Escaped convict hired as policeman

By Jim McGrory Staff Writer

The question of how an escaped convict from Tennessee could be hired as a part-time police officer in Dixon, about 20 miles north of Carbondale, has led to a bitterly debated controversy which has been the subject of open conflict drawing opposite conclusions about its main characters, Nellis and Nicholson.

According to people who worked with Nicholson at his jobs as volunteer radio dispatcher and as a police officer in Dixon, he was a very civic-minded, "fair worker, very civil-minded." He was always well dressed, always told the truth, and did his job well.

Nicholson worked in Grand Teton National Park from late December, 1978 through mid-February, 1979 as a park game officer and Tower Police Chief Jerome Nellis, who described Nicholson as a "fine worker, very civic-minded." His performance was excellent.

"His performance was excellent," Nellis said. "He did his job right. I have never seen him do anything wrong."

Nicholson was hired as a police officer in Dixon two weeks ago through the Comprehensive Employment and Training Act. He was the only officer in Dixon with full-time employment, and was assigned to do "all the work and no pay."

Nicholson's fortunes took a turn for the worse in November when he was arrested for writing checks he could not cover, according to Dixon County Sheriff's Police Department.

Nellis was tried and convicted at least three times for writing checks he could not cover, according to Dixon County Sheriff's Police Department. He was ordered to write a bad check and given a sentence of 30 days in jail which was suspended, according to sheriff's police.

Dixon County Deputy Jerry Williams said his office would provide the most current figures of wanted people brought to court.

"He's done a great job for us," Williams said. "I believe that everyone in the community is satisfied with him."

Nellis, who celebrated his 24th birthday in the Jackson County Jail in Murphysboro last week, did not waive extradition when he appeared before U.S. Magistrate Judge Jerry Williams Wednesday. His bond was set at $3,560, which means he will be temporarily released and pay $300 in bail.

Dixon County sheriff's police said if Nicholson did not waive extradition, they will begin extradition proceedings against him.

"Nicholson did not waive extradition, an agreement will have to be struck," By Bill Crowe Staff Writer

Unpaid traffic fines may come out of faculty's pay

By Bill Crowe Staff Writer

A motion to deduct fines for parking and traffic violations out of faculty and staff paychecks is currently being discussed by the Faculty Senate.

Brown said a "motion to deduct unpaid traffic fines may come out of the 13 plaintiffs' paychecks. Actual damages of $1,000 per plaintiff and $50,000 in punitive damages were also requested."

"If the University had a policy on parking regulations it was so vague and indefinite that it could not be enforced," said Board of Trustees appealed the decision, but Fifth District Appellate Court upheld the lower court's decision.

In his formal opinion, the judge, Eberspacher said SEE "had no right under contract or statute or its regulations to deduct from faculty and staff salaries claimed due to the University for parking violations."

Eberspacher said SEE in fines were returned to the 13 plaintiffs. No other damages were awarded.

The Board of Trustees has formally approved the system of deducting fines from paychecks since the court ruling. A hearing officer and a hearing board are available to any student, faculty or staff member who would like to appeal before they pay their tickets.

Donow said he is sure another suit will be filed if the University decides to do so.

July set as date to select chancellor

By Jim McGrory Staff Writer

The Chancellor Search Assistance Committee met for the first time Wednesday in the Student Center, with the task of determining the council's commitment to affirmative action and open deliberations.

"As of Aug. 1, 1978, students owed $700,000 on unpaid traffic and parking fines, according to Dougherty. There are currently 21,467 graduate and undergraduate students.

A bursar's hold, which places a lock on students' records and further registration, is filed on students when they do not pay parking and traffic fines.

"I have no idea what has happened to the checks," said Bob Brown, assistant chief of parking and traffic.

"If the University had a policy on parking regulations it was so vague and indefinite that it could not be enforced," said Board of Trustees appealed the decision, but Fifth District Appellate Court upheld the lower court's decision.

In his formal opinion, the judge, Eberspacher said SEE "had no right under contract or statute or its regulations to deduct from faculty and staff salaries claimed due to the University for parking violations."

Eberspacher said SEE in fines were returned to the 13 plaintiffs. No other damages were awarded.

The Board of Trustees has formally approved the system of deducting fines from paychecks since the court ruling. A hearing officer and a hearing board are available to any student, faculty or staff member who would like to appeal before they pay their tickets.

Donow said he is sure another suit will be filed if the University decides to do so.
Officials warn blackouts could happen more often

By Ray Robinson
Staff Writer

A major power failure that hit the SIU campus last week have University officials concerned such incidents are occurring more and more frequently in the future.

Dougerty, vice president for campus services, said the Physical Plant has requested money on several occasions to replace power lines and modernize the campus electrical system, but the money has never been available.

Dougerty said last week's three power failures were an indication that SIU's massive underground power system is getting old, and the money to modernize it is urgently needed.

The first blackout occurred early Tuesday afternoon, when lightning struck a Physical Plant feeder line. Thompson Point, the Agriculture Building and Small Group Housing were without power until late Wednesday night.

A second blackout occurred the afternoon of March 4 and it affected much of the southern part of the campus. Power was restored and then failed again shortly after midday. Skills are still on emergency generators, according to Thomas Engram, superintendent of utilities.

The third blackout occurred Saturday afternoon and Dougerty said it was the most massive of the three, affecting 70 percent of the campus.

Dougerty said all of the blackouts were the result of faults in the underground cable, but the faults are unknown.

Dougerty said the switching that caused the first blackout may also be responsible for the others. But he added that damper grills on the feeder lines to the building insulation of the power lines could also be responsible for the power failures.

Engram said the cause of the blackouts may never be known because of the great amount of burning and melting that takes place on the line when a blackout occurs. He said the third blackout had so damaged the line just north of Dougerty that repalcing it would have been too costly to get it up and out of the ground and they may have to dig there.

He said there is no way to know if the blackouts were related.

"It could just be a coincidence," Engram said.

When it rains, it pours. Engram said SIU has one of the largest underground electrical systems in the nation, one that is very complex. Dougerty said he hoped last week's three blackouts would point out the need for improvement and modernization of the system.

There is no accurate estimate of what the three blackouts cost the University to repair, according to Dougerty. He said the contractor's bill for the first blackout alone was $8,000, which doesn't include the labor of the Physical Plant employees—many of whom worked around the clock.

There is no estimate yet of the damage to buildings in Small Group Housing and Thompson Point. Dougerty said, the people who made the estimates are the same ones who are trying to restore power after the blackouts.

The first blackout cut power to the buildings by pumping groundwater to the basements. The loss of electric heat caused a damaging buildup of humidity in the buildings.

Dougerty said he expects the final damage and repair bill to be a "rough blow" to the Physical Plant.

Stronger weather brings auto burglars out in force

By Bill Thordahl
Staff Writer

Although the official date for the beginning of spring is still 13 days away, the Carbondale police believe the recent warm weather is responsible for a rash of automobile break-ins.

Four automobile break-ins were reported to the Carbondale Police Department. Two automobiles were broken into in the 600 block of West Freeman Street. One automobile was broken into in the 300 block of east Main Street just before lunch Tuesday. The fourth automobile was broken into in the 100 block of west Main Street, just two days before. Dougerty said the criminals appeared to be after the radios.

L. Terry Murphy of the Carbondale police said reports of auto break-ins had decreased during the bad weather but are beginning to pick up now that the weather is getting warmer.

"Thefts don't like to work when the weather is cold, so evidently crimes such as auto burglaries have a tendency to increase in warmer weather," he said.

Thomas Dillon, junior in secondary education, reported Wednesday that someone broke into the Jeep CJ-5 that he was using in the student parking lot. Dillon told police a citizen's band radio control, two packs of cigarettes, a check, and a car stereo were taken. The break-in occurred sometime Tuesday night. Dillon said the approximate value of the items taken was $125.

A CB radio and a stereo radio was also stolen Tuesday night from a car owned by Patrick Murphy, junior in industrial technology. Police said someone pried open a vent window to gain entry to Murphy's car. Murphy said the approximate loss is valued at $220.

A third vehicle, owned by Rodney C. Smith, junior in journalism, was entered and a stereo radio, valued at $120 was stolen. Police said someone had pried open the dashboard and some sort of tool in order to steal the radio.

David Glasser, 220 W. Freeman St., reported someone had pried open the glove compartment of his car. Glasser said he had been talking on the radio in his car vehicle sometime Tuesday night. Dillon said the approximate value of the items taken was $61.

The SIU board will discuss the revisions to the board's bylaws and statutes which were approved by the board Feb. 8.

The board will also discuss a possible reorganization of the board and a possible increase in the amount of funds available to make recommendations to the University Statutes. The board will consider the possibility of increasing the amount of funds available to make recommendations to the University Statutes.

Fines may be taken from paychecks

(Continued from Page 1)

enforce the paycheck deduction system. He added that the board and hearing officers do not constitute due process, but if such a system were to be made a court of law before faculty and staff are forced to pay the fines, he said "it would be a joke."

Donow commented, "The University has no authority to act as police and judge.

Search council nominees, bond fee await board OK

By Donna Kunkel
Staff Writer

Approval of the nominees to the Champaign County Assistance Council will be the first item of the two Board of Trustees meetings Thursday.

During the second session, the Board will make final decisions on the implementation of the bond retirement for which it approved an additional $345,000.

The board will also discuss a possible tuition increase and the amending of board by-laws and statutes to make them consistent with the new governance system.

The Search Council, chaired by Keith Sanders, professor of speech, met for the first time Wednesday. The council will make recommendations to the board for a search for an associate vice president of the SIU system. Harris Rowe, chairman of the board said earlier that a chancellor should be named by July 1.

James Brown, former general secretary of the board, was named acting chancellor at the February board meeting.

The bond retirement fee would replace a portion of retained tuition which is no longer available to SUIU because of the Illinois Board of Higher Education's budget restrictions. The fee was first introduced at the December board meeting. At that time, the University requested $19.80 per semester, but an additional $6.50 was requested at the February meeting to compensate for further reductions recommended by the IBHE for fiscal year 1979.

The total amount collected by the fee would be distributed to the Student Center and University Housing. If the fee is passed, the Student Center would receive a $12 portion of the fee and housing would receive $45.40. However, the proposed fee would be accompanied by a $5 reduction in the Student Center fee.

The Graduate Council, composed of graduate faculty members, the Graduate Student Council and Student Government have all passed resolutions against the bond retirement fee.

In January, the IBHE recommended tuition be increased by $46 per semester for undergraduates and $52 for graduate students. The SIU board will discuss whether or not to raise tuition for 1979-1980. SIU's appropriation bill for fiscal year 1980 may include a tuition increase which should be introduced to the legislature sometime in March.

The discussion concerning the revisions of the board's bylaws and statutes will deal with changing the documents so they correctly describe the organization's procedures and functions of the new governance system which was approved by the board Feb. 8.

The board will be one member short. Margaret Blackshear, former secretary to the board, was not reappointed by Gov. James Thompson earlier this week. Her replacement, Dr. David Rendellman, a Carbondale surgeon, will be unable to attend because he will be in surgery.

Oral excursion

City to receive funding for new depot

By Ed Lempen

City officials announced Wednesday that Carbondale has received funding automatically allocated to the city to help pay for an Administration for more than $1 million for a new passenger depot from the project of the railroad relocation process. The funds totaling $1,061,632 will be used to purchase land, build a depot, purchase the passenger depot, and for the purchase of the Illinois DOT construction that will be delayed in the process. Plans call for construction of the depot on land between Elm and Cherry streets on the east side of Illinois Avenue.

At the February meeting of the Illinois DOT, E. B. Norton, director of the Railroad Relocation Demonstration Project, said that the Illinois DOT will give approval virtually guarantees that funds will be used for actual construction of the depot.

In the past, the FHA has been able to make a determination on whether funds will be approved, and the City to receive funding for construction.

Lot 106 attracts break-ins

By Bill Theobald

Frightened of finding a place to park, there are other parking problems on campus. Parking in Lot 106, south of Brush Tower, is a problem, according to University police. University police are not only parking problems on campus, but it is also saying that police cannot be on duty all the time.

In the past two weeks there have been seven reported auto break-ins in Lot 106. All the break-ins occurred at night when only one or five to six University patrol officers are on duty. According to Norton, the only way the University police can help control the problem is to increase the number of officers on duty in the evening hours so that the police officers have the responsibility of being on duty all the time, as well as fulfilling their other duties.

One way the police are trying to concentrate on parking enforcement, they are using a ticket that will give them a choice to do more crime prevention, Patrol Officer Norton said. "We have routine patrols on the east side of campus but if an officer gets tied up with other calls like a traffic accident, the reports or parking violations, then he may not have time to present them." The tickets will be new position

Chancellor Search Committee meets, sets target date to fill new position

The committee—composed of four-member sub-committees—was tasked with creating a set of rules, and procedures which will be presented to the council when it meets again, in order to vote on the new position.

The appointment of four-member sub-committees is a part of the Illinois University chancellor search process. The committee has been working toward the goal of selecting a chancellor and has met several times in the past month to discuss the position of chancellor. But he said he did not expect the chancellor search to be a "walk in the park".

The chancellor search committee plans to have 25 finalists in the position of chancellor. The chancellor search committee is a part of the chancellor search process, and has held several meetings in the past month to discuss the position of chancellor.

Weather

Thursday's forecast is calling for highs in the mid to upper 30s under cloudy skies. The mercury is expected to drop around 10 degrees overnight with cloudy skies continuing and a chance of rain. Probability of precipitation is 40 percent.

Carter depending on Middle East trip

WASHINGTON (AP) - President Carter was pursuing a Middle East trip Thursday seeking a "breakthrough" to improve relations between the Arabs and Israel, and driving him to the Middle East this week on what appears to be a political risk.

It is not so risky, however, if the basic framework for the negotiations has already been struck with Israeli Prime Minister Menahem Begin and Egyptian President Anwar Sadat over the telephone, and is being kept under "very tight wraps." Carter's trip is seen as a last-ditch effort to improve the prospects for Middle East peace, and to pressure Israel and Egypt to sign a peace treaty.

That would seem a remote possibility. After all, the current peace talks proposals probably stack up to a real breakthrough, but do not spell out an "Egyptian-Israeli treaty" worth

The study found that a person's attitude toward what is masculine or feminine dictates the career major they chose. Harren said.

The findings are significant of those attitudes of what is "normal" for men and women.

Harren added.

The information obtained from "Check lots" on the implementation of a career counseling program, Harren said. Students would be encouraged to participate in a career counseling program, and Harren said.

Carter's track record shows a gap.

He brought Begin and Sadat to Camp David last year, and he is staying in this time, but the sessions are not scheduled to be a "dinner or a breakfast," Harren said.

Narcotic drugs taken from locker

Carbondale police are investigating the robbery of a student from Carbondale Memorial Hospital, 404 W. Main St., which occurred early Thursday morning.

The student was the incident was not reported to them until Tuesday.

Daily Egyptian. March 8, 1979
Memories of the WTA

While the University is to be commended for filling the void left by the passing of the Women's Transit Authority, it is quickly finding out that the sea is filled with hazards no matter who the captain of the ship is. The icing on the cake is the University is trying hardest to avoid is the problem created by piecemeal funding. The Women's Transit Authority is the same problem-a few thousand here, a few thousand there-scraping for survival when that funding was depleted.

When funding for the WTA finally ran out for good, the University stepped in with the Women's Interim Nighttime Transit. The program was initially funded with $8,000 from the office of Bruce Swinburne, vice president for student affairs. No student was able to make his money in this budget for continued funding of the program. Clarence "Doc" Daugherty, president for campus affairs, also said there is no money in his budget for funding.

So, to keep up the transit service, Swinburne has suggested what has almost come to be regarded as a cure-all—a new student fee. The suggested fee would be $50 cents per semester and would generate in excess of $20,000 for the University to operate the women's transit service.

There are several questions that have to be asked before such a fee is considered. For instance, is there absolutely no other source of funds in the budget which could be diverted for the transit service? It seems that administrators have no problem coming up with $8,000 when the chips are down, but hedge on making any long-term reallocations.

But what is even more striking is the fact that Rendleman is a faculty member-albeit in an unpaid voluntary position. Was it not evident to the governor that a member of the medical school faculty is more likely to be faced with the difficult task of avoiding a conflict of interest, than was Blackshear in her position as WTA's vice president? It is from his own position with the medical school, Rendleman will not have severed his friendships.

Dr. Rendleman has already been quoted as saying he hopes to use his background in medicine "to continue to develop the medical school into a fine school." His intentions are noble, but as one constituency head at SIU-C recently remarked, "If there's one school in this University that doesn't need any help, it's the School of Medicine."

Before Rendleman's appointment is made official, the Illinois Senate must grant its approval. Normally, that process would be merely a rubber stamp. But lawmakers in the Senate need to take a careful look at the appointment to determine whether he will serve the University community better than Blackshear, and if, indeed, the possibility of conflict of interest will be greater with Rendleman on the board.

Also, the University should ask whether or not the increased service provided by the WTA justifies the increased cost when compared with the WTA. The WTA operated on an annual budget of $12,000, while the University needs almost twice that amount. Does that mean the program will provide twice as much service?

If the administration and constituency groups feel the answers to these questions are satisfactory, then a fee should be defined and passed. However, the argument can be made that almost half the student population—men—will be unable to use the service provided by the fee. Also, there is probably a large portion of the female student body that wouldn't use the service, either.

But in this case, the importance of providing a safe campus and educational environment doesn't depend on the number of students whose safety would be impaired. As for men who would be unable to use the service, there is the argument that equality, or in this case security, for women is equally liberating for men.

It seems the best solution would be to make the fee refundable. That way, any students who did not feel served by the transit program could get their money back. It is also likely that most students would not bother to get a refund, so the service would still be adequately funded.

The University can then add on another student fee, but students won't be able to claim that they are being taken to the cleaners since the fee will be refundable. In other words, the University will be able to have its transit service and run it too.
STC ‘Tooth Fairies’ find new home

Dental Hygiene students of the School of Technical Careers are finally settling into the new facility across from the Arena. The STC wing of the Technical building cost approximately $7 million and was two years in the making.

Better facilities and more room are some of the welcomed improvements, according to students. The on-campus location is also a big advantage for the students who traveled 10 miles to the school’s previous location at Carterville.

The location has provided the students with more patients and fewer cancellation problems. Dental students used to be idle for an hour if a patient missed the bus or had car trouble. Now the dental hygiene students simply call numbers on a cancellation list because patients do not have the half-hour drive.

Students and local residents may have their teeth cleaned free of charge by dental hygiene students. This service also includes a check for possible disorders prior to the cleaning. There is a Student Emergency Dental Service that is offered only to students because it is funded through student medical fees.

Students and local residents have been quick to respond to the new facility. The amount of people inquiring about the services offered has increased 100 percent, according to a school spokesman.

The dental hygiene students began the semester in the new STC wing along with three other programs. Two more programs are scheduled to be moved to the new facility in the summer.

Opera performer enjoys field

By Diane Prewer Seattle P-I

Randall Black, a graduate student in music, was selected by opera producer NTM to be the Artistic Director of his children's choir. The choir, which ranges from "outstanding" to "divine," had a successful performance in Seattle Opera's "Tosca." Black is also the voice teacher to the choir, and he believes it is important to "keep the words in your head." He says that "you'll need to work on your voice all the time," and that "it's a great thing to be singing and people are listening."

Black's accomplishments have ranged from "outstanding" to "divine," and he has coached the choir for the past six years. Black said that he enjoys working with children, and he believes it is important to keep the words in your head.

Black said that he is most proud of his favorite roles so far, "The Star-Spangled Banner," "My Favorite things." He said that he enjoys singing in "Tosca," and that he is looking forward to performing in "The Sound of Music." Black said that he feels most satisfied when he has done his best and worked well with his partners in a performance.

One perfect duet where the emotion right can make months of work worthwhile," he said.

Black is very excited about the Santa Fe Opera and Torrents. Nearly all of the material will be new to him, and he will have the opportunity to gain experience in new roles. Black will be in four of the five operas performed between June 7 and Aug. 25.

He said that he is always working on a "short-range goal," while keeping in mind the long-term goals of developing his voice and repertoire.

Black said that he plans to continue to perform and to love music and the words and audience. Black said that "music is meant to communicate," so the performer and the audience must love the music and the words. If you don't, then they "won't respond."

Concerts to be held

Two rock concerts will be held in St. Louis, one on Sunday and the other on Saturday. There will be a rock concert on Sunday at Kiel Auditorium. Reserved seats are $7.50 and $8.50. Supertramp will be performing at 8 p.m. on March 18 and 19 at the Coliseum. Tickets are $7.50 and $9.50.

To order tickets by mail, send a cashier's check or money order ($1.75 per ticket handling charge) along with a self-addressed stamped envelope to the ticket office. The tickets will be mailed to you at the address you provide.

The Student Dinner Concert Series presents

Hans Richter-Hassler
Classical Pianist

Thursday, March 8, 1979

The Student Center Dinner Concert Series presents Hans Richter-Hassler, a classical pianist, at the Student Center Auditorium. The concert will be held on March 8, 1979, at 8 p.m. in the Student Center Auditorium.

The concert will feature a variety of classical music, including works by Bach, Beethoven, and Mozart. The program will also include some of Richter-Hassler's own compositions. The concert is free and open to the public. For more information, call the Student Center Auditorium at 555-1234.
‘Halloween’ classic horror film

By Mike Reed
Staff Writer

For kids who haven’t had a good scare at the movies since the closing screens of “Cut”, “Halloween” could be just what you’ve been waiting for.

Not only do the sharks come more often, but the Jaws of the classic horror film are intensified by the realism of the subject matter. Realism that may, in fact, give viewers the feeling that they are walking down every dark alley on your own home.

“Halloween” is a horror movie in the classic sense, relying heavily on atmosphere, tension, and imagination of the evil that is about to occur to set the stage for the ending that is almost as exciting as it is shocking. "Psychic," but totally believable, is a term that will go down in history and go that usually accompanies such films.

The story takes place in the mythical town of Haddonfield III.

Awards offered for playwriting:
April 20 deadline

Arthur Miller had to start a New York Playwrights Workshop in 1957. The entries in the first Quarter Night program will be the best one-aspect play to be awarded to the best one-aspect play. An annual Sponsorship of the Prairie Night program will also be awarded to the best one-aspect play, according to Theater Department editorial Advisor, Eleanor Scherber. And, whenever possible, the full-length play will also be considered for production in the same program.

Submissions are accepted and submitted to: Christian H. Moe, Playwright Workshop—New Play Program, Department of Theater, SU. (The deadline for submission of scripts is April 20.)

Both full-length and one-aspect plays will be accepted, and only one script from each category can be submitted. Adaptations are acceptable. However, scripts produced outside of SU auspices, even if written by previous winners in outside playwriting competitions, are ineligible.

One-aspect plays should not exceed 45 pages of printed double-spaced text and not超过 120 pages. The scripts should be submitted in standard form on 8 by 11 inch paper; on one side only, and not more than single-spaced with double spacing between the margins of the characters, and a cover should bound the script.

The name, return address, phone number and department affiliation of the sender should be included with the script.

Awards will be announced and presented at a Prairie Night performance in May. The exact date will be announced later in the semester. The winners will be two SU faculty members and three students. The decision of the judges is final and the judges reserve the right to withhold awards if no entry meets prize-winning standard.

The 1976 award winners were: "Backyard Story," by Charles Pennington for the full-length category, and "What Ever Happened to Amao Matz?" by Tony Taccetti for the one-aspect script for the play award.

---

The name, return address, phone number and department affiliation of the sender should be included with the script.

We have positions to fill.

President Carter has called the fight for tomorrow's energy the "moral equivalent of war." The front-page industry that's tackling the nation's greatest challenge needs superior engineering graduates.

We can put your skills to work NOW. Kansas City Power & Light has choice career openings that place you now where your classmates will be in five years: at high levels of authority and responsibility with earnings and benefits to match.

Because of growing energy demand, expansion, and promotions, we need engineers with leadership capabilities to take over in these key areas:

**Electrical Engineers**

*Evolent Plant Construction and Engineering responsibilities involve power plant design reviews and modifications, managing construction projects, work scheduling (critical paths), cost controlling, preparing plant equipment, overseeing contractor performance, cost and budget estimating.*

*System Planning Department requires performing and analyzing power systems, identifying potential problems, developing alternative plans covering both short- and long-term objectives of reliability and economy, Familiarity with Fortran programming is preferred for developing and modifying computer models in economic and reliability studies.*

*Rates and Regulations Department needs sharp engineers to carry out analyses of Cost of Service, Fortran Value, Load Research and Rate Design studies, and to prepare budget forecasts. Also will involve preparation and participation in regulatory cases, exhibits and legal presentations. A requirement here is a creative ability in economic evaluation as well as engineering skills.*

**Masters of Business Administration**

*Rates and Regulations Department requires economics or financial oriented MBA's with baccalaureate in Electrical, Mechanical or Industrial Engineering to conduct economic research in areas of Cost of Service, Fortran Value, Load Research, Rate Design and related financial analyses. Proficiency in Fortran programming is preferable, as well as an ability to deal effectively with both management and corporate needs.*

*Corporate Planning and Finance Departments call for an MBA with an economic or finance emphasis and a degree in Electrical, Mechanical or Industrial Engineering. Familiarity with Fortran programming will be helpful in economic modeling, power driver forecasting, system reliability analyses, projection of optimum power unit requirements, and efficiency studies. This also will involve testimony and exhibit preparation and presentation before regulatory agencies.*

**Mechanical Engineers**

*Evolent Plant Construction and Engineering will involve power plant design reviews and modifications, managing construction projects, work scheduling (critical paths), cost controlling, preparing plant equipment, overseeing contractor performance according to specification, cost and budget estimations.*

*Power Plant Maintenance means troubleshooting, KCPL is primarily a coal-fired system, and burning coal means high maintenance levels. Engineers must analyze equipment failures, recommend design changes, effect design modifications, streamlining operational and maintenance procedures and supervise installation of new plant equipment. This also involves Air Quality Control—an area where KCPL is a recognized pioneer.*

These select positions offer immediate fulfillment to career oriented graduates and provide excellent opportunities for continued development toward top management positions.

A year from now, your friends will still be talking about the energy crisis... YOU will be solving it.

Our personnel representative will be on campus March 21st. For more information or an appointment call the placement office.

Honors society hasn't suffered from 'animal' image

By Rick Recker

Student Voice

Believe it or not, there are Greek societies on campus, and there is party at the drop of a hat, or in any other way inappropriate, though never seen in the movie "Animal House."

Despite the mental illusion given to these honors societies by students, faculty, and the officers over the years, they are not declining according to two SIU faculty members. The student usually elects members first, and then notify the individuals that they are in the organization.

The 31 different honors societies at SIU have a positive image among students, which honors scholastic achievers from the chemistry department, in the Zoology Honors Society.

Jack Grant, a National honors society, and Ed McGlone, chairman of the speech communication department and president of the Illinois Beta Kappa, became concerned about the lack of attention given to the recognition of scholastic excellence and have tried to do something about it.

Phi Kappa Phi is a national honorary society open to juniors, seniors and graduate students, regardless of major. A Beta Kappa is a national honorary society open to juniors and seniors in the liberal arts. Currently, there is no Phi Kappa Phi chapter at SIU, though McGlone said he will petition the national organization about starting a chapter at SIU, if necessary, and hopes the group will accept SIU in the near future.

The concern they are trying to present is the lack of recognition at the first meeting of the Council of Faculty Senate for the 1974-1975 school year. This council hopes to share their information and influence the individual societies may have for the benefit of all students.

"It can have a real impact on the elitism for academic study," McGlone said. The idea is to seek recognition from either academic or student affairs or both, as a campus organization, get on as many lists as possible and develop a program that improves the quality of current and future day experiences completely with nationally known speakers.

"The only things that seem to get attention are problems, disasters and crimes instead of all the good things," McGlone said. "Most students don't get the recognition they deserve.

Graham said that honors societies "are not a high priority news item." The faculty must be rewarded and encouraged for working with undergraduate honors students. Some faculty believe the best thing to do is publish articles or work with graduates. That's fine, but there's not much formal encouragement to work with undergraduates," McGlone said.

The university can move quickly to establish a first-class honors program. Both the council of dean and faculty senate are considering proposals to replace the President's scholarship program, McGlone said. As a result of all the limitations of an honor student should become a part of the offer for graduation for all students, who do participate, though, are much more formal encouragement to work with undergraduates," McGlone said.

Plans made for burned school may include community center

By Jake Bloomer

The News

A new group called Carbondale Concerned Citizens is preparing a plan in which Brub Man Street will be damaged by fire in December. The group is preparing a community center for residents. CCE member Loren Taylor said the school's central location on West Main Street makes it desirable as a community center. The CCE was incorporated recently, primarily to obtain grants from the National Science Foundation of Brub Man Street.

Brub Man Street, the school has been estimated at $380,000 and another $200,000 is needed for a new heating system that would meet state safety requirements.

At a CCE meeting recently, some residents opposed the school's renovation and suggested the building be torn down. More options are needed before a decision is made, however, said Justice Grant, coordinator of Carbondale's human resources. Leaders of the community center. She added that the administration said that the community center is being designed and is under development for the community for the program.

About 25 persons attended the meeting with only about five organizations represented. Grant said many have expressed interest.

Community education, Grant explained, as a way of educating the cultural and recreational opportunities of all age groups. This can be achieved, she said, by coordinating the resources and facilities of all local organizations for the benefit of each other. Surveys are being compiled to create a list of available facilities and suggestions.

WHAT'S THE WORST THING THAT COULD HAPPEN?

You pick up the telephone, ask some questions and make an appointment at speak with one of the SIU faculty. You go to the appointment, find out that not only could you be on scholarship next year, but you could be on the payroll of one of the largest and most prestigious organizations in the world with a starting annual salary of $11,900 after graduation. Then you go home and think it over. You come away with some valuable detailed information at no cost or risk to you in any way. Call us at Air Force ROTC today. What's the worst thing that can happen?
Chicago-bound students have travel mode options

Dr. Ron Jaromey
Student Writer

All students traveling to and from Chicago have various transportation options, other than using cars available to them such as trains, buses, planes and airplanes. Amtrak appears to be the most popular transportation for students traveling to Chicago.

Veron Paul, district supervisor for Amtrak, said that 50 percent of the passengers leaving from Carbondale, Illinois, would travel by train.

"We know that most of our passengers are SIU students who travel in numbers especially, on weekends and during school break periods," Paul said.

According to Paul, a round-trip discount that reduces fare by 35 percent has been especially popular with SIU students.

"The round-trip discount is an experiment by the railroad to try to attract more passengers," explained Paul. "I would say it has been successful in Carbondale because we have had a substantial increase in riders and revenue.

Currently, a one-way fare from Carbondale to Chicago costs $21.50 while the round-trip fare costs $32.50. The estimated travel time for the two trains, the Panama Limited and the Shawnee, is about six hours from Carbondale to the Union Station in Chicago.

Another travel option for students is the Chi-Dale Express which is designed exclusively for SIU students. The Chi-Dale Express is a privately-owned transportation service consisting of two minibuses that take students from the Student Center to various stops in the Chicago area.

Ken Philip, owner of the Chi-Dale Express, said that his service has several advantages because it was planned strictly as a service for SIU students.

Philip said every Friday at 2 p.m. two minibuses carrying 11 passengers each, leave the Student Center en route to Union Station and one stopping in Park Ridge, Illinois, and the Lincoln Mall.

"The minibuses are very advantageous for riders because community trains can take them from these spots to just about anywhere," Philip said.

Philip added that the upcoming gas station closings would not effect the Chi-Dale Express. "There are many cars that do not have gas tanks large enough to make the trip," Philip explained. "This will be no problem for our service because each minibus carries an auxiliary gas tank.

According to Philip, the minibuses arrive in the Chicago area around 7:40 p.m. and on a very typical weekend are nearly full. Another advantage to our service as opposed to Amtrak is that anyone who reserves a seat on the Express is guaranteed a seat, whereas Amtrak guarantees a ride but not the seat," said Philip.

Philip added that the buses leave Chicago late Sunday afternoon and drop the passengers off at their residences in Carbondale at about 5:15 a.m. for one-way fare and $32.75 round-trip. Tickets can be bought at Book World in Carbondale.

"There is a still another alternative for the traveler who wants to get to Chicago fast and is willing to spend a few more dollars. Air Illinois, which flies out of Southern Illinois Airport, makes two flights each day to O'Hare Field in Chicago. With a stop in Springfield, the flight takes one hour and 35 minutes and one-way fare is $10.50. Debra Dick, a reservations at Air Illinois, said that she didn't know how many students fly to Chicago because "I really have no way of knowing whether they are students or not. However, she said that there is always more riders Fridays and holidays which mainly attributed to students travelers.

IT IS WRITTEN

NEW YORK (AP)—The exhibit "The Art of the Muslim World" is on display at Asia House Gallery through March 11.

Ninety objects, including manuscripts, textiles, tiles and models, are used "to illustrate the visual splendor of the written word and provide one throughout the arts of Islamic art.

The papers of G.W. Griffith, one of the most famous filmmakers of all time, are at the Museum of Modern Art in New York but have never been filmed before.

The museum has a list of books "well anybody who wants to do any work has to go through one of those hundreds of boxes. And the museum doesn't want people to go through all of them because they don't want people to mess all up," Bukaliski said.

Bukaliski said the UFA is seeking a grant to hold a national conference which will bring together film scholars and professors with representatives from museums and archives to discuss problems. The goal of the conference is to find help to archives, organize materials and address other problems facing film scholars.

Daily Egyptian, March 8, 1979, Page 11
A man and woman assertiveness training group will be starting at 7:30 p.m. March 20. Interested persons should call 457-6333 for information.

The Gumball Wheelchair Rally, a cross-country and slalom course, will be held at 1 p.m. March 25 in the Arena parking lot. Applications are available in the Student Recreation Center Room 141. Volunteers are still needed for the event.

Nanci K. Wilson, assistant professor in administration of justice, presented a paper entitled "Crime and Criminology: The Uses of History" at the sixth annual meeting of the Western Society of Criminology. The meeting was held Feb. 28 through March 3 in Sacramento, Calif.

Aeon Alternatives is offering a group "Getting High Through Movement" to be held from 6 to 8 p.m. on Tuesdays. The group will not begin until at least six persons are registered. For registration call 529-2211.

The Soccer Club will have the first meeting of the semester at 7 p.m. Thursday in the Student Center in the SISU Theater Room 141. All eligible persons are welcome to attend.

Kumbi Ambasona, dean of women at Lyceeen Twendelee School in Lubumbashi, Zaire, will visit SIU March 16. Ambasona is an alumnus of SIU and a specialist in African educational systems. Students or faculty interested in meeting her should contact the Office of International Education.

The Crescent Club of Phi Beta Sigma fraternity presents "Busting Out," a dance, from 9 a.m. to midnight Thursday in the Big Muddy Room. The fraternity will sponsor also a slave sale of the Crescent. Admission is free.

Aeon Alternatives is offering a meditation group and a Gestalt Therapy group. The Gestalt group will meet once a week for 15 weeks with a fee of $25. For registration and information about the groups call 529-2211.

Alpha Epsilon Rho will meet at 7:30 p.m. Thursday in Lawson 121. The meeting will be the last one before the conventions and plans will be made. Election of officers for next year will be held.

Ward Horton will speak on the "What's Happening in Nicaragua," at the Latin American Seminar at 8 p.m. Thursday in the Home Economics Lounge.

Michael J. Morris is the 1979 winner of the Majid Abbas Undergraduate Award for Excellence in Political Science. The award was established in 1976 in memory of Abdul Majid Abbas, a member of the political science faculty until his death in 1971 and former Iraq delegate to the United Nations.

Helmut Liedloff, professor of German in the Department of Foreign Languages and Literatures, has published a textbook which he co-authored with Jack Moeller. Deutsch Sprache, Grundstufe, will be used in classes at SIU.

Recycle Your Bicycle
With a Complete Bicycle Overhaul
A bicycle deserves to be overhauled once a year to ensure a long life. A bicycle that's working properly is more enjoyable to ride, and saves bike prices went up, it's cheaper to overhaul rather than buy a new bike. This thorough service includes checking every thing apart, cleaning and lubricating your bike, aligning wheels, and adjusting brakes, gears, and all spacers. We specialize in all aspects of bicycle service. See the Pro Shop for the prices for all of your bicycle needs.

Long Lecture, 7:30 p.m., Morris Library Auditorium, Board of Trustees breakfast, 7 to 7:45 a.m., Student Center Mississippi River Room,Board of Trustees meeting, 8 a.m. to noon, Student Center Sanazan River Room,Board of Trustees meeting, 8 to 9 a.m., Student Center Ballroom D,Instructor License Review meeting, 9 a.m. to noon, Student Center Ballroom B, Southern Illinois Concerts Inc., 8 to 9 a.m., Student Center Old Main Room, Landmark University Society dinner, 6:30 to 9 p.m., Student Center Ballroom C & D, Hans Richter-Hans Frans Concert, 8 p.m., Snyder Auditorium, Inter Greek Council meeting, 9 to 11 p.m., Student Center Mississippi River Room.

Ree Center hours planned for break

The Recreation Center's hours of operation have been announced for spring break.

The building will be open from 9 a.m. to 10 p.m. Saturday through March 18. Hours for the swimming, martial arts touch, equipment issue rooms, locker rooms, group fitness, weight room and racquetball courts will be the same as the general building hours.

Spring break hours for the golf room are 7 p.m. to 10 p.m. The room will be open from 11 a.m. to 2 p.m. and from 5 p.m. to 10 p.m. Family Night will be from 5 p.m. to 10 p.m. daily.

Regular hours will resume March 19.

Jobs on Campus

The following jobs for student workers have been listed by the Office of Student Work and Financial Assistance.

To be eligible, a student must be enrolled full time and have a current Family Financial Statement on file with the Office of Student Work and Financial Assistance. Applications should be made in person at the Student Work Office, Woody Hall, third floor.

Jobs available as of March 7:

Typist, five openings, morning work block, three openings, afternoon work block, one opening. Bursar's Office will have the openings arranged.

The openings for secretarial will be operating the switchboard and doing other clerical duties. Time: one morning work block and one afternoon work block.

Macrelance--one opening, morning work block, one opening, afternoon work block, four openings. To be arranged.

Also will have to type 30 words per minute, answer undergraduate who will be here in summer. Time to be arranged, will have to work some weekends.

Summer Work Available: nine openings for full-time instructors, a great deal of time will be spent in wilderness settings, employment begins May 28 and ends Aug. 17. For more information contact Bruce Sullivan at the Environmental Workshop at Touch of Nature.

SPEEDRAILS 75¢ DRAFTS 50¢
Southwestern excursion offered to study ecology

By James Patterson
Staff Writer

Want to see the tips of the Rocky Mountains, the depths of Death Valley and the shores of the Pacific while receiving college credit for it? If so, you can consider participating in the fourth annual travel-study course "Ecology of the Southwestern United States." The month-long excursion will begin on May 14 and end on June 1 just before the start of summer school.

The trip is sponsored by the Ecology Department in conjunction with its 405-220 Teaching Field Studies, and offers four credits. The course meats will be in San Diego, Arizona, New Mexico and other desert states.

After spending a week in the desert, the group will head southwest for California, where it will visit the zoo in San Diego, the wild animal parks, tide pools and beaches and Tijuana. Mexico. The group will also spend a week in the San Diego area. The excursion will then head north to the Rocky Mountains and visit several national parks, including Big Bend, Carlsbad Caverns, Zion, Grand Canyon and Rocky Mountain, before returning to Shill.

To sign up, students can contact Joseph Lynch in the Office of Continuing Education in Washington Square or Bruce Peterson, assistant professor of biology.

The trip will cost $153.00, which includes room, board, transportation, books, tuition and fees for the 300-mile excursion.

"Students may bring as much money as they wish to purchase souvenirs, but outside of that no money will be needed," Peterson said.

"This is our fourth year on this trip and so far we have always had a good time," he added.

Students who sign up must make a $50 deposit as soon as possible and the remaining costs must be paid by April 1, he continued.

"The students should bring everything from bathing suits to heavy coats. It will be excruciating hot in the desert and very cold in the mountains," Peterson said.

When on the West Coast, students will be allowed to go sight-seeing in the evenings after classes are finished, according to Peterson.

Professor emeritus dies

By Jane Vering
Staff Writer

Jack F. Isakoff, 88, professor emeritus in science, died early Saturday morning at Temple B'nai Jacob. Services were held at 4:30 p.m. Sunday in the Temple. Jacob, 1103 Hough St. Isakoff was buried in Cheed Sef Kearn Cemetery in Cleveland, Ohio.

Isakoff, who lived at 9004 Braddock Road, is survived by his wife Shirley, a daughter, Barbara Pinkin, of Cleveland Heights, Ohio; three sisters, Rose Keck of Fall River, Mass., Florence Saltier of Columbus, Ohio and Aten Robinette of St. Louis; a brother, David Isakoff of Cleveland Heights, and two grandchildren.

Isakoff taught in the political science department at MU from 1927 to 1971. Prior to coming to MU, he taught at Western Reserve University in Cleveland from 1926 to 1927. He was the former head of the Illinois Legislative Council for 22 years prior to coming to MU.

He served as chairman of the Illinois Commission on State government in 1966 and was a member of the Public Administration Committee of the Board of Higher Education in the and chairman of the Illinois Board of Education in 1971. Greville Alexander, professor emeritus in political science, and Isakoff was a "very fine scholar and a stimulating teacher." He said Isakoff taught both undergraduate and graduate courses at "very high standards" in his courses.

Isakoff received a bachelor's degree from Western Reserve University, a master's degree from the University of Illinois, Ohio, a doctoral degree from the University of Illinois-Champaign and a law degree from Loyola University.

He was a member of the Cordoneal Lions Club.

What you should know about diamonds:
Mechanic: Be aware of tricks

Eliza Kelly

Of Workers

The fun beltfits, sitr tires and
statfe oil pans can be just a few of the
tricks of "not for all they can" at
gas station mechanics, ac-
cording to Paul Maginnis,
automobile mechanic and
night manager at Glenn's
Automotive Service.

These are not uncommon oc-
currences when traveling and may
cause you to waver on your
services, according to Maginnis.
He said the problems can occur most of
the time when individuals ad-
vertise to fix problems.

A gas station mechanic may
ring up repairs on tires that
just carry small pen knives,
automobiles.

"The employees can get under
the belt, cut small holes in the
belts, he said. They can sit
out with a pen knife, and then tell
the owners that they need a new one,
he said.

"Don't get me wrong," Maginnis
said. "Not all service stations are
dishonest.

Automobile owners just have to be
aware, according to the mechanic.
Maginnis said a stations at-
tendants' bag of tricks can consist of
overcharging for gas, putting the oil
dipstick in halfway when checking the
cal and using an empty oil can to
put oil in a customer's car.

Maginnis said service attendants
can overcharge for gas by mistreating
the gas pump when the customer is
not looking.

Sometimes a attendant will say a
customer who needs a new part
when the used one is still in good
condition.

The employee will then charge for
the new part but leave the old
part in, Maginnis said.

"The best defense is offense," Maginnis
said. "Bring aware or 85 percent of the
battle.

If an attendant looks under the
hood of one's car, Maginnis said the
person should look with him.

"You don't have to stand over him
like a mother hen, but do stand in a
position to see what is going on so he
can't pull that nonsense," Maginnis
warned.

The mechanic said he likes to
make sure everything is in working
order before he leaves on a long trip.
He said it would be a good idea to
have an old change and a gas pump
before taking the trip. Maginnis also
said one should check all belts,
tires and the brake and steering
fluid levels, before leaving.

"An air filter won't wear out in a
trip to Florida," although some
service station attendants will tell
you that, according to Maginnis.

"If you have service done on your
ar, ask for the old part or at
least ask to see it," he said.

Pick up money in Einstein contest

Five students have been awarded
$8.750 in prize money for their entries
in the Albert Einstein Centennial
Student Graphic and Science
Competition. The contest was held as
part of the celebration commemorating
the 100th birthday of the great
theorist.

H.R. Kaul, graduate student in
physics, won first prize of $100 in the
competition for his essay on the
general theory of relativity.

Thomas C. Moran, graduate
in physics, collected the $75 second
prize for his essay on Einstein and
the photoelectric effect.

Kaul and Moran submitted the
only two entries in the science
category, according to Paul
Schiller, professor in philosophy and
organizer of the Einstein celebration.

Sahir Bous, associate professor of
physics, judged the entries.

John Gaulli, senior in art, won first
place and $50 for his entry in the art
category. Michelle Chatel, junior,
and Judith H. Akers, sophomore, each in
art, took the second and third
places, respectively. Chatel was
awarded $75 and Akers won $50.

There were 12 entries in this
category, which was judged by
Herbert Pink, professor in art.

GSE classes start

Professor criticizes Stevenson

By Jerry Falckern
Student Writer

"I don't know what he's thinking—I don't think even he knows what he's thinking," so says political science professor John Jackson about the recent public statements made by Illinois Sen. Adlai Stevenson. All this, according to the forum for Stevenson's political future.

Among other things, Stevenson has been critical of the Senate, saying it no longer fulfills the role for new ideas.

"It is a forum for him to say that the Senate is not a forum for ideas," said Jackson, who teaches a course on American government and politics. "There are only 100 senators in the whole world and there are a lot of politicians who would give them their right arm to be a member of the Senate."

Stevenson, who will be up for re-election in 1966, has said recently that it may take a third party to lead the nation effectively. But he has said he will hold a third party if the Senate, in Stevenson's statement of late has been false, according to Jackson. "To say that the democrats are sold out to labor is a totally inaccurate statement. Sure, one or two senators are pro-labor all the way. But I don't think there is any doubt that there isn't any love lost between Jimmy Carter and AFL-CIO boss George Meany."

Stevenson has a little more rope left—but not much before he hangs himself.

Jackson, who holds a Ph.D. from Vanderbilt University, said there is little doubt Stevenson could win re-election to a third term in the Senate. "He is a popular vote-getter in Illinois and could win easily," Jackson said. Jackson disputes the possibility of a third party try for the presidency by the 48-year-old Stevenson. "I think he'll eventually settle for remaining in the Senate," Jackson said.

Stevenson who has said he will announce his future plans in April, was first elected to the Senate in 1953 to fill the unscored term of the late Everett Dirksen and was re-elected to another term in 1958. His father, Adlai Stevenson II, was a two-time Democratic presidential nominee, being both times to Dwight D. Eisenhower.

"Stevenson is an enigmatic figure to me and most people in Illinois." Jackson said. "If he doesn't shape up, the rank and file Illinois democrats will become disgrunted and he may have a hard time keeping his seat."

Jackson said he expects the democrats to re nominate President Carter. "The economy will be a big factor. If inflation stays below 10 percent, and unemployment stays under 7 percent, then Carter should have no trouble getting renominated."

"I don't see Stevenson as being a factor in Illinois. He will be lured in Illinois, but I doubt he has what it takes to explore a large following."

For whatever reason, Stevenson's desire to bow out of the Senate, Jackson sees U.S. Rep. Paul Simon as a natural successor. "He is respected in Washington, and I think he would be a very good spokesman."

Important Club Meeting

When: 7:00-8:00 pm Thursday, March 8
Where: Student Center Kaskaskia Room
Who: All present and future members

If unable to attend please call Roy Inglis 453-3851

Does anyone remember Elvis Presley, Carl Perkins, Jerry Lee Lewis or Roy Orbison? Think Hard! Do you know which recording label they all started on? Give up? It was SUN recording.

So, all area musicians listen up! It doesn't matter if you are a soloist or a one hundred piece orchestra. Put together a tape recording, bring it in to the store and let me hear what you can do. Ask for Roy.

Gymnasts aim for regional repeat

(Continued from Page 20)

Walker again is brimming with confidence that the team will come through.

"I think it will be," Vogel said of the score because the Cougars have never much through much of the season and even the regionals," she added. "We'll be able to say I'm proud of the state meet. The only ones that get along with that is ourselves. We're still strong." She said she did notice some improvement in the state meet, but added "I'm not sure how much. The Fighting Illini became the second Illinois school to win a national title. Prior to the meet, SIU had never gone to nationals.

The Illini also pulled another fast one. They were the first Illinois school to defeat the Salukis. The Salukis lost the match with just 0.1 point against the Illinois team, but a tie on uneven bars and uneven bars two events in which they have been beaten themselves out of the state meet.

But Vogel would have to admit there are other things—such as coaching and such—beyond that that contributed to the 16-year Salukis record.

The Salukis will be No. 1 seed in the national meet, which will include 12 teams. Oddly, however, SIU doesn't have the highest composite score going into the meet. That cherished honor belongs to Bowling Green where the women's composite score of 135.88. The 135.88 score was compiled by the best individual scores from each team. The Illini's composite (134.50) is a bit lower than Salukis' 134.56. The other teams are the University of Michigan, University of Illinois—Chicago Circle, Indiana State, Central Michigan, Eastern Michigan, I-pana, West Virginia State and the University of Wisconsin—Milwaukee.

Although the teams needed below the Salukis should not give them any trouble, those in SIU's rotations could. Bowling Green, Kent State and Indiana State are in the first rotation along with SIU. Although Bowling Green and Kent State have the two highest season composite scores (Kent State's is 135.15), Vogel says those scores are a bit too high to indicate how good Bowling Green and Kent State really are. However, the coach still is wary.

"Although Bowling Green has the highest qualifying score going into the meet," Vogel said, "if they are as good as that score, we'll have to

Hack Wilson named to Hall of Fame

Tampa, Fla. (AP) — Hack Wilson, one of baseball's top sluggers in the 1920s and '30s who had an illustrious career as an athlete and one who had a long and successful coaching career on the softball field, was inducted into the national sports hall of fame today.

The Tennessee native, who played baseball and football at the University of Tennessee and later coached baseball and basketball at the University of Arkansas, was a member of the Hall of Fame Class of 1979.

Two more grid recruits sign

The Saluki football team Wednesday announced the signing of two more recruits, a defensive tackle, to national letters of intent.

Murphysboro free throws bedevil No. 12 Terriers

By Bruce Rodman

The Murphysboro Red Devils hit nine consecutive free throws in the final two minutes and upset the Carbondale Terriers 57-56 in the opening game of this year's state high school regional tournament at Murphysboro Tuesday night. The Red Devils' free throws preserved a lead that shrunk to as little as one point, 54-53, with 12 seconds remaining.

But Bob Sillers sank two free throws with six seconds left to preserve the win. Carbondale, the 12th-ranked team in the state in the Associated Press high school poll, led throughout most of the game, but the Devils managed to stay close whenever the Terriers tried to deliver the knockout punch.

Carbondale opened its biggest lead, 27-20, midway through the second quarter, but only to have Murphysboro get within three at halftime. Murphysboro turned things around in the third quarter as the Devils opened their biggest lead at 42-27, only to have the Terriers close it to one to start the last quarter.

Late in the final quarter Murphysboro opened a three-point lead that was cut to one with three times on baskets by Carbondale's Johnny Faye. The Tussocks were then forced to foul Murphysboro, sending the Red Devils to the line for free throws with deadly accuracy.

Faye, who was named to the AP all-state team for the second year, was held to only four points after hitting only six shots. The Terriers were led by junior Craig Bardo with 22 points, 16 of them coming in the first half.

The Red Devils featured a balanced attack led by David Kellum and Stilly with six points apiece, but they were topped by 11 Ray Blakemore with 10 and Kirk Harris with eight.

The Red Devils, the fourth-seeded team in the four-team tournament, will play the winner of the Marion-Herrin game for the regional championship Friday night, while Murphysboro, seeded fourth in last year's regional, only to win a sectional before upsetting Carbondale in the opener 57-56.

Gymnasts try to defend regional title

By Gerry Blais

It's been almost two weeks since the women's gymnastics team was upset by the University of Illinois in the state meet in the arena and even since that time the gymnasts have been enjoying their own special "Spring Break." Well, not quite.

The gymnasts have been preparing for the Midwest Regional March 18-17. And even though the gymnasts would much rather be banking in the sunlight of the Florida coast or Texas Panhandle, they'll be traveling to Morgantown, W.Va., the site of this year's regional meet.

SIU is the defending regional champions, but Illinois is the favorite to win the national championship. The Salukis, however, were defending champions in the state meet as well, so coach Herbert knows that the regional meet also can pose a problem.

But just as before the state meet, (Continued on Page 19)
