi, and Ed McGlone, chairman of the speech communication department and president of the Illinois Beta Kappa, became concerned about the lack of attention given to the recognition of scholastic excellence and have tried to do something about it.

Phi Kappa Phi is a national honorary society open to juniors, seniors and graduate students; regardless of major. Beta Kappa is a national honorary society open to juniors and seniors in the liberal arts. Currently, there is no Phi Kappa Phi chapter at SIU, though McGlone said he will petition the national organization to consider a chapter at SIU, and hopes the group will accept in October. Lane said he feels that concern they raised represent a need for the first time the Council of Faculty Honor Societies. This council hopes to share information and influence the individual societies may have for the benefit of all the members.

It can have a real impact on the climate for academic study,” McGlone said.

The joint committee is to seek recognition from either academic or student affairs or both, as a campus organization, get on as many mailing lists as possible and develop a program that improves the quality of upper division experience completely with nationally known speakers. McGlone said.

“The only things that seem to get attention are problems, disasters and crimes instead of the good things,” McGlone said. “Marvulous students don’t get the recognition they deserve.”

Graham added that honor societies are “not a high priority news item” and it is not unusual for them to be forgotten in the midst of other headlines. This council hopes to share information and influence the individual societies may have for the benefit of all the members.

The university can move quickly to establish a first-class honors program. Both the council of donors and faculty senate are considering proposals to replace the President’s Scholar Program, McGlone said.

An all-inclusive honor society of all students should become a part of the proposal, according to McGlone.

“I am disappointed at the turnout,” he said. “But since many students drive miles to see their son or daughter get an award and there’s only 50 in the audience, they probably did not participate, though, are much more and interested,” Graham said.

The university can move quickly to establish a first-class honors program. The council of donors and faculty senate are considering proposals to replace the President’s Scholar Program, McGlone said.

The joint committee is to seek recognition from either academic or student affairs or both, as a campus organization, get on as many mailing lists as possible and develop a program that improves the quality of upper division experience completely with nationally known speakers. McGlone said.

“What’s the worst thing that could happen?”

You pick up the telephone, ask some questions and make an appointment to speak with one of the SIU faculty. You go to the appointment, find out that not only could you be on scholarship next year, but you could be on the payroll of one of the largest and most prestigious organizations in the world with a starting annual salary of $11,900 after graduation. Then you go home and think it over. You come away with some valuable detailed information at no cost or risk to you in any way. Call us at Air Force ROTC today. What’s the worst thing that can happen?

WHAT'S THE WORST THING THAT COULD HAPPEN?

By John Bloomer

Associate Editor

A new group called Carbondale Common Community Center, concentrating on a plan in which Brub Education Center which was damaged by fire in December, was opened to become a community center for residents.

CCE member Loren Taylor said the school’s central location on West Main Street makes it desirable as a community center. The CCE was incorporated recently, primarily to obtain state funding for reconstruction of Brub School.

Taylor also said the school has been estimated at $38,000 and another $5,000 is needed for a new heating system that would meet state safety requirements.

At a CCE meeting recently, some residents opposed the school’s renovation and suggested the building be torn down.

More opinions are needed before a decision is made, however, said Justin Grant, coordinator of Carbondale’s human resources department, is a member of the joint committee. He added that the administration of just the general from and interest in the community for the program.

About 25 persons attended the meeting with about five organizations represented. Grant said many others have expressed interest.

Community education, Grant explained, is a way of improving the cultural and recreational opportunities of all age groups. This can be achieved, she said, by coordinating all the resources and facilities of all local organizations for the benefit of each other. She added that these are being created to compile a list of available facilities and suggestions.

The Chicago-bound students have travel mode options

By Dennis Marus
Student Writer

All students traveling to and from Chicago have various transportation options, other than using cars available to them such as trains, buses and airplanes. Amtrak appears to be the most popular transportation for students traveling to the city.

Verena Paul, district supervisor for Amtrak and said that 26 passengers leaving from Carbondale is an average daily number. "We know that most of our passengers are SIU students. The students numbers especially, increase on weekends and during school breaks," Paul said.

According to Paul, a roundtrip discount that reduces fare by 30 percent has been especially popular with SIU students. "The roundtrip discount is an experiment by the railroad to try and attract more passengers," explained Paul. "I would say it has been successful in Carbondale because we have had a substantial increase in riders and revenue."

Currently, a one-way fare from Carbondale to Chicago costs $31.50 while the round-trip fare costs $32.50. The estimated travel time for the trip is 8 hours, 15 minutes, and the Shearwater is about six hours from the University Station in Carbondale.

Another travel option for students is the Chi-Dale Express which is designed exclusively for SIU students. The Chi-Dale Express is a privately-owned transportation server consisting of two mini-buses that take students from the Student Center to various stops in the Chicago area.

Ken Philip, owner of the Chi-Dale Express, said that his service has several advantages because it was planned strictly as a service for SIU students. Philip said every Friday at 2 p.m., two mini-buses carrying 11 passengers each, leave the Student Center for traveling to Union Station and one stopping in Park Ridge, Elgin and the Lincoln Mall.

"At the Chi-Dale Express, we are available for students at their request," Philip said. "I feel we are more than capable of providing a service that is of a high-quality to anyone that wants to ride in Chicago." Philip added that the buses leave Chicago late Sunday afternoon and drop the passengers off at their residences in Carbondale or return to Carbondale late Sunday afternoon.

One of the most famous film associations to Chicago is the Film Society of Chicago which is affiliated to the University of Chicago. The Film Society of Chicago, according to Paul, has a membership that is primarily made up of students since the university appears to have the most people interested in film studies.

The Film Society of Chicago is an international film organization whose members include professors and scholars of film throughout the country. Bakalski was elected to a two-year term as president last August.

Bakalski said he would like to see the UFA serve "proponents of film" who would benefit teachers of film, as such as the production of references books. Bakalski said, "The papers of D.W. Griffith, one of the most famous filmmakers of all time, are at the Museum of Modern Art in New York but have never been indexed Bakalski explained. All the museums have a lot of boxes "well anybody who wants to do any work has to go through one of these hundreds of boxes. And the museums don't want people to go through all of them because they don't want people to mess it all up."

Bakalski said. Bakalski said the UFA is seeking a grant to hold a national conference which will bring together film scholars and professors with representatives from museums and archives to discuss new problems. The goal of the conference is to find help educate other film scholars, to help organize film materials and address other problems facing film scholars.

A men and women assertiveness training group will be starting at 7:30 p.m. March 30. Interested persons should call 457-6333 for information.

The Gumball Wheelchair Rally, a cross-country and slalom course, will be held at 1 p.m. March 25 in the Arena parking lot. Applications are available in the Student Recreation Center Room 141. Volunteers are still needed for the event.

Nancy K. Wilson, assistant professor in administration of justice, presented a paper entitled "Ciao and Criminality: The Uses of History" at the sixth annual meeting of the Western Society of Criminology. The meeting took place Feb. 28 through March 3 in Sacramento, Calif.

Aeon Alternatives is offering a group "Getting High Through Movement" to be held from 6 to 8 p.m. on Tuesdays. The group will not begin until at least six persons are registered. For registration call 529-2211.

The Soccer Club will have the first meeting of the semester at 7 p.m. Thursday in the Student Center Kadunce River Room. If unable to attend call 633-3651.

Kumbi Ambasona, dean of women at Lycee Twendelee School in Zanzibar, will visit SIU March 16. Ambasona is an alumnus of SIU and a specialist in African educational system. Students or faculty interested in meeting her should contact the Office of International Education.

The Crescent Club of Phi Beta Sigma fraternity presents "Busting Out!", a dance, from 9 a.m. to midnight Thursday in the Big Muddy Room. The fraternity will sponsor also a slave sale of the Crescents. Admission is free.

Aeon Alternatives is offering a meditation group and a Gestalt Therapy group. The Gestalt group will meet once a week for 15 weeks with a fee of $25. For registration and information about the groups call 529-2211.

Alpha Epsilon Rho will meet at 7:30 p.m. Thursday in Lawson 101. The meeting will be the last one before the conventions and plans will be made. Election of officers for next year will be held.

Ward Horton will speak on the "What's Happening in Nicaragua," at the Latin American Seminar at 8 p.m. Thursday in the Home Economics Lounge.

Michael J. Morris is the 1979 winner of the Majid Abbass Undergraduate Award for Excellence in political science. The award was established in 1976 in memory of Abdul Majid Abbass, a member of the political science faculty until his death in 1971 and former Iraqi delegate to the United Nations.

Helmut Liebfritz, professor of German in the Department of Foreign Languages and Literatures, has published a textbook which he co-authored with Jack Marbler. Deutsch Sprache, Grundstufe will be used in classes at SIU.

Recycle Your Bicycle
With a Complete Bicycle Overhaul

A bicycle deserves to be overhauled once a year to ensure a long life. A bicycle that's working properly is more enjoyable to ride and saves bike parts going up in the dumpster. Rather than buy a new bike. This thorough service includes tuning every thing apart, cleaning and lubricating, replacing brake linings, cables and chain, adjusting brakes, gears, and all spoked wheels. A new brake lining is in tight condition, making your bike safer. Your bike is done by specialists in our Pro Shop who have been carefully trained in every aspect of bicycle servicing. See the Pros for all of your bicycle needs.

Free storage over break for any overhauled bicycle.

Southwestern excursion offered to study ecology

By James Patterson
Staff Writer

Want to see the tips of the Rocky Mountains, the depths of Death Valley and the shores of the Pacific while receiving college credit for it? If so, you can consider participating in the fourth annual travel-study course "Ecology of the Southwestern United States." The month-long excursion will begin on May 14 and end on June 14, just before the start of summer school. The trip is sponsored by the Ecology Department in conjunction with its 201 "Biology Field Studies" and offers four credits. The courses offered as part of this trip may be substituted for GSA 245, "Ecology." Excursion participants will leave in Stillwater on Sunday, May 14, and fly southwest for Arizona, New Mexico and other desert states. After spending a week in the desert, the group will fly to San Diego, where it will visit the zoo, Sea World, the wild animal park, tide pools and beaches and Triton, Mexico, The group will also spend a week in the San Diego area. The excursion will then head north to the Rocky Mountains and visit several national parks, including Big Bend, Carlsbad Caverns, Zion, Grand Canyon and Rocky Mountain, before returning to SIU.

To sign up, students can see Joseph Lencz in the Division of Continuing Education in Washington Square or Bruce Peterson, assistant professor of biology.

The trip will cost $153.00, which includes room, board, transportation, books, tuition and fees for the 3500-mile excursion.

"Students may bring as much money as they wish to purchase souvenirs, but outside of that no money will be needed," Peterson said.

"This is our fourth year on this trip and so far we have always had a grand time," he added.

Students who sign up must make a $30 deposit as soon as possible and the remaining costs must be paid by April 1.

"The students should bring everything from bathing suits to heavy coats. It will be a great time in the desert and are cool in the mountains," Peterson said. When on the West Coast, students will be allowed to go night-seeing in the evenings after classes are finished, according to Peterson.

Professor emeritus dies

By John Verger
Staff Writer

Jack F. Isakoff, 80, professor emeritus in science, died early Saturday morning at 8:45. "Biology Field Studies" were held at 8:45 a.m. Sunday in the Temple with Jacob Koch as master of ceremonies. Isakoff was buried in Chesed Shel Emeth Cemetery in Cleveland, Ohio. Isakoff, who lived at 1808 Brazwood, is survived by his wife, Shirley; a daughter, Barbara Penskar of Cleveland Heights, Ohio; three sisters; four nieces; five nephews; and one grandson. Isakoff taught at the technical school department at SIU from 1942 to 1972. Prior to coming to SIU, he taught for Western Reserve University in Cleveland from 1940 to 1942. He was the director of the Illinois Legislative Council for 22 years prior to retiring in 1970. He served as chairman of the Illinois Commission on State government in 1966, and was a member of the Public Administration Committee of the State Board of Higher Education in the Clarity

Mechanic: Be aware of tricks

Ella Kelley

If an attendant looks under the hood of one's car, Maginnis said the person should look him in the eye, "You don't have to stand over him like a mother hen, but do stand in a position to see what is going on so he can't pull that nonsense." Maginnis warned.

The mechanic said he likes to make sure everything is in working order before he leaves on a long trip. He said it would be a good idea to have an oil change and a greasy job before taking the trip. Maginnis also said one should check all belts, filters, tires and the brake and steering fluid levels before leaving.

"An air filter won't wear out in a trip to Florida," although some service station attendants will tell you that, according to Maginnis.

"If you have a service job done on your car, ask for the old part or at least see it come off," he said.

Get ready for an Einstein contest

Five students have been awarded prizes in prize money for their entries in the Albert Einstein Centennial Graphic and Science Essay Contest. The contest was held as part of the celebration commemorating the 100th birthday of Albert Einstein.

K. Kaul, graduate student in physics, won first prize of $100 in the open competition for his essay on the general theory of relativity. Thomas C. Moran, junior in physics, collected the $75 second prize for his paper on Einstein and the photoelectric effect.

Kaul and Moran submitted the only two entries in the science competition, according to Paul Stahlkopf, professor in philosophy and organizer of the Einstein celebration.

Suk Radun, associate professor of physics, judged the entries.

John Caul, senior in art, won first prize of $100 for his entry in the art competition. Michelle Chael, junior, and Judith Hemsley, sophomore, both in art, took the second and third place prizes, respectively. Chael was awarded $75 and Hemsley won $50.

There were 12 entries in the art category, which was judged by Herbert Pink, professor in art.

GSE classes start after spring break

Physical education classes which meet for the second half of the semester will begin the week after spring break. The registration period for these classes will meet for the first time this week.

GSE 101A (beginning swimming), Section 201; 101B (intermediate swimming), Section 201; 101C (advanced swimming), Section 201; 101D (diving), Sections 201 and 202; 101E (gymnastics), Section 201; 101F (tennis), Sections 201 and 202; 101G (football), Sections 201 and 202; 101H (volleyball), Sections 201 and 202; 101I (basketball), Sections 201 and 202; 101J (baseball and field), Section 201; 101K (soccer and tennis), Sections 201 and 202; 101L (football), Sections 201 and 202; 101M (rugby), Sections 201 and 202; 101N (lawn tennis), Sections 201 and 202; 101O (volleyball), Sections 201 and 202; 101P (intermediate tennis), Section 201.

Professor criticizes Stevenson

By Jerry Fullertun
Student Writer

"I don't know what he's thinking—I don't think even he knows what he's thinking." So says political science professor John Jackson about the recent public statements made by Illinois Sen. Adlai Stevenson II, that have caused speculation about Stevenson's political future.

Among other things, Stevenson has been critical of the Senate, saying it no longer is the forum for new ideas as it once was. "It is arranged for him to say that the Senate is not a forum for ideas," said Jackson, who teaches a course on American government and politics. "There are only 100 senators in the whole world and there are a lot of politicians who would give their right arm to be a member of the Senate."

Stevenson, who will be up for re-election in 1966, has said recently that it may take a third party to lead the nation effectively. But he has also said he will never lead any third party. In an interview last week, Jackson said that opinion is open. Some of Stevenson's statements of late have been false, according to Jackson. "Say that the democrats are sold out to labor is a totally inaccurate statement. Sure, one or two senators are pro-labor all the way. But I don't think there is any doubt that there isn't any love lost between Jimmy Carter, and I AFL CIO boss George Meany."

"Stevenson has a little more rope left, but not much before he hangs himself."

Jackson, who holds a Ph.D. from Vanderbilt University, said there is little doubt Stevenson could win re-election to a third term in the Senate. "He is a popular vote getter in Illinois and could win easily," Jackson said. Jackson dismisses the possibility of a third party try for the presidency by the 46-year-old Stevenson. "I think he'll eventually settle for remaining in the Senate," Jackson said.

Stevenson who has said he will announce his future plans in April, was first elected to the Senate in 1952 to fill the unexpired term of the late Everett Dirksen and was re-elected to another term in 1958. His father, Adlai Stevenson II, was a two-time Democratic presidential nominee, being both times to Dwight D. Eisenhower.

"Stevenson is an enigmatic figure to me and most people in Illinois," Jackson said. "If he doesn't shape up, the rank and file Illinois democrats will become disgusted and he may have a hard time keeping himself there." Stevenson said he expects the democrats to renominate President Carter. "The economy will be the biggest factor. If inflation stays below 10 percent and unemployment stays under 2 percent, then Carter should have no trouble getting renominated." Stevenson also said he expects the democrats to renominate President Carter. "The economy will be the biggest factor. If inflation stays below 10 percent and unemployment stays under 2 percent, then Carter should have no trouble getting renominated."

"I don't see Stevenson as being a fatal factor in the nomination. He has a lot of credit in Illinois, but I doubt he has what it takes to explore a large following.

If for whatever reason, Stevenson's desire to bow out of the Senate, Jackson sees U.S. Rep. Paul Simon as a natural successor. "He is respected in Washington, and I think he would be a very good senator."

Gymnasts aim for regional repeat

(Continued from Page 20)

Victor again is brimming with confidence that the team will come through.

"It will be fun," Vogel said. the score becoming more and more through much of the season and the result will be, I'd like to say it, the way it is, we're ourselves. We're still strong," he said.

In summary, the Salukis might be the best team in the nation.

The Fighting Illini became the sixth team to join in this year's meet, the first Illinois team to do so.

The Illini also pulled another fast one. They flew in the first Illinois team to defeat the Salukis. The Salukis lost the meet with a score of 118 to 110. The Illini's team of鲜man and sophomore level were the only to be defeated.

But Vogel would have to admit there are other things—named and unnamed—active around. Unfortunately the 16-year Salukis recognized that.

The Salukis will be the No. 1 seed in the regional, which will include 12 teams. Oddly, however, SIU doesn't have the highest composite score going into the meet. That cherished honor belongs to Bowling Green University, which has a season composite score of 135.5. SIU's composite is 130.5. Behind Kent State University, Michigan State University, Ohio State University and Indiana University.

The Illini's composite, 130.5, is not a little higher than Salukis. The other teams are the University of Michigan, University of Illinois-Chicago Circle, Indiana State, Central Michigan, Eastern Michigan, Illinois, Illinois State and the University of Wisconsin-Chicago.

Although the teams scored below the Salukis shouldn't give them any trouble, those in SIU's rotation could.

Bowling Green, Kent State and Indiana State are on the first rotation along with SIU. Although Bowling Green and Kent State have the two highest season composite scores (Kent State is 135.5), Vogel says those scores are a little too high to indicate how good Bowling Green and Kent State really are. However, the coach still is in awe.

"Although Bowling Green has the highest qualifying score going into the meet," Vogel said, "but if they are as good as that score, we'll have to

Hawk Wilson named to Hall of Fame

Tampa, Fla. (AP)—Hawk Wilson, one of baseball's top sluggers in the 1930's, has been selected to baseball's Hall of Fame. Wilson had an illustrious career as an outfielder with the Chicago Cubs and has been inducted into baseball's Hall of Fame.

They were chosen by the 16-member Veterans Committee in the baseball Writers Association of America.

Wilson was a terror to National League ball for 18 years. His lifetime batting average was .328, and he consistently hit for average and power. He was a 10-time All-Star and was selected for the Cubs' 1932 World Series championship.

Two more grid recruits sign

The Salukis' football team Wednesday announced the signing of two more recruits, a quarterback and an offensive tackle, to national letters of intent.

Lee Thomas, a 6-foot, 162-pound wide receiver, joins the Salukis from Cincinnati, Thomas in the class of 1980 with the football team at Princeton University.

'No fluke' lady Salukis open regional against NU

By Ella Reilly

Staff Writer

Don't date the Lady Salukis will have a match against the Northwestern Wildcats after defeating them 71-58 Sunday for the state championship.

This time, the Salukis face the top-ranked Wildcats in its opening round of the Midwest regional tournament at 2 p.m. Thursday.

Northwestern, also Big 10 champion, received an at-large bid to the tournament after Purdue refused to bid. SIU, 20-5, will be playing the Wildcats, 21-3, for the third time. In the first meeting the Salukis played NU after a long and tiring road trip full of travel problems and the Wildcats won 84-64.

"We proved that we are as good as their best,"" Scott said of the state championship game, the Salukis' second meeting with NU.

The Salukis fell behind by seven in the first half, but they pulled through with a one-point lead at halftime. In the second half the Wildcats pulled ahead to 11-point lead again, but the Salukis never lost their cool, Scott said, and made a tremendous comeback with 18 straight points to give them the lead and later the game.

Scott said the man-to-man defense had given the Salukis control of the tempo of the game and that they will use it again Thursday. The defense held the Wildcats to a 36-percent shooting.

"It will be a tough game but if we get

Gymnasts try to defend regional title

By Gerry Bliis

Staff Writer

It's been almost two weeks since the women's gymnastics team was upset by the University of Illinois in the state meet in the Arena and ever since that time the gymnasts have been enjoying their own special "Spring Break."

Well, not quite.

The gymnasts have been preparing for the Midwest regional March 17-18. And even though the gymnasts would much rather be banking in the sunlight of the state in the Associated Press high school poll, led throughout most of the game, but the Devils managed to stay close whenever the Terriers tried to deliver the knockout punch.

Carbondale opened its biggest lead, 27-20, midway through the second quarter, only to have Murphysboro get within three at halftime. Murphysboro turned things around in the third quarter as the Devils opened their biggest lead at 42-37, only to have the Terriers close it to one to start the last quarter.

Late in the final quarter Murphysboro opened a three-point lead that was cut to one twice on baskets by Carbondale's Johnny Faye. The Terriers were then forced to foul Murphysboro, sent the Red Devils to the free throws with deadly accuracy.

Faye, who was named to the AP all-state team for the second year, was held to 10 points after hitting only six free throws.

The Red Devils featured a balanced attack led by David Kellum and Stilley who combined for 21 points. Danny Lomax contributed 11 Ray Blakemore with 10 and Kirk Harlow with eight.

The Red Devils, the fourth-seeded team in the four-team tournament, will play the winner of the Marion-Herrin game for the regional championship Friday afternoon. The winner will be seeded fourth in last year's regional, only to win the championship after upsetting Carbondale in the opener 59-37.

Murphysboro free throws bedevil No. 12 Terriers

By Bruce Rodman

Staff Writer

The Murphysboro Red Devils hit nine consecutive free throws in the final two minutes and upset the Carbondale Terriers, 59-57 in the opening game of the Class AA high school regional tournament at Murphysboro Tuesday.

The Red Devils' free throws preserved a lead that shrank to as little as one point, 54-53, with 12 seconds remaining.

But Bob Stilley sank two free throws with six seconds left to preserve the win.

Carbondale, the 12th-ranked team in the nation, will play the first-half team for the regional championship Thursday in the Arena. "If we get

Hard work makes VIZZI 'good enough' this season

By Ella Reilly

Staff Writer

Senior Tom Vizzi will be wrestling Thursday in the first round of the NCAA national championships Vizzi, who finished second at 177 pounds in the West regional, is the only Saluki competing this weekend in the Ames, Iowa meet.

In the regional, Vizzi defeated fourth-seeded Curtis Lock of Marquette, 7-6, and then knocked off No. 1 seed Lovell Tepas of Air Force, 8-4, to proceed to the finals. In the finals Vizzi was beaten by Rick Wavel of Calif Poly SLO, but his second place qualified him for nationals.

Three other Salukis, Mike Delguz, 118; Paul Hibbs, 142; and Kevin Kaufman, 151, earned fourth-place finishes at the regional.

Vizzi, who has an 18-12 record, said he had always been close to qualifying before, but just had "not been good enough."

"I was upset a great deal by my previous three years of wrestling. All I could do was improve my conditioning and do a lot of extra work," Vizzi said. He has been conditioning since last summer and has worked hard all year.

"Right now I'm in the best condition

NCAA qualifier Tom Vizzi strains to turn his Missouri opponent over for a pin. Vizzi, 18-11-1, will be entering his first season at 177. The Salukis have no

before nationals by running three miles a day and doing extra work. He said that his conditioning will work to his benefit at the national meet.

"You can go for quite a long time for five minutes, but the final three minutes depend on conditioning," he said. By the end of the week I'll have done 1,000 practice take-downs.

Vizzi said he has done many take-downs in succession so he won't fall into an old habit of having his"wrestling way, instead of my own style. Most of the matches I've lost during the season were gains, I can handle them in another way, defensively rather than offensively.

"I won't make any claims to being a national champion," he said. I'll just go out and do my best, and be satisfied."

Vizzi said he could not have been in such good shape if it hadn't been for the other wrestlers on the team. "I wouldn't have been in shape," he said. "I've been Bill Ameer, Jeff Walker, Kevin Kaufman and Steve Byrne," he said.

Vizzi said competing in practice against good wrestlers has helped him a good deal.
