SIU-C enrollment down 1.07 percent

By Andrew Herrmann
Staff Writer

SIU-C was among eight Illinois public universities which experienced an enrollment decline in the past year, according to the Illinois Higher Education Commission. But Kenneth Shaw, chancellor of the SIUC System, dismissed the figures as "not a significant thing.

While Edwardsville total headcount enrollment figures increased about 2 percent between fall '81 and fall '82, SIUC experienced a drop of 1 percent. Shaw said SIUC had a decline of 206 students from fall '81 to 21,733 in fall '82.

Shaw said the figures were little consequence to the University because "a change of 10 or 20 percent either way isn't really significant."

Shaw said that the drop of 1 percent in SIUC enrollment was "right on the mark" that they had predicted. "You have to remember," he said, "last year's enrollment set a record here in the increase last year was more than 'upward adjustment' was wanted to handle." SIUC students at Springfield experienced an enrollment decrease of 8.57 percent. The largest percent decrease among Illinois public universities was at Eastern Illinois University in Charleston which had the highest enrollment drop of any campus from fall '81 to fall '82.

Shaw said the figures were little consequence to the University because "a change of 10 or 20 percent either way isn't really significant."

The University of Illinois

Decline noted in 8 state schools

Chicago circle campus had the highest enrollment increase of 4.02 percent jump of more than 4,000 students. Their full-time student enrollment, however, declined by 87 students.

The amount of full-time students also declined by 1.6 percent at SIUC, and by 1.3 percent at NIU. Those percentage declines translate to a dip of 345 and 110 students, respectively.

Select data points show that the fall 1982 headcount enrollments in public and private post-secondary educational institutions including community colleges total 756,193, an increase of 8.4 percent over fall 1981 figures. Full-time enrollment dropped by 9.3 percent to a total of 462,324 in the same period.

Public universities saw a 0.1 percent decline in enrollment but community colleges experience an increase of 1.8 percent. Private institutions had an enrollment decline of 2.3 percent.

Shaw said institutions of higher learning across the nation expect that enrollment will continue to decrease in the near future because "the baby boomers aren't as many 18-year-olds around anymore."

"SIUC is not totally enrollment dependent," Shaw said. "With fewer students, I don't necessarily see a negative effect. It means we will have a situation that is less crowded.

Snag holds up extradition of escapee

By Jennifer Phillips
Staff Writer

The extradition from West Virginia of Bruce Davis, who escaped from Nierard Correction Center May 24, has been delayed because of a vag in the paperwork, said West Virginia Corrections spokesmen Howell and Mondas that corrections officials had hoped to have Davis returned to Illinois during the weekend, but are now looking toward sometime this week.

Howell said that Davis, who recently moved to a local police in Smithers, W. Va. on Jan. 31, would probably be flown from Fayette County in the near future.

"According to Capt. Charles Bryant of the Fayette (Oregon) Sheriff's Department, Davis is supposed to be back because of an order to carry him in a local court."

According to Capt. Charles Bryant of the Fayette (Oregon) Sheriff's Department, Davis is supposed to be back because of an order to carry him in a local court.

Bryant said that Davis has posed no problems for them while in Fayette County.

"He's as gentle as a lamb," he said.

Davis, who is serving a sentence of 25 to 45 years for murder and assault with a firearm, was charged with Cushman's murder in the late '70s. He told authorities that he had committed other murders in the early '70s, Bryant said, but the information has not been confirmed.

Bryant told Fayette County officials that he hitchhiked his ride to West Virginia. Bryant said.

Local police knew to look for Davis on a plane but the corrections officials questioned a relative in Cleveland, Ohio, who said that Davis had relatives in the Fayette County area.

Smoke from Biloxi jail fire leaves 27 dead, 61 injured

BILOXI, Miss. (AP) — Twenty-seven prisoners died in their cells early Monday when a former mental patient set off a fire in a padded cell and thick, choking smoke raced through the ventilation system to the top of a jail where the keys had been placed. An additional 63 people were injured, including firefighters, police officers, jailers and inmates of the Harrison County Jail — almost all by smoke inhalation. Hospitals said 10 inmates and a jailer were in critical condition. The ones that stayed alive got wet towels and wrapped them around their face or got in a shower and put wet blankets over them, said Charlie Acevedo, an inmate hospitalized for smoke inhalation as "The ones that didn't, died."

The former mental patient, Robert E. Pates, 31, of Granite City, Ill., was charged with 27 counts of capital murder, said Albert Necaise, the district attorney for Harrison County. Policeman Dan Russell, who helped pull several inmates from the jail, said he and another officer arrested Pates on Saturday night on a charge of public drunkenness after a disturbance at a lounge. "We thought we ought to pick him up for his own protection," Russell said. "I wish we hadn't."

As firefighters searched through the smoke-filled jail for the jailer with the keys, tow trucks were used to pull bars off the outside windows and open the door to the cellblock.

The bodies of the 25 men and two women were loaded onto trucks and taken to Jackson for autopsies, officials said.

Relations of the prisoners gathered outside the one-story brick-and-concrete jail in the downtown area of this Gulf Coast town of 30,000 people. The inmates were asleep when the fire started at about 3:30 a.m. and they were quickly overcome by smoke from the smoldering polyurethane. A synthetic material used as protective padding in an isolation cell, said Harold Windham, an assistant fire chief.

Five years ago in Tennessee, smoke from burning polyurethane padding in a padded cell in the Maury County Jail was blamed for killing 42 people.

John Wilson, a spokesman for the department's civil rights division, said the division "will now accelerate its investigation."

Wilson said that the department had received complaints about conditions at the jail at Biloxi and another county jail in Gulfport. Miss., and began its investigation in September.

A judge had ordered Pates confined Sunday for mental treatment, and commitment papers said his family reported that he had been confined to mental institutions regularly for the past 10 years. Sheriff Howard L. Hebbeb said.

Pates was not seriously hurt but was hospitalized for observation.

News Roundup

Pope to visit Poland, leaders say

WARSAW, Poland (AP) — The nation's top military and church leaders said Monday that Pope John Paul II will visit his homeland in June, an announcement seen as an effort to defuse protests planned by the outlawed Solidarity union.

At the same time, in Wroclaw, security agents arrested Solidarity national commission member Piotr Bednarz and 12 co-workers at a clandestine meeting, the state-run newsagency PAP reported.

Marines land on Moroccan coast

WASHINGTON (AP) — U.S. Marines are about to make an unprompted practice landing on the Moroccan coast, exacerbating delicate talks with a new Socialist government in Spain, which already is balking over American military bases and its membership in NATO.

A Spanish diplomat who asked to remain anonymous objected to the location of the impending Marine landing, near Spanish enclaves on the Moroccan coast across from Gibraltar.

Soviets simulate anti-U.S. attacks

WASHINGTON (AP) — Soviet supersonic Backfire bombers have made their first simulated missile strikes against U.S. aircraft carriers and started patrolling the Sea of Japan in what the Navy says adds "a new dimension to the threat to the sea lanes."

Even though the planes stayed about 120 miles away from the two carriers, that is well within the striking range of the A-5 Kitchen missiles they carry, intelligence sources said.

Tylenol task force scaled down

CHICAGO (AP) — The task force set up to probe the deaths of seven people who took cyanide-laced Extra-Strength TYLENOL capsules has been scaled down to 32 agents from a high of 114, Illinois Attorney General Tyrone Fahner said Monday.

Fahner, who is serving as spokesman for the task force, said investigators had amassed 11,500 pages of case reports, checked 1,760 individuals, 10,246 businesses; 8,301 phone numbers, and 771 license plate numbers.

A proposed university policy on sexual harassment will be considered when the Faculty Senate meets at 1 p.m. Monday in the Mississippi Room of the Student Center.

The senate will also review the proposed SIU-C budget for fiscal year 1984.

The policy, which was drafted in August, would establish a separate board for consideration of complaints of sexual harassment. The current policy uses the regular grievance procedures for such complaints.

The proposed policy has been forwarded to other groups, such as the Graduate Council and the Student Senate Council. The proposed policy defines sexual harassment as "Low Level sexual advances, requests for sexual favors and other verbal or physical conduct of a sexual nature;"

Three found dead in parked car

MARION (AP) - Officials here were trying Monday to determine the identity of a young woman who was one of three people found dead in a car at an Independence County rest area.

Coroner James Wilson of Washington, Ind., said the other two victims were Michael Stazek, 22, and John E. Bolek, 22, both of the Chicago suburb of Burnham.

Body parts were found in Stazek's car on the side of southbound Interstate 75, but north of Marion, Wilson said.

The engine was running and the fumes entered the car through the rusted underside of the vehicle, he said. Wilson said the three had stopped to fix a tire.

An Illinois State Police trooper, stopped to offer assistance, opened the car door and told authorities that "the fumes were so strong it almost backed him off," Wilson said.

Autopsy results will be available in a few days to determine the cause of death, Wilson said.

Wilson said Monday that authorities had no suspicion on the woman's identity. He said she was 5-feet-4 inches tall, about 105 pounds, with shoulder-length, medium-blonde hair and believed to be about 18 years old.

It is being determined whether the victims knew each other.

Formal complaints would be considered by a Sexual Harassment Hearing Board established by the university presidency. The board, composed of 14 members, of whom 12 would be recommended by the university's constituent councils.

When a formal complaint is filed before the board, a three-member panel would be selected. The panel would hear testimony from the complainant, the accused and others and would decide on the validity of the accusations. A resolution of a complaint against an employee could include one or more actions when there has been a finding of sexual harassment.

An investigation would not be conducted for informal complaints without the written permission of the person alleging sexual harassment.

Survey shows loss of interest in economy as dollar gains

By The Associated Press

Consumers lost confidence in the U.S. economy last month, a survey released Monday shows. A month earlier, however, consumers were more optimistic.

In the National Association of Purchasing Managers' survey of 1,100 purchasing executives, a majority felt the top four retailers soared to new records in relation to the French franc and Italian lira in European trading. But the same forces that drove up the dollar's value were cited for sending stock prices into a broad retreat.

The drop in consumer confidence in the economy came as rising unemployment and persistent economic stagnation continued to worry Americans, the Conference Board reported Monday.

The Conference Board's Composite Index of Consumer Confidence, which combines measurements of Americans' assessment of present conditions and expectations for the next six months, fell to 83.2 in October from 84.4 in September and 83.7 in August. It had climbed in each of the previous four months, reaching 61.4 in July.

In foreign exchange trading, the dollar also hit a record high against the Norwegian kroen and raised six-year highs against the West German mark and British pound in European trading.
Atomic test victims deserve our support

By Mike Nelson
Student Writer

IT IS A PROBLEM that few have had the courage to face. For the nearly 250,000 civilian and military personnel who took part in the nuclear bomb tests in the desert, the problem is real and won't disappear simply by ignoring it. The fact is that many of these persons and some of their children are suffering from cancer and other diseases related to their exposure to low-level radiation during the tests. The Veterans Administration and the Defense Nuclear Agency have refused to admit that these people's ailments are connected to the tests. And in only one case, in Utah, has the U.S. government awarded any compensation to a test veteran.

PRESENTLY REP. PAUL SIMON, D-Ill., has the legislation that would, in the words of the bill, "provide compensation to persons exposed to radiation or other toxic chemicals during atomic testing and other service" who now suffer from the result." According to Simon, the bill would also compensate the children of these test victims.

Some mention is in order here. These veterans have no qualms against the country for whom they fought and suffered for. Sandefur and Anderson have called their generation of Atomic Veterans, "I'm not knocking the government, it's the best in the world ... but they should take care of us when we're hurt!

Anderson will upon himself the enormous task of locating these veterans in Southern Illinois. Cavins has a difficult job ahead since the government's attempt to locate these test sites.

Cavins said the NAA has estimated 10,000 to 12,000 of the 250,000 test veterans come from Illinois. Others estimate that while some veterans have obviously moved or died, many still live in this state. So far, he said, 22 have turned up in Southern Illinois, six in Chester alone. "The NAA is conducting what is perhaps the most significant manhunt in the history of America to warn potential victims of radiation poisoning," Cavins said. Such manhunt is necessary since these veterans can be helped; they must be found. Many probably have no idea of the possible danger they could be in. Obviously, groups like the NAA and the veteran-defense organization of this nation must be everywhere and that most often you won't be able to tell who we are unless you tell us.

The suggestion was made that armbands be used instead. Many of those supportive of gay and lesbian rights did wear additional symbols of support such as buttons or T-shirts. We felt lucky to be in jobs, academic departments or social groups where we could be openly supportive. Many of us, however, risk the loss of friends, family, support jobs, and even physical safety for just supporting gay and lesbian lifestyles. We are not a single community but a number of different communities. Women and men must come forward and make their presence known. Cavins has said that a good number of test veterans have been found, but he said, "many of them are embarrassed to get help. They're ashamed of what the haves done.

WHILE PEOPLE LIKE Joe Wrench work to find and warn atomic test victims, there is something everyone can do to help these causes. Write Rep. Simon and tell him of your support for his proposed legislation. At the risk of sounding trite, I appeal to your sense of responsibility, to your sense of humanity. We need to obtain help for these veterans and their families. Right now these people have very few supporters. Do yourself and them a favor and count yourself one of them.

Tuition tax credit unfair

Just because a small percentage of rich and snobby parents want to send their children to private prep schools does not mean that they are either under the illusion that money can buy an education or that they do not want their upper-bred children mingling with "common folk". Why should low- and middle-class students be penalized by having money taken away from them by their schools?

A large percentage of parents send their children to private schools because they are reimbursed from public school funds. The public school (funds are used for) are not only needed in the community they go to public schools. If parents are so concerned with their child's education, they should take the money they have given to private schools and give it to the public schools.

An example of tuition tax credit would be a child coming to SIU-C. joining a fancy athletic club and demanding a rebate for his recreation fees.

The precedent that the tuition tax credit would set would have serious consequences. A community could hire their own police protection and money from the government for not using the city's police protection.

We do not get tooCarrier I am not against private schools. But if you decide to attend one, you have the responsibility of the community in the back yard by using courses such as Hans Brookie, Director of People Against Racistics.

More charges won't solve problem

I am writing in response to the story on the rise in overdue student bills (DE, Nov. 2). Supposedly, the president's staff will soon make recommendations on how to handle this problem.

Two of the alternatives mentioned were a fee for paying on an installment basis or a 1½ percent charge on bills that are overdue for more than 30 days.

Yet I read nothing that suggested why the students have been late in paying their bills. SIU-C's policy is that the university tuition while some student aid packages have been discontinued or curtailed. More students are receiving less money from the government to pay their bills. The interest to be paid on Guaranteed Student Loans has increased 9 percent.

Most students that I know are less likely to pay their bills if they have to take out a short-term loan to pay the rent this month because the computers in Deerfield that process the loans are down or so says my bank.

I strongly suggest that President Sonst and his staff seriously consider any ideas they might have in assessing more charges upon students who are already overburdened with bills. Granted, charging the students overdue interest may bring in extra revenue, but it may also reduce the number of students who can afford to go to school.

Of course, with students enrolled because they can't pay their bills, problems should be solved, wouldn't it? — Susan McClellan, Senior, Social Work.

Blue Jeans Day was a success; was meant to make you think

Maybe I can clear up some of the confusion about what Blue Jeans Day is about. This is not that of dressing up in clothing that includes jeans, either.

The problem was meant to make you think about gay and lesbian lifestyles. I know of no one who made such an assumption. In other words, while we are appreciative of those who showed support by wearing jeans, we'll really believe it when we see our lifestyles supported by the law, in the church, dealt with in the schools, and portrayed accurately and sensitively in the media. A final tone which seemed pervasive of all the letters was that of confusion, by Simon. The bill would also compensate the children of these test victims.

Facing these things everyday, I find it hard to empathize with the individual who had to do an extra load of laundry or wear a less-than-favorite pair of pants.

Our intention in creating Blue Jeans Day was not to inconvenience anyone or to gauge support on campus. We simply wanted to help people think about gay and lesbian people, if only for the 20 seconds when they looked through their closet in the morning. Blue Jeans Day was a tremendous success.

Modern estimates place the gay and lesbian population in this country at approximately 10 percent. That means that approximately 2,300 students at SIU-C are gay or lesbian. To remember that the next time you use a derogatory joke in a crowd of people. Try at least think about that the next time you talk about "blue jeans." That's all we're asking.

— for now — Sandy Colle. Graduate Student, Psychology.
Argentine became so dependent on Soviet grain that there was a real conflict of interest between GSC's support of selective service program and GSC's support of funding for return of stolen knapsack. The draft-dodger Rusty Martin to be very harmful to veterans' goals at STC and in society. The GSC was a bit hasty in offering an internationally toward such a controversial figure. Martin, student body president at the University of Northern Iowa, was the 12th president to register for the draft.

On Oct. 28, our GSC passed a resolution enabling GSC president Paul Malotnik to send a letter to Martin. Although the GSC approved this resolution because they felt that Martin was being singled out for his visibility, they are in effect denouncing the entire Selective Service System. If the GSC has truly interested in the selective service, prosecution of draft resistors, they would also write a letter to President Reagan asking that all such registration resistors be prosecuted equally.

President Reagan pursued a ban on tractors for the construction of the Trans-Siberian Yamal pipeline in December when Poland declared martial law. The result? Poland is still under martial law. Polish workers are still being shot but American workers pay the price. Some American workers have reported a 16 percent unemployment, now that the highest unemployment rate among American cities primarily because Caterpillar Tractor lost its deal with the Soviets. Not only American workers but their families suffer. Social workers have recorded an 87 percent increase in wife beating in Iowa with even significant cutback on workforce.

In the meantime, on the second round of pipeline sanctions imposed by President Carter in late July, ex-President Richard Nixon said, "Squeezing Russia will not work. When the Communists first come to power, when problems were far worse, it would not work now. And everyone is aware that with such a severe depression it would increase it."

What is frightening about economic sanctions is not just that it does not work, but that by some unhappy logic if we impose sanctions we had better start praying we fail. Particularly when we happen if the grain embargo did not work the Russians people starved!" Exactly what would happen when you corner a rat. As long as the rat has somewhere to run, you chase and he runs. But when the rat is cornered, it may be the better part of valor for you to run.

In a hard pressed situation, especially if people are starving, it becomes easy to throw the dangers of military adventurism to the winds and more covertly on the grain bowls of the world. Invasion of the rice bowl of Southeast Asia or the Pampas of Argentina or even the United States became more attractive and perhaps even necessary. It also becomes easier to press the nuclear button in desperation. So with economic sanctions, you are damned if you don't and more damned if you do.

Then why these sanctions? One example: Currently Europe is 65 percent self-sufficient in gas but in 10 years that's expected to go down to 45. For Reagan's apprehensions. At the risk of sounding outrageously simple-minded I must ask, why not? Why the fear of becoming dependent and vulnerable? Every international relationship consists of becoming vulnerable to some extent. Why not with international relations?

One-way dependency may be dangerous but inter dependency is good. It's instead of striving for supremacy — and we can set the other side as striving for the same — nations should be striving for interdependency. Interdependency would be a better check on both parties. It would be a check on both parties. In the regional world that the village that the world has become, inter dependency can show nations that the way to peace is through sharing, not power.

GSC's support of draft-dodger Rusty Martin to be very harmful to veterans' goals at STC and in society. The GSC was a bit hasty in offering an internationally toward such a controversial figure. Martin, student body president at the University of Northern Iowa, was the 12th president to register for the draft.

On Oct. 28, our GSC passed a resolution enabling GSC president Paul Malotnik to send a letter to Martin. Although the GSC approved this resolution because they felt that Martin was being singled out for his visibility, they are in effect denouncing the entire Selective Service System. If the GSC has truly interested in the selective service, prosecution of draft resistors, they would also write a letter to President Reagan asking that all such registration resistors be prosecuted equally.

Today, we want a normal life but we still want recognition for services rendered. I feel that the GSC decision to support Martin pulled the rug out from under veterans. We need a society that has a positive attitude toward its armed services. Military people and veterans aren't baby killers or mercenaries. We're supporters of the people of the United States, we only wish the same people who would support us.

Haldeman, Senior, Agriculture Education.

Wednesday evening, my mother knapsack was stolen from the 710 Bookstore. It had all my class notes, class assignments, an irreplaceable Bible, my glasses, etc. I'd like to direct this letter to the person who took it. Nothing in the knapsack could be of any value to you. But everything is extremely valuable to me. I'd like you to know that I do not have the money to replace any of the items and I, myself, am scraping to stay in school. I would also like you to know that you have messed up my school semester and without my notes and projects I'll be totally lost. If you would, please return my belongings or at least most of them. I'll give some kind of reward if you prefer, you can leave them some place, or if you have already disposed of the items call me. My number is in the student directory.

I am willing to forget the situation. All I really care about is getting my belongings back.

— Peaky Pokryke, Junior, Design.
Chicago reggae group opens show at Hangar 9

Gypsy-Fari, a rocking reggae style group will perform at 9 p.m. Tuesday and Wednesday at Hangar 9.

Fari is a six-piece band based in Chicago, the reggae capitol of the nation, that has been creating soulful, funk-influenced music for seven years now and has cut two records on the A nthony label. They also performed with Third World in Jamaica last December, a tour that has helped make reggae a household name.

If you've listened to progressive FM stations across the country or visited the Wild Hare in Chicago, you'll probably recognize such cuts as "Hall Jah," "Don't Keep My Mind Off the Girls" or "Steel Mill Blues.

Those who keep up with the innovations in New Music can hardly ignore the growing influence of West Indian sound and rhythm in countless contemporary eras.
Ross wasted on trite lyrics

Album is lackluster

Ross, a mainstay for Quincy Jones, provides strong background vocals.

Ross’ “Fool for Your Love” is a surprising hard-driving rocker. Strong, forceful guitar work by Bob Kulick really makes this song come alive. But Ross’ voice is just too weak to overcome the power level of the song. The tune gets an “A” for effort and workability, but the level of Ross’ vocals fails to make the grade.

The song “Turn Me Over” is still another good dance song. The likes of which Ross has made a killing on over the last few years. There is an especially good drum and bass combination, contrary to the basic “beat, hum, hum” beat that is common in most dance beat songs.

The lyrics of “In Your Arms” are of the generic love mold – “hold me in your arms tonight, make me your woman tonight” – but it is still a good ballad and about the only cut on the album which allows Ross to display her vocal virtuosity. The strings, arranged by Paul Riser, add to the song rather than make it sound like elevator music.

“Anywhere You Run Try” is another nice up-tempo song, but once again Ross’ vocals are almost drowned out, though there is a good horn arrangement by Randy Brecker.

The last cut on “Silk Electric” – “I Am Me” – appears to be a continuation to Ross’ moonshine: “I’m Coming Out.” Unfortunately, neither the lyrics nor the music have the impact or hooks of “I’m Coming Out.” This song falls flat on its face. “I am me, happy or sad, good or bad.” Get me with trite lyrics. The background vocals, provided by Ross, are also disappointing.

“Silk Electric” is the kind of album Diana Ross fans will find disappointing. It appears to be a commercial effort and nothing more. One would expect more from this classy performer.

The last record by Ross, has been making the best brat wave. The only one that has been releasing a lot of music has been releasing a lot of music. The last record by Ross, has been making the best brat wave. The only one that has been releasing a lot of music has been releasing a lot of music.
COMMODORES’ MAIN MAN SOLOS
Lionel Richie shows artistry

Lionel Richie shows artistry in his music. He is often compared to his brother, Barry Manilow, but he has his own style. Richie has had many hits, including "Endless Love," which was a duet with Diana Ross.

Richie's voice is one of the best in the business. He has a smooth, silky sound that is very pleasing to the ear. His songs are often about love, and he has a way of making you feel like you are in the moment.

The Commodores' album "Three Times the Lady" is a great example of Richie's talent. The主打歌曲 "Three Times the Lady" is a smooth ballad that is sure to please anyone who hears it.

Richie's music is a great way to relax and enjoy some good music. His songs are always on point, and he never fails to deliver a great performance. If you are a fan of R&B, then you should definitely check out Lionel Richie's music. You won't be disappointed!
Soviets building space station rocket

By Howard Benedict

MOSCOW (AP) — The Soviet Union is building the world's most powerful space rocket and plans to launch a space station, according to authoritative sources here. The rocket would be used in 1965 to hurl into orbit the 1960 ton core of a massive manned space station.

The sources — all of them involved in the Soviet space program — provided a rough outline of what they called the project that dortw everything that has been approved for the U.S. National Aeronautics and Space Administration.

It's not all secret. Soviet officials won't officially acknowledge it, of course, but they're developing the monster rocket.

code-named "G." But they speak openly of their concept for the "supercomputer" or "city in the sky."

It would be occupied year in, year out, by rotating crews of medical researchers, astronomers, workers making pure research and materials, satellite repairmen and military astronauts recommended by the government and manned by the space forces.

Some would inhabit this weapon for perhaps as long as 20 years in long-term research projects, which would involve high-technology construction crews, assembling manned and unmanned station, landing the planets and other parts of the solar system. A mad man in the sky.

The sources, who asked to remain unidentified, provided these details.

The Soviet rocket, which is to be the world's most powerful single-stage rocket ever launched, will be able to lift 1,000 tons of thrust into orbit.

The largest rocket ever built, the "G." would be a powerful tensor, capable of carrying more than 100,000 pounds of thrust and could carry more than 300,000 pounds into space.

"The plan calls for a series of test flights leading to an operational launch of the new rocket after tow years," said an official who asked not to be identified.

He said the goal is to launch a 226,000-pound cylindrical station in 1964 and to initially have to 12 people on board, conducting scientific and defense assignments. American astronauts are covered, the station could serve as a launching platform for satellite-deploying weapons.

The U.S. Air Force and National Aeronautics and Space Administration would dearly love to launch such a space station but so far have received only a vague commitment from the Reagan administration and a few million dollars in continuing studies.

"It would be nice if the Soviet launched one," said NASA administrator James M. Beggs. "It would probably make it easier for us to get a go-ahead."

The timetable for the Soviet's big rocket, and thus its orbiting station, is by no means ironclad, and success is by no means certain.

The Soviets have had problems in the past with a large booster. Three failures in as many launches in the late 1970s forced the Americans out of the race to the moon race with the United States.

Women's Transit calls rise as hours expand, weather cools

By Michele Imann

Staff Writer

The leaves are falling, the wind is blowing and the thermometer and the air is crisp and cold. Fall is here. And with this season comes the reliance of people to use their legs as a viable mode of transportation.

"The Women's Transit is now serving 100 to 150 passengers a night," Marshall said. "Perry, Barnhill, campus safety representative, stated.

"It has picked up since the new schedule has been effect for two weeks," the manager said.

The service is offered an hour earlier now. Marshall said, because of the shorter days. The service begins at 6 p.m. until midnight, with the last calls being taken at 11:45 p.m.

Sunday through Friday nights. The phone number is 454-2882.

Since this week has been declared Campus Safety Week by the Undergraduate Student Organization, Marshall will be talking to residents about the dormitories about campus safety, which includes maintaining and protection of one's belongings along with bicycle safety.

Marshall said.

A workshop about safety concerns will be held in the Student Center's auditorium, 6 to 7 p.m. Thursday.

Women's Transit, which is part of the campus safety, is funded by 10 cents of the student activity fee, was not formed to be a transportation service but a safety service. Marshall said the transit drivers will not pick up groups of women, because they are safe walking together. The service is provided only for women traveling alone, she said.

There are three cars used by the transit service, which is located behind McAdoo Stadium. Marshall said. Two cars run on a six-hour shift and one runs on a three and one-half hour shift during busy times of the night. There are seven drivers employed by the service, with three drivers at one time.

The service transports people to a campus based activity and to their homes, within the city limits. Marshall said. Campus activities may include the library, the Student Center and Wood Hall.

Transportation services are also available to men.

The safety van and station wagon serves both men and women." Marshall said. They are night safety vehicles which run on two scheduled routes for students living on campus. The hours are from 6 p.m. to midnight, Sunday through Thursday nights.

Don't be scared— Be safe CALL Women's Transit 454-2212

For off-campus women traveling alone, from an educational activity to their destination, the Campus Safety Service offers the service Sunday through Friday, 6 p.m. to midnight.

A Safety Message from the Undergraduate Student Organization's Student Welfare Commission, and the Campus Safety Fee Board.

Students voyage across lakes in homemade boats

Boats made of plywood, plastic foam, sticks and gallon jugs, among other things, were used to cross Little Grassy and Devil's lakes over the weekend.

It wasn't a low-budget, weekend travel package, but a serious design project completed by 41 students in Design 102 classes taught by Richard Archer and Harris Pratt.

Students were required to create a vessel that would float the two lakes, be light enough to portage 5-10 miles and big enough to carry all the food, clothing and other items needed for a weekend.

They were told to arrive at Touch of Nature Friday to begin the adventure. One student faced a weekend of "roughing it." A taxi cab brought him to the launch site.

Class members designed and built 17 boats for the assignment. Eleven of the sailing craft finished the course. Some in the class got tired or lost and gave up.

Some spent the weekend with cold, wet feet, after discovering too late, a few design flaws in their boats. Otherwise, there were no cases of poison ivy and some gastrointestinal problems when students warned not to drink the lake water.

For some there was great relief in completing the project. There was a flurry of activity to create sailing designs. Some students guarded their designs and eventual construction by locking padlocked sheds to store their creations.

"It's the kind of thing that makes you huddle out of you," Archer said. But he noted that some students who have completed the project once have returned to try it again.

Rick Phebus and Dan Gausin floated the lakes in a cardboard and inner tube creation, top. But the Touch of Nature boat came to the rescue for Jay Napoleschian, and Mark Motola, as their craft proved to be less than seaworthy during a weekend project for a Design 102 class. Eleven boats finished.

At 36, mom finds joy from her baby
By Kelly Reel
Student Writer

What do Jill Claxburgh, Jayllyn Smith and Dorothy Garsky have in common? The fact that they are in their 30s and have recently given birth.

Dorothy Garsky is a 36-year-old room supervisor for Career Planning and Placement at SFS. She is also 36 years old and the mother of a son, Mike, 9, and a daughter, Sarah, now 3 months old.

I didn't foresee another child seven years ago," Garsky said. "Whenever anyone asked me about this subject, I always said, 'Oh no, there's no way.'" Garsky is not alone in the category of women who are reconsidering the idea of mothering. In the United States, there has been a 12.2 percent rise in the birth rate of women who were once thought to be slightly beyond their optimum child-bearing years - the 20 to 34-year-olds.

"When I took my son to first grade, everyone thought that I was his sister," she said. "Now, when I take my daughter to school, they'll think that I'm her grandmother," Garsky said.

In Time Magazine, Washington child psychologistarlotta Mles said that she sees the shift toward mature motherhood as a "very prudent step." Women no longer think that in order to be equal they have to take something fundamental away from themselves. Individually, they are no longer afraid to be having a family."

Garsky said, "Having a career is fine, but there's more to life. You change your values after you have a child." In the same Time magazine story, Washington reproduction biologist Dr. Ceci Jacobson, stated that late-born children are more likely to be "tall and smart" and are better adjustment to their parents."

"People who get married without being married are less likely to be successful in life. This type of situation is not good for children," Garsky said. "Children of people in their 30s are better adjustment to their parents."

Garsky, who did graduate work on her master's degree in English, is temporarily leaving the job of mothering to Sarah's father, Don McQuarrie.

"Don loves staying at home with our daughter. At first, I was concerned that he wouldn't be able to take care of an infant, but now he's better at it than I am," Garsky said. "Anyone can change a diaper, but not everyone enjoys doing it. Don and Sarah enjoy each other during the day. In the evening, it's my turn to play with her."

In August of 1981, Garsky and McQuarrie "decided to have a baby," because they thought it was important to their relationship. "I felt that it was important for us to have at least one child," Garsky said. "Although this wasn't a major concern of Don's, I was afraid, though, that he would decide later in his life that he wanted a child," Garsky said. She also mentioned that McQuarrie's relatives were "really excited about Sarah, because they never thought that Don would experience being a father." For those who choose to have children in the later years of life, some facts must be taken into consideration. In the United States, one of every 10,000 women giving birth will die in a year's time. However, this percentage is much lower in countries where women are able to have children in their 20s. Women in the 35 to 39-year-age bracket have five times the risk of women in their 20s and those over the 39-year-old age bracket have 10 times the risk of women in their 20s. However, the health of the individual must be taken into consideration when determining risk. "I don't have any problems with my pregnancy. In fact, I didn't go to the doctor until I was seven months pregnant," said Garsky, who "doesn't believe in doctors."

HAVE LATEX, WILL PAINT anything. Need to sell latex paint. Negotiable 5% to 10% on per room, (paint is already in the store) they prefer painter. Paint guarant. Free.
City sets goals to help disabled

By Jack Wallace
Staff Writer

Congress and President Reagan have declared 1982 the National Year of Persons with Disabilities. Communities across the United States are encouraged to form Community Partnership Committees and the city of Carbondale is one of just two.

A 12 member steering committee has been formed to set goals and objectives for the Committee on the Rights of Persons with Disabilities, which will be formed at a planning meeting set for 7 p.m. Dec. 2.

Cleveland Matthews, the city's affirmative action officer, said he "doesn't want the public to get the idea this is a city government project. We hope to get the whole city involved." At the suggestion of Don Dalensie, a steering committee member, students from SIU will be invited to compete for cash awards, books and tickets. The words will be made to winning committee members among the 1800 Community Partnership Committees throughout the United States.

The National Office on Disability, a private, tax- exempt group, was instrumental in setting the standards for the awards.

Hotelling said a counselor at the Carbondale Citizens Center, said he "hopes the city will come through" on the project. "The every day possible to enhance the quality of life for people with disabilities of any kind."

Some said SIU has been "very helpful in providing senior citizens information on the needs of senior citizens" and that they "would like to do something to help the senior citizens of the area.

Seminole Aikman, city council member and liaison officer for the meeting, said he "would like to make the project as big as possible to drive for our senior citizens to go out and also give them tickets to attend the meetings." 

What we want to do is get a Community Partnership program going in Carbondale," she said.

The Community Partnership Committee will be responsible for implementing goals set by an Annual Yearly Disabled task force in 1981 and approved by the City Council in August.
Art School offers trip to Italy
for study of 'splendid' works
by Phillip Fiehler
Student Writer

The first session of "Studio and Art History in Italy" is scheduled for summer, 1965, sponsored by the School of Art, in cooperation with the Division of Continuing Education.

Participants in the eight-week program, beginning in May, will spend six weeks in Paestum, Italy, discovering the Mediterranean Sea and one week in Rome and Florence. Enrollment for the trip is limited to 30.

The program's director, Sherwood A. Fehm Jr., associate professor of Art, said, "While we are aiming at SIU-C students and other people living in the Southern Illinois area, the program is open to anyone from anywhere." Fehm said that people not wishing credit may audit the program.

Fehm in Italy will be Robert Pauson, associate professor of Art. Fehm received assistance from James E. Sullivan, assistant professor in Art, with the initial planning of the program over one year ago.

In cooperation with the School of Art, participants will study their own art works, and Western Civilization's most splendid achievements." Fehm said. Up to nine credit hours, graduate and undergraduate, will be offered among seven classes. The courses will be taught by School of Art faculty.

"We've been invited by the University of Salerno, north of Paestum, through grants, to develop an interdisciplinary program between Salerno and the SIU System," Fehm said. The University of Salerno will also offer a short non-credit course in Italian.

Fehm said that School of Art faculty members have been considering starting an Italian unit with other departments.

"Some students in the Cinema and Photography Department have expressed interest in the trip," Fehm said. "Programs of this sort will be set up on an independent study basis."

Fehm, 42, has spent nearly four years on various recent visits to Italy. "Our programs give students the opportunity to meet the Italian people and see the surrounding area," he said.

Fehm said participants will stay in Paestum one week, to get familiar with the area, and to see what extent we have developed separate and dependent rights for children." The meeting of the ACLU is open to the public and attendance is free.

A mini-tour will be given of the newly dedicated Lerner Law Building, at 7 p.m.

Children's rights to be discussed

Dan Hopson, dean of the SIU-C Law School, will present the development of the children's liberation movement and how it relates to youths' civil rights at 7:30 p.m. Wednesday in room 119 N. Washington.

Hopson's speech, which will be sponsored by the Southern Illinois Chapter of the American Civil Liberties Union, is entitled, "Do Children Have Civil Rights?" and will touch on the civil rights of children in terms of schools, the juvenile court, guardians, states' responsibilities and U.S. Supreme Court decisions.

I will discuss the problems relating to the development in the last 15 years of the children's liberation movement," Hopson said. "The meeting of the ACLU is open to the public and attendance is free.

A mini-tour will be given of the newly dedicated Lerner Law Building, at 7 p.m.

SPC chair learns media job

By Linda Stockman
Staff Writer

Dale Shepherd uses skills he's learned as a radio and television major and advertising minor to do the job of Student Programming Council promotions chair.

Class experience helped him in dealing with advertising media and writing press releases and posters, he said. His responsibility is to promote SPC as an organization. "Who we are and what we do. I'm a spokesman for SPC, but I speak more to the media," he said.

The committee also promotes individual events:

"Everyone at SPC is involved with promotions, but I organize it," he said.

Shepherd, 21, from Crestwood, said he's made a few changes since he became chairperson last spring.

He changed the focus of the committee from general promotions to a system that includes individual events. "The promotions position is more important to the council now," he said.

He knew nothing about SPC before joining the promotions committee last fall, he said. "When I realized SPC's importance to campus, I decided I'd like to become involved in that area of things," he said.

"I had no idea at the experiences to be gained. It's a tremendous experience working with the media and all the committees. I have an all-around knowledge of SPC, and I feel I could work on any committee and know what's going on. It's part of my job," he said.

U.S. prison population increasing

WASHINGTON AP - The number of federal and state prisoners increased by 8.9 percent in the first half of this year, according to the Justice Department.

The department's Bureau of Justice Statistics said Sunday that the rate of increase continued for the rest of 1982. It would make the largest annual percentage growth in prison population in at least 36 years.

There were 394,336 inmates as of June 30, the bureau said. The growth rate would be equal to 14.3 percent for the full year, which would be 2 percentage points higher than any annual increase since the government began keeping statistics in 1950.

The increase in prison population exceeded 10 percent only four times since 1950: 11.6 percent in 1957, 12.2 percent in 1958, 10.1 percent in 1953 and 11.8 percent in 1981.

The bureau attributed the current increase in large measure to new state laws that impose mandatory sentences and tougher parole restrictions. Four states have abolished parole altogether.

The growth in prison population is outpacing the increase in the rate of arrests in recent years. The bureau said.

There should be a file for everyone when the Calipre Stage presents "Have I Got a Story for You?" at 8 p.m. Thursday through Saturday.

The 12 tales by lou Tolstol and haga Rossetti Singer have been adapted and are directed by James Van Helsing and will be shown in the Calipre Stage on the second floor of the Communications Building.

Tolstol and Singer are renowned authors of critically acclaimed work. Tolstol is best known for his classical works "War and Peace" and "Anna Karenina." Throughout his adult life, Tolstol has written fairy tales and published them as readings in "Framers." A book written for Russian peasant children.

In 1962, Singer was awarded the Nobel Prize for Literature and is widely known as one of the folk tale genre.

Tickets are $2.50 and are available at the Calipre Box office. They may be reserved by calling 572-2001. Tickets will also be available at the door on performance nights.

Calipre Stage tales slated

Shepherd, 21, from Crestwood, said he's made a few changes since he became chairperson last spring.

He changed the focus of the committee from general promotions to a system that includes individual events. "The promotions position is more important to the council now," he said.

He knew nothing about SPC before joining the promotions committee last fall, he said. "When I realized SPC's importance to campus, I decided I'd like to become involved in that area of things," he said.

"I had no idea at the experiences to be gained. It's a tremendous experience working with the media and all the committees. I have an all-around knowledge of SPC, and I feel I could work on any committee and know what's going on. It's part of my job," he said.

U.S. prison population increasing

WASHINGTON AP - The number of federal and state prisoners increased by 8.9 percent in the first half of this year, according to the Justice Department.

The department's Bureau of Justice Statistics said Sunday that the rate of increase continued for the rest of 1982. It would make the largest annual percentage growth in prison population in at least 36 years.

There were 394,336 inmates as of June 30, the bureau said. The growth rate would be equal to 14.3 percent for the full year, which would be 2 percentage points higher than any annual increase since the government began keeping statistics in 1950.

The increase in prison population exceeded 10 percent only four times since 1950: 11.6 percent in 1957, 12.2 percent in 1958, 10.1 percent in 1953 and 11.8 percent in 1981.

The bureau attributed the current increase in large measure to new state laws that impose mandatory sentences and tougher parole restrictions. Four states have abolished parole altogether.

The growth in prison population is outpacing the increase in the rate of arrests in recent years. The bureau said.
Hitler's armored car sold again, to German museum

SCOTTSDALE, Ariz. (AP) — The car that carried Adolf Hitler triumphantly through the streets of Germany is going home for the first time in nearly 50 years.

The gleaming black Mercedes-Benz 770K staff car leaves Phoenix on Monday en route to Belgium, and will be displayed at the Automobile Show in Essen, Germany, from Dec. 1-10.

Tom Barrett of Scottsdale, who collects and deals in antique cars, sold the Mercedes to the Museum of Brussels Fine Automobiles.

It is the car's first trip to Europe since it was liberated by the 101st Airborne Division of the U.S. Army in 1945 and sold to a collector.

Barrett has owned the car three times. He first sold it in 1972 for $14,000, but bought it back only to sell it a second time "for a higher figure," he won't say what the sale price was this time.

The eight-passenger, armored-plated, bullet-proof convertible sedan was built in 1940 to Hitler's specifications. Barrett said. It weighs 12,800 pounds and has a siren.

The car has a parade pedestal underneath the right front seat and a bullet-proof shield that cranks up around the rear passenger seat. In the dashboard is a holster for a German Luger.

How to follow Fellini.

Women's rugby club loses four

By Jackie Rodgers
Sports Editor

When you're hot, you're hot and when you're not - you're lucky.

That's how it was with the SIUC women's rugby club this weekend. The women ruggers dropped three matches and forfeited a fourth at the five-team Illinois Sub-Union Tournament in Champaign.

"We played really well, really really bad," said club president Becky Larkin.

The SIU-C club traveled to Champaign on Tuesday night and used its 13-person roster to play six matches, a different one every hour.

This fall, the club had used about 10 more bodies in the lineup since they came off the calendar. They could have used about 10 more bodies in the lineup since they came off the calendar. The game was won in the trenches.

That's true. The defense was set up for the linebacks to make the tackles.

Butler talked at length about his defensive linemen, who have occupied so many blockers that Butler doesn't remember getting blocked very often lately. "Make sure you put your names in there," he said.

The linemen who have started Butler and left linebacker Fabray Collins so well this season are now guarding Tracy Oakley, Duncan Leaver and Sterling Haywood, and taking on the likes of Ken Foster and Louis Lockett. "Put their names in there," said Butler again. "I'm sincere about this." (Old Style $1.25)

Saluki Coach Roy Dempsey is less reticent about talking about his leading tackler. "He's one of our most outstanding players," said Dempsey. "Butler had earned his second successive SIU defensive player of the week award by participating in more than 30 tackles against Indiana State. He had done the same thing against Tulsa the previous week.

When he tackles you he puts you away," said Dempsey. "Butler doesn't score acres as the assassin type of linebacker. He seems perfectly content to stay in the background, which might be possible if his name wasn't coming over the public address system so often." (Busch Blast $1.25)

"I try to stay humble," he said. "There are a lot of people who are trying to save what has turned into a disappointing season. But we've got to win these next two games to salvage the season," he said. "The only team that should have beat us, that was ready better than us, was Florida State."
SWIM from Page 20

"We've got quality and depth," the third-year Saluki coach said of his 22-swimmer squad. "We've improved in the sprint events and strengthened in the fly events. There's none we haven't strengthened in. The team sets some pretty ambitious goals, but we feel we're achievable."

WINS from Page 20

Guidelines. Bunyan, who transferred from Murray State this year, must sit out because of an overdeveloped heart. His personal best time of 1:30.36, however, would be an event in itself.

For John Belcher, they were the two parts of the Cape Girardeau Marathon on Saturday.

Belcher, riding for the SIU-C Phobians Cycling team, finished the competition third overall in the 100-person field.

For most people, a 20-mile cycle race or a 16-kilometer run would be an event in itself.

Ambitious women swimmers set top-ranked goals for season
By Brian Higgins
Staff Writer

Small goals aren't characteristic of Coach Tim Hill's winning ways. His women's team, for instance, is set on becoming national champions this season. "Under new National Collegiate Athletic Association regulations," said Hill, "the country's swim squads were divided approximately in half, depending on the defunct Association for Intercollegiate Athletes for Women and under NCAA regulations."

Hill's optimism isn't unfounded. He has six All-Americans returning from a squad that finished ninth in Lincoln, Neb., in March. He has picked his team to finish among the top 10 in the nation this season. The Salukis, ranked 11th by the National Collegiate Aquatics Coaches Association, have four events in the 1974 NCAA championships, including a place finish in the 200-meter freestyle. Amanda Martin, sophomore, won the AIAW championship in the 3-meter breaststroke as a freshman. That time was good enough to put her among the top three in the nation (combining AIAW and NCAA meet times). The Salukis' breaststroke specialist set school marks in that event at distances of 50, 100 and 200 meters last year. Captain Paula Jansen is a Canadian who earned All-American honors for the Salukis. Jansen finished 12th at AIAW nationals in the 200-meter breaststroke and ninth in the 100-meter event.

Jansen's performance caught the eye of Coach Rick Lienhe, the meet's high scorer, in the 1,500-meter freestyle.

Hill hopes that the Salukis will be able to forge through what may be their toughest season ever.

"The biggest thing this year is that the team's really close," Hill said. "There's lots of room for people to improve within the program. The team will be challenged consistently. We have as tough a dual-meet schedule as anyone in the country."

That dual-meet schedule commences this weekend, when the Salukis travel to Bloomington, Ind., to meet defending Big Ten champion Indiana Hoosiers. On Saturday, SIU-C will journey to Ohio to meet the Bearcats of Cincinnati. That meet will be even tougher than the Hoosiers.

Besides a strong showing at Nationals, Hill has set winning the National Independent Championship and a Gateway Collegiate Athletic Conference title as this season's priorities. See SWIM, Page 19

SIU-C runner Bunyan wins first marathon
By Dean Kirk
Staff Writer

When SIU-C's Chris Bunyan decided to run in Sunday's Chicago Marathon, he was doing it to help keep in shape for the Salukis' track and cross country seasons. If this showing in that race is indicative of what he can do for SIU-C, then the Salukis will have themselves a fine runner.

Not only did the 28-year-old Bunyan, who hails from Great Britain, win the marathon, his time of 2:17:30 broke the last year's record for the event. And if that's not enough, Sunday was the first time he had ever run a marathon.

Bunyan was quite pleased with his performance Sunday, saying that he felt great after winning the race. "I guess you could say it was another milestone in my career," he said.

He also felt great during most of the race, hurting only between the 19th and 20th mile marks. That mile was tough for him since the only time he had ever run that far was when he placed second out of 100 in England's Finchley-20 Miller race in 1974.

Babcock makes comeback with flair
By JoAnn Mareckiowski
Associate Sports Editor

Brian Babcock is back on top again.
An All-American, Babcock received nearly unanimous votes this weekend after a 10-month layoff following a knee injury. Any doubts were coming back were left behind at the Big Eight Meet in Lincoln, Neb. Babcock scored 112.60, his highest score of the season, to place him third behind Nebraska's Phil Cahoy and Scott Johnston and qualified him for the World Games, Universities Games and Pan American games.

After an operation to reattach the ligaments in his left knee and months of exercising and cycling, Babcock said he now feels strong as his right. "I feel it," he said. "It's not like it's brand new. It still gets stiff, and will be something I'll feel all the time. It still will swell up sometimes because of the weather. But it does feel really strong.

Coming back from any injury brings some uncertainty, and Babcock was eagerly awaiting his first meet.

"I was nervous, just excited," Babcock said. "It was really tough to get back to my normal training. But you're not quite sure of how many times you can get it in."

"The fear's still there, but that's usually before your first meet. (Once I get up on the apparatus, I forget it."

Babcock said his return has "meant a lot to a lot of people."

"I think the single best thing is the support I've received from the Salukis coach. He's always been a positive influence. But I wonder how many times a kid can get back on top." Babcock battled back from a devastating weekend. His knee injury 10 months ago to earn his highest all-around score at the Big Eight Invitational last season. The injury wasn't itself the most discouraging thing, Babcock said. "It was having to watch people doing what I once did. It was the frustrating part."

"Babcock's performance has been even more amazing," according to Meade.

"I talked to him over the summer and he told me about what he was doing," Meade said. "I started wondering but the last time I heard from him he shut up and let him strengthen him."

"I started tumbling again when he came back here, and when I saw him do a double hand spring, I knew he was back."

Meade said Babcock had lost some confidence because of his weakness and did exercises to build up his strength. "I was surprised how fast it came back," Babcock said of his return. "I didn't think I'd be doing dismounts in January."

As he began regaining his old form, Babcock, who holds three Saluki scoring records and is tied for a fourth, began setting goals for the season opener.

"One was to get 112 and one was winning the meet," he said.

"I'm happy I accomplished one because it was tough to win with the likes of Phil Cahoy and Scott Johnston."

Consistency in the 12 routines of company and options was needed.

Babcock's performance started at a 9.3 average, and that doesn't leave much room for error," Babcock said.

Babcock scored a 9.53 and 6.56, but fell to 8.65 on the parallel bars.

Babcock said he missed a lot of concentration as well as the dismount when he committed a large form error and almost fell off.

"I was shaky all the way through, though not just on p's," he said.

Though reaching his highest all-around score, Babcock said he can improve, and as setting a new personal record was only top 10 Invitational in two weeks.

---

"I decided to take off and see who would come with me," he said. "All during the three days, four or five of the crowd wasn't as conspicuous as they were when I was first running.

When they became conspicuous, though, I could provide Bunyan with a lift."

"It's surprising what a crowd does to you," he said. "It lifts you tremendously." Because of NCAA
