Heberer appointed new trustee

By Ray UrcheI
Daily Egyptian Staff Writer

Gary Walker, president of the school board, announced Monday the appointment of Wayne Heberer of Belleville as a member of the SIU Board of Trustees. The appointment is subject to the approval of the Illinois Senate.

Heberer, 36, owns a 1,500 acre farm in St. Clair County on which he raises 5,000 hogs a year. He is a past president of the Illinois Pork Producers.

If his appointment is ratified by the Senate when it reconvenes in March, Heberer will replace William Allen of Bloomington whose term expired in January, 1975.

Judicial Board head asked to resign

By Lesone Sobota
Student Editor-in-Chief

Carl H. Harris, coordinator of University student judicial systems, has requested the resignation of Charles Peter, chairman of the Campus Judicial Board for Discipline.

Allison was placed on a temporary leave of absence Jan. 8 by Dean of Students Dr. Harvey W. Meehan after Allison was arrested and charged with aggravated assault and battery. Under the Student Judicial Board’s procedural guidelines, members are immediately placed on temporary leave of absence when charged with a violation of the Student Conduct Code or Illinois Criminal Statutes.

A special meeting of the Campus Judicial Board for Discipline is scheduled for Wednesday to discuss Allison’s status. Under the conduct code, only a judicial board may remove one of its members.

Harris said he has requested Allison’s resignation several times since the arrest but Allison has refused to step down.

“Allison said Monday that he is not ready to discuss the incident at this time. ‘I don’t really know which way to go right now. Anything I say now may have an adverse affect on the case’ ” Allison said.

Harris said, “I want him (Allison) removed from not only as chairman, but also as a member of the judicial system.” As yet, the University has not instituted any disciplinary action against Allison, he said.

Dr. Peter has been involved in numerous situations and is a combination of these plus the latest incident that has led them to take this action,” Harris said declining to comment further.

In a letter to Allison requesting his resignation, Harris said, “Service in any judicial system implies diligent effort from its members with behavioral standards equal to, or more rigorous than, those who are subject to its actions. You have shown yourself to be unable to meet these standards which in my opinion are necessary for the credible and legitimate operation of the Campus Judicial Board.

Harris said he objects to the provision allowing the dean of student life to decide whether ‘appropriate conduct’ of the case has been reached.

“It gives them complete blanket power to determine what situation has been resolved. I just don’t like it,” Allison said.

Seitzinger acquitted of murder charges

By Debbie Alhfer
Daily Egyptian Staff Writer

James Seitzinger, 27, of Murphysboro was found not guilty Monday in Jackson County Circuit Court of two counts of murder and one count of voluntary manslaughter in the shooting death of Mark Thomas Hood. Mr. Hood was killed Aug. 14 in the Seitzinger home at 308 N. 9th St., Murphysboro by a single rifle shot in the head.

Circuit Judge Everett Prosser, in pronouncing the verdict in the bench trial, told the defendant, “I wish there were some way this court could reconstruact what happened on that day, but this court finds that from evidence presented it would be impossible to find you guilty of either count.

“You are found not guilty, but that does not relieve the court of that unhappy moment when an American citizen lost his life. The evidence does not sustain the charges, and you are dismissed,” Prosser said. According to testimony, Mr. Hood was fatally injured by a single shot from a .30-30 caliber Winchester. Juan Amos, present in the house at the time of the killing, testified he heard the gun shot and saw Seitzinger holding the rifle.

The shooting occurred at about midnight in the Seitzinger kitchen, Amos, a Murphysboro High School senior testified that Mr. Hood had been drinking that evening and that Seitzinger had ordered him several times to leave the house. Amos said the house at the time of the shooting were Bruce Adams, a Murphysboro High School student, and Seitzinger’s cousin, Edie Marie.

Amos said that Seitzinger had told Mr. Hood, “to come back tomorrow and they would talk about it.” Mr. Hood had come to the Seitzinger home to discuss his personal problems, Amos said.

Amos told the court that Seitzinger told Mr. Hood, “I told you for the last time, get out.” Amos said the defendant left the kitchen and he heard keys rattling; supposedly unlocking the gun in the living room. Next, he heard the gun go off and saw Seitzinger holding it, Amos said.

The bullet struck Mr. Hood in the right side of the neck just below the ear, a .22 caliber round and lodged in a stainless steel oven door, said Jackson County Coroner Don Ragland.

Seitzinger was caused by massive hemorrhaging, he said.

In his summary to the court, William Meehan, special prosecutor, reviewed testimony presented by witnesses and said that a cover up of the shooting had been planned.

Meehan said the State’s Attorney Task Force director, was called in to prosecute the case because Mr. Hood was a cousin of the Governor’s.” Headdar Howard Hood.

Adams and Amos testified reluctantly, Meehan said because they were friends of Seitzinger and wanted to do nothing to hurt him.

But Adams testimony was “devastating,” Meehan said. “He told the court that Mr. Hood was in an argument because he did not want to be killed.” Meehan said.

“The court will recall how Amos told the court that the men had argued in the basement, that Mr. Hood was asked to leave, and that there was a conversation about Mr. Hood being killed. Meehan said. They then went upstairs, where Seitzinger took the gun from the case and walked into the kitchen, he said.

After the shooting, Amos, the defendant and the defendant’s wife into the living room and planned what they were going to say, Meehan said.

Adams was allowed to leave the premises at that time, Meehan said, because the defendant said he didn’t want him to get involved.

“They planned to say that Adams was not there, that they were talking about guns and gun control,” Meehan told the court.

“Adams is not talking about Seitzinger being in a fit of anger,” Meehan said. “Cool and calculated is what I’m talking about.

“I vouch for the testimony of those witnesses,” Meehan said. “They are eyewitnesses who told you there was an argument there. I have no reason to believe that the court is beyond a reasonable doubt, and I ask for a verdict of murder.”

**Faculty Senate to hear proposal for evaluations**

By Kathleen Takemoto
Daily Egyptian Staff Writer

The Faculty Status and Welfare Committee of the Faculty Senate will present the proposal for evaluations at their meeting for determining the time and location for public hearsay on instructor evaluation.

Herbert Donow, president of the Faculty Senate, said he had previously determined that there should be public hearing on the topic of instructor evaluation.

A report submitted to the Office of the Vice President said they are planning on guidelines for faculty participation in the setting up of elective courses, Donow said.

The committee will also present potential procedures to be used in the selection of faculty members in the spring. Difficulty in electing officials in the spring semester has been a problem for the last several years, Donow said.

The committee will suggest that elections be held earlier and that in the future the office of senators be provided for the office of senators.

The Faculty Status and Welfare Committee will also present a report on a faculty handbook. Donow said he did not know when the handbook would be completed.

The Senate's Government Committee will present the proposal for a meeting to set up guidelines for the government committee for the University, Donow said.

"We want to have a student handbook that tells students what to expect of the University," Donow said. "We want to have a handbook that students can refer to and that tells them what to expect of the University."

Court clears Seitzinger of Hood murder charges

By Mike Springer
Daily Egyptian Staff Writer

A court cleared James Seitzinger of murder charges in the death of Charles Hood.

Seitzinger was found not guilty of murder in the death of Hood, and the court ruled that the prosecution had not proven its case.

"It's a relief," said Seitzinger's attorney, Bob Luecke. "We've been through a lot as a family, and it's nice to have this behind us."

"I'm glad it's over," said Hood's father, John Hood. "We're just glad it's over, and we can move on."

Ford says major tax cut possible in future

WASHINGTON (AP) — Declaring that "the future should be encouraging for all Americans," President Ford told Congress on Monday another major tax cut could be possible by 1989 if certain economic conditions are met. The tax cut would be in addition to the $28 billion in permanent tax reductions Ford already has proposed for this year and next. He did not indicate how large a new tax cut could be.

In his annual economic report to Congress, Ford said he is "very encouraged about the economy. The trends are very positive and I believe we're on the right track."

But Sen. Hubert H. Humphrey, chairman of the Joint Economic Committee, said Monday that Congress, not Ford, is responsible for the recovery of the economy in 1976.

Dangerous radioactive rod lost in shipping

CHICAGO (AP) — A radioactive rod being shipped from Chicago to Houston has become lost and could present a danger to human beings, the federal government said Monday. The Nuclear Regulatory Commission said, however, that there is a "high probability" the 14-inch rod used in medical therapy was destroyed through normal trash disposal in Chicago.

But a spokesman said it was still possible that if a person were to place the rod, containing 110 milligrams of cesium 137, close to his body for several hours he could receive a "significant" radiation burn. The rod was shipped to a medical institute in Houston, Texas, containing at least 15 milligrams of cesium 137 used in medical therapy.

Court ruling may affect Democratic delegates

SPRINGFIELD (AP) — The Illinois Supreme Court said Monday that despite a U.S. Supreme Court decision four years ago, national political party rules do not always apply. The three-justice panel involves a plan by the Democratic State Central Committee for appointing rbte state's delegates to the national Democratic convention.

An opinion explaining the court's reasons for refusing last month to order the Board of Elections to implement the Democratic State Central Committee's plan. The court ruled that the state's standing committee chairmen, John Foy, had asked the court to order implementation of his plan, known as the "Tubby Plan" although it conflicted with national Democratic party rules.

Comments from the court were not made. The court's ruling said the deadline for the March 18 primary election on the basis of the existing state law. The contingency opinion may become significant if the election delegates and committee members are to be chosen. The deadline for the March 18 primary election is contested prior to the convention in New York City.
Walker running mate blasts Daley machine

By Bob Springer
Daily Egyptian Staff Writer

Candidate for Lieutenant Governor in the Democratic primary Joanne Alter was endorsed through Candidate and Staff Sunday on a Southern Illinois campaign swing long enough to denounce her opponent and blast the machine of Chicago Mayor Richard J. Daley.

Alter is seeking the Democratic nomination for Lieutenant Governor in the Democratic primary. She is running on the ticket with Gov. Dan Walker and opposes the regular Democratic Party endorsement of incumbent Lt. Gov. Neil Hartigan.

Alter said her first priority as Lieutenant Governor would be "to make sure Illinois taxpayers get the government services that are due them."

A resident of Chicago's north side, Alter proposed repealing the Governor's Office in Marion, which had handled 15,000 cases in two years before the Illinois legislature cut off funding.

"There's nobody who knows what we've gone through," she added. "It's beyond belief, it's a tragedy for people who have been persecuted. We just wonder if it's been forgotten and if the police department will ever be held accountable."

But the case is far from being forgotten and will not be until it is solved, she said.

Figures compiled last July show that the police department has spent more than $2 million in investigations, conducted 225 telephone interviews, engaged in 11 grand jury investigations and handled 37 subpoenas of evidence, according to présenté information provided by the police department.

"Only one day, we made two phone calls, and then we give them the same line they've been using all along, and that all the evidence has been sent to the crime lab in Washington," she said.

"Don't consider one penny of that wasted," she said. "It's mind-boggling to think that for that cost of money we did not get a solution to the crime."

Although the police department has spent $2 million in the 明,, alt; the police department has not reversed its position that the evidence has been sent to the crime lab in Washington."

"They're human beings, too," she said. "We saw their suffering, and we saw the loss of life of the woman's life. We saw the family because the publicized information which only it knows when questioning suspects, he said. And when that information is made public, it can seriously hinder the department's ability to prosecute."

"The fact that they told some things that are confidential led us to not disclose further information," Kennedy said. "We are sorry we have to take this step, but we have to do it. We have to protect them from what transpires, and when and if something does, we just don't feel we can anymore."

Kennedy said that Capt. Edward Hogan is in charge of the cases and continuously works on it. Virtually everyone in the department has participated in one way or another on the case.

"It's something that has been of real concern to us," Kennedy said. "We saw the body, and it was a very difficult case. A young girl who is dead can no longer speak for herself."

Diggie said he will meet Tuesday morning with Bruce Appleby, associate dean of the English department, to discuss his undergraduate enrollment options.

Diggie had a formal request on the Judicial Board for Governance asking for a ruling on the qualifications for a student president.

The J-Board decision will determine whether the constitution should be dismissed in form or substance. It was announced Monday evening that the constitution is "unconstitutional in substance."

"If the constitution applies to the summer semester when a lot of us are out of school, it might exclude a lot of people," Diggie said.

But Slawburne, vice president for student affairs, said that Student Government should be responsible for establishing its own requirements for office.

"Student Government should work out these qualifications and I trust its members to do that," Slawburne said. "When they have established reasonable requirements in most offices and I'm sure they can do the same for the student president."

Diggie said he would be a "salesman for Illinois" in attracting new businesses and jobs to the state.

"With the developing coal industry in Southern Illinois and the economic in- centive for businesses and industry to locate near this new source of energy," she said.

Alter highlighted accomplishments of the Walker administration and charged her opponent with failing to do anything in three years in office "picking fights with the Governor on Mayor Daley's orders."

Alter has been active in organizing political events and protesting the recent bill of the late Adlai Stevenson. She has been invited to speak before the commission of the Metropolitan Sanitary District of Chicago—making her the first Democrat to be invited to a countywide office in Cook County.

She holds a B.A. degree in political science from Wheaton College, Massachusetts, where she graduated cum laude in 1949.

Alter and her husband, Jim, have four children, ranging from 10 to 21 years of age.

Joanne Alter, candidate for Lieutenant Governor in the Democratic primary, chats with students Jackie Charbonneau, sophmore in art, and Lee Ann DeBow, sophmore in psychology, in the Student Center. (Photo by Daryl Littlefield)

Year-old murder case remains unsolved

By Debbie Absher
Daily Egyptian Staff Writer

A year ago today, Theresa Clark, a 22-year-old SIU student graduate in speech pathology, was fatally stabbed in her off-campus apartment.

The murder remains unsolved, and the slain woman's mother, Mrs. Virginia A. Clark of Bowlingbrook wants to know why Carbondale police have been unable to solve it and questions if they are even working on the case.

Carbondale Police Chief George Kennedy reports, however, that his department has spent more than $25,000 and 2,250 hours of investigation trying to solve the brutal murder.

The nude body of Miss Clark was found in the bathtub in the two bedroom that she shared with a roommate at the Ambassador Apartments on East Danny Street. The roommates found the body the morning of Jan. 27, 1975, when she returned after being away for the weekend.

Jackson County Coroner Don Ragsdale subsequently reported that Miss Clark had been dead two days from numerous stab wounds in the chest, back and throat. She had not been sexually assaulted, he said.

In a letter to the Daily Egyptian and in a telephone interview, Mrs. Clark criticized the police department for not having solved the case.

To this day, the Carbondale Police Department has found absolutely nothing out in the murder case.

Mr. Clark said he had been told by a police officer that the police department was to protect people's privacy. But that is an area it they obviously don't seem the least bit concerned that a human life has been killed needlessly.

Mrs. Clark said the family is still hurt by the lack of communciation it receives about the case and says treatment is not the same for the family because the publicized information which only it knows when questioning suspects, she said.

"We never had the opportunity to attempt to communicate," she said.

The only time we ever hear from them is when we write a letter, and then they give us the same line they're always using a lead and that all the evidence has been sent to the crime lab in Washington," she said.

"We may agree upon and approve a statement by the end of the year," he said.

Donow said he had not seen the committee report yet. Brandt is a member of the committee, he said.

Donow called the grievance situation "unnecessary." He said there should be a standard procedure for filing grievances currently.

"Unnecessary problems have been created because the present grievance procedures are vague," he said. The only specifically defined aspect of the grievance procedure is the operation of the judicial review board, he said.

"An awful lot goes on before that point is reached," Donow said.

"By the time they (faculty members) get help, a year might have passed," he said.

Major goals outlined by Brandt

By Kathleen Takemoto
Daily Egyptian Staff Writer

Major goals for the SIU administration this semester are the completion of a faculty tenure document and a grievance procedure document.

President Warren W. Brandt said Friday that both of these goals are important.

Brandt said both documents are "high on our priority list." The SIU Faculty Senate is currently working on a tenure statement and on writing new grievance procedures for faculty members.

Herbert Donow, president of the SIU Faculty Senate, said he expects a final report from the senate's Salary, Rank and Tenure Committee regarding tenure to be presented at a special senate meeting in February.

"We may agree upon and approve a statement by the end of the year," he said.

Donow said he had not seen the committee report yet. Brandt is a member of the committee, he said.

Donow called the grievance situation "unnecessary." He said there should be a standard procedure for filing grievances currently.

"Unnecessary problems have been created because the present grievance procedures are vague," he said. The only specifically defined aspect of the grievance procedure is the operation of the judicial review board, he said.

"An awful lot goes on before that point is reached," Donow said.

Diggle to seek undergraduate status

By Mike Springfield
Daily Egyptian Staff Writer

Student President Doug Diggle will not attempt to be readmitted into the Graduate School spring semester.

Diggle, who was placed on academic suspension, met with Friday with Jack W. Graham, assistant dean of the Graduate School, to discuss petioning back into the graduate program.

"With my grade point the way it is, there's no way they would readmit me," Diggle said.

Diggle said he will attempt to enroll as an undecided undergraduate student in the College of Liberal Arts for spring semester.

Diggie had a formal request on the Judicial Board for Governance asking for a ruling on the qualifications for a student president.

The J-Board decision will determine whether the constitution should be dismissed in form or substance. It was announced Monday evening that the constitution is "unconstitutional in substance."

"If the constitution applies to the summer semester when a lot of us are out of school, it might exclude a lot of people," Diggie said.

But Slawburne, vice president for student affairs, said that Student Government should be responsible for establishing its own requirements for office.

"Student Government should work out these qualifications and I trust its members to do that," Slawburne said. "When they have established reasonable requirements in most offices and I'm sure they can do the same for the student president."

Alter said she would be a "salesman for Illinois" in attracting new businesses and jobs to the state.

"With the developing coal industry in Southern Illinois and the economic in- centive for businesses and industry to locate near this new source of energy," she said.

In these past months of deliberation over the Illinois Board of Higher Education Master Plan—Phase Four (MP-4), the IHBE has held some of the loudest opposition to the IHBE proposal to raise tuition levels to one-third actual educational costs. All the while the IHBE held the last of its six statewide public hearings at higher educational institutions, opposition to the tuition hike proposal was fierce.

The cost of a college education in the State of Illinois is high, not only for the student but for the state and ultimately the taxpayer as well. This fiscal year, a planned $80 million will be added to the state's cost of caring for its 41 centers of higher education, and that figure is certain to grow bigger each year.

It would be completely unrealistic for students, predominately of middle-class means, to assume the brunt of the cost of a college education. But by the same token, it is a short-sighted argument which assumes that the student could not or should not assume responsibility for the cost of his or her education.

What is needed here is a compromise, or more accurately, a unified chorus of belt-tightening, not just a unilateral call for students to keep their ship from sinking.

The IHBE MP-4 proposal cannot be taken out of context either by students or the Illinois Legislature. A proposal of the magnitude of MP-4 will never be acceptable without accompanying cutbacks in other major state programs. Such cutbacks will have to serve to alleviate the tuition hike proposal.

The wasted spending that exists in so many of the state's programs must be curtailed. In Mr. IHBE will indeed every attempt to trim what has developed into the costliest university administration, on a per-student basis, in the state.

The same applies to the faculties of students. Although it would be out of the scope of the IHBE, an attempt should be made to direct some of the economically making measures of MP-4 toward all areas of state government.

Only then, when all avenues of cost-cutting have been exhausted, should the principles of MP-4 be accepted.

The successor of the deceased Chou En-lai as the next Premier of the People's Republic of China will most likely be Teng Hsiao-ping, today's First Vice Premier, and a man who was publicly disgraced by the Red Guards in 1966 after his fall from a high-rank position in the Communist Party.

How did this metamorphosis in Chinese leadership come about?

In a recent interview, SIU political science professor Ikuo Chou, an expert on Far Eastern affairs and an avid reader of the Chinese language, expressed his interpretation of T'eng's return to power after seven years as a political "non-person" and what that return will mean to Sino-American relations.

At 71, Teng has been active in Communist Party activities since the 1920's. He was a military officer on Mao Tse-tung's historic Long March to Yenan in 1934. After the communist revolution of 1949, he served as Minister of Finance and Vice Premier. In 1964, he became Secretary General of the Central Committee of the Communist Party.

Teng followed Mao's hard-line anti-Russian policies closely until early 1966, when he began to have doubts, according to Chou. He believed that the loss of solidarity among Communist countries was too great a price for the Communist world to pay.

By late 1966, the once vehemently anti-Russian Teng became quietly upset about matters concerning China's neighbors. For two years he avoided Mao; Teng did not even make the required customary requests. This conduct eventually brought a public complaint by Mao that Teng was not fulfilling his obligations as a party secretary.

In 1968, during the Cultural Revolution, Teng, like all other pro-Russian "revisionists," was purged from power and eventually expelled from the party. It is for solid reasons why, Teng believes, that Teng was allowed to make a "political resurrection."

Teng spent the next three years as a "non-person" studying the works of Mao, Marx and Lenin, and visiting the countryside. He was brought back to power for two reasons, according to Chou. First, while he was Communist Party Secretary for the "Second, Teng built a cadre of second and third echelon followers within the government. He was brought back, in effect, to provide a smooth transition of governmental power from the rapidly aging group now who hold power to this younger group who are at least somewhat loyal to Teng and will one day assume power in the government.

Secondly, Teng knows the Communist world. He has traveled extensively in Eastern Europe and the Soviet Union, and is familiar with the governments and leaders of these countries.

Although Teng's "caretaker" government may survive longer than Mao Tse-tung, Chou said, Teng will have no real power. As a result of the Cultural Revolution, all major decisions of the future will be made collectively. As the leadership generation dies off, power will dissipate into the hands of many thousands of people instead of the one person recruited by the government during the Cultural Revolution.

---

By CHRISTIAN BULLET

No major foreign policy changes will be made, according to Chou, and it should be realized that the new government probably won't even make the required customary requests. In fact, it is for solid reasons why, Teng believes, that Teng was allowed to make a "political resurrection."

Teng spent the next three years as a "non-person" studying the works of Mao, Marx and Lenin, and visiting the countryside. He was brought back to power for two reasons, according to Chou. First, while he was Communist Party Secretary for the "Second, Teng built a cadre of second and third echelon followers within the government. He was brought back, in effect, to provide a smooth transition of governmental power from the rapidly aging group now who hold power to this younger group who are at least somewhat loyal to Teng and will one day assume power in the government.

Secondly, Teng knows the Communist world. He has traveled extensively in Eastern Europe and the Soviet Union, and is familiar with the governments and leaders of these countries.

Although Teng's "caretaker" government may survive longer than Mao Tse-tung, Chou said, Teng will have no real power. As a result of the Cultural Revolution, all major decisions of the future will be made collectively. As the leadership generation dies off, power will dissipate into the hands of many thousands of people instead of the one person recruited by the government during the Cultural Revolution.

By Moslem Bullet

The United States is undoubtedly in a position of stronger than that of the Chinese. The Chinese government is in the process of building a completely new social structure and is wary of contamination by outside influences, Chou said. This means that any deep, meaningful relationship with China, such as travel, personal friendships or extensive cultural exchanges will remain out of the question.

The Chinese Communist government has reached its goal of agricultural independence. In 26 years China has progressed from starvation and deprivation to a food surplus and food exportation. By the year 2000, Chou believes China will reach its next major goal—industrialization. This means 40 to 50 per cent of the population will work at non-agricultural jobs.

Should China reach its goal of industrialization by 2000, 50 years after the revolution, it will have made that change in roughly the same amount of time as the United States. The difference is that China began industrialization with a much more backward social system, fewer raw materials, and an incredibly large population of literate, underfed people, Chou said.

The United States must recognize that China offers the poor countries of the world a much more viable model for success in the 20th century, Chou said. With 1/3 of the world's 4 billion countries considered poor, China's progress is an outstanding example.

Chou, like most Americans, views the Chinese government as repressive. But, he said, like it or not, repressive or not, Communism is working in China.
IBHE vice chairman defends tuition hike

To the Daily Egyptian:
The Illinois Board of Higher Education, by split vote, has recommended in its tentatively approved Master Plan that by 1980 undergraduate tuition at the state's public universities be maintained at one-third of instructional cost and graduate tuition at one-third, 1.9 per cent of the undergraduate rates, and in its present form. The Illinois State Scholarship Commission, in its first step toward these objectives, undergraduate tuition be increased $60 per year and graduate tuition $90 per year. The budget, which calls for an increase of $100 million or 11.7 per cent over the current fiscal year is predicated on the receipt of $11 million from these recommended increases in tuition, an amount which would provide 5 per cent in salary and price increases and about 22 per cent of proposed new and expanded programs of instruction.

These recommendations have caused considerable controversy. Those who oppose them cite the unlikely prospect of the governor and the legislature approving tuition increases in an election year and the financial difficulties faced by students and their parents in the current economic climate. While these may appear valid reasons, some proponents of the arguments for the increases seem to me more persuasive.

Let us consider them: Inflation is the primary reason for these added costs and to fully fund them from general revenues will be very difficult, if not impossible. A tax increase would appear even more unlikely than an increase in tuition. Those who are clearly unable to pay will be financed by grants from the Illinois State Scholarship Commission. This program is one of the most generous in the nation and eligibility standards are being constantly expanded. There have been no tuition increases at our public universities during the past four years. During this same period tuition at most of the state's private universities has gone up at least $100 per year. Those rates are, in general, four to six times as high as those in the public universities. Incomes of most parents and working students have risen in this time span as a result of inflationary pressures. It is essential that, in approving the increased tuition rates, our state universities be maintained and improved and this means, among other things, that faculty and administrative salaries be kept at levels commensurate with those prevailing at comparable institutions elsewhere.

Surely these factors which, I believe, fully justify a tuition increase, deserve the thoughtfull consideration of all concerned with this important problem.

Joseph L. Block
Vice Chairman Illinois Board of Higher Education

Protest GTE increase

To the Daily Egyptian:
As most of you know by now, General Telephone (GTE) has asked for a rate increase. Not only this, but GTE also wants to charge us for any information calls, after the first 133 calls. This will be interesting since phone numbers in Carbondale change about three times a year.

Central Illinois Power Service (CIPS) also wants a rate increase. Initially, they said that they should raise the price on the course they blame the rising costs of coal as their excuse but how do they explain their rising profits?

Since this rate increase will affect us all please take five minutes to write a letter against such actions. It is important that you do write because it helps. Write to this address: Illinois Commerce Commission, 327 E. Capital Ave. Springfield, IL 62706.

Hanson asks questions

To the Daily Egyptian:
In reference to the most recent of your rather numerous articles concerning my adventures in court, there were a couple of errors which you may, or may not, consider points of interest.

The illegal use of weapons charge was tried and resulted in my conviction and I was fined $150. It is under appeal and considering the unbelievable mess that I made of the trial, I feel it will be reversed by the appellate court.

The battery charge against an SIU coed was dismissed by the state's attorney, it remained a mystery as it was filed while I was in jail over eight months ago and was dismissed a couple of days ago with no comment or hearing ever having been held.

The state's attorney is, of course, legally authorized to dismiss cases but it does make one wonder when one has been in jail over eight months if he ever intended to prosecute it. Could it be that it was intended as leverage to cause me to include in plea bargaining, or was it possibly to create adverse publicity before my trial for rape?

I can only speculate, but the maneuvering done by the prosecution does cause me to wonder whether they are really consistent with their oath of office to see that justice is done.

Ken Hanson
Jackson County Jail

Warning for workers

To the Daily Egyptian:
Attention! All SIU on-campus student workers! This should be the headline of today's paper, not buried on the editorial page.

One employee for the University as a lab instructor first for Instructional Materials 4/7, then Education 3/4a after the reorganization at the semester switch, I have spent anywhere from 14 to twenty hours per week, for two, and a half years, laboring at the absolute minimum wage allowed by law. At the end of the past summer semester, being able to claim twos years of experience and seniority, I felt justified in approaching my immediate superiors, asking them about the possibility of a raise. Approval came from said superiors by the beginning of fall semester 1975, and then the paper-work began, or should I say, red tape.

The gist is that, on my final paycheck, dated Dec 13, 1975, the raise still had not bothered to show itself. I place no blame on my past employers; they are excellent people. Rather, I find fault with whoever sat around in an office somewhere, and let my (and how many other student workers?) wage increase become null.

As an independent student, financing college through the Illinois Guaranteed Loan Program, which is generally living below the subsistence level of the country, I am deeply appalled by the bureaucracy, or whatever it is that at this University, which allows its wage increases to go unnoticed, but never overlooks a $3 filing fine, or 45 cent library fine.

Workers, consider yourselves warned. Apply now for this big raise—and maybe you'll get it by fall semester, 1977.

Paul Moe
Senior Accounting

Uncover facts in study

To the Daily Egyptian:
I can't understand why some of you people are opposed to scientific research. I feel that it is extremely important to unlock the secrets of the universe. People should be able to understand this. What difference does it make if we spend just a little over $100,000 to attain this goal? Sure it's the taxpayer's money but the facts need to be uncovered. The world has a right to know what effect marijuana has on sexual behavior. Heck, that's almost as important as finding out why those little balls of lint get all over your sweaters.

Merlin's dance policy

To the Daily Egyptian:
In regards to Merlin's no-same-sex couples dancing policy: It doesn't matter so much who you love as that you are able to love at all.

Joe Novak
Junior Theater
South African film, lecture to be presented

The African Studies Committee will present a lecture and film by South African filmmaker Nana Mabon, at 8 p.m. Thursday in Davis Auditorium.

Mabon will speak on his film "The Last Grave at Dimbaga," a film showing the realities of South Africa's apartheid policies, said Emme Charles, chairperson of the committee.

The film and lecture are free and open to the public.

Mime artist's performance set Tuesday

Mime artist Keith Berger of New York will perform at 8 p.m. Tuesday in Student Center Ballroom D. Berger has appeared before sell-out audiences in New York City and student audiences throughout the country.

Berger defines mime as "the cohesion of the movement, pantomime and acting processes. Its objective is to communicate symbols under the limitations of specific physicalities and acting styles at various levels of abstraction. Its goal is to move you emotionally by utilizing these means for which verbalization is of no use."

Berger is a 25-year-old native of California. He has studied with Paul Curtis at the American Mime Theatre.

Admission is free.

A Man For Others--A Foreign Missionary Priest

That's what a COLUMBUS FATHER is. He's a man who cares, and a man who loves. It takes a man who reaches out to missions in Asia and Africa, to share the Good News that Jesus truly cares for them. He's a man who commits his life totally to others so they can live their lives for God intended. Being a COLUMBUS FATHER is a tough challenge, but one you think you have what it takes and are a Catholic young man. If so, send your 75¢, write today for our FREE 16-page Booklet.

COLUMBUS FATHERS
813 Lincoln Ave., Cleveland, Ohio
I am interested in becoming a Catholic Missionary Priest.

Merlin’s courts students with new disco

Mary L. Heeren
Dana Henderson
Daily Egyptian Staff Writers

With the variable still drying on the bar railings, men in work clothes gathered in the dimly lit room and set up the lighting and speakers. Merlin’s unveiled its new disco on Friday night.

Visitors to the new disco were greeted by a small house in full armchair mirrored walls, plush carpeting, and metal and wood chandeliers. For people wanting to stay a while, Merlin’s provided two large service bars.

The two bars had room for about 15 people each, but additional seating was available for those early enough to get a seat. Two islands seating about 70 and two more intimate sitting areas were also available.

One area, on the far side of the bar, under a mirrored mirror, was complete with two mosaic cocktail and low tables. The other area, in a stairway arrangement, had room for about 30 more people with tables and chairs. Bar stools were along the sides of the dance floor.

The dance floor was the most striking feature of the new disco. Consisting of three levels, the bottom two were topped with mirrored Plexiglas and topped with translucent plexiglass with lights underneath flouncing and off to the sides. The dance floor could hold around 250 people.

Craig Stevens, audio consultant setting up the room and people. The Dance floor has been done in Europe, but this is the first time mirrored PLEXIGLASS has been used in three levels in the United States.

The two walls surrounding the dance floor were lined with traditional plexiglass with flashing lights to the music.

The dance floor is surrounded by four light arrays that can be operated manually or from the light and sound computer in the disc jockey’s box next to the floor. Two light arrays above the four flash primary colors of red, blue and yellow.

Also included in the light plan for the disco are six large banks with boisterous, The log failed Friday because not enough hot water was used. Stevens said the second attempt was better as the floor was cleared and fog billooned out from vents in each riser of the dance floor. The theme song from the movie “Jaws”, a large shark fin was pulled across the floor. It was not well received.

Stevens said that the same idea was used in other clubs and had been well received.

Steve “Slim” Blechman, one of Merlin’s managers, said that the new disco is “the best thing that has happened to the area.”

Another striking aspect of the disco is the greenery that spreads across the north wall. More greenery will be set up as it arrives.

Lee Schubert, who designed the greenery, said he wanted a windswept tropical island effect. “The tropical island would look after a hurricane wind of about 120 miles per hour swept through.”

His company, which works in artificial floral architecture, used all tropical plants for its display.

Another feature of the new disco is a disco mirror. The mirror is the only one like it in the area. It works with a combination of dry ice and water vapor.

The disco also features a cooperative decision between Merlin’s owner Bill Hinchcock and the four managers. The plan has been talked about for about six months.

“Everyone wants to create the best atmosphere possible and for others to see the room as a total concept,” Blechman said.

Blechman and Merlin’s plans to open the disco as a disco bar and use it for fashion shows or other productions.

Merlin’s plans to follow a policy of “no shoes, no shirt, no service” for their disco.

The decision to go disco was a cooperative decision between Merlin’s owner Bill Hinchcock and the four managers. The plan has been talked about for about six months.

“We wanted to create the best atmosphere possible and for others to see the room as a total concept,” Blechman said.

Blechman and Merlin’s plans to open the disco as a dance bar and use it for fashion shows or other productions.

Merlin’s plans to follow a policy of “no shoes, no shirt, no service” for their disco.

Four Merlin’s. D.J.’s, Marty Bass, Kevin J. Potts, Suzanne Smively and Sharon Crosier, get it on atop Merlin’s new dance floor. Merlin’s opened a disco Friday night. (Staff photo by Carl Wagner)

America’s acquisition habits changing, SIU author says

Dreams of material acquisition have long been an important part of an American success story, Donald Perry, SIU marketing professor, thinks that this may no longer be true.

“The growing concern over environmental pollution and resource depletion have caused many of us to have second and third thoughts about our levels of material acquisition,” Perry said.

There is a feeling among many consumers and business people that the price we are paying for unlimited economic and technological expansion might be too high.

Perry thinks this concern is being reflected in increased emphasis on utility and decreased emphasis on psychological stimulation and overt convenience.

“During the 1960s and 70s we were headed for a Utopian monorelief consisting of a comfortable suburban existence, replete with two-car garage, color television, fence-to-fence turf and college-bound kids. Americans haven’t lost their desire for a Utopian existence but have discovered that there is more than one kind of Utopia available to them,” Perry said.

Knox students celebrate bicentennial by spending winter in canvas teepee

GALVESTON (AP) - “We’d like to see if we can get a little closer to the meaning of the Bicentennial,” says one of two Knox College students who plan to spend the rest of the winter live in a 20-foot teepee they set up on campus.

With classes supplied by the college, the students built the eight-foot teepee near the fine arts building and have quickly come to like it.

They sleep there, smuggled in to a circle of the teepee, “hot dogs and steaks, just simple meals really,” says Keith Shanklin, sophomore in psychology.

Keith, 12, a senior from Joliet, and Brian Fischer, 14, a junior from Schenectady, N.Y., say that to mark the Bicentennial they wanted to experience the way Americans lived 200 years ago.

It’s a hope that the students will make the teepee into a commercial idea about the Bicentennial,” said Fischer. “We felt that with the commercial outlook they really didn’t get down to the basic point of the Bicentennial.”

Permission to build the teepee was obtained from Ivan Harlan, dean of students, and Keith recalls: “I suppose he thought we were a little crazy.”

“I thought they’d get awfully cold,” said Harlan. “Not being a camper in the summer, then two weeks in the snow. They sleep there, smuggled in to a circle of the teepee, ‘hot dogs and steaks, just simple meals really,” says Keith Shanklin, sophomore in psychology.

Keith Shanklin, sophomore in psychology, says the students have sometimes dipped below zero. But though they sleep and eat at the teepee, Keith and Fischer other washroom facilities at their fraternity and their studying at the library.

“Our plane to sleep at the teepee,” Keith said. “We didn’t want anything to interfere with classes themselves.”

The students plan to rough it through the winter school term, which ends March 13.

“The only real problem is waking up when it’s really cold, but otherwise it’s pretty comfortable,” Keith said.

“I think you have a much greater awareness of where the Indians appreciated the little things in their life,” said Fischer, an American studies major. “You appreciate them more; how they live. We really enjoy watching the snow coming down.”

Fischer says some other students have expressed interest in joining the crew in the teepee, “but most of them want to try it when the weather’s warm, there’s not too many takers in the winter time.”

And, more than a week after they began, both students said they had not told their parents of their adventure. Said Keith: “They might think it’s a little crazy.”

Prosperity Cleaners hit by robbers Saturday morning

By Scott G. Randle

Daily Egyptian Staff Writer

Prosperity Cleaners, 515 S. Illinois Ave., was burglarized early Saturday morning, Carbondale police said.

A citizen reported at 3:38 a.m. that the store had been broken into. Police said an investigation revealed that a front plate glass window and a window on the side of the building had been broken. Although the total loss will not be known until a complete inventory is taken, the management estimated it to be $1,300 to $1,500.

South Illinois Avenue was closed down twice early Saturday morning by bar patrons walking in the street. Police said the street was closed from 12:42 a.m. to 1:18 a.m. and from 1:18 a.m. to 5:43 a.m. The crowd was estimated to be about 50 people. There were no arrests or damages reported.

Gary Devor, 26, 609 Wright Hall II, was asked at 4:18 a.m. Saturday by SIU Security Police to check his van parked in lot 106. There were signs that someone had broken into it. He claimed that a 25-channel citizen's-band radio, an eight-track stereo and tape recorder had been stolen. The items were valued at $500.

James Okkema, 21, 223 Wright Hall I, reported Sunday that between 5 a.m. and 7:30 a.m. someone had entered his storage equipment from his room. Okkema said he awoke at 1 a.m. and the equipment was still there. He went to sleep again and when he woke up at 7:30 a.m. the door was gone. An AM-FM receiver, a turntable, a car-trunk and tape deck were reported stolen. The items were valued at $700. Okkema said that he had lost his door unlock.

To get a better picture of America, get this free booklet from Minolta.

PICTURE AMERICA
A Student's Guide To Traveling With A Camera

Minolta would like to send you, free of charge, a 44-page full-color booklet called "Picture America: A Student's Guide to Traveling with a Camera." It contains hints on choosing and handling the right equipment and film. Plus techniques for photographing subjects ranging from people to architecture to works of art. You'll find information on composition, perspective, and managing special weather and light conditions.

You'll learn how to shoot moving subjects. And how to get results moving. You'll understand how to make a single picture a story. And how to turn one small subject into a complete photo essay.

There's even a fold-out color map of America's most photogenic subjects and the major highways that reach them. Plus a listing of major museums, their hours and phone numbers.

If you're planning to travel America, send for this free booklet. You'll be glad you did.

**Bicentennial medallions underway**

The bicentennial year won’t pass without leaving memories in Southern Illinois. The Jackson County Bicentennial Medalion Commission is preparing a medallion design which is to be cast in sterling silver, bronze and gold said Dick Hunter, chairman of the medalion commission.

Hunter said the design, which was adopted on his request, will be a coinage. The medalion, designed by local artist Terry Gillespie, will be a montage composed of a picture of George Rogers Clark, a map of the path Clark’s army marched in Southern Illinois, and a thirteen star flag.

The design on the back of the medallion is the work of photographer Richard Rahilly, who has done work on other historical medallions. The design will reflect a photographer of the Pomona Natural Bridge.

A contest among grade school students of Jackson County will determine the inscription placed on the front of the medallion. Hunter said interested persons have until Feb. 12 to give their ideas to the medalion commission. Entrants should submit an explanation in fifty words or less why their motto should be used. District winners and first and second place county winners will be chosen and prizes will be awarded, Hunter said.

Ideas for inscriptions should be sent to the Jackson County Bicentennial Medalion Commission at 40 W. Elm, Carbondale.

A maximum of 1,000 sterling silver medallions with serial numbers will be issued for $5 each on a first-come, first-served basis. Hunter said. The quantity of bronze medallions will depend on the demand and will sell for $30. Real bicentennial buffs can have the medallions struck in gold at a price to be determined at a later date.

If there is any profit, which we seriously doubt, it will go to the Jackson County Historical Society,” Hunter said.

Orders should be sent to the Bank of Donge, Donge, Illinois 62924, in care of the Jackson County Bicentennial Medalion Commission. Order forms can be obtained at local banks, from cooperating merchants, and from commission members. Orders with a complete mailing address do not need an order form. Four months should be allowed for distribution. **THE RATS KELLER**

SIU student pilots plane to safety

PAXTON (AP) - A Southern Illinois University student piloting a friend's plane back to school made a forced landing today on Interstate 57 southwest of Paxton.

Fred Ard, 18, of Bolingbrook said when the Cessna 140 developed engine trouble, "I just figured I'd better get down. It was kind of difficult because I had to maneuver around and overpass and some power wires and then land on a hill."

"I almost landed on a van, but the guy say me in his rear view mirror and stopped and backed up."

Traffic on the highway was light and Ard said no vehicles were forced off the road. Ard, who said he has had his pilot's license for one month, sustained minor damage and was taken to the Paxton airport.

Ard said he will complete his trip to Carbondale by train. "It's going to take a little longer, but I guess I'm pretty lucky," said the SIU student, who is majoring in aviation technology.

One of our second generation calculators can save you countless hours and errors en route to your diploma and on the job thereafter. Each offers problem-solving technolgy you probably won't find on competitive calculators.

New low price.
HP-21 Scientific, $100.00

The HP-21 makes short work of the technical calculations even so called "non technical" courses require today. It performs most arithmetics, log and trig calculations automatically. It's also the only calculator at its price that offers full display formatting, you can choose between fixed decimal and scientific notation.

If you need a calculator that does more than simple arithmetic, this is it—especially at its new low price.

New.
HP-22 Business Management, $165.00

The HP-22 makes short work of the technical calculations even so called "non technical" courses require today. You can solve most time value of money problems in seconds. You can breeze through business math calculations (logs, roots, √x, etc.) And, most important, you can use the HP-22's statistical functions to build existing data into more reliable forecasts. No other pocket calculator at any price offers you a comparable combination of financial, math and stat capabilities.

New.
HP-25 Scientific Programmable, $195.00

One of our second generation calculators can save you countless hours and errors en route to your diploma and on the job thereafter. Each offers problem-solving technology you probably won't find on competitive calculators.

One HP 25 does everything our HP 21 can do—and much, much more. It's programmable, which means it can solve automatically the countless repetitive problems every science and engineering student faces. With an HP 25, you enter the keystrokes necessary to solve a repetitive problem only once. Thereafter, you just enter the variables and press the Run/Stop key for an almost instant answer displayed to 10 digits. You gain time, precision, flexibility. All three offer you HP's efficient RPN logic system that cuts keystrokes and scratch pads. All three are easy to use (e.g., the HP 25 requires no prior programming experience). And all three are almost certainly on display at your bookstore.**

**Cocktail concert**

**Greenhouse exhibits international variety**

A lemon tree grows in Carbondale. So do banana trees, palm trees, Venus Fly Traps and about 1,200 other plant varieties from throughout the world.

In four buildings of comfortably controlled temperatures, the SIU botanical greenhouse holds them all. The greenhouse, which is behind Life Science II, attracts more than 100 visitors a day ranging from secretaries on lunchbreak to school children on field trips.

Robert Mohlenbrock, supervisor of the greenhouse and chairman of the botany department, said, "We try to maintain the greenhouse as an educational source by displaying the plants we keep and add."

The main room's annual plants, which complete the life cycle in one growing season, are arranged around a lily pond, rock fountain, and a new exhibit called a drip wall.

The greenhouse special effects drip wall is being built by botany graduate students Bob Hage and Ken Kraus. When completed, the wall will resemble a waterfall with a bed of plants set inside flowerpot planters. More plants are needed for the project which now has only one Venus Fly Trap in the wall.

Plants are donated by close friends of the University, the Missouri Botanical Garden, or given in exchange for a plant. SIU has that southern university desire. One lemon tree, which produces sweet lemons rather than grapefruits, was donated by a student who found the plant was dying.

Blooming tropical plants such as banana trees and orchids decorate some of the flower benches. Snap dragons and the tropical poineetia are grown near by and are used for research and in exhibits.

Flower exhibits are arranged by James and three other assistants. They are used in flower beds around the campus and can be found in other places such as the SIU University Greenhouse House. Students can order arrangements for as little as $3.

Small potted plants can be bought by any visitor at very minimal prices since there is often an excess of foliage that is trimmed by James and student employees at the greenhouse. Suggestions are offered for the care of a new plant.

The greenhouse is open from 8 a.m. to 4:30 p.m. Monday through Friday and 9 a.m. to noon on Saturday.

Pastor James' advice is, "Come to the SIU botanical greenhouse and watch how happy the flowers are."
Study finds marijuana, brain impairment unrelated

NEW YORK (AP) — Chronic marijuana use appears to be associated with irreversible damage to higher brain function or intelligence in a study conducted at Costa Rica, and reported Monday.

The study results were said to be comparable with earlier controlled studies, but went further by employing additional controls, researchers cautioned, however.

The report, from researchers at the University of Florida and the University of Victoria, said that the findings could not be extrapolated to generalization on an "amotivational syndrome" among chronic users, marked by such things as apathy, confusion, and memory defects.

Details of the extensive study were reported to an opening session of an international conference on substance abuse sponsored by the New York Academy of Sciences.

SIU soprano chosen to sing with orchestra

SIU soprano Linda Jan Coleman, a finalis in the St. Louis Symphony Young Artists Competition held Jan. 17 in Powell Symphony Hall, St. Louis.

Mrs. Coleman was one of 67 artists from 19 through 36 years of age, who auditioned in string, wind, piano, percussion and voice categories.

Winners of the competition will appear as soloists with the St. Louis Symphony Orchestra, March 9. The competition was sponsored by the Women’s Auxiliary of the St. Louis Symphony Society.

House of Glass resident faces battery charge

A House of Glass resident was convicted Monday in a bench trial in Jackson County Court on a charge of hitting the institution’s supervisor.

Bob Reynolds, 29, formerly of Springfield, was charged with aggravated battery after he allegedly hit Howard Saver, supervisor of the Southern Illinois Work Release Center in Carbondale.

Court records show that Reynolds, before Walls, set the sentencing date for court in Murphysboro, Ill., for Feb. 25.

WHY and HOW YOU SHOULD REGISTER TO VOTE

WHY:
★ In Alabama, only those of "good character" can register to vote.
★ In South Carolina, anyone convicted of wife-beating is disqualified.
★ In Virginia and California, people convicted for dueling cannot vote.
★ And, until 1972, most states had laws against students voting in their college communities.

Students could affect the outcome of elections in 110 of the country’s 435 Congressional races. Students could play a significant factor in preventing tuition and fee increases at SIU by voting for legislators opposing the action.

HOW:
★ If you are already registered in Jackson County, but have changed your address, fill out the reverse side of your card and send to the County Clerk’s office, Jackson County, Murphysboro, IL 62966

★ If you are not registered to vote in Jackson County read on...

The tale concerns the efforts of a brash ex-con named Marlowe to find his beloved Velma, the girl he still loves, even after seven years in the cooler. Marlowe hires Mike Hammer to help find out where she is, which turns out to be a harder task than Marlowe first imagined.

No one, it seems, is willing to say too much about Velma, but everyone wants to find Moore. Marlowe finds himself embroiled in several sordid predicaments, having to step around various dead bodies before finally coming to the answer of why Moore is so popular. The final scenes are stiffly edited and written so the surprise ending is dull and ineffective.

As Chandler conceived him, Marlowe was certainly a world-weary investigator, but he also possessed a hardened nobility that prevented him from dabbling in more than minor self-corruption. He always drew the line somewhere. His underlying, unsympathetic moral stance gave backbone to his character.

A Review

The film gives us all the "weariness but none of the nobility. He is a deflated, defeated Marlowe, a performance that deflates and defeats the dramatic action and character interrelationships of the story. "Farewell My Lovely" is quite interesting in the way the period atmosphere (early 1940's, lighting and color work) work together in subverting the narrative elements. Instead of contributing to a mood created by the acting or dialogue, these elements seem to sustain a clunky, independent mood, as if the whole enterprise was a slightly surreal nightmare of Robert Mitchum's. This is particularly noticeable in the night city scenes, with the garish, surreal colors of the neon signs.

"Farewell My Lovely" may be one of those films in which director lost control to his cinematographer.
The following are on-campus job interviews scheduled for the week ending Feb. 4, 1976. For interview appointments and additional information, interested students should visit the Career Planning and Placement Center located at Woody Hall, Section A, North Wing, 3rd floor.

Wednesday, Feb. 4
Del Monte Corp., Salzbach, Ill.: Production training in plant and farm operations. Not limited to particular majors but rather qualifications of individual. Agricultural background is helpful. Will be in the production end of the business. Majors: Agriculture, agriculture industries, business, industrial Technology. U.S. citizenship required.

Kansas City Power & Light Co., Kansas City, Mo.: Schedule no. 1 B.S. in mechanical engineering technology, electrical engineering technology. Schedule no. 2—mathematics, economics, finance. U.S. citizenship required.

Deere & Co., Moline, Ill.: Openings for B.S. in engineering. Schedule no. 1: Majors: Engineering, engineering technology, business administration. Majors are the "idea" men in the John Deere Training Program. They range from minor refinements of existing products to total new design of radically new product concept. Once the designs are converted into prototype hardware, they must be tested in simulated and actual field conditions to prove the performance, durability, and reliability. Manufacturing Engineers turn the design engineer's "brain child" into a reality in a manner that will allow it to be mass produced in sufficient quantities to meet sales demands and at a cost that will allow us to sell the product at a competitive price. Divisions within manufacturing engineer include: process and tool, industrial engineering, plant engineering and mechanical services. Majors: Engineering, industrial engineering, mechanical engineering.

Openings for B.S. in Accounting, Business Systems, Marketing, and Business.

The Internal Auditing Staffs at Deere & Company examine the accounts of the individual manufacturing and marketing units to verify/compliance with accepted accounting procedures and with Company accounting policies. The accountants also conduct operational audits to evaluate performance within different functional areas of the operating units besides staff departments of the headquarters organization. Opportunity for advancement is based on personal achievement which can lead to responsible positions in Finance, Manufacturing or Marketing.

Financial Services Representative—Markets John Deere Insurance and John Deere Financial Plan to Agricultural, Industrial and Consumer Products dealers. Provides assistance to dealers with insurance and retail finance problems. Acts as liaison between the dealer, branch or region and John Deere Financial Services. The Business Systems Department at the units have computer terminals in bind up with central computers at Deere & Company. Computer Programmers work in support areas for these facilities. Promotion to an Analyst position exists for a person who demonstrates ability and motivation during the training he receives as a Programmer.

Majors: Accounting, Marketing, Business. Students should pick up an application prior to their interviews. U.S. citizenship required.

Motorola Inc., Schenumburg, Ill.: Interested in Development Engineers pursuing a career in either Research or Design Development of two-way land mobile communication equipment. Engineers working in these product groups will be responsible for developing products from their conception to shipment. Majors: B.S. - E.E. MSIE, RSME, MISME. U.S. citizenship required.

Thursday, Feb. 5

Friday, Feb. 6
Carnation Co., Los Angeles, Calif.: Carnation Co. is a major food manufacturer with facilities throughout the world and one of only six A rated companies by Standard & Poor's and Moody's. Sales in 1975 exceeded $2 billion. They are looking for management trainees in both sales and production areas. Salary is competitive. Descriptive brochures in Placement Office.

Majors: Industrial Tech. or others interest in production (manufacturing) management with the Pet Foods (Prokne) Division. Also, all majors will be interviewed if highly motivated toward sales or non-management career. Preference business oriented majors such as Marketing, U.S. citizenship required.

WOMEN SHOULD TAKE A DIVIDE

Lack of diversity in the performing arts and music education field is a significant issue. Women should take a divide to address this issue.

Women should take a divide

The Saluki swimmers lost to Indiana Saturday in Pulliam Pool, 79-34. It wasn’t a good day for SIU swimmers, a big crowd was on hand to watch the 200-yard breaststroke. (Staff photo by Carl Wagner)

Salukis sink to 3-3, Indiana swimmers 16-1

Mark Kazembeh Daily Egyptian Sports Editor

Trivia buffs may remember that the Rows hit the disk with that hit for his 11th home run, but probably not many who could recall when the Indiana swimming team won its 116th consecutive dual swimming meet.

The Hoosiers were outscored in only one event Saturday as they rolled to a 37-9 win (31st 166th) over SIU in Pulliam Pool. Indiana won the first event-the 400-yard medley relay-only after the world’s fastest swimmer, Jan Montgomery, hit the water for the final leg. SIU led a slim lead going into the last 100 yards, but Montgomery sped by SIU’s Dana Roberts for the win in 3:13.9. SIU was 3:33.9.

One of the low points for the day for SIU was Jorge Delgado’s own win in the 200-yard freestyle. Delgado won the race swimming in exhibition after being disqualified for false starts. Delgado’s time of 1:41.08 was 1.2 seconds better than Ken Keem’s time that took the win the previous season.

The problem with the false starts was Jorge Delgado did not false start on the first one, explained SIU coach Steelie Porter. "Jorge swam off and we didn’t have the official tell him he had false started."

"Jorge has a miserably slow start," Steele said. "Because of that and the crowd making him want to do well, he was kind of keyed up and he wasn’t really concentrating. When he did swim the 200, he was a super first half. I took it over to the end. He was out a second faster in the 100 than he ever has been.

Delgado came back in the 200-yard butterfly to claim the first place point. His only real competition in the event was teammate Demond Porter who was second with a time of 1:35.8—eight tenths of a second behind Delgado. "I think the best he’s had all around for us was by Greg Porter," Steele said. Porter swam the butterfly leg of the 400-yard medley and finished third in the 200-yard individual medley.

That’s the best triple he’s had since.

Dave Swenson had a second place finish in the 1,000 and 500-yard freestyle events. Rick Fox also finished second in the 50 and 200-yard freestyle events. Montgomery swam in both the 200-yard freestyle race and the 500-yard freestyle event. Montgomery finished second in both races, with a time of 1:36.2.

Mike Salerno was edged by four tenths of a second in the 200-yard medley relay by Indiana’s Bob Swenson. "That was the closest we’ve ever been," Swenson said.

The Hoosiers dominated the 400-yard medley relay and finished first in the 200-yard individual medley.

That’s the best triple he’s had since.

Sooners edge SIU grapplers

By Scott Henside

Daily Egyptian Sports writer

Two losses in the 150-pound and
heavyweight divisions provided the
margin for the 18-23 defeat SIU suf-
f ered against the University of
Kentucky in the Arena Saturday af-
ternoon.

Sahibi Mark Wilsoa, wrestling at
177, had tied the match up at 12-12
with a 7-6 decision over Pete Nether-
ton. And it was up to Tim Shevoda and Jim Vici.

The 190-pound match was almost
decided early Sooner Mark

Neumann's move caused a nose bleed in
his match against Shevoda. The
match was stopped four times when
Neumann tried to stop the flow of
blood.

Two points in the third period
claimed the match for Neumann and

Oklahoma regained the lead.

Heavyweight Herb Calvert built a
5-0 lead over SIU's Tom Vizzi in an
emotionally charged match. Vizzi

only scored one point on an escape, as
Calvert claimed the final match, 6-1.

If the results would have been
reversed, the hero would have been
SIU's 142 pounder, Fred Hoef.

Wrestling in his first competition of
the year, Hoef defeated Keith

Green, 3-1, to put SIU's first points
on the board, after being down 0-4.

Hoef didn't attend school last
semester, but his wrestling ent-
husiasm was high Saturday, and

nobody appreciated it more than
SIU coach Linn Long.

"Like I said before Hoef is a
quality guy. It's a matter of how
bad you want to get the job done.

Any time a guy like Fred puts in the
time and energy, he'll get the job
done," Long said.

After Hoef's victory, SIU began to
roll. Sahibi Chele Rufin defeated

Larry Griffith 3-1 in the 130-pound
class to narrow the gap to three
points for SIU.

Jay Friedrich lost 4-2 to Sooner
Gary Baker in the 125-pound match,
but Jim Heravath whipped Keith

Shoam 7-2 in the 187 pound con-
frontation to boost the Sooners to
with in three again.

There win by Oklahoma had
pushed the Sooners to their early
lead. Defending NCAA champion

Shawn Garee was taken to the limit
by 118-pounder John Gross in the
opening match. Garee eventually

won 13-4, but Gross had the scoring
lead twice.

The winning margin was gained
by Garee in the second frame as a
take down and a near fall provided
the Sooners with five points.

Sooner coach Stan Able said Garee
might have been cold, since the
team only arrived at the Arena five
minutes before the match was to
begin.

"We were five minutes late and he
didn't get to warm up. You need
to get them loosened up before a
match, plus the kid (Gross) kept
challenging him throughout the
match," Able said.

Able said SIU has a real fine
team. He specifically liked Wilsoa,

Rufin and Goldsmith's style of
wrestling.

Goldsmith was pitted against
Oklahoma's pre-season All-America
128-pound selection, Ken Nelson.

Both wrestlers spent the first period
measuring each other. Goldsmith
erained the only point in the second
period with an escape.

Nelson tied the match up with an
escape in the third period. The
Sooner wrestler gained the 2-1
decision because of riding time.

This was Goldsmith's second loss
of the season.

Also losing a close 134-pound match
was Sahibi Bill Ramden.

Wrestling Mike Chine, Ramden
was down 3-2 after receiving a point
for Chine's failure to wrestle, im-
mediately following the decision
Chine initiated a take down for the
winning edge.

Speedsters

Kansas out-duels SIU in indoor track meet

By Mark Kaszowski
Daily Egyptian Sports Editor

The SIU indoor track team has gone from a tune up to a charged up feeling in preparation for next week’s Illinois Intercollegiates Indoor track meet.

SIU’s tune up didn’t go so well as Kansas topped the Salukis 84-54 Saturday at Kansas. Coach Lew Hartung was working without four pitc'hers and a meet in 12 S. St. John, Mike Monroe, Clay DeMattei and Mark Kramer were unable to make the trip because of injuries or illness.

"It was better than some times we’ve done against them. But not as good as others," Hartung said of the meet.

"Some of the kids really did an outstanding job," he said. "I was very impressed with Ed Wardnai in the 600 (second at 1:24.4. Mike Ken can very well for second in the 60 (2.1). Earl Biglow ran well for third in the quarter (49.2). (Michael) Baxa very quickly proved he will be a very fine half mile (first in 1:35.5).

"Even though he was third, John Marks did a fine job (5.39) shut put."

The Salukis came away from Kansas with two more injuries that could hurt their chances in the Illinois Intercollegiates Feb. 6 and 7 at Champaign.

Hartung said Wayne Carmony in the 440 and Kevin Moore in the 600 yard run both pulled up with hamstring pulls.

Injuries that would keep Monroe and Carmony out of the track and field intercollegiates would be "crippling," Hartung said. Monroe injured his leg again in the Indiana Invitational Jan. 16 and 17.

"If Monroe is hurt, that would be the most crippling one of all," Hartung said.

"Outside of Monroe, I think they’re all minor. If it holds them out of practice, it’s major."

Hartung said he felt some of his track men were sick with "Kansasitis" at Lawrence Saturday. Running against the Big Eight track power seemed to have anything but a calming effect on the young Salukis.

"It was rather pleased with most of our freshmen," he said. "I truthfully feel that because of the talent we have, that this should be as good or better than any team we’ve ever had. We’ve from Rochester, Pa., needed and (Lorrie) Brown and have a great freshman group." The Saluki track team is already looking forward to the intercollegiate meet where the U. I. will be the chief competition.

"We’ve got that charged up feeling already about Illinois," said Hartung. "There’s any possible way we can get ready for, I’m sure we’re going to be ready."

"Some kids are going to have to come up with super performances just to stay on the track up there."

Other first place finishers for SIU at Kansas were Philip Robins with a 4:27 three-fourths triple jump, George Haley with a 7.2 in the 60-yard low hurdles, Gary Hunter with a 16-feet pole vault and Richard DeLa at a 2:16 three-fourths long jump.

Although figuring this to be a rebuilding year, Meade feels his young gymnasts are steadily improving. "We could improve four points by the end of the year," the 33-year SIU mentor said, indicating most improvement is probably needed on the rings.

Meade’s coordinated crew will meet the University of Illinois, Champaign and Illinois State at Normal Saturday, then return home to face highly-feared Nebraska Feb. 7 following the SIU-Urak basketball game.

Ford's engine cool in pressure win

Daily Egyptian Sports Writer

Being a college freshman basketball player and standing on the freethrow line can be a big conference game resting on your cool and shooting touch is a pressure situation.

The pressure is even greater when 7,470 fans are looking at you on the solitary figure.

That was the scene Saturday night in the Arena when SIU defeated the Golden Hurricane of Tulsa 79-76.

With 1:11 remaining in the game, Tulsa reserve forward Darrel Johnson picked up his fifth foul of the game, putting Saluki freshman Richard Ford on the freethrow line shooting a one-and-one.

Before Ford could shoot, Hurricane coach Jim King called two consecutive timeouts, hoping the delay would play havoc with the youngster's nerves. The strategy failed as Ford calmly stepped to the line and hit both of the free throws.

The Salukis are now 4-1 in the league and 16-4 overall. Tulsa is now 2-4 in the league and 6-10 for the season.

Coach Paul Lambert gave the Salukis a couple of days rest, but they are now preparing for a big non-conference game with the Louisville Cardinals in Louisville, Sunday at 1 p.m.

Several Salukis could each have been named the star of the game. They all came up with pressure plays, but it was Ford that was singled out in the closing minutes.

The first time I was up there I was just thinking about making the freethrows, said a reserved Ford in the locker room following the game. "I had been under that type of pressure in high school and I just wanted to concentrate on taking my time."

Ford contributed 17 points, second to Glenn's game high 23, and also had eight rebounds, second to Gary Wilson's game high 12.

Five of Ford's rebounds were on the offensive boards. It was an excellent game for the freshman, who is quickly becoming one of the best offensive rebounders that SIU has had in recent years.

"Ford showed he was pretty tough when he stood up there and hit those four freethrows," Lambert said.

Tulsa led in the early minutes but the Salukis' defense held them in their tracks. Twice they held leads of eight in the second half, only to lose them because of defensive lapses.

Ford was the first to admit the team must improve defensively.

“Our defense has to improve a little more,” he said. “We relaxed too much instead of going all out.”

Wilson scored second Ford in the second half. Twice they held leads of eight in the second half, only to lose them because of defensive lapses.

Ford was the first to admit the team must improve defensively.

“Our defense has to improve a little more,” he said. “We relaxed too much instead of going all out.”

"It was open so I took it,” Glenn said modestly. “I figured I could hit it.”

Glen played the entire 40 minutes, as he does most games and was a little weary after the game.

"They were leaning on me pretty tough," he said. "I got tired near the end. But everyone else played so well and we pulled it out.”

Saluki slate of events

By Jerry Tucker
Daily Egyptian Sports Writer

Denise Didier won two events and the all-around title as the SIU elite women gymnasts outclassed regional rival Illinois State in the Arena Friday night.

Coach Herb Vogel's graceful Salukis totally dominated the Sycamores 105.76-90.30, showing no visible signs of inevitable weariness from four meets in four days and a seven-hour plane ride that arrived late in Carbondale, delaying the match. SIU women won all four events and placed second everywhere but on the uneven bars.

Didier, a sophomore from Lombard, won both the vaulting and the balance beam event, thrilling the slim crowd with a double-somersault vault and a flip on the four-inch wide beam, the only gymnastics attempt, either stunt.

Junior Diane Hays won the floor exercise with a 9.9 mark, taking second in the all-around. Linda Nelson placed third all-around, taking first place on the uneven parallel bars.

Captain Fonda Bollin, center from Rockville Centre, N.Y., did not win an event but scored three times for the Salukis as the worst of the four-scores is thrown out in each phase of the competition.

The elite team arrived in town only an hour or so before the meet's 7:30 p.m. scheduled starting time, but had no trouble with their usually strong opponents.

“We would have been in trouble if this one had been on the road,” Vogel said. “All our meets in Illinois, Tuesday, Arizona Wednesday and Utah Thursday, we've been on a plane all day today.”

The gymnasts won both Tuesday and Wednesday, but lost Saturday against the five-team Rockies Invitational at Salt Lake City, Utah on Thursday night.

Friday victory however, raised their dual meet winning streak to 30.

Vogel feels his team can repeat as national champions if “no one gets hurt.” The team has used six women in the finals and we're down to four. We've won the nationals before with four, but no one can make a mistake or get injured,” Vogel said.

Vogel said three of his four performers are hurting now, but still competing. “Denise had a planer's wart on her hand removed, but it came back over the vacation and is hurting her again.”

A rare Sunday escaped from practice, the women returned to work Monday to prepare for their 7:30 p.m. Friday home meet against Southeast Missouri State.
