Candidates to face off on unemployment

By Bob Dwainery
Staff Writer

Unemployment is expected to be a leading issue when U.S. Rep. Paul Simon and challenger Pete Priness debate at 7 p.m. Monday in Student Center Ballroom B.

Simon, D-Distric 24, said Friday that the economic policy promoted by the Reagan administration must be modified "because figures released Friday showed unemployment at a post-Depression high."

The latest unemployment figures mean we must modify economic policy that is hurting all working men and women," Simon said.

The U.S. Labor Department reported Friday that 10.1 percent of the work force was out of work, the highest rate since August 1982, and the unemployment rate for Illinois in September was 8.2 percent.

Simon blamed the jobsless rate on high interest rates and 'record-breaking deficits which must be brought down,' he said.

"We must enact policies that will bring people back on the job," Simon said.

Gordon Wayman, campaign manager for Priness, said the latest unemployment figures "reinforce our campaign."

Simon campaign manager Bill Tapella said the jobsless rate in Southern Illinois has not risen as fast as the rest of the state and nation.

According to Tapella, unemployment in Southern Illinois has increased by 2.3 percent since Reagan took office. It has increased by 2.7 percent across the country, he said.

The debate, sponsored by the Student Programming Council, Expressive Arts Committee, and Student Center, will be open to the public.

The debate will be from 7 p.m. to 9 p.m. and will be open to the public.

Gus reports on the success of Clean-up Day are based on a lot of rubbish.

By William Jason Yong
Staff Writer

Although the event did not attract the 1,500 people that the Undergraduate Student Organization had hoped for, organizers called it a success.

The third annual Carbondale Cleanup Day, held at Turley Park Saturday, attracted about 1,000 participants who collected about 2,000 tons of trash that was collected by about 1,000 participants in Carbondale Cleanup Day.

USO Senator Steve Brauckl, senior in biology, weighs some of the 2,000 tons of trash that was collected by about 1,000 participants in Carbondale Cleanup Day.

Participation goals reached as city gets a clean sweep

By Robert Green
Staff Writer

The University's plan to purchase the Brey Building will be discussed by Ralph E. McCoy, dean of libraries, at a Faculty Senate meeting Tuesday.

McCoy, who retired six years ago, recently expressed opposition to the proposed $1.6 million purchase. The building, located in the Illinois Library, would be used for library storage.

President Albert Somit and Dean of Library Affairs Kenneth Peterson are also expected to attend the meeting at the Student Center.

"The solution is actually worse than no solution at all," Peterson said last month.

"If we do not have a better arrangement for years to come," McCoy said last month.

"We need a strong and effective plan. McCoy also said he was "concerned about the board's equal dollar rate for all faculty, after promotion increases have been deferred.

The Graduate Council Thursday passed a resolution recommending that a portion of the 3 percent increase be allocated for promotions, and the remainder be distributed across the board on a percentage basis.

Herbert Donaw, Faculty Senate president, said the senate's resolution is similar to the administration's.
Investigators narrow leads in Tylenol poisoning incidents

CHICAGO (AP) — Officials investigating the deaths of seven people from four-laced Extra-Strength Tylenol capsules said Friday four "primary" leads Sunday as a man disguised as a suspect set fire to a car, and found a hearing on extortion charges. Jersery, a second-year student who attended a hearing on extortion charges. Jersery, a second-year student who attended

Israelis outline their position for troop recall from Lebanon

JERUSALEM (AP) — The Israeli government on Sunday outlined an ultimatum to the Lebanese government to withdraw its troops from Lebanon in a Cabinet meeting, in which Defense Minister Ariel Sharon strongly lashed out at the U.S. and Britain.

In a statement after a Cabinet meeting Sunday in which Sharon lashed out at the U.S. and Britain, said his country needs to be "credible" in withdrawing its troops from Lebanon in a Cabinet meeting that is the first of its kind since the army's withdrawal from Lebanon in 1982.

The United States was Israel's friend, Israel has its own ideas and how to secure its security, said Philip C. Habib and Morris Draper are preparing efforts to nudge the foreign arms from Lebanon.

The resolution states that "it has become the practice of the Unravinry to simply give a letter of non-renewal to all term appointments regardless of their probable chances of being retained, thus totally shrouding the original intent of the practice."

DEAN from Page 1

percent was left over after promotions, everyone would get at least 25 percent of that amount, he said. Donow said, "The alternative would be to distribute it by a percentage of current salary, which would disadvantage lower paid people."

In other business, the senate will discuss a resolution requesting that the policy on non-renewal of faculty and administrative-professional appointments be amended.

The resolution states that "it has become the practice of the Unravinry to simply give a letter of non-renewal to all term appointments regardless of their probable chances of being retained, thus totally shrouding the original intent of the practice."

Donow said, "We were a little disturbed that people were being given contracts at the same time were being discharged."

COUNCIL TO DISCUSS CROSSWALK SAFETY

The status of the Grand Avenue crosswalk at the Student Union Center will be discussed by the City Council at its informal meeting at 7 p.m. Monday in the City Council Chambers, 607 E. College.

Cook, a senior student at the University of Illinois, has proposed that the crosswalk be improved to prevent injuries to pedestrians. He has also suggested the installation of advance warning signs at the crosswalk.

The report proposes that advance warning signs be installed 200 feet before the crosswalk and that a two-directional floodlight be placed by the University on the south side of the Grand Avenue crosswalk. Pending the report's recommendation, the City Council will consider moving forward with the project.

In other business, the council will discuss the proposed transfer of Springfield School to the City of Carbondale for use as a senior citizens community center.

Under the proposal, the vacant Springfield School and property would revert to the city from the School District. The deed, which was issued in 1968, states that when the property was no longer used for school purposes, it would be returned to the city.

Decline in job growth expected to hit Illinois

CHICAGO (AP) - Shrinking manufacturing, publishing and transportation sectors are expected to slow overall job growth considerably in Illinois over the next decade, making continued high unemployment likely, state officials say.

"It would be naive to think we are going to be in trouble for some time to come," said Arnold Barnett, research economist for the state labor department. "Illinois has just kept too many jobs that are never going to be there again."

The forecast was made after Friday's announcement that Illinois' unemployment rate rose to 12.5 percent in September, highest since the Great Depression. The national jobless rate last month was 10.1 percent.

Robert Barnett, research specialist with the labor department, said the number of manufacturing, publishing and transportation jobs in Illinois are now expected to decline by almost 30 percent by 1980.

PRELIMINARY PROJECTIONS - which exclude agricultural work and the self-employed - are that total jobs will increase from 4,841,000 in 1980 to 4,990,000 in 1990. But that increase is less than one-third of the job growth that occurred in the state between 1970 and 1980.

Merging, construction and service jobs are expected to decline, but at a rate less than the roughly 10 percent pace seen during the 1970s, Barnett said.
DO WHAT I TELL YOU, not what I do" seems to be President Reagan's rationale with the proposed balanced budget constitutional amendment that was recently defeated in the House of Representatives. After presenting a record breaking deficit budget for the fiscal year 1986, the President wanted Congress to pass an amendment that would make it unconstitutional to pass deficit budgets. While breaking all limits himself, he seeks to impose limits on the Congress.

**VIEWPOINT**

**Human life amendment won't stop abortions or other problems**

By Anita Jackson

Staff Writer

The abortion battle has been going on for what seems like an eternity. It is a battle that will probably never end because both sides have their definite views about what is right and wrong.

Since 1973, there have been several Supreme Court rulings on abortion, the most important one being Roe v. Wade in 1973. The court in Roe ruled that a woman has a right to obtain an abortion during the first trimester of pregnancy, because of her constitutional right to privacy.

Since that ruling, opponents of abortion such as the National Right to Life Committee have tried to get the Roe decision reversed by changing the traditional definition of person to include only the fetus, or embryo.

The NRLC views the large number of abortions as a social problem and others see it as a moral problem. A periodic survey, according to the NRLC, is to add a human life amendment to the U.S. Constitution. The amendment would declare a fetus as a human being from the moment of conception and it would ban all abortions unless necessary to prevent the death of the mother.

Along with the NRLC, groups such as the Moral Majority see abortion as killing another person. Others have said that it violates God's commandments.

On the other hand, the proposed amendment has stirred up fear in some women who support abortion. The leading opponents to the amendment are women and they fear that it would interfere with a woman's right to family planning and birth control.

These women also feel that the proposed amendment would cause additional subordination, inequality and repression of women. They say the proposed amendment would define women as baby producers rather than as persons who have a right over their own bodies.

Today, as in the past, attitudes toward abortion show society's wider views about women. The Galanter-Jaffe Statistics show that there has been a steady increase in doctors who think a woman should have the right to obtain an abortion. The level of approval was at its peak between 1967 and 1977. In 1978 there was a slight decrease in approval, but it increased again in 1980.

Between 1975 and 1980, the National Opinion Research Center asked people if they thought a woman should be able to obtain an abortion because of a danger to her health, rape and the possibility that the child would have a defect. People were also asked if they thought an abortion should be given to a woman from a low-income family who cannot afford more children, an unmarried woman and a married woman with a would-be child.

The results of the poll show that there has been an increase in support for the first three reasons rather than the last three.

It seems quite obvious that with or without a human life amendment, women will continue to seek abortions because there will always be unwanted pregnancies.

Ironically, people opposed to abortion are also often against sposorial rape, the prevention of birth control information to unmarried sex. So, maybe the amendment would get rid of one problem but cause many other problems.

**An unpopular stand on breastfeeding**

I seem to take an unpopular view on breast-feeding. Ms. Jihan (DEP, Sept 15) stated that breast-feeding is "a natural affair... unsurpassed in humans for its simplicity and love." In other letters, breast-feeding has been described as natural, normal and a beautiful expression of love.

The act of sex is also natural, normal and an expression of love, but we don't perform sex in a restaurant. Requiring women to breast-feed in public is a courtesy to others. We would not find it heart warming to see a mother breast-feed her baby in a restaurant, and my opinion is not a result of sexual repression.

By Garry Trudeau

BREAST-FEEDING is a normal function, but so are defecation, urination and flatulence.

Discretion from this behavior in public separates us from other mammals. There is a time and a place for everything.

— Dan Chambers, Junior, S. T. C.
Metheny conquers ‘limitations,’ finds inspiration in electronics

By Tom Travin
Associate Editor

Pat Metheny is an award-winning guitarist whose commercial success has been better than the average jazz musician’s. Nov. 27. Metheny has been smothered with accolades for his fresh approach to playing a unique, ringing melodicism that transcends the fine line between rock, jazz and blues. However, even though he has played professionally since he was 14, he said that his playing has only recently started to come together and reach a point that he is satisfied with.

“I can say that even in the last two years, my own playing has grown a lot,” he said. “There was a period when I was playing and touring a lot with Jack DeJohnette and Gary Burton and the American jazz quartet. It was a very experimental period in the way I was playing. I knew a lot of things that were about half way there, just broke open. A lot of things that were associated with my style were really difficult, but I think they have opened up his sound and his relationship to things that he can do. It’s like walking into each day with the feeling of ‘what’s going to happen today?’

“We’d heard of us and that this was happening – there was a lot of technique and real quick. I had to learn how to simulate things and I didn’t play the instrument very well. I couldn’t pick very fast, so I had to slide around a lot. I’m glad it worked out that way — I’m glad I didn’t have a lot of technique real quick. I had to learn to play fast without ever really playing fast, and I can really play last in addition to simulating it.”

One important factor in Metheny’s development has been his collaboration with Lyle Mays, a whirling dervish of a keyboardist who has obviously had a great effect on Metheny’s music.

“Lyle’s just been the greatest. He’s such an incredible musician, and we’ve grown up together. We’ve both written and recorded a lot of music together, and the way we’ve both felt lucky is that we can work on it. We really can do things to set each other up, and it’s nice to have that.”

Metheny and Mays first met when they were in high school in Texas.

“We heard about each other through a grapevine. I’m from Missouri and he’s from Wisconsin, and they finally played at a jazz camp — in fact, many of them took jazz camps. I knew a few people on the faculty and so did he, and we kept telling each other about each other. We finally met up and played with Gary Burton and he was down at North Texas State.”

Another important factor in the development of Metheny’s recent sound has been his experimentation with a variety of electronic devices. He has begun playing a Roland guitar synthesizer and another guitar-like instrument is to concert, and they have opened up his sound to encompass a wide spectrum of possibilities. He’s always been interested in electronics anyway,” he said. “The Roland really feels like a musical instrument. And in many ways, it can be said that the guitar is ultimately a much more expressive way of controlling the lot of electronic sound.”

“Those new instruments are inspiring in their own way. When you come up with a new tone, it makes you want to find a new piece to figure it out. — I’m always trying to come up with new tones and new ways to keep experimenting.”

“I want to keep this group going as long as I can.”

Deodatte Prize Backstage After his concert at Shryock Auditorium. He said his plans may include a live album in the near future.
Concert audience was 'polite'

Metheny band dazzles crowd

By Tom Travis
Associate Editor

It was the best show at SIUC in several years. The band was obviously excited and emotionally involved with their music. The crowd was worked up to the point that they cheered loudly after each musician's solo and applauded wildly after each number. The management of Shryock Auditorium called the audience "the most polite we've ever had for a rock type show." It was the Pat Metheny Group, making their long-awaited return to Shryock this time around bassist Mark Egan is gone, replaced by Steve Rodby, a Joliet native, and the group's sound has been augmented by Brazilian percussionist Nana Vasconcelos and a wide variety of electronic gadgets. Rodby handled Egan's bass parts extremely well and is even a better player for the group in that he plays with them instead of continually trying to be a soloist. Vasconcelos has added a wild flair and a rich texture to the group with his percussiveness and his playing seems to inspire the other group members, especially Metheny. The group opened the show with "Phase Dance" from the album, "The Pat Metheny Group." It features Metheny's use of harmonics on 12-string guitar and ringing solos by keyboardist Lyle Mays.

One facet of the group that is fascinating is that they are always composing, even while on the road. The next set consisted of what Metheny called "a world premiere" — all the music had been written in the last week — and there were no song titles, which Metheny emphasized by saying, "I wish I could say 'and it's called,' but it isn't." The first new number was "in the jazz tradition," Metheny said, and carried a frentic jazz rhythm that Rodby and drummer Danny Gottlieb seemed very comfortable with. It was the first song on which Metheny played his Roland guitar synthesizer, which is a See METHENY, Page 7.

Atomic Veterans Association to hear compensation plans

The issue of what to do for thousands of persons exposed to radiation during nuclear weapons testing will be the subject of a presentation by the National Association of Atomic Veterans. The presentation will be at 10 a.m. Monday in the Student Center Auditorium. Speakers will be U.S. Rep. Paul Simon, D-24th District, and Joseph Cavins, Southern Illinois NAAV coordinator. Cavins says that he is one of about 250,000 civilians and military personnel who took part in atomic testing in the 1950s and 1960s. Simon is expected to outline his proposed legislation which would provide compensation for military personnel exposed to atomic tests.

As a result of being exposed to radiation during testing, Cavins says that he has an incurable skin disease. Cavins said that the NAAV has located about 22 of these veterans living in Southern Illinois. One of those veterans is Robert H. Farmer, of Chester, who says that exposure to radiation during atomic testing has given him cancer and caused genetic birth defects in some of his nieces and nephews.

Atomic Veterans Association in atomic compensation campaign

Cavins appointed to planning committee

The issue of what to do for thousands of persons exposed to radiation during nuclear weapons testing will be the subject of a presentation by the National Association of Atomic Veterans. The presentation will be at 10 a.m. Monday in the Student Center Auditorium. Speakers will be U.S. Rep. Paul Simon, D-24th District, and Joseph Cavins, Southern Illinois NAAV coordinator. METHENY from Page 6

counting-looking guitar with non-traditional electronics. It is played through a synthesizer and the electronics make up the group's sound. The original and stretch notes beyond their normal resonance, which creates the unique sound.

The new few numbers involved a great deal of improvisation. Metheny said the group likes numbers that "let us up as improvisers, but are still good homes" and most of the new pieces manage to do both.

One of them was a haltingly poetic, which combined Metheny's acoustic guitar. Vasconcelos' tender percussion and bird noises and May's delicate piano phraseology. It was an introspective piece which combined with Shryock's intimate atmosphere for a warm experience of band interplaying with audience.

After another new number with heavy percussion between Vasconcelos and Gottlieb and a percussive jam by all band members that really showed their talents in playing together, the group went into a mosaic piece entitled "Are You Going With Me?" from "Turn Left," their latest album, which gave the audience a chance to see Metheny create his own solo music. The next number started with Vasconcelos playing the tambourine and added an African percussion instrument that created a strange new effect. When struck, it gives off a hollow resonance that really contrasted to Metheny's guitar playing.

Ornette Coleman's "Turn Around," a bluesy, bare-bones jazz number was next and the group followed that with a song that featured what Metheny termed "a new instrument you may want to check out."

It resembled a guitar but had no strings or pickup and was played by touching what would normally be a fretboard. It had a pleasing sound which sounded like a vibraphone with twice the resonance. The crowd was obviously impressed and really and shilled the whole show as Metheny created a wide spectrum of sound.

On "As Falls Wichita, So Falls Wichita Falls," Vasconcelos played everything from triangles to a sheet of aluminum. Metheny played harmonics on his 12-string while Mays brought out his own electronic and the ensemble created a strong, beautiful effect that the audience was not quite ready for.

"Jaco," Metheny's ode to bassist Jaco Pastorius, was next and Fooby got his first real chance to play his bass. "San Francisco," followed and Mays showed his expertise on the grand piano and the band treated the number delicately and with much emotion.

The encore, "Across the Heartland" and "American Garage," sent the crowd home with joy in their hearts and smiles on their faces. "American Garage" is the garage band's garage anthem. The tour de force replete with crashing major chords, crashing drums and ripping bass lines.

The band was obviously enjoying themselves throughout the show, but during "American Garage," they went wild. Mays did his best rock star impersonation and the rest of the group jumped all over the stage, belting out chorus after chorus and looking as though they would kick over their members and trash the stage. Its rock and roll flavor was the perfect way to end an evening of jazz.

Congratulations are in order for the Student Programming Council, the Associates Committee and the staff of Shryock Auditorium for bringing back the best concert for a long while. A "New City" to appear at SLU-C in the past five years.

Vacuum research is lecture topic

Man's attempt to deal with "nothingness" will be the subject of a lecture entitled "The Physical Richness of Nothingness" by Asa Zitter, professor in the Department of Physics and Astronomy, at 7 p.m. Monday in the Student Center Auditorium.

Zitter, a member of the American Physical Society, is looking for additional material on the "empty set" in his field of study, and is seeking students interested in advanced studies, Final talks at the Coalition for Allied Schools will be held Monday at 5 p.m. in the Student Center Auditorium.

Eligible writing All Sciences Association of America will hold its next meeting at 5:15 p.m. Monday in the Ag Seminar Room. Speaking on the future of careers in agriculture and allied fields will be discussing.

BLACKS IN Engineering and Allied Technology will meet at 6 p.m. Monday in the Sailer Room. All science majors are welcome.

FELLOWSHIPS: All students are able to apply for the United States. Eligible are women who will be majoring in art, music, drama, literature, or creative writing at UI, but not technically oriented.

In a philosophical talk describing the human notions of nothingness, Zitter said his talk will be "more than a philosophical talk describing the human notions of nothingness, and not technically oriented."

The invention of the "empty set" proved to be a tremendous leap forward," he said. The introduction of the "empty set" in mathematics and logic followed later. Zitter said he would also talk about the concept of "getting down to absolute nothingness."

As a research physicist, Zitter has worked for the Missouri Military Laboratories, the U.S. Air Force Weapons Research and Test Telephone Laboratories. He joined the faculty of SIUC in 1967.

Zitter's talk will be sponsored by the College of Science Lecture Series.

The Guide helps black size up U.S. colleges

By Lee Mitgang AP Education Writer

NEW YORK - An upcoming "Black Student's Guide to Colleges" rates the academic and social climate blacks can expect on 114 campuses, including some low marks for race relations at some of the nation's more prestigious schools.

Black-white student relations at the University of Michigan, for instance, are described as "the pits." Harvard and Radcliffe College were termed "impersonal." Black students are "dissatisfied and unhappy" at the University of Arizona, according to the book.

The guide quotes a black student at UCLA as saying, there is "an atmosphere of de facto segregation on campus."

But it gives rave reviews to the University of Texas at Austin, Oberlin College, saying the small Ohio liberal arts school "certainly has provided a welcome and comfortable environment for most of its black students." And tiny, selective Wesleyan University in Middletown, a small Ohio liberal arts school, got a "top" for black students.

The book will be distributed to students next spring by E.R. Dutton, who edited and compiled it. Barry Beckham, who read and edited the entire writing program at Brown University, said that the final manuscript was obtained by The Doubleday Publishing Co., New York.

The book focuses on prestigious, predominantly white institutions to many state universities and assembles many historically black institutions. According to government figures, about 1 million of the nation's 12 million college students are black.

Du Quoin alums will see slides of natural areas

Members of the SIU-C Perry County Alumni Club will look at the region through the lens of a professional photographer when they meet Tuesday, Oct. 18.

William (Doc) Horrell, professor of cinema and photography at SIU-C, will narrate a slide show on Southern Illinois at the 7 p.m. meeting in Du Quoin's Refectory Hall.

Horrell is co-author of "Land Between the Rivers" and photographed the book's scenes depicting different land forms in the region.

A 1960's film made in Du Quoin also will be shown at the meeting.

The actual writing was done by Brown University students, both whites and blacks, says Beckham, although he says he wrote seven profiles himself.

The praise for many schools is balanced by criticism for others in the guide, and Beckham said the picture the book provides of the black mood on American campuses is by no means all bleak.

"I think generally black students are fairly happy, certainly compared with past years. And I see instances of more maturity," he said.

As an example of that maturity, he cited a student quoted in the generally favorable profile of Case Western Reserve University in Cleveland: "It was a hard adjustment for me, but I made it after about one year. Sometimes the black jokes and the financial pressures became unbearable. But I had to keep in mind I wanted an education."

Beckham said his book also shows that many black students believe "it is important to go to predominantly white schools to be Brown University students. And it's important to interact with white people."

On the negative side, Beckham's book documents a white faculty drawn at an Ivy League school like Harvard, where 12 out of 730 faculty are black.

Copies of individual campus profiles were mailed by the author this week to each campus listed in the guidebook. Reaction is ranging from pride for the book's accuracy and fairness, to fury.

Harrison Wilson, president of historically black Norfolk State University in Virginia, reacted angrily in a telephone interview to a scathing profile concluding that "many respondents were not particularly satisfied with Norfolk State."

"Many?" said Wilson. "He talked to five students, and he says 'many'?"

New support groups forming to help gays 'sort out' lives

By Jeanna Hunter
Staff Writer

In this age of the computer and the media, the ideal symbol of true gay and lesbian acceptance would be a television commercial featuring a homosexual couple, according to Jim Croteau, graduate student in psychology and Gay and Lesbian Peoples' Union coordinator. Society is probably not ready for this type of complete integration and wholeness in the entire gay and lesbian community. Education is the answer for both gays and lesbians.

Until society accepts homosexual lifestyles as a natural alternative, however, support groups exist to help gays and lesbians cope with their choices. The gay men's and lesbian support groups seek to help gays and lesbians explore their choices, to let them know that their choice is okay, said Peggy Marshall, a graduate assistant for women's counseling.

Part of what we hope to do, Croteau said, is to give people a place to come and be themselves, consistent with who they are.

The six to 10-member support groups, which are forming now, meet on a weekly basis. During the meetings, members have a chance to talk about what is going on in their lives, Croteau said.

Topics discussed at these meetings include gays or lesbians learning to feel better about themselves, learning how to tell significant others they are gay or receiving support for an ended gay relationship, he said.

Croteau and Marshall said that all age groups from freshman to graduate student are represented at the support groups. But, Croteau said that the overall people at all levels of dealing with their homosexuality. Some, he said, are not out in the open while others are living completely open lifestyles. "It's really an advantage to the group."

The goals for the women's support group, Marshall said, are to help women go through the process of incorporating feelings into a lifestyle and to help develop a personal identity. But, the main goal, she said, is to overcome the negative feelings harbored for lesbians and gays.

In the past, the gay men's and lesbian support groups were sponsored through the human sexuality services, Croteau said. Now however, they are being sponsored jointly through the Counseling Center and Women's Services.

Marshall compares the gay and lesbian rights movement to the civil rights movement or the women's rights movement. She said full acceptance will definitely happen, just not in her lifetime.

One of the reasons why acceptance of gays as natural and equal is a long way in the future, is because society harbors a lot of negative attitudes toward the gay and lesbian lifestyle, Croteau said.

Marshall estimated that one in 10 people are homosexuals. She explained, however, that this figure is probably a low estimate because of the number of people in the "closet." People are becoming more and more open because gay people want to feel good about who they are, Croteau said. And, Marshall said, the door is open for seeing homosexuals as good.

Gay and Lesbian Awareness Week '82, October 26, 27, and 28, is an attempt by the GLPU to educate not only gays, but also society, to the homosexual lifestyle.

CCHS students learn by surveying public

By Sheila Washington

For the Carbondale Community High School freshmen who studied surveys in a social science class, firsthand experience was what they got out of the survey they undertook to do their own, last week.

"At first I didn't think they were going to go door to door, but when the project really started and they began to have fun," said Harold Emme, the instructor.

The questions posed ranged from the not so controversial issue of whether children under 16 should be allowed to enter video arcades to stranger issues of nuclear weapons, abortion, handguns, mercy killing and political favoritism.

The students devised the questions and then compared and contrasted results by age, sex, registered and non-registered voters.

Students started the project by dividing into several groups to decide what questions to ask and how they would pose them. Then, the entire class selected the questions to be used.

The results from the survey could not be called absolutely accurate. Emme said, because of the small number factors, they decided overall agreement in their results was pretty close to determining how Southern Illinoisans feel about current issues.

Devoted to their mission, the high school students began both the Carbondale and Delusto areas.

One question raised that would normally separate the boys from the girls, was whether 16-year-old females should be required to register for the draft. Results from the survey showed that females believed they should stand by for front-line battle just as males do.

Another question asked by the teens was whether the plea of not guilty by reason of insanity, as in the John Hinckley decision, should be considered as a legitimate criminal defense. Of the 173 people surveyed, 112 favored it while 123 opposed and eight had no opinion.

"Emme said that this was the first time he had used an institutional tool of this sort, and that he believes his students are now more skeptical of what to look for in surveys. He said that he thinks his students learned something from the project.

"From now on when they look at surveys, they will ask themselves important and intelligent questions about them that could easily slant its results. Such as, how were the questions worded, who was the surveyor, agreed that she and they're in and what race and where the factor."

Yasmine Saari, a senior, said she thought they would have too many responses and that her peers would now look at surveys more critically. She said that she saw vast differences in the answers just by looking at the geographical location of those surveyed.

Harriers rout Jayhawks on road

By Dean Kirk
Staff Writer

A complicated, longer than usual course, a rainstorm, a course that got off course, and an individual finish no higher than second deepened things enough to prevent the SIU-C men's cross country team from increasing its nine-team margin over the Jayhawks at Lawrence, Kan.

Coach Bill Cornell said that Kansas didn't have as many five of their top seven runners. But one they didn't lose was Greg Leibert who won the meet, but by only 11.5, and then ran for the home stretch. First place was only one second ahead of SIU-C's Kevin Shuman.

The Salukis' Mike Keane finished third followed by Tom Ross. The Jayhawks' Brent Tiffin finished fifth, and Jim Unwin re-established 2nd place, but just in front of Keane's dominance by finishing sixth and seventh.

Keane has done all season. Keane started off by leading the race. But he lost a match seconds when he ran off the completing, winning course, near the halfway point, Cornell said.

Because of his intense concentration, Keane kept running the race, not hearing the cries of the Kansas track team, who were directing the runners on the course.

Cornell said the Salukis' back runners, Notre Dame's, Beim and Mike Elliott "ran pretty well." The trio finished 9th, 13th and 15th.

The course, a brand new one on the farm of Jayhawks' cross country Coach Bob Timmons, was 13.2 miles longer than the Salukis' home course at Millard Hills. Cornell said the course resembled as English course more than an American one.

"It was a true cross country course," the Saluki coach said. He speculated that Shuman may have done so well because of the resemblance to the European-type courses.

He also said with the exception of one deep hill that the runners had to run twice, the course was relatively flat.

The Salukis will have their perfect record with them to Charleston next weekend when they compete in the Illinois Intercollegiates.

Netters take lumps at SIU-E

By Johan Marciszewski
Associate Sports Editor

Things aren't always better the second time around.

The women's tennis team had hoped to improve on its sixth-place finish in the nine-team 1991 MVC-UFTA Invitational, but instead finished tied for fifth in the eight-team 1992 MVC-UFTA Invitational.

SIU-E's 15 points this weekend were far behind the 30 of Evansville and below the expectations of Coach Judy Auld.

"It was an off-week," said Auld. Errors at crucial points in some singles matches and lack scoring doubles teams led to the defeat.

In the fighted tournament, points could be picked up in both championship and consolation rounds.

Lisa Warren became the No. 1 consolation champion with a 2-1 record. Auld could not pick up a match during the tournament.

Auld Warren became the No. 1 consolation champion with a 2-1 record. After losing the first match 6-4, 6-4, to the eventual No. 1 championship winner Joan Mahon-Finder of SIU-E, Warren came back to beat her next two opponents.

At No. 6 singles, Maureen Harvey won her first two matches before bowing in the finals.

The Nos. 2-5 players, Alessandra Molinari, Mary Pat Kramer, Heidi Eastman and Geraldine Fausti, finished third in their flights.

The pair didn't do it, but they did pick up the points Auld said would have been the difference when Eastman finished 1-2 at No. 1, as did Sherman and Kramer at No. 3. Molinari and Amanda Allen split their two matches.

Team scoring was tight as Minnesota, Drake and SIU-E followed Illinois with 25, 26 and 25 points. Louisville and Illinois State finished at the bottom with 17 and 16 points.

"It was a strong tournament all the way," said Auld. "The teams have good depth."

Auld felt the Salukis could have done better if they had capitalized on opportunities, as they often dropped a match after winning the first set.

There were some good matches, though, she said.

Harney, according to Auld the most consistent of the netters, played well during the weekend.

"She had a chance in her last match but I think she was out of it," said Auld. "She was upset that she lost but she didn't play well."

Molinari scored an impressive victory by defeating a very strong Patty Jablonski of Drake and Sherman had a good win over Sue Hutchinson of Illinois, to whom she lost twice last year.

Sherman's game against the Lisa Martin of Minnesota was good also, although she lost 6-3, 6-4, according to Auld.

"She was keeping it deep and not making very many errors," said Saluki coach. "Sherman had a couple of 3-3 games but lost some that were crucial. With her play, she played one of her best of the year."

Also playing its best was the doubles team of Molinari and Allen. In a match with Drake's Patty and Kathy Jablonski, both sides played to the hill in a 10-5 tiebreaker.

"They played aggressive and smart doubles," Auld said. However, as in other matches this weekend, although they were up and needed only one match to win the second, they couldn't put it away and lost in three sets.

Mediators sought to settle strike

RYE, N.Y. (AP) — The chief negotiators in the National Football League Players strike met Sunday and agreed to seek a mediator who would be acceptable to both sides and try to resume formal bargaining as soon as possible.

Jack Donlan, executive director of the NFL Management Council, said after a three-hour session with Ed Garvey, his union counterpart, that the two sides had agreed to consult Kay McMurray, head of the Federal Mediation and Conciliation Service, about finding a mediator to help settle the 30-day-old stalemate.

Negotiations broke off eight days ago in Washington after the two sides couldn't agree even on peripheral issues, let alone the major union demand for a wage scale.

"We didn't resolve any issues but we had a constructive discussion," said Donlan. "Both sides are making a real effort to settle our differences, but we can't set a date. There's a mutual desire to get on with negotiations."
Seminole have a field day as Salukis fall short of goals

By Dan Devine
Staff Writer

SIU-C coach Roy Dempsey had modest goals for Saturday’s game against national power Florida State. Play a sound game, pick up a first down, avoid mistakes, stay in the game at halftime, force a few turnovers and maybe lose only 33-10.

Instead, the Salukis triggered the explosive Seminole offense with fatal turnovers, and went down to an ignominious 59-14 defeat.

Trailing 59-1 late in the fourth quarter, Saluki third-string quarterback Darren Dixon manufactured a short touchdown drive that inspired devasting cheerleading from the Seminole crowd.

Adding injury to insult, the Salukis lost Rock Johnson with a bruised knee in the third quarter. Johnson was still hobbled Sunday, and may be limited in Saturday’s game against Missouri Valley Conference favorite Tulsa.

After a bruising first quarter, the Salukis trailed only 3-0, and had wiped the Seminoles twice inside the 10-yard line. Then Dempsey’s worst fears began to materialize. Florida State brought its awesome firepower to bear on the outmanned Salukis, and turned the game into a rout.

The Seminoles struck for four second-quarter touchdowns to take a 31-6 halftime lead that effectively killed off any chance of the Salukis looking to crack this week’s NCAA Division I-A top 20 teams, Travisainted away in the second half too, and scored four more touchdowns.

The Seminole scoring drives were swift, bloodless, and highlighted by big plays. Most of their drives started around midfield and ended in the end zone, and only one time did they take more than seven plays to put the ball in the end zone.

They scored on runs of one yard (twice), three yards and 36 yards, and on pass plays of 28, 14, and 20 yards. Four of these drives, including three in the decisive second quarter, were started after Saluki turnovers. SIU-C had four interceptions and two fumbles.

Florida State had only two turnovers. “It was the fumbles that hurt us,” said Dempsey. “We didn’t get up physically. I didn’t want it to be a runaway, but that’s what happened.”

“It’s humiliating,” said Hunter. “You’re embarrassed. But you don’t get mad and say, ‘Saluki, we’re playing these guys?’ They played hard, and they played well.”

It was 38-6 before the Salukis got on the scoreboard, and it took a bizarre play by Seminole punter Brian Harmon to accomplish that. Kicking from the Staff Photo by Rich Seal

Rosa Mitchell, SIU-C's top finisher, cools down after Saturday's race.

by Jackie Rodgers
Sports Editor

It was a long time coming. So long, as a matter of fact, that Coach Debbie Hunter could not recall the last time her spikers won a tournament.

She knows it wasn’t last year, and she wasn’t sure if it was the year before, but she did know that it felt good this year.

The Salukis blew by four teams in capturing the VITA Invitational at the University of Missouri, SIU-C dropped only one game in the four matches, finished No. 15 ranked Missouri, and raised its record to 16-8.

“It was a total team effort,” said Hunter. “I would say that the best overall weekend we have put together this season.”

One of the keys to the victorious weekend, according to a Hunter, was effective serving. She said that the aggressive serving game kept the opposition off balance throughout the tournament.

On Friday, SIU-C stopped Southern Missouri 15-12, 15-4, 15-3. The Bears were expected to challenge SIU-C and Illinois State for the Gateway Collegiate Athletic Conference crown. An adjustment to the Saluki defense led to the romp after the first game.

In the Bradley match, all the newcomers had a chance for extended play, Hunter said. Hunter said that at one point all five newcomers, plus veteran Sonya Locke, were on the floor at the same time. It’s a good thing Hunter didn’t play her veterans, for the rotation. The Salukis put away the Braves, 15-4, 15-2, 15-4.

On Saturday, the Salukis dropped their first game of the match, but came back to beat Kansas State 15-11, 15-9, 15-13.

Hunter said the Jayhawks “gave their best volleyball of the season, and it was a good test for us. In the other games of the tournament, K-State did not look like the team we beat.”

“We saw them play a few games, and really, they didn’t appear to be very strong,” said Hunter. “We did a good job of being physical and keeping a lot of balls in play. I think we expected to come on in and put the ball away, but they did a good job on defense.”

Locke had her career high spiking efficiency of .610 in that match.

Despite the loss, the Salukis did not get the chance to be the first team to beat Missouri this year. The Tigers 19-0 record was blanched when they lost to SIU-C in their game match. Hunter said she was “happy for the two teams to be more ready for the rematch with the Salukis.”

The Salukis, however, were pressing too hard when they played us,” Hunter said. “The games of being undefeated for so long can start getting you a little bit crazy trying to figure out why you were losing all of a sudden, and they were pressing so hard they couldn’t execute.”

The Salukis keyed their attack on the weaker Mizzou players, and came away with a relatively easy 15-9, 15-11, 15-4 sweep.

Fielders letdown in loss by JoAnn Mareczkowski
Associate Sports Editor

The field hockey team rode a nine-game winning streak into Springfield, Mo., this weekend but the aggressiveness which had been featuring lately must have been grounded somewhere along the way.

The Salukis dropped the first of their two matches, a lulling 2-1 defeat at the hands of Southwest Missouri, before defeating Denver 54 later in the afternoon.

It was a blah game,” said Coach Julie Iller of the meeting with Gateway Conference opponent Southwest Missouri. “We didn’t play particularly well or particularly good. I’m not sure what the problem was.”

Definitely contributing to the loss was a lack of aggressiveness.

“It was an important game for both of us, but I guess we wanted it more,” Iller said. “They were worried about us and we were more ready to pl.y.”

The 9-2 Tigers, who won ranked 17th in the nation last week, jumped right into the lead by scoring off a penalty shot three minutes into the game. That provided the first indication of the Salukis’ problems.

“It’s something we should have stopped,” Iller said of the shot which got by goalie Lisa Cooney.

“Apparently Cooney got blitzed, which shouldn’t have happened since we’ve been playing penalty corners all year,” she said. “It was a medium speed ball and we just missed it.”

Ellen Massey evened the score when she connected with an assist by Jennifer Partly at 9:10 of the second half. Iller gave credit to the forward for not shy ing back after being hurt and missing some action during last weekend’s Hockey Bash.

Another bright spot found in the loss was a play of Defender Nancy McAuley.

“I’ve seen from their coach, who felt Nancy had done an outstanding job of keeping them out,” said the Salukis.

Steve Felder, a pitcher for the Gators, fell an hard times as he gave up 19 runs in the championship game of men's 15-inch intramurals.
