Watt quits

WASHINGTON (AP) — Interior Secretary James Watt, embattled for nearly three weeks over his refusal to appoint a federal advisory panel, resigned Friday after being told by President Reagan that he would be removed. Watt made the announcement in a cow pasture at a ranch where he has been vacating himself since Tuesday.

Reagan, in a statement issued late Friday, praised Watt for his service and said that the firing will be held in office until a successor is appointed. Watt, who has been secretary of the Department of the Interior for nearly two years, had been named to the cabinet by President Ronald Reagan.

Reagan said Watt "has initiated a careful balance between the needs of people and the importance of protecting the environment. His dedication to public service and his contributions as secretary of the interior will long be remembered."

Reagan said Watt informed him of his decision by telephone during a break at an energy conference in Washington D.C. Watt said he was resigning because "our usefulness... has come to an end."

McAnally looks for success as SIU fundraising director

By Phillip Floral

Staff Writer

Like the Sahki football team, Stan McAnally may have a banner year awaiting him as director of the University of Southern Illinois' fundraising office, The SIU Foundation.

With the creation of an athletic fundraising office within the Foundation last year and an increasing number of opportunities to promote the strengths and opportunities of SIUC, McAnally said he's confident of reaching his goal of raising $5 million for the University in five years. And maybe in four years, he believes.

Cash contributions to the office for fiscal year 1983 topped $1.8 million, a figure 1.8 times the previous year, representing an 8 percent increase, which was "modest," McAnally said despite its being the first year of the program.

Total gifts increased 34 percent, and the office received over $1 million in gifts of kind — such as donations of equipment used in various departments — compared to $239,800 in gifts the previous year.

SIUC received two grants totaling $100,000 from the Foundation, one establishing a scholarship fund for incoming freshmen and the other for programs aimed at improving the quality of the educational experience of SIUC students.

A telethon campaign, where contacts are established by faculty and staff through direct phone calls and raised $38,000 last year. This year's telethon, which began Oct. 1 and will run four nights a week until the third week of November, is expected to raise more than $50,000 and reach 60,000 households.

McAnally said it was "entirely possible" that an office for raising money specifically for athletics could be created within 90 days, or before the new year. A person would be hired to direct the effort, and efforts would be made to coordinate both staffs, he said.

"Instead of having it separate, we could do a much better job if we worked together as a coordinated staff," McAnally said. Having both programs within the Foundation would eliminate chances of missing a donation or asking the same person, business or corporation twice, he said.

McAnally said his job is creating opportunities for "people to get involved in the university." But, he said, the people themselves must decide to donate first.

"People have to believe in the mission of the institution and its stability, goals and leadership, not in the asking them to give," he said.

McAnally said his role was to communicate with faculty, college and department chairs for input used to structure the goals and mission of SIUC.

McAnally said that seeks to identify and identify their departmental needs, and then he takes those needs to local and national groups.

Thompson says no to prison at BSC

By Anne Flessa

Staff Writer

A day before city and University groups were to make a major push for opposition to the proposed sale of the Baptist Center to the Department of Corrections for use as a minimum-security prison, Gov. James Thompson announced that the state will not buy or lease the facility.

"Given the close proximity to the main campus at SIU and the concerns of area residents, I have told the Department to cease its negotiations for the property," Thompson said Friday.

Woody Mosgro, Thompson press aide, said Friday that the decision was reached after community opposition became evident. Mosgro said that the governor also consulted with area legislators, including state Reps. Ralph Dunn, R-115th District, and Robert Winchester, R-118th District.

"The governor has said in the past that the state will not put a correctional facility of any kind in a community which is not interested in having one," Mosgro said.

Mosgros said a similar DOC plan calling for the use of one of the campuses at Touch of Nature is still under consideration.

Carbondale Mayor Helen Westberg said Friday she had heard rumors of possible gubernatorial action, but said that prior to Friday's announcement, she wasn't sure what kind of action that may have been.

"It feels good to have won," Westberg said. "I think the governor could foretell the results, and I think it's fortunate that the governor acted before Parent's Weekend."

Westberg said the city and the Undergraduate Student Government, with a major petition drive at "crucial time for the community's heart and city.

Westberg said the plan called for the SIU to be located at the Student Center, University churches, the Farmer's Market, and at area churches.

Westberg expressed thanks to community members and the governor. "Jackson, USO vice president. "I think that the amount of involvement we received says something about this community," Jackson said. "We felt gratified because the willingness of people to get out and support our cause."

Jackson said she expected to collect over 700 names by the end of the week, which had been the goal.

Jackson said despite the governor's apparent victory, the remaining petitions will be sent to Thompson's office, the Illinois State Bar Association and Michael Lane, director of the DOC.

City Council begins working on new bonds for hotel, garage

By Patrick Williams
Staff Writer

After nearly 10 years of anticipation and having its fingers burned after its land acquisition ordinance was ruled unconstitutional by the Illinois Supreme Court, the City Council has become circumspect in its dealings to complete the downtown conference center.

For instance, last week the council approved a measure bearing a set of qualifications that will keep it from committing itself before it is certain work on the center will proceed. The council voted to hire the firm of Berge and Pitt of Chicago as bond counsel in two actions on the city's general obligation parking garage bonds.

The firm will handle the cancellation of $4.3 million worth of unused 1981 parking garage bonds. Money from the bonds will be used to buy securities. Earning's from the securities will pay for the ratification by the board.

Agreement between the bond's and teachers' negotiating teams was reached Monday. Friday, said Ron Darnell, chief negotiator for the teachers.

"It's a very fair contract. It doesn't put us up in the top of the South Seven, but it's something we can live with," Darnell said.

Two previous offers had been rejected by the teachers, who have been working without a contract. A major stumbling block to a settlement was deciding what share of teachers insurance premiums the board would pay.

A mediator from the American Arbitration Association of Chicago had been working with the two sides.

News Analysis

bonds, which were issued at a 12.5 percent interest rate, according to Community Development Director Don Monty.

The city, through Berge and Pitt, will then reissue parking garage bonds at an interest rate closer to 9 percent.

But before the parking garage bonds are reissued, Monty said, the city must approve issuance of $1.5 million in revenue bonds for the conference center itself - a 24-story hotel to be owned by developer Stan Hoye.

Before hotel bonds are issued, the city must acquire 17 parcels of land from private owners at the proposed site for the center.

And a delay in land acquisition, caused by court nullification of the "quick take" ordinance, caused the original parking garage bonds to go unused. The city had hoped to use eminent domain to acquire the property needed for the project through the land acquisition ordinance.

The delay, issuance and reissuance of bonds has been costly for the city. When the original revenue and parking garage bonds went unused, the city was required to pay Hoye a $140,000 interest penalty.

In addition, the city paid Hoye $231,000 to cover the expense of issuing the first garage bonds. Hoye will pay for the new issue.

Also, the city has already paid $20,000 on the principal of the old bonds, and has another $375,000 coming up in December, finance director Paul Serzien said.

As expensive as the financial manipulations have been, the council has taken several steps to cut its losses. One step was the cancellation of the 1981 bonds. Another is to combine $2 million worth of capital improvement bonds with the new parking garage bonds.

If the new parking garage bonds are issued, combining the two sets will save the city about $100,000 in legal fees.

Two marines wounded in Beirut

BEIRUT (AP) - Two U.S. Marines were slightly wounded and a U.S. helicopter was hit by small arms fire Sunday at the Beirut airport near Beirut International Airport.

Maj. Robert Jordan, a Marine spokesman, described the shooting as a possible effort to "goad the Marines into action." He said the Marines did not return fire in either incident.

Also Sunday morning, a U.S. helicopter parked near the Marine camp was struck by small-arms fire, but there were no injuries, Jordan said.

Anti-nuclear protests expected

LONDON (AP) - Hundreds of thousands of anti-nuclear demonstrators are expected on the streets of Western Europe in the next few weeks as NATO moves toward stationing new American missiles in Europe.

Organizers are counting on several hundred thousand protesters in Bonn, the West German capital, Oct. 22 for the main rally, with others planned the same day in Hamburg, West Berlin and Stuttgart - all preceded by blockades of U.S. and West German military installations, rallies and street demonstrations starting Oct. 12.

Carbondale Community High School's Student Council ratified a contract 75- Friday, the third proposal to go before them in seven weeks.

A special meeting of the district board to allow members to vote on the contract, is tentatively scheduled for 7 p.m. Monday in Central High's Learning Resources Center.

No details of the contract were released pending ratification by the board.

A representative from the board's and teachers' negotiating teams was reached Friday. Friday, said Ron Darnell, chief negotiator for the teachers.

"It's a very fair contract. It doesn't put us up in the top of the South Seven, but it's something we can live with," Darnell said.

Two previous offers had been rejected by the teachers, who have been working without a contract. A major stumbling block to a settlement was deciding what share of teachers insurance premiums the board would pay.

A mediator from the American Arbitration Association of Chicago had been working with the two sides.

McAnally from Page 1.

levels. The commitment of faculty and staff and the help they’re giving to a goal is incredible,” he said.

McAnally, who began work at Carbondale in May of 1982, said progress has been made to increase contributions from SIUC alumni. He said the key is not one person making a large donation, but many giving what they can.

“Looking at alumni, we were not doing the job there that we needed to be doing,” McAnally said. He said that if his office can increase the amount of dollars raised from alumni, other things would flow from that.

Non-alumni who have acquired an interest in a university through an alumni are often a source of large gifts, he said. McAnally said his office has had success already because of efforts to increase mail sent to alumni and upgrade its quality. He said there was a 25 percent increase in the number of alumni donors in the first year of the program and a 20 percent increase in the amount of money raised through direct mail.

“Every gift is important, especially to a fledgling university,” he said. “That’s most important in getting that person to make a first gift.”

The state of the economy has very little to do with how people feel about giving to a university, McAnally said. His experience from fundraising positions at the University of Tennessee and the University of Missouri has shown that people give during hard times, he said.

Total giving from private sources, businesses and corporations was on the increase for universities last year.

He said it’s important to make people feel they are making an investment by giving to a university. “They see that a university’s heat, light and water bill is up like theirs,” he said. “The effort of the University is the same as individuals.”

Prison from Page 1

Before the announcement Friday, SIUC-AC administrative sources said they could neither support nor oppose the sale, but expressed concerns about campus security and the perception of that security.

Regarding the governor’s decision, John Guyon, vice president for academic affairs and research, said, “I think it is a wise course of action. We have had our concerns about security, and we think this would be best.”

Myron Dillow, chairman of the Committee of Concern for the Baptist Student Center, said the local organization was “highly pleased and elated” over Thompson’s move.

Questions remain about prison plan

By Anne Flaxza

Staff Writer

Despite Gov. James Thompson’s announcement Friday that the state will not pursue plans to convert the Baptist Student Center into a minimum-security prison, questions of University involvement in that plan remain.

The governor’s chief spokesman said Friday that it was the University which first brought the availability of the Center to the attention of the DOC, according to published reports. David Gilbert, Thompson’s chief spokesman, reportedly said that the University also approached the DOC regarding the use of Touch of Nature with the possibility that a work camp might allow the area to be cleaned up.

State Sen. Gene Johns said Thursday that University officials had suggested that prisoners could be housed at the Baptist Student Center. Gov. James Thompson announced Friday that he had ordered the DOC to discontinue its attempts to buy or lease the BSC, which is adjacent to the SIUC campus.

Opposition to the DOC plan among the City Council members was unanimous.

The university also thanks Governor Thompson for stepping the DOC’s attempt to locate the prison in Carbondale, and urges groups opposed to the original DOC plan to continue to work against “allowing any minimum security prisoners in this city at any location.”

USO to make request of city

The Undergraduate Student Organization and Student Programming Council have fallen $1,000 short in money needed to cover the expenses of hiring a band, Big Twist and the Mellow Fellows, for Halloween.

The USO will go before the City Council Monday night to try to get the city to waive the licensing fee for the booth it will operate on Grand Avenue Oct. 26 and 27.

Total costs for hiring Big Twist, a warm-up band and providing lighting and security at the Recreation Center are $3,500. The Office of Student Affairs has guaranteed $2,500 of that amount for the bands, which are scheduled to play Saturday, Oct. 29.

The USO and SPC will split the unfunded expenses and use profits from the booth to cover them. The organizations had been trying to find a sponsor to provide the $1,000 but have been unsuccessful.

The minimum fee for booth licenses, other than those selling beer, is $190. A special formal meeting of the council will be held Monday night. The council will consider ‘an ordinance thanking community groups that voiced opposition to the Department of Corrections attempts to place a minimum security prison at the Baptist Center.

The undergraduate council also thanks Governor Thompson for stopping the DOC’s attempts to locate the prison in Carbondale, and urges groups opposed to the original DOC plan to continue to work against “allowing any minimum security prisoners in the University’s heat, light and water bill is up like theirs,” he said. “The effort of the University is the same as individuals.”
Spoils still abound

The Chicago Sun-Times reports Sun day that state legislators are using the Illinois General Assembly's scholarship program as a "political plum" for the education of political allies — and those of their constituents.

So what else is new?

If political ideas in Illinois and the nation have changed, one in particular the Chicago Sun-Times policy will still be the same: They can help to elect candidates who helped them get into office or to find as many new allies as they can. Frankly, it's only natural.

General Assembly Scholarships are one way. Legislators have a few hundred thousand dollars. And the $1.5 million per year which the board, in a different formation letter, and take to the people. Either way, I cannot real until everyone knows this Good News of Salvation.

Devotion must be intended for all the people, and just because you find what some people have been saying (the was a convincing) does not mean you were not convicted. Personally, I believe, and know, that the only right thing to do is to serve God or not to try. Mr. Parrish, rights to free speech, free press are part of a democracy and the Constitution.

This country was founded by the same people you are agreeing to discriminate. Religious freedom — it was good while we were beginning of its end. The irony is that if the prophecy tells of them, in Cuba, Sophomore, General Studies.

Tobacco smoke is Hell

I am beginning to think that freedom is not what you have freedom to suppress any opinion contrary to its own. When Quincy Adams was a young man what he said to be of a personal nature. At that time I was told I could tell my own mind, but I found out recently, that was also impossible. Even though my mind was my own, and I was given a receipt, after two days, when my tutor found out that my money had been returned by mail to me. This is what I believe: I am bound to my nature, must be free. I am bound to my friend, who choose to deny me my voice, but then I realize the hold Satan has on me, and I am more surprised. If the editorial staff also chooses to deny me this printed space, even I will be forced to issue my own information letter, and take it to the people. Either way, I cannot real until everyone knows this Good News of Salvation.

Devotion must be intended for all the people, and just because you find what some people have been saying (the was a convincing) does not mean you were not convicted. Personally, I believe, and know, that the only right thing to do is to serve God or not to try. Mr. Parrish, rights to free speech, free press are part of a democracy and the Constitution.

This country was founded by the same people you are agreeing to discriminate. Religious freedom — it was good while we were beginning of its end. The irony is that if the prophecy tells of them, in Cuba, Sophomore, General Studies.

Education suffers from 'hourglass effect'

A CRISIS exists in American higher education. Tuition costs in private colleges. Currently, about 1.3 million students are going up. And although the rate of increase has slowed down, the overall price of college education is still rising. In the last three years, the cost of tuition and fees at private four-year institutions rose by an average of 5.4 percent per year. At public four-year institutions, the increase was 5.6 percent. Tuition costs at two-year institutions rose by 5.2 percent, and at two-year community colleges, the increase was 4.8 percent.

The cost of tuition and fees at public and private four-year institutions has increased by about 20 percent since 1990. Tuition at public four-year institutions has increased by about 15 percent, and at private institutions, the increase has been about 25 percent. The average cost of tuition and fees at public four-year institutions is now $24,780, and at private institutions, it is $46,300.

The most significant trend in college tuition costs is the increase in the cost of tuition for out-of-state students. In 1990, the average cost of tuition and fees at public four-year institutions for in-state students was $10,000, and for out-of-state students, it was $18,000. In 2010, the average cost of tuition and fees for in-state students was $16,000, and for out-of-state students, it was $32,000.

The increase in tuition costs is due to a number of factors, including the rising cost of living, increased competition for students, and the increasing cost of providing educational services. Tuition costs at private institutions are rising more rapidly than those at public institutions, and the disparity between in-state and out-of-state tuition costs is growing.

The increase in tuition costs is having a significant impact on students and their families. Many students are unable to afford the full cost of tuition, and they are forced to take out student loans to cover the difference. This can result in large amounts of debt, which can take years to pay off. The high cost of college education is also making it more difficult for students to pursue higher education, and it is limiting access to higher education for many students. It is time for the government, universities, and society to find ways to address the crisis in college tuition costs.
**State on brink of big revolution in controls on vote registration**

Editor's Note: The following commentary was submitted by David Everson, Joan Parker and Jack Van Der Silk of the Illinois Legislative Studies Center at Sangamon State University.

Illinois is on the brink of a revolution in its voter registration laws. Gov. James Thompson has conditionally approved a bill which would greatly expand the use of deputy registrars and make it possible to register to vote in certain states outside.

If the General Assembly goes along with the governor's changes, it could mean that potential voters, starting next July, can register at libraries, colleges and universities, high schools, drivers license facilities, public aid and unemployment offices. Additionally, it means that members of civic organizations throughout the state (as defined by the State Board of Elections) could be trained to become deputy registrars. These deputy registrars could register voters at shopping malls, PTA meetings and county fairs.

Furthermore, Thompson's bill eliminates the requirement that all vote registration be done in person. By the governor's action, Czarnik said, "We are delighted with this govenor's action. It is an enormous step in registering the almost two million unregistered Illinois voters. These changes do not look so radical when Illinois is compared to other states which have recently been liberalizing registration. Election officials, legislators and interested citizens, primarily from the Midwest states, came together recently at the Hamilton Hotel in Itasca to discuss election laws and to hear "experts" from all over the U.S. talk about developing trends. We'd like to share some of the enlightening information gleaned at the conference, sponsored by the Federal Elections Commission.

TWENTY ONE states use mail registration. The officials in those states seem to take it for granted as an obvious method of reducing their workloads and seollf at the notion that it encourages voter fraud. "Voter registration by mail in a good idea," said Montgomery County, Md., official.

The most attention-getting new election device was begun in California in 1965. This law, which was sponsored by Senate President Phillip Rock, D-Oak Park, and House Speaker Michael Madigan, D-Chicago, also would provide for a uniform statewide voter registration form and reciprocal registration between overlapping election jurisdictions.

JAN CZARNIK is legislative coordinator for Project Vote, a coalition of 22 community, civil rights, "good government" groups, churches, labor unions and professional organizations, which has been in the forefront of lobbying for the new law.

---

**Halloween design boring**

No offense to Mr. Jim Cullen's artistic capabilities, but the official design chosen to represent Halloween this year is bland and boring. I suppose there are those who are intricate and ghoulish designs submitted (a 1962 poster of a skeleton with an ax comes to mind), but they were probably not chosen by the city's conservative council because they were too "scarary, keed!

And why is it R. 13 in the design? R. 51 is where the legendary Halloween festivities occur. Maybe I'm prejudiced against the city's involvement in all this, but I would think it seems like they're trying to eventually curb our yearly extravaganza into a submissive springfest in October. I hope a few school clubs are planning on printing up some promotional items that will represent Halloween the way it should be. — Michael Sekelich, Junior, Marketing.

**Viewpoint- Pornography: as it proliferates, so do questions**

By Anne Plazza Staff Writer

IT IS SHAMEFUL and annoying that in a free and democratic society an entire sex product has to demand itself upon ignorance and malicious behavior. But that defense is necessary since that same sex and free and democratic society avails itself of a problem that faces us all.

The degradation of women through pornography is not a myth perpetuated by feminists. It is not an opinion used to rationalize censorship. It is not something that can be brushed aside when the magazine or book is back under the bed or even on bookshelves.

It is a fact of life which permeates almost every aspect of American society.

THEORIES abound as to why porn, especially more violent porn, has proliferated over the last few decades. Is it a product of our new sexual awareness? No, because if we were truly sexually aware, we would regard women as human beings both in and out of bed.

It seems strange that we are still struggling with equality in society which prides itself on progressive thinking. Is porn a product of our growing equality? Has the male ego threatened the ideas of mutuality and equality? Is the thought of competing with women for jobs, respect and recognition pushing men to retain the feeling of control through violence? I don't know, but I truly hope not.

Let's say instead that men have grown up in a society in which they are encouraged to express emotions, except of those emotions which are thought inappropriate for men. "It's the way of the world." I think men are taught that sorrow, guilt, and pain are not acceptable to men. "Let's face it, it's not our nature." Perhaps the shock men feel is that pornography, which has led men to believe something that can be bettered, could be visible and open. It's a godsend" to the General Assembly for reducing their workload and scoffing at the notion that it encourages vote fraud. "Voter registration by mail in a good idea," said Montgomery County, Md., official.

The most attention-getting new election device was begun in California in 1965. This law, which was sponsored by Senate President Phillip Rock, D-Oak Park, and House Speaker Michael Madigan, D-Chicago, also would provide for a uniform statewide voter registration form and reciprocal registration between overlapping election jurisdictions.

GOV. THOMPSON's recent action on this bill is, therefore, quite timely. In his amendatory veto message on the bill, Thompson stated, "Access to registration and the voting process stands at the very heart of our democratic system and no obstacle to a voter's rights shall be tolerated."

We applaud the legislature and the governor for starting the registration revolution. Part of the reason for having elections is to get citizens involved in governing. Making registration easier only reduces the barriers to citizen participation.
Ragtime Ensemble brought Scott Joplin’s best to Shryock

By Terry Levecke

Entertainment Editor

The dance music of the turn of the century was revived Saturday night in Shryock Auditorium as the New American Ragtime Ensemble played a selection of ragtime classics, which was dominated by Scott Joplin compositions.

The 12-member ensemble orchestrated many tunes that gained modern popularity on piano arrangements - most were brought back into the limelight from the movie "The Sting." The entire range of instruments used to play ragtime in the early 1900s - flute, piccolo, clarinet, tuba, trombone, trumpet, percussion, violin, viola, cello and piano were used in this succinct performance.

Conductor Doug Walter said the group uses vintage compositions that were played in vaudeville theaters and during intermissions at various social gatherings. The syncopated rhythms and rapid articulation of the scores showcased each musicians' expertise. Almost every instrument was featured at some point in the performance.

"It is a very difficult book because there's 6 million notes - we're always reading like crazy," Walter said.

The band formed in Oklahoma City under Music Director Tom Maguire in 1995 in honor of the 150th-anniversary celebration. Since then, the band has become so busy, Walter has taken on some of the conducting duties and they are now managed by Barrett management in New York. The group plays 30 to 40 shows a year, Walter said. "This kind of music will never go out of style, it's foot-tapping and very melodic," Walter said.

The music was reproduced with exact authenticity, but ragtime never used to be presented in a concert hall format. "Joplin would be very surprised to see people just sitting and listening to it," Walter said, and then added, "we try to play a more sophisticated version - it's not better than popular ragtime, but it's more concert hall." The members of the ensemble have all studied in conservatories and represent an age range of 30 years. All are free-lance musicians and come from all over the country. There are bands in New York, Florida, California and Chicago that work in the ensemble, Walter said.

The wide age range "really helps the music just because the experience blends with the energy of the young," Walter said. "It's an important principal in general, but especially in music." Although Joplin's compositions dominated the performance, as he did the style of music, works by Debussy, Anderson, Blake, Walton, Satie, Williams, Stravinsky and Green were also played.

"Stepping Out" by Al "Rags" Anderson was one of the highlights of the evening that featured Walter's "happy" rhythm on the xylophone. The Joplin sound was captured by pianist Peggy Payne in "Solace," one of the songs used in "The Sting."

The ensemble didn't leave anyone disappointed by leaving "The Entertainer" for their first encore. The band played everything they knew for the receptive crowd, which were left wanting more.

The ensemble's tour was only a week long this time, but according to Walter, the music will stay with him at least two more. "Every time I leave a tour, the next two weeks the melodies stay with you - you can't get rid of them. That's the primary attribute of a melody - they're unforgettable."

$1.5 million worth of hashish seized by narcotics officers

CAIRO, EGYPT - Narcotics officers seized hashish worth $1.5 million after a shootout with smugglers on the outskirts of Cairo, the newspaper al-Ahram reported Sunday. It said the officers arrested one of the smugglers after encircling their hideout in the Esqalam district early Saturday but did not report any casualties in the gunfire. No other details were given.
John Prine, Michael Johnson interpret life through songs

By Lisa Nichols
Staff Writer

With his introspective numbers ranging from sad to humorous to sarcastic, John Prine somehow managed to bring a feeling of intimacy to his audience during his sold-out performance Friday night in Shryock Auditorium.

The charismatic performer mesmerized the crowd with the hauntingly wistful "Sam Stone," a song about a veteran who grows dependent on the morphine given to him when he was wounded in South Vietnam. "There's a hole in Daddy's arm where all the money goes, and Jesus Christ died for nothing, I suppose," Prine crooned.

The crowd remained captivated as Prine explored the human experience with songs like "Storm Windows," a lovely ballad about feeling old and alone. But Prine's signature concertively - and often even sarcastic - tunes gave Prine his trademark as "The American Storyteller.

"If heartaches were commercials," Prine sang, "we'd all be on TV." Where does Prine get the ideas for his lyrics? "The Bottomless Lake" came from a story his granddaddy told him years ago, Prine explained. The story was about a family who drove into a river so deep that they would never hit bottom. "Well, I was just a little kid who believed everything I was told, and I got to thinkin," Prine said, "and I figured that if they had some food with 'em and if the windows were rolled up real tight, they could just go right on living even as they fell." He explained that he changed the river into a lake for the song because "not too many words rhyme with river."

And when a friend was having trouble selling his house, and Prine was having trouble getting a divorce, they decided that was their cue to write a bad luck country song, Prine told the laughing audience.

Prine's rough, scratchy voice was contrasted by the sweet, clear soprano tones of bassist Rachel Peer during some of the ballads. The performance was further enhanced by the arrestingly fluid electric guitar pickings of Irishman Philipponnelly.

See PRINE. Page 8
**PRINE from Page 7**

Prine performed songs from each of his eight albums, including "Dear Abby," "Illegal Smilies," "Sabu the Elephant Boy," and "That's the Way That the World Goes Round."

In a tired and weakened voice, Prine told the crowd the good news that he heard from Steve Goodman, who was supposed to appear with Prine but cancelled due to illness. "He's feeling a lot better, and wanted me to tell you 'hello,' and he's sorry he couldn't make it," Prine informed the crowd.

Filling in for Goodman was Michael Johnson, who played for about an hour before Prine took the stage. Johnson is best known for the hit "Bluer Than Blue," which hit the top 40 charts in the 1970s.

"I used to spend a good portion of every day sitting in the top 40 charts," Johnson stated to the audience. "But when I had a top 40 hit, I became sensitive about it!"

Although the crowd had looked forward to seeing Steve Goodman, Johnson's humor and personable style quickly held the audience captive as he told tales and played a variety of songs.

To introduce the humorous ballad "Old Yellow Car," Johnson wittily told the crowd, "I got my first car from my brother - paid him $10 for it. I didn't know anything about cars, but I didn't have to do much to change the oil. I didn't even know how to check the oil. In fact, I once put a quart of oil in the radiator."

The crowd tittered, but then broke into a hearty laugh as Johnson said, "Well, I just wanted to let you know what you're dealing with here!"

Then softly sang about the old car, recalling the good times had in the back seat, the stab, his friend Willy left when he threw us up on the front seat and finally about the rust and metal which is all that is left of the shell of a car.

Johnson dedicated one song to freshmen, saying "because I was a freshman once - for several years." Referring to the predominantly older audience, someone in the audience yelled, "What freshman?"

Johnson sang a song that he penned with Michael McDonald, formerly of the Doobie Brothers. He explained that the song is about what it's like to go without drinking. "I don't mean to preach from an ivory tower," Johnson said, "but I just got tired of waking up and feeling that familiar cold thing on my shoulder - the floor!"

Backstage, Johnson said that he had never met McDonald, but had recorded one of his songs. McDonald heard the recording, liked it, and called Johnson. They ended up penning a song together via telephone.

Johnson said that he no longer wants a top 40 hit just for the thrill of it, but would like the song in the arm another hit could give his career. Despite the drawbacks of spending almost two inches taller. Johnson says he loves to tour.

As he spoke, Johnson hurriedly packed his bag to head for his home in Minnesota. "I want to hear John (Prine) play a couple songs before I have to leave," Johnson said. "My favorite songs are the slow ballads - John Prine is my favorite poet."
Woody Hall

It will be worth a refill of coffee if you visit Woody Hall Cafeteria for breakfast.

Breakfast served from 7:30 - 9:45 a.m.

Buy a breakfast entree and a cup of coffee and the refill is on us.

Daily, Luncheon Specials - Sandwich Specials - Soup and Chili

Cafeteria - 7:00 - 1:30 Monday-Friday

House speaker may challenge
Thompson's use of veto power

By William C. Strong
Associated Press Writer

SPRINGFIELD, Ill. (AP) —
An intriguing constitutional and political scrap may be brewing at the Statehouse over Governor Thompson's exercise of his authority to rewrite bills passed by the General Assembly.

And the battle lines could be drawn on an issue likely to generate lots of ink — the "freedom of information" legislation designed to make it easier for news organizations and the public to look at government records.

Democratic House Speaker Michael Madigan of Chicago, a regular antagonist of the Republican governor, has hinted he may challenge Thompson's use of his "amendatory veto" powers.

Madigan contends that Thompson's legislative rewrite powers blur the constitutional distinctions between the executive and legislative branches.

"In Illinois, we no longer have a true legislative-executive relationship," Madigan told reporters last week as lawmakers formally opened their fall session.

"Every legislative measure purports to deal with the law. But when the amendatory measure is used, the executive department then takes every bill and conducts the constitutional hearings in the private of his office," Madigan said.

Student researches birth defect causes

By Joyce Vanderheide
Staff Writer

Much research has been performed concerning the effect of maternal use of drugs, alcohol and other agents on offspring. Interest is growing at the other end of the spectrum concerning male use of different agents and their teratogenic effects on offspring.

As her master's thesis in biopsychology, Sarah Lantz is studying the effect of male rats' morphine use on offspring.

Prompted by an article indicating that male mice administered morphine were born with short tails, Lantz, with female mice, analyzed male rats and produced lower birthweight offspring. Lantz decided to test rats in the same manner and examine behavioral effects.

In her study and a half long study, Lantz injected male rats with morphine for five days, withdrew the rats from the drug for five days and mated them with untreated female rats. At mating, the drug had been metabolized and was not present in the rats.

Lantz, under the supervision of Robert Jensen, said the rats start with relatively low doses of morphine in order to develop the effects of the drug. As the animals, the rats need even increasing doses to achieve the same effect.

Jensen, associate professor of psychology, said the effect of morphine on humans is comparable to the heroin addict's withdrawal after a fix of heroin.

As with the mice study, the rats were of lower birthweight than the pups in the control group. Low birthweight is considered a bigger indicator that something has gone wrong.

Lantz also found behavioral defects including poor reflexes, altered learning differences and activity level differences. "Behavioral defects of the mind" are sometimes overlooked by researchers who focus on physical abnormalities, Jensen said.

Activity levels are measured by placing the rats in an electrical activity monitor -- a cage similar to their home cage and environment -- which measures how much the rats move over a 27-day period, Lantz said.

Memory is tested by training 2-day-old rats to stay in a certain area of a box and shocking them when they venture into the white area of the box, Lantz said. The next day the rats are placed in the experiment and the control group, Lantz said.

She was concerned that the rats might regulate the amount of testosterone, a major male sex hormone.

Jensen said the amount of environmental stimulation affects position, response in some female animals, which may affect the implantation of the embryo.

Lantz and Jensen are not sure how the morphine caused defects are transmitted to the offspring. The morphine is not acting on DNA, causing mutations, Jensen said. The rats are not acting on hormone levels, Jensen said and is smaller and behaviorally different.

"Here are questions that nobody in the world knows the answers to," Jensen said. "To find out if it is the drug's effect or the drug's withdrawal the rats are analyzed.

Lantz also found the behavior of non-addicted female rats is altered by exposure to morphine, Jensen said.

Student researches birth defect causes

Continuing Education to offer seminar on office automation

by John Stewart
Staff Writer

The Division of Continuing Education will offer a seven week course on office automation starting Oct. 7. Topics for the seminar will include adapting office staff to technological change, data and word processing, and records management.

"The information age is here," according to Lillian Schell, head of Secretarial and Office Specialties and the instructor of the course. "Office automation can provide faster, more efficient, and cheaper to run offices have to be planned, though. The course will attempt to acquaint office workers with technology and office automation." Seminar participants will learn how to analyze office equipment and software, office layout, and staff acceptance and training.

Seminar topics will include defining the seminar's role in office automation, records management and micrographics, and word automation processing. Seminar participants will learn how to analyze office equipment and software, as well as motivation and acceptance of the machines by employees.

The course is designed for office managers, executive secretaries, administrative assistants and others in office decision making. Participants must sign up with the Division of Continuing Education by Oct. 12, the cost is $62.

Seminars instructor John Stewart is the author of "Records Management" and "Time Management." Stewart has been teaching office automation classes for 18 years. Stewart has supervised the course for 18 years.

7:30pm

Come meet: Dean Hopson
Dean SIU Law School and a panel of SIU Law School Students - also the Placement Officer.

Man arrested in bar incident

The Jackson County Sheriff's Department arrested a Murphysboro man for disorderly conduct after he allegedly struck another man with a bar chair Sunday night.

Andy Fricke, of Murphysboro, was treated and released from Carbondale Memorial Hospital after the incident at 3:28 a.m. at PJ's Bar & Grill, Route 5 in Murphysboro.

Lantz said he doesn't know if the information about the drugged father relates to humans because researchers cannot experiment with humans. "In any case, this is potentially quite important and quite exciting," Jensen stated.

We are not screening for teratogenic effects but are trying to determine how agents in the environment can cause birth defects, "a very, very real problem nationwide," Jensen said.

Finding how environmental agents are non-mutagenically transferred to offspring will be more important than simply finding the effects of morphine, Lantz added.

Lantz's study could help determine that males, as well as females, should watch their use of agents that may have physical and behavioral effects on future generations.
Entrepeneurs try to capitalize on AIDS; 'cures' promoted

LOS ANGELES (AP) - From vitamins and nutritional programs to shots and even acupuncture, entrepreneurs are offering cures, preventive treatment and advice on AIDS to a nervous public - for a price.

The medical community says there is no cure for AIDS, or acquired immune deficiency syndrome, a disease marked by the inability of the body's immune system to resist disease.

"Lack of knowledge opens the area up to entrepreneurship," said Dr. Shirley Fannin of the Los Angeles County Health Department. Some of the so-called cures, she said, "quite obviously are hocus-pocus and old things that never cured the things they were promoted for 50 years ago."

Homosexuals, Haitians, abusers of injectable drugs and hemophiliacs are most likely to get AIDS. It is apparently spread by sexual contact, contaminated needles and blood transfusions, not by casual contact.

Since AIDS appeared in 1979, it has struck more than 2,400 people and claimed 981 lives, according to the Centers for Disease Control in Atlanta.

"I think that whenever there's an epidemic and the fear of the public is stimulated, that certain people will take advantage of the fear and the panic that occurs in the community among high-risk groups," said Dr. Bruce Other, co-chairman of the medical advisory board for the AIDS Project in Los Angeles.

Other, Ms. Fannin and other public health officials say they fear that most so-called alternative medicine approaches to AIDS from the public.

"We usually get asked 'What about this cure?' or 'What about this treatment?' We also have people send us newspaper clippings or advertisements," Ms. Fannin said.

"Once somebody sends us a copy of a page from the Acupuncture News supporting the notion that acupuncture was an effective treatment."

Because of strict U.S. laws on marketing unproven cures, some offerings come from Mexico.

Publication director selected

Lorraine O'Malley has been selected as director of publication for University Relations. In the newly created position, O'Malley will supervise Alumni magazine and the SIU Courier.

Mitch Bart, education coordinator for the AIDS (Kaposi's Sarcoma) Foundation in San Francisco, recalls finding flyers for one purported preventive measure in the subway.

"I sent that to the Postal Inspector in San Bruno," Bart said. He said recently he was told that jojoba oil, made from the seeds of a small shrub found in the desert Southwest, was an effective measure against AIDS.

Bart is also looking into an advertisement which appeared in a national gay magazine. The ad urged readers to send $5 to a Washington mailing address, for a "FIRST AIDS ALERT KIT."

"There is no early warning for AIDS," he said. "My suspicion is that you will get literature telling you about the symptoms, and we can do that for 10 cents"

Career Counseling is providing the SIU-C student with a new dimension in counseling - the Computer Assisted Self Investigation and Exploration program.

Through interaction with CASIE, students are offered care assistance in self-assessment, career-choice alternatives and self-management, said James Scales, counseling psychologist.

The self-assessment program provides the student with an evaluation of his personal potential in psychological terms as well as in relation to the world of work, Scales said.

The career choice alternatives program provides information about majors, minors and special programs. It also breaks down information on job possibilities, salaries, which companies have hired and interviewed at SIU-C and where to get more information about the companies.

Programs on studying, time management and coping with test anxiety are offered through the self-management programs. Students may use any or all of the programs without having to go through the whole cycle.

Scales said the unique feature of the CASIE system is that the system was written and programmed by Career Counseling and is based on SIU-C information, not a global approach. The information is updated every year.

Students may qualify for food

By David Baldwin
Staff Writer

Pitman referred regards the requirement that students be employed, either in a job of at least 20 hours per week or in a federal work-study position. Since non-students are not required to be employed, the requirement seems to be an anomaly of the system.

Pitman said he didn’t know why there is a work requirement for students.

According to information supplied by the Illinois Department of Public Aid, applicants for the food stamp program are allowed certain assets and income limits and still meet eligibility standards. Generally, single persons may have assets of up to $1,500 and a gross monthly income of $507.

These limits then increase with household size. Those, however, are only general guidelines. The application procedure requires individuals to present extensive documentation of their financial position to local caseworkers. For students, these begin with a social security card and include everything from pay stubs and checkbooks to proof of scholarship and financial aid application letters.

The award letter is a central part of the determination process for students, according to Pitman, and every bit of evidence of financial condition is then thoroughly checked before eligibility is finally determined. If an award letter indicates federal work study employment, IlliniCard is said, actual job placement is verified.

This process of eligibility determination obviously takes some time. Currently, it takes about two weeks from initial request before an applicant is even able to submit the necessary documents for consideration.

But there is an emergency provision that might be of most interest to students of anything in the entire program. "If a student is really strapped for cash," said Pitman, "and it can be determined from a simple current check that he has no way to buy food, emergency food stamps can be issued within three days."

This means that students who are experiencing a delay in the receipt of their financial aid and are out of cash can get emergency food stamps almost immediately. "Eligibility is determined by current income and expenses only," said Pitman. "If a delay in financial aid is experienced, eligibility is based on present status, not future. The future is the future and not to be taken into account."

Career planning counselor: ‘It’s a recruiter’s market’

By Roger Garrison
Student Writer

As SIU-C graduates enter into a tight job market, the interview process becomes more important than ever, says Mike Murray, SIU-C career planning and placement service counselor.

"Everybody is afraid of the economy right now," Murray said. "The present economy has made the job market really tight. Personnel managers are more selective than they used to be. There are fewer jobs available to a greater number of potential applicants.

The job interview is a highly predictable event, according to Kenneth Veil, corporate vice president of human resources for XM International.

Personnel managers across the country ask many of the same questions. There is only a slight variation among different companies. Veil said research and careful preparation are an important part of a successful interview.

Although research is important in preparing for an interview, the entire process is actually selling — selling one’s self.

"An interviewee must be an effective salesperson," said Robert Svada, national account executive for Xerox Corporation.

According to Svada, college grades become relevant during an interview. "The most important thing a potential employee can bring to an interview is the ability to communicate effectively," Svada said. "We’re looking for people that present a high energy level and a positive personal attitude. At Xerox, we feel that people are our most important asset.

"It’s now a recruiter’s market," said Murray, who works in the library of Woody Hall. "The applicants used to be able to pick and choose. Now the recruiters have the upper hand."

On the 50
Tracy Stone, sophomore in mathematics, and relax after attending a tailgate party and the Victor Caesars, freshman in marine biology, football game between SIU-C and Drake.

Scharte, as a former
River, streams swamp town

By John Barbour
Associated Press Writer

CLIFTON, Ariz. (AP) - It was expected. Not on any certain year, day or hour. But “sooner or later,” the Army Corps of Engineers said in 1979, it would come.

And a week ago Saturday, it did. The San Francisco River, originating in the high forests of New Mexico, sided by dozens of rain-stained streams, barged into this hard-luck canyon town of 4,200 and swamped all but a fraction of its homes and businesses. This was one of the hardest hit communities in the flooding across Arizona last week that left damage estimated at $416 million, with 1,359 homes destroyed or heavily damaged and 13 people dead with two missing. No one was killed in Clifton.

Standing over a map of the town from the 1979 report, town Administrator Manuel Perea turned to two visitors from the Corps of Engineers in the County Jail, now converted into a city hall-county command post, and said, "You hit it right 100 percent."

The town has seen the San Francisco rage over its banks 15 times since 1911, when Clifton was barely 20 years old. The worst previous flood was in 1906, when waters 6 feet high rolled through. Last week, the waters were as high as 5 feet, ceiling-high in most homes.

They left a shimmering sea of stained fatigues. Mud clings to everything when wet and floats in the air when dry. Some of the more than two dozen highway patrolsmen on emergency duty wear gaunt masks. National Guardsmen and women labor in muddy fatigues.

Clinical Center expands services for students

by Leon Smith
Staff Writer

The SIU-C Clinical Center is expanding its services for students. The Clinical Center has institutionalized a program to serve learning disabled students. These services had in the past been provided by Project Achieve, which had been funded by federal funds. The program is now being provided to students, employees, and the community on a partial cost recovery basis, according to Alden M. Hall, manager of the Clinical Center.

Partial cost recovery means that a small fee will now be charged for the services. However, Hall said “These fees will never be expensive as those of the outside world.”

The Clinical Center, with main offices in the Wham Building, serves a three-fold purpose. The Clinical Center provides services such as physical therapy, psychiatric and psychological counseling, and special class services for students in fields of occupation related to the center’s programs. It provides therapy services to SIU-C students, employees and the community and serves as a research center for SIU researchers.

Hall has been manager of the Clinical Center for the past 26 years. The Clinical Center provides services such as physical therapy, psychiatric and psychological counseling, and special class services for students in fields of occupation related to the center’s programs. It provides therapy services to SIU-C students, employees and the community and serves as a research center for SIU researchers.

Students comment on Lebanon

By Jeff Curt
Student Writer

Six of nine male students interviewed on campus Wednesday said they were glad the U.S. Marines in Lebanon are finally able to use fire power, and added that they are not yet concerned much personally about U.S. forces being there.

Dave Cooney, sophomore in flight and aviation management, said the American peacekeeping force "defeats its purpose."

"We should go in to win or don't go in at all," he said. "It's better than having the Marines stand around with their hands tied behind their backs."

Like most of those interviewed, Scott Piech, junior in electronics, had only "read a little" about Beirut in the Daily Egyptian. He said the only time he talked about Beirut to his friends was when they were discussing the draft.

"I'm registered," he said, "if there was a war over there, I guess I would be drafted."

Piech said he did not see much public concern over American troops there, but said that public feelings, possibly in the form of vengeance, may increase if more Marines are killed.

Scott Stasile, a junior in accounting, said the troops in Lebanon "have been like mice in fox holes getting shot at, and that's it." He added that he sees no purpose for Americans serving in Lebanon.

"I guess our purpose is to keep the peace, but that's not doing any good," he said.

Stasile said he and some of his friends often make comments while watching news coverage of Beirut, "like Reagan ought to sit in the fox hole and let them kill each other."

Stasile said the civil war between the Christians and the Muslims is really the U.S. versus the Russians.

Bob Gleason, a former Marine going to school on the G.I. bill, agreed.

"It's one big chess game between the Russians and us," he said. "With all the power we have, we could demolish them (the Muslim Drude). But we can't, because Russia's in there."

Gleason said a major reason why the U.S. and the Soviet Union are showing interest in the civil war is because the region has a lot of oil.

A senior in engineering from Iran who asked that his name be withheld said Iran's involvement is causing ill feelings in the world's Muslim population.

"The U.S. media does not show it, but the U.S. is hurting Muslims' feelings all over the world," he said.

The Lebanese have fought before, the Iranian said. "Let them decide what government they want themselves. The U.S. is keeping President Gemayel in power with American forces."

A Meditation Group is now forming. Beginners and Advanced levels of meditation instruction will be available. Novice and experienced meditators are all welcome to join. Topics for lecture and discussion will be drawn from the teachings of Krishnamurti, Zen and Tibetan Buddhism.

The Instructor has eight years of experience in Meditation and consciousness studies. The group will begin October 19. 1983, and will meet from 7 to 8:30 pm on Wednesdays at the Wesley Foundation, 816 S. Illinois Ave. (across from McKendree.)

Enrollment and information contact Steve Ellis at 569-0459.
Looking for space
Quarterback Rick Johnson scrambles to buy time while looking for a receiver Saturday in the Salukis' game against Drake. The game was Johnson's first at home this season.

DRAKE from Page 20

Johnson, playing at home for the first time this season, completed 16 of 26 passes for 262 yards and one touchdown, including an 87-yard touchdown pass to split end Cecil Ratliff. Johnson also recovered a fumble and scored on a 1-yard run.

Dempsey said the Salukis gave the Bulldogs a tough challenge despite losing 31-17 at home.

Defensive ends Dan Wetzel and Mike Brasica made 14 and 12 tackles each, while Butler also recorded two sacks, recovered a fumble and intercepted a pass.

Defensive backs Granville Butler and Collins led the Salukis with 16 tackles each, while Butler also recorded two sacks, recovered a fumble and intercepted a pass.

Ratliff, though, was not in a scoring position. The Salukis gave up the ball early and had them picked off.

The Salukis gave up their first points of the season against the Bulldogs.

Offensive tackle Nick Turner, who has been making the best of his first year with the Salukis, said the team was disappointed against Drake.

Dempsey said he will work on boosting his squad's morale this week in practice and he expects his team to rebound from its disappointment against Drake.

"I've lost games that I was supposed to have won," Dempsey said. "These guys work hard, yet they feel like they lost. I think the reason the kids are down is because the score was 7-2 so fast."

Vikings run over Bears with Galbreath, Nelson

CHICAGO (AP) — With Air Minnesota making only limited flight since the season-ending injury to regular quarterback Tommy Kramer, Vikings Coach Bud Grant trotted out a pair of bases named Tony and Galbreath and Darrin Nelson to run over the Chicago Bears.

"I haven't played that much and I needed to get hit to remember what it was like," Galbreath said Sunday, after rushing for 104 yards and 16 carries and a touchdown in Minnesota's 23-14 National Football League win over Chicago.

Before leaving in the third quarter with a strained quadriceps muscle that was torn in an injury to regular quarterback Tommy Kramer, Vikings Coach Bud Grant trotted out a pair of bases named Tony and Galbreath and Darrin Nelson to run over the Chicago Bears.

"I haven't played that much and I needed to get hit to remember what it was like," Galbreath said Sunday, after rushing for 104 yards and 16 carries and a touchdown in Minnesota's 23-14 National Football League win over Chicago.

Defensive backs Granville Butler and Collins led the Salukis with 16 tackles each, while Butler also recorded two sacks, recovered a fumble and intercepted a pass.

This week in practice, the Salukis gave up the ball early and had them picked off. From this disappointment against Drake, "I've lost games that I was supposed to have won," Dempsey said. "These guys work hard, yet they feel like they lost. I think the reason the kids are down is because the score was 7-2 so fast."

Defensive ends Dan Wetzel and Mike Brasica made 14 and 12 tackles each, while Butler also recorded two sacks, recovered a fumble and intercepted a pass.

Dempsey said the Salukis gave the Bulldogs a tough challenge despite losing 31-17 at home.

"I was throwing the ball high," Johnson said. "I was letting the ball go early. On a couple of square-ins, I threw the ball early and had them picked off."

Defensively, the Salukis gave up their first fourth-quarter points of the season when Drake scored with 1:15 left in the game. The Bulldogs were down 31-17 at the time.

Linebackers Granville Butler and Collins led the Salukis with 16 tackles each, while Butler also recorded two sacks, recovered a fumble and intercepted a pass.

Butler, though, was not in a scoring position. The Salukis gave up the ball early and had them picked off. From this disappointment against Drake, "I've lost games that I was supposed to have won," Dempsey said. "These guys work hard, yet they feel like they lost. I think the reason the kids are down is because the score was 7-2 so fast."

Defensive ends Dan Wetzel and Mike Brasica made 14 and 12 tackles each, while Butler also recorded two sacks, recovered a fumble and intercepted a pass.

Dempsey said the Salukis gave the Bulldogs a tough challenge despite losing 31-17 at home.

"I was throwing the ball high," Johnson said. "I was letting the ball go early. On a couple of square-ins, I threw the ball early and had them picked off."
Dempsey says squad won’t get carried away

By Dan Devine
Staff Writer

It took one play last year to cripple Saluki playoff hopes — a long, last-second touchdown pass by Iowa State that beat SIU-C and took all the fun out of the season for the Salukis. It was the team’s first loss after the three wins that started the season, but worse, it felt the Salukis had disgraced themselves. The hangover lasted four games and when it was over those playoff hopes were just a vague memory. All because of one play.

Saluki Coach Ray Dempsey doesn’t think the same thing can happen this year. The current Saluki edition, he said, is a year older, wiser and less likely to get carried away with playoff dreams.

“The difference is they know what they went through,” said Dempsey. “They have more composure. You notice we don’t have the celebrations in the locker room after we win like we did last year. We’re more like a pro team.”

Last year the Salukis chalked up a 10-3 record in the Missouri Valley Conference, the Chicago White Sox they won the American League pennant.

“Maybe, it wasn’t meant to be,” said Harold Baines who twice in the last two games was robbed of hits before he broke an 8-for-14 slump with a pair of singles and a walk in his last three at bats.

“Sure I’m disappointed,” said LaRussa. “But only until last year. I’d run my kids. LaRussa did not use the “It wasn’t meant to be cry,” but he intimated as much.

“Hey, the Orioles had the right guys in the right spot at the right time,” said LaRussa. “Baines hit the ball hard Friday night, right at (Rick) Dauer who turns the double play.

“Baines leads off the fourth inning. If he doesn’t get on base, he should have been a double and (Gary) Roenicke is right there to rob him.

“Juice (Julio Cruz) gets the hit at the right time and the lucky place he can hit it where we can’t score is to Roenicke” said LaRussa, his voice trailing off and his thoughts turning to what if things had happened if not for Jerry Dybizniak’s mistake.

LaRussa does not like to dwell on mistakes, especially in the case of a player like Dybizniak. He put “The Dibber” in the lineup to provide some spark, probably recalling that it was Dybizniak’s appearance in the lineup last May which helped turn the seasons around for the White Sox.

“I’m a good hunter and I’m a good base runner,” Dybizniak would be saying later.

With two men on, Dybizniak’s bunt was fielded by catcher Rick Dempsey who threw to third for a force out. Cruz followed with a single to left and Dybizniak, thinking he was safe, turned to second with his head down and suddenly was tagged by Law who had stopped at third.

“In my mind I thought the play would be at the plate,” said Dibber. “Suddenly, I was in the twilight zone, I felt like a beached whale.”

With Dybizniak hung up, Law tried to score and was thrown out at the plate by Dauer on a play which typified Oriole excellence of execution.

GOLF from Page 20

The hole at Purdue was team mate Luis Bremer, who carded a pair of 71’s to claim third on the team. Bremer also shared 17th at the Northern Intercollegiates.

Sophomore Jill Bertram finished two strokes behind Bremer, notching two rounds of 82.

Senior Sue Arbogast had a disappointing tourney, shooting an 86 and an 82 to land fifth in McGirr’s lineup. Last week McGirr said Arbogast had problems with her concentration at the Intercollegiate tourney, resulting in a finish at the lower end of the lineup.

Arbogast played No. 1 for the team most of last year, but the coach said the senior’s lack of practice time this season is beginning to show.

Claudia Heinrich played sixth for the Salukis and finished the same. She carded a 90 and a 94 at Purdue.

McGirr said her team’s problems have been the same as last season.

“We just aren’t getting a few scores in the low 70’s,” she said.

“Other teams throw two low scores at us and we can’t come back. We just need that little extra.”

“We got good play from Barb and Lisa (Kartheiser). We didn’t have a supporting cast, though. We need contribution from everybody.”

“We really need to do some work on our short game. Our putting is killing us, and the greens were real tough this weekend. Morale is still good, and the kids are anxious to get out and practice. We’re playing well, but coming up just short.”

SIU-C fans have reason to be optimistic as the team is more likely to battle the team from one to seven this season.

“The memory of last year’s collective letdown may have pumped the soft touch too,” although Dempsey said this year’s team is more likely to battle then to wallow.

“Last year’s team was a great team,” he said. “We have more character this year.”

CHICAGO (AP) — It took three straight losses to the Baltimore Orioles to convince the Chicago White Sox they weren’t as good as they thought they were, American League pennant.

“This year, we’re older, wiser, and we have more composure,” said Harold Baines who twice in the last two games was robbed of hits before he broke an 8-for-14 slump with a pair of singles and a walk in his last three at bats.

“Maybe, it wasn’t meant to be,” said Brett Burns who kept White Sox hopes alive with brilliant shotout pitching until the fourth inning. “The home run was only one out in the 10th inning Saturday.

While the White Sox displayed disappointment at being knocked out of the race, the home team was buoyed by their manager Tony LaRus’ advice. “Don’t bring your heads, you all know what you have done, it has been a great year.”

“Sore I’m disappointed,” said LaRussa. “But that only lasted until last year. We had the right guys in the right spot at the right time,” said LaRussa. “Baines hit the ball hard Friday night, right at (Rick) Dauer who turns the double play.

“Baines leads off the fourth inning. If he doesn’t get on base, he should have been a double and (Gary) Roenicke is right there to rob him.

“Juice (Julio Cruz) gets the hit at the right time and the lucky place he can hit it where we can’t score is to Roenicke” said LaRussa, his voice trailing off and his thoughts turning to what if things had happened if not for Jerry Dybizniak’s mistake.

LaRussa does not like to dwell on mistakes, especially in the case of a player like Dybizniak. He put “The Dibber” in the lineup to provide some spark, probably recalling that it was Dybizniak’s appearance in the lineup last May which helped turn the seasons around for the White Sox.

“I’m a good hunter and I’m a good base runner,” Dybizniak would be saying later.

With two men on, Dybizniak’s bunt was fielded by catcher Rick Dempsey who threw to third for a force out. Cruz followed with a single to left and Dybizniak, thinking he was safe, turned to second with his head down and suddenly was tagged by Law who had stopped at third.

“In my mind I thought the play would be at the plate,” said Dibber. “Suddenly, I was in the twilight zone, I felt like a beached whale.”

With Dybizniak hung up, Law tried to score and was thrown out at the plate by Dauer on a play which typified Oriole excellence of execution.

“Other teams throw two low scores at us and we can’t come back. We just need that little extra.”

“We got good play from Barb and Lisa (Kartheiser). We didn’t have a supporting cast, though. We need contribution from everybody.”

“We really need to do some work on our short game. Our putting is killing us, and the greens were real tough this weekend. Morale is still good, and the kids are anxious to get out and practice. We’re playing well, but coming up just short.”

SIU-C fans have reason to be optimistic as the team is more likely to battle the team from one to seven this season.

“The memory of last year’s collective letdown may have pumped the soft touch too,” although Dempsey said this year’s team is more likely to battle then to wallow.

“Last year’s team was a great team,” he said. “We have more character this year.”

Box in pits $1.15
Falafel 99¢

The recent rain probably didn't hurt the race at about the 2-mile mark much, said Coach Mary Beth McGirr of the Salukis. "We've lost a couple of athletes over the last two weeks," she said. "Athletics is that way. You hope and pray you won't have kids injured, but that's not really reality. When you run at high levels, you're bound to have some kids with problems." Zack is out for about six weeks with a broken foot. DeNoon said it was not yet known how serious Hicks' injury is. She dropped out of the race at about the 2-mile mark because of a foot injury. DeNoon said she 'jumped over something and when she came down she heard something pop.'

"She's on crutches now," he said. "When she went down, she was in third place. We could have had five runners in before (their Murray State's second and another girl in the 1st)."

The recent rain probably slowed the runners' times down, according to DeNoon. "It was a slower course," he said. "The ground was softer than it has been. We had the rain and it hadn't really dried out yet. The footing was rough and not real even."

"The kids competed hard," he continued. "Murray State took off fast. Our kids ran tough all the way. Murray State had been competitive all. At the Kentucky Invitational two weeks ago they finished sixth out of 12 and last week they finished second at the Southeastern Missouri Invitational. From a news release I'd seen, they were happy with their performance."

Murray State's Kathy Hein set the new course record despite the slow track. She shattered the old record of 19:06 with an impressive 18:19. "She ran well," DeNoon said. "She built up a good lead from the beginning. It was difficult for Lisa (Reismund) to catch her because she was running by herself. She was only 12 seconds slower than her personal best."

"It's been a good year," said DeNoon. "Our goal was to get the maximum accomplishments from each athlete. I think we've done that. Everyone is going out and having their best personal race. If we get the maximum performance from each athlete, who knows what will happen? We'll just take it one meet at a time."

Next week the Salukis travel to Edwardsville to compete in the Illinois Intercollegiates.

If fans had walked into the SIU-C golf course after the Salukis' 29th victory over Drake, they might have thought the Salukis had won by 19 points instead of won by 19 points. The SIU-C women's golf team moved up a notch from their No. 3 ranking in the NCAA 1A-A football poll after No. 2 Colgate lost 21-18 to No. 6 Holy Cross.

SIU-C certainly didn't play like a team on the road, but they faced the season's largest home crowd, estimated at 5,000, for the first time.

The first was the fourth play of the game. With Drake at its own 2-yard line facing third and seven, the Bulldogs elected to kick. The Salukis got their first block of the season and the Salukis got their first block of the season and set the trend for the day by drawing an illegal procedure penalty, forcing them back five yards. On the next play, Saluki quarterback Rick Johnson overthrew running back hoping to score. "I'd seen, they were happy with their performance."

Murray State was fifth with a 79 and a 314 for a 157, finishing one stroke behind Anderson and tying for third place. Finish first place.

Coach Mary Beth McGirr's club brought home their third consecutive finish at the No. 3 position in the Lady Boilermaker Invitational, but McGirr said she wasn't disappointed in the Salukis' showing. "The Salukis were led by Lisa athletes over the last two weeks," she said. "We've lost a couple of athletes over the last two weeks," she said. "Athletics is that way. You hope and pray you won't have kids injured, but that's not really reality. When you run at high levels, you're bound to have some kids with problems." Old habits couldn't be broken at Purdue over the weekend, with the Saluki women's golf team claiming their customary third-place finish. Coach Mary Beth McGirr's club brought home their third consecutive finish at the No. 3 position in the Lady Boilermaker Invitational, but McGirr said she wasn't disappointed in the Salukis' showing. "The Salukis were led by Lisa athletes over the last two weeks," she said. "We've lost a couple of athletes over the last two weeks," she said. "Athletics is that way.
