TIME TO CHANGE

AMY STRAUSS — The Daily Egyptian

Although blind, Jemal Powell, a senior in radio and television from University Park, says he is no different from anyone else.

Blind student says University still needs disability adaptations

By Dave Armstrong
Daily Egyptian Reporter

Jemal Powell, a blind student at SIUC, has problems on campus everyday that make using elevator buttons or simply getting to class an adventure.

SIUC received \$6 million in grant money recently in order to enhance existing requirements outlined in the Americans with Disabilities Act. Powell, a senior in radio and television from University Park, said that some of these enhancements have yet to come.

"What floor is this?" Powell said, illustrating his point that some elevators need Braille markings. "Sure, I know what buttons these are. They are in order of the floor. But sometimes I'm not sure what button I'm on."

Right now, the most important thing to Powell is his calculator. It seems he left it back in his dorm room. So Powell finds it necessary to walk from Paper Hall all the way back to Thompson Point, tapping his cane the whole way.

"The school prides itself on being the most well-equipped," Powell said. "However, there is still much work that needs to be done. Clearly."

Powell has had to memorize all the paths on campus because without an intense knowledge of the area and the aid of his eyes, he would be lost. Powell waits at a crosswalk, listening for cars.

He hears a car far off. "Are they going to go?" Powell said, hesitantly. "Are we okay?" Most students do not realize the

many different aspects that go into a project such as equipping an entire college campus with facilities that cater to students who are blind or have other disabilities. Powell said: Each element that disabled people may come in contact with during their time on campus must be adapted for those disabilities.

For example, the sidewalk just before a curb often has grooves to provide a sensory input to blind students, alerting them to the presence of the curb.

Powell finally makes it to his dorm-room in Warren Hall in Thompson Point. He has no trouble finding his way, having memorized this building as well.

"I used to live at Abbott (Hall in Thompson Point), and I had a hard time finding my room," Powell said. "I put a Braille tag on my door. That tag is still there."

A short walk to the Communications Building reveals some things even a grant cannot cure. Walking through a patch of grass, Powell nearly walks into a tree. Deftly, he sidesteps it and continues on his way.

"I don't know how I did it," Powell said about the tree. "I just anticipated it being there. It's not amazing. I don't have any super-powers."

"I just do things in a different way." Another student does things differently, too. John Brennan, a deaf senior in biological science and photographic production technology from Chicago, said he has his share of problems on campus.

Surgeon arrested for marijuana

Police officials say doctor observed growing 33 plants behind his house.

By Jennifer Camden
Daily Egyptian Reporter

A local surgeon was arrested Wednesday for alleged production of at least 33 marijuana plants, a police official says.

Michael K. Delaney, 50, of 73 Upper Brush Hill Road, was arrested by officers of the Southern Illinois Enforcement Group, a

police narcotics unit, assisted by the Southern Illinois Drug Task Force. Thomas McNamara, director of the enforcement group, said. Delaney is an ear, nose and throat surgeon at Memorial Hospital of Carbondale, 405 W. Jackson St.

According to an enforcement group news release, Delaney allegedly was observed tending 33 marijuana plants behind his residence. Agents seized 10 additional plants allegedly being processed in the area. McNamara said the street value of each plant is \$1,200.

George Maroney, Memorial Hospital administrator, said Delaney will remain on staff because there is no concern about his ability as a surgeon. He said the

Illinois Department of Professional Regulation will conduct an investigation as the case progresses and "make a determination on his (Delaney's) future as a physician."

Delaney was taken to Jackson County Jail and was given a court-ordered release by Judge David W. Wait. A spokesman at the jail said he did not know when Delaney's court date will be.

Students suffer Net addiction

By Dave Armstrong
Daily Egyptian Reporter

Ben Patterson checks his e-mail whenever he is in his dorm and admits to spending about two hours a day on the Internet checking the hits on his homepage or browsing through web sites of his favorite bands.

According to various studies, Patterson, an SIUC freshman in radio and television, from Wheaton, could be one of the growing league of Internet users suffering from Internet Addiction Syndrome.

Compulsively checking e-mail

may be one of the warning signs of Internet addiction," Dr. Kimberly Young of the Center for Online Addiction at the University at Pittsburgh said.

The center, which has been in existence since early 1995, asserts on its homepage that "Internet Addiction Syndrome has gained credibility among many mental health professionals as a clinically significant disorder, which negatively impacts social, occupational, family and financial functioning."

POLICE BLOTTER

UNIVERSITY POLICE

- Jon Lopez, 18, of Wright Hall in Brush Towers, was issued a notice to appear in Carbondale court for alleged possession of two bottles of alcohol after he was involved in a traffic stop in lot 58 at 9:52 p.m. Friday.
- At 8:33 p.m. Friday, police were called to Evergreen Terrace in reference to a report that a 33-year-old man allegedly was in violation of an order of protection placed against him by his wife. The suspect is also wanted on an outstanding warrant out of Jackson County for failure to appear in court on an aggravated battery charge. The suspect was not at the residence when police arrived. A search for the suspect continues.
- Jason M. Parizanski, 19, of Carbondale, was issued a citation for reckless driving at 3 a.m. Saturday while driving on Lincoln Drive near the entrance to Thompson Point. Parizanski is to appear in city court at a later date.

Mumford Fund open for SIUC accident victims

Evergreen Terrace opened the Caitlen Mumford Memorial Fund Friday for Jason and Meghan Mumford, the parents of 5-year-old Caitlen Mumford who died on Aug. 30 from injuries sustained in a car accident on Interstate 57, north of Marion.

Jason and Meghan Mumford, both SIUC students, and their 2-year-old son Jacob were also in the car.

Jason Mumford is suffering from a broken pelvis and broken vertebrae. Meghan and Jacob Mumford were treated and released from St. Anthony's Hospital in Effingham.

Cash donations can be deposited at the SIUC Credit Union, 1217 W. Main St. in Carbondale. Cards and letters are being accepted at the Evergreen Terrace Area Office, building 150.

Pool hall queen attracts an audience whenever she plays

By Tracy Taylor
Daily Egyptian Reporter

When it comes to the game of pool, Nicole Jamagan stands among the top of the ranks in the Student Center pool hall.

"I have played with and beat some of everybody (male and female)," she said.

Jamagan, a junior in secondary education history from Chicago, said she began playing pool two years ago.

"I used to come in the pool hall everyday just for recreation to hang out and watch people play," she said. "Then I decided I would try to play.

"I lost a lot at first, but I would play with anybody. Anybody who wanted to come in and get on my table could play."

Jamagan, who plays a couple of hours a day at the Student Center, said she had a lot to learn about the game before she actually became good at it. She said there are a lot of different skills for playing the game.

"I learned how to focus on the ball and put angles on the ball," she said. "The most important thing I learned was that you have to study before you attempt, which means you have to take your time and focus."

Jamagan said although the prospect of betting comes up with some players, she does not play for

Curtis K. Bias — The Daily Egyptian

Nicole Jamagan, a junior in secondary education history from Chicago, lines up a shot in the Student Center pool hall Monday afternoon.

money.

"I don't gamble," she said. "It is strictly for recreational purposes."

Although Jamagan has a reputation in the pool hall for being one of the best, people who are fairly new to the game often try to step up to the challenge.

Curtis Mack, a sophomore in civil engineering from Pulaski, said he began playing against Jamagan as a freshman last year.

"Nicole (Jamagan) is a good player," he said. "She beat me sometimes, but she helped me out a little."

Mack said that before playing

Jamagan, he did not really think pool was a game women could play.

"She taught me not to underestimate women," he said. "I thought she would be easy to beat."

Mack said that playing against Jamagan motivated him to try and become a better player.

"It made me want to practice a little bit harder, so next time I could give her better competition," he said.

Not only people who play against Jamagan admire her skill with the pool cue. People who watch her from the sidelines comment on her skills as well.

Lorenzo Russell, a junior in ele-

mentary education from Chicago and a pool hall worker in the Student Center, said he always notices Jamagan playing pool.

"She's always playing with different people, and she is really good," he said. "She plays well because she is really dedicated. It surprises me. I even see her in the pool hall on Saturday mornings."

Russell said that almost everybody in the pool hall knows Jamagan.

"Everybody knows that she can really play," he said. "She attracts an audience whenever she plays."

Even other experienced female pool players are surprised at how well Jamagan plays.

La'Keisha Gray, a senior in radio and television from Chicago, said she has been playing pool for a long time, and Jamagan can beat her.

"I have a pool table in my basement at home in Chicago and have been playing since I was 15," she said. "I play against Nicole, and the majority of the time she beats me."

Gray said Jamagan made her question her skill at the game.

"When she beat me, it made me feel pretty bad because I thought I was good. But she is great," she said.

She said Jamagan is a natural at the game and is a good sport.

"When she plays, it's not like she is really competitive," Gray said. "She is just playing to have fun."

Councilman: Students should be involved in politics

By Jennifer Camden
Daily Egyptian Reporter

Students make a sizable contribution to Carbondale, but their contribution would be greater if more of them took an active community role, the Rev. Loyd C. Sumner, Carbondale's new City Council member, says.

Sumner said more students should be involved with city government.

"Students, like other citizens, would benefit from registering and voting," he said. "They should require persons elected to office to fulfill their promises as resources allow."

Sumner, an SIUC graduate,

" [Students] should require persons elected to office to fulfill their promises as resources allow. "

Loyd Sumner,
New Carbondale City Councilman

recently replaced councilman Richard Morris, who resigned in July. He will attend his first council meeting tonight.

Though he said it may not have been a popular decision to many students, Sumner said he supported the City Council's decision to raise the bar entry age to 21 because

young students should take their college education seriously.

"I don't want to sound as if I'm pontificating," he said. "But there has to be more to being an individual away from home than the stereotypical things associated with students in a community."

Sumner said the city needs more

youth recreation opportunities, accessible counseling and school, community and church youth programs.

Sumner, a former pastor of Carbondale's Olivet Free Will Baptist Church, was president of the city's NAACP chapter from 1990 to 1992.

He was chosen by Carbondale Mayor Neil Dillard to fill Morris' seat and was unanimously approved last week by the other three council members.

Sumner will be sworn in as the new city councilman Sept. 17 and will participate in the council's meeting that night.

He said he plans to campaign for his seat in the spring 1997 municipal elections.

Scientific research on online addiction needs more effort

LET US MAKE ONE THING CLEAR FROM THE start: We do not hate the Internet. In fact, we love it and find it fun and useful. Like other people, we can surf for hours checking on music and pop culture. Its use as a research tool is unparalleled.

An ugly side of the Web's effects on humanity has been showing its face more and more, however. Internet Addiction, which was initially dismissed by many people as contrived, over-hyped and non-existent, is being recognized by some psychologists and counselors as a genuine affliction.

THIS MAKES SENSE GIVEN THE STORIES OF people missing work, ignoring lovers and being late for appointments because of their obsession for being on-line.

This is why people who spend a lot of time browsing the Net should do themselves a favor by taking a few minutes to evaluate the effects the Internet is having on their lives.

A problem with Internet addiction and those it afflicts, however, is that there is much work to be done by the psychology community to determine the nature of the supposed affliction. Some computer scientists charge that it has been difficult to spur the interest Net addiction deserves. We agree it is imperative that more must be done because not everyone even agrees that there is a problem.

"THIS IS THE GENERATION THAT GREW UP glued to the TV set," IBM psychologist Wendy Kellog has said. "Now they're glued to their computers. I don't think it's a problem."

It may not be a problem with computer manufacturers, but a generation of people glued to computer screens certainly sounds like a problem to us.

Viktor Brenner, a doctoral student in psychology at the State University of New York at Buffalo decided to conduct a survey on addiction after he was not satisfied with the available information on the subject. 185 people completed the survey in its first 30 days. Thirty-one percent of them said they were not performing as well at work as they did before they began using the Internet.

ALTHOUGH HIS SURVEY WAS ADMITTEDLY unscientific, it points out that something is there that the academic community has a moral obligation to explore thoroughly. This is no longer a subject that should be explored anecdotally.

A generation of people glued to their computer screens is a problem to our society — and to humanity in general. Internet use is quickly on its way to becoming one of the most popular pastimes in the nation. It is time for the negative effects being online can have (no social life, poor health, poor performance at school and work) to be fully explored so those who need help can get it.

QUOTABLE QUOTES

"I'm a loyal guy, and it's a bill"

—Bill Clinton Adviser James Carville, on the welfare bill recently signed by President Clinton.

"I don't think of the future. It comes soon enough."

—Albert Einstein

L E T T E R S T O T H E E D I T O R

SIUC parking ethics terrible

After driving 25 minutes through heavy traffic to get to Carbondale, I carefully unloaded my daughter at day care and was on my way to the parking garage adjacent to Fanner Hall.

I know the deal by now, and to expect there to be an empty spot waiting for me on the upper level would be foolishly optimistic.

However, I also know that by staying put in one spot long enough, one is almost always rewarded by the sight of someone lugging a backpack with keys in hand, heading for a car that's parked in your row.

I was lucky enough to see this sight three times this morning. The first time, the person pulling out had arranged with her roommate to give her the spot for which I had been waiting. I cursed mightily at her and acquiesced. What could I do, legally?

Not long after that, I saw the reverse lights of another car on "my" row. "Oh great happiness!" I

thought to myself, and put my car into gear.

But what to my disbelieving eyes should appear, but a Beretta turning down the other end of "my" row, the wrong way!

It is common knowledge that the parking garage lanes have slant parking that necessitates one-way traffic in all lanes.

The driver of the Beretta apparently doesn't recognize the significance of arrows painted on cement.

I was incredulous. "Surely this woman sees me sitting here," I breathed to myself. "Surely she wouldn't be so crass as to break the law and take my spot."

She sure as hell would. As the car leaving the spot scooted out of the area, Ms. Beretta pulled inelegantly into the freshly vacated space at an odd angle.

I stomped on the gas pedal and slammed on the breaks to get her attention, and informed her that not only had I been waiting 15 minutes already, but also that she was driv-

ing the wrong way.

Beretta-girl feigned deafness, and began the tedious task of backing up and pulling forward to park her car correctly. What could I do, legally?

Apparently, Beretta-girl thought I would do something, for as she and her friend got out of the car she made a big production of carefully writing down my license plate number.

I was incensed, outraged! Just because she was a jerk, she automatically assumed I would be too.

So, with my first class more than a third over, I began to wait anew. My spirit was broken, my first class was almost over.

As I passed the parked Beretta, I thought myself, "What could I do?" Legally...So I blew off the last 20 minutes of my class and went to the computer lab to write this letter.

Cartoon only displayed stereotype

Thanks be to the almighty God, creator of Heaven and Earth.

Four score and two hundred years ago, our forefathers created the preamble to the constitution, containing the idea that "All men are created equal."

In mathematics, we say that if A is greater than or equal to B, and if B is greater than or equal to C, then A is greater than or equal to C. If blacks are men then they are created equal, also.

If we substitute Italians, Poles, Hungarians, Jews, Lithuanians, Russians, Norwegians, Scandinavians, etc., in Signe Wilkinson's cartoon for the word Black, we get Rent-a-Russian, Rent-a-Jew, Rent-a-Norwegian, Rent-a-Scandinavian, Rent-a-Pole, Rent-a-Italian, etc.

The 13th Amendment abolished slavery in the United States. On the shores of southern states, Africans were shipped to America, sold on

characteristics for breeding, working in cotton fields, and other laborious type activities.

Long after the 13th Amendment, African-Americans are still viewed as less than a full man. Not long ago, it was written in law that Negroes were a fraction of a man.

African-Americans have a strong history of being lynched in this country. African-Americans have a history of portrayals as maids for the master, shoe shine boys, and an endless charade of positions undignified for Americans of European descent.

The media has portrayed African-Americans as buffoons for the longest in "Amos and Andy." In addition, the African-Americans played roles which emphasized something humorous about their color in "the Little Rascals," starring gentlemen such as Buckwheat.

In Signe Wilkinson's cartoon, the images portrayed by the African-

American chauffeur in "Charlie Chan" can be easily summoned up. The Jefferson's indicates some modern day versions.

Finally, the depiction of African-Americans as buffoons and a fraction of a man will continue; no doubt, in America.

Let's break from the old binding tradition of slamming the African-American into the ground with Judas type individuals and Benedict Arnold-type African-Americans and just plain sell out who'll do anything to get a leg up with the master.

We have raised the drinking age in an effort to clean up Carbondale. Let's raise our level of consciousness in an effort to take subtle indignities about African-Americans and other ethnic groups along with the booze.

How to submit a letter to the editor:

Editorial Policies

Signed articles, including letters, viewpoints and other commentaries, reflect the opinions of their authors only. Unsigned editorials represent a consensus of the Daily Egyptian Board. Letters to the editor must be submitted in person to the editorial page editor, Room 1217, Communications Building. Letters should be typewritten and double spaced. All letters are subject to editing and will be limited to 350 words. Students must identify themselves by class and major, faculty members by rank and department, non-academic staff by position and department. Letters for which verification of authorship cannot be made will not be published.

Ph.D. programs needed, not a luxury

PERSPECTIVES BY W.D. WALLIS

The Illinois Board of Higher Education is reviewing the Ph.D. programs in mathematics and English and will soon review all Ph.D. programs at the University.

Provost Benjamin Shepherd (*Daily Egyptian*, 8/20) implies that the Illinois Board of Higher Education is actively seeking to cut more programs in the name of efficiency. Already, 36 higher degree programs have been eliminated. IBHE spokeswoman Kathleen Kelly (*D.E.*, 7/26) said that SIUC will not lose money or experience layoffs if programs are cut because the resources will stay at the University, strengthening existing programs.

Just what resources are those? I cannot speak for any program other than mathematics, although I expect that the situation in English and in several other departments is similar. But I challenge Kelly to show us any resources that would be saved by eliminating the mathematics Ph.D.

The IBHE says that a great deal of instructional effort goes into the Ph.D. program. I believe that this is simply a byproduct of the fantasy accounting methods used by the board. To illustrate this point, I checked the enrollment for fall 1995 and spring 1996.

The standard minimum enrollment for a graduate class is five students. If there are fewer, the class is canceled. Eliminating Ph.D. students would have resulted in the cancellation for four courses: math 502, 506 and 583 in fall, and math 551 in spring.

The other graduate courses which ran all had at least five non-Ph.D. enrollments. So the courses to be canceled would amount to, at most, one professor's teaching load and would occupy a small University classroom for 180 lecture periods.

The number of courses to be canceled is small because many Ph.D. students are taking reading courses. These courses sound very expensive to the IBHE — one instructor

for just one student! But the reality is quite different. The Mathematics Department does not take reading courses into account when considering workloads.

The number of lectures, committees, etc. per week is not affected by reading courses. Effectively, the instructor donates his or her time. This resource would certainly be lost; I can't see how Ms. Kelly would distribute the effort to other programs.

Another resource that would disappear is the group of Ph.D. students themselves. If you eliminate the program, those students will go to other universities. Their tuition and fees would disappear.

But there is another problem. Who will carry out the teaching assistance, which those students currently perform? There are two options. One would be to hire more instructors — their salaries would certainly be higher than student stipends. A second would be to have the professors carry out the work. But where do they find the time? They already are working full time. Either their number of lectures must be cut — leading to larger classes — or the amount of grading reduced, which means inferior instruction. Or else, the workload must be increased, which will mean less preparation.

Once upon a time, one could suggest that professors might work harder. But with disappearing positions, hiring freezes and so on, the number of faculty has dropped by 15 percent to 20 percent during the last 10 years, while the number of classes has not dropped accordingly.

What other savings does the IBHE foresee? There would be no

savings in library costs, as the publications used by Ph.D. students are the same as those used by faculty. There would be no savings in computers, as students use computers in labs or buy their own. What else is there? Perhaps the clerical work in processing 10 or 20 students per year?

The IBHE expresses concern that, in some Ph.D. programs, the enrollment and graduation rates are low. This is easily fixed; if the University provided more Ph.D. scholarships and increased the stipends so that they would be competitive, the problem would disappear.

Enrollment numbers would increase, and the good students attracted by higher stipends would graduate in minimum time.

Another worry is that in some areas, there is an oversupply of Ph.D. graduates.

"Graduates who invested many years in education are not getting jobs in their fields," according to Kelly.

This is not true of SIUC math Ph.D.'s, who have a better employment rate than the national average. I can only think of one recent Ph.D. whose employment position in not yet clear.

W.D. Wallis is a professor of mathematics

EDITORIALS ELSEWHERE

The Los Angeles Times

Topic: gun control

The Los Angeles City Council has taken an important step in its continuing effort to keep guns out of the hands of criminals.

Its ban on the manufacture and sale of "Saturday night specials" should make the small, cheap handguns more difficult to obtain, especially if the prohibition inspires similar action by other municipalities and similar measures by the state and federal governments.

...The ordinance...will take effect next month if the new law withstands a legal challenge from the National Rifle Assn. An NRA lawsuit, arguing that only the state can regulate firearms, has prevented the city of West Hollywood from enforcing its prohibition on the sale of Saturday night specials. Why does the NRA contest this ban? Hunters don't use these vicious little weapons. The "special" is small, easily concealed and deadly at close range. And since it costs as little as \$25, a shooter has no compunction against simply tossing it away.

...No law can keep guns from determined criminals. But the Los Angeles ban will at least make it harder for them to find a key tool of their ugly trade.

Accessible Education

SIUC gets money to meet federal ADA standards

By Shawna Donovan
and Dylan Fenley
Daily Egyptian Reporters

Out of all the Illinois public universities, SIUC received the most allocated money for upgrading its compliance with the federal Americans with Disabilities Act this year.

SIUC has received \$6.3 million in state-allocated funding for upgrading facilities campuswide for better accessibility for disabled people.

A total of \$33 million was earmarked for public universities and other state facilities last spring by Illinois Gov. Jim Edgar to comply with ADA.

The money is to get the facilities upgraded to comply with the ADA. Ross Hodel of the Illinois Board of Higher Education said the money is to "keep up" with federal compliance.

"I would not say that the state is behind, but I would say there is an emphasis to become upgraded so that we are in compliance with the federal law," Hodel said.

The funds are going for priority projects on campus to repair automatic doors that will not open and to modify counters that are too tall, Seymour Bryson, executive assistant to the SIUC chancellor, said.

"This is money we cannot touch for anything else," Bryson said.

Renovations planned

Allan Haake, SIUC supervising architect, said the renovations have been divided into four phases.

Haake said the first phase of renovations began April 25 and involve the Wham Education Building, Rehn Hall, Life Science I and II, Pulliam Hall, Lawson Hall, the Communications Building, Engineering A,B,C and D and Lessar Law buildings.

Contractors for the second and third phases of the project have been selected and work should begin by October, he said.

Only academic buildings at SIUC will be renovated with these funds, and any renovations to University dorm buildings, the Student Center or the Recreation Center will have

to be funded separately, Haake said. Haake said 38 buildings on campus, as well as sidewalks and signs, will be included in the renovations, which should be completed in December 1997.

The \$6.3 million renovation is the first step in an estimated \$24 million in renovations that were identified by an independent study done last year as necessary to bring SIUC into total compliance with ADA regulations, Haake said.

Bryson said the upgrades will make the University more accessible and will, in the long run, attract more students.

"We are all ready accessible, but there are some improvements that need to be made," he said.

"Misinformed" about budget

The thought of \$6 million from the state in a time of budget cutbacks and possible program elimination had some faculty and students skeptical about the upgrades, Bryson said.

Bryson said he had heard some people complain about the money, but he said that they were quiet when they heard what the money was going toward. "When they see exactly what the money is going towards, they understand that the upgrade is needed," he said.

Bryson also said students and faculty are continually being surveyed about accessibility and how the University can be more accessible.

He said because of the surveys, the University was prepared for certain requests when the state started allocating funds for the initiative.

Because the school knew ahead of time what projects for bringing the campus in compliance were priorities, SIUC received enough money to get the major work funded, Bryson said. Bryson, a member of the SIUC task force on the ADA compliance upgrades, said the task force is a continuing committee on how and what the University can do to make the campus more accessible.

Serving the campus

Kathleen Plesko, director of

AMY STRAUSS — The Daily Egyptian

To John Brennan, the use of his hands is important to communicate by using sign language.

SIUC Disability Student Services, said her office services around 700 people with disabilities (including psychiatric and learning disabilities).

"We are really proud of what this University has done as far as being accessible to persons with disabilities," Plesko said.

She said the growing number of disabilities have created new challenges for the University, and that the \$6 million will help meet those challenges.

"Not only do we want to see the facilities upgraded, but we want to see an attitude change towards those with disabilities," she said.

Bryson said an attitude change — meaning more acceptance of people with disabilities — can help the campus upgrade facilities because there will be more of an understanding of what needs to be done to accommodate those who are disabled.

University ADA renovations

- Buildings being equipped with power assisted doors
- Doors with knobs equipped with lever-style handles
- Wheelchair maneuvering space added in recessed doorways
- Toilet stalls renovated to include wheelchair maneuvering space and handrails
- Emergency voice communication devices with a direct connection to University security being installed in all campus elevators
- Elevator controls being lowered
- Counters being lowered
- Handicapped and wheelchair seating space being installed in auditoriums
- Drinking fountains being lowered
- New graphics and signs being installed, including Braille signage
- Buildings that are not already wheelchair accessible being made so with ramps, etc. (Almost all buildings already are, except a few at Washington Square)
- Sidewalks that are badly cracked being repaired
- Fire alarms being modified to include visible as well as audible warning signals for the hearing impaired

Jermal Powell counts his money to buy food at the Student Center.

Change

continued from page 1

"I think there really needs to be more televisions with closed-captioning," Brennan said.

"I know it is expensive, but I think that it is important."

While Brennan can read lips, it is easier for him to speak through an interpreter.

"There is a real shortage of interpreters in the area, and we also need more qualified interpreters," Brennan said.

"I don't have much of a problem at this school.

"Most people don't realize I'm deaf.

"It's not a visible disability," Kathleen Plesko, the head coordinator at the Disability Support

Services office in Woody Hall, said she is willing to help disabled students in any aspect of their life on campus.

"I'm looking forward to a wonderful future here," Plesko said.

"If a student becomes aware of a situation, we fix it.

"We try to be instantaneous in fixing problems."

Plesko said she is concerned with the disabled students at SIUC.

She said she was especially concerned with Powell's judgment of the University's campus.

"If any student comes here and tells us of a problem, we can take care of it," Plesko said.

"The students are very good self advocates, but as far as solving a problem, it is always doable."

Plesko said the grant is important because of the enhancements it will present to the students.

"A lot of these enhancements to

the campus will be low tech," Plesko said.

"One of the primary uses will go to signage, such as Braille on the elevators.

"We can use existing technology on campus, too."

Plesko said that the University does not need more technology.

She said it simply needs more enlightened users of the technology.

For example, Plesko said some teachers are not aware that closed captioning exists in some televisions and can be used in older models as well.

Plesko believes that the grant will be very helpful.

"This institution's belief is that this is money well spent," Plesko said.

"There is no legal choice about it, and there is also no moral choice about it."

Scientists identify genetic flaw in sickle cell anemia

The Washington Post

Scientists have devised a potentially promising new way to repair the genetic flaw that causes sickle cell disease — a painful and debilitating malady that afflicts some 50,000 Americans. The condition results from a single "point mutation" in a gene that affects the formation of red blood cells, making them change shape from round to crescent when oxygen concentrations within the cells drop to low levels. The abnormal cells tend to clump and clog tiny blood vessels, starving downstream tissues. In addition, the cells die rapidly, leading to the red-cell deficiency called anemia.

Earlier this year, researchers found that a bone-marrow transplant from a healthy, perfectly

matched sibling donor apparently could cure the disease by replacing the patient's defective blood-forming cells with genetically normal substitutes. But such therapy can help, at best, only a fraction of the estimated 1 in 400 black Americans with the condition.

Now scientists at Thomas Jefferson University and colleagues elsewhere report in the Sept. 6 issue of the journal *Science* that a custom-tailored piece of genetic material, once injected into an abnormal cell, prompts the cell's internal DNA-editing equipment to repair the defect. In test-tube studies, the tailored molecule caused about 10 percent of target cells to replace the mutant stretch of DNA. That might reduce the suffering of many victims, the researchers believe.

Net

continued from page 1

of Internet Addiction Syndrome is when other people begin to comment on the amount of time an addict spends at the computer.

Sam Lopez, a junior in creative writing from Houston, said she tries to chat online as often as she can — usually three times a week. She said that she will use University computers to chat online until she gets a modem for her personal computer.

Lopez said she became acquainted with many new friends on the Internet and has met a lot of them in person.

"Most of the time it helps to relax me, but every now and then I get into fights with people (while talking to people online)," Lopez said.

Dr. Mark Griffiths, a psychologist from the University of Plymouth in England, published a survey on the World Wide Web asking various questions concerning whether people considered themselves to be addicted.

Sample questions asked whether or not users have ever deliberately adjusted their schedules to use the Internet, while others asked about

the personalities of Internet users.

More than 20 percent of the people surveyed diagnosed themselves as being addicted, meaning they spent an average of four hours a day on the Internet, often missed appointments or classes because of Internet use or found themselves spending more time on the Internet than they had wished.

"Internet addiction has many of the same warning signs as gambling and many of the withdrawal symptoms as drug use," Griffiths said.

According to the survey, 22 out of 100 people felt a cocaine-like rush when using the Internet, while 12 more felt relaxed by chat lines.

Patterson said while Internet addiction may be a reality with some people, he does not think he is one of them.

"I think some people can get addicted to the Internet, but I'm not one of them," Patterson said. "That's a cliché — that they can get addicted — but not me."

Although Patterson said he spends a lot of time on the Internet in his dorm room, he said that he could not be an addict because he values his real life more than his existence on the Internet.

"People need to have social interaction and see other people face-to-face."

SIUC Student Center

Craft Shop

ADULT WORKSHOPS

FIVE-WEEK WORKSHOPS

The cost of the workshops is \$25 for SIUC students and \$30 for members of the community, plus supplies. For all clay workshops, participants are required to purchase clay at the Craft Shop (\$8 per 10 lbs.).

Basic clay: September 9 - October 7, Mondays, 6:00 pm - 8:00 pm

Advanced clay: Wheel throwing
 Section One: September 10 - October 8, Tuesdays, 6:00 pm - 8:00 pm
 Section Two: October 15 - November 12, Tuesdays, 6:00 pm - 8:00 pm

Basic guitar: September 11 - October 9, Wednesday, 6:00 pm - 8:00 pm

Wood working (minimum age 17)
 September 11 - October 9, Wednesday, 6:30 pm - 8:30 pm

Introduction to water color: September 14 - October 12, Saturdays, 10:30 am - 12:30 pm

Picture framing & matting: September 17 - October 15, Tuesdays, 6:00 pm - 8:00 pm

Basic sewing: September 18 - October 16, Wednesdays, 6:00 pm - 8:00 pm

Raku, Japanese glazed pottery: September 19 - October 17, Thursdays, 6:00 pm - 8:00 pm

Stained glass (6-week class): September 19 - October 24, Thursdays, 6:00 pm - 8:00 pm

Introduction to dye & batik: October 1 - October 29, Tuesdays, 6:00 pm - 8:00 pm

Printing & paper making: October 23 - November 20, Wednesdays, 6:00 pm - 8:00 pm

Beginning cake decorating: October 3 - November 7, Thursdays, 6:00 pm - 8:00 pm (no class on October 31)

ONE DAY CLASSES

Classes are \$3 for SIUC students and \$5 for members of the community, plus supplies. Sign up for three classes and pay a one time fee of \$6 for SIUC students and \$12 for members of the community.

Jewelry design: Fimo clay beads
 Section one: Thursday, September 12, 6:00 pm - 8:00 pm
 Section two: Tuesday, November 12, 6:00 pm - 8:00 pm

Jewelry design: Hemp macramé
 Section one: Wednesday, September 28, 1:30 pm - 3:30 pm
 Section two: Wednesday, October 6, 6:00 pm - 8:00 pm

Jewelry design: Friendly plastic
 Section one: Monday, October 7, 6:00 pm - 8:00 pm
 Section two: Wednesday, November 20, 6:00 pm - 8:00 pm

Candle making: Saturday, November 16, 2:00 pm - 4:00 pm

Pine cone wreath making: Thursday, November 21, 6:00 pm - 8:00 pm

GLASS JEWELRY

Classes are \$12 for SIUC students and \$16 for members of the community, plus supplies. Sign up for both glass jewelry classes and pay a one time fee of \$20 for SIUC students and \$28 for members of the community.

Glass bead making: Tuesday, October 22, 6:00 pm - 9:00 pm

Fused glass jewelry: Tuesday, October 29, 6:00 pm - 8:00 pm

FREE CLASS

(ONE DAY)
Jewelry making basics: Wednesday, October 23, 4:00 pm - 5:00 pm

Computer Information Specialist Information Technology Southern Illinois University at Carbondale

The Department of Information Technology has available one Computer Information Specialist position will manage a Computer Learning Center 4 / New Media Center for the Department of Information Technology. Responsibilities include: Managing the Computer Learning Center facility, staff, equipment and software in an effective, service-oriented manner. Act as a current computing technology where appropriate to: Streamline standard operating procedures, provide analysis of recurring problems and issues, and safeguard the facility's assets. This position maintains effective service delivery systems that meet, and exceed, user expectations.

This successful candidate must have a master's degree in Computer Science, Electrical Engineering, or another computer related field and at least 1 year full time work experience in a supervisory capacity (supervisory experience in facility management preferred) and at least 1 year work experience in an information systems organization as a network administrator (technical experience in Apple/Mac OS, SCSI, Digital Video and Audio, Computer Graphics and Animation preferred). Candidates must have extensive knowledge and understanding of microcomputers, software, hardware, and networking environments. Candidates must have demonstrated skill in carrying out independent projects and in communicating both orally and in written form. The monthly salary range for these positions is \$2396-\$3295 with a midpoint of \$2996 (100% FTE).

Applicants must send a cover letter, resume, transcript, and three letters of references to Patricia A. Cosgrove, Assistant Director, Information Technology, Mailstop 4532, SIUC, Carbondale, IL 62901. The extended deadline for applications is September 20, 1996 or until filled. SIUC is an Equal Opportunity Affirmative Action employer.

what's in a Z

As low as \$36.22 per month

ZENITH

Microsoft, Encarta, Natural, PowerPoint, Windows and the Windows logo are trademarks of Microsoft Corporation. Z-Station is a registered trademark of Zenith Data Systems Corporation. Intel Inside and the Pentium logo are registered trademarks of Intel Corporation. Specifications and pricing subject to change without notice. Price shown is the ZDS direct price. Reseller price may be higher or lower than the ZDS direct price. © 1996 Zenith Data Systems Corporation. Each loan is subject to credit approval and minimum annual income of \$15,000. The monthly variable interest rate on the Campus Z-Station Loan is based upon the prime rate plus 4.25%. The prime rate is the rate of interest reported in the Wall Street Journal on the first business day of each month. Any changes to such rate will take effect on the first business day each calendar month and will remain in effect until further changed. For example, the month of May 1996 had an interest rate of 14.50%. The loan has a 7 year term with no pre-payment penalty. If you were to borrow \$2,000.00 and maintained a constant payment level of 12.50% during a 7 year repayment period, then your APR would be 14.50% and your monthly payment would be \$36.22 for 84 months. Any increase in the prime rate may take the form of higher payments.

FOOTBALL

Scott honored for second straight week

Arglista Scott

For the second week in a row, Saluki linebacker Arglista Scott has earned Saluki football defensive player of the week honors. Scott garnered four tackles during SIUC's 27-14 win over the University of Tennessee-Martin Saturday. Saluki running back Coe Bonner earned offensive player of the week honors following his two-touchdown performance. Defensive backs C.J. McDavid and Sam Wilkerson

share special teams honors. Jason Krivis took offensive line honors.

HOCKEY

Lemieux decides to play for Penguins

Mario Lemieux has plans to play the 1996-1997 season for the Penguins. Lemieux, who took a year off to recover from Hodgkins disease and back problems, returned last season to win the Hart Memorial Trophy for the third time in his illustrious career, while leading the NHL in goals for the fifth time with 69. He also led the league in assists (92), power-play goals (31) and shorthanded goals (8) last season. Prior to the announcement, Lemieux was undecided about playing next season and did not play in the World Cup.

USA and Canada begin series tonight

The World Cup of hockey pits the United States against Canada in a best-of-three series starting tonight. The U.S. ended the preliminaries with a perfect 5-0 record by beating Russia 5-2 and will advance as the only unbeaten team in the tournament. The Canadians advanced to the finals by squeaking by Sweden in a double-overtime win (3-2). The U.S. and Canada already faced off one time in the tournament with the U.S. skating to a 3-3 victory.

BASKETBALL

Kittles, Nets agree to multi-year deal

Kerry Kittles signed a multi-year deal — and surety a multi-million dollar deal — with the New Jersey Nets. Although the monetary value was not released, the new rookie salary cap prohibits the deal to pay him more than \$4.6 million. Kittles, selected as the eighth overall pick in last year's draft, was the first senior selected and averaged 20.4 points and 7.1 rebounds per game.

Magic sign Ellis to undisclosed contract

The Orlando Magic signed forward Leron Ellis to an undisclosed contract. Ellis played the bulk of last season with the Hornets, where he averaged 4.4 points and 3.8 rebounds per game in 50 games. He also played 13 games for the Miami Heat, where he totaled 13 points and eight rebounds in 74 minutes of work. Magic Coach Brian Hill expressed the need to replace Shaquille O'Neal with quality players and said Ellis had a very productive summer playing in the Magic's summer league squads.

THIS DAY IN SPORTS

9/10/94

In South Bend, Ind., Notre Dame receiver Derrick Mayes made a dramatic catch in the back of the end zone on a 7-yard pass from quarterback Ron Powlus to give the Fighting Irish a 24-23 lead over Michigan with only 52 seconds remaining. But quarterback Todd Collins marched the Wolverines back the other way on a run and three straight passing plays to set up a game winning field goal by Remy Hamilton from 42 yards out, giving Michigan a stunning 26-24 come-from-behind victory.

CURTIS K. BIASI — The Daily Egyptian

SIUC quarterback Phil Shellhaas (13) scrambles for 25 of the Salukis' 171 rushing yards in Saturday's victory over UT-Martin.

FOOTBALL

Watson: Pleased with players' progress

By Michael DeFord
DE Sports Editor

For the first time since 1991, the football Salukis are 2-0, and while he is not completely satisfied, Coach Shawn Watson says he is pleased with the progress the program is making.

"It was our goal to start out 2-0, and it feels good to finally be there," Watson said.

SIUC opened the season by downing Central Arkansas Aug. 31 24-12, and then the University of Tennessee-Martin 27-14 Saturday.

Since the season opener, Watson said he has seen constant improvement on both sides of the ball.

"Everything that we thought of after the Tennessee-Martin game was true," he said. "We've certainly improved quite a bit, both offensively and defensively. Good things are happening."

SIUC's revamped running game is especially appealing to Watson.

The Salukis' ground game, which was virtually nonexistent against Central Arkansas with only 66 rushing yards, picked up 171 yards Saturday — the fourth best performance since Watson took over in 1994.

Saluki running back Coe Bonner, who rushed for two touchdowns Saturday, said the offensive line really pulled itself together.

"The whole line came together and started opening up some holes," he said. "I'm starting to get a good feel for the line now. I trusted they were going to be there, and they were."

Watson said SIUC's improved running game is a direct reflection of physical conditioning.

"Our running game was much improved in the second half against UTM," he said. "I don't think we came into our own until that time. Part of that is due to the physical conditioning of our players."

"And we are a much, much stronger and bigger football team than ever before."

Watson may be pleased, but by no means is he satisfied with the Salukis' running game.

"Offensively, we are much improved," he said. "We're putting numbers on the board, but we're not satisfied with our performance by any stretch of the imagination."

"We know we are capable of more, and we want to get to that more level."

So far, SIUC's offense has averaged 25.5 points per game, while its defense has held its opponents to 13.0 points per game.

The defense was one of Watson's biggest concerns when he took over in 1994. He said since then, it has made leaps and bounds in terms of improvement.

"You can see the improvement in our program," Watson said. "Defensively, we have improved to the point where we are able to shut people down. We got great

athletes, and we are really pleased with that."

"The play this week was outstanding, especially by the back seven kids."

Defensive back C.J. McDavid, who made the transition to free safety prior to the season, said SIUC's defense is performing well. But he said there is room for personal improvement.

"I still think I can play a lot better at free safety," he said.

McDavid grabbed 14 tackles against Central Arkansas Saturday, he added nine more to his total, including one interception.

Watson said McDavid is a nice addition to the defense.

"I can't say enough about C.J. McDavid's performance," Watson said. "He gives us play after play."

The Salukis will face perhaps their biggest test Saturday, when they take on Murray State University in a 7:30 night game at Murray.

"There's no doubt that Murray State will test just how much SIUC has improved. Regardless of its outcome, Watson said he will not let it dictate the rest of the season.

"I want to see improvement in our team," he said. "It's going to be the best test we've had this year. It will show how we can compete on the national level in our division. But I would not put the whole season on it."

"I care about us, and I want to see us improve."
