Watch out world; here we come

Four years, and in some cases more, of studying, hard work, finals and trying to find a parking space are over. There will be no more cramming sessions, lectures or grades.

Unfortunately, there will also be no more as many nights of Pinty Penny, Wise Guys and destroying the brain cells you attempted to fill with knowledge. But, despite those nights of fun, give this: University, you still managed to maintain some knowledge.

The result, finally, is a diploma and the hope of moving from the artificial world of academia to the real and seemingly unvenered world outside of this campus.

You are new in the real world, and for better or for worse, you have to succeed in it.

No longer will you be asked to learn, do homework, go to class and take tests. You will be asked to do things. Nothing is a theory any more—you have to actually do it.

There is no more business theory. You either make money or become unemployed.

Education majors will actually have to teach other people, not just make the teacher think they can.

Engineering majors will not just be taking tests anymore. If they fail, a lot of money will be lost, and quite possibly, so will lives.

Aviation majors, obviously, better be able to fly a plane.

Student-athletes will have to prepare to be neither students nor athletes.

Communications majors will have to attempt to communicate in a very tight job market.

And psychology majors, should they become therapists, will have to make sure they don’t turn their patients into baraka-toting maniacs bent on world destruction.

The real world can be scary, because for the past 20-plus years, we have been programmed in the world of school, homework and tests. But now, failure will no longer be an option. Companies do not put their employees on academic probation.

The result, finally, is a diploma and the hope of moving from the artificial world of academia to the real and seemingly unvenered world outside of this campus.

You are now in the real world, and for better or for worse, you have to succeed in it.

And now, as you embark on the next step of your lifetime of learning, I leave you with wisdom in the immortal words of Thornton Nelsen;

“Look out for No. 1,” he said.

“But don’t step in No. 2!”
Career Services specialist advises graduates to focus for job market

Robbins said preparation, perseverance key to landing a career

Leah Williams lewilliams@dailyEgyptian.com

Once he has walked through the procession during Saturday's graduating ceremonies, Tom Brink said he is moving to California.

"I would like to preferably work in an advertising agency, but I could also work in brand management," said Brink, who will be completing his master's in business administration. "I want to work anywhere in California, just as long as there is no snow."

Though Brink does know where he wants to begin his career, his academic studies have prevented him from applying.

SIUC's Career Services reminds Brink and others graduating to prepare themselves for the working world. Career Services specialist Beverly Robbins advised the approaching graduates to focus on what they would like to achieve.

"Students need to focus on career goals and decide what kind of job they are looking for," Robbins said.

One of the first processes in landing a job is networking. Robbins said be generic so it could be adjusted according to the job the person is being interviewed for.

Robbins also said in today's technological world, graduating students should utilize all media sources available to them. Career Services' online job search program, called the Saluki Recruit, allows students to post resumes on the Internet. They could apply to the jobs listed or have employers review their resume.

Robbins also encourages students to use other job search websites, such as monster.com and hotjobs.com, in order to find opportunities outside Southern Illinois.

"Using some of the bigger electronic job search programs will give you an idea of what the job market is away from your own little geographic area," she said. "With the professional sites, you can find more opportunities in California, Minnesota or wherever you would like to go."

She said another good way to find a job is networking. "Next people do not get the job because of some classified ad," Robbins said. "They get it because of someone networking. They know somebody who knows somebody in the field, so you need to let everyone you know that you are looking for a job and are available. You never know who may know of a job that is of interest to you."

When it comes to the interviewing process, Robbins said preparation is key. Students could log on to the Career Services website and view potential questions an interviewer may ask. Career Services also provides mock interviews, so students can get a better idea of how to act during an interview. Students should also research the company they want to work for before meeting with the employers. Newspapers, trade magazines and websites are just some of the examples they should use in researching careers.

Though the job market is very competitive, Robbins said those graduating must be patient and persistent when it comes to looking for work.

"It will take a lot of work to be able to find a job," she said. "Sending your resume out is step one. The follow-up is just as important. Once you send a resume out, you need to give them five days and call the employer and ask, 'Did you get my resume? Is there any other information I could provide you? When will you be going interviews? Can we set up an interview time right now?'"

Robbins said he mostly encourages graduating students to plan accordingly before they enter their careers.

"My best advice is to prepare yourself as much as you can for the job market," Robbins said. "Be knowledgeable about the field and be knowledgeable about the companies you are applying to."

While Brink will find out for himself the transition from college student to college graduate, he said overall he has had a memorable time at SIUC.

"I have enjoyed my classes and professors," he said. "I enjoyed meeting new people. By in large, if I had to choose, I would say that I have had a positive experience."

Gus says:
Do I have to wear anything under my robe?

Candidates for Degrees

The following lists contain the names of candidates for degrees, the granting of which is contingent upon successful completion of all requirements for the degree.

An asterisk (*) to the right of the name indicates membership in the University Honors program (undergraduate students only). A double asterisk (**) to the right of the name indicates the person is a candidate for multiple degrees. University Academic Honors listed to the right of the name are as follows for undergraduate students:

- cum laude: 3.500 to 3.749
- magna cum laude: 3.750 to 3.899
- summa cum laude: 3.900 to 4.000

The grade point averages above apply firstly to all work taken at Southern Illinois University Carbondale and in the case of transfer students then to the total work as an additional, but secondary qualification.

The list was provided by the Office of Admissions and Records. If there are any problems, or omissions, please contact them at 453-4381.
