Iran reports skirmish with Iraqi aircraft

By The Associated Press

An Iranian F-14 fighter and three Iranian military helicopters fought a running battle with Iraqis near the border between the two countries, Iranian television reported.

No planes were shot down in the battle over the Iranian province of Kermanshah, the broadcast said.

None of the reports of fighting could be confirmed independently.

Iranian Wednesday, Foreign Foreign Minister Sadegh Ghotbzadeh was quoted as saying Iran had promised not to overthrow the Baathist regime of President Hosni Mubarak in Egypt.

Ayatollah Ruhollah Khomeini, Iran's revolutionary leader, repeatedly has vowed to overthrow Iraq's government and has called for its people to "fight the dustbin of history.

The president of Iraq's revolutionary council, Saddam Hussein, was quoted as saying he welcomed the Iranian government's promise not to overthrow his regime.

The two leaders agreed to a plan "for the overthrow of "the smallest" military move against Iraq.

Khomeini said it was too soon to be considered a victory for the new Iranian government, which has been in power since the overthrow of the Shah in February. A dedication ceremony is scheduled for July.

Marion visit planned

Senate to probe prison unit

By Dean Adkins

A congressional official confirmed Wednesday that an investigation of the control unit in the U.S. Penitentiary at Marion by staff members of the Senate Appropriations Committee will start sometime this month or in the beginning of May.

However, the official added that the decision to investigate was made more than a month ago and does "not necessarily have any connection" with inmate grievances or the work stoppage at the prison, which ended Tuesday.

Other possible congressional investigations concerning the conditions at the penitentiary are now in the "fact-gathering stage," according to Audrey Myers, co-director of the U.S. Louis-based National Committee to Support the Marion Brothers. She refused to release the names of any congressmen or senators who NCSMB is now trying to convince to hold hearings on issues that surfaced after the longest work strike in the prison's history.

The strike ended Tuesday when almost all 400 of the inmates returned to their jobs. However, prison authorities said an additional 25 inmates have been placed in the segregation unit for their refusal to go to work, bringing the total number of prisoners confined for their strike involvement to 44.

Myers also said the NCSMB is in talks with other congressional offices, and the group has tried to get religious convocations involved in the issues at Marion. She said religious groups from Des Moines, Iowa, and the St. Louis area have responded favorably and "have pledged to step up efforts to gain congressional hearings on Marion."

"We are talking with four or five (congressional) representatives but have no promises yet," she said.

Martha Geyor, a Marion Prisoners' Rights Project attorney, whose group talked with inmates Wednesday, said the prison administration has made some concessions to inmates.

"They stopped the hourly controls on movement," she said, "so there is more freedom to move around the prison. They (officials) promised that visitation and phone privileges will be expanded and that the food quality will be improved."

She believes the strike ended because of mounting pressure by the prison administration and because prisoners began to feel that the strike was somewhat successful. She said she hopes there will be "continued interest" in the problems at Marion since "the more serious problems have not ended."

Another prison support group, the Equal Rights Committee, will have a "caravan" leaving for Marion from the Carbondale Federal Building Sunday at 11 a.m. The group will meet at the penitentiary at noon for a demonstration and speeches against the conditions in the prison.

USO plans rally for Davies renovation

By Charity Good

Staff Writer

Students senators hope to rally support Friday morning for the renovation of Davies Gymnasium and head off what they term a "potential disaster."

The purpose of the rally, scheduled to begin at 8 a.m. in front of the building, is to make people aware of a hazard in the 55-year-old structure, said Susan Cruse, public relations commissioner for the Undergraduate Student Organization.

Jones said the building is plagued with danger including bad electrical wiring, leaking ceilings and warped floors.

"I think there are many students who don't know what kind of shape the building is in," Cruse said. "The rally is an opportunity for students to take a look at the gym and see for themselves how bad it is."

"We'd like to see Gov. Thompson come here and see the gym," she said. "Why wait until someone gets hurt to renovate the gym? Why can't the gym be renovated to deter a disaster?"

Davies Gym has never been renovated.

McCormick Gym at Illinois State University has been renovated twice, Cruse said.

"But, still, we can't get funding for Davies Gym," she added.

State Rep. Bruce RichmonD, D-Monmouth, introduced legislation last Friday that would appropriate $3.55 million for the gym's renovation. Richmond is confident it will pass the House of Representatives and expects State Sen. Kenneth Buzbee, D-Carbondale, to handle the bill in the Senate.

"The bill is No. 15 on Thompson's priority list," Richmond said.

The legislation will be heard next week. If it is approved, the money will be spent by the Illinois Building Commission.

Plan to increase interest rates aimed at student loan program

Editor's note: This is the third article of a three-part series discussing with President Carter the latest proposals on financial aid for college students.

In an effort to maintain the University's budget in recent years, get back 79 of the 107 votes needed to pass. Seventy-one House members voted against it. The legislation would be an affront to all the citizens of the state," said Rep. Timothy Simms, R-Rockford. He argued it would undercut the right of elected officials and their employees on behalf of taxpayers.

The measure would have barred strikes by police, fire and other public employees, instead subjecting their demands to binding arbitration.

IPIRG holding petition drive for support of $2 optional fee

By Cindy Humphreys
Staff Writer
SIU-C's Illinois Public Interest Research Group has initiated a month-long petition drive to gain student support for a voluntary $2 student fee to fund the organization, said Ed Eytalis, the IPIRG coordinator.

The IPIRG, part of a network of research groups established by consumer advocate Ralph Nader, has in the past relied on allocations from student government to cover its expenses. But, Eytalis said, that source has proved too inconsistent for the IPIRG's continued operation.

"This year, we received no money at all from the Undergraduate Student Organization," he said.

Public Interest Research groups, or PIRGs, are student-directed research and advocacy organizations staffed by professionals, Eytalis said.

Board to view fee increases

By Paula Donner Walter
Staff Writer
The SIU board of trustees may have been thinking that big when the April agenda was prepared to include the initial consideration of sizeable increases in student fees. But, Eytalis said, "This year, we received no money at all from the Undergraduate Student Organization," he said. Public Interest Research groups, or PIRGs, are student-directed research and advocacy organizations staffed by professionals, Eytalis said.

The SIU board is expected to approve an in-state tuition rate, effective this fall, for graduate students attending SIUE from the St. Louis metropolitan area.

Money from the proposed fee would be used to hire a professional staff and publish student research on a variety of issues, Eytalis said.

If approved, the optional fee will be structured as a negative check-off fee, allowing students to opt out of it by checking the fee off on their fee statements when they register.

The fee must be a negative check-off because of a Board of Trustees policy, which states that new fees must be either mandatory or voluntary, not mandatory or voluntary, not refundable, Eytalis said.

IPIRG supporters have gathered 2,500 signatures so far, and the goal is to get from 30 to 50 percent of the student body to sign, he said. Petitions have been circulated in the Student Center and the university housing dining halls.

**Hiking retirement age: What took so long?**

By Dawn Cornell

Student Writer

With the mandatory retirement age about to be raised on SIU's campus from 60 to 70, residents of the area must ponder just what took us so long.

The mandatory retirement age, whether it be 65 or 68, has long been a farce. How was this magic age of 65 picked? This age when men and women of the labor force must drop out and replace their daily activities with hobbies and relaxation.

The Social Security Act of 1935 brought our nation the decision to base retirement on a fixed chronological age. This important decision was made by a small select group of New Deal experts at a time when approximately 25 percent of the labor force was unemployed. This provision has stood through the last 45 years, unchanged, while other legislation has overshadowed its antiquity.

The decision to remain at a job must be evaluated by both the person and his employer. Certain jobs involving reaction time and physical laboring may not be included in this assumption that people between the ages of 65 and 70 are still able to effectively pursue their careers.

However, especially at the university level, the procedures must be relaxed to allow an accumulation of knowledge to be transmitted to those who are just beginning their quest for learning. Those who can inspire and enlighten the younger should not be shut off from those who can most benefit from them.

SIU should be commended for its forthcoming actions to raise the mandatory retirement age to 70. Perhaps this will serve as a beginning for the university to take a look at their retirement practices for the last decades and decide it's time to move forward. Too long has both young and old suffered from a decision made so long ago.

A better example of what raising the retirement age can do for an institution than the possibility of having Hiram Lear, Acting University President and Dean of SIU's Law School, around for two more years is unheard of.

Those who will be taught by him or will be in his classes, will be united in this opportunity that will be enriching.

**Letters**

**Unions create inequities**

In answer to M. Mason's letter (April 3 DE), it is only because people expect above average performance from me that they provide the time (almost all been paid) and school facilities for my degree program. I receive little prodding except that occasioned by the ignorance that a well-managed education system is designed to correct.

I am not on a high-horse, have provided Mason to hoon in without cause. My formal training ended with my Ph.D., but in a broader sense, every education continues throughout life, as Mason partly states. I share Mason's life-supporting "average" needs, but in my previous letter I said, in Mason's terms, that I believed most faculty at this school were motivated by such needs not to engage in union activities but rather in those activities for which they deserved to be paid—as it happens, above average.

Unionizing or below average workers to demand extra paying or intrinsically less pay or privileges in exchange for union activity thus establishes inequities not at all merited by individual ability or performance. That those exceptionally talented people might be in the numbers means nothing favorable for the union because these individuals would exist with or without the union—often more easily without it.

I am happy to learn that Mason's president has elevated her to a height at which she will not call me names, an unneeded restraint which deserves praise. Good work by ordinary people is in part to thank for these luxuries.

Psychology

**Letter-writer replies to opponents' replies**

I seem to have stirred up a considerable hornets' nest by my comments on the invalidity of Replacement Mitchell's proposal to require the book, Genesis 9:16-17, taught in Illinois public schools. My single letter has drawn so far as I know a dozen or so of them hostile and few of them agreeing to do with witchcraft issues posed by the proposed legislation.

I have taken it upon myself to respond personally to religion, as many, letters to these pages only to comment on a particular fallacy many people are prone to.

A number of the letters have shown religious theoys as a form of faith, since it seeks an answer to the unknowable: one ever even spoke of priests. These attempts to equate science and religion are all too ugly, and miss several important distinctions.

Science does not fabricate theories out of thin air; theories are put forward only if they satisfactorily account for all the data under examination. Science in its current state moves to theories which offer consistency, not in the case with Darwin. He spent 15 years circumscribing the globe, collecting specimens and only later put forward his theory based on data.

The creationists, on the other hand, start with the premise that Genesis has to be right. From there, they try to shoehorn the facts into their model. They are not above discarding or distorting facts which don't fit; hence some of the misinterpretations and dubious conclusions of creationists.

If M. Oertel feels compelled to jump on a partisan bandwagon and attempt to fight in a particular war (and if the future repeats the past, you undoubtedly have several to shop from), I wish him luck and straight shooting.

If I don't believe that fighting in a particular war will protect our freedom, then I object to more years in uni- versity classrooms. Oertel catch-all category of "spineless liberal" is nothing but a joke.

So please Mr. Oertel, don't feel compelled to kill and maim for me, if I think it necessary, I will do it myself. —Michael F.
Elisee, Graduate Student
Geology

**Anti-Bible letter in error**

Is believing in the Bible medieval or contemporary? I would like to point out some serious and fundamental errors in the anti-Bible letter published in the March 25 DE. This letter might have correct information from which to draw judgment on the issue of the Genesis account of creation being taught in public schools.

First of all, it was Joshua and not Elijah who suspended time at the battle of Gibeon around 1350 B.C. NASA computers, when calculating space travel time, were run backwards to find that there is a 24 hour period missing from world history at around 1750 B.C. And if one looks carefully at Mid­

eastern history, he'll find that a drought that lasted three and a half years occurred around the time the Bible says that Elijah commanded the skies to be shut up.

The story of the descendants of Ham being the Negro race is just that—a story. A careful look at the Bible will reveal that the descendants of Ham were destroyed and no longer exist. Therefore, the descendents of Ham are not the Negro race.

In the Biblical account of the great flood, the Bible does not state that the first rainbow occurred after the flood. In Genesis 9:14-17, God establishes the rainbow as a sign of His covenant with Noah.

I agree with Sir Isaac Newton's explanation of the natural phenomenon known as the rainbow; he was interested to note that Newton predicted that man would travel at a speed of 30 mph. He based his prediction on Bible prophecy. And of course, the unbelieving scholars of his day scoffed at him.

As I was comparing the Genesis account of Creation with accounts from other cultures, I find a gross inconsistency. The Bible is the only book of scripture that dare foretell the future, and accurately, and in far over 70 percent of Bible prophecy has been fulfilled.

I would like to challenge the students at SIU to check out the Bible for themselves as Jesus said, "You are mistaken because you do not understand the Scriptures or the power of God." —David Abberton

**Don’t kill and maim for me**

This letter is in response to Allen Oertel's letter, "Some Things Worth Eying For" (April 2 DE). I wholeheartedly believe that some things are worth fighting, and others are possibly worth dying for. However, the real question is, what are the circumstances or issues put "freedom in jeopardy?" In our increasingly complex world, this can become a question of conscience.

If Mr. Oertel feels compelled to jump on a partisan bandwagon and attempt to fight in a particular war (and if the future repeats the past, you undoubtedly have several to shop from), I wish him luck and straight shooting.

If I don't believe that fighting in a particular war will protect our freedom, then I object to more years in university classrooms. Oertel catch-all category of "spineless liberal" is nothing but a joke.

Cycling, bike sales increase with the temperature

By Robia' Penar
Staff Writer

Students will ride a bike to class because they have an advantage with parking," Thipkhosithkun said. "Students with cars have to get up early just to find a parking place. They will probably walk to the rest of their classes anyway." He said he believes that bicycle use will increase in the future, especially with the energy crisis.

"The use of bicycles is not increasing steadily," he said. "Anyone using a bike is a contributor to conservation."

"A bike has the potential as an alternative," he said. "People may be riding them more to save gas." He said bicycles can be used for long-distance travel, even across the country.

"UPS (United Parcel Services) couldn't run their business without gas," he said. "I couldn't run my business without them.

"The people in government don't ride bicycles; they drive big cars, so they don't expect them to push a trend toward the increased use of practical, reliable bicycles.

Alan Boars, manager of Phoenix Cycles cited Steve Apple, who rides 20 to 30 miles every morning before work, fixes a bicycle spoke.

"America's top ghost hunters" to discuss 'Amityville Horror'

By Carrie Sweeney
Staff Writer

"America's top ghost hunters," Ed and Lorraine Warren, will present "Ghosts and Haunted Houses," a slide-illustrated lecture on "The Amityville Horror" case at 8 p.m. Thursday in the Student Center Ballrooms A and B.

The Warrens will give an in-depth report of the intense and demonic hauntings experienced in 1976 by George and Kathy Lutz and their three children at houses in Amityville, Long Island, N.Y.

The Lutz family moved into the houses unaware that one of it's previous occupants, Ronald Lyle DeFeo, became "possessed" and murdered six of his brothers at their house in Amityville in 1974. Since that time, the Warrens have investigated such areas as murder, vampires, possession, and curses. Their 23 years of research have convinced them that ghosts, demons, witches, satanists and vampires do exist.

As psychic explorers, the Warrens have taught classes on Demonology and Parapsychology at Southern Connecticut State College and have hosted two television shows. Aside from the Amityville Horror case, the Warrens have also investigated incidents involving hauntings at West Point and a house in Bridgeport, Ct. that made international headlines in November of 1974.

To aid in these investigations, Lorraine has further developed clairvoyant powers she had discovered as a child and is able to pick up thought impressions present in the environment. Her ESP level was rated at UCLA as being far above average.

Ed, at the age of five, lived in a house that was haunted by a former tenant. As a result of this experience, he has devoted his life to the study of the supernatural. He is currently head consultant for the Psychic Research Institute in Hamden, Ct.

Tickets for the lecture are $2 and are available at the Central Ticket Office in the Student Center. This event is sponsored by the Student Programming Council Lectures Committee.
Play ‘Hippolytus’ to be presented

By Bill Crew
Entertainment Editor

The topics of psychological maturity, the problems of growing up, relationships between parents and children and moral extremism will all be touched upon in "Hippolytus," the latest production of the "Classics at SIU" series. The play will be presented at 7:30 p.m. Friday at the Home Economics Lounge in Quigley Hall. "Hippolytus" tells the tragic story of the title character, who misinterprets the meaning of the Greek theory of "sophrosyne." Sophrosyne is described as the ancient Greek’s theory of leading a life of moderation, not doing anything to its extreme. This theory includes the restraint of chastity. However, Hippolytus misinterprets sophrosyne to include complete sexual restraint. As a result, he scorns every Greek god except Artemis, the goddess of chastity. This especially upsets Aphrodite, the goddess of love, who plans a vicious revenge.

Weather brings out bikes, increases number of sales

(Continued from Page 5)

heavily for legislation regulating gas use. "I hope the younger people think differently," he said.

Thipkhosithkun offered some tips on preparing a bicycle for another spring and summer after having kept it tucked away for the past few months:

- Check the gear cables. They are usually rusty and can cause malfunctions, especially on 10-speed bicycles.
- Check the front and rear wheels to make sure they are aligned.
- Oil the driving chains.

Thipkhosithkun said he expects an increase in business because, "the nice weather brings them out." Alan Bourg, manager of Phoenix Cycles, cited a trend toward "practical bicycles." Rick Williams, director of the "Classics" series, characterizes the play as "a tragedy that involves a man, his wife and his son. All of them are destroyed, in a sense, by the power of love." Cast members include Richard Sater as Hippolytus, Phyllis Yobe as Phaedra (his mother), Brad Griffith as his father Theseus and Deane Shorter as servants. Almost the entire cast is composed of students. Admission and refreshments are free.
Proper care a must for diaphragm usage

Editor's note: Your Health appears twice monthly in the Daily Egyptian. If you have any questions you'd like to see answered here, send them to Your Health Student Wellness Resource Center, Kenen Hall.

Q. I am thinking of using a diaphragm. How effective is it compared to other methods?
A. The effectiveness of a diaphragm depends primarily on how motivated you are to use it. Recent studies have shown that it can be as effective as an IUD (about 96-97 percent), if used correctly every time you have sex. But if it's not used correctly, the effectiveness rate is much lower, down to 80-85 percent.

The diaphragm is made of soft rubber, shaped like a shallow bowl with a flexible rim. It is used with a contraceptive cream or jelly and is inserted into the vagina before sex. If you are a person who likes to take risks, chances are you would take risks with a diaphragm. If you are uncomfortable touching your genitals, you probably won't feel comfortable using a diaphragm.

The diaphragm must be left in place for eight hours after sex, to make sure all the sperm are inactive. It can be inserted up to one hour before sex. If you have sex again before eight hours passes, you need to insert more cream or jelly, but don't remove the diaphragm.

The Health Service fits diaphragms and the doctor or nurse will show you how to use it and let you practice before you leave.

The diaphragm should be checked for defects or holes before each use, washed and dried thoroughly and stored in a cool place. A diaphragm can be used for up to two years, if properly cared for. But some physicians recommend getting a new diaphragm yearly and checking the fit, at the time of the annual pelvic exam.

Q. I was at a party last night and saw at least three people who were obviously too drunk to be driving home. I didn't like it, but I didn't have a car to do anything about. Can you give me some pointers?
A. Since more than half of the traffic fatalities are alcohol-related, your concern is well-founded. Most drivers don't realize that the host is responsible for his or her guests. (Continued on Page 12)
Street and the Miller Lite Co., are sponsoring a roller skating rally and bike race this Sunday to help raise these funds. The road rally and bike race will be held on a two-mile track through Forest and Mill streets and Douglas Drive. A $7 registration fee will include all-day skate rental, T-shirt and a party following the race at 509 S. Rawlings. A $5 donation is required for those persons who wish to attend the party but who do not skate.

A pair of skates donated by State Street will be awarded to the fastest male and female skaters in the novice class. Trophies will go to the top skaters in the "experienced" class.

"People shouldn't think of the race as competition but more of a good time type of thing," Johnson said.

Students seeking financial aid for next school year should mail their applications by May 1 or they may find themselves out of luck—there may be no more money available, said Janet Jeffries, of public relations and information.

Although EEOGs and Illinois State Scholarships are awarded based on the applicant's financial need, Jeffries said by May 1 the date of the application's receipt and the availability of funds will also be considered.

Jeffries said applications will be accepted after the May 1 "priority deadline," but there is no assurance that funds will be available in aid programs.

Over 2,000 applications of students who applied for four to six weeks ago have already been returned to SIUC from program headquarters. Jeffries said aid is usually granted in a package combining grants, scholarships, employment, andor loans.

In 1979 about 5,000 students received awards totaling almost $2.5 million. Individual awards ranged from $300 to $1,800.

Application forms can be picked up on the third floor of Woody Hall B. Jeffries said applying students should send the ACT form to Iowa City, Iowa and the ISSC to Deerfield by May 1.

Students should apply for aid by May 1, or it may be gone

Federal job openings are limited, but those interested should apply

By Cindy Humphreys
Staff Writer

There will be limited new federal job openings until mid-September, but students interested in federal employment should continue to apply because the applications are kept on file for a year, Larry Crouch of Career Planning and Placement said.

"The agencies are replacing employees who leave," Crouch said. "The process is a 5 to 60 percent cut in the number of federal jobs available.

Crouch said that the freeze on jobs began Feb. 29, and that it is not having a major impact in the Midwest and that it "isn't affecting the health care areas at all."

"Students should continue to complete the proper forms and take the necessary tests," Crouch said. "In the past our students have found a considerable amount of employment with federal government, and these agencies are very pleased with our students initiative and performance on the job."

This bi-regional region has "the greatest percentage of federal job placement in the nation," he said.

Crouch said that the federal government is the largest employer in the nation and that government jobs involve all areas and fields.

"For hard-to-place majors, government employment is a good alternative," Crouch said. "We have applications and employment information on every government agency and we're in close contact with the federal job information center in Chicago."

About 25 governmental agencies have personnel representatives to interview SIUC students this semester.

STUDENTS HELPING STUDENTS

If you are not enough about your new fellow students why not help them by

- introducing campus lifestyle, services & activities
- helping students adjust to their new environment
- being available to help with other problem & questions that may come about

you have this opportunity to become active by attending one of two meetings

Monday, Apr. 14
2:00 Mississippi Room or 7:00 Ohio Room
Student Center

The Anthropology Club is holding a Polynesian Pig Roast April 12 at 1 p.m. at the Maring Farm. Tickets are $2 in advance and $3 at the door. For tickets call 330-6601.

Sigma Gamma Rho is sponsoring its annual Kenneth Garrison Memorial Fashion Show at 6 p.m., April 20 in Ballrooms A and B. Proceeds will go to establishing a scholarship fund. Donations are requested.

The Department of Accounting is sponsoring the spring CPA-in-residence on April 9 and 10. Glen Gustafson, from John Deere Tractor, will give a presentation.

Previous weight not main factor in predicting obesity

CHICAGO (AP) - The notion that "once a fatty, always a fatty," is simply not true, according to a study by physicians at the Medical College of Wisconsin.

Results of the study reported in the current issue of the American Journal of Public Health indicate previous weight history is not a dominant factor in determining how much pounds a person may put on.

The study by Doctors Arthur J. Hartz and Alfred A. Rimm surveyed 6,046 women 30 percent to more than 100 percent above ideal body weight. The physicians at the Milwaukee college said the results showed there is no critical time for obesity to develop.

guests' welfare. The host should serve non-alcoholic beverages for those who choose not to drink, provide food so guests do not get hungry, encourage alternative activities, and allow time for "just" drink. If guests do get drunk, perhaps arrange for a ride home with another friend or drive them or her yourself. An invitation to stay later or even overnight might also be appreciated the next morning. Guests hopefully will take some of this responsibility, too. The host, after all, cannot look after everyone. One creative solution I've heard about includes collecting all car keys upon arrival, to be given back only if the driver is not drunk. A less daring but equally responsible action is to decide in advance who will drive, with the driver agreeing to drink alcohol lightly or not at all.

What is the danger of going on a "crash diet?" It seems like a good way to lose weight quickly. A. A crash diet usually emphasizes one type of food, such as grapefruit or cottage cheese.

BAC applications for top positions needed by Friday

By Steve Grant
Staff Writer

Applications for Black Alum Council executive positions are due at 5 p.m. Friday. The election for these positions will take place at the Executive Council meeting at 6 p.m. April 30 in the Student Center. Room.

Applications for coordinator, assistant coordinator, comptroller, and editor and assistant editor of the Black Observer can be picked up at the BAC office on the third floor of the Student Center.

To be qualified as a candidate, a student must be currently enrolled and have attended SILU for at least two semesters, be in good academic standing as defined by the University, and be enrolled for the summer. Candidates must also obtain 30 nomination signatures from persons at SILU, submit a resume and statement of qualifications, and obtain an interview date from the election commission.

"Coco" the macaw returned to shop

"CHICAGO (AP) — "Coco," a scarlet macaw with a 60-word vocabulary, will soon be back at his perch in the store shop where, four years ago, "Park Pet Shop," each time the phone rings.

The bird, which was stolen more than five months ago from the Southwest Side pet shop, was returned to store owner James Sparks after payment of $1,000. Coco was stolen Oct. 30 from the Park Pet Shop and had been gone "such a long time that we just forgot about the bird," said Sparks.

Diet analysis aids women in pregnancy

By David Murphy

A dietary analysis system developed at SIU in 1976 is helping pregnant women around the country improve their dietary habits. "Pregnant women generally don't eat properly," according to Margaret Sawicki, a research assistant in the Department of Food and Nutrition.

The NDDA helps them to see where their diets are lacking, and how to improve them. The NDDA is the Nutrition Dietary Data Analysis system, which was developed four years ago under the direction of Jeannette Endres, an assistant professor in the Department of Food and Nutrition.

The system uses computer forms to record the food intake of various individuals throughout Illinois, including pregnant women, infants and children. The forms are then analyzed and the results compared to the Federal Recommended Daily Allowance to see where the diets of these people might be nutritionally deficient.

The results of this analysis are made available to the Women, Infants and Children (WIC) Supplemental Food Program in states throughout the country. WIC then uses this information to educate pregnant women on how to improve their diet to improve the health of their unborn infants.

The NDDA has shown that very few pregnant women take in adequate amounts of iron and folacin, a nutrient derived from leafy green vegetables. "Most women should double their intake of iron and folacin during pregnancy," said Sawicki.

Data have also shown that most women don't eat approximately six ounces of meat daily when they are pregnant," said Sawicki. "Vegetarians must be very careful to ensure that they get enough protein through alternative sources."

The system has grown and improved since it was begun, said Sawicki. "When we began, we listed 189 foods on the form. This year, we listed 355," she said. "The form is constantly being revised, as eating habits change."

Meade recruits four all-arounders

By Ed Dougherty
Staff Writer

When gymnastics Coach Bill Meade began his "rejuvenated" recruiting efforts in February, he joked that he was going to recruit more gymnasts than he could hurt—and he did.

Meade's original list of possible recruits was longer than the Carbonade phone book, but he had to narrow it down because he had just three scholarships to offer.

Meade used his scholarships and got four all-rounders to verbally commit themselves to attend SIU. John C. Levy, Lafayette, N.Y.; Murph Melton, Houston; Kevin Mazeika, Houston; and Joe Tate, Marion, Ill.

Meade said he gave away two full scholarships and divided the third one into room and board only and tuition, fees and books.

"I'm very careful in giving out scholarships," Meade said. "You can't make much of a mistake when you only have seven scholarships to work with."

Meade's three scholarships are being used to fill several holes created by the graduation of seniors Dan Muenz, Phil Savage, Dave Schieble and Jim Zacek. The loss of Savage, Schieble and Zacek will cause a lack of power horse performers.

Meade said all of the recruits are capable nommel horse men and should be able to fill the holes.

"Levy is a good all-rounder," Meade said. "He also was the state high bar and rings champion."

"Melton and Mazeika have been in an Olympic development program for the past three years," Meade said. "Melton is an outstanding ring man and an excellent pommel horse man."

"I'm very pleased to get Tate," Meade said. "He is going to be a good one in years to come."

Meade said all four gymnasts are enthusiastic about coming to SIU without a scholarship.

"Dick Allen is a transfer from Golden West Junior College in Santa Monica," Meade said. "He will work the rings, parallel bars and vault."

Meade said all four recruits have the basic skills to be good gymnasts for the Salukis. He added that he expects to add at least two more "walk-ons" before he is finished recruiting.

Meade was not able to sign two gymnasts that had expressed an interest in SIU. Meade found out that a gymnast from Worthington, Ohio, did not have a high enough grade-point average, and a gymnast from New Mexico wanted to attend the same school as the Ohio gymnast.

National letters of intent for gymnastics were sent out last Monday, but the official results of Meade's recruiting efforts won't be known until he returns on April 15 from an international meet in Hungary, where he is taking a gymnast from Indiana State.

The Saluki basketball team will hold a banquet April 14 at 7 p.m. in the Old Main Room of the Student Center. The banquet will be a tribute to graduating seniors Wayne Abrams, Barry Smith and Compton Hinds. The dinner is open to the general public.

The three graduating players will be the featured guests speakers. Abrams, a four-year starter for SU at guard, was a second-team All-Missouri Valley Conference selection this year, while Smith, a three-year starting forward, was honorable-mention All-Valley. Hinds was a backup center for two years.

Abrams, 6-6, is a native of Atlanta, Ga.; while Smith, also 6-6, hails from nearby Eldorado. Hinds is a native of Guyana. The three seniors are the only players Coach Joe Gottfried definitely will lose from this year's team.

Donations to the event will be $2.00 for adults and $1.00 for children.

Performers from movie to attend bike race

By Christopher M. Phelan
Student Writer

Two cyclists from the movie "Breaking Away" plan to attend the Carbondale Bike Race scheduled for Saturday and Sunday.

Gary Rhybar, who did the cycling scenes for star Dennis Christopher, along with Carlos Rybar, the mustached bad guy in the "Breaking," will be among the famed racers to attend the Carbondale event.

Others include Wayne Stadia, the 1976 and 1977 national champion; Dale Stierina, the 1978 national champion; Larry Doering and Gary Doering; last year's first- and second-place finishers in Carbondale; and SIU's Olympic hopeful, Danny Casebeer.

The race will be in three parts: a road race, hill climb and the normal category race held each year.

The road race will start at noon Saturday from the LakeLand School on Giant City Road. It will take place on the back roads of Carbondale and will cover 42 miles.

The second part will be an individual time trial for each contestant. It will be a 1½-mile hill climb going up the road from the Makanda Post Office to Route 13. President Mike Jenkins said he added this that race is "brutal" because of the strain on the riders with the 38-degree incline and the short distance of the hill.

The time trials also will be on Saturday, starting at 4 p.m. At noon Sunday, the category race will be held. There will be eight categories, with the best riders in each category racing in the first. A five-mile intramural race will be one of the categories, along with a 10-mile citizen's race.

The winner of the Carbondale Bike Race will have participated in all three parts with the lowest overall time.

Ruggers ready to defend title

By Dave Haasebo
Student Writer

The SIU men's rugby team will travel to Charleston, Ill., Saturday for the second annual Four Corners Rugby Tournament. The tournament also will include clubs from host school Eastern Illinois, Northern Illinois and Western Illinois.

The Salukis beat EIU, 6-8, in last year's finals to win the inaugural tournament. EIU averaged the loss last October in the SIU-sponsored All Glen's Tournament by defeating the Salukis in the semifinals, 10-11.

The Salukis enter the tournament with a 3-1 record and are co-favorites with EIU. According to SIU club President Bill Dean, the Salukis have prepared heavily for their title defense, but also have an added incentive for defeating the Panthers.

"We feel that we have worked hard enough that we should be able to bring the trophy back to Carbondale again," Dean said. "Plus, we owe them after they beat us at our home pitch."

Last weekend, the ruggers finished in the top 12 at the 32-team Western College Men's Rugby Festival. SIU opened the two-day tournament with a 15-3 victory over St. Louis University. John Glotzbach led the Salukis scoring with three tries, two penalty kicks and two conversions. Tim Enright and Bobby Morgan also scored for SIU.

SIU Coach Alan Burton credited the team for a strong pack and backline play. Burton also said SIU was the lone Saluki winner.

Although the Salukis were dominated physically by Jefferson City, Burton said SIU played well considering the size differential.

SIU completed the weekend trip with an 18-6 win over Central Missouri.

Teams course requires group effort

By Scott Stahmer
Sports Editor

The challenge of being a college basketball coach is that you never really know what's going to happen. According to SIU Assistant Coach Bob Spivery, one of the most important factors is the way the players react to the game. Spivery, who has been with the team for two years, mentioned that the players need to be able to bounce back from losses and stay focused on the game. He believes that the key to success is teamwork and collaboration. Spivery also mentioned that it's important for the players to have a positive attitude and to be able to handle pressure. He said, "It's all about how we play and how we react in the game. We need to be able to keep our focus and stay calm."}

Spivery: 'No problem' with Wiggins' signing

By Dave Kane
Staff Writer

The lengths of the two games were different, which could make a difference in the outcome of the game. However, the SIU women's softball team was successful in each case. Wednesday's game was the first game of the season, and the Lady Salukis took a dominant lead over the Drake Bulldogs, winning the game 10-0. In the second game, the Lady Salukis had a hard time against the Missouri State Bears, losing the game 4-2. The Lady Salukis were up against the best competition in the Big 12, and they were able to score a total of six runs. The game was a close one, and the Lady Salukis were able to hang on to win. The Lady Salukis continued their winning streak, and they are now 2-0 for the season.}

Hot-hitting Williams leads SIU to softball sweep over M.U.

By Janine Keane
Staff Writer

The Lady Salukis continued their winning streak by sweeping the Missouri State Bears. The team has been on a roll, and they are now 2-0 for the season. Coach Bretschneider was pleased with the performance of the team and said, "The team is really coming together, and we're getting better every game." The Lady Salukis are now 2-0 for the season, and they are looking forward to their next game against the University of Missouri. They are hoping to continue their winning streak and take the conference championship.
