Poor sales may close Old Main Room for summer

By Steve Metsch
Staff Writer

UNLESS THE OLD Main Room restaurant starts making more money, it will close its doors for the summer. Student Center Director John Corker said Wednesday that sales in the Old Main Room are down compared to last summer, and if they don't improve, the restaurant may be forced to close. Interstate United, a private company handling the Student Center's annual budget, which is then subject to Corker's approval, has suggested closing the Old Main Room this summer to save money.

THE OLD MAIN, located on the Student Center's second floor, needs \$250 in daily sales to break even, according to Corker. He said that's the minimum amount of money needed to pay for labor and cover costs. The break-even mark for a five-day week is \$1,250. The Old Main Room made just \$641 in three operating days last week. Corker didn't want to close the restaurant and came up with his own idea. He suggested giving the Old Main Room three weeks to "prove itself," and, in the meantime, started a cross-campus handbill campaign urging people to eat there.

THE THREE-WEEK trial period leads up to the three-day Fourth of July weekend, when the restaurant is scheduled to close for renovations. It would remain closed until July 11. "My feeling is that our service is too important to be shut down," he said. "I felt we should appeal to the people for help." Corker said the handbill campaign, which started June 14, has proven successful. Sales went up from \$180 on Tuesday of last week to \$290 on Wednesday, he said. "Sales have been up in the last six or seven days. If we See OLD MAIN, Page 3

'Whew, what working weather'

Gene Gillooly, left, botany greenhouse manager, takes a break. Above, Ted Frey, bails straw for the SIU farm, while Elden Shaffner, farm manager, drives. Thursday weather will be mostly sunny with 40 percent chance of rain with a high in the mid-90s.

Naming spies is crime under new law

WASHINGTON (AP). President Reagan, calling CIA agents the "heroes of a grim twilight struggle," signed into law Wednesday a bill making it a crime to disclose the names of American spies.

The ink was barely dry on the controversial legislation before civil rights officials denounced it as blatantly unconstitutional and offered legal assistance to challenge it.

Reagan flew by helicopter to the sprawling CIA complex in nearby Langley, Va., to sign the bill before an audience of several thousand agency employees sitting on a sun-drenched lawn.

The bill makes it a crime — for the first time — to disclose the name of a covert intelligence agent even if the information is obtained from public records.

It provides penalties of up to 10 years in jail and \$50,000 in fines for government employees who expose the identities of covert U.S. intelligence agents living in foreign countries.

Those outside government, including reporters and scholars, could be imprisoned up to four years and fined \$15,000 for revealing names of spies if there was reason to believe such actions would disrupt American intelligence operations.

Referring to the arguments over the bill's constitutionality, Reagan said, "The Congress has carefully drafted this bill so that it focuses only on those who would transgress the bounds of decency — not those who would exercise their legitimate right of dissent.

"This carefully drawn act," he said, "recognizes that the revelation of the names of secret agents adds nothing to legitimate public debate over intelligence policy.

"It is also a signal to the world that while we and this democratic nation remain tolerant and flexible, we also retain our good sense and our resolve to protect our own security and that of the brave men and women who serve us in difficult and dangerous intelligence assignments," he said.

Jerry Berman, legislative counsel to the American Civil Liberties Union, said the law was "clearly unconstitutional!"

Record deficit budget OK'd

WASHINGTON (AP) — Congress gave final approval Wednesday to a GOP-drafted budget for 1983 with the biggest deficit ever approved — \$103.9 billion — and a mandate for \$21 billion in higher taxes and billions in social program spending cuts.

The vote to approve the \$769.8 billion spending plan was 54-45 in the Republican-dominated Senate, an outcome officials claimed was sealed by last-minute telephone lobbying by President Reagan.

The Democratic-controlled House okayed the plan Tuesday on a roll call of 210-208. Wednesday, Speaker Thomas P. O'Neill Jr., D-Mass., a steady critic of Reagan's economic policies, said the blueprint

showed "no care, no concern, hard-heartedness all along the line."

It projects eye-catching deficits — \$103.9 billion next year, followed by \$83.9 in 1984 and \$60 billion in 1985 — that the non-partisan Congressional Budget Office said will be even higher.

The CBO, saying Republicans overestimated revenue and underestimated required spending, says red ink will run to \$116.4 billion next year under the plan, falling only to \$92.7 billion in 1985.

Senate Democrats also insisted the actual deficits would be billions of dollars higher, and attacked the budget as a plan that is both unfair to millions of Americans and will fail to

improve the economy.

Republicans embraced it reluctantly, conceding the deficits are higher than they would like. But, said Sen. Slade Gorton, R-Wash., "The alternative is chaos and disorganization that would have extremely adverse impacts on the economy."

The budget itself sets tax and spending guidelines for Congress committees to follow, but also triggers the next step in a year-long congressional struggle over economic policy.

Under its terms, House and Senate committees are required to produce legislation by Aug. 1 with specific social program budget cuts totaling \$6.7 billion next year and \$27.2 billion over three years in such areas as

Medicare, Medicaid, food stamps and welfare.

The tax-writing committees are required to produce legislation raising taxes by \$20.9 billion for the next fiscal year.

Here are the major components of the proposed budget: —A reduction of \$7.6 billion in the proposed defense buildup for 1983 and \$28.4 over three years. Even so, the Pentagon budget will grow by 14 percent next year over 1982.

—Cuts in domestic programs such as education, parks, energy and jobs training of \$6.3 billion in 1983 and \$35.1 billion over three years. Many programs would be roughly frozen at 1982 levels for three years.

Beirut fighting rages; car bomb kills five

BEIRUT, Lebanon (AP) — Israeli jets, tanks and artillery blasted Syrian and Palestinian batteries near Beirut airport and to the east Wednesday, and a U.S. transport ship prepared to evacuate Americans from Lebanon.

In Israeli-encircled west Beirut, an explosion apparently caused by a car bomb wrecked a five-story apartment building and started a huge fire next door to the Phoenix Hotel shortly before midnight.

The Christian Voice of Lebanon radio station said the explosion destroyed a guerrilla ammunition dump, killed five people and wounded 15 others. But eyewitnesses reported seeing at least 20 bodies in the ruins.

Lebanese authorities say at least 10,000 people have been killed throughout the country since the Israelis invaded 18 days ago. The Israelis say the toll is about 2,000.

An American Embassy spokesman said a vessel from the U.S. 6th Fleet was due in the Christian-held port of Jounieh 10 miles north of Beirut Thursday to take out American citizens wishing to leave.

The U.S. and other Western embassies earlier urged their citizens to evacuate Beirut. The U.S. spokesman said only a few of the estimated 300 American passport holders still in west Beirut had reported for evacuation.

Israel Radio said U.S. presidential envoy Philip C. Habib would hold talks with Prime Minister Menachem Begin Thursday. There was no official confirmation of the report.

Israel invaded Lebanon June 6 to crush the guerrillas and drive out Syria's 30,000-man army, which had increasingly attacked Israel's Lebanese Christian allies, rather than policing the area.

Lebanese officials said negotiations involving Habib, Lebanese President Elias Sarkis and others at the Baabda palace were "a race against time" in the search for a compromise before the Israelis' patience wears out and they decide to attack Yasser Arafat's west Beirut enclave.

Israel and the United States refuse to recognize or negotiate with the PLO, which has long been a state within the state of

Lebanon.

In a letter to U.S. Rep. Paul Findley, R-Ill., Arafat renewed accusations that the invasion had the backing of the Reagan administration, and added:

"The one man capable of stopping aggressors is the president of the U.S.A. His failure to do so means that he approves of the Israeli aggression, and indeed must be considered as giving encouragement to it."

In New York, addressing the special U.N. General Assembly session on disarmament, Lebanese U.N. Ambassador Ghassan Tueni demanded the "immediate and unconditional" withdrawal of Israeli forces from his country.

Habib worked out another cease-fire Tuesday, but a tank and artillery battle for control of the Beirut-Damascus road erupted Wednesday in the hills above Beirut while Israeli jets bombed Syrian and Palestinian positions.

Each side accused the other of mounting offensives and claimed to have stopped them.

News Roundup

House adopts voting rights extension

WASHINGTON (AP) — The House adopted and sent to President Reagan on Wednesday a 25-year extension of critical enforcement sections of the 1965 Voting Rights Act that would make it easier for minority voters to prove racial discrimination.

The unanimous voice vote ends a 15-month drive for renewal of the landmark civil rights law under which more than a million blacks and other minority voters have registered to vote.

Important parts of the voting rights law, enacted at the height of the 1960s civil rights movement and signed into law by the late President Lyndon B. Johnson, would expire August 6 without the extension.

Court favors public access to trials

WASHINGTON AP — The Supreme Court, favoring open courts over the privacy of young rape victims, ruled Wednesday that the public and press cannot automatically be excluded from any criminal trial.

By a 6-3 vote, the justices struck down a Massachusetts law that required trial judges to exclude the public and press when all young victims of sex crimes are testifying.

The ruling marked the court's strongest statement yet on the constitutional "right of access" to find out how government is operating.

Two killed, 59 hurt in Amtrak fire

REDDING, Calif. (AP) — A sleeping car on Amtrak's Coast Starlight run burst into flames before dawn Wednesday in the northern California mountains, killing two people, injuring 59, and routing choking passengers in their nightclothes.

It was the second fatal Amtrak accident in two weeks. On June 15 the 12-car San Francisco Zephyr derailed after hitting flooded tracks near Emerson, Iowa. One person died and 16 were injured.

The blaze was reported at 2:12 a.m. as the train, en route from Seattle to San Diego, traveled along the Sacramento River near Shasta Lake 200 miles north of San Francisco.

Chicago may host next world's fair

CHICAGO (AP) — The Bureau of International Expositions is expected Thursday to approve the city's application to hold a world's fair in 1992, a spokesman for Chicago's world's fair authority said Wednesday.

John Hogan, a spokesman for Chicago 92 Corp., said the bureau is expected to announce a plan that would let Chicago hold a 1992 fair and allow Paris to sponsor its own world's fair in 1989.

Applications for fairs by the two cities had presented a problem because the bureau's rules had said major world's fairs must be held at least 10 years apart. A change in that rule was approved last week by the bureau's executive committee, which also approved the Chicago and Paris fair plans.

New Argentine president urged to restore democracy

BUENOS AIRES, Argentina (AP) — President-designate Reynaldo Bignone, a retired major general, began work Wednesday to set up a transition government aimed at restoring civilian rule and economic health to Argentina following the Falkland Islands defeat.

A group linking Argentina's five leading parties met to assess the situation. The organization, created last June, has steadily pressed for a return to civilian government and an end to free-market, monetarist economic policies which are blamed for plunging the country into deep recession.

The powerful Peronist-dominated Electrical Workers Union in Argentina's second largest city of Cordoba urged the transition government to

open "channels with all national sectors" to allow full participation in "the elaboration of a national emergency program."

In Buenos Aires many residents, reading morning papers announcing the naming of still another military president reacted with resignation.

"Well, we've had so many that now we don't even notice a new one," said housewife Beatriz Suarez.

The air force and navy, which wanted a civilian president, pulled out of the government Tuesday, leaving the army alone to name Bignone. It pledged talks with political parties "in the quickest possible time" with the aim of restoring democratic rule by "the first

few months of 1984."

The president-designate, a conservative administrator who has been closely associated with the founders of the military government, said he planned to make "absolutely no demands of the political parties."

"We are at a very important national crossroad," said Bignone, "and we need to employ calm in building unity, setting aside all personal appetites."

"But I'm convinced that we're going to move ahead," said Bignone, who will replace Lt. Gen. Leopoldo F. Galtieri, forced to resign last Friday for his role in Argentina's disastrous defeat by Britain in the 74-day undeclared war in the South Atlantic.

OLD MAIN from Page 1

keep it up the next two weeks, we can make it," he said...

CORKER BLAMED poor economic conditions for the Old Main Room's predicament.

One problem for the restaurant is the decrease in the number of conference groups dining there, as well as fewer summer sports campers on campus, he said.

"The real problem is that the economy has caught up with us. People don't spend as much," Corker said. "We can't raise prices in the summer, so we have to look for ways we can save money."

One of the ways Corker proposes to save money is changing the dining system used by those students spending the summer in residence halls.

ALTHOUGH ABOUT 140 students live in the Thompson Point residence halls and eat in the Student Center, Corker said their presence doesn't necessarily add up to more sales.

He explained that dormitory students pay \$340 for summer meal coupons and the Food Service provides them food worth \$400. Meal coupons are good at both the Student Center cafeteria and the Old Main Room. Corker said that more money is lost by allowing students to eat in the Old Main Room during peak sales hours.

"We've discounted their meal tickets by 15 percent, so if they spend \$3 in the Old Main Room, we actually only get paid \$2.55,"

he said.

"**THIS CREATES** a double problem. The Old Main Room fills up with students, we get less money, and also have to turn people away. We have mostly a noon traffic."

If the Old Main Room doesn't close its doors, Corker plans to limit the hours meal coupon holders can eat there. Coupon-holders would be able to eat there from 11 to 11:45 a.m. and 1 to 1:30 p.m. There wouldn't be any restrictions on when they could eat in the cafeteria, he said.

This way students will be able to eat some places, anytime, Corker said.

Financial problems aren't new for the Old Main Room, Corker said.

"Last summer, we weren't able to cover the labor and food costs and ran the Old Main at a loss," he said.

THE OLD MAIN Room had an erratic summer financially in 1981, recording over \$1,000 in sales one week and just over \$500 another, according to Corker.

Last spring, it was anticipated that Food Service would bring in \$146,000 in sales this month. That was revised last fall to \$100,000, said Corker. Food Service as a whole is budgeted to make \$25,000 in sales per week in the summer, said Corker.

The food business isn't the lucrative field it may appear to be, Corker said.

"This year is the first in the history of the Food Service that it will make money or break even," he said.

THE FOOD SERVICE anticipated sales of \$1.9 million for the year. Its profit will be just \$1,129 by Sept. 30, the end of its fiscal year, Corker said.

"We made a \$7,400 profit in April and lost \$20,000 in December," he said.

He said that the only food businesses which can expect to make a large profit are fast-food franchises like McDonald's and Hardee's, which are specialized, pay low labor costs and are restricted in the services they offer. An average Old Main Room employee is paid \$5 to \$6 an hour, he said.

Corker said that SIU-C is more fortunate than other state universities which close their Student Centers on the weekends. He said his goal is to meet the budget as well as to maintain the service people are accustomed to.

Should the Old Main Room be kept open, Corker said he will look into the possibility of closing Food Service at the School of Technical Careers in Carterville for the summer.

He said the STC facility lost \$100 in direct cost last week and took in sales of \$160, which can't cover the \$162 weekly salary of its one full-time employee.

Immigration agents smash lucrative alien smuggling ring

WASHINGTON (AP) — Undercover immigration agents smashed a smuggling ring that brought an estimated 24,000 aliens a year to the United States — most of them to Chicago — from Mexico and seven other countries, Immigration Commissioner Alan C. Nelson said Wednesday.

Nelson said the ring, which had been operating for 4½ years, was the largest ever broken by the immigration service. He said it grossed an estimated \$24 million a year of which \$12 million to \$15 million was profit.

A federal grand jury in Albuquerque, N.M., indicted 38 alleged members of the ring Wednesday on charges of conspiracy to transport illegal aliens and 47 separate counts of actually transporting aliens.

Nelson said 13 of the defendants already have been arrested, including the alleged ringleader, Salvador Peneda Vergera, a Mexican citizen and operator of the Hotel Villasana in Juarez, Mexico. He said it was one of six Mexican hotels used as a staging point for the operation.

Immigration officials said Peneda was arrested Monday in El Paso, Tex., at a Western Union station where he had come to pick up payment for a load of illegal aliens. They said Peneda had a card allowing him to cross the border at will and that he had not suspected his organization had been

penetrated. He is being held in lieu of a \$1 million bond.

The undercover immigration agents worked as drivers for the Peneda organization in an investigation begun in July 1981 after Illinois State Police intercepted a group of aliens on their way to Chicago, said Nelson.

Immigration officials said the largest number of aliens, more than 16,000 a year, were taken to Chicago by the group.

They said about 1,500 aliens a year had been taken from El Paso, which is across the border from Juarez, to the Amtrak station at Lamy, N.M., where they were sent by train to Chicago. The others were driven by a team of 40 drivers from points in New Mexico to Chicago.

Immigration officials said an additional 5,500 Mexicans a year and 3,400 other aliens were shipped to other points, including California, Michigan, New York, New Jersey, Wisconsin, Illinois, Colorado, Kansas, Missouri, Wyoming and Indiana.

INS agents began seizing 24 vehicles used by the ring including cars, trucks and one motor home, Nelson said. They also have seized weapons in some "safe houses" used to house aliens overnight in the United States, he added.

Falklands War taught crucial lessons for all

THE FALKLANDS WAR at the start had the appearance of a set-piece chess game until ships began going under and casualties began to mount. Even now it has an air of futility and unreality. Fifteen hundred men lost their lives in a quarrel over 1,800 people and things are back to Square One.

But this little war did establish some important things. Britain's decisive action showed tin-horn dictatorships that it doesn't pay to flout international law. All nations need to know that external aggression is no answer to internal problems. In spite of Gen. Galtieri's success in rousing the people of Argentina into jingoistic frenzy, unity was temporary and didn't save his neck.

THE BRITISH AND other advanced nations can learn too that because of progress and pervasiveness of modern technology, little nations are no pushovers. As nuclear proliferation continues, this consideration takes on awesome undertones. Advanced nations' greedy money-making in the arms market can be counterproductive. Britain lost seven ships to Exocet missiles and Mirage planes made by her NATO and KEEC partner, France.

The United States, often the policeman of the world, also can learn a thing or two, namely clarity of goals and decisive action. Too many foreign allies are frustrated by our lack of long term foreign policy and our hesitancy in action.

PRESIDENT CARTER LOST Angola to leftist forces when he vacillated after Cuban soldiers moved in to rescue the leftists from certain defeat by rightist nationalist forces. Many Asian countries see the war effort in Vietnam as a needlessly long-drawn affair hamstrung by lack of political will. United States reaction to the Polish crisis came more than a week after the event.

The United States can also learn that it does not pay to play the political expediency game and sacrifice principles. Repressive regimes do not make the most reliable political bedfellows.

An encouraging development uncovered by this unnecessary war is the independent thinking of Third World countries. Gen. Galtieri's hope that Third World countries would automatically perceive Britain as the big imperialistic bully and come out in support of Argentina en bloc was a tragic miscalculation. Even his Latin American neighbors did not support the invasion.

THE WAR COST both nations heavily in loss of lives and material. In relative terms it was perhaps a good war; more material was lost than men and there were no reports of civilian casualties, as opposed to the 10,000 killed in Lebanon. But no war is really a good war. Perhaps the whole world might learn a crucial lesson. The negotiating table is a far better place than any battlefield for settling differences. There are fewer losers that way.

ERA editorial disproved through look at history

The DE's June 22 editorial about the ERA is so ridiculous that I am impelled to write a reply.

The editorial blames the ERA's probable failure on "fanatical females" who have been too militant, too demanding, too "hysterical."

There is sexism in portraying strong, militant women as merely "hysterical" females (a sexist, demeaning, antiquated stereotype). Aside from that, the DE's position is an old one. It is an argument that is presented to every movement for change. Its premise is that when every group fights for its rights, it must be careful never to push too hard or demand too loudly. Such pressure, according to this theory, will either anger one's oppressor or alienate the masses — in either case hurting one's own cause.

History makes a complete shambles of this tired flim-flam. Every inch of progress ever made for human rights has been won through intense, often violent struggle. The United States freed itself from British domination only after the most militant possible action — war. Slaves in the United States were freed not by Lincoln's benevolence, but after many years of bloody and terrible struggle which began long before the Civil War. In our own century, Blacks won basic civil rights only after prolonged militant struggle. The gains made by labor earlier this century came after decades of intense, bloody battle. And the Vietnam War was ended only

after years of huge mass demonstrations, riots, and the death of innocent students.

This does not mean that those who fought for their rights in these struggles enjoyed or advocated violence. It is unfortunate that change only comes through militant action. This is not, however, the fault of the oppressed, but due to the utter refusal of those in power to respond to the public's sentiments and basic human rights. Advocates of the "talk softly and carry no stick" school inevitably seek only the defeat of the movement they so advise.

In the case of ERA, this argument is especially ludicrous. Women have been working for the ERA since it was first introduced in Congress in 1921. Sixty-one years would seem to be enough time for your editorial's argument to be disproven. And who is this "majority" ERA activists are supposed to win over? Numerous polls have shown that the majority of women and men in the United States support the ERA.

Those who believe in the ERA or any other cause should not let their minds be befuddled by the false, twisted logic of arguments like the DE's editorial. And the editors would do well to read a history book or two. Progress has always been made only through intense struggle against those who stand in its way. Today, that is more true than ever. — Matthew D. Meighan, Editor, The Hard Times.

Letters

Air Illinois was discriminatory

I am writing a personal statement regarding what I feel to be an adverse, discriminatory action by Air Illinois in their denial to fly me on May 7, 1982, Flight 201. Perhaps it would be advisable to give you some precipitating factors surrounding this discriminatory action by Air Illinois. I would like to add that I am to be represented by Katherine Black, director of the Illinois Guardianship and Advocacy Commission, 608 E. College, Carbondale.

I am a second year, doctoral student at SIU-C. Due to difficulties arising from multiple sclerosis, my major mode of transportation is a wheelchair. When I called Air Illinois reservations in Carbondale, prior to the purchase of my airline ticket, I was informed that a flight was available on May 7. At that time, I had indicated that I was, indeed, in a wheelchair and would require assistance both boarding and deplaning. I was further informed that this would create no adverse conditions for me. On April 29, 1982, I purchased my ticket at a cost of \$131.

When I arrived at the airport in Carbondale for my scheduled flight on May 7, thirty minutes prior to departure, I was informed that the pilot would not fly me. I was additionally in-

formed that FAA regulations allowed the pilot this adverse choice. Unfortunately, I was denied admission to the airplane because I was in a wheelchair, a rule I was uninformed of when I purchased my airplane ticket. At that time I indicated that I felt this to be an extremely discriminatory action by the airline. I was afforded only a polite "sorry" by the airline representative. Needless to add, I was forced to make other arrangements, independently.

I would like to further add that this caused much inconvenience to myself. In that, I had dismissed my employees the evening before, my parents had expected me at Chicago O'Hare at 9 a.m. when the flight was scheduled to arrive; and it was necessary for me to secure other travel arrangements. I had returned to northern Illinois approximately 13 hours after I had originally planned. Once more I would like to add that after speaking with Air Illinois officials, I was afforded only a "sorry" for the inconvenience. "But that's the way it is!" Although I felt I was grievously injusticed by the airline, there was nothing I was able to do.

As I interpreted the incident, the best way for Air Illinois to deal with a physically disabled

person is through humiliation, degradation, dehumanization, and gross incompetence. I felt the airline to be quite brazened, heartless, cruel, and unnecessary in their actions. Further emotions that I felt during my denial from boarding were anger, hostility, helplessness, hopelessness, impotence, inadequacy and frustration. I suppose the best analogy to indicate my feelings at this point is similar to being extremely famished, running headlong to a luscious steak and being blocked from the steak by a five-inch glass partition. — David J. Nitz, Doctoral Student, Education.

Editor's note — Paul Sprague, director of stations and cargo for Air Illinois at Southern Illinois Airport, said Rule 26 of the FAA's Local and Joint Passenger Rules Tariff in effect states that any person not able to physically board or deplane from an aircraft under their own power is responsible for providing their own form of assistance, another person to help them on and off an aircraft. Sprague said the reservation clerks at Air Illinois are aware of this rule. He said he was not familiar with Mr. Nitz's case, but felt it was probably a misunderstanding that caused the difficulties.

Make DE tool for students' ambitions

The editorial policy of the Daily Egyptian is no less than perverse. From the front page, where we are regularly shown that peaceful demonstrators' arrests are "nabbings," to last Friday's opinion on the demise of the convention center, the DE takes a consistently anti-democratic stand.

How can a body of more than 20,000 young people, in the last quarter of the 20th century,

tolerate such a representation of the political world?

Has the Daily Egyptian considered the placement of the convention center and how equitable was the location chosen?

Was the DE interested in seeing and publishing a full breakdown of who will profit how much from such a project,

and who will suffer? Would, Mr. Editor, the people of Southern Illinois in reality benefit from Mr. Hoye's elitist projects?

Please dearest readers, let's mobilize to dump this paper's editorial policy and transform it into a useful tool of students higher ambitions. — Paul Murphy, Sophomore, Computer Science.

DOONESBURY

by Garry Trudeau

Roofing, patching are bulk of 1982 repairs

By Steve Metach
Staff Writer

Campus construction projects budgeted at \$879,100 will begin sometime in July, once the Board of Trustees awards the contracts for the work.

Proposed budgets and plans for new roofs for 10 student residence halls, resurfacing and repairing of nine parking lots and repaving of five sections of campus streets were approved by the board at its meeting in Edwardsville last month.

Bids for the roof work are due in Thursday, said Clarence Dougherty, vice president for campus services. He said the bids will then be presented to the board at its meeting in Edwardsville on July 8. The board will then review the bids and award the contracts.

Seven buildings at Thompson Point and three in University Park are slated for new roofs.

Budgeted at \$189,000, the Thompson Point work includes putting new roofs on Brown, Fels, Kellogg, Warren, Smith, Abbott and Baldwin Halls. Thompson Points' other four residence halls — Bailey, Bowyer, Pierce and Steagall — received new roofs last year.

All three of University Park's "triad" residence halls — Allen, Boomer and Wright — will receive new roofs. The project is budgeted at \$168,000.

Dougherty said the new roofs will be made of either plastic or

rubber. The current roofs are made of asphalt, and time and weathering have worn them out, he said. The Thompson Point roofs were installed in 1962 and the roofs at University Park were installed three years later.

Work for the roofing will be paid for from local housing maintenance accounts.

Six of the parking lots included in the planned resurfacing and repairing projects are gravel lots which will be paved with asphalt. The other three are already paved and will be resurfaced. New parking lot striping will be painted on all nine lots.

The nine lots involved are: Lots 3 and 7, north of Pulliam Hall; Lot 6, north of Morris Library; Lot 19, east of the Personnel Office; Lot 21, at University Courts; Lot 43, southeast of University Laundry; Lot 53, southwest of the Service Shop; and Lots 77 and 90, on Forest Street.

All the bids are in for the planned parking lot work, which the board budgeted at \$247,100.

The SIU Board will award contracts for the lot work at its July meeting and Dougherty said winning bidders will be "notified immediately" to begin work on both the roofs and lots.

Bids are due in soon for planned repaving projects, according to Dougherty.

Planned street work includes cutting down new surfaces on the Small Group Housing area drive; sections of Lincoln Drive south and southeast of the Nechers Building, southwest of the School of Agriculture and southeast of the Baptist Student Center; and Oakland Avenue south of Chautauqua Street.

The repaving project is budgeted at \$275,000.

A different funding program will be used for repaving the parking lots, which means the work needs the approval of the Illinois Board of Higher Education.

"The IBHE has to give approval to projects if non-appropriated money is being spent for non-appropriated programs," said Dougherty.

He said SIU-C plans to use money raised from parking fees and the sale of parking permits, instead of state funds, to finance the repavings.

Dougherty said that the board cannot act on the planned repaving until the IBHE meets in July, but added that he's "very optimistic" that the IBHE will approve the funding program.

Japanese firms deny FBI's computer espionage charges

TOKYO (AP) — Hitachi and Mitsubishi, two of Japan's most respected firms, denied U.S. charges that they tried to steal computer secrets from IBM Wednesday. The irate Japanese press said the two were victims of ABCAM-like entrapment designed to maintain the U.S. lead in the computer field.

The affair quickly turned into the most sensational U.S.-Japan business scandal since the Lockheed payoffs case of the mid-1970s. The Japanese Parliament met and top government officials expressed concern that the charges announced by the FBI Tuesday would further increase trade tensions.

Executives of Hitachi and Mitsubishi were called into the Ministry of International Trade and Industry for explanations, and the Foreign Ministry said it was trying to obtain more details from the Japanese Embassy in Washington.

Six Japanese have been arrested in California but 12 others sought in the affair are in Japan. The United States and Japan have an extradition treaty, but police said they have received no extradition request and that "Japan is not obligated to turn people over to U.S.

authorities." Hitachi Ltd., a major manufacturer of electronics and machinery, said it paid more than \$500,000 for information on International Business Machines Corporation's computer technology, but denied any wrongdoing and said it was subjected to an "eager sales pitch" by FBI undercover agents.

A top Hitachi spokesman, Yasushi Sayama, said he was "not sure whether we were entrapped or not" by the FBI operation which led to U.S. federal charges against 14 Hitachi and four Mitsubishi Electronics Co. employees for conspiracy to transport stolen property from the United States to Japan.

Hitachi's chief computer executive, Yasukichi Hatano, denied FBI claims that company officials had solicited the information. Mitsubishi executives denied any attempt to steal computer secrets from IBM or make any illicit payments.

The FBI claimed that a Hitachi affiliate paid \$622,000, and Mitsubishi \$26,000, for data on IBM's new computer technology.

Landlord problems? Check out free 'Tenant Survival Manual'

By Bob Olson
Staff Writer

The "Off-Campus Tenant Survival Manual" is now in print. The free booklet informs prospective renters about everything from their eligibility to live off-campus to how to set up a budget.

The 28-page manual, prepared by Carl Harris, director of off-campus housing, includes questions potential roommates should discuss together before they decide to live with each other. Questions regarding clashing personalities, habits and expectations will determine if they are compatible.

Besides listing sources which

inform the apartment hunter where to look, the manual tells the best time to look. It tells what to look for in an abode, such as its feasibility, privacy and length of lease.

The manual advises the renters to "test and examine everything" in the units they're considering for their new homes. It contains an extensive list of items to inspect, ranging from the driveway to rodent holes.

Readers are told what to look for in a lease as well as who to see if they have questions or problems. A "check-in check-out" form is included in the manual for listing conditions of

an apartment or house when the dweller moves in and moves out.

The purpose of this form is to record conditions before-and-after and aid tenants in avoiding disputes about damages and security deposits.

The "Off-Campus Tenant Survival Manual" can be obtained at the end of July at offices of the Undergraduate Student Organization and Graduate Student Council in the Student Center, and the Ombudsman's Office or Veteran's Affairs in Woody Hall. Copies are currently available at Washington Square, Building B, in the University Housing Office.

No pretty love songs with this group

By Andrew Zinner
Staff Writer

The Gang of Four, that angry young group of British social and political critics, have never been known for lyrical subtlety or diplomacy. Their latest album, "Songs of the Free," is another no-holds-barred look at our materialistic, militaristic, capitalistic culture.

And while the message conveyed is still crystal clear — that we'd better get off our complacent asses if we want to make things better for the working classes — the musical content is perhaps slower, funkier and more accessible than past Gang works.

Part of that may be due to new bassist Sara Lee (lately of Robert Fripp's bizarre League of Gentlemen) who replaced original Gang bassist Dave Allen, and background vocal help from Lee, Stevie Lange and Joy Yates. Their harmonies

(?) give the typically wrangling, jangling cacophonous sound of Gang mainstays Andrew Gill (guitar and vocals), Hugo Burnham (drums and percussion) and Jon King (vocals and melodic) a softer touch.

There's nothing soft about the lyrics, though. Kicking off the LP is the punk-funk "Call Me Up," a derisive look at the "me first" generation. Just go along to get along, and everything will be all right, is the message. "Children of the pleasure culture Who must be grateful for what we've got Happy smiles in sunny climes So don't upset the ice cream cart," shows the Gang's impression of the youth of today.

That song, with other usual Gang fare, reveals the despair and repulsion the band feels for the current world situation. "I Love a Man in a Uniform," is a heartless stab at those who

A Review

enist in the military. The Gill-King songwriting team writes off enlistees with the lines, "I had to regain my self respect So I got into camouflage The girls they love to see you shoot."

The anti-military stance has been a Gang staple since they rose out of the post-punk ashes in 1979 with their feisty, hyper-political, "Entertainment." Since then, the band has released another LP, "Solid Gold," and a 12-inch EP called "Another Day, Another Dollar," which includes the seminal protest song for the 1980 welfare state, "To Hell With Poverty."

"Muscle For Brains," a great

dance number on "Songs," shows the Gang's refusal to spare any group from their lyrical barrage. "Save me from the people who would save me from my sins They got muscle for brains," is a clean-cut blast at the religious.

That our wretched material lives, controlled by those with money, are so empty and useless is another common thread running through Gang works. Two tunes on "Songs," "It Is Not Enough," and "Life! It's a Shame," will delight anyone sharing this Gang view. Especially biting is the latter song, which rails against the powerlessness of the common man and corruption of our elected officials.

"To act for the good for congressmen us money The right to get rich is in the constitution Talk of corruption is to preach insurrection Elected to power men suspend self in-

terest," is a nice wrap-up for the Gang's feelings of American democracy.

Interestingly, the Four, after burying us in negativism, leave us on a positive note. "Of The Instant," is a quiet, introspective, very un-Gangish treatment on what the angry

masses out there can do. "We, it seems, can own ourselves In imagination..." "We make our own world Not everyone takes what we are given Did you say, 'I've had enough?'"

If you're interested in sappy love songs, pretty guitar solos or power pop, forget about the Gang of Four. You probably won't be able to handle the disorganized mass of noise that the Gang's music seems superficially to be.

But for the Gang of Four follower, the misnamed (on purpose?) "Songs of the Free," is another gem.

Sunset concert set in country style

Get out your stompin' shoes for a good old country hoe-down with the KSDK Country Road Show at Lenus Turley Park in Carbondale, Thursday at 8 p.m. The free concert will feature The Jimmy Queen Band, a western swing and country group.

Featured performers with the band are fiddle player Wade Ray, formerly with the Grand Ole Opry, and Jimmy Queen

Jimmy Queen

himself, singing his own brand of swinging country music.

The event is the second in the Sunset Concert Series, sponsored by the Student Center, the Student Programming Council and the Carbondale Park District.

The next concert in the series will feature the jazz-funk of Carnival on July 1, on the front steps of Siryock Auditorium on the SIU-C campus.

Workshop to explain aid to needy

By Rebecca Malkovich
Staff Writer

In these times of economic hardship, it should be comforting to know that there are two programs available for Jackson County residents who need help when times are tough.

The two programs are General Assistance, funded by the state, and Public Aid, funded by federal and state governments. They are both entitlement programs, meaning they are paid for by tax dollars.

The two programs will be the topic of discussion tonight at a workshop sponsored by the Women's Advisory Council and staff of the Land of Lincoln Legal Assistance Foundation.

"Anyone who is already a recipient or would like to find

out more information about either program should attend tonight's meeting," said David Johnson, an attorney at the Foundation.

The directing attorney of the foundation, Phil Milak, and several township supervisors are scheduled to speak at the workshop.

Forty-five minutes will be devoted to discussion on each program and a demonstration on how to apply for the aid will be given. There will also be a question and answer session.

The workshop is part of a series of Community Education Programs sponsored by the foundation. Lori Raymond, Vice-Chairman of the Advisory Council said, "We are concerned

that people be educated about the social services that are available to them."

The workshop will be held at 7:30 p.m. tonight at the Eurma Hayes Center, 441 E. Willow, in Carbondale.

\$3,500 grant will support soybean research

John Yopp and Oval Myers, professors at SIU, will be conducting tests in order to develop varieties of soybeans that are drought tolerant.

The research project is supported by a \$3,500 grant from the Illinois Soybean Program Operating Board, which represents a continuation of the program started with a \$30,000 grant in 1980.

Yopp, a professor of botany, and Myers, a professor of plant and soil science, hope to test up to 200 cultivars of soybean in special climatic chambers and in greenhouses.

Beg your pardon

A story on the Moslem observance called Ramadan appeared in Wednesday's Daily Egyptian. A Moslem student informs us that three mistakes were made in describing the Five Pillars of the Moslem faith. The third pillar, called Ramadan, is not a day of fasting, but an entire month. The fourth pillar is not the giving of arms, but the giving of alms. The fifth pillar is performing a pilgrimage to Mecca. The Daily Egyptian apologizes for these errors.

Today thru Friday

7:00 pm

in the 4th floor Video Lounge of the Student Center

\$1.00

Sponsored by SPC Video

Pinch Penny Pub — Sunday, hear the mellow jazz of Mercy. No cover.

T.J. McFly's — Thursday, the 60's rock and roll of Capt. Strobe; Friday and Saturday, Freewheelin'. No cover any night.

FILMS AND VIDEO

Thursday — "The Graduate," featuring Dustin Hoffman in the role that rocketed him to stardom, will show in the Student Center Auditorium at 7 and 9 p.m. for \$1. Hoffman's 1967 portrayal of the inexperienced graduate who returns home to affairs and jaded affluence combined with a score by Simon and Garfunkel to create a pop classic.

Thursday and Friday — "The Life of Brian" will show in the video lounge both nights at 7 p.m., admission \$1. The Monty Python troupe stars in this irreverent satire of the life of Jesus.

Friday and Saturday — "American Gigolo," starring Richard Gere, will play in the Student Center Auditorium at 7 and 9:15 p.m. for \$1.50. Gere plays the title character who,

while selling companionship and love, gets framed for murder.

Sunday — "The Clowns," Federico Fellini's allegorical look at the vanishing art of the circus clown, will show at 8 p.m. in the Student Center Auditorium for \$1.

SPECIAL EVENTS

Thursday — The KSDK Country 55 Road Show, featuring the Jimmy Queen Band, will perform the second free concert in the Sunset Concert Series at 8 p.m. at Lenus Turley Park in Carbondale. The concert is sponsored by the SIU-C Student Center, the Student Programming Council and the Carbondale Park District.

Thursday through Sunday — "The Male Animal," a comedy by James Thurber and Elliott Nugent, will be performed at 8 p.m. each night in the McLeod Theater in the Communications Building on the SIU-C campus. Admission is \$5 for the public and \$4 for students and senior citizens.

FRED'S

WHO IS FRED?

Fred was a coal miner who liked to dance and party on Saturday nights. But he also was a family man. He wanted to go someplace where he and his entire family could have fun... but didn't cost too much (in other words cheap). There were only so many weddings, Jacob Days, Street-fests, Avo & Sasser Homecomings to go to. The fraternal clubs were for members only. The Strip didn't play country music (real country music, the kind you can clap to), and if you're a drinking man the strip became too expensive. The only solution for Fred was to build his own place, where young and old could go to hear country music pure and simple, and bring their own coolers of beer to cut costs. In 1968, Fred built his dance barn and instantly became a part of the cultural tradition of Southern Illinois.

If you enjoy Southern Illinois, Giant City Park, The Pomona General Store, Little Grassy Lake, and Ma Hales...

Area prone to earthquakes, says SIU professor of geology

By Ginny Lee
Staff Writer

It started one mid-winter day when the ground began to shake and quiver—the beginning of a three-fold disaster.

The origin was Missouri's Bootheel, but the damage was spread across Southern Illinois and felt as far away as Cincinnati and Boston.

The disaster was the result of three of the most powerful earthquakes ever recorded—about 8.5 on the Richter scale. The first quake struck in December 1811 and the last in January 1812, so intensely that they "rang the churchbells in Boston," said Keith Sverdrup, SIU-C professor of geology.

Today, not much thought is given to the possibility of such disasters here, but the probability is not as slight as some may think.

Just 13 years ago an earthquake of magnitude 5.8 struck north of Harrisburg. It brought tremors to the SIU-C campus. In Carbondale, it caused some building damage, such as fallen chimneys and cracked walls, according to Hans Fischer, mayor of Carbondale and part-owner of Fischer-Stein Associates.

Although the area including the Bootheel of Missouri, Western Kentucky, Western Tennessee and Southern Illinois does not experience earthquakes as frequently and of the same magnitude as those experienced in California, the seismic conditions of this area are roughly the same as those on the West Coast, Sverdrup said.

"We definitely have smaller earthquakes all the time," he said. "Most of those are occurring down in the Bootheel of Missouri and are of relatively small magnitude—usually about three or less."

These quakes have virtually no impact on Carbondale or the Southern Illinois area, but, Sverdrup said, the potential for larger earthquakes is great.

Sverdrup, using the principle of "uniformitarianism," which states that what has happened in the past will definitely happen again, said the history of this area indicates that at some time in the future an earthquake of the same magnitude will occur.

But, knowing that a large earthquake is due and knowing when it is expected are two very different matters.

"The way to find out when it will occur is to record the earthquake cycles," Sverdrup said. "Fortunately, we've only seen the beginning of one cycle, but we don't really know for sure where we are in the cycle."

Many scientists have estimated the recurrence time for the earthquakes of 1811-12, coming up with a large variety of numbers.

"The one number that I've heard that sounds reasonable is that the recurrence time is on the order of 1,000 years," Sverdrup said. "So, if you asked if an earthquake that large is possible here within the next year, statistically, you'd say no. That doesn't mean that it's physically impossible for it to occur, but I wouldn't bet on it."

The area is prone to smaller quakes in the near future, said Sverdrup. Several major faults, breaks in the rock layers beneath the earth, run directly through Southern Illinois, Sverdrup said. These faults, which are a result of past earthquake activity in the area, indicate the possibility of future quakes.

One unique characteristic of Southern Illinois that makes the potential area of destruction much greater than in other quake-prone areas, is the large amount of sedimentary rock which sits upon the hard rock layers of the earth.

This type of soil construction is analogous to jello in a bowl. Any movement in the earth is spread over a much larger area, rather than stunted by hard rock, the geologist explained.

"This is one reason why the 1811-12 earthquakes rang churchbells in Boston," Sverdrup said. "If the same earthquake had occurred in California, the area over which it occurred would have been much smaller. That is why, potentially, a large earthquake may be more destructive here, depending upon the type of area in which it struck."

Consequently, if a large earthquake struck this area, damage to existing structures could be very great.

According to Fischer, whose company has recently been awarded a joint contract to study the seismic deficiencies of the Veterans Administration Medical Center in Marion, the Southern Illinois area has a lot of old buildings which would not stand up to a large earthquake

"If an earthquake got much over six on the scale," said Fischer, "you could really have some problems, particularly with some of the buildings over ten years old."

All new construction in Carbondale must meet the earthquake requirements of the National Building Code. Carbondale has been designated as a Zone 3 area which means that it must meet the highest requirements set for earthquake proofing, said Fischer. "That's the highest zone—the same as San Francisco," he said. "Those earthquake requirements have been added to the Carbondale code within the last ten years."

According to Jay Beckenbach, a project architect for Fischer-Stein Associates, buildings constructed in Zone 3 areas would have to be able to withstand a sideways force, much like the wind but with the pressure exerted coming from the ground, of about 25 percent of the building's weight, depending upon many variables of construction.

"It then becomes an engineering problem," he said. "You've got to make sure that the building does not bend too much when the pressure is exerted. The building has got to stay pretty much intact."

What this means in terms of actual construction is that a building in this area would be required to have greater detail at any place of connection, such as between a wall and the frame, so that the building would move as a unit, Beckenbach said.

"You also might have diagonal members hidden in the wall to make it more like a truss, or in concrete structures, there would usually be more steel," he said.

According to Fischer, it was not until 1968 that people in this area became more conscious of the possibility for major earthquake damage.

If an earthquake were to hit this area, Beckenbach advises that if you are inside a building, stay there, and if you are outside a building, do not go inside one.

"Most people who get injured in earthquakes are hit by falling pieces of buildings," he said. "Of course, if the building is collapsing, then all bets are off. You've got to get outside and hope."

Illinois judges get 30 percent pay hike July 1

SPRINGFIELD (AP) — Illinois' more than 800 judges are in line for a hefty pay raise July 1 — their first salary boost since 1973 — under legislation signed Wednesday by Gov. James R. Thompson.

"While judges serve out of a sense of duty and honor, we cannot expect them to make unreasonable financial sacrifices," Thompson said in a statement announcing the bill-signing.

The 30 percent salary increase will be made in two installments, half on July 1 and half in July 1983.

The measure received final legislative approval Tuesday when it passed the House 107-70. Opponents argued that while the raise may be merited, the times call for financial restraint in government salaries.

Some said the Legislature should not raise judges' pay while trying to force thousands of state employees to give back half the 8 percent pay raise due them July 1.

The budget approved in the Senate would provide a 4 percent pay raise for most of the state's 75,000 employees next January. The House, however, has been restoring the pay raise, negotiated by the American Federation of State, County and Municipal Employees.

Acknowledging the high price tag for the judges' pay raise — nearly \$7 million in the fiscal year starting July 1 — Thompson said he would meet with legislative leaders in the next few days to half the necessary

money "given our current budgetary condition."

The cost of the raises when they are fully in effect is estimated at nearly \$14 million a year, Thompson said.

Illinois' seven Supreme Court justices will receive a total increase of \$17,000, boosting their \$58,000 salaries to \$75,000 by July 1983.

Appeals court judges also would receive a \$17,000 hike, to \$70,000.

Trial court judges will earn an extra \$15,000 — raising circuit judges to \$65,500 and associate judges to \$60,000.

The measure was supported by the Illinois State Bar Association and by several sitting judges who lobbied in Springfield this session for passage of the measure.

Many of the arguments in both the House and Senate dealt with the need to avoid the loss of capable jurists seeking more lucrative jobs in private law practice.

Noting the pay for Illinois judges currently ranks below other major industrial states, Thompson said the judicial pay hike would signal "that we want to prevent our best judges from resigning from the bench."

"We must make sure that the salary we pay them, while not the same, is at least closer to what they could earn in private practice," Thompson said.

The pay raise was sponsored in the Senate by Democrat Arthur Berman and in the House by Republican Ronald Stearney, both of Chicago.

Rabid fox found in city limits; county urges pet vaccination

Owners of dogs and cats are being urged to have them vaccinated and area residents are being warned to be wary of strange behavior among animals, which could be a sign of rabies.

A positive case of rabies was recently found in a fox along Chataqua Street in Carbondale causing three horses and a cat and dog to be quarantined.

Charles Koehn, Jackson County rabies control ad-

ministrator, said it was the first time rabies had been found in an animal as large.

"We want people to be careful if they're out in the woods or on the lake and they see unnatural behavior," Koehn said. "We don't want people exposed."

He urged anyone noting unusual behavior among animals to contact Jackson County Animal Control at 684-2151.

ERA ratification fighters vow to pass amendment by 1989

WASHINGTON (AP) — Congressional supporters of the Equal Rights Amendment, all but conceding the impossibility of saving the measure before the clock runs out on June 30, vowed Wednesday to reintroduce an identical amendment early next month.

Rep. Patricia Schroeder, D-Colo., said a new ERA would be filed in both the House and Senate on July 12, the day Congress returns from its July 4th recess.

"We have decided another extension is inappropriate. This way we will have the full seven years to do it," she told the House.

She said she hopes to have 218

House sponsors on the measure by then.

In the Senate, a new ERA draft has already been circulated by Sens. Paul Tsongas, D-Mass., and Bob Packwood, R-Ore. It now has 38 co-sponsors.

The current amendment must be ratified by 38 states by June 30 to become a part of the U.S. Constitution. Thirty-five states have ratified it since its approval by Congress 10 years ago, but five have rescinded their approval.

On Monday, the Florida Senate rejected the ERA. That was followed by rejection in the Illinois House on Tuesday.

For the process to begin anew, a new amendment would

have to be approved by two-thirds votes in both House and Senate before it could be sent to the states for ratification. It would then have to be ratified by 38 states within the next seven years.

Given the current conservative makeup of Congress, especially of the Republican-controlled Senate, ERA supporters likely will have serious difficulty in getting another amendment passed.

But Tsongas, citing recent public opinion surveys, said, "The American people feel more strongly than ever that the ERA should become the 27th amendment to the Constitution."

Nesting boxes, wildlife group help save endangered owls

By University News Service

of the organization.

Members of the SIU-C Wildlife Society student chapter cooperated with the Illinois Department of Conservation officials in their efforts to supply area farmers with nesting boxes for barn owls.

The barn owl has become an endangered species in Illinois largely as the result of the gradual replacement of wooden barns, the owl's traditional nesting place, by tightly sealed metal buildings, according to Bill O'Leary, graduate student and member of the society.

Some 25 student members of the Wildlife Society built 16 nesting boxes as replacement for DOC boxes that had been loaned to Southern Illinois farmers. The farmers are placing the boxes in farm buildings in an effort to attract barn owls.

"The boxes were placed by farmers who are cooperating in helping us to monitor barn owl populations throughout the area," said Wildlife Society member Carol Christenson.

The barn owl was the Wildlife Society's special project in 1982, said Christenson, past president

A few months ago, several SIU-C students under the direction of Alan Woolf of the Cooperative Wildlife Research Laboratory helped acclimate a young barn owl to the wild in preparation for its release.

The barn owl had been raised by a New Haven couple after its nest and three other owlets were destroyed by grain-drying machinery. Before being released, the owl had to learn to fend for itself in a wild environment.

That's where the students got involved. They helped teach the owl the necessary survival skills by a process wildlife biologists call, "hacking out." Hacking out involved feeding mice to the owl in gradually decreasing quantities while the owl learned to find its own food, wild field mice, said O'Leary.

The barn owl used to be an important ally of farmers since it preys on rodents, but farmers' increasing reliance on pesticides for rodent control contributed to the barn owl's decline, he said.

Members of SIU-C chapter of the Wildlife Society recently completed a project to increase the population of the endangered barn owl in Southern Illinois.

Higher nuke plant fees may hike utility costs

SPRINGFIELD (AP) — Sharp increases in license fees for nuclear power plants were approved Wednesday by the Illinois Senate, but industry officials say consumers may foot the bill.

Senators voted 50-7 to approve the measure, which now goes back to the House for agreement on changes made by the Senate.

In April, Gov. James R. Thompson asked for the higher license fees. But the nuclear power industry, led by Commonwealth Edison Co., opposed the proposal. The industry says consumers will wind up paying the extra fees.

George Travers, Edison's lobbyist, had said the higher fees could cost its consumers \$2.6 million in 1982.

"The utility doesn't pay it. It's the utility customer, who pays it," Travers said when Thompson unveiled the proposal.

Edison has seven nuclear reactors at three plants: Zion, north of Waukegan; Dresden, at Morris about 60 miles southwest of Chicago, and at Cordova, about 15 miles north of Moline.

Sen. Adeline Geo-Karis, R-Zion, sponsor, argued the higher fees are needed because the state doesn't have enough money to provide adequate monitoring programs.

She said she sponsored the bill "to prevent the incident of a

Three-Mile Island in Illinois." She referred to the 1979 accident at a nuclear plant near Harrisburg, Pa.

Mrs. Geo-Karis said the extra money would pay for a monitoring system linking computers at each plant to central offices in Springfield.

"We will not have a proper monitoring system completed if we don't pass this bill," she said.

But Sen. John Nimrod, R-Glenview, said nuclear plant safety is sufficient in the state and the higher fees are unnecessary.

The measure calls for an increase of \$240,000 in start-up fees for each commercial nuclear reactor when it is licensed by the federal Nuclear Regulatory Commission. That would hike the fee to \$590,000 from \$350,000. Existing plants would pay the increase only.

Edison and Illinois Power Co., which is building a reactor at Clinton in central Illinois, are the state's only producers of nuclear-fueled electricity.

The bill also calls for a boost of \$105,000 — to \$180,000 — in atomic plant annual operating fees.

Fees to ship highly radioactive wastes away from the plant where they were produced also would go up under another of the bill's provisions.

Public must stay informed

Free press an 'evolutinary process'

By Dean Kirk
Staff Writer

Freedom of the press is a concept which is continually changing and it is important for citizens to be informed of those changes if democracy is to remain healthy and viable.

That message was delivered by Ralph E. McCoy, former dean of SIU-C library affairs and professor emeritus in journalism, in a speech Tuesday in Morris Library Auditorium.

"The First Amendment: Past, Present and Future" was the topic of the 1982 Howard Rusk Long Honor Lecture. Long directed SIU-C's School of Journalism from 1953 to 1973. "A democratic society would soon fail if its citizens were not sufficiently informed to pass judgment on matters affecting their lives," McCoy said before a crowd of about 80 people.

The First Amendment's wording, "Congress shall make no law abridging the freedom of speech or of the press," appears "clear and unequivocal," he said, but for nearly 200 years "the meaning of these words has been the subject of widespread debate in American society and deliberation in the courts."

"Our present understanding of freedom of the press," McCoy said, "is the result of an evolutionary process which, in

fact, is still taking place." He outlined that process, starting with the Sedition Act of 1798, which he referred to as the "first challenge to freedom of the press from Congress."

That was followed by the concept of the "bad tendency test," a carry-over from the English law of seditious libel. McCoy said, which eventually gave way to the "clear and present danger" test.

That test was first put forth by Justice Oliver Wendell Holmes in *Schenck vs. United States*, a World War I espionage case, in which he argued that press freedom could be abridged if information to be published would pose a "clear and present danger" to the safety of the republic and its citizens. The concept is still widely accepted, and indeed has been expanded and applied in a number of subsequent decisions and dissenting opinions, McCoy said.

He also discussed obscenity, pointing out that in the 1967 Supreme Court case *Roth vs. United States* the court ruled that obscenity was beyond First Amendment protection. This judgment still stands, he said.

McCoy said that an increase in libel judgments against the press and increasing monopoly of press ownership are two significant threats to press freedom in the United States. McCoy also expressed con-

PASSING ON INFORMATION—Looking grave, Honor Lecture in the Morris Library Auditorium Ralph E. McCoy speaks to a crowd of mostly Tuesday night journalism students for the Howard Rusk Long

cern over the concept of privacy, which can "either extend or limit the First Amendment, depending on your point of view."

"Greater concern with protecting an individual's right to privacy in recent years has been prompted not only by press invasion of personal lives, but by the growing probes of government agencies, and by

the insidious threat of the computer," he said. "In some instances," he said, "the right of privacy from media invasion has been supported by the courts."

Women end ERA fast; one still hospitalized

SPRINGFIELD, Ill. (AP) — Six women, failing to inspire passage of the Equal Rights Amendment as they had hoped, ended a 37-day fast Wednesday with a toast of champagne glasses filled with grape juice. "We have demonstrated that ordinary women can do extraordinary things," said Sonia Johnson, 46, leader of the group. "Perhaps we lost the battle, but we know we are going to win the war."

The group's seventh faster, Mary Ann Beall of Falls Church, Va., was in a hospital where she suffered a relapse in her recovery from a collapsed

lung. She also ended her fast. Mrs. Johnson said the fast sent "a message of courage" to women from the Illinois State Capital, and the toast ushered in "a new era for women."

"We have seen that we cannot work with men in our legislatures," said Mrs. Johnson of Sterling, Va., who was chiefly responsible for drawing the other six women to Illinois.

Ms. Beall, after her lung collapsed again while recovering from surgery after its first collapse, would remain "at least several more days" in the Springfield Community Hospital where she has been since June 18, said Connie Coker, a hospital spokeswoman.

"Because she was not getting the nutrition she needed, her lung did not heal," Ms. Coker said.

The women said they decided to quit the fast after Tuesday's defeat of the ERA by the Illinois House, which fell four votes shy of the 107 affirmative votes needed for approval.

McDougle elected to fire unit leadership

Larry McDougle

Dr. Larry G. McDougle, Director of the Division of Baccalaureate Studies in the School of Technical Careers at SIUC, has been elected to a one-year term on the Board of Directors for the National Fire Protection Association. (NFPA).

McDougle was elected at the opening session of the NFPA's 86th Annual Meeting and Fire Safety Exhibit held at the Moscone Convention Center May 17 in San Francisco, Cal.

"As a member of the board, I'll be involved in establishing the policies of the organization. The NFPA's primary function is to address the issue of fire protection in this country," McDougle said.

The NFPA was founded in 1896 and has about 32,000 members world-wide. It is an independent, not-for-profit center of technical and educational information on all phases of the fire problem. It develops and establishes the nation's fire codes and standards.

Two computer camps on tap for students

High school students, wanting an introduction to the computer age or to just brush up on the basics they might already know will have that opportunity through SIU-C's computer camps, sponsored by the Computer Science Department and Division of Continuing Education.

There is one session left for beginners, scheduled to take place Aug. 8-13, and one advanced session planned for Aug. 15-20. The first is designed for beginners who want an overview of what computers can and cannot do and will provide instruction in the BASIC programming language, individualized instruction and opportunities to work at computer terminals.

The advanced session will be for students from the beginner camps or who have had hands-on experience with computers.

Lowell Carmony, associate professor of mathematics and computer studies at Lake Forest College, will direct the camps.

Information on registration and lodging is available from Marie Malinauskas at 536-7751.

Computer facility at Faner Hall closing 12-8 a.m.

The Faner Hall computing facility will be closed during the third shift, from 12 a.m. to 8 a.m., beginning June 30, according to Charles Campbell, associate director of computing affairs.

Campbell said that a computer operator position had to be cut from the computing affairs budget and explained that "we would have to have the position filled in order to keep the facility open during the third shift."

He did not know when it would be possible to refill the position, which he said has been vacant for about three weeks.

The Faner facility, located at the south end of the building's first floor, is one of two computer facilities at SIU-C open for student access. The other is located in Wham and will remain open round-the-clock for telephone, or Conversational Monitoring System, access, Campbell said.

The Faner facility will remain open during the other two shifts, from 8 a.m. to 4 p.m., and 4 p.m. to 12 a.m., he said.

Winter took toll of nursery plants

Ornamental plants will probably cost more this year because the cold winter caused the number of container-grown nursery stock throughout the nation to shrink, horticultural experts say.

Leaves and stem damage to plants in nurseries was the main problem affecting this year's crop. Also, because the roots of nursery plants are grown in above-ground containers they were more susceptible to freezing temperatures.

Specialists in ornamental horticulture and plant physiology at SIU-C said that the rapid temperature changes in January and the extended cold through February and March were major factors in the decline of the number of plants.

McCann foregoes sightseeing to lobby for radio hours bill

By Dean Kirk
Staff Writer

Like many tourists, Matt McCann visited Washington D.C. last week. But sight-seeing wasn't his primary reason for going.

McCann, program director at WCIL, was in Washington June 16-19 lobbying for house bill HR-6306. If signed into law, this bill would allow approximately 2,500 day-time AM stations, like WCIL, to operate 24 hours daily, prohibiting the Federal Communications Commission from making them go off the air at sundown to protect the signals of "clear channel" stations.

A clear channel station, such as WLS and WGN in Chicago and KMOX in St. Louis, covers a large area of the United States at night. To prevent interference for clear channel stations, most of which are located in large cities, smaller stations must go off the air at sunset.

The bill is authored by Rep. Paul Findley, R-Ill., McCann said, and Rep. Paul Simon, D-

Ill. will support and co-sponsor it if an amendment to the bill is passed requiring a live operator to be at the station at night.

This requirement is already law, McCann said, but Simon wants to make sure that stations affected by the proposed bill will not become totally automated.

McCann feels "there will be much more support for this bill" if the amendment accompanies it.

The first step in passing the bill is having it added to the agenda of the U.S. House of Representative's telecommunication subcommittee. Simon's support will give the bill a better chance of being added, McCann said.

If the subcommittee votes favorably for the bill, it will go through the legislative process, starting on the House floor and moving to the Senate if passed by the House. The last step is the White House where President Reagan will decide whether he will sign it into law.

Along with Simon and Findley's involvement in the bill's

passage are aids to Vice President George Bush, McCann said. These aids, he said, will lobby for the bill, which will benefit the farmers.

Many stations provide farmers with "much needed farm

news" McCann said, adding that "many of these stations are day-time only." "This means the times when this material is broadcast every month change because of different sign-on and sign-off times."

Stern pledges renewed effort to promote ERA

Grace Mary Stern, Democratic candidate for lieutenant governor, saying that "justice would be done," told about 50 Democrats Tuesday in Pinckneyville that Adlai Stevenson planned to ask Congress to start the whole ERA ratification process over again July 1 if the amendment doesn't pass by its June 30 deadline.

Stern said a very simple statement of equality had brought fear to people who didn't really understand it.

She also defended the position of lieutenant governor, which she is seeking running on a slate with Stevenson, as an important one in Illinois despite attacks made by former Lieutenant Governor Dave O'Neal.

The position has merit in Illinois, especially for the Illinois coal industry, according to Stern.

O'Neal resigned from the

position during Governor James Thompson's present term saying that it had little substance.

But Stern said the lieutenant governor served as chairperson of the Abandoned Mined Lands Reclamation Council, acting as a public relations spokesperson for the coal industry in Illinois, and as chairperson of the Technical Advisory Committee on Aging.

Stern said if O'Neal "thought there was nothing to do, he hadn't read the statutes."

She criticized O'Neal for not doing his job, saying there were about 3,400 unemployed miners in Illinois because coal from Western states has been favored over high-sulfur Illinois coal.

There are ways to remove the sulfur, she said, and the lieutenant governor must look into them.

STC study by Koreans concludes

By University News Service

Finding variety an important characteristic of American technical education, 45 Korean professors recently finished a four-month study of SIU-C's School of Technical Careers.

Participants in a four-year \$38 million Korean government-sponsored program aimed at restructuring the nation's two-year technical colleges, the professors spent several weeks sitting in on STC classes and visiting colleges and universities in the Midwest.

"Other groups will be going to West Germany, England and Japan to study their educational systems," said Hong Min Lee,

an electronics technology professor. "Then we will take the best parts of each and incorporate them into our own program."

Lee said he was impressed most by the cooperation he observed between American technical schools and industry.

"This cooperation appears to be something that benefits everyone involved—the industries, school and students," he said. "It is a system that we can exploit to our advantage."

The Korean government hopes to pattern its two-year

school after four-year programs such as at SIU-C in an effort to keep pace with rapid industrialization and change.

"Many people we encountered here in the United States are surprised to learn that Korea has undergone such rapid change and industrialization," Lee said. "We have nuclear energy, highly competitive electronics and computer terminal industries and a rapidly developing solar materials industry."

Korean and STC officials are discussing the possibility of other groups studying at SIU-C, according to STC project director Wangshik Shin.

'Atomic veteran' hunts others exposed to radiation dangers

By Bob Delaney
Staff Writer

The World War II veteran was a hero in most people's eyes. He turned the tide of war in Europe and returned to national acclaim and ticker tape parades.

But Joseph Cavins thinks the American government is turning its back on some World War II veterans for whom images of ticker tape parades have been replaced by nightmares of suffering.

Cavins is area coordinator for the National Association of Atomic Veterans, a group claiming that an estimated 250,000 veterans are suffering from incurable diseases because they were exposed to radiation during atomic bomb testing.

Cavins, scheduled to speak Thursday at 7 p.m. in Lawson Hall, said that NAAV has embarked on the "largest manhunt in American history." It is looking for veterans exposed during atomic bomb testing conducted by the U.S. government in the 1950s and 1960s.

NAAV estimates between

10,000 and 12,000 of the veterans now live in Illinois. Cavins has played an active role in the local search. He has found 22 "witnesses" of bomb testing who now reside in Southern Illinois.

According to Cavins, 50 percent of the 22 have had cancer-related operations, are blind, have skin diseases or have died.

He counts himself on the list. He witnessed three tests and now suffers from an incurable skin disease for which he takes hydrocortisone to alleviate the pain.

Nonetheless, "it itches so bad that I'd like to rub against that wall. Sometimes I do it till I bleed."

Cavins said college students often don't realize that their parents may have been exposed to the testing.

"I was speaking to college students once and got no further than one or two sentences when one kid stopped me and said his father had witnessed some bomb testing," he said.

The Defense Nuclear Agency will not admit that exposure to radiation during testing is responsible for these illnesses,

Cavins said. NAAV is lobbying the federal government to have these diseases re-classified as service-related although they happened during peacetime.

"The government doesn't want to admit they made a mistake," Cavins said. "We are their mistake. We're a timebomb ticking away. One day it's going to go off."

Perry Murry, coordinator of Veterans Affairs at SIU-C, said there are some similarities between NAAV's problem and that of Vietnam veterans who claim exposure to Agent Orange has caused problems which the government will not take responsibility for.

"It does make you stop and think," said Murry. "Why would this group seem to have a higher rate of cancer?"

If the government were to admit responsibility, it would be opening itself up to lawsuits, Murry said.

But Cavins said the government has turned its back on its own while at the same time aiding Japanese and natives of South Pacific islands exposed to radiation.

A POTLUCK sponsored by the Gay and Lesbian People's Union has been cancelled for tonight.

THE CARBONDALE Women's Center is having a party for volunteers Thursday at 4:30 p.m. Bluegrass music will be provided and refreshments will be served. Those interested can call 529-2324 for information.

JOSEPH CAVINS area coordinator for the National Association of Atomic Veterans, will speak at 7 p.m. Thursday in Room 141, Lawson Hall. The speech is part of NAAV's nationwide effort to locate veterans who were exposed to atomic radiation during testing from the mid-1940s to the early 1960s.

DAVID P. FAURI, director of SIU-C's Division of Social and Community Services, has been elected to the board of directors of

the Council on Social Work Education. He will serve a three-year term, starting July 1.

SIU-C'S BETA Zeta chapter of the Pi Omega Pi national business teacher education honor society has been ranked ninth in the top 10 chapters in the country by the organization. It is the fifth year in a row the SIU-C chapter has been ranked in the top 10.

BRIEF'S POLICY

The deadline for items for Campus Briefs is noon two days before publication. The items must include time, date, place and sponsor of the event and the name and telephone number of the person submitting the item. Items should be delivered or mailed to the Daily Egyptian newsroom, Communications Building, Room 1247. A brief will be published only once and only as space allows.

Hill's tankers learn fast isn't enough

By Jackie Rodgers
Staff Writer

The man could sell an Eskimo an ice cream cone in the middle of a blizzard.

Tim Hill, in his two years as head coach, has taken the women's swimming team up the ladder of national prominence. In his first year, Hill's team posted a 5-2 dual meet record and placed 16th at the Association of Intercollegiate Athletics for Women Championships. Last year, the tankers were 7-1 in dual meets, finished second in the National Independents and third at the AIAW Championships. With the wealth of talent recruited for next season, the sky's the limit.

It's not hard to see Hill as the reason for this success. He has recruited All-Americans Pam Ratcliffe, Barb Larson, Amanda Martin, and Janie Coontz. He has instilled team camaraderie in a sport that is usually considered one for individuals. He has made believers out of swimmers who lacked confidence, and those that scorned SIU-C as a women's swimming power, all in two years.

Where does this enthusiasm come from?

"I love what I am doing," explained the 34 year-old coach. "I love people, and I love people who have enthusiasm and want to improve themselves. A lot of coaches are satisfied with a swimmer who has fast times. I want a swimmer with fast times who wants to improve."

Hill came to SIU-C after a successful three-year stint as a club coach in Joliet, where he developed qualifiers for the 1980 Olympics. Prior to that he coached a club team in Sarasota, Fla., for seven years. He first began coaching while attending George Williams College in Downers Grove.

He decided to come to SIU-C to fulfill a dream: coaching at

the Division I college level. He also came to Carbondale because he is a man who likes challenges, and building a nationally-recognized swim program in a location that is not advantageous for recruiting swimmers seemed to be a hefty challenge.

"I figured that having a good men's program would help with our recruiting," Hill explained. "Also, women's athletics at SIU-C has a history of success, and the facilities here are very good."

Although he loves to coach, Hill said he believes more in developing a good person. His team stays away from the water in September and discusses team goals and purposes. From the 30 or so ideas that surface, five of them are turned into team goals, he said. The swimmers get to know each other, and learn how to support each other in a team atmosphere, Hill said, and to forego individual goals. He explained this is important for a group of women who will be spending a large portion of the next six months together.

"I am more satisfied if a person comes to SIU-C, gets all C's, swims fair, but learns more about herself as a person. That's an accomplishment," Hill said.

Hill said he does his thinking while distance running, back packing or mountain climbing. He also strives for self-improvement, hoping to post better times in distance running than he did in college, he said. He said he was once trapped on a mountain with assistant coach Brian Laraway with only one day's supply of food, but did not get discouraged, and rationed the food to last the three days it took to get down.

Hill said he believes that honesty, in its subtle form, is indeed the best policy. He uses

Staff Photo by Donald L. Marquis

"I love people who have enthusiasm and want to improve themselves," says Tim Hill.

it when coaching his swimmers, and when talking about his future.

"No, we haven't gone as far as we can with this program," he said, adding that it usually takes three years to evaluate progress. He also said next year, his third at SIU-C, will be the best, with the team goal being to place in the top five at the NCAA Championship.

He is honest when talking about the chances SIU-C has to capture the national championship.

"Realistically, I can say it is very slim that the swimming program will ever win the

Nationals," Hill said. "We don't have the drawing power that, say, Stanford, Florida State, or any Sun Belt school does. We also don't have the budget. I'm not saying that you can buy a national championship, but having money sure doesn't hurt."

Hill also admits that he will take any better coaching offer that may come his way. He pointed out that he would accept a position at a school like Stanford, where he could build a team that would have a chance at capturing the NCAA's. He also said he would not have to think twice about accepting a position at a school like Texas, where the pay stops somewhere

short of the sky.

In the meantime, and for at least a few more years, Tim Hill will continue to put top teams in the water for SIU-C. He will continue to travel non-stop, searching out recruits in every dark, dingy pool. He will try to better his swimmers as people, bestowing philosophies, honesty and trust upon the ears of his athletes. And he will strive to put a championship team in the water, knowing the odds are against that possibility, but accepting the challenge anyway.

"Any time someone tells me I can't, that only gives me an extra incentive to prove them wrong," said Hill.

Only 4 sign up; girls' softball camp cancelled

By Gene Stahlman
Staff Writer

The girls' softball camp scheduled for June 27-30 at SIU-C has been cancelled, according to Andrew H. Marcec of the Division of Continuing Education at SIU-C.

There were only four girls signed up for the camp which was not nearly enough to go on with it, Marcec said.

Marcec believes there were a number of reasons for the poor registration.

Marcec explained that this was the first attempt at organizing a softball camp, and there was a late start on distributing information. There was state-wide coverage but promotional material didn't start until May. In contrast, news of the SIU-C baseball camp was sent out in January, he said.

Marcec also said that there

are still not as many girl softball players as boy baseball players. The target audience could be as much as 75 percent smaller, he said.

Another reason for large baseball camp turnout is the presence of a nationally known coach such as "Itchy" Jones. The girls' camp had some talented instructors, including SIU-C softball Coach Kay Brechtelsbauer, George Jones, former pitching coach for the St. Louis Hummers professional softball team, and Herrin High School softball Coach Bruce Jilek. None of them are as well known as "Itchy" though, he said.

Marcec admitted this year was a learning experience. "We will definitely try again next year," he said. "I have quite a few ideas which, I believe will make next year's camp a success."

Mlini cage recruit's grades under par

CHICAGO (AP) — An all-state basketball player from Chicago's Crane High School is ineligible for a scholarship at the University of Illinois because of alleged irregularities in his transcript, a high school official says.

Basketball player Ken Colliers had signed a national letter of intent to attend Illinois and was graduated from Crane on Saturday night, but Crane

Principal Donald Collins said Tuesday that Colliers' grades do not qualify him for a scholarship.

Collins said Colliers' grade point average is 1.756, not the 2.0 (out of a possible 4.0) required to qualify for a scholarship.

The Chicago Sun-Times reported irregularities in Colliers' academic career at Crane.

Steele sets sights on Swedish recruits

By Gene Stahlman
Staff Writer

SIU-C men's swimming Coach Bob Steele and men's diving Coach Denny Golden are looking forward to successful seasons next year despite the loss of some key personnel.

Steele lost six swimmers, three through graduation, two transferred, and one was declared academically ineligible.

The hardest blow to the team will be the loss of All-American Roger VonJouanne. VonJouanne, whose specialties were the butterfly, the backstroke and the individual medley, holds school records in the 100-meter backstroke, 200-meter IM, 400-meter IM, and the 100 and 200-meter butterfly.

Also graduated are breaststrokes Anders Norling and Mark Pollard. Transferring to other schools were breaststroker Tom Robl, who went to Virginia Tech University, and Kipp Dye, freshman record holder in the 200-meter freestyle, who has transferred to the University of California at Berkeley. Freestyler Robert Drag has been declared ineligible, according to Steele.

"We have some good swimmers returning," said Steele, "but we have to figure out how to replace the 33 points Roger gave us."

Steele said the Salukis have some real flyers on the medley relay teams in returnees Doug Rusk, Jim Griffith and Springfield Junior College transfer Rich Suhs. Steele also believes that freestyler Keith Armstrong will be a key to the Saluki's success, especially at the NCAA championships.

Steele said he had gotten commitments from two Swedish swimmers to attend SIU-C but is waiting to see if they meet admission standards. One is a distance freestyler who has times comparable to SIU-C school records, said Steele. The second is a middle distance freestyler.

Steele is still looking at some international level swimmers, and should know sometime in the near future how many of them will attend SIU-C.

Six members of last year's squad have been training with Steele for international competition this summer.

Four of the six, VonJouanne, Suhs, Phil Wittry, and John Fischer are trying to make the world championship team which will travel to Ecuador in July. Keith Armstrong plans to swim in the South African championships, and Carlos Henao, has made the Columbia team for the world championships.

The six will be competing in a number of meets in hopes of

getting in shape for the world championships. The first of these meets will take place this weekend.

Golden, who also coaches the women's diving team, has lost only one member of last year's squad.

Golden said the team has lost George Greenleaf through graduation, but has three strong returnees in Johnny Consermiu, Jim Watson and Thomas Wentland.

Golden said he has been looking for a replacement for Greenleaf, but has not found anyone who measures up to his three returning lettermen.

"I would rather just go with these three, who are all excellent divers, than bring in someone of mediocre talent just to have a four man squad," Golden said.

Golden will be touring Europe this summer as a coach of a U.S. team, and said he would keep his eyes open for any talent over there.

The three divers are working out at the Recreation Center with Golden for upcoming competitions this summer. In addition, former SIU-C All-American, Rick Theobald, is working out with the team.

Theobald, who is a grad student and still represents SIU-C, has already qualified to compete in the Olympic trials.
