Daily Egyptian Staff
Proposed black media cuts protested

By Ken Perkins
Staff Writer

Over 100 black SIU-C students, angered over the possible elimination of the WIDB soul staff and the Black Observer newspaper, packed the third floor hub lounge of Neely Hall Wednesday night in an effort to communicate what they call a "political assault of black media."

The fate of both the monthly newspaper and weekend staff of the radio station will be determined on April 14, when WIDB General Manager Lisa Dartt presents a proposal to the station's Board of Directors, and Black Affairs Council's Faculty Advisor Pat McNell meets with administrators to review the future of the Black Observer.

All of a sudden, every black-oriented medium is in trouble," said Angela Wimen, copy editor of the newspaper. "It wasn't so noticeable when it was only the Black Observer, but now it has extended to other facets of the media."

At the meeting, a task force was established to "take action," before the proposal goes to the WIDB board and McNell speaks with administrators. One of the first courses of action taken was the planning of a rally, "Black Media Survival," scheduled for noon, Monday at Anthony Hall.

The task force, which met again on Thursday night, also decided to write letters, get petitions signed, and plan more rallies. Dartt declined comment on the WIDB program changes and referred questions to a letter written to the curators of the soul staff April 2.

According to the letter, the soul staff, which is on the air for 39 hours - from 1:00 a.m. on Friday to 4:00 a.m. on Sunday - may be eliminated because of the station's financial woes. Dartt said one way to tighten its financial belt is to change the team's format to a seven-day, 24-hour schedule, and do away with "rock programs" would be eliminated. The format change would take place May 31.

The letter also stated that WIDB is operating as two stations. It said the soul staff "doesn't have its own radio station" and the album-oriented rock staff on the weekdays. Seldom, the letter also said, did the two staffs ever work together.

"This kind of structure is extremely dysfunctional to the operation of the radio station," the letter states. "This is not to eliminate people, but to utilize our resources more effectively."

We will decrease the on-air shifts and do whatever it takes to adopt the total DJ to the AOR format," the letter says, and that the station will not continue to depend on the Undergraduate Student Senate for funds. It also stated that with a single WIDB station, it could operate more professionally, with more resources directed at a common goal.

But co-directors of the soul staff, Malachi Valley and Anthony Hallissey, said, "We can't; have the two staffs work together."

Vote halts attempt to study effect of cuts, hikes on SIU access

By Mike Anthony
Rod Farlow
Staff Writers

One no vote stopped the Board of Trustees Thursday in considering a proposal to create a task force to study whether access to the SIU System will be limited by increased tuition and decreased federal aid.

Because the proposal had not been included on the agenda, only one no vote was necessary to stop the board from taking action on the measure.

However, Board Chairman William Norwood announced that the Board of Higher Education passed a resolution Tuesday saying it would sponsor a statewide study to determine the effects of increased tuition on enrollment. The SIU Board would take the study at the "earliest possible time," Norwood said.

But Norwood's announcement did not seem to satisfy the SUCICU. Some trustees opposed the proposal to take a look at an issue that focuses on the SUCICU's own vote necessary to kill the measure.

The proposal, supported by both the GSU and Undergraduate Student Organization, sought to give the board a "long-range" view of the university's system-wide task force to study the access question.

Trusted OK alcohol fuel facility

By Mike Anthony

Staff Writers

The Board of Trustees Thursday approved construction of a $220,000 fuel production facility at the SIU-C Carterville campus. Construction of the ethanol-producing facility will be funded by a grant from the U.S. Forest Service Development Administration.

The board authorized Physical Plant Engineering Services to provide support for the project's design and engineering work.

The facilities will consist of an existing steam plant, a new 250 square-foot metal building, two existing 20,000-gallon stationary tanks, two new catch basins, one to be a cooling pond, the other a settling pond for liquid waste.

The primary purpose of the project is to demonstrate research findings on various phases of alcohol production as an alternative fuel.

The board also got its first look at a proposal to increase student fees for eight School of Technical Careers light-aircraft training courses by amounts ranging from $135.50 to $485.50.

Falklandsdispute called 'flag-waving'

By Christopher Kode
Staff Writer

The Argentine invasion of the Falkland Islands was, at least in part, an effort by the Argentine government to "reclaim its people behind the flag" amidst domestic dissent, says three SIU experts.

Robert Hallissey, history department faculty member, said, "It's a well-known tactic that any time you want to weed a people together, you

find an external enemy."

Manfred Lautedecker, political science department faculty member, said even in a right-wing regime like Argentina "there is strong support for flag-waving" and that the invasion was "an outside incident used to create support for the war."

But both would probably agree with David Werch, also a history department faculty member, that the longer the impasse between

News Analysis

Britain and Argentina exists, "the more opportunity there will be for something to happen which would prevent a peaceful solution."

"I don't think either country wants a war." Hallissey said. "They have known they would be receptive to (Secretary of State Alexander) Haig's intervention."

And the entire episode is an example of "the British system's ability to control them," he said.

Hallissey said there is plenty of time for negotiations because it will take at least another week to reach the Falklands. But what worries him is that in a nuclear age, we may not always have the luxury of a stopgap measure; we must face decisions about such conflicts.

The entire incident proves the need for some kind of built-in safeguards for our foreign policy to prevent disputes from turning into name-calling and reckless displays of "macho," he said.

Hallissey also noted the willingness of both sides to welcome U.S. mediation "is a

British pressure on Argentina heightens while Haig negotiates

By The Associated Press

Britain declared Thursday it will "act now" if any second snowstorm of the week Thursday, the Falkland Islands, hinted British submarines already were prowling the area. The latest snowfall caused some elements of its armed forces probably will be there by the weekend.

The warning sharply compressed the timetable for reaching a diplomatic resolution of the crisis, escalated the pressure on Argentina to withdraw from the British colony it seized, and complicated the peace-seeking task of Secretary of State Alexander M. Haig Jr.

Haig, who called Britain the "United States' closest ally and friend," met for an hour with Foreign Secretary Francis Pym and conferred with Prime Minister Margaret Thatcher at her country home outside London Thursday.

British sources said Mrs. Thatcher's main concern was whether Britain will negotiate with Argentina unless it withdraws from the islands demanded by the U.N. Security Council.

Haig will fly to Buenos Aires on Friday to meet leaders of Argentina's military junta.

Argentine reservists and volunteers lined up for possible military duty against Britain. A decision affecting some 120,000 men, the government announced Wednesday night that all draftees discharged within the last year must report.

Pym, in a special broadcast to the islands on the British Broadcasting Corp.'s World Service, said: "We will come to you as soon as we can — we hope by peaceful means."

Meanwhile, some senior U.S. military officers question whether Britain can sustain an effective blockade around the Falkland Islands, especially since its fleet must operate at the end of an 8,000-mile supply line.

Except for nuclear-powered submarines, the British armada must rely almost exclusively on fuel from home to remain on station. There is also the problem of supplying food for the thousands of British sailors and marines aboard at least 40 ships.

The British have the right to land supply planes on a 16,000-foot U.S.-operated runway on Ascension Island, about 5,000 miles from the Falklands. But U.S. officials said it is highly doubtful that Britain could haul enough fuel and other bulk cargo by air to satisfy its fleet's continuing requirements.

Snow hits plains, Midwest again

By The Associated Press

The winter that won't go away wallowed the northern Great Plains Thursday, as a second snowstorm of the week Thursday, the Falkland Islands, hinted British submarines already were prowling the area. The latest snowfall caused some elements of its armed forces probably will be there by the weekend.

"For cold air to come this out of the north at this time of year," he said.

Following in the tracks of the blizzard that paralyzed much of the nation Tuesday, the latest storm dumped snow from the Dakotas through Iowa and northern Missouri, touched intensive blockade around and reached into Appalachia.

The storm was expected to reach the Northeast and mid-Atlantic states Friday, bringing rain and snow but not a blizzard, forecasters said.

"We're due for one last blast of winter air," said Wayne Albright, a weather service specialist in Galloway Township, N.J.

Student 'revolt' call draws small turnout

By Mike Anthony
Staff Writer

Posters proclaiming "REVOLT — Down with the Shaw!" have popped up on campus and in Carbondale during the last couple of days.

The posters urged students to attend the Board of Trustees meeting Thursday to demand "only chance to stop Chancellor 'Shaw' you won't give up your student aid until he gets rid of his $83,000 salary, $12,000 housing allowance and $4,500 carpet!"

"The SIU Board expects you to target about tuition hikes, as they consider next year's tuition hikes of 20 to 40 percent. But they're cut class, the time is now," the posters trumpeted.

Despite the posters being widely distributed, however, only about 20 students attended the meeting.

And Shaw, the main target of the posters, seemed as unaffected by them as he was by the uproar that occurred last fall when the board incorporated a $12,000 housing allowance into his salary, bringing it to $83,000.

"It's a free country and people certainly have the right to their views," Shaw said Thursday.

According to a student who said he was involved in the printing and distribution of the posters, about 500 posters were distributed in on-campus residence halls, off-campus residence halls, on Illinois Avenue and on campus. The student declined to give his name.

"We hit every place on campus," he said. "We figured it was a good way to get the students to come to the meeting because there hadn't been too much publicity about it."

But Shaw didn't seem to take the message seriously, saying the only thing he was disappointed about was the part urging students to cut class.

Geography prof given service award by board; 39 get tenure

An SIU-C geography faculty member received a public-service award from the Board of Trustees Thursday and another 39 faculty members were given tenure.

David E. Christensen received the 1975 Lindell W. Sturgis Memorial Public Service Award and a check for $500 for his involvement in deliberations on Carbondale redevelopment, planning of the Cedar Lake Reservoir and drawing the city's zoning ordinance.

The award was established in 1960 by the family of the late Lindell Sturgis. Sturgis was a member of the Board of Trustees for 21 years and was chairman for three years.

Christensen, 51, who has been at SIU-C since 1965, has served on the Carbondale Planning Commission for 15 years. He served as assistant dean of SIU-C's College of Liberal Arts and Sciences from 1966 to 1970, and was associate dean from 1970 to 1974.

He served as acting chairman of the geography department in 1975 and 1976. The Board of Trustees awarded 29 SIU-C faculty members tenure on Thursday: Renee Ahlf, Dental Hygiene; Barry Arthur, Ac- countancy; Paul Bates, Special Education; David Bagley, Electrical Sciences and Systems Engineering; Donald Blasing, Botany; Leon Bone, Physiology; Loren Cocking, Cinema and Photography; K.K. Collins, English; Robert Corrucini, Anthropology; Harry Damos, Guidance and Education; Paul Bates, Systems Engineering; Donald Christensen, Education; David Begley, Technology; David Christensen, Philosophy; David Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science; Donald Christensen, Computer Science.
Gays and heterosexuals must be open-minded

According to the national news media, gay people on major college campuses across the country have gradually become more accepted, have gradually begun to feel safe enough to talk about their social isolation.

At SIU-C, the closet door apparently is still shut. It is still acceptable for students who identify themselves as gay but who did not want their names used to quote...as saying there are few public places in Carbondale where they can be seen, with each other. And they lamented that there were few people to whom they can talk about their social isolation.

Gay rights have not become an issue here as they have at other places.

These students willing to talk about life in the closet voluntarily avoided a discussion of publication. A "disclosure" spoken of feeling estranged or covert, subtle discrimination - which may be the most discouraging and difficult to overcome. After all, the issue of covert discrimination, where the victim has the courage to fight it, in jobs, housing and other areas...is for the same right.

There is recourse for the subtle kind of discrimination, too. And it, too, requires some courage.

It is in understanding and tolerance.

Tension - and fear - between the gay subculture and the total society cannot be wished away or ignored. Nor can it be erased across

Both homosexuals and heterosexuals, however, can ease the tensions by keeping open minds about each other.

Letters

Faculty must pay parking fines

I am glad to hear that the Carbondale Federation of University Teachers has born the costs of the last round of litigation over the issue of withholding parking fines. But at the same time, I am amused that the faculty continue to wish to have a voice in the actions of SIU's "respectable" programs, in this case the one that owe the university money.

The issue isn't whether the University can go after teachers pay. These teachers owe money, and the University has the right to know they know it. If someone stole your car and mistook your sticker and you didn't know it, then fight it in court. Pay if not, pay your bills.

Mavericks are dedicated to all SIU-C students

I have been a student at SIU-C since the fall of 1979. When I first arrived, I thought the Undergraduate Student Organization was just another one of those 'dopey' student organizations. At first I did not vote in the elections, I thought it would not matter who I voted for.

Then in the spring of '80, I had a chance to talk to the Maverick Party and its candidates for president and vice-president. I was astounded at what they planned to do and the programs they wanted to sponsor to improve the University and the student body as a whole. They have a chance in this election to win any of the past candidates and parties.

The combined I.D. and fee statement, the policy for off-campus rooming, the Carbondale Clean-up Day, the book co-op, the free student directory and the successful opposition to the original amusement tax (which would have had a large impact on the University) are just a few accomplishments of the Maverick Party.

The list does not end there. Their recent proposal, Mavericonomics - will be the first program to examine the administrations budget and fight unnecessary and unneeded administrative fees. For as long as I am here, I will be a dedicated Maverick supporter. I am dedicated to the student body and not the University. Mavericonomics is SIU needs - a strong, united body of students who can keep SIU-C affordable for the primary concern of the students. - Joel Jakubowski, Junior, Marketing.

Mavericks running on issues

A statement was recently published in the Daily Egyptian indicating that the Civil Service Bargaining Organization has done little for SIU-C secretaries. I am not a secretary, but the CSBO does bargain for me. I disagree with the statement, the CSBO, a person hired as of June 30th on a job for July 1 of that same year, that a person would have gotten $7 and a half percent this year.

A person who gives loyal service over a period of years should be rewarded. The CSBO has provided that reward and it is better than the CSBO negotiating in my interest.

I find it infuriating that someone is constantly suggesting the movement to get out of the CSBO have benefits.

Gays find few places for openness

BY JOHN AMBROSA
STAFF WRITER

Suspended from the ceiling, a large silver bell swirled above the dance floor, illuminating it with waves of speckled light, occasionally flickering to create a strobe-effect on the dancers.

As “Mirror, Mirror” plays loudly across the room, couples dancing on the wooden floor, many performing acrobatic jumps and tricks. Others simply cling to each other, kissing, caressing and stroking. The scene seems normal enough for a busy Saturday night at a raucous Carbondale dance bar.

But the scene at The Bar would probably shock most people. Almost all the couples on the floor are homosexuals—gay couples have come to one of the few places in the city where they feel comfortable expressing their sexual preferences without being harassed. The New York Night Club, another Carbondale bar, had a reputation as a gay “bait and switch” bar, but changed ownership last December. Susan Immone, one of the new owners, said, “There is no longer any gay atmosphere.” So that leaves The Bar.

In Carbondale, however, the stigma attached to being gay is being shed. The Bar, a gay subculture at SIUC, is one that has been redeemed in recent times. The emergence of the Gay People’s Union and places like the New Yorker and The Bar indicate that there is enough growth for openness.

It’s tougher for gays to meet people... That’s why The Bar is such a needed place. People have to have somewhere to meet without fear or shame.”

The bartender at The Bar said that if it weren’t for that gathering point, many gays would feel disoriented, confined and alone.

Through the sexually liberating 1960s and ’70s, and even through the sexual wave of the first two years of the ’80s, the stigma attached to being gay has apparently begun to wear down. However, perhaps, by recent movies such as “Cruising” and “Making Love” and by news media reports — such as this week’s Newsweek article on college homosexuals — the general public has become better informed about homosexuality, and more understanding of the problems that face homosexuals.

In Carbondale, however, the stigma appears tough to erase. The consensus among SIUC gays is that nothing is ever going to be changed, and that such a change will come about only if the groups stay in isolation and a different threat, there is discrimination against them. As one lesbian put it, the places a gay can go “are my place, her place and The Bar.” Indeed, The Bar, to many gays, represents the one place where affection can be openly expressed without the fear of harassment.

Scott, President of SIUC-Gay People’s Union, says that his organization is at: alternative for girls as a place to go instead of The Bar. The only group dates back to 1976, and the union meets twice monthly, once for its 35 to 40 members just to talk to one another, and once for entertainment or international programming, such as this week’s session on the relationship between gay men and lesbian women.

“We have eight people on a steering committee who oversee all of our activities,” Scott said. “We meet once every two weeks to talk to one another, and once for entertainment or international programming, such as this week’s session on the relationship between gay men and lesbian women.”

Anal cancer linked to homosexual behavior

By Sharon Cohen
Associated Press Writer

CHICAGO — Anal cancer, a rare but sometimes deadly disease, poses an increasingly high risk for male homosexuals, probably because of their sexual activity, a new study suggests.

The report, which researchers say is the first study of its kind, also indicates a lower risk for female homosexuals.

Researchers estimate the anal cancer risk may be 25 to 50 times higher for male homosexuals than heterosexual men. "Presumably, among male homosexuals it occurs very often," said Dr. Noel Weiss, one of the study's authors.

The yearly incidence of anal cancer in male homosexuals is only between 12 and 16 men per 100,000. But Weiss said all cancers for about 300 cases per 100,000 men each year.

Researchers are not certain how anal cancer develops but speculate it may be related to viruses transmitted during sexual activity. "That would be the most likely explanation," Weiss said.

Weiss said herpes and genital warts also have been linked to male homosexual behavior.

The study's findings are published in the April 9 issue of the Journal of the American Medical Association.

Doctors have also linked an outbreak of Kaposi's sarcoma, a rare form of skin cancer, with male homosexuals. The Centers for Disease Control says that about 80 percent of the cases discovered in the last three years have been among the gay population.

In this newest study, conducted in Washington State, doctors reviewed separate cancer registries for Kaposi's sarcoma, which was used, said Weiss, because it is a measure of homosexual behavior among men.

Weiss said male homosexuals probably account for the majority of people with syphilis at the current time. The study, which included both men and women, found the proportion of men with anal cancer even higher.

See CANCER. Page 7
Focus

CANCER from Page 6

cancer who had evidence of syphilis at some point in their lives was much higher than men in other cancer groups.

Researchers surveyed a six-year registry of cancer patients in western Washington and found that 4 of 57 men with anal cancer, eight—or 17 percent—were on a separate syphilis registry. That compares to average of 1.2 percent for men with other cancers.

Although the syphilis classification was used, researchers do not link the disease. "We're not indicating syphilis is the etiology of the disease. It's just a possible indicator of homosexuality," said Janet Daling, another study author.

The study on anal cancer comes just a week after doctors in San Francisco noted they have four outbreaks of two types of tumors among homosexuals. Doctors said they have uncovered four cases of rare Burkitt's lymphoma, which occurs in the body's infection-fighting system, and three incidences of a form of tongue cancer.
UNION from Page 5

"THE ORGANIZATION EXISTS for two purposes," he said. "One is for our members to meet as an alternative to The Bar and talk and learn something. The other is for us to help break down the barriers between gays and straights. But that's a tough job.

"I've found that the majority of people accept this as real love. I went to see that film 'Making Love,' and the majority view of the audience was low. And of course, Carbonalle is in the Bible Belt, which doesn't make it easy for gays to be accepted."

Scott said that the union has unofficially placed people in the Counseling Center to offer support and advice to gays, and that he expects a task force to be formed soon to look into problems of gays in the SIU-C community. He said the Student Wellness Center, said that gay programs at the Wellness Center, said that counseling for gays has not been cut out, but that gay and lesbian support programs have been discontinued because of manpower and financial cutbacks.

"I've heard that some people have been reading discrimination into it more, and with the conservative wave sweeping the country right now I can see their viewpoint," Cohen said. "This was not a discriminatory move. Gays can still come in for counseling up to five sessions per person before we have to send someone to the Counseling Center."

"This wasn't just with gays. We've done it with programs for heterosexuals and with our sex therapy counseling — actually, across the board in all Wellness Center programs. We've got only one full-time worker and two 20-hour-a-week grad assistants, so we had to reorganize our priorities. We see pregnancy counseling as our biggest need right now," COHEN SAID THAT there are more than 500 unwanted pregna scies at SIU-C each year, or roughly one in every 30 known who are students.

GAYS from Page 5

to go is an even bigger one," said one gay. "Most gays I know definitely don't stick to one partner. As a matter of fact, we generally will take any partner we can get. For one, at least, it's the knowledge that I can now get my feelings out on myself to one person, but I think that's just more of my makeup than of being gay."

ONE LESBIAN summed up what she thought the feeling: for most gays were like. "If I really like someone a lot, I'm going to want to be with them a lot, of course," she said. "Now people have to get out, go out. But where can we go? We can go to parties, but if we have not gay parties that can lead to trouble. We can get to dinner and see each other, but we can't show our affections at those places.

"About the only places we can go are my place, her place and The Bar, in Carbonalle. I don't think there are enough places for gays in this city, and the attitude toward gays, for an institution supposedly comprised of mature, thinking people, is terrible. We've got a long road ahead if we're ever going to be accepted here."
Schools help human conditions, says Shaw

By Tom Travlin
News Editor

Despite decreasing funds and dwindling resources, universities can continue to make a major impact on the improvement of the human condition, Chancellor Kenneth Shaw said.

Shaw, speaking to a group of professionals, students and faculty at last week's SIU '82 Conference Thursday, suggested four principles by which universities can improve the human condition.

First, he said, universities can improve the human condition by their training of human services professionals — a role we willfully undertake. "We must continue to improve our programs and inculcate in our students a dedication to providing service and, at the same time, a commitment to helping others help themselves — to become more independent. "Further, our professionals must understand the necessity for all society to be productive, as their work will be made much easier when such wealth is produced. Our professionals must be good communicators — people who can explain the need for human services to the general populace. Part of our joint effort to help the public understands."

"Universities, then, must continue to strive in improving their programs in the training of human service professionals — people that can perform services help people become more independent, and articulate the need for human services," he said.

Secondly, Shaw said universities should provide human services, and that these actions are essential in improving the quality of life in any community.

"This University provides many such services not only for its students, but also for the public," he said. "The Clinical Center at SIU-C, for example, provides diagnostic services of psychological, speech, hearing, reading and general educational programs to the community.

"As we move away from federal and government involvement, many essential services must still be provided, and to what extent to which universities can, they will make.

a great contribution to the regions in which they are located," he said.

Shaw also said universities can also improve the human condition by educating those who will be in the "productive" end of the labor force. He defined the "productive" end as those people who make products which consumers will want and which will enhance the overall wealth of the nation.

"At SIU over the years there has been tremendous growth in the number of business, engineering and computer science majors," he said. "At SIU-C nearly 30 percent of the undergraduate student body is enrolled in these three fields. "We need to do a better job of teaching our business majors good management techniques. We need modern equipment and the best faculty if our nation is to be competitive internationally. Activities including the offering of courses in management to area businesses, sponsoring conferences and workshops like last week's coal conference, and offering to serve as a resource to the business community are some of the many ways the University can help," he said.

Fourth, Shaw said universities can improve the human condition by doing a better job of educating their students in non-technical studies. He said most universities are attempting to bring about reforms in this area, but the process is slow and often the outcome is discouraging.

"This is a small part of a good general education but, in my opinion, it is one that needs to be strengthened," he said. "There are many forces in our society which lead people down the path of self-satisfaction to the neglect of others.

"We can't be expected to turn that around, but we should make a sincere effort to have our graduates aware of those things about our environment that affect the human condition," he said.

Shaw concluded by saying that bridges between the efforts of the University and other human services workers, business, government and labor must be built, and cooperation is needed if the human condition is to be improved.
SPC plans travel, recreation trips

Canoeists, cyclists and sports fans may find something of interest in a full schedule of trips planned for April by the Student Programming Council's Travel and Recreation Committee.

Participants must sign up in advance at the SPC office on the third floor of the Student Center.

A canoeing trip is planned for the weekend of April 16 to 18 to Jack's Fork Creek in Missouri. A $25 deposit on canoe rental. Car pools will be arranged at a meeting at 1 p.m.

April 13 in Student Center, Activity Room A.

A bus will leave the Student Center at 10 a.m. April 17 for a trip to the Cardinals-Phillies game in St. Louis. Cost is $13 per person or $25 per couple.

A breakfast-horseback ride at Hoef affairs Equestrian Center is planned for April 25. The cost of the trip is $12 per person. Car pools will be arranged. Participants will leave from the Student Center at 8:30 a.m.

A bike-hike-overnight camp at Luray Fine Hills is scheduled for May 1 to 2. A fee of $15 per person covers the cost of a van to transport equipment. Participants will leave at 8 a.m. and return Sunday afternoon.

Devil's Kitchen will be the site of an overnight horseback ride and camped May 1 to 2. The fee is $25 per person. Participants will leave from the Student Center at 3:15 p.m. Saturday, returning late Sunday morning.

A trip to the Kentucky Derby the first weekend in May is in the planning stage.

Indian films set for Student Center

India produces more films per year than any other country in the world, and viewing films is the cheapest and most popular form of entertainment in that country, according to Suresh Wadhawan, vice-president of the Indian Student Association.

This weekend, a film festival sponsored by the association will focus on four of those films. Two double features are planned for Saturday and Sunday in the Student Center Fourth Floor Video Lounge. All films are in Hindi. Admission is free and open to the public.

"Insaat Ka Tarazay" and "Naseeb" will be shown beginning at 6:30 p.m. Saturday. Based on the film "Lipstick," "Insaat Ka Tarazay" details a rapist victim's fight in court. "Naseeb" stars the current number-one actor in India, Amitabh Bachchan.

The actor also stars in "Kalia," leading off the double feature beginning at 3:30 p.m. Sunday. "Kalia" will be followed by "Bulandi," which details the story of a college professor who reforms a class full of hard-core juvenile delinquents. They then join to fight the evils of society.

Nature group plans hikes, nature talk
Joseph Bemity, professor of zoology, will speak on "Wonders of the World of Nature" at 7:30 p.m. Friday at Carbondale Savings and Loan, 500 W. Main St. The presentation is part of the Southern Illinois Audubon Society meeting.

The society and the Shawnee Trails Conference will have a hike along the soon-to-be-abandoned Illinois Central Gulf Railroad right-of-way starting at 9 a.m. Saturday, April 17. Participants will meet here at the Murdaile Shopping Center to caravan to the site. They will return by mid-afternoon.

Another hike, to the LaRue-Pine Hills Ecological Area, Saturday May 1, is planned to observe the flora and fauna. For sign-up details call 457-6453 or 457-5606.

Adult education seminar planned
Methods for making education available to part-time adult students will be shown at a seminar starting at 8:30 a.m. Tuesday in the Student Center.

Educators throughout the region are invited to the free program that will show guidelines for developing instructional packages and for using television teaching techniques.
Reagan's New Federalism endorsed by Rep. Dan Crane

By Bob Marzand
Staff Writer

Calling Washington D.C. and Congress "Disneyland East," and the "only immune asylum run by the inmates," U.S. Rep. Daniel Crane, R-Daville, carried the torch of New Federalism into Ballroom D of the Student Center on Wednesday. Sponsored by the College of Human Resources, Crane, in a speech entitled "Moving Forward With New Federalism," endorsed President Reagan's plan to turn over to the states during a speech Wednesday night in Ballroom D of the Student Center.

Reagan's New Federalism proposal, saying it also would reinstate state's rights and eliminate unnecessary duplication.

"There is an education department at the federal level and one at the state level; welfare at the federal level and welfare at the state level. The cost is astronomical when we create these duplications," Crane said.

"We don't need more skycrapers in Washington, D.C. For every $1.40 that leaves the state of Illinois, we only get $4.40 back. That's a pretty high usage fee. There are others (besides Washington) taking away from the industrialized state.

"And my argument is if we keep those monies here, we can keep those monies for the programs we desire...but when we let the money go out to the feds, that's the last we'll see of it," he said.

Crane lashed out at opponents of Reagan's New Federalism program, and cited numerous examples of fraud found by the General Accounting Office within the federal agencies in Washington. He said that because of inadequate controls by the federal government, over 77,000 cases of fraud occurred within its agencies between 1976 and 1979, and the number of fraudulent acts not found by the GAO is probably three-fold. He gave an example of the costly fraudulence in the federal ranks when a woman was found to have embezzled $16,000 from the Law Enforcement and Assistance Administration. Crane said the irony in this case is that the woman has to pay only $20 back.

U.S. Rep. Daniel Crane, R-Daville, praised Ronald Reagan's plans to turn some programs over to the states during a speech Wednesday night in Ballroom D of the Student Center.
Expert says New Federalism could harm rehab programs

By Bob Sendurari
Staff Writer

If the New Federalism allows state administrators to manage their programs more effectively and apply funds to the most needy areas, then it will be effective.

But Robert Granzeier said he has some doubts about the New Federalism's effectiveness. Granzeier, director of the Illinois Department of Rehabilitation Services, spokeprivately at the Human Resources '87 Conference on the effects New Federalism may have on rehabilitation services in Illinois.

Granzeier criticized many changes made to section 504 of the Rehabilitation Act of 1973, which provides many rights to the handicapped.

He said that the efforts to bring the rights of the disabled Americans to bear could be thwarted by the new regulation. One added regulation states that a handicapped student can be educated at a cost no greater than that of a non-handicapped student, which, to Granzeier "eliminates the absolute right of that youngster to receive a free education."

Another change frees colleges from regulation and provides auxiliary aids to handicapped students if it can't afford to do so, or if the student can afford to provide it.

With universities facing many financial constraints, handicapped students may suffer. Unfortunately, "it's very difficult for the universities to come up with those resources," Granzeier said.

"It's totally irresponsible to ask a handicapped individual who is in need of, and qualified for, and can benefit from, an education, if this University to be deprived of that because they can't afford to pay for the auxiliary aid," he said.

New buildings are not required to build handicapped access into their plans if the building is not intended for the physically handicapped. "I don't understand the rationale for that kind of regulation," Granzeier said.

"If that's deregulation, then I think we all have a very serious, serious problem as to how we're going to work and provide these services to our disabled populations that they so rightly deserve," Granzeier said.

He supported efforts to cut on abuses of the system, but was wary of the costs involved. "Are we willing to restructure and reform the entire program in order to identify maybe ten people ineligible, and who are receiving welfare, and in that...

Robert Granzeier spoke Thursday morning in the Student Center Auditorium on New Federalism's effect on rehabilitation.
VOTE from Page 1

Representatives from the two communities, student constituency groups, faculty, Student Work and Financial Assistance, and the government offices, the chancellor's office and the board would have made up the task force.

In addition, the proposal recommended the appointment of a professional assistant to assist the task force.

Both Brown and Tod Rogers, USD president, applauded the BHED's statewide study, but they said an additional study, concentrating on specific problems the system faces, is needed.

"SIU has a particular mission serving the needs of this region," Brown said. "We're concerned that with the escalation of tuition, fees, and in housing and inflation, as well as decreasing federal and, that income students and middle-income students will be disenfranchised from an education."

But Elliott said he believed that "the issue of access is broader than just SIU" and he suggested that the system undertake a study that might change the BHED's "I want to see the job done, but with the least spinning of wheels," Elliott said.

Board Member Harris Rowe agreed with Elliott, saying, "Any study we do must be in concert with the BHED." St. Louis, SIU-C student trustee, said he feared that if a statewide study concern was that with the SIU System could be weighed less than the cost of other universities.

Conducting a study of access to the system "would be very, very valuable in the appropriation process and to the ISHE," Irvin said.

Furthermore, that study is needed because, if the figures do not indicate access, Rogers said, "Which students will be able to afford SIU" Rogers said, "Not lower- or middle-income students or minorities. Is the specific mission of SIU only to maintain high enrollments or to open its doors to all?"

While Chancellor Kenneth Shaw did not address the question of a study, he said, "I couldn't disagree more with the proposal, in fact what we're trying to accomplish."

Task forces are designed to participate in making decisions," Shaw said. "Studies are designed to obtain information and to make generalizations. Ordinarily you don't bring the two together. When the first and second part go together, they usually become intertwined."

REHAB from Page 13

process eliminate two or three who are totally destitute and in need of that kind of program," he asked.

Granzer, when questioned if funding support for rehabilitation would be maintained under the New Federalism, said administrators are being forced to choose which programs they wish to operate, and which they can't afford to fund.

"You can not just sit back and want to do everything for everybody, because those days are gone."

As another example of the

CRANE from Page 12

dollars per month in restitution — at which rate it would take 65 years to pay back.

"Crane said the GAO study found the state had used un honest and in Agriculture Department; 196 in the Commerce Department; 639 in the Labor and Industry Department; 624 in the Environmental Protection Agency; 279 in the Commerce Department; 624 in the Environmental Protection Agency; 279 in the Department of Health, Education and Welfare; 1,100 in Housing and Urban Development; 11,181 in Postal Service; 13,471 in the Social Security Administration and 1,996 in the Veterans Administration.

He also said the GAO study found the state had used un honest and in Agriculture Department as being "not aggressive in pursuing the return of borrowed funds."

Because of this gross negligence on the part of the federal government and its various agencies, Crane said, New Federalism would put many of those programs closer to the people who do something about it in their own state.

"They don't know much about Carbondale in Washington. We

(individual sizes) keep looking with a paternalistic concept toward Washington, D.C. and Congress has the power to all the programs that have gone on," he said.

"It would be easier to work with your local government than it would be to work with the federal government," he continued. "We (Illinois) are nothing but a voice in the wilderness out there."

Many fear, however, that the programs now under federal control will be eliminated when the transition to the states occurs. But Crane said that if a certain program is "worth its weight" it would be reinstated at the state level by way of local community pressures.

"The states will pick them up, because you'll put pressure on your local communities and your local state government, and they will be responsive. They have to be responsive," he said.

"However, they're not going to like it too much because what you'll say is 'Hey, you either fund my program or I'm not going to vote for you.'"

"We have to relate to the problems of the people.

Buzbee, Richmond say state can't cover federal programs

By Jay Small
Staff Writer

Illinois government does not have enough revenue to compensate for federal programs cut as part of President Reagan's New Federalism, state legislators Kenneth Buzbee and Bruce Richmond told Thursday during a panel discussion on Reagan's New Federalism, control, which would transfer federal programs "decoupling" from the federal level.

"At the state level, the desire by people to make cuts is strong," said Buzbee. "But to capture the big "stars in Illinois, there are only a few places to go."

Buzbee mentioned the state Departments of Public Aid, Elementary and Secondary Education, and Higher Education as high-budget agencies. He also cited large expenditures for correctional facilities.

"We passed tough crime laws like the Class X felony, and now we're having to pay for it," Buzbee said. "It cost $12,000 to tend an inmate, and it's going up."

Buzbee also said that proposed cuts in Medicaid benefits at the state level could jeopardize as many as 40,000 Illinois residents.

Brush fires are most likely to occur in Southern Illinois at the time of year, according to Paul Roth, forestry faculty member. Roth, who teaches a class in fire control management and Southern Illinois has never experienced a major forest fire, but small fires do occur, especially at this time of year.

He said that the dual fire season, composed of the primary and secondary fire seasons, have certain conditions such as relatively low air temperature, low humidity, strong winds and lack of precipitation which make the land more susceptible to fire hazards.

The primary season begins in March and ends in April. Roth said, During this time of year, "it's very windy and the vegetation is very dry. It is the most dangerous time."

"During the summer when the leaves are green, there is a lot of water in the leaves. So, if a fire occurs, it will simply dry out the vegetation instead of increasing fire risk," he said.

"arguing it," he said.

Roth said the primary season usually brings out the fire fighters, campers, hikers, fishermen and hunters, who unintentionally start forest fires.

The fall or secondary season is not as bad as the primary season because "there's not as much wind or as many people out," he said.

He said lightning and people's carelessness are the two basic causes of forest fires.

Lightening is a serious cause of fire, mainly in the mountains of the West. "These fires often occur in remote areas that are very difficult to reach, and therefore the fire fighters have difficulty to put out. They become very large very quickly," he said.

Roth referred to a large fire being a conflagration which is capable of creating conditions for itself such as wind and heat.

He said the heat can dry out the vegetation around the fire to make more fuel for the fire.

"At this particular time, it would be very difficult to suppress it with man-made objects," he said.

He suggests that once a fire is out of control, "you should fight fire with fire by making a back fire to burn up the fuel of the upcoming fire."

"The major part of wild fires are caused by man. Roth said. He said causes of fires started by man include "lack of knowledge of the hazards of fire, failure to take proper precautions, spontaneous carelessness and even maliciousness."

"The after effects of an un-controlled fire can be just as damaging as during the fire itself. If the land is not taken care of immediately, it will rot and insects will thrive on it," he said.

Not all man-caused fires are considered bad, said Roth. "Fire can be used by trained and experienced foresters for controlling certain insects and diseases, eliminating scrub, and opening up small areas in the forest where shrubs - will provide food and cover for wildlife," he said.

**DISPUTE from Page 1**

positive statement about and positive testimony to the role the United States should play in bringing about world peace."

But, said, he added, "if we are to be truly involved in it, a sentiment echoed by his colleague, Werner.

Werich believes the United States should proclaim its neutrality in the dispute and "offer its good offices" in settling it.

He said, however, that if the United States had been on both sides, "I can't see it supporting Argentina because 'A' government has been an unpredictable ally when the chips are down."

During World War I, Argentina refused to break relations with Germany "because it wanted to see a state rise, which would decrease British influence in Central and South America," he said.

Roth said, During World War II, Argentina declared war on Germany at the very end and managed to get into the United Nations and more recently, it sold grain to Russia at the time of the U.S. embargo.

"They have seemed to be an ally only when it is not particularly important to be one," Werich said.

Leeper said there should be "a team approach" among the nations of the Western Hemisphere.

Brush fires most likely to occur now
Political Science Department
16th in nation in productivity

by Marlon T. Riede
Student Writer

The Political Science Department has been ranked 16th in the nation, according to a recent productivity study conducted by John Foster, chairman of the Political Science Department.

"We produced more journal articles than any other public-supported political science department in Illinois," Foster said. This total was higher than our bitter rivals at Harvard, Yale, Stanford, Chicago, and Northwestern Universities," he said.

The study measured faculty productivity rates for the major political science journals from 1977-81. The study was based on a process called "article counting," in which points are awarded to a faculty member's résumé for each article that is published in one of the seven top political science journals.

The study seemed to confirm one of Foster's theories that the higher the prestige of a school, the fewer articles it has published. The schools that produced the most articles, the University of Michigan and the University of Kentucky, are considered less prestigious than schools such as Harvard or Yale, which had fewer articles published.

Foster said this could be the result of many factors. The prestigious departments may be "disproportionately forsaking general journals and directing their publishing efforts toward grants, sub-field journals and books," Foster said.

Another possible reason, Foster said, is that the faculty at the more prestigious schools have reduced the quantity of articles being written to better the quality of the ones they do write.

Or it may be that there may have been significant reductions in some of the research contributions at these more prestigious schools, Foster said.

The study's findings are significant, Foster said, because they indicate that there may be a relationship between the productivity of a school and its prestige.

The study also found that the study's findings are significant, Foster said, because they indicate that there may be a relationship between the productivity of a school and its prestige.

You've made it when you can
"do-it-yourself."

After weeks of intensive training, Lt. Bob Lowhorn planned and manned a flight without an instructor. Just Bob and his teammate, the pilot, he's a Naval Flight Officer (NFO). If you think you have his kind of determination, we want to train you to be on our Naval air team.

As a Naval Flight Officer, you'll be trained to navigate; operate radar systems, etc.

We want Naval Aviation (Pilots), too. After learning the basics of flight, you'll train in jets and prop aircraft. You'll deal with soloing...landing on an aircraft carrier. It's rough, but when you get your Wings of Gold, you'll know it's worth it...because then, you're someone special.

The opportunity is for real...

and so are we.

Netters idle thanks to snow

By Steve Metzch
Sports Editor

Heavy snows in northern Illinois have led to the cancellations of the men's tennis tournament at Northwestern and Western Michigan in Evanston Friday and Saturday.

"I guess they have an awful lot of snow up there and weren't able to find any available indoor courts," said Coach Dick LeFevre. "That's four matches we've lost this season because of the weather that I think we could have won.

The Salukis lost two scheduled matches because of bad weather at last weekend's Mid-America Invitational. Cold weather and gusting winds led to the cancellation of planned matches with Missouri and Kansas.

LeFevre said he called Western Michigan's coach Thursday and told him the Broncos would save money if they didn't travel to Kalamazoo. Instead, LeFevre suggested the Salukis and Broncos square off in Kalamazoo.

"I told him we could split the cost of renting an indoor court, but he said he'd rather not," LeFevre said. "I guess we'd
gotten out that we've beaten teams like Florida, Notre Dame and Indiana."

So LeFevre began to search around for teams that could meet this weekend, but didn't have much luck.

"We were going to play St. Louis, but southeast Missouri beat them 8-1. It would be a waste of time to go up there," he said.

The longtime Saluki coach said he tried to set up a practice meet with SIU-C's school, St. Louis University, but again ran into an obstacle.

He said SIU-E has a busy schedule with few days off and couldn't square the Salukis in.

Though the Salukis may not be competing with another school this weekend, they won't be sitting around idly. LeFevre plans to have the netters practicing so they can keep on top of their games.

LeFevre said what really hurts about the canceled matches is SIU-C's streak of 9-11, won't have the chance to reach .500 until next weekend.

The netters will next be in action April 17 and 18 when they face Wichita State and Indiana State at the University Tennis Courts.

Weather doesn't worry lady golfers

By Linda Stockman
Staff Writer

Neither rain, sleet, snow nor cold weather will cancel the women's spring tourney this weekend, according to Coach Mary Beth McGirr.

The Salukis will travel to Columbus, Ohio, to participate in a 20-team, double tournament Friday through Sunday at the Ohio State University.

"Too much planning was put into this tournament to cancel it because of weather," said McGirr. She said the 18-holes per-day schedule may be changed, however, to accommodate a day of bad weather.

"We might have to play 36 holes on one day and 18 on another," she said.

Sophomores Sue Arbogast, Beth Anderson, Tonya Keel, Dania Meador and Lisa Ratman-Brown will compete for the Salukis.

Sue and Barb are both playing well," McGirr said. "We're looking for good individual scores as well as team scores, but the team comes first.

McGirr expects the Salukis to place in the middle of the pack. Her top favorites are George, the defending champ, North Carolina, the team with the lowest team average; and Kentucky, Florida Atlantic and Ole Miss.

Several Big Ten teams will compete in the prestigious tournament, which includes some of the top teams in the country.

According to McGirr, her team is ready to play, whatever the weather conditions are.

"We've been practicing in windy, rainy weather all week to simulate the condition," she said. "If you have to play in it, you should practice in it.

McGirr said SIU-C was compared to a lot of teams in the tournament.

A weakness of our team is that if we start off with a bad first round, we have to play catch-up the rest of the tournament.

Softball tourney planned

The Carbondale Park District will present the seventh annual Special Olympics Benefit Softball Tournament April 23 to 25.

Entry fee for the double-elimination tournament is $40 per team. There is a minimum roster of 15 players per team. Entries are limited to 16 teams.

Registration deadline is April 19. Those interested may receive further information at the Carbondale Park District, 457-8770.
Ruggers roll to Paducah

By Bob Morsad
Staff Writer

Rugby, considered a brutal and injury-filled sport by many, sometimes has to take a back seat to this commodity, as SUIC Rugby Club Captain Dave Hanetho can attest to.

Last weekend, before its match at Illinois State, the weather took on the tough-guy role and canceled the match scheduled for Saturday. And, as Hanetho stood on ISU’s rugby pitch, waiting to tell his teammates the bad news, strong winds lifted a roof of a house across the street from the pitch and sent its remains into the field.

“It was unbelievable,” Hanetho said of Ma Nature’s shenanigans. “There were roof shingles all over the field. It was pretty nasty out.” This weekend, weather and strong rooftops permitting, the ruggers will compete in the eighth annual Dog Days Tournament in Paducah, Ky. Though Hanetho is not certain of what teams will be competing this weekend, the ruggers will play their first match against Fort Campbell, a Kentucky club.

“I couldn’t get any information on the other teams will be in the tournament, but Fort Campbell is big and strong. I’m very excited with the draw,” he said.

The SUIC ruggers will carry an undefeated record of 5-0 to Paducah this weekend.

THIRD from Page 24

the future. The sophomore from Harvey won’t be sitting around idly in the meantime, however, as she’ll run in the 400 relay and the 4x400 with this weekend.

Siouxi’s Rosalyn Dunlap, who set a world indoor record of 1:18.56 in the 600 dash, which has since been broken, will run in the 400 and possibly the 4x400 this weekend. Blackman said the Tiger speedster checked a 52.3 split in the 1,600 relay at the St. Louis Open earlier this month.

Blackman thinks a jump of about 18 feet should score in the long jump, and hopes Jennifer Bartley can add about six inches to her 17.3 leap at the triangular last week.

TOP from Page 24

The two major snowstorms which ripped through the Midwest this week has the softball team hopscotching around trying to schedule a game for this weekend.

The Salukis were scheduled to take part in the 16-team Redbird Invitational at Illinois State Friday and Saturday. This tournament was canceled after Bloomington was hit with six inches of snow Monday and

expected six more inches Thursday.

Saluki Coach Kay Brechtelsbauer faced an opponent for the Salukis in Ball State. She was able to convince the Cardinals to come to Carbondale for a double-header against the 9-6 Salukis. The twinbill will start at 11 a.m. Saturday at the Women’s Intercollegiate Athletic Field.
Hartzog’s men to face top foes
By Ken Perkins

Arkansas athletic director Lew Hartzog, "If the weather is pretty and still, we’ll get an insight into what the relays can do."

"That was the main reason for sending them to Dogwood," he said. "We ran the next three weeks, they’ll face all of the movement during the outdoor season and will have the exception of Arkansas State.

At Eastern, we’ll be entered in our usual events. I hope good things happen there too."

The Salukis decided to head to Tennessee and Charleston when the weather was uncooperative in the Arkansas State Invitational was canceled because of the resurfacing of the track.

But the cancellation turned out to be a blessing in disguise because now the team will get a chance to run in several events, including the NCAA Outdoor Championships, but also to see how they stack up against the nation’s best.

"If we don’t quality this weekend, we won’t quality the rest of the year," said Randy Gass, a member of both the 1,600- and 400-meter relay teams. Duncan was a little more positive.

"We’re going to qualify, no doubt," Duncan said. "We have a chance to win the whole thing."

"If we can run 3:03, 3:02, we should be able to do it."

So far this season, the Saluki 1,600 relay, which finished sixth at the NCAA indoor meet, hasn’t been able to make the qualifying 3:03.76. The relay has run only once this season, a position that was dropped, and has run a 3:07.66.

Hartzog feels with top competition at Dogwood, where the Salukis have already been clocked at 3:05, the Salukis will be pushed. Last year, Tennessee won in 3:03.53.

The 400 relay of Duncan, Marvin Hinton, Tony Adams and Mike Franks, as well as the 800 relay of Hinton, Adams and Franks, will also be run Saturday. Adams and Franks will run a 40.42 and 40.43 in shooting for the qualifying time of 3:50.05. The relay won the 400 last year in 3:50.82.

High jumper Stephen Wray, who qualified for the nationals last week with a leap of 7'0", will be the lone individual participant for the Salukis at Dogwood.

Divers Terrell, Theobald aim for new heights at U.S. meet
By JoAnn Marciszewski

Two SIU-C divers will be striving for new heights as they compete in the U.S. National Invitational meet through Saturday in Brown Deer, Wis. Tracey Terrell and Rick Theobald will be performing on one and three meter springboard and 10-meter platform, the first time Saluki divers have participated in that event.

Amateurs will be competing for the chance to be among the top divers who become members of the U.S. team and the ones eligible to dive at international competitions.

Team points will be awarded, Terrell, a senior from Miami, has aimed at this competition during the season and will be mentally and physically peaked for it.

Terrell placed ninth on the one-meter at the AIAW meet last month, and has been a steady diver throughout the season, the Saluki coach said.

"During practice since the pre-qualifications meet, Terrell has looked strong, although she did have a cold last week and earlier this week and was limping a bit," the coach said.

Theobald, a first-semester student in physical education, has been clocked at 1:04.41 in the 100-meter freestyle event.

"Theobald was second at the meet, while the rest of the relay members will have to do what they face their toughest competition of the outdoor season Friday and Saturday in the Dogwood Relays at Knoxvile, Tenn.

The Salukis make up three relays at the meet, while the rest of the squad competes Saturday at the Eastern Illinois Relays in Charleston.

According to Saluki Coach Lew Hartzog, "The weather is pretty and still, we’ll get an insight into what the relays can do."

"That was the main reason for sending them to Dogwood," he said. "We ran the next three weeks, they’ll face all of the movement during the outdoor season and will have the exception of Arkansas State."

At Eastern, we’ll be entered in our usual events. I hope good things happen there too."

To keep the infield from being buried by another heavy snowfall, snowmen were formed from a dike of snow and opened day was pushed back two days. The difference that was the layout was 10 to 15 degrees and it made a difference."

"The snow was followed by a cold wave and although the weather was different in the stands, the weather remained packed with snow."

More than 100 men were working deliberately, step by step, to clear the walkways and sales in time for the opener. The snowstorm also put an end to men behind schedule. Painters still were busy sprucing up the park in addition to putting the final touches to the remodelled front offices.

The game has been a sellout but because of the weather, odds are against another record for opening day. Game record for 46,777 set against Pittsburgh four years ago.

While House Press Secretary Jim Brady was to have thrown the ceremonial first pitch, but Brady, wound up in last year’s attempted presidential assassination, had a new leg and has been hospitalized.

Joe Macko, father of former Cub infielder Steve Macko who was once a World Series hero, will throw out the first ball.

Ferguson Jenkins, reacquainted by the Cubs through the free agency system, was reacquainted with the Cubs by coach Mike Scott of the Rangers. Scott and the Rangers opened series in Philadelphia and will be making their opening game of a three-game series in Cincinnati.

Wrigley Field, Cubs ready for Mets
By Steve Mutch

The field is suited for anything," said Gass.

"It might not be perfect but it’s playabale," said the veteran coach, who added that his team has been employed at the ball park for nearly a half-century. "Only God knows what will happen if it snows again."

Rain tops Salukis, 4-0

The Saluki baseball team met and was easily defeated by its toughest opponent of the season - the unpredictable spring weather.

Rain washed out scheduled double-headers with Augustana on Thursday and Indiana State Friday. The Salukis and Sycamores are scheduled to meet in double-headers at 1 p.m. Saturday and Sunday at Abe Martin Field.

The two teams are both in the Missouri Valley Conference's Eastern Division and are coming upon a stretch where they will have to qualify in league standings. A four-game series between the two in May at Terre Haute, Ind., will count toward each team's league record.

By Paul Lorenz

Tracksters to challenge four felines

Missouri’s Tigers and Eastern Illinois’ Panthers figure to be the main "cats" to challenge Saluki sprinter team tracks stage a Dog and Cat Double Saturday at McAn­

"Last week Illinois and Indiana had two, three, even four people who could beat our best in the hurdles," Blackman said. "The teams coming into our relay are "or maybe two, so we’re hoping to take several seconds, thirds and fourths."

Northwestern’s Wildcats and SIU-Edwardsville’s Cougars round out the cat collection at the last Saluki home meet of the season which will kick off at 10:30 a.m. and running events at 11:30 a.m.

Blackman said he’ll hold standby entries for Debra Davis out of the 1,600-meter relay that weekend, and go with a large group of Jimmy Talbert, Monica Hayes, Monica Porter and Steve Davis who has been running the anchor leg on the 1,600.

"We can make up a lot of ground for us," Blackman said.

"If they’re on a break position where she’s 30 or 40 yards behind, and even Debra didn’t have much to surprise that leg."

Blackman added that Davis will return to the 1,600 squad in See THIRD, Page 23

Staff Photo by Mark Sans

Saluki trackster Tom Ross takes the high road while Illinois State’s Mike Baker takes the low road at a recent meet.

Incredible State, 18-10, has won five straight games. SIU-C, 12-4, has won eight of its last nine.

Sycamore Coach Bob Warn said he’ll probably start freshman Nick Warn and junior Zane Smith on the mound against the Salukas.

Smith leads the Sycamores staff with a 6-1 record.

Steve Macko, a former Saluki’s assistant coach, said on Thursday that he and Coach Steve Ford have been on any definite starting assignments before the weekend's contests. The four-game series between the two in May at Terre Haute, Ind., will count toward each team's league record. 11:30 a.m.
