Radioactive water found inside plant

MIDDLETOWN, Pa. (AP) — Radioactive water leaked for nearly two hours inside the damaged Three Mile Island nuclear power plant in central Pennsylvania, authorities said. Leakage was discovered early Monday by an employee on the facility's security staff.

"The leak has been isolated and stopped," said John Collins, head of operations at the Nuclear Regulatory Commission's office here.

State officials said water had leaked at a maximum rate of nine gallons per minute between 12:55 and 2:40 p.m.

"I understand it came from a pipe within the auxiliary building," said Ken McKee, a spokesman for General Public Utilities, the plant's owner. "We do believe there are higher than normal levels of radioactivity within the auxiliary building. There is nothing outside the building."

Metropolitan Edison Co., operator of the plant that was shut down following an accident last March, later issued a statement saying, "In place monitoring devices indicated that radiation readings on the site have not been higher than normal background readings."

The auxiliary building, which adjoins the building that houses the severely damaged reactor, was immediately evacuated. There was no immediate word on how many workers were inside or if anyone was exposed to radioactivity.

Dave Mine, a spokesman for the state Department of Environmental Resources, said no radioactivity was detected outside the plant.

"The NRC has detected no leak in the environment," said Mine. Gary Sanborn, a spokesman for the Nuclear Regulatory Commission in Harrisburg, said a pump that adds water to the reactor's primary cooling system was turned on at 12:30 p.m.

"When they did, they got an alarm, a low pressure alarm," Sanborn said.

The low pressure indicated a loss of water from the system at a rate of 9 gallons a minute, he said.

In Washington, Frank Ingram, another NRC spokesman, said his agency's technical support team at the plant was investigating.

"Our people are checking into the question of releases outside the building. We have heard none reported so far, but that is very preliminary," Ingram said.

Plant officials said a team was preparing to re-enter the building to assess the situation.

SIU-C inherits 'Miss Piggy'

Playful pet porker too plump for comfort

By Paula Donner Walter
Staff Writer

...and this little Miss Piggy went we were ever, all the way to SIU-C.

Yes, Kermit the Frog, eat your heart out, because Miss Piggy is coming to campus, providing she passes a medical checkup.

The "cutie little baby pig," given to Vice President for Academic Affairs Frank Horton by his 40th birthday this past November, has already lowered its temperature. It's little too much for both, she said, and will now be donated to the University.

Horton's wife, Nancy, said the pig weighed 35 pounds when her husband got the pig as a gift for a "bunch of quotes." But six months later, Miss Piggy is a whopping 350 pounds and still growing.

"She was such a cute little baby pig but she just kept growing and growing and growing. She's just getting too big to take care of and it's costing an arm and a leg to feed her," Mrs. Horton said.

So the Hortons contacted the SIU Animal Industries Department and arranged to donate the pig to the swine nutrition department. Department chairman Howard Hodgson said the pig should arrive in the next two weeks, providing the blood test results show it to be a healthy pig.

"She's a good, healthy pig, with no obvious diseases. She's growing fine, and is a good size for her age," Hodgson said.

The Hortons have been keeping Miss Piggy in a barn behind their house, on Route 3, just off of Giant City Blacktop. The pig enjoys the company of seven cats, two horses, roosters, and the family dog, Casey.

"She's just like the dogs are, very intelligent. In fact, I think she thinks she's a dog. She throws balls and leaves to play outside with our two daughters, Amy and Kelly, and she especially loves to run along with them while they sled," she said.

Although it might seem a little impossible to coax a 350-pound pig up a steep hill in the snow, the Hortons manage with a little bribery-marshmallows.

"She really loves marshmallows and all sorts of other junk food. Mr. Hodgson said we have probably been feeding her a little too much," Mrs. Horton said.

Horton said the pig is worth about $30 on the market, but will be used for breeding purposes. However, since the animal has been raised alone, he said it is hard to evaluate just what quality of offspring she will deliver.

"We won't dump it in with a whole bunch of pigs at first. We'll put it so that one or two others to start. We're going to take the best care of it we can, but it's really hard to evaluate just like any other pig," he said.

Although Horton is reluctant to talk about his birthday present, which came from one of the Blue Bell Farms, Mrs. Horton said she will miss Miss Piggy.

"If she wouldn't have been given to us, she would have eventually gone into bacon. I've become really attached to her, and it's really going to be hard to give her up," Mrs. Horton said.

However, she added that she'd love to be able to raise one of Miss Piggy's offspring.

"I'd love to get the pick of the litter, even the runt, that is, if Frank lets me," Mrs. Horton said.

Amy and Kelly Horton, daughters of Vice President for Academic Affairs Frank Horton, use marshmallows to coax the family pet, Miss Piggy, into joining them while sledding.

The 350-pound gift has outgrown her pen at the Horton's home and will be moving to University farms.

Four New Mexico inmates sent to Marion

By Karen Gallo
Staff Writer

Four survivors of the New Mexico State Prison riots were sent to the U.S. Penitentiary at Marion, Ind., Monday morning after being classified as Level 5 prisoners, the most dangerous and violent in the prison system, according to Neil Leonard, associate warden of the maximum security facility.

Three more prisoners, also classified Level 5, were scheduled to be transferred to Marion last Friday, Leonard said, and they will probably arrive in the next few days.

The four prisoners were classified in Leavenworth, Kan., where they had been held since last Thursday. They were transferred to Terre Haute, Ind., and arrived in Marion by bus at about 10 a.m. Sunday, Leonard said.

The prisoners will be reclassified at Marion, Leonard said. The second classification will determine whether the prisoners should be placed in the general population of the prison or in isolation.

According to an official at the Federal Bureau of Prisons in Washington, the prisoners sent to Marion were four of 24 inmates from Leavenworth, a Level 5 institution.

Emil Am, spokesman for the Federal Bureau of Prisons, said the prisoners were sent to Marion because they were classified as Level 5 prisoners and because Marion is a maximum security prison.

The federal bureau accepted about 200 of the prisoners who survived riot at the New Mexico prison that left at least 36 inmates dead.

Gus says Miss Piggy may be the biggest but she isn't the first ham to get tenure
Iranian student: Khomeini support needed to help Bani Sadr rule Iran

By Andrew Zimmer

Although Iran now has a popularly-elected president, Ali Akbar Hashemi Rafsanjani, the nation will still be impossible without the support of the Ayatollah Khomeini, according to Asfih Razani, a native of Iran who said he receives letters and correspondence from the Midwest nation regularly. Razani said the inability to rule without Khomeini's blessing is due to poor internal cohesion and pressures from outside.

**Iran: Release of hostages may be soon**

By The Associated Press

Iranian President Abolhassan Bani-Sadr was quoted Monday by a French newspaper as saying his government is no longer demanding return of the deposit before the release of the American hostages which could occur "perhaps even in the coming days.

In Tehran, Ayatollah Ruhollah Khomeini marked the first anniversary of his Islamic revolution in Iran by vowing to continue battle against "the ruthless devourer," the United States. He made no mention of the hostages, who marked their 1,000th day in captivity.

According to the Paris newspaper Le Monde, Bani Sadr said the release of the hostages was possible, "perhaps even in the coming days," if the U.S. government acknowledged its "crimes" in Iran over the past quarter century and pledged to stay out of Iranian affairs.

**Strike ends; schools resume in Chicago**

CHICAGO (AP) — Students who had been "hungering to get back" to classes flooded through the doors of public schools for the first time in two weeks, ending a teachers' strike in the nation's third largest school district.

"Not ... little boring watching TV and going to movies," said one high school senior. Early attendance estimates showed that most of the 473,000 students were in classes. As schools opened, Board of Education officials were officially informing 300 teachers and 200 teachers' aides who had received termination notices that their jobs were now being restored.

The Chicago Teachers Union had insisted that the school board sharply reduce the number of jobs being eliminated in trimming millions of dollars out of the current budget.

**Work continues on Menard death row**

CHICAGO, III. (AP) — In spite of a federal court order delaying the move of death row inmates, the Menard Correctional Center is continuing work on an area to house Illinois' death row.

Federal Judge George N. Leighton issued a restraining order Feb. 1 blocking the move. The American Civil Liberties Union, in a class-action suit, had claimed that death row inmates, most of whom are from Cook County, would be removed from contact with their families and attorneys.

Menard, said Warden James Greer, already has 925 inmates from Cook County and "no one has complained about that."
Home energy audits as well as energy efficiency advice will soon be offered by utility and fuel companies to their customers.

Under the National Energy Policy Conservation Act that Congress passed in December, each of the large utility companies in the country is required to submit a proposal for offering energy audits of single-family residences to the Department of Energy by June.

The Illinois Institute of Natural Resources is helping the 12 utility and fuel companies in Illinois that must provide audits write a comprehensive plan to implement the federal energy policy, said Steve Brown, public information officer for the INR. Brown said that discussion of the plan has gone “very well so far” and is now in the writing stages.

The utility companies and the INR contracted Boone, Allen and Hamilton, Inc., a consulting firm from Berksda, Md., to actually write the state policy. Brown said that the INR and the utility companies decided to work together and write one plan for the state in an effort to save money. Brown said that all residents in this state will be offered the same type of audit no matter if their homes are run on gas, electricity or propane.

The groups involved in designing the state plan must decide such things as who will conduct the audits, how much it will cost, how extensive the audits will be and who will pay for the audits. Brown and Jim Golf, a public information officer for Central Illinois Public Service Co., are working on the plan.

Robert Pauls, energy coordinator for Carbondale, said that the residential consumer audit section of the act calls for "essentially three different phases of activity."

“The first is in the inspection of residences to determine and inform the consumer of the estimated cost of purchasing and installing energy conserving measures and the saving in the energy costs that are likely to result from the installation of these measures,” Pauls said.

Pauls said the second phase requires the utility companies to arrange the installation of the suggested measures, except in the case of furnace modification.

Furnace modification, or testing and altering the energy efficiency of a furnace, can be completed by the utility company if the resident company agrees. Pauls explained that “normally, utility companies can’t do it.”

Utility companies to offer consumer audits

By Mary Ann McNulty
Nashville

Hot Spots—The City of Carbondale is using infrared photographs to determine the energy efficiency of buildings in the area. A team from Texas Instruments flew over Carbondale and other cities on Jan. 3, to photograph every building in the city. The light areas indicate heat loss. The dark areas are cold spots from which no heat is emitted. This infrared scan and others depicting the rest of the city will be on display at the energy fair on March 28.

Police report sexual assault of SIU coed

By Lyne Saxman
Nashville

A woman was sexually assaulted at the SIU Agriculture Building early Monday morning by a man who stumped her at about 5 a.m. The man, described by her pursuers, and instructed her to perform fellatio. She reported the incident immediately after it occurred. University Police said.

The woman said he was assaulted and released by the man who stumped her at about 5 a.m. The man, described by her pursuers, and instructed her to perform fellatio. She reported the incident immediately after it occurred. University Police said.

Two men, one of them armed with a shotgun, made away with $200,000 in cash and jewelry from the Farwell Fresh Pack store in Carbondale early Friday night. Police reported.

Neither police nor Farm Fresh manager Don Beatty would disclose the amount of money taken by the two men.

The. men entered the store located at 102 S. Wall St., at about 7 a.m. One man stayed near the store's front entrance while the man carrying the shotgun approached cash register Fawell and instructed her to open the cash register and give him all the money, according to police.

Police said that the men described the shotgun-toting man as black about 25-years-old, 6 feet 1 inch and weighing about 180 pounds. He was wearing a brown hat and a beige, cloth coat.

No mercy for the jobless

Has anyone wondered what will happen to the employees of the Plaza Lounge while it closes for 28 days this month? Has the Plaza Lounge’s management realized that they close the lounge for 28 days, they might help me in some way. Thrusday’s DE.

The importance of this card is not lost on the City Council. As Donna Rabinowitz, Doctoral Student, Anthropology, points out, "the Plaza has been punished ever since the City Council decided in 1978 that topless dining was not an acceptable practice in Carbondale." The City Council is presently guilty of - Linn Wilson, Resident, Linguistics.

Chicago in Southern Illinois?

I also am outraged, and in total agreement with Kurt Boyles’s letter on the city’s student center, which appeared in Thursday’s DE.

Since the City of Carbondale has been attempting to become the "Chicago of Southern Illinois," why not leave the responsibility of snow removal to the citizens, and let us pay the city’s workers to sit, drink their hot coffee and watch - Thor C. Wurst.Senior, Un-

Olympic boycott

Playing for high stakes

By Dave Powers

Associate Editorial Page Editor

The Soviet Union’s boycott of the Summer Olympic games in Moscow is based primarily on ideological points of view. However, some Americans have taken time to investigate the economics of sponsoring such an international event. We have discovered that a boycott is the most powerful weapon, short of military force, that the free world can wield against Soviet expansionism.

The Soviet Union has much more than international athletic prestige riding on the success of the summer Olympic games. Even more important than proving a forum for Soviet propaganda, the Olympics offer an opportunity to attract much-needed western currency. And since gaining the home of hosting the Olympics, the Soviets have embarked on an extensive construction program aimed at achieving this end.

Based on possibly underestimated Soviet claims, more than $30 billion has been spent to provide facilities for those tied directly to the games. Eighteen residential towers, complete with athletic and recreational facilities, along with a new press center and air terminal, are included in the $300-million tab. Turning over these luxury accommodations to Moscow citizens, as the Soviet’s claim will be the case following the Olympics, is inconsistent with past Soviet tokenizing policy.

The Soviets are also working to overcome decades of neglect to tourist facilities which will be needed to service the anticipated 300,000 tourists and 5,000 western journalists. Tourists are expected to interject in excess of $35 million in hard currency into the Soviet economy. This "hard" money is important to the Soviets because the ruble is not accepted outside the Soviet Union.

These expectations of western dividends are above and beyond the $100-million price tag NBC will pay to broadcast the games. Approximately $80 million of NBC’s tab is earmarked for the Soviet government.

In order to finance the huge influx of tourists, the Soviets have financed the construction of several new hotels, restoring the snow removal - Thomas A. Pallen, Graduate, Theatre.

Soviets to impress the international community with its handling of the Olympics has indeed placed a huge financial burden on the Soviet government. And to say that a boycott of the Olympics is an ignominious 24-hour stoppage is to ignore the economics of such an undertaking as hosting the Olympics.

The Soviet Union is a country with a shaky economy and severe shortages of basic consumer goods. A successful, widespread boycott would be a financial blow from which the Soviets may never fully recover.
Singer slated for Coffeehouse

Eric Isaac, an award-winning singer-songwriter, will appear in a special Valentine's Day International Coffeehouse at 9 p.m. Thursday in the Old Main Room of the Student Center. The Batavia resident won an American Song Festival Award in 1975 for her song “Winter Moon.” Her show includes several of her own compositions, as well as songs by other noted musicians.

Hank Williams Jr.

By Rod Smith

Staff Writer

Just like the title of one of his songs, Hank Williams Jr. is “Feelin’ Better.”

“I've been a 360-degree turnaround,” Hank Jr. said. “I went through years of stepping stones, playing my daddy's songs, but about 1974 I started turning up my guitar and playing 'Sawdust Home Alabama' at shows instead of 'Your Cheatin' Heart.' I'm playing for Bocephus now instead of my daddy's fans.”

Williams played his new Southern rock sound before a full house at DuMarce in DeSoto Sunday night. The audience of half young rowdies in western wear and half older married couples was enthusiastic throughout the two-hour set, which featured songs from Hank's latest album, "Whiskey Bent and Hell Bound.

The son of country music's most famous crooner, Hank Jr.—nicknamed 'Bocephus' by his father—sits back in his luxury travel bus and propels his white cowboy boots up on a table. He seemed content to answer yet another set of questions concerning his new-found musical style and his late father.

"I'm not a big conformist," Hank Jr. said. "I don't consider myself a country singer, or a rock singer. I'm just a musician." Williams left the traditional country music surroundings of Nashville and moved to Alabama in 1974. The next year, he collaborated with Toby Caldwell of the Marshall Tucker Band, Chuck Leavell then of the Allman Brothers Band and Charlie Daniels to record "Hank Williams Jr. and Friends." a rock-oriented, but Southern-sounding album that Rolling Stone magazine hailed as his emergence as a major contemporary artist.

"I was a robot before the 'Framus' album. I just laid around MGM would say cut this, cut that, and I was doing the soundtrack of 'Hearts! Heart,' just playing my daddy's songs," Hank said.

"My music was not serious then. It was just built in. It's what you call merchandising." Williams' show included only two Hank Sr. hits, a spirited version of "Jambalaya" which opened the set and "Move It On Over," popularized by the George Thorogood and Bonnie Raitt versions. The Marshall Tucker Band favorite, "Can You See," was a favorite with the younger crowd.

Backed by his tight six-man group, the Bama Band, Williams played fiddle, electric piano and even drums on some songs, but he seemed most comfortable when he was picking extended lead riffs on his electric guitar. Hank received big ovations for his two recent country hits, "Family Tradition" and "Whiskey Bent and Hell Bound," but the loudest cheers were for his version of Waylon Jennings' "Are You Sure Hank Done It This Way." Williams, who has recently appeared with the Allman Brothers Band, Marshall Tucker Band and Waylon Jennings, said, "I'm not a big conformist, Hank Jr. said. "I don't consider myself a country singer, or a rock singer. I'm just a musician."
Marshall Tucker will bring its progressive country rock to the Arena March 3.

Marshall Tucker set for Arena

Southern Rock and progressive country will be the musical sounds presented March 3 when the Marshall Tucker Band makes its second appearance at the Arena with special guest Firefall.

Tickets are $8.50 and $6.50 for the 7:30 p.m. show.

The Arena will begin honoring lines for ticket sales at 7 a.m. Tuesday, an Arena official said. The first group of people who are willing and have the manpower to run the sign-up sheets at the Arena will maintain the lines. However, the group of ticket buyers must run the line for the full 24 hours until tickets go on sale Wednesday, the official added.

The people running the lines will be allowed to stay in the south lobby ticket office while compiling the ticket-line lists. The Marshall Tucker Band has six gold albums to its credit and two of them, "Searchin' For A Rainbow" and "Carolina Dreams," have reached platinum status. The band's seventh and newest release is "Running Like the Wind."

Firefall features smooth electric-acoustic pop music with a hint of a country background.

Chicago band Hounds to play at WTAO sponsored concert

By Craig DeVries
Staff Writer

Hounds is a five-man Chicago area band and a purveyor of what bassist and self-appointed band leader, John Hunter, labels "continental rock 'n' roll." Hunter says the band employs the rawest elements of early black music to achieve "a form that transcends both, a continuation..."

The group, which has recently recorded two albums for Columbia Records, will appear in two shows Wednesday at Second Chance, 213 E. Main. Also appearing will be Vision. The doors will open at 7 and 10:30 p.m. The event is sponsored by WTAO-FM.

Hank Jr. plays for his own fans

(Continued from Page 5)

Jennings, doesn't feel that the "outlaw movement" is anything new in country music. "I'm not trying to sound like anybody else. I've been singing those outlaw songs for years," Williams said. "There are a lot of old country songs that are real good even today but they are just not being heard by most folks. Not everybody likes Donna Summer and not everybody owns David Bowie records."

The DaMaroc crowd was very appreciative of Williams' new style of music. No one yelled for Hank Sr. songs during the show as he said audiences used to. Instead, all ages stood on chairs or danced in the aisles to his songs.

Hank Jr. sings about what he feels and what he has gone through, as in his self-appointed theme song "Feelin' Better."

"Waylon and I and all them boys, I wanna say thanks to you. Your fiddle and your steel make me play what I feel and I don't feel like I'm playing blues. "I'm feelin' better."

Hank is feelin' better, and apparently, so are his fans.
Contemporary sculptor to give lecture in Davis

By Charity Gould
Staff Writer

Paul Slepak, a contemporary sculptor participating in the Sculptor-in-Residence Program at SLC, will lecture and participate in a discussion at 4 p.m. Wednesday in Davis Auditorium.

The program is funded by a grant from the National Endowment for the Arts, a federal program, and the Office of Research Development and Administration.

Slepak's work deals with themes from the Midwestern prairie landscape. His sculptures range from table-size to huge environmental pieces.

A "theoretically oriented" piece titled "Sections" displayed at The Meadows in Las Vegas, Nev. and a sunken fountain in Twelve Oaks Mall in Novi, Mich. are among the public structures Slepak has created.

Slepak constructs his own work in his studio in Chicago. The studio, originally an electrical generating station, houses a 20-ton overhead crane which he uses when working on his larger sculptures.

Slepak's experience as a bridge welder and an architectural consultant is evident throughout his work.

Art historian Dennis Adrian says Slepak's work contains basic geometric shapes such as triangles and rectangles that bear a resemblance to architecture. However, Adrian says, his pieces offer a range of differing visual aspects as one looks at them from different angles.

Slepak's work investigates the environmental possibilities of public sculpture. He uses raw industrial materials such as steel and concrete to form many of his sculptures.

Slepak has presented exhibits at the Sarah Y. Rentschler Gallery in New York and the Albright Sculpture Garden in Chicago.

By Charly Gould

Handcuffs introduced in Gacy trial

CHICAGO (AP) – Prosecutors introduced into evidence Wednesday a pair of handcuffs John W. Gacy Jr. allegedly used in a fake magic trick during the last of the 33 Plaines carings.

Detectives identified a human hair he said he found in the trunk of Gacy’s car. It is the hair of a victim who was found several months later in the Des Plaines River.

Kozenczak, accompanied by three of his detectives and a technician from the Cook County sheriff’s police, searched Gacy’s house for about 2½ hours.

The prosecution contends the plaines car was lured by Gacy to his home after they met at a pharmacy where the boy worked and Gacy had done remodeling work.

The state said that Gacy used handcuffs on the pretense of showing the plaines boy a “magic trick.” With his hands bound behind his back, Gacy allegedly forced the boy to commit a sexual act with him. Then he strangled him with a rope.

Late the night after the killing, Gacy allegedly put the body in the trunk of his car, drove to the Interstate 55 bridge over the Des Plaines River and threw the body in.

On the way back, Gacy’s car skidded off the road and into a ditch of the Tri-state Tollway, and eventually was spotted by a tollway employee who saw out of the mud and snow.

When he did get to the station, Kozenczak had obtained a search warrant and went to the house. Kozenczak also told of finding a photo receipt in the garbage in Gacy’s kitchen. The receipt was from the pharmacy where Plaines worked.

Lifestyling coordinator, this year’s road run will draw more than 10,000 runners; all ages, from the Division of Continuing Education, Call 530-7751 for more information.

The gun will go off 9 a.m. Saturday, April 12, for the 1980 run. It’s SIU-C’s annual Spring Lifestyling 10,000-meter road run, an event which last year drew more than 300 runners of all ages.

Sponsored by SIU’s Lifestyling program, this year’s road run will feature a new course which will start and finish north of the Arena. The course winds through the largest road run south of Louis and north of Atlanta. It’s SIU-C’s annual Spring Lifestyling 10,000-meter road run, an event which last year drew more than 300 runners of all ages.

Entry forms are $5 for the 10,000-meter run and $1 for the shorter event. All entrants in the 10,000-meter run will receive T-shirts and all finishers will be awarded certificates. Entrants in the shorter run also can get T-shirts by paying the full $5 entry fee.

Trophy and medals will be awarded to top finishers in each of 11 male and female age groups in the 10,000-meter run. “We want to capture the spirit of non-competitive running and still give people a chance to race,” said Scott Vierke, Lifestyling coordinator.

Entry forms will be available from the Division of Continuing Education. Call 530-7751 for more information.

Drainways-greenways plan hits money trouble

By Erick Hovenstine
Staff Writer

The 1976 drainways-greenways plan for Carbondale has run into financial troubles, said senior planner for city, J. S. Bruno in recent interviews.

The project would set up 300 acres in and around Carbondale as an interconnected, openspaced network that would include 25 acres of parks, 22 acres of forest preserves, 437 acres of drainage easements and 33 miles of paved bicycle trails.

Attempts to acquire land for a proposed bicycle trail running from East Grand Street to East Walnut Street along the Pyles Fork creek have started the project.

Bruno called the Pyles Fork trail a "demonstration project." It's part of a path which will eventually run from University Park to campus housing area to the University Mall," he said.

Although the drainways-greenways plan would make use of land with "very low suitability for development," owners consider these areas as valuable as land parcels with commercial feasibility, Bruno said. "They expect too high a price," he said.

The trails, on land strips 10 to 30 feet wide, will generally follow drainage easements, flood plains and, in developed areas, alleys.

Although in all previous years only slightly more than $45,000 has been spent on the project, more than $75,000 was allocated for the 1978-79 fiscal year. The city and the federal government will split this cost equally, Bruno said. Construction costs will probably be similarly divided, he added.

The cost of the entire park and trail network was estimated in 1976 to be $1.1 million. It was to be completed in 20 years. Bruno said the project will take longer than 20 years if no additional source of funding is found.

One proposed source of money is a forest preserve district that would be established within Carbondale.

Students could affect Carbondale census

By Scott Canon
Student Writer

University students who report their residence as city, other than Carbondale in the 1980 census will force the city out of federal funds it deserves. At the last 1980 Census, the Census Bureau found students should list their place of residence as the house or apartment they will be living in April even if it is only temporary and their parents live elsewhere.

Heavens said a common mistake made by students is to list their parents' home as their place of residence on the census form. This causes Carbondale to have lower population figures and also lowers federal grant monies determined from those figures. Heavens said it is used to reapportion the House of Representatives, state and local legislative bodies and to allocate some $50 billion in federal money including general revenue sharing funds.

A local review committee was formed by the Census committee following a recommendation by Heavens. This committee made up of parts of the census committee will review the census data and challenge the figures if they feel they are not an accurate reflection of Carbondale.

Although the 1970 census listed Carbondale population at 27,024, the bureau's 1977 estimate dropped to 21,120. There was a .7 percent under-estimation of minorities from the 1970 census, which may have cost the city about 7 percent in federal funds, said James Danridge, bureau representative.

Carbondale was not able to change the data from the 1970 census. However, Carbondale can call for a recount if it feels one is needed after returns from the 1980 census are received. Heavens suggested the local review committee check building records and consult utility companies to compare the number of dwellings in Carbondale with the figures of the Census Bureau for the 1980 census.

A promotion committee will try to inform both the city and university committees about the census. It will work with the media in the area to urge residents to fill out the census form, Heavens said.

"It's important that the students who are going to be living in Carbondale as of April 1 fill out the form," Heavens said, "because they use the services in the city and the census affects funds from the federal government." Heavens said.

Campus Briefs

A talk about "Psychology of Afro-Americans" will be presented by Robert Guthrie of Southern Illinois Research and Development Center at 4 p.m. Tuesday in Larson Hall, Room 121, sponsored by the Psychology Department.

"Intimate Relationships: What's Normal Anyway," a workshop dealing with the stages of relationships, will be sponsored by the Counseling Center.

"Where's My Liver?" part of a well-care workshop on common student ailments, will be sponsored by the Health Activation Program of the Student Wellness Resource Center at 7 p.m. Tuesday in the Student Center.

The Women's Center will have a program on plumbing repair at 7:30 p.m. Tuesday at 408 W. Freeman.

"The Drive for Power," part of the Ascent of Man series, will be shown at 7:30 Tuesday in Life Science I, Room 305, sponsored by the Medical School's faculty-student collogium.

Information about internship in Washington D.C. for juniors and seniors with overall GPAs of 3.0 or more and full semester will be available Tuesday from Marie Kiker in Woody Hall, Room C-115. Students may earn up to 12 hours of credit for interning at a government or private agency and participating in a seminar under the auspices of the Washington Center for Learning Alternatives.

Sculptor Paul Slenak, known for his massive landscapes of the Midwestern prairie, will participate in the sculptor-in-retirement program this week. Slenak will center with art students and faculty, cast two versions of sculpture, and deliver a public lecture at 4 p.m. Wednesday in the Wham Building, Davis Auditorium.

The Worn's Caucus will meet at noon Wednesday in the Theres Hall and a program about Violence and Pornography will be presented by Dana Bankston and Greece Smith from information they obtained for a research project.

Scientists begin study of white tail deer

By University News Service

Scientists from the Cooperative Wildlife Research program are launching a statewide three-year study to determine how white tail deer stay alive.

The study, which is funded by the Illinois Department of Conservation, will look at factors which affect the survival of fawns in Illinois' white tail deer herd. Information from the research effort will be used by DOW wildlife management experts to refine their management of the state's white tail deer population.

A promotion committee was also formed following a suggestion by Heavens. The purpose of this committee is to let people in Carbondale know what is going on with the census living, Heavens said.

The promotion committee will try to inform both the city and university committees about the census. It will work with the media in the area to urge residents to fill out the census form, Heavens said.

"It's important that the students who are going to be living in Carbondale as of April 1 fill out the form," Heavens said, "because they use the services in the city and the census affects funds from the federal government." Heavens said.

Psychologists say hostages, families will need to readjust

By The Associated Press

SOMETHING of the sixth day of the crisis, not only for the U.S. embassy officials in Iran, but also for their families at home.

To make sure their needs are met, and to help ease the pain of separation, some psychologists are conducting the study of the crisis.

"Families have been dramatically affected by the hostage situation, and there is a need to think what they are going through," a Chicago professor who is on the Dangerous Drugs Commission, said.

The medical treatment consists of two months and up to six months of THC, the active ingredient in marijuana.

Though the capsule is available at the Chicago area with a prescription for the drug, patients are not required to pay for prescriptions. The patients have been told that the capsule is designed specifically to reduce the side effects of chemotherapy.

The first phase of the study was to determine a dosage level, and to determine the safety of using marijuana in the treatment. Sweet said the second phase, which will involve up to 600 patients, is designed specifically to determine effectiveness of the drug in reducing side effects of chemotherapy.

Cancer treatment side effects eased through use of marijuana ingredient

In the state, officials say as many as 800 of these patients can be treated with the drug. Larsen, an official at the Illinois State Department of Children and Family Services, said the program will begin its second phase within the next two months and up to 600 cancer patients will be eligible for the treatments.

Sweat is currently treating 32 cancer patients from the Chicago area with tetrahydrocannabinol, known as THC, the active ingredient in marijuana.

The majority of patients have a positive benefit," Sweat said.

But, there have been "a few cases where people got more nauseous with the THC than without it," Kirkpatrick said.

The psychologist and Dr. Rachel Spanier of Purdue University said he is now treating 32 patients.

The capsule is said to be "a few times as potent, not just what the hostages need." The psychologist and Dr. Graham Spanier of Penn State University and Hamilton McAllister of the University of Minnesota draw on long experience with families of prisoners of war and Vietnam veterans, in action. "Often what happens in the hospital is just not the treatment they need," he said.

"We can help avoid many classroom readjustment problems," said Figley.

From the start of the hostage situation on Nov. 4, experts have been working to determine the ravages would suffer from anxiety, depression and family problems.

The psychologist and Dr. Donald Sweet, a University of Chicago professor who is conducting the study of the medical use of the drug, said his patients range in age from 18 to 70.

The majority of patients have a positive benefit," Sweat said.

But, there have been "a few cases where people got more nauseous with the THC than without it," Kirkpatrick said.

Revised grievances policy available at liberal art office

The Liberal Arts Council has announced that copies of the updated "Grievance Policy for Academic Evaluation," are now available to all Liberal Arts College undergraduates. The revised policy on student grievances includes several changes from the previous version, including procedures for handling complaints, and the role of the university ombudsman. Copies of the document, titled "Grievance Policy for Academic Evaluation," are available at the university's Ombudsman office and on the Liberal Arts College website. The policy was updated to reflect changes in academic standards and improve the handling of student grievances.

Instructor evaluations offer little, says expert

By Eric Wirtz

Staff Writer

Instructor evaluations are currently a standard part of the academic process at Northwestern University. Professor Peter Frey, a specialist in educational psychology, has found many problems with the current evaluation system. Frey, who teaches courses in psychology at Northwestern, conducted a study on instructor evaluations at the university. His findings indicate that the current system is not effective in providing useful feedback to instructors.

"Why should we have confidence in our students as impartial judges of our abilities?" asked Frey. "When we ask them to evaluate our performance in a course, it is often difficult for them to be objective." Frey suggested an alternative: student evaluations of instructors. "If we ask our students to rate their instructors, we can get a more accurate picture of their performance," he said. Frey's study found that student evaluations were often based on personal factors rather than objective criteria.

Professor says gerontology influence may grow tremendously in the future

By University News Service

Current projections by the United States Department of Health, Education, and Welfare suggest that the population of Americans over the age of 65 will grow dramatically. By the year 2020, there will be approximately 65 million people over the age of 65, representing one in five Americans. This increase in the elderly population means a growing demand for gerontology programs and courses. Professor Richard Erihick, a specialist in gerontology, predicts that the field of gerontology will continue to expand in importance.

"Gerontology is alive and well at SIU-C," Erihick said. "It is offering more courses to students at the undergraduate and graduate levels which could lead to careers in gerontology." The SIU-C program is currently funded from the federal Department of Health, Education, and Welfare. When HEW did not renew the grant in August, the University set aside internal funds to keep the special courses alive.

"It's a significant step in the steady progression of the College of Liberal Arts. We are pleased to continue to offer these courses to students," Erihick said. "The increasing number of people over 65 is a direct reflection of the field's importance." The gerontology program operates under the College of Liberal Arts and the College of Education Four units offer course work: social welfare, rehabilitation, and aging, and the departments of health education and higher education.

How Much Time (not a rhetorical question) Could You Save With A Professional Typing Service?

WORDS PLUS will handle your typing

How much time do you waste typing? How many pages or copies can you produce in a given amount of time? The professional typists at WORDS PLUS can help you with your typing needs. They can help you with a wide range of tasks, from simple typewriting to complex, larger projects. Their expertise includes document formatting, report writing, and any other typewriting task you may have.

How to find out more information about WORDS PLUS

For more information, please contact 309-268-0700 ext. 12 or 309-775-0079 ext. 12. WORDS PLUS can help you with all your typewriting needs. Whether you need a single page or hundreds of copies, they have the expertise to get the job done right. They offer competitive rates and fast, reliable service. Contact them today to see how they can save you time and money with their professional typing services.
Courts may decide on women, draft

By H. Josef Roebert
Associated Press Writer

While Congress seems cool toward registering women for the draft, legal scholars say no matter what happens on Capitol Hill, the courts most likely will have the final say on whether women join men in registration lines.

And in the courts, those advocating the registration of women as well as men, including President Carter and his aides, are expected to carry the upper hand, many legal experts say.

"Whenever it goes up Congress, there will be a suit filed," says Thomas防水h, a professor of constitutional law at Yale University. "There's no way that the courts can avoid it."

The American Civil Liberties Union already has said it will challenge any attempt to register only men. The day that the president signs a male-only registration law, "we will be in court," vowed David Larson, a staff attorney in the ACLU's Washington office.

Phyllis Schlafly, a leading opponent of the Equal Rights Amendment and harsh critic of women's registration, said she will focus her efforts on Congress, which must approve such registration.

"There's no way Congress will register women," she insisted in an interview. But if unsuccessful on Capitol Hill, she does not rule out some court action, although the basis of such a suit on constitutional grounds is not clear.

After Carter announced that he wants to register both men and women, 18 and 26 years of age, White House officials said a major factor in the decision was the prospect of court challenges if women were excluded.

If the president has decided to register only men, said Sarah Weddington, a lawyer and presidential adviser on women's issues, "there was a feeling that a lawsuit against Carter would be successful" in light of a number of recent Supreme Court rulings on women's equality.

Carter said in a statement that his decision to include women "is a recognition of the reality that both men and women are working members of our society. There is no distinction possible, on the basis of ability or performance."

A number of experts on constitutional law agree.

They note that when the all-male draft was an effect, various court challenges were rebuffed on the grounds that military objectives outweighed consideration of sexual equality.
Lady tracksters hold snowy fund raiser

By Andrew Zinner
Staff Writer

Running through the snow may not be the best way to enjoy the sport, but for the SIU- Carbondale track team, it was the only way to raise money. They need the funds, about $700, according to team members, to participate in an indoor track dual meet next week in Champaign.

Cheri Chiarello, another trackster, believes that the 14 team members spent last week searching for sponsors, who will pay a certain price for each lap completed in one hour. The fund-raising run took place on Sunday afternoon from 1 to 2 p.m. in Bailey Memorial Stadium.

She said sponsors were found in classes among students and teachers, and downtown businesses also were helpful. The fund-raising is needed because only two indoor meets are provided for in the schedule, according to Meehan, a junior in business marketing.

"We need the money for transportation, hotel, and food expenses, as well as entry fees," Chiarello explained. "If we didn't raise the money, we'd have had to stay at a girl's house in Champaign.

According to Meehan, this is the first time the women's team is going to participate in the indoor event, because everyone wants to go, and "they're working harder than ever to raise the money," she added. "The women are trying to establish an indoor season in order to better prepare for the outdoors, which begins in March.

"I think John can make 16 feet and be a great vaulter for us," Hartzog said.

Hartzog told Tom Ross "looked much better than he had," with a personal best of 3:1.4 and a second-place vault of 9.2.

Tom Ross won the long jump, only 1 4 inch better than his best score ever. He also moved forward in the 300-yard dash in 31.82. Ross also had third-place finishes in the 880-yard run and 220-yard dash.

Ross also moved forward in the 300-yard dash in 31.82. Ross also had third-place finishes in the 880-yard run and 220-yard dash.

Heather Reid was second in the 100-yard dash with a 11.8 and in the 220-yard dash with a 22.5.

At the SIU-Collage Invitational, the Salukis Jet picked up all the top records which begin in March.

Coach Claudia Blackman was among the runners, who tried to run as many laps as possible in one hour. If there is any money left over after the Champaign excursion, Meehan said it would be used to help subsidize the outdoor season, which includes the prestigious Drake Relays in April.

Netters shut out at Wichita St.

The men’s tennis team definitely didn’t know how to respond to their hithot weekend. The netters should have realized that this wasn’t going to be their weekend. The bad luck began shortly after their plane took off. Bad weather forced the plane to turn back to Carbondale to reschedule against Bill Nichols and Nigel O’ourke.

The netters realized Friday that this was not going to be their weekend. They were not able to fly to Wichita, where their plane took off. Bad luck began shortly after Wichita. The netters should have rescheduled their match against Bill Nichols and Nigel O’ourke.

The netters realized that the attitude for the whole bunch was not good. They continued to go downhill when they were able to fly to Wichita. They lost to Wichita State, 9-0.

Freshmen impressive in track win over EIU

(Continued from Page 11)

Mike Choffin was second in the mile with a 4:15.76.

"K старен ran an easy mile and an outstanding 1,000, beating Derek Miller of Eastern," Hartzog said. Hartzog said one highlight of the race was the 600-yard run where Du Quoin native Mike Wolfe ran a 1:23.5.

"It was pleasing to see Ward defeat Snyder of Eastern," Hartzog said. He ran a super race for this time of year. He set the attitude for the whole bunch that run. When one of our guys can do that at the beginning of a meet, it gets us excited.

"When David Lee does something fantastic, you sort of expect him to do it," Hartzog said. "When little Mike, who has really been working hard, can do something like that, it inspires the younger guys."

Freshman Bob Schoon was second in the high jump with a leap of 6-7. Freshman Derek Roeker, who was not scheduled to compete because of a leg injury, ran a 6-4 and took second in the quarter mile.

Lady gymnasts lose to top-ranked Penn State

Compete on the bars, scored a 7.65. PSU widened the gap in the balance beam, notching a team score of 38.20 compared to the 34.85 for SIU. Again, the Lionettes displayed the depth which enabled them to defeat defending AIA champion Cal-State Fullerton.149.55-134.23, 5-week earlier.

All six Lionettes scored at least 8.30, with Ann McGiey and Ann Carr scoring 9.20 and 9.25. SIU’s top score was 9.15 by Painton. The Salukis rallied behind Ereckson and Painton to out-score PSU 30.30-35.55 in the floor exercise. Both Salukis scored 9.15 in the event.

In the all-around, PSU’s Carr, a two-time all-around titlist, took first place with a total of 36.30. Painton was second, 35.75. Penn State’s Marci Foster third, 35.65, and Harrington fourth, 35.40. Other Saluki all-around scores were Ereckson’s 34.81 and Residency’s 33.96.

Health News . . .

Spinal Problems Require Specialized Health Care

By DR. ROY S. WHITE

Although I have been in practice for some time now, I never cease to be amazed at the number of people who give their basic principles of Chiropractic a try. For example, I recently spoke to a young lady who was hospitalized for seven days and was put on treatment of partial subluxation in her spine.

In everyday terms, that means that one set of vertebrae in her spine had slipped sideways. And often, thousands of dollars of costly hospital care, what were the results? Nil, says the young lady. The young lady was no better and no worse when she was discharged.

While each case must be examined on an individual basis, this would appear from the information available to me to be classic care for Chiropractic. Partial subluxations can be treated effectively by Chiropractic. Let me add that, to his credit, the Medical Doctor who treated the young recommended against surgery in her case, citing that the risks involved did not warrant such action.

This story is just another example of how many people fail to think of Chiropractic first when they think of back problems. Chiropractic, we would call a podiatrist if they had a toothache, and that certainly wouldn’t call the Chiropractor in the middle of the night to deliver a baby. Yet they expect to solve their back problems with a pain pill or linaments.

But over the past decade, insurance companies and virtually every state Workmen’s Compensation Fund have gotten the message. They honor Chiropractic claims for aci dent and industrial injury treatment, just as they honor those for the treatment of back injuries.

Medicine, Dentistry, Osteopathy, and Chiropractic are all recognized by the United States government as legitimate healing arts. Each has its place and plays an important role in the nation’s health care needs. And when your problem is one involving the nerves, muscles, and spine, Chiropractic is your best defense against future suffering.
