Future depends on growth, panel says

By Donna Kimbel
Staff Writer

In the future, SIU will become a more sophisticated, computer-based institution, but will continue to hold onto some traditional teaching methods, according to a four-member panel which discussed the future of the University's learning environment Monday night at Browne Auditorium.

Kenneth Peterson, dean of library affairs; Elizabeth Kelly, law librarian; William Potter, records management officer of micrographics; and William Coccarelli, assistant professor of learning resources, presented ideas to a small group of students and faculty about what SIU is doing now and where it is going in the future. The symposium was one of four sponsored by the University Forums Committee.

To be successful in the future, SIU needs to be a model of controlled and sustained growth with interrelated components that work together, Coccarelli said. SIU needs to define what it wants and what its mission is. Currently, he says, there is a lack of commitment and direction.

"But whatever the trends are, SIU will survive," Coccarelli said.

Coccarelli explained that the University is losing teachers to other institutions and corporations because the teachers are frustrated by the low salaries and unpredictable use of merit procedures at SIU. However, he said that as the faculty members begin to see the University administration striving for excellence in their interest areas and their sense of professional challenge becomes greater, they will be more likely to stay at SIU.

Peterson said technology will continue to make Morris Library grow, but he added that none of the new innovations will completely eliminate the traditional book.

"Libraries are here to stay, they will grow but they will change," he said. "The library will begin to rely more on non-traditional materials including microforms, computer access and resources sharing with other libraries at universities throughout the United States."

Peterson added, "You can judge a university by the progress of its library. If the library does not grow, the university does not grow."

Edged at $4.5 million, Morris Library has financial problems, Peterson said. Books today cost almost three times what they did in 1967 and even though the budget has increased, the money does not go as far. He said Morris Library was built to accommodate one million volumes and 15,000 students.

However, the building now stores about 1.5 million volumes and services about 22,000 students.

Peterson said the libraries' Building and Planning Committee is now working on plans to expand the library but he does not expect any construction to begin until about 1984.

Kelly said she does not expect the human tradition of reading, thinking, writing and discussion to change even though computers are being built to do almost everything.

She centered her part of the symposium around a new computer, LEXIS, which was installed at the Law School in November. LEXIS is a machine equipped with a specialized keyboard and viewing screen used to find answers to legal questions. For example, a law student can type misleading reading into the machine and obtain information on all court cases which deal with these subjects.

"This tool—while magical—is only supplemental to a human being such as I, Kelly concluded.

Information on all court cases and judgements may be obtained through LEXIS. A report may be obtained through LEXIS.

Kelly described Law School building as a 'fairly modest, two-story structure distinguished by an arch over the front door.' The new building is scheduled to be completed and ready for classes by the fall session of 1986.

Micrographics—the process of condensing written materials onto film—is going through internships. But Potter expects to see courses in micrographics develop at SIU within the next year.

The SIU micrographics center now has 13 interns, including a civil service worker and a man.

Potter said micrographics can save money and reduce space by up to 99 percent.

However, Potter agreed with the other panelists that although beneficial, microforms does not expect they will ever replace traditional books.

Abuse charged
at clinic in Chester

By Jim McCarthy
Staff Writer

An investigation of the Chester Mental Health Clinic alleges that patients there are often subjected to excessive force by guards and that patients have been beaten and drugged to death.

The investigation was made public Tuesday by the Citizens Committee on Human Rights after the group obtained the report from the Illinois Department of Mental Health and Developmental Disabilities, which conducted the investigation.

Department officials insist that the report, compiled by the CHHR, is incomplete and does not represent the final conclusions of the investigation. The study was conducted by four department experts and Dr. David Klaas, at the request of Chester Representative Robert R. Bier and Klaas investigated after repeated charges of brutality were made by the CHHR.

"They got their hands on it," Klaas said. "All I know is that I can't talk about that."

The report claims that Joseph Jones died in Chester shortly after being beaten and injected with 156 milligrams of thorazine. The psychiatrist who injected the thorazine was not sure if Jones was awake at the time or not, according to the report.

The report states that patients were reluctant to talk to investigators for fear that guards would beat them or talking.

But, after the investigators assured the patients anonymity, some agreed to talk. The study said, many patients reported that guards often beat them in efforts to break up fights between patients, and sometimes the guards would beat them afterwards as well.

One patient said he was involved in a fight with another patient which was broken up by guards. After being locked in his room, he was beaten by four guards, he said.

"His appearance confirmed what he had told me," the report said. "He had been beaten severely."

One patient at Chester was quoted in the report as saying that, when patients reported that guards were beating them, they were subjected to treatment. From numerous occasions patients would claim the injury came from a fight and the patient would go...

City allocates revenue sharing funds

By Ed Lempeno

Nearly $1 million in federal revenue sharing funds will be distributed to the city's police and fire departments, two community-oriented programs and a number of capital improvement projects by the City Council Monday night.

The council's decision came after receiving a staff report on the project, and must be formally approved by the council at next week's meeting.

The report, submitted in fulfillment of the requests of six community organizations for revenue sharing funds, was approved in the amount of funds to only two of the groups, for a total of $18,113.

The city council was also requested to fund two more groups under the Community Schools Board-United Services' request for $250 from the contingency fund to fund a community program.

The report also recommends that the council allocate $2,500 from the contingency fund to fund a public library program.

A federal judge in Springfield awarded $2,500 for the library program.

By J ohn McCay

The city allocates revenue sharing funds.

Six of the 11 groups that were awarded money were awarded an additional amount of $10,000 to the city's community fund.

The six groups were awarded $10,000 in total, bringing the city's fund to a total of $25,000.

Student sentenced on drug charges

By Jim McCarty

A SIU student was given an "extraordinarily high" sentence.

The sentence was given to a student who was found guilty of cocaine possession.

The student was given a sentence of six months in prison and was ordered to pay $10,000 in fines.

Ugandan capital struck by Tanzanian planes

NAIROBI, Kenya (AP) - Tanzania intensified pressure on the Ugandan capital of Kampala with a jet fighter attack Tuesday, launching the fiercest rocket and artillery barrage yet in its war against the leaders of President Idi Amin.

The attack - including air attacks by Mig-21 jets - amounted to the heaviest and most long-awaited air strike on Kampala.

The advancing Tanzanians were greeted by a press blitz in all African capitals.

EDUCATION

All students are required to take GSD 101 ("English Composition"). As an alternative, this speed-reading course would give students the chance to learn a new skill.

Alexander said. According to Alexander, the resolution will be sent to the Student Affairs-Community Services Committee by the senate to determine if such a course is feasible. Alexander said he is a member of the resolution.

The English Composition course is a basic grammar and punctuation course that can be taken for credit.

However, a proficiency test is available for those who have taken similar courses.

The senate meets at 1512, Wednesdays in Bailey A of the Student Center.

Radio stations to air 'weather alert'

By Kate Wall
Staff Writer

It is a warm, humid, spring day and storm clouds are forming as the sky darkens. A funnel-shape house, its roof revolving rapidly and traveling at a speed of 200 to 300 mph, begins to descend from the sky.

It's a tornado, a natural phenomenon that sends all right precautions taken.

A program designed to keep Carbondale residents informed during periods of severe weather and other public emergencies will be antigenized, according to a press conference presented by the Saturday morning by City Manager Don Fry, Randy Jackson, coordinator of the Carbondale Emergency Services and Disaster Preparedness Committee.

The program will provide information on severe weather and other public emergencies through radio stations WCL and WCIL-FM. For example, if there is a confirmed sighting of a tornado, a warning will be broadcast telling residents to seek shelter immediately.

By tuning to these stations, people in local schools and businesses will be able to monitor conditions in the area.

If a possible severe weather exists, watches, warnings, advisories, movements of the cloud formation and all signals will be broadcast as well as information regarding the use or non-use of the City-Univem small system.

When there is a confirmed sighting of a tornado, a warning will be issued and all residents advised to seek shelter immediately. The sirens are tested at least once a month on the first Tuesday of each month as required by state law.

The program was approved by the Student Government Association and the Carbondale City Council.

Eventually, the program will consist of three parts: Student Government's public information role, the University's role and the city's role.

About 30 students sit around a wooden table in the brightly-lit auditorium. The tension and alarmsness bring the temperature in the hallway a few degrees higher.

Several outbursts of heated argument cause the chairman to bang his gavel on the podium.

Everyone is somewhat surprised. They have voted to cast out one of their own group.

The scene, which occurred last November, is the impeachment of Student President Garrison Clinton. Matthews. It is the first student president in recent history to be impeached by the Student Senate. He has yet to appear before the Campus Judicial Board to answer the charges levied by the senate.

However, although they are rare against presidents, impeachment proceedings against student senators are a common occurrence.

In fact, they are so common that impeachment proceedings against student senators occurred on the average of twice a year, every year between 1973 and 1977.

Such intramural squabbles have so frequently disrupted Student Government that some members of the administration and Student Government think the conflict and anxiety caused by such disputes is hindering the will of the student body to be involved in student government.

"There's so little cohesion," says Sam Dunng, executive assistant to Matthews.

The senate also served as the student vice president during the 1977-1978 academic year, a position that was held by the student senate that year.

And so far, attempts to have a say in (University) policy making.

Dunning says the failure is caused by the turnover and turmoil that have beset Student Government almost since it began in 1925.

John King, chairman of the Department of Higher Education and an expert on lay boards of government across the nation, says Student Government's conflicts are caused in part, King says, by "the old, old problem of continuity."

Indeed, Student Government administrations from year to year often pass like ships in the night, acknowledging the other but with very little communication between them.

The most recent example occurred during the transition from last year's administration headed by Dennis Adamczyk to Matthews' administration.

During the course of Adamczyk's term, the undergraduate education policy advisory board was considering a University proposal for changes in the admission, grading and academic policy which would directly affect the University's curriculum.

According to Adamczyk, Dunning discussed the changes with Vice President for Academic Affairs Frank Gunkel. However, when some of the changes were implemented by the administration earlier this year, Student Government had no prior warning. His response and some members were unaware that the changes were made.

Another block to Student Government's responsiveness to administrative changes, in King's opinion, is a lack of responsibility.

Dunning says that fundamental hurdle is that there doesn't seem to be a reality of what the university expects of them. It is difficult for a senator to know what his constituency is in a real way," he said.

Jack Graham, associate dean of the Graduate School, agreed.

"The student Senate would have that they need an identifiable constituency," he said.

Dunning adds: "That's what our times call for another look at" the geographically-defined representation that characterizes Student Government at SIU.

King says that the current system of electing one senator per area is not responsive to the issues that face students today.

Dunning concurs. He has proposed that representatives to the senate be elected from each of the University's nine schools or colleges.

But that plan would not solve another problem identified by most people involved in Student Government - the structural or organizational deficiencies.

Options on the cause of the problems involve Student Government vary and a consensus has yet to emerge.

According to Tom Busch, a candidate in the 1978 Student government vice president for student affairs, the heart of the difficulties is in the structure and role of Student Government as outlined by the constitution.

"I think that Dunning needs a clear idea of his function," Busch said.

"But not only, King. Graham and Student Senate Vice President Mark Rouleau, see it differently. I think that the application of these systems is possible with or without constitutional changes," King says.

Busch sees a need for some modifications to the existing structure but says the problem is rooted in the leadership of Student Government.

The solution is being worked out among the Student Government directors and a special committee set up by Matthews to study changes in the constitution. It is not yet clear if any changes will be made. But King agrees on one thing—it's the students who are losing.
**Don't quote her on that**

March night, Monday, March 26, I was involved in a rap session with a group of students. A DE reporter was sitting on my not-so-distant left. She was playing a tape of Windy City and I was listening, trying not to snort. In any case, she was a bit distant when I started talking. She seemed a bit embarrassed and I let her go.

**A squirrely party**

Here I thought it was just gonna be the usual runaround and rugby party. You know, some moans, talk dirty to a few girls, maybe even an occasional fight. Ring! Ring! Daley Dance was on the phone and was more rugby players down here for the All-Fools Rugby Tournament, and they had 1.3 kg of beer. I thought they might be a little rowdier than usual. That was an understatement.

Now we had a chance to criticize rugby players in general because that wouldn't be far. But there are a few guys that are not exactly my type of people. Like the guy who was playing tug of war with the squad. He stuck his head down and was throwing it around. After seeing all that go on, I don't think anyone except Lynn Emmerman has any use for them.

I only hope that the derelicts at that party were out of town and not SUL students.

**Closer look at the 'sane' climate of Windy City**

By Joe Soleczyk
Staff Writer

The city's house has now risen its high point in the sky as they sit on the curb of one of Chicago's busiest streets, clothes asunder and waving floral green hats like a curtain. They are surrounded by others like them. Scouren.

In the past, we thought of them as fine, hearing the pizza's tune.

But now we have suspected that they are already drunk and flinging bottles across the street, sending the glass cascading down the sewer drain.

But we are not sure anymore. A convention with a national insurance company, "toke a joint" passed by them to another group. How are we to understand their intentions?

Bob, like so many of the other thousands like him inhabiting the city, has a heart attack. A former philosopher major at Northwestern, he doesn't like his job. He is twenty years old and has five-room condominium and the banana of a 9-6 job; selling insurance protection to hung-over steel workers.

Chicago is probably as far as Bob will go. He will stay on the job, half unconscious, until he finds the hope he bought from his daughter's way friend.

Bob is probably what I would be like had I not escaped over the Wallis and the bonds of love.

I went to Chicago in 1968, posing as a resident. I found a set of parents and tried to find out what it would be like growing up in the town of stockyard and starch.

The winters, catapulted off the waters of Lake Michigan, are as severe as anywhere in the Midwest. When the snow in my alley didn't get cleared, I did what other Chicagoans did. I called my papa, lying on the floor of my room, "I want to go home!"

The concrete in the back of my house was cleared the next day.

Chicago is bastion of civic boosterism and political shenanigans, is a 325-mile trip north on Interstate 90 that leads to the Rockford House. You can forget about those sweet southern nights. The radio announcers start talking faster and the drivers drive crazier.

When your nose is assaulted by sulphur dioxide and your lungs are full of haze, it's possible you know you're in Northern Illinois.

Chicago is surrounded, intersected and segmented by a maze of endless modern expressways. One of the big battles of recent years between state and local officials has been over the course of the new concrete slab to accommodate all of the city's smooth traffic.

As a convention town, the Windy City has more than its share of entertainment spots for who be shriners. But our city still remains in the forefront of the drug traffic, skullduggery and international espionage.

"Get the hell out of my office, kid," one of them told me.

**Play wasn't 'Greek' to me**

I had promised myself I would publicly thank John Doe for his precious gift. I had waited weeks for this chance, not only because I had been going through some technical problems, but also because I had been looking forward to this creative and imaginative study of the play. Just how profound and perspective the real of the play was obvious in the performance and interpretation afterwards. It was particularly instructive for my students to see what John Doe was doing. I also experienced a very different but valid reading of the play.

As someone with rather definite opinions about the play, I naturally disagreed with various aspects of John's interpretation. Nevertheless, I was really thrilled by the total dramatization. The characters were all clearly defined and the overall interpretation was consistent and effective.

I wrote this as an open letter for two reasons: first, to thank the Theatre Department for doing such major productions of classical drama and to encourage future ones. There is still no more effective way for students to feel the "relevance" of Sophocles or Aeschylus.

The other reason is that I was quite distressed, as were many others, with the Daily Egyptian's review of the play.

There are any number of students of classical or modern European history on campus who could have given this play the kind of review it deserved.

I will not have the house the night after the review indicates the Daily Egyptian cannot pen as effectively as it should. This is a constant criticism. A director and university audience deserve a more sensitive and significant review than this production received.

"How can you read it? What's wrong with it? We're not asking for an automatic rave review—just one that is critical in the proper sense of the word. Thank you.

Smock doesn't justify closing mind to Christianity

This is in response to the preaching of George Smock at the north end of the Student Center. I can't stand the definition, a Christian. I say "by definition" so I can pass on and not have to answer.

It alone, nothing else, defines what a Christian is. What is the significance of this? I thing this is true because the evidence speaks for itself.

In reality, men are born in sin (The Bible says the heart of man is wicked). Separated from God and in need of repentance. Repentance comes by acknowledging our sin before God, a long forgiveness and then following Jesus.

There is a difference between people like John Smock's example and others like his to justify closing minds to the grace God offers in Christ, but I want you to know that you bear the responsibility for this action living.

‘Killing’ twins demonstrated reverence for life

Twice in 18 months, Philadelphia doctors deliberately killed infants. I say ‘killed’ because its story should be muddled by euphemisms. The doctors acted responsibly and with moral value in cases that were both abhorrent and spine-chilling.

The cases, superbly reported by Donald Drake of the Philadelphia Inquirer, involved Siamese twins, both girls, joined in the body’s most intimate and complete fashion. They shared a liver and a complete four-chambered heart tissue with an incomparable two-chambered heart. Consider the October 1973 case.

Baby Girls A and B appeared to be hugging. No babies joined that way have lived more than nine months. (Siamese twins occur once in 50,000 births; twins joined with hearts occur once in 100,000.) S e-c h one-and-a-half hearts cannot stand the strain. Without separation, both babies would die. Separated, the one given the indivisible heart would have a slight chance.

The parents were spared an awful choice: The heart could function only with one twin’s circulatory system. Surgeons believed they could build for Baby B a chest cavity to hold the heart, perhaps using grafts from Baby A’s ribs. They asked for $500,000.

Drake: ‘Dr. Rivers, the most prominent surgeon, a Pennsylvania six of the seven nurses who assisted the operation said the twins births were alertly making eye contact. Nurses saw personality differences emerging. Everyone agonized about the idea of ‘separating’ either one recent. A rabbi wondered: Are these two babies? Could Baby A be considered an appendage? The chief surgeon said there were two brains and nervous systems, but two babies.

Lawyers sought grounds for holding the surgeon safe from homicide charges. They argued that Pennsylvania law says death occurs when the heart stops, thus, because there was only one heart, there was only one life involved. The court rejected this route to classifying Baby A as an appendage.

Then the lawyers argued that no crime occurs if an act is done under a court order issued because the good anticipated from the act outweighs the bad. They cited an argument similar to one the rabbis had been pondering:

A mountain climber falls and is saved from instant death only by hanging from a rocky overhang. The partner’s hold is not so secure that he can keep both himself and his friend from death. Either the climber must die, or both will, so the climber with the more secure hold is justified in cutting his partner’s rope.

The parents were fervently told the operation was life-saving. In the end, the parents threw their wanted children into the Sarnen-Bloodworth’s ‘China Looking Glass,’ ghastly, but germicidal.

Somerset Maugham tells us: ‘he came upon a little tower on a Chinese hillside with a single small hole in its wall, from which came a nauseating odor.’ This was the baby tower, and it covered a deep channel pit into which parents threw their unwanted children through the aperture, or, if they were more gentle, lowered them in a basket on a piece of stout string.

Colman McCarthy

Media using their (its) power to alter King’s English

It is said, by some of the best sayers in the land, that the media have too much power. But one power they don’t have is the Kingly one of decrees changing in the rules of grammar. At least not yet, and at least not because no one tries.

The media, from the jarring evidence, are feverishly intent on changing their own words—media—from the plural to the singular: the media is, the media has, the media does. The noun sounds singular; like ‘the military,’ which is a plural concept, wrapped in a singular word, or the ‘industry,’ which means many companies.

If media sounds singular to the media, why can’t it be singular? Repeat ‘the media’ is, ‘the media has’ enough times and soon ‘the media are’ or ‘the media have’ will be out of favor. ‘The King’s English?’

With the campaigns against media having flourished in newspapers, magazines and the airwaves for years, it is certain that few others words are more misused in more public places by more professionals of language.

The New York Times has now joined the assault, with a hint that it might even want to lead in the parlous section one recent Sunday, the word media was pummeled twice in the editorial pages.

First, a reporter noted that the Washington drinking scene is made more ‘dangerous’ by media is less inclined to protect officials from personal indiscretions than in the past. Then, attacking with still more firepower, the op-ed page featured a political science professor who believed that ‘the news media, except for a few weeks after Camp David, has been unerringly hostile to Mr. Carter.’

Scoring two out of two, the Times moved even closer to the day when a singular media can be as grammatically correct as a singular medium. It also moved itself further away from The New York Times Manual of Style and Usage, which says of media that it’s ‘still a plural, despite persistent efforts to turn it into a singular.

The media’s drive against media may be unique in the annals of Great Wars Against Language. Misused words bloodied by the mobs tend to attract lobbies of protectors, the way endangered species are defended by developers and politicians who think that bald eagles are unique species.

Every English department in the land, for example, has at least one mad professor who spends hours trying to separate the media from whom and whom. It is still honored.

The wildlife media itself is every writing and fall to write letters to the editor after every migration stories about ‘Canadian geese’ instead of Canada geese. Still more letters come in when courageous souls like Wilbur Mills, Betty Ford and German Talman are called ‘reformed’ rather than ‘recovered’ alcoholics.

Michael Gartner, the exacting editor of the Des Moines Register, suffers heartburn on reading the phrase ‘on the grounds that.’ ‘Make it ground,’ he demands. E.B. White loathed anemic words like ‘very’ and ‘nice,’ though now that he no longer gardens at The New Yorker, the wordy words are springing up again in the magazine.

With the media apparently overcome by proprietary humanity—media is our word, we’ll use it as we wish—rescue missions for plural media are likely to be few and weak. The nation’s outrage can be summoned to ban lethal chemicals, recall buzz cars and give X-ratings to seedy films, but with the media’s swords raised highest to strike blows at media, how can outsiders care?

If insiders are the sole hope, then perhaps a coalition of old-fashioned press lords, cranky journalism professors and computer technologists is needed. The lords would anyone in the newsroom responsible for using a singular media, the profs would replace their computers, and the technocrats would open the investigation of basic English and the computer people would de-program the word media from the new electronic systems into which reporters now feed their copy.

With the awesome sanctions of economics, education and technology in force, the power of the media may be controlled—at least regarding media. If they want to obliterate another word, let them. The time the republic will be ready—Copyright, 1979, The Washington Post Company.

Ex-journalist’s play to be performed

By Nick Saval
Entertainment Editor

Although he worked in the newspaper business for 22 years, Richard M. Mengus, winner of the American Labor Playwrighting Competition, says he was mostly uninterested in "more creative types of writing."

Mengus’ play, "Dynamite," will be presented for the first time at 6 p.m. Wednesday in the Laboratory Theater, Communications Building. The play will also be performed at 2 p.m. Thursday through Sunday in the Laboratory Theater. Admission is $2.

"Dynamite" is part of a four-day symposium sponsored by the Department of Theater called "The Playwright at Work." Other activities include a panel discussion on playwriting to be held at 4 p.m. Thursday in the Laboratory Theater.

"Although I wanted to write novels and stuff, I felt the proper thing to do family-wise was to earn a steady living," Mengus said. "But a few years ago, after we got in good shape financially, I decided to get back to writing again."

But switching back to the novel format proved to be too big a change for the 50-year-old writer. All those years I spent writing for newspapers had influenced my style of writing, making me uninterested in my new endeavor. Instead I switched to writing plays," Mengus said. "As an actor who learned to create characters, I thought it would be easier to create characters I felt was a part of me, to express myself through writing." After leaving the newspaper business in 1972, his last job was with the ill-fated Chicago Free Press, which folded after three months. Mengus worked as a public relations director at Loyola University of Chicago in 1974, where he became an assistant to the president there.

In 1975, Mengus wrote three plays "(each one getting better)," before "Dynamite" took the first-place prize, beating out 18 other scripts submitted to SIU by authors in 23 states.

Mengus’ play examines events surrounding the 1919 trial of two labor agitators accused of bombing the "Los Angeles Times" printing plant, killing several persons. Clarence Darrow’s defense of the two, which culminated in an attempted compromise that would have traded guilty pleas for light sentences, nearly destroyed the lawyer as a spokesman for the radical labor movement.

"That incident has always been of interest to me, so it made a good topic for a play," Mengus said.

Following Wednesday’s performance, there will be an audience discussion and critique, featuring Mengus and Christopher Mo, director of "Dynamite."

Feature writer tells way to success

By Bill Crowe

Feature writers hoping to be successful in their chosen career must learn to explain the motivations and reasons behind their subjects' occupations or interests, according to Eugene Stone, editor of the Chicago Tribune's Tempo weekly. Stone visited SIU Monday and Tuesday as an editor-in-residence, lecturing to several journalism classes on finding feature and human-interest stories.

A good feature writer should experience as many different aspects of a subject as possible, Stone said. This will help the writers broaden their horizons and become more well-rounded journalists.

Stone said he has been employed as a society, food, police and church writer at various newspapers and magazines during his career. Stone said he has never written for a newspaper section in which he hasn't been a reporter as well.

Dishon said Stone recently assigned a report on the life of a woman who moved from a small town to a large city, but Stone dropped the story because the reporter was unable to complete the story in time for publication.

Stone said Stone would like to see more women writers in the field of journalism. She said she has been involved in the women's movement in some way and believes women should have equal opportunities in the field.

By Paula Donner  

Imagine a table filled with brownies, peanut butter balls, popcorn, and bread. Sound like a neat junk food display? That couldn't be further from the truth. It's a sample table full of natural foods. That's what the "Eat Well" workshop sponsored by the Career Planning and Placement Center and conducted by members of the Student Natural Foods Group.

Feather Haven, a not-for-profit organization, was organized about a year ago to promote enjoyment of natural foods and to serve a natural foods vegetarian restaurant in the area. In order to raise funds for this future investment, the group holds monthly dinners and carte boards. Dinners and other group functions, said Mary Flaherty, member of the group.

The group has a two-fold purpose: charitable and educational. Flaherty said. As a charitable organization, it donates food to other food organizations. As an educational organization, she said, members speak to groups and work to educate the community. The consciousness level as to how foods are grown and processed in the Southern Illinois area.

**Pizza Haven boosts natural diet**

The presentation made by the group was a result of an explanation of natural foods. The nutritional advantages of eating natural, the harmful effects of eating meat, the problem of world hunger, problems with refined flour, and some suggestions for healthful snacks. According to Nancy O'Conner, member of the group, natural foods are "full of marvels, including the incredible, unadulterated foods." She said there is a growing recognition of natural foods in the public eye, and that natural foods come to be exploited.

"Nowadays, natural is related to everything from potato chips to ice cream," she said. O'Conner added that while there are as present, no government restrictions for the use of natural, the Federal Trade Commission is working on a program to do so.

The key to natural, she said, is to "simply what you eat." She advised people to begin reading labels on foods in order to determine if any additives have been used in them. She said the food industry uses about 2,000 additives in foods. "We need to be cautious," she added.

O'Conner believes good natural is part of an on-going learning process about the body's needs and can be an alternative to going to the doctor. She said the foods are necessary ingredients in foods in order to maintain a proper amount of nutrition in the body. And according to Feather Haven member Guil Robinson, vegetable amino acids are as good as it is better than animal products.

There is such a thing as maintaining the right combinations of these amino acids, he said, and these basic combinations are the raw material of good health and final products of growth and legumes (beans, peas, lentils), and proteins and seeds. "The right combinations are the most important," he said.

While interest in natural foods has increased in the past few years, most consumption has probably doubled since 1950. "The reason people should stay away from meat, she said, is that animals consume 20 to 15 percent of the food in this country, most of which has been treated with some form of chemical or herbed. Whole foods and natural foods, when grown organically, require the least amount of body processing, she said.

(Continued on Page 17)
With two songs on the record charts right now — "Shake" and "Rollin' Stone" — Lacy J. Dalton has broken through the popular music barrier and established a place that he is unlikely to give up for some time.

Like many other artists, Dalton had to wait a long time for recognition. But the talent that kept him going through the years of waiting, will be very apparent when he appears as a special guest star in concert with the Beach Boys at the Arena on April 25 at 8 p.m.

One can hardly pick up a music magazine today without finding an article on the success story of Lacy J. Dalton. As "Lacy Matthews Makes Him" are commonplace as references to the Bee Gees, because Matthews, like the others, has been well known to music writers and on the edge of stardom for quite some time.

English writer Jerry Gilbert once characterized him as the "stormy petrel of English rock," in homage to Matthew's role in founding those provocative bands — Fairport Convention and Matthews Southern Comfort and Planxty — only to leave the fold each time just as recognition seemed imminent. Whatever impelled by integrity or sheer stubbornness he's since racked up a catalog of eight solo albums and at least a dozen projects projected to a legacy determination that forbids musical facile approaches to music:

"He's been known as a rebel up to now." Matthews explained in an interview with Rolling Stone. He says that the success of "Shake" has "been my reward. After all, I've been doing exactly what I wanted for a long time."

Labels, managers and players have a habit of abandoning a talent as soon as he's been left behind him. But the London-born 23-year-old Matthews has survived those tides, primarily on the strength of his interpretation of his modulated rhythms and textured voice as his immediate immediate appeal. It was his songwriting and his songwriting that was spoken of in his broadcast of the "Classics at the Slid" series. Although the variety of the classical dance class to which Bob Dylan belongs is primarily created by himself and Dylan, the ecstatic brothers, was an important addition to the London-born Matthews' songwriting.

David Bowie is a good player of the songwriting to which Dylan was drawn. He could be portrayed as a drunk and a drunk and a drunk and a drunk. Dylan's two brothers, who played on "Shake," played on "Shake," and played on "Shake," played on "Shake," and played on "Shake."

Darmo is a good player of the songwriting to which Dylan was drawn. He could be portrayed as a drunk and a drunk and a drunk and a drunk. Dylan's two brothers, who played on "Shake," played on "Shake," and played on "Shake," played on "Shake," and played on "Shake."

Darmo is a good player of the songwriting to which Dylan was drawn. He could be portrayed as a drunk and a drunk and a drunk and a drunk. Dylan's two brothers, who played on "Shake," played on "Shake," and played on "Shake," played on "Shake," and played on "Shake."

Darmo is a good player of the songwriting to which Dylan was drawn. He could be portrayed as a drunk and a drunk and a drunk and a drunk. Dylan's two brothers, who played on "Shake," played on "Shake," and played on "Shake," played on "Shake," and played on "Shake."

Crisis, however, is the first solo album. From his first solo albums with crack Fairport partners, through his subsequent alliances with musicians like Andy Roberts, Tom Rowan and Jeff "Sandy" Baxter, David Lindley and Jay Joachim, Matthews has become extremely marked with his voice. He has done so many songs, he's so hard pressed to narrow his choices when he appears in concert. So what he does is to try to focus on as much of his career as will allow and, of course, play the hit songs from his new album.

Tickets for the Beach Boys Matthews concert are $8 and $10 and are on sale at the Arena Special Event Ticket Office Monday through Friday from 9 a.m. until 4 p.m. and the Student Center Ticket Office daily until 10 p.m. For 24-hour information and reservations, call the Arena at 653-SLAM.

There are plenty of tickets still remaining for the concert, according to Kathy Pratt, Arena promotions director.

PPIE DREAM LITTLE COXWELL, England (AP) — When this tiny village was finally connected to main service, families were so relieved that they threw a party for the workmen who gaged them into the 13th century. The villagers even bashed a cake topped with a model of a mechanical digger.

Professor disproves man, ape link

He Marlin Head Writer

It was only a few months ago that anthropologist Adrothe Zihlman, University of California, received world-wide recognition for her announcement of the pygmy chimpanzee as the common ancestor of man and ape.

Robert Corrucci, physical anthropologist at SLU, and co-worker of McLeary, say they have proved Zihlman's theory wrong by solving the measurements of bones both of the pygmy and common chimpanzees. The report will be published in Science magazine.

Zihlman based her conclusions on the appearance of the pygmy chimpanzees, whose normal habitat is in Zaire. Africa she studied pelvis and spine and came to the conclusion that pygmy chimpanzees are slightly smaller than common chimpanzees. The pelvis is based on ground in trees and walk upright more than common chimpanzees. They do not have moving arms and legs for hanging and swinging like other apes. There are few differences between the bones of the pygmy chimpanzees in areas of use of cause teeth, brain capacity and musculature. In these respects according to Zihlman the pygmy chimpanzees are more like humans than apes.

Corrucci began studying the measurements of boxes hoping to confirm Zihlman's theory, which he described as "spectacular." Instead he came up with what is called a negative conclusion.

Corrucci said that the pygmy chimpanzees differ from the common chimpanzees in the growth of the pelvis but he does not know why this difference occurs, but because the pygmy chimpanzees are growing, it appears small and juvenile.

Group promotes nutritional benefits of "going natural"

(Continued from Page 8)

and she said that one-half cup of soybeans has as much protein as a slice of bread.

"Adapting a vegetarian diet is one of the most difficult problems," Zihlman said. "It is a wrong belief that the world doesn't have enough food to go around, but the scarcity is due to the irrational distribution and a misuse of resources," she said.

"Butter has been considered the Staff of Life," that is "not true of the world," she said. The problem is with food made with refined flour, she said, since the brain and germ are removed in order to make it lighter and remain longer.

"Bread and germ have the most vitamins," she said, "and because of that most commercial flour has been stripped of vitamins, riboflavin and iron as required by the law. We need to make up for the loss in vitamins."

The solution to the health problem, Robinson advises snacking on something high in protein and fiber, such as yogurt, graham, fresh fruit, popcorn, roasted soybeans and kale, black-eyed peas or raw vegetables.

"Health foods cost a little more but the high protein and fiber content makes it worth it," she said.

In response to the question of their presentation, the group offered samples of natural breads, snacks and drinks.

Activities

Chancellor Search Assistance Council meeting, 3 to 5:30 p.m., President's Conference Room, SLU campus.

Six teams capture IM basketball crowns

By Mark Petka

Six intramural basketball teams topped the competition over the weekend as the five-week-long season drew to a close. Two teams in each of the three divisions, men's AA, men's A, and women's, fought and battled their way to victories and the right to see first-place crowns.

The men's AA championship game was the perfect finale to a season filled with the passion created by close games. The performance featured Studebaker Hoe and the Medicine Ball in one of the closest intramural contests in recent years. Studebaker Hoe defeated the Medicine Ball in overtime, 74-71, but the game was much closer than the seven indicators.

At halftime the Medicine Ball was leading 27-24 and were controlling the tempo of the game like they had done all season. When the curtain fell for the second half however, Studebaker Hoe came back strong. Playing the leading role for Studebaker Hoe in the final set was Merlin Trikmmer. Trikmmer poured in 18 of his 20 points to put Studebaker Hoe in the lead. Studebaker Hoe's lead was very small but fell to 71-63.

In the final two minutes, the Medicine Ball fought and scrambled their way to a 5-0 tie with six seconds showing on the clock and the curtain ready to fall. Studebaker Hoe committed a foul, giving the Medicine Balls a chance to make the final basket and clinch the championship. Lee Ludwig, who had 37 points for the Medicine Balls, slapped up a 30 foot shot at the buzzer to save the game, missed, forcing the performance into an overtime set.

The overtime scene belonged all to Studebaker Hoe vs. the outsized Medicine Ball 12-5 to claim the championship. Leading Studebaker Hoe to victory were Mike Tompkins with 20 points, Norm Hubby with 18, Steve Paven with 19, and Mike Poppke with 16. Trikmmer played the lead role in most of Studebaker Hoe's playoff wins. Scores 64 points in eight playoff games. Ludwig had 25 points and Chuck Berlitch had 10 for the second-place Medicine Balls.

The men's A division championship game began as a close contest, but ended in a lopsided score and a championship for Colorado St. Thomas. Colorado St. Thomas defeated Mudefjigs 55-36 after being tied at halftime 18-18. Two close games were the story in the men's A and B championships. Gym Shoe Typhoons knocked the Long Rangers 56-33 in the A division final. Julie Quayley scored 22 points for the Typhoons.

The women's AA crowns barely captured the B division championship. Headed by Tonia, Pea. The ladies were the scoring story for Skinned Knee. Ce Lammers scored 27 points.

The two remaining championships were decided in the women's division Sugar Shots 5 turned in a sweeter performance than Sugar and Spice in the A division championship. Sugar Shots defeated Sugar and Spice 20-21 in a low scoring game for the candy-coated championship crown.

The B division title went to PINQ for its victory over Sugar Dippers. After scoring 35 points in a lopsided A-Cone effort, Jannitch scored 18 points in lead PINQ to first place.

Murray St. darkens trackster's day

By Tim Reed

Murray St. darkens trackster's day

The Murray State women's track and field program got an unexpected sunshine to McAndrew Stadium Tuesday, but it left a dark cloud in the form of a 7-9-6 win over the Northern Illinois Huskies.

The Huskies went into the meet following two close-season victories over the University of Illinois and Indiana University Saturday, but they never were able to break the Huskies' records. However, NSU took control of most of the meet and garnered eight firsts out of 15 events, holding the Huskies scoreless in four.

In Racers easily won all three places in the 100-meter hurdles and the 100-yard dash, led by Crandallied NSU in the 260 and 400-meter events. The Racers and finished second on the long jump.

NSU Coach Claude Blackman said that the team's Racers were strong in the sprint. As a result, the Racers captured first in the 100-meter hurdles, 260-meter, and 400-meter, and the Racers finished fourth in the 260-meter and 400-meter. The Racers finished second in the 100 and 260-meter.

"What I'm trying to do is to save the energy and tear our muscles today," Blackman said. "That's why Lindy and Jean were put in the distance, and Lindy won the 800-meter race, and Jean won the 800, and that was really good." 

Penny Hoffman won the high jump with a leap of 5-4 while Sheree Juin won second at 5-4. Both Velon and Hoffman were winning the 400-meter with time of 12.40. Velon finished second in the 260-meter with time of 2.38.4. Velon's second-place finish followed in the 400-meter with a time of 4:14.9. The Walmsley also won the 400-meter with a time of 4:15.6. The Walmsley finished second in the 260-meter with a time of 2:30.6.

"The long jump was expected," Blackman said. "Saturday was her first time to shine in a beautiful performance. Her 5-4 jump was very commendable and it looked good. "

Lori Lahrcher finished first in the shot put with a toss of 11 feet 11 inches. But Velon was second in the discuss with a 33.52 throw. Teammate Julie Severson was fourth with a throw of 31.32 meters. The Huskies split the relay events. The Racers won the 4x100 meters in 1:01.49. A last-minute loss by the Salukis A team dropped it behind into seventh place behind the entire team of Winona, Theresa Burghardt.

Department of Anthropology

Visiting Assistant Professor (Archaeology). Two month appointment to conduct field school in Anthropology (June 11 - August 3) in Southern Illinois. Ph.D. in Anthropology with specialization in Archaeology. Must have prior experience in directing a field school. Applicants with previous experience in the area strongly preferred. Deadline for application - April 27. Apply to Brian M. Butler, Department of Anthropology, Southern Illinois University, Carbondale, IL 62901.
Two SIU students win fitness run

Phyllis Mattern

Jeff Tindall

Steve Houseworth finished first in the men's division and Jani Johnson placed second in the women's division in the 10,000-meter run as part of the 10-kilometer Road Run composed of both the Road and the Fun Run on campus. Houseworth, according to Scott Vierke, director of the program, "placed the top prize in the 10,000-meter race about 30 seconds ahead of the second place." Second in the women's division, Johnson finished first in the men's division, running the 10,000 meters in 32:13 minutes. Second place was awarded to Bruce Brown, 35:18, and third place to Rich Leventhal, 36:28.

In the women's division, Johnson finished first, 40:30 meters ahead of second place winner Jean Crosetti and third, 46:13. First-place winners received a trophy and running shoes. Second- and third-place winners received a merchandise award. Each of the first three received medals, Vierke added. "Age 40 to 60 participated," Vierke said. "It was really great to see everyone together enjoying themselves." The two-mile Fun Run started at the same time as the 10,000-meter race. The runners turned around at the one-mile mark, he said.

Blue Jays spoil Sox home opener

CHICAGO (AP) — Bob Hare started the two runs and Rick Bosetti, Ken Mayberry and Dave McKay each knocked in three runs, and Rich Pelham made a successful run to the White Sox. The seven runs were added by the Blue Jays, who captured a 12-2 victory over the Sox. The Sox picked up an unearned run in the first inning after Bosetti had singled and reached second on a throwing error. Mayberry scored a three-run home run in the seventh, with a two-run single after Bosetti had singled to left. Bosetti, the third baseman, scattered seven hits in six innings and was touched for a run in the ninth on a double by Eric Seidenhein and a single by Mark Foley. The Sox picked up an unearned run in the seventh off reliever Mike Williams when Harry Chappie reached on an error and reeled in on a wild pitch and scored on a two-out single by Claude Washington. Toronto scored its last five runs in the ninth, and Rick Cerone walked with the bases loaded.

Women sign three to play basketball

Women's basketball Coach Cindy Dugger has announced that three players have signed letters of intent to attend SIU this fall. The signees are Kelcie Rogers, a 5-foot-10 guard, Linda George, a 5-foot-10 forward, and Barbara Yeates, a 5-foot-10 forward and center. Rogers averaged more than 30 points per game and shot 66 percent from the free throw line in her senior and junior years at Batavia (Ill.) High School. George is a great athlete, Rogers noted, as a pure jumper in major tournaments. She received all-state honors and scored 40 points on six different occasions. Rogers scored 1,078 points in her senior year.

Green, a junior college transfer who knocked in two, while pitcher John Johnson, first baseman, to a 41-4 record and two consecutive Big Ten league titles in the past two seasons. She averaged 17 points and one rebound per game and shot 33 percent from the field. Green chose to attend SIU, turning down offers from Louisiana, Missouri and South- ern Illinois.

Verderber, a four-year letter winner with 12.5 points and 8.3 rebounds per game at Lincoln Community High School. She holds the school records for most field goal percentage in a game (81%) and season (76%), and for most rebounds in a single game (32) and season (361). She led Lincoln in a 23-1 season this year.

The 10,000-meter Road Run began with a counter-clockwise loop around Evergreen Park, then went west on Reservoir Road to the tournament point and back again to Evergreen Park. The last runner finished at 10:45 a.m., Vierke said. "It's not how far or if you run, but it's how good you feel," Vierke said.

Fifty volunteers from the University provided water and encouragement to the runners. Vierke said. Aid stations were set up for runners to stop at if necessary. "This was the largest road run on the north of Lake Michigan and south of Detroit," Vierke said. "People came from everywhere to participate," Vierke said. About 20 percent of the participants were SIU students and the other 30 percent were area people.

The 5,000-meter Road Run was run Oct. 22, and there will probably another run sometime this summer, he said.

The doubleheader, the women's softball team's fourth straight game which was has been won by the Bears.

Salukis dealt Bears more 'bad news'

By Gerry Sims
Staff Writer

The Double News Bears' played at Abe Martin Field Tuesday. No, not the famous team of Hollywood, coached by Walter Matthau and led by pitching ace Tatum O'Neal. Rather, it was the Western Illinois University Bears, a team with a .572 record.

Unlike the Dural and Goshen struggle, the go-ahead Salukis came out on top, 5-4, as in 14 innings of doubleheader. The Bears batted around in the second inning, but it was all for naught.

For a team that could have used Tuesday's win, three Bear pitchers were victims of a Saluki assault that was relentless. SIU batted around in the first three innings, battering Bear starter Steve O'Donnell for 11 runs and 16 hits. He surrendered the ball as fast as a slamming door, the Bears scoring 11 runs in the first three innings.

A Saluki hope. O'Donnell was a great pitcher. The Bears were 25-3 overall that year. In the Bears' second start, they scored 19 runs in the first three innings.

The righthanded O'Donnell, whose record jumped to 1-4, was hanging breaking pitches that were almost as fast as a freight train going through Carbondale. And he threw something that was called a fastball. His control had never been better than that of the move team. In all, the Bears committed four errors, all resulted in runs scored.

The Bears scored one hit with 16 hits by the official scorer on some close plays. The Bears scored three runs off SIU and then allowed two hits and a fielder's choice. Mendola scored on Evans hit, and then allowed three walks and a runner on the second play. Clark also scored on Evans hit, and then allowed two hits and the Bears score. The Bears scored one run.

The Bears scored one run in the fifth inning. The Bears scored four runs in the fifth inning. The Bears scored four runs in the fifth inning. The Bears scored four runs in the fifth inning.

The Bears won the game with a 4-3 victory. They won the game with a 4-3 victory. The Bears won the game with a 4-3 victory. The Bears won the game with a 4-3 victory.

Jim Schaffer said, "It's just a shame about that last inning. It's just a shame about that last inning. It's just a shame about that last inning. It's just a shame about that last inning."
