Learning from children

SIUC students teach children in child development lab
Ginny Skalbri

Four-year-old Westin sits in a nearly deflated Little Mermaid pool that rests on a blue tarp with a wave pattern, forming a makeshift ocean in SIUC Child Development Laboratory.

"Swimming is my favorite thing to do," Westin said.

"I can hold my breath under water." Westin is one of 45 preschoolers enrolled at the lab, located in Ogilby Hall. The preschool, along with a toddler and infant room, is monitored by student teachers and students majoring in early childhood education to fill part of their major requirement.

"[Students] do everything that is required of a teacher in a classroom depending how comfortable they are and how much experience they have," said Sara Starchuck, director of CDL.

The laboratory is divided into three rooms, one for each age group. The infant room is filled with seven cribs for the babies and toys are placed throughout the room.

Crowded classes raise concern

SIUC’s ratio high among state schools
Anne Marie Tavella

Student-to-faculty ratios are important in a number of ways which may not be well understood for SIUC, according to education officials. Ratios can reflect the mission of an institution. They affect the level of instruction students and faculty can have with each other, and are used by prospective students and their parents in evaluating a university.

SIUC has one of the highest student-to-faculty ratios in the state, 18.21 to 1 in 1999. Even when enrollment numbers are considered, SIUC falls behind Northeast Illinois University and University of Illinois.

In the 1998-1999 school year, NIU had an enrollment of 22,847 and a student-faculty ratio of 17 to 1. The University of Illinois’ enrollment was 36,690 in 1999, with a student to faculty ratio of 15.2 to 1.

John Braden, U of I associate provost, said numerous factors must be considered when comparing the student to faculty ratios of different universities.

"Past, the missions of the universities must be considered. Braden said a large portion of U of I’s missions is research, and small classes are necessary to do quality graduate work.

"Being a major doctoral institution helps U of I to keep in raise down, Braden said."

Another factor that causes student to faculty ratios to rise is the lack of state funding. Braden said. Many state schools in Illinois had student to faculty ratios of different means an increase in funding, with a ratio decrease from 5.8 percent in funding for the current fiscal year.

Many campus officials said they plan to keep a close eye on today’s meeting in hopes that state officials will approve the $349.9 million budget proposal which will then be forwarded to state officials for approval.

“We badly need the renovation plans and expenses that’s being proposed,” said Jim Fox, interim dean for Morris Library, which is expected to receive funding for some of its needs.

Renovations to Morris Library, originally estimated at $275,000, will include an additional freight elevator.

“We definitely need that project,” Fox said. “Parts of this building are 30 years old, and we’ve not had any extensive work done to the structure.”

Poet laureate Gwendolyn Brooks to speak at SIUC
Mary Beberman

Famed Illinois Poet laureate Gwendolyn Brooks will speak at 7 tonight in Shryock Auditorium.

As part of the “What I Have Learned” Lecture Series, Brooks will read from some of her 26 published books and talk about her life during the lecture.

Paul Simon, director of the Public Policy Institute, was instrumental in bringing Brooks to SIUC.

Brooks has had her speech before. I think students and faculty will find her very inspiring,” Simon said. “She’s prolific poet. More importantly, she’s sensitive to the needs in our society.

By the age of 13, Brooks published her first poem. By the age of 20 her work appeared in two anthologies. Most of Brooks’ writing focuses on black American culture. She has tackled subjects pertaining to urban life in Chicago, where the 83-year-old poet was born, and spent most of her life.

Brooks followed Carl Sandburg as the Illinois poet laureate in 1959. She was also the first black woman to win a Pulitzer prize and is expected to be appointed to the American Academy of Poets.

Gwendolyn Brooks

Gwendolyn Brooks has been the Illinois Poet laureate since 1959. She is also the first African American woman to win a Pulitzer prize. Brooks grew up in Chicago and her poetry focuses on African Americans in an urban society.

What it takes to become an American president

A look at the electoral college in America

When a voter casts a ballot, he is technically voting for an elector. The party whose candidate won the majority of popular votes in the state will send their elector to the Electoral College. A state's electoral votes are determined by how many representatives that state has in both houses of Congress. Illinois has 22, and if a candidate received 51 percent of Illinois votes, he or she would get all 22 votes.

The voters convene in December to officially and technically elect the president. Then, in January, Congress meets in joint session to count the votes. Ninety-nine percent of electors throughout American history have voted for the candidate they have pledged to vote for.

They are usually selected by the state parties, and are known in the state for their loyalties to the party. So your vote does count, because the candidate who gets the majority of votes in your state will get your state's electoral votes. But a candidate could get a popular majority of votes nationwide and still not win the election.

Potential Problems

According to the National Archives and Records Administration, more than 700 proposals to reform or eliminate the Electoral College have been introduced in Congress to reform or eliminate the Electoral College. There have been more proposals for Constitutional amendments on changing the presidential selection process than any other Constitutional issue.

The process for proposing Constitutional amendments is long. Either two-thirds of both houses of Congress must pass the amendment, or a constitutional convention can be called. To be ratified, the proposal must be sent to the state legislatures, who must then ratify it. Lastly, the proposal must have approval from 38 states. It is that time again......

Homecoming 2000

"Mardi Gras, Saluki Style"

October 2-7, 2000

Applications now available!

- King & Queen Election
  Deadline Mon. Sept 25
- Parade
- Deadline Fri. Sept 22
- Yell Like Hell
- Deadline Thurs. Sept 28

Applications available in the SPC Office
3rd Floor of the Student Center
Or www.siu.edu/spc

For more information, contact SPC at 536-3393

President Paul Kowalczyk was scheduled to deliver the keynotes addresses at today's Board of Trustees meeting.

"My greatest challenge is trying to improve our programs while reducing the deficit," Kowalczyk said.

Potential Problems

**BLOWOUT**

**OUR WORD**

**SIUC's low ranking should serve to motivate improvement**

SIUC has seen better months. In a recent U.S. News and World Report magazine study, our University was ranked in the fourth tier among universities listed in the national category — that's last.

The magazine examined a dozen characteristics of higher education and, with the help of a statistical survey, broke down the information into numbers. Then, the editorial, "America's Best Colleges," acknowledged that those numbers cannot accurately reflect the whole truth about any university, but can serve as a quick guide to prospective college goers.

SIUC appears to have flunked, and the report card was sent to every新生and bookcase in the category that hurt us most is likely the most accurately measured: reputation.

The magazine sent questionnaires to high-ranking administrators at peer institutions. The administrators then rated other universities' academic programs on a scale from one (marginal) to five (distinguished), and each school's average reputation rating amounted to a quarter of its overall rank. SIUC came out with a 2.6, better than in-state competition such as Northern Illinois University and Illinois State University, but not good enough.

SIUC also received disappointing marks regarding questions under "facility resources." Our student-to-faculty ratio is too high, supporting what Daily Egyptian editors have said before: SIUC cannot afford to have faculty lines lag behind enrollment numbers. The last of the truly disheartening statistics showed the average SIUC student graduates far too slowly.

The report is a painful reminder of the long road this University has ahead to regain the stature it once had. Although the magazine's report isn't perfect — many of SIUC's selling points cannot be reduced to a number — the characteristics that were examined are important to prospective students and their parents.

Our administration must use the report and others like it as a badly needed outside perspective. Various factors on campus clamor for finding and attention, studies like "America's Best Colleges" show SIUC as it looks from the outside. In the meantime, the best service we can all do for this University is to excel in our own niches and remember all the great things that keep us here.

**DEAR EDITOR:**

Thursday, September 14 2000

**Do you have something you'd like to say?**

Bring letters and guest columns to the Daily Egyptian office, Room 1230, Communications Building.

Letters and columns must be signed and submitted with writer's phone number. All letters are limited to 750 words, guest columns to 500 words. All are subject to editing.

Letters also acceptable via email (at uge@siu.edu) and fax (618-453-4314).

Please include a release form for photo publication.

Facility members in the line of fire may submit their requests in writing to the Daily Egyptian office.

The Daily Egyptian reserves the right to not publish any letter or column.

---

**Fans of Jackson's work should speak up**

Dear Editor:

Your Aug. 2 front-page article on interim Chancellor John Jackson ("Jackson undecided about chancellor position") underscores the importance for those who support us to become more vocal on his behalf. [Interim] Chancellor Jackson is an able professor and administrator who has dedicated his life to SIUC.

In the late 1980s, when I was chair of the College of Human and Consumer Sciences' faculty, worked to acquire the facilities committee to evaluate our dean (who at that time was John Jackson). I expected the committee to invoke a list of disturbing opinions, incorrect and difficult judgment calls. Instead, I was left with an overwhelmingly favorable opinion of how, by chair and directors, faculty, students and staff, which made my job relatively easy. Despite significant money constraints, he had a vision for the college that went beyond the current budget battles.

This same-ender, positive approach has now been transferred to the chancellor's office. Last year, Chancellor Jobsen asked to the faculty to present a plan for the future of the University and the community that was, at the same time, knowledgeable and thoughtful. But if you don't ask for something, you surely won't get it. He knows what we're likely to get, and we're going to go beyond that.

All of us who like what he has done as our interim chancellor would do well to step forward now and express our support. A vocal minority should not need to step through the strain this has been achieved. In my view, no one else knows the University's current financial situation. If there is another else has the promise to do so much more for us in the future.

Gillesp Clement

**Readers deems it time to cut Saluki football loose**

Dear Editor:

I grew up in a small town where football was life, and I have loved that. Since then, however, I have come to a difficult conclusion. We need to let our football program go. I know it's hard to imagine, a college campus without football, but we should all try.

Maybe we should begin to look at other alternatives to football. Basketball, swimming, and golf could be the foundations we are alloca- tioned to the extra-expensive football program. And, without the football program, maybe we could look at some new initiatives.

Does anyone know that our Water Polo Club went 4-1 last season? Perhaps we should take the opportunity to play major schools like the University of Florida, Indiana University, and others. Do we think that's a big deal for SIU? I know I would enjoy seeing a Saluki team play a physical game. I know the future is an uncertain one (which the Water Polo Club does quite often).

All I'm saying is maybe we should look at other athletic opportunities for Saluki fans than the ever-present football money pit.

**USG leader disappointed in SIUC fans' behavior**

Dear Editor:

I must totally agree with the letter that Paul Kowalski wrote about the actions of the Saluki fans at the last home game. I Was angry that our whole game through rain and shine. And I was just as upset as anyone else that our beloved team lost. I was just as upset as everyone else that we did not show anything at the opposing team even at times that the Saluki fans did show support.

It is just the way we think, feel, and act that make us who we are. When any one of these things is taken away from us, it is almost impossible to just forget about it. It's something that, for me, is something that I can't just let go of. I refuse to insult myself, or anyone else in any way that is disrespectful to any opposing team, republication of the news.

Bill Archey

**Nikoll Bell**

**Growing up with partly sunny weather**

When I was four years old, I was going to many the Channel 12 weatherman. It wasn't that I had a crush on him or anything, or even that I particularly wanted to marry him. I just kind of assumed that if I was going to for some reason. I knew. It still doesn't make sense to me, either. But hey, he would make a decent baseman if you think about it. Mature guy, stable career, and even when they are storms and tornadoes and hurricanes and massive precipitation, that cat still sounds cheerful when he delivers the TV news. Yes, this was definitely the man for me.

I had thought things were so much clearer when you're four. Decisions are easy. I wish, I would share my Play-Doh. No, I will not go to bed. No, I will graduate kindergarden. Even life-altering decisions are easy. Yes, I will go to college someday and become a scientist. Moving on, I used to like the with lots of back­ yard and trees and a purple car with Rainbow Brite painted on the side. Yes, life will be grand.

But then, somewhere along the way, we lost sight of those sensible decisions we swore to as toddlers. We trade those sensible decisions we swore to as toddlers. We trade them for the future.

Sure, that answer about the astronaut fans at the last home game. I Stil) Cd for the whole truth about any •niversity, but not good enough.

This same-ender, positive approach has now been transferred to the chancellor's office. Last year, Chancellor Jobsen asked to the faculty to present a plan for the future of the University and the community that was, at the same time, knowledgeable and thoughtful. But if you don't ask for something, you surely won't get it. He knows what we're likely to get, and we're going to go beyond that.

The What I Have Learned Lecture Series Proudly Presents:

GWENDOLYN BROOKS
Pulitzer prize winning Poet Laureate of Illinois

September 14, 2000
7:00 p.m.
Shryock Auditorium
Book signing to follow

A true master of language and storytelling, Gwendolyn Brooks uncovers the fears, prejudices, loyalties and challenges of a society in need of compassion and strength. Her ability to discover and document the experiences of humanity is a testament to her role as an artist and educator.

Wallace’s Bookstore will sell copies of Gwendolyn Brooks’ work from 6:00 – 6:45 p.m. at Shryock in the foyer area. A book signing will follow her lecture. This is a U-Card approved event. A sign language interpreter will be provided.

Sponsored by the Public Policy Institute, University Press and the Visiting Writers Series.

Funded by BlueCross BlueShield of Illinois and Verizon.
Hot Spot program has citizens on patrol

David Osborne
Daily Egyptian

Cubondale Police s ven residents to help them find the local hot spots. It is not the popular club they are looking for — it is an suspected drug house. Capital Police have a program called Hot Spot which allows citizens to anonymously identify location where drug-related activity is taking place. Citizens using the program fill out a postage-paid form detailing the address and magazine activity, and drop in the mailbox.

Cus Bode
Who phoned in my house?

Don Elliott, community resources officer for the Cubondale Police Department, said the program was started about seven years ago in response to the growing drug problem facing even small cities like Carbondale. Coupled with an increase in drug-related police, police needed a general methodology by citizens to report these activities due to a fear of retaliation.

"We came up with this idea to solicit information from citizens that live in the community where there might be drug activity," Elliott said.

The program consists of about three to five tips per month. Depending on the information received, the Hot Spot information may be passed on to police officers, investigators or Cubondale's drug unit.

Tip sheets with identify or generic information is given to the panel officers for use as they patrol near the suspected drug house. In the event the officers respond to a call at or near the address, they are aware that it has been reported as a hot spot.

More in-depth or detailed information is passed on to the detectives or drug unit for further investigation. Depending on the information received and the individual investigator, the next step could involve increased surveillance of the suspected address or seeking additional information through interviews.

"The initial bit of information we get may be enormous as far as its value," Elliott said.

Elliott likes police work to week aiggie puzzle, all the pieces have to come together. The information provided by the Hot Spot program put together with other information already developed or developed separately, will begin to put together the whole picture.

Police need the whole picture in order to act.

Even a detailed Hot Spot tip will take time to develop before police act. Elliott said Cubondale police may misidentify citizens civil rights. Police are careful to investigate and develop probable cause before taking action. This assess both a good case and works out the few bogus tips received.

"We have to do our homework before we go and kick in doors," Elliott said.

Developing a case can take weeks, months or even years, depending when the investigation began. Elliott said law enforcement's ultimate goal is to get to the biggest part of the drug problem, not necessarily the street user or buyer.

"We want to get who's buying it from, and we want to get who that seller is buying from," Elliott said.

The Hot Spot program complements Cubondale's Citizen Stepping program, an anonymous tip line that allows citizens to report crime information and earn a possible cash reward.

Electoral College

CONTINUED FROM PAGE 3

Electoral College than on any other subject. It is obvious some think the system has flaws. First, the system makes it possible that a candidate could receive a nationwide majority of votes and still enough electoral votes to be president.

Every state except Nebraska and Maine has a winner-take-all system. For example, California has a whopping 54 electoral votes. If Candidate A receives 50.1 percent of the popular vote in California, he or she would get all 54 electoral votes for California. The candidate who received those votes is now one-fifth on his or her way to the 270 electoral votes needed to be the next president.

Only two elections have produced a president who did not receive the nationwide popular majority — the election of 1876 and 1888.

Paul Corwin, assistant professor of political science, said it is possible, though unlikely, that this will happen in this year's vote.

Corwin said Vice President Al Gore is doing better in the polls than Republican contender George W. Bush. However, Bush is doing better in electoral college votes.

Though Corwin claims the losing side would be very upset, he said most would accept the rules of the electoral college.

"Our country has weathered many more serious outcomes," Green said. Another potential problem is the difficulty for third-party candidates to emerge against the two major parties. Unless a candidate receives a majority of votes in a state, he or she cannot obtain electoral votes.

In 1992, Ross Perot garnered 19 percent of the popular vote nationwide. But Perot did not receive one electoral vote.

"To be the largest loser, a third party candidate has to have a popular appeal," Corwin said. "It is possible this will happen in this year's vote."

Corwin said the difficulty for third-party candidates to emerge against the two major parties.

The CDL uses special approaches to teaching the children and dealing with their behavior. The toddlers and preschoolers are usually allowed to be inside the classroom or outside when they choose. Additionally, most of the activities the children do are on an individual basis; they are free to pick from the activities set up around the room as they choose. For example, while Westin, Isaiah and their preschool girls were pretending to drown at the afternoon beach party, other children were outside playing and some were inside playing with toys on their own. "It's learning through play. A skilled teacher knows how to introduce any skill in the form of play," Stark said. "The children learn if they're intensely involved in an activity chosen by them."

Green said one approach teachers in the lab use is guiding the children to find their own solutions to their problems. "We help the children learn to solve their own problems," she said. "Seeing the children take responsibility for their own actions is really exciting for me."

There is a three-year-old son, Isaiah, enrolled as a preschooler. Because Green only works with preschoolers one day a week, she said it can be difficult sometimes adapting to Isaiah that even though they are only five feet apart they can not play together.

Despite the separation from her son, Green said she loves working with the toddlers. "It's such an interesting age because [toddler] are waking up to the world. Testing the limits and trying to discover things all the time. It's the age of discovery." Megan Beltz, a senior in early childhood education, is a students teacher in the infant room. She said that she finds teaching "Because we have other people's children in our hands we have to be very responsible," she said. "They're already bringing in a lot of things to us."

Green is working through the lab can be trying for the students, Beltz said it definitely worth it. "When we are having a lot of fun," Beltler said. "We care about them very much."

Solutions
The SIU volleyball team has a goal to be one of the top teams when the Missouri Valley Conference Tournament rolls around in late November.

The Salukis were ready to start making that goal a reality when they traveled to the University of Evansville Tuesday to begin MVC play. One might think that a good conference start was inevitable as Evansville had only beaten SIU once in 20 tries since 1993. Evansville, however, had other plans.

The Purple Aces (6-3, 0-1 MVC) came into the match wanting revenge against the Salukis (6-2, 0-1 MVC), and it was just what they got as SIU lost in three straight games (15-13, 15-10, 15-4) to drop their first MVC match of the season.

"We weren't ready to play mentally," said junior middle blocker Jenny Noel. "I don't know if we thought we were just going to win and Evansville capitalized on the fact that we didn't do those things." The Aces were led by junior middle blocker Jessica Keifer, who had 13 kills, five blocks and six service aces.

Some of the SIU players were still in shock over the loss, as they expected to open MVC play with a win. "I don't understand it, we were so ready to go in there and play our game," said sophomore outside hitter Tara Cairns. "I don't know, but it better not happen again." "We have a lot of work to do," Noel said. "We made little errors that add up to a lot of points and that really hurt us. We need to cut down on the errors." Other Salukis before they will be fine as long as they listen to what their coaches tell them." "We need to take the initiative and try harder. "We played with the leaders," coach Leroy Newton said. "We were right there, and that's a good feeling." "Even with the improvement, Newton isn't satisfied just yet. "We're only halfway there," Newton said. "We've improved, but we didn't play what we're capable of. Some of our kids made some bad shots at the wrong time, and it cost them. Every one of the kids can play better so I'm disappointed in that." Newton mentioned that senior Branden Bullard and junior Brian Kolmer double-teamed a few of their last holes in the dark. "Murray State and Wright State finished first (play) a couple of hours before us, so they didn't have to contend with it," Newton said. On the newly Bent Creek Golf Course, the Salukis played into dusk in the final round to finish with a score of 926 — 20 strokes behind tournament victor Murray State University (906). Wright State University scored 921 to take second place.

SIU was followed by Eastern Illinois University (941), host Southeast Missouri State University (944), Bradley University (945), the University of Evansville (946), Saint Louis University (950), the University of Tennessee at Martin and the University of Missouri at Kansas City, who tied (961) and Creighton University (987). "The biggest impact so far has been the play of Kolmer, who transferred from Rend Lake Community College. Kolmer finished 10-over-par in the three rounds played in the MVC to take fourth place individually. In an eight-way tie for 10th was team captain Bullard, who is Kolmer's roommate. Junior college transfer Mike Smith and Brad Dunker shot into a four-way tie for 19th. Serfer Mike Heidek shot a 21-over-par score of 237 to take a four-way tie for 23rd. The team will travel to Crewe County Club in Normal on Sept. 17 and 18 to compete in the Illinois State University. Missouri Valley Conference teams will compete along with golf powerhouse Arkansas State University. "There will be a good field of teams and it will give us a good idea of where we stand," Newton said.

SIU men's golf team takes third place in Drury Invitational

Since last spring, members of the SIU men's golf team have made claims that they are better than their scores have shown. Outside of a few finishes in the top six near the end of last spring's tournaments, the scores didn't add up to the claim. But their scorecards finally backed up some of their talk with a third-place finish Tuesday night in the Drury Invitational at Jackson, Mo. "We played with the leaders," coach Leroy Newton said. "We were right there, and that's a good feeling." "Even with the improvement, Newton isn't satisfied just yet. "We're only halfway there," Newton said. "We've improved, but we didn't play what we're capable of. Some of our kids made some bad shots at the wrong time, and it cost them. Every one of the kids can play better so I'm disappointed in that." Newton mentioned that senior Branden Bullard and junior Brian Kolmer double-teamed a few of their last holes in the dark. "Murray State and Wright State finished first (play) a couple of hours before us, so they didn't have to contend with it," Newton said. On the newly Bent Creek Golf Course, the Salukis played into dusk in the final round to finish with a score of 926 — 20 strokes behind tournament victor Murray State University (906). Wright State University scored 921 to take second place.

SIU was followed by Eastern Illinois University (941), host Southeast Missouri State University (944), Bradley University (945), the University of Evansville (946), Saint Louis University (950), the University of Tennessee at Martin and the University of Missouri at Kansas City, who tied (961) and Creighton University (987). "There will be a good field of teams and it will give us a good idea of where we stand," Newton said.

Why is TIAA-CREF the #1 choice nationwide?

The TIAA-CREF Advantage.

Year in and year out, educators at education and research institutions have turned to TIAA-CREF. And for good reasons:

- Easy diversification among a range of expertly managed funds
- A solid history of performance and exceptional personal service
- A strong commitment to low expenses
- Plus, a full range of flexible retirement income options

For decades, TIAA-CREF has helped professors and staff at over 9,000 campuses across the country invest for— and enjoy—successful retirements.

Choosing your retirement plan provider is simple. Go with the leader: TIAA-CREF.

Saluki softball starts fall season at Bradley Classic

Shutt battles illness while finishing 16th at Redbird Classic

This season wouldn't be the first time sophomore Jennifer Shutt would face adversity in her golf game. As a high school player at Champaign Glenwood High School near Springfield, she played on the boys' team. For the first two years it wasn't easy playing with the boys, but eventually she won some of them over to her side and actually played in one of the top-three spots on the 12-player team.

"My freshman and sophomore years I felt isolated at first like they didn't accept me because I was a girl, and I didn't feel like I belonged out there," Shutt said. "My junior and senior year I got to know some of the guys and it was a lot of fun. I think it was really good for my game because we played the guy's tee and the courses are longer, and I really think that helped me in college."

By the last week of this semester, Shutt wasn't feeling well physically and this weekend's Panther Classic in Cedar Falls, Iowa, was probably the last thing on her mind.

The sophomore member of the SIU women's golf squad battled a constant headache, a swollen throat and other flu-like symptoms. She wasn't able to practice or compete for a spot on the team. The symptoms, doctors thought, could mean mononucleosis.

"We were worried because it was before the start of the season and she is a strong player and she does have experience collegiately," senior captain Liz Uehoff said of the possibility of losing Shutt to the virus.

On Aug. 31, the final scores of team qualifying rounds had been added up, so Shutt was never able to practice with the team, coach Diane Blaylock said she was faced with a decision on Shutt the following day with only the first set of times for the team. While the team was playing, doctors still thought mono could develop.

But Friday, Daugherty had to inform the players what player would be flying to the Panther Classic and Flagstaff, Ariz., (Sept. 25-26) for the team's upcoming tournament. The ladies didn't allow late minute changes, so whoever she designated to go would be going, regardless of their play.

Shutt's play has yet lowered the costs on the gamble for Daugherty, who normally bases these types of calls strictly on her numbers.

"I'm not sure what the team will do, but I'm proud of her," Blaylock said of Shutt, who bumped freshman recruit Mike Blaylock hopes to increase that mark with the recent additions.

"I might scare some people," she said.

Shutt didn't really feel bad for [Tonya]," Daugherty said. "I felt that she could take me on and do something for the team." But Shutt didn't qualify, but she didn't really feel bad for [Tonya]," Daugherty said. "I felt that she could take me on and do something for the team." But Shutt didn't qualify, but she didn't really feel bad for [Tonya]," Daugherty said. "I felt that she could take me on and do something for the team." But Shutt didn't qualify, but she didn't really feel bad for [Tonya]," Daugherty said. "I felt that she could take me on and do something for the team."
