Men's athletics' budget tightens troope

By Jacques Konarak
Staff Writer

The Intercollegiate Athletics Committee, Friday, announced that what it wanted from the men's athletics budget was a balanced budget for fiscal year 1981. In giving their approval, however, committee members said they regretfully conformed a budget that would affect the program next year.

At its last meeting, the IAC reiterated its position that the Flying Salukis should not receive $13,000 in student athletics fee money next year. The committee, the advisory arm of the intercollegiate athletics program, also resolved to hold special public meetings for discussion of athletics fund raising and attendance.

In presenting the new budget, Supervisor Lloyd Haims said at the meeting, "It's a balanced budget—now renew it. Support athletics program does not realize more than has been spent. Committee members said they arm of the intercollegiate athletics program head, told the Mace said Thursday he did automatically excluding the athletics fee money next year. George Mace, vice president of student affairs, said he would wait until after Student Senate for the athletics fee money to be discussed.

At its last meeting, the Board of Trustees member Pat Ostenburg from the Graduate Board passed a conditional two to one vote in favor. The two student members are eligible for athletics fee money automatically excluding the flying team.

No consensus was reached, but the committee decided that the team is "comparable in organization and purpose" to certified sports clubs, such as soccer and volleyball, and therefore not qualify for funds.

Gus Bode

Gus says Sayers & Co. receive the men's sports budget down to playing weight but they're afraid it's now too weak to suit up.

A funny thing happened in the U-Theater

By Ken Mac Garrige
News Editor

"A Funny Thing Happened on Way to the Forum," which just ended a two-weekend run at the University Theater, is a great show but by no means remarkable production. It would be great if the show had an eager-to-be-free slave, and a man who dreamed up to help himself become a citizen of Rome. That's the plot.

Probably the best performance, the funniest anything, is put on by Black as Miles Gloriosus, a warrior, and a captain in the Roman Army, was an ego size of the Coliseum. "I am my master's slave," he proclaims, among other things. His foot soldiers are dumb enough to be believable and add to the fun. Black has an anything but black future if he sticks to show business.

The set (as usual) was first-rate. There is nothing "cheap" about the sets built for University Theater productions.

Whatever faults one finds in "A Funny Thing" are probably beyond the control of the actors. Black as a theater group performs a proven money-maker, such as "A Funny Thing," or "Oklahoma," the actors are--perhaps unfair criticism, being compared with Mostel, are among the majority.

During 45 minutes of debate on the flying team, the committee tried to resolve whether the Board of Trustees had mandated that only sports recognized by the NCAA are eligible for athletics fee money--automatically excluding the flying team.

No consensus was reached, but the committee decided that the team is "comparable in organization and purpose" to certified sports clubs, such as soccer and volleyball, and therefore not qualify for funds.

Residents may find tax relief in city building's energy costs

By Mary Marcy
Staff Writer

There may be no relief in sight from rising temperature and power bills, and a city building is heating and cooling city buildings. Scheduled for discussion at Monday night's City Council are the city's share of funds for and details of a contract to perform technical services, building at the cost building and the Earna Hayes Center.

The council, which meets at 7 p.m., City Hall, 406 E. College St., will discuss their percent funding match to a $12,400 Department of Energy grant aimed at more energy costs in city buildings. A grant was awarded to Carbondale in March. The city was chosen by among some 20 other Illinois cities that applied for the money and funds.

Carbondale Energy Coordinator Robert Pauls recommended to the council that the contract to perform the audits be awarded to the architectural firm of Carbondale. The firm, Pauls wrote, submitted the lowest bid and would be bids from companies offering to perform the necessary work.

Pauls wrote that the city's match of funds, if approved by the council, would come from University City and Carbondale. Haydn and Associates, which have already been in contact with the DOE, presented plans for a combined energy conservation.

"Motorcycle crash kills man; woman passenger is injured"

By Tony Gordon
Staff Writer

A 1969 graduate of SIU was killed and his 25-year-old woman passenger injured Thursday night in a motorcycle accident on McClafferty Road in Carbondale. Marc S. Garavalia, 22, of 704 E. Park St., Carbondale, reportedly was driving his motorcycle on McClafferty Road about 10:47 p.m. Thursday. The Illinois State Police would release no details about the accident, but said it appeared to be a single-vehicle accident. Garavalia was taken to Carbondale Hospital about 11:15 p.m. Thursday; his condition was not reported. His woman was transported to Carbondale Hospital about 11:30 p.m. Thursday. Her condition was not reported. She was later released. It was not clear how the accident occurred.

A passenger on the motorcycle, Janet Cleveland, 20, of Carbondale, was injured in the accident. She was taken to Memorial Hospital in Carbondale and then transferred to the Memorial Hospital in St. Louis. She is listed in satisfactory condition.

Garavalia was a 1974 Herrin High School and won the 1976-77 Mayor's Award in Athletics in Herrin. J.C. Garavalia, is the SIUC director of development and former executive director of the Herrin Chamber of Commerce.

Surivors include his parents, and one brother, Brian, of all Carbondale.
3-year-old girl dies following pool accident

A three-year-old Carbondale girl who fell into a swimming pool at the Carbondale Sports Complex Wednesday died in a St. Louis hospital.

Emily Elyse Shaw, daughter of Karen and Kenneth Shaw, 205 T. Wood Road, Carbondale, died at 6:35 p.m. Thursday in the intensive-care unit of St. Louis Children's Hospital.

The girl reportedly fell into the pool about 7:30 p.m. Wednesday in a above-ground model surrounded by a four-foot-wall. Police suspect the girl fell off of a sandwich that is on one side of the pool.

County ambulance attendants revived the girl at the scene. The girl was later transferred to the St. Louis hospital.

Miss Shaw was born Sept. 27, 1976, in Carbondale.

Funeral services were held Sunday at St. Andrews Catholic Church in Murphysboro. Burial at Tabor "C" cemetery in Tabor. Miss Shaw died at 6:35 p.m. Wednesday died in a car accident in Murphysboro.

By The Associated Press

Richard Queen, the dies

The Associated Press unofficially counted 383 heat-related deaths as of Sunday, the 23rd day of the heat wave in some areas.

The death count includes 88 victims in Texas, 83 in Arkansas, 67 in Missouri, 30 in Oklahoma, 27 in Tennessee, 20 in Mississippi, 19 in Kansas, 15 in Illinois, 11 in Georgia, seven in Alabama, five in Louisiana, three in Kentucky, two each in Indiana and South Carolina and one in Nebraska.

Heat-related deaths were recorded Saturday in Mississippi and South Carolina.

The Lowndes County coroner said Annie Lou Windham, 79, of Columbus, Miss., was found dead inside her mobile home with all its windows closed and the interior temperature approaching 120 degrees.

Officials at Fort Jackson in Columbia, S.C., said a 38-year-old basic trainee died Saturday after collapsing during sweltering heat on Thursday. Pvt. J. Harris, 29, a native of Indiana, who was to have completed the training Wednesday became ill as he neared the end of his physical training tests.

In Texas, where the most recent heat death was reported Thursday, officials said the most susceptible people have already died, so the fatality toll has stabilized. Another factor is that temperatures, while remaining above 100, have dropped below the record highs of the heat wave's first days and warnings of the dangers from exposure are finally sinking in.

Dallas residents were being urged to use caution outdoors, even though 100-degree weather is "normal" in summer.

State & Nation

Tests to keep freed envoy hospitalized

WIESBADEN, West Germany (AP) — Richard Queen, the American envoy freed after 26 years of captivity in Iran, will be kept at a U.S. Air Force hospital here for several days, U.S. officials involved in his release said. But there was no indication that doctors were performing on Queen.

Journalists were barred from the medical center where Queen is being treated and extra guards were posted outside.

"Freedom" boats cleared for release

MIAMI (AP) — Warning that hundreds of fishermen whose boats were seized during the "Freedom Flotilla" are forbidden to sail to another country — particularly Cuba — a judge has ruled they can reclaim their vessels and get back to harvesting the sea.

A U.S. District Judge Joe Eaton said the estimated 500 boats would be released by federal officials if the owners post personal surety bonds, sign over mortgages and liens on each craft to the federal government and insure them against loss or damage.

Boat owners would not be allowed to sail to foreign countries until legal difficulties, such as $1,000 fines for each refuge brought to Florida, were settled.

An attorney for the fishermen said paperwork to release the boats could be completed by Tuesday.

2,300 nuclear incidents reported

WASHINGTON (AP) — More than 2,300 incidents, including operational errors and mechanical failures, were reported at the nation's nuclear power plants last year, "raising new safety concerns," an anti-nuclear group affiliated with Ralph Nader charged Sunday.

Although utilities and industry spokesmen as well as government officials have insisted that nuclear plants are safe, many critics charge that the plants are more prone to accidents and that the public is not being fully informed of problems.

"We would attach no significance whatsoever to the number of reports," said C. Microwave, head of the NRC office that analyzes such reports.

Vending of krypton gas over at TMI

HARRISBURG, Pa. (AP) — The vending of lethal krypton gas at Three Mile Island is over, but engineers say it may take two years before it will be replaced,

The radioactive gas escaped into the containment building during an acid-leak accident last year, and was vented into the atmosphere in a two-week purge that ended Friday.

The Miss Illinois pageant will be televised Saturday night by cable TV in the Chicago area. She said, "I weighed about 20 pounds before the pageant since January. "I weighed about 125 pounds before the Miss Southern Illinois pageant."

Accustomed to large breakfasts, Wright sang at Six Flags Over Texas, a part of the Theta Xi Variety Show at SIUC and her church. She sang the national anthem at most athletic events last school year.

"I had to realize that they are looking for the individual with the best personality, what you have that is different.

The Miss Southern Illinois, Wright won $700 and travel expenses were paid.
Public radio always will be here

The public vs. commercial radio debate is getting out of hand. Before it goes any further, I'd like to offer my own perspective.

I listened steadily to WTAO in 1974 and 1975 and on and on. But when it went off the air, the old station the other people at work would allow, and partly because it was available, I suddenly found myself listening to WTAQ. Since then, the whole pop culture atmosphere has gone downhill, and WTAQ has faithfully reflected the downward path.

Mr. Cauley is extremely indignant at all of the beloved music, but it would be interesting to check back with him in 10 years—we have live so long to see if he's still listening to "Who's Next" or "Some Girls." We tend to grow in spite of ourselves, and this includes foraking the advancement of music into the Top or to the center. The monuments will stand; I know that I'll be listening to "Joe" and Joni Mitchell's "Court and Sound" in 2008, among other masterpieces from Charles Ives to Charlie Parker which will be remembered long after the trash has fallen by the wayside.

I don't know about you, Mr. Cauley, but when I pass by a record store, I don't usually stay and listen to the music played very loudly. I consider that only when the resident is hearing-impaired. I'm willing to make allowances, but do try not to make for either quality or enjoyment. I could cite any number of works, from Keith Jarrett's solo piano pieces on the one had to Jerry Garcia's eclectic sets on the other, to make my point; not to mention string quartets and wind ensembles and just "experimental"-non-electronic groups.

This is a pluralistic society, and with luck, will remain so. We shouldn't all have to suffer with the reputation of the worst opera, any more than we should have to enjoy through another chorus of "My Sharraana..." We do our thing, Mr. Cauley et al. You do yours; and if the time ever comes again, I think it will be when you feel you've outgrown your nation's music that it will be too waiting for you. Remember that WTAQ's call letters point to "taz" the principle that the only constant in the universe is change.

Patrick Drazen, Carbondale
Jazz, classics, marches spice Air Force Band’s repertoire

By Anne Becker

With postures as straight as the creases in a drill sergeant’s pants, the Air Force Band of Mid-America opened its concert Thursday evening in Shryock Auditorium by leading a sparse crowd in singing of the “Star-Spangled Banner.”

Maj. Charles Pettijohn, master of ceremonies and conductor, then directed the 40 musicians from Scott Air Force Base in a diverse program designed to offer something for every musical taste.

The band’s selections varied from the steady beat of an Italian march by Tchaikowsky to the rapid and snappy sounds of “Siava” by Leonard Bernstein.

Mellow Fellows performed their classic rhythm and blues for a sweating and dancing crowd. Following intermission, the Jazz Band, led by Carl Popadat, entertained the crowd with such tunes as “June Is Bustin’ Out All Over” and “Get Me to the Church on Time.”

After two years with the band, Pettijohn is leaving the group to study at a professional music school.

Pettijohn, who has been with military bands for the past 14 years, said he believes his two years with the Scott AFB group were perhaps not long enough to reach all the goals he had set. But he added that he is ready to move on.

“The military band plays an important role in representing the military to the public. Many people we play for have us as their only contact with the military,” he said.

He added that the reaction to the military band has generally been good. “We seem to draw more enthusiastic crowds, or maybe we are getting more enthusiastic reaction to our patriotic numbers.”

Pettijohn commented that he adjusted to the band’s touring life the best that there have been other problems.

“There can be a problem in motivating people in the band and getting them to pay attention to the performance,” he said.

The Mid-America Band, which travels in a 12-state area, is one of 13 air force bands around the world.

Conference probes solutions to campus alcohol problems

A conference to acquaint health professionals, counselors, housing service workers and administrators with ways of solving alcohol abuse problems of college students is scheduled next month on the campus.

The Midwestern Conference on Alcohol Problems on Campus will bring participants to SIU-C from Aug. 5-7, according to conference coordinator Patricia Eckert, director of the SIU-C Alcohol Education Program.

Featured speaker will be Patricia O’Gorman, director of the Division of Prevention of the National Institute on Alcohol Abuse and Alcoholism.

“Alcohol abuse has been a problem on college campuses for years, but it seems to be a growing problem and one that merits more professional attention,” said Eckert.

Conference planners expect this to be the first of several annual conferences on alcohol on campus, Eckert said. “The conference gives campus professionals the chance to sit down and discuss drinking problems and the kinds of things that are being done to remedy those problems,” she said.

Eckert said participants are expected from Illinois, Iowa, Ohio, Indiana, Michigan, Wisconsin, Kentucky, Minnesota and Missouri.

Big Twist moves crowd with rhythm and blues

By Christopher Milligan

Big Twist and his seven Mellow Fellows turned their classic rhythm and blues for a sweating and dancing crowd of fans who endured the 90 degree heat Thursday evening to hear their local favorite.

The Mellow Fellows, sponsored by the Student Programming Council and part of the Sunset Concert Series, quickly got the audience to forget about the heat and enjoy their performance. From the opening number to the final selection, the audience clapped and danced. And how could they not dance? Starting off with a tune called “Said N’ Didt,” the Mellow Fellows played with a tight-knit fashion that is rarely seen in Carbondale.

Twist’s clear and sweet vocals are truly the dancing point of the band. So is his showmanship. At one point, he resembled “255 pounds of soul.” Big Twist looks more like a National Football League defensive lineman than Baby Huey. Sweating, warm and wearing his shades, Twist worked his show with the untroubled skill of a pro.

Behind Twist are the Mellow Fellows, a group which wraps itself around the tough Motown flex of Tim Caron’s bass and the sizzling drumming of Melvin Crisp. Rhythm guitarist Peter Ogolini and keyboardist Bob Pina added to the night-long perfection.

The three-piece horn section, echoing at its brassy best, backed up Twist as he exhorted the crowd. With Terry Ogolini on tenor and Jimmy Halpin on trombone and Mark Olsden on trumpet, the horn section played in a tightly controlled and dynamic fashion.

Twist, who was just released from the hospital 10 days ago, and he lost 10 pounds in four days and that he hadn’t gotten all of his strength back. Nonetheless, Twist was sharp and danced throughout the hot night as though he had never been sick a day in his life. He drew out in his usual natty three-piece suit, flamboyantly wide-brimmed hat and black sunglasses. Twist kept the audience entertained.

The music was vintage rhythm-and-blues, and as Big Twist is his tight, cooking band of soulmen reap what they sow, they will have a fine harvest.

Activities

Continuing Education Conference, 8 a.m. to 4:30 p.m., Ballroom A, Department of Mines and Minerals.

Mid-America Band of Mid-America, 7:30 to 9:30 p.m., Boy’s Gymnasium.

Women’s Basketball Camp, 8 a.m. to 3 p.m., Activity Center.

Motorcycle Safety Workshop, 8 a.m. to 1 p.m., Student Center.

Muslim United, meeting, 9 to 10 a.m., Steamtown Room.

Computerized geology gear reads rock's inner secrets in minutes

By James L. Ensign
Student Writer

Would you like to take a visual "walk" on a piece of ancient rock, pottery or coal? If you were a geologist, would you like to be able to test the rock's physical and chemical properties within minutes?

SIU-C geologists have recently installed the $250,000 CESIMI eight-component equipment to do just that, and now they are taking such "walks." Carbondale may be one of two colleges in the nation to have CESIMI, The Computer Evaluation of Scanning Microscope Images equipment, according to its operator, Paul Robinson, assistant geology professor at New York State University at Syracuse. He is the other college to have a CESIMI.

Let's take together a scanning electron microscope, two X-ray detectors, one rough and one fine chemical comparison measuring device, a control deck for the microscope with built-in camera and television screens, a gross object examination television camera and the heart and brain of the entire system—a digital computer.

Robinson is able to make tests and evaluations in minutes that used to take hours or days, or were impossible to make with a regular optical microscope and traditional devices, he said.

Although there are other scanning electron microscopes on campus, Robinson said the CESIMI is unique because the computer can direct all the other components—making testing almost automatic.

"The use of this equipment is really only controlled by the imagination of the people who design projects for us to work on with it," he said.

He gave an example of what CESIMI could do if it could study the face of a dime.

With the microscope set to magnify 100,000 times, Roosevelt's head would be almost 1 mile high. The computer could count the details of the hairs on the head, while the X-ray detectors could print out the exact amounts of copper, nickel and silver in the coin. Meanwhile, as the operator moved the electron beam, he could take the closest portraits imaginable.

Under a $60,000 Department of Energy research contract, CESIMI is primarily used to study the sulphur pollutants found in coal, Robinson said. The CESIMI Geology Department is now applying for more than $1 million in grants and contracts.

If SIU-C geologists, working with other researchers, can determine how much sulphur is deposited with coal, they can then find better ways to clean the coal.

To study the coal, Robinson mounted a tiny specimen on a metal holder the size of a thimble. The coal had been plated with a thin transparent layer of gold-palladium, so the specimen conducted electricity when the electron beam hit it. The target was placed in a vibration-free vacuum chamber under the electron beam column. Using various mechanical and electric controls, he moved the specimen around until he located the area he wanted to study. He then brought the viewing image to a certain size and focused the image on the television screen.

"The visual image is very useful for our work, as a source of the signal to the CESIMI system," Robinson said as he looked at a bright spot on the coal specimen.

Dave Bensley, SIU-C graduate student in geology, has done his graduate research on leafy, waxy coal. With the help of Robinson and CESIMI, Bensley's work may aid coal gasification and liquefaction studies to create alternate liquid energy sources from coal.

Besides coal, a research, CESIMI is used by SIU-C geologists to study areas involving the history of the earth's geological processes.
Liquor dealers are not pleased with proposed Halloween wine ban

By Kevin Knight
Student Writer

The possible effects of the City Council’s recommendations for Halloween ‘80 have produced reactions by Carbondale liquor store owners ranging from objections to concern about potential black market operations.

The recommendations were presented by the city’s Halloween Study Committee. The committee’s recommendation that bottled beer and wine sales be prohibited for seven days before, and on the weekend of Halloween, has elicited objections from two Carbondale store owners.

Doug Diggle, manager and part-owner of Old Town Liquors, stated his objections to the ban on wine sales.

"I am more than willing to cut off sales of bottled beer, but two-thirds of my store is dinner wines, or would have to travel out of town to get them."

By putting a ban on the sale of table wines many of my older customers, some of whom are members of the SIU-C faculty, would be forced to go without dinner wines, or have to travel out of town to get them.

Fotios Karayiannis, owner of Pinch Penny Liquors, expressed his concern about the possibility of black market sales of wines and the loss of revenue for the city.

"I suggested the ban on bottled beer to the council five months ago, but the opportunity for black market wine sales is one area that is being overlooked," Karayiannis said.

"These bootleggers will be able to sell wine here that weekend, but we store owners who have liquor licenses won’t."

Karayiannis said he thought that although most of the students here in Carbondale are from other cities, the City Council never made any attempt to stop them from coming here because of the revenue they brought in. But now they want to stop outsiders from coming in for just one weekend, even though the added revenue is greatest at that time.

The possible effects of the City Council’s recommendations for Halloween ‘80 have produced reactions by Carbondale liquor store owners ranging from objections to concern about potential black market operations.

Campus Briefs

The Parent Support Group will have a meeting at 7 p.m. Tuesday in Puhlman 117. This group has been formed as a support group for parents of special needs children. If you are interested in attending, please call Ginny Hayes at 435-2111 during the day or 529-1258 after hours.

The revival crusade, conducted by Chicago evangelist Elder Spencer Green, is continuing through Thursday. The public is invited to attend these services which will be held each night at 7:30 p.m. at the Earl. Call Haynes Auditorium.

The International Food and Agriculture Development Program will sponsor a seminar titled "Extension Education and Rural Development in the Pacific Basin," at 1:30 p.m. Friday in the Seminar Room of the Agriculture Building.

BRIEFS POLICY—Information for Campus Briefs must be received by delivery or mail to the Daily Egyptian newsroom, Room 2247 Communications Building, by 1 p.m. the day prior to publication. The item typed and should include time, date, place and sponsor of the event and the name and telephone number of the person submitting the item. Briefs will be run only once.

In Samoa, doing as Samoans do can mean taro three times a day

By Karen Clare
Staff Writer

A School of Agriculture professor recently returned from Samoa, a South Pacific island, where he taught for three weeks at an agricultural college.

James Legacy, associate professor of agricultural education, said he encountered a few problems while teaching there, because of cultural differences between the island people and Americans.

Trying to teach the Samoans new agricultural practices at the University of the South Pacific in Western Samoa was quite challenging, Legacy said. The Samoans would agree to try something new, he said, but they wouldn't carry out the instructions.

Legacy said he had to learn to "overcome the acclimation and be aware of the cultural differences."

And differences there were. The staple food in Samoa is taro, a tropical plant with a starchy edible root. "They eat three times a day," the professor said.

Legacy said the tropical conditions on the island are so different from what he is familiar with that he had to do some re-learning. He explained that he couldn't help Samoa agricultural students advance by teaching them how to grow sweet corn in the tropics. The island's major crops are tapioca and cocco beans.

In Samoa, he explained, the chief, known as the matai, is absolute ruler. The townsmen must receive the matai's approval for even simple decisions, such as whether or not to build a fence, he said. "These people have been living the same way for 3,000 years," Legacy added.

Legacy learned a lot about Samoan culture and their society during his visit in May. He said a taxi driver he talked with believed "the only way to wealth is to have a lot of kids." But, Legacy added, some of the same kind of thinking exists in the United States. In Samoa, however, the children are required to support their parents, he said.

Living in another culture for three weeks did take some getting used to. He stayed in the town's only hotel and was summoned to dinner each night by the beating of drums.

Legacy said the only form of media entertainment available on the island was old movies. One night, he said, he watched a five-year-old Bill Cosby movie. All of the newspapers were written in the native language, but he was prepared. "I brought some magazines and read them each about 16 times," he said.

Legacy went to Western Samoa as a consultant for the United States Agency for International Development, a branch of the State Department. One of the objectives of the program is to train the Samoans in their own culture. Legacy said that in the past the Samoans would come to the United States to train, then would eventually end up staying here. By sending agricultural experts to the islands instead of having them come here, Legacy said the training is more realistic and effective.

Carterville minister appointed to projects job on Simon's staff

By Scott Canon
Staff Writer

U.S. Rep. Paul Simon, D-Carbondale, has named Joe B. Pierce as projects assistant for the 5th District, replacing Paul Morrill, who will run Simon's re-election campaign.

Pierce, minister of the First Baptist Church in Carterville, will work with Simon's constituents trying to obtain loans and grants from the federal government.

His job will entail working as a liaison between people in the district and Simon's office in Washington, D.C., in order to obtain grants for which the people qualify, Pierce said.

Pierce, who begun work Monday, said so far he has spent most of his time arranging loans from the Farmer's Home Administration for recent storm victims.

Pierce said he is busy getting the FHA loans for moderate-to-low-income families who would not be able to replace or repair their homes without the low-interest, guaranteed loans.

Steve Tackett-Hull, Simon's media representative, said Pierce was chosen for the projects assistant position because he has a good working relationship with people in the area. Hull said Pierce's knowledge of the district qualified him for the $24,000-a-year job.

"Joe Pierce will be a valuable addition to my staff," Simon said. "His knowledge of the area and ability to work with people will be a real asset."

Lee, hurdlers pace U.S. team in first meet

From Associated Press Reports

SIU's David Lee was part of a 1-3-4 American sweep in the 440-meter hurdles event Friday night in international track and field competition at Stuttgart, West Germany.

World record holder Edwin Moses took first place with a time of 48.67 seconds, making him the all-time consensus hurdles leader in the intermediate hurdles with 41 in a row. James Walker, runner-up to Moses in last month's Olympic Trials, once again finished behind him in 49.15.

Lee, competing for the first time since taking third at the Trials, took third in 49.68, just ahead of runner-up Desai Williams of Canada, who continued clearly ahead of teammate Bart Williams, who clocked in at 49.77.

The meet was the first for the touring U.S. Olympic Track and Field team. In the Stuttgart session, the Americans won 14 of 31 final events to top the entries from among 25 countries.

The United States gained a second victory when 1976 Olympian Harvey Glance took the 100-meter dash in 10.24. The seasoned Glance, formerly of Temple, and his teammate, Desai Williams of Canada, who was clocked in at 10.32.

Other men's winners included Don Page of Villanova, who won the 1-mile run in 3:50.96; James Butler of Oklahoma State University, who continued his surprising string of success in the 200-meters, winning in 20.65; and Tom Hintnaus of Villanova, who won the too-meter dash in 20.65;

Fif'ldouriog U.S. Olympic Track Trials, once again making the all-time record in the 200-meter sprint. Leery Decker, 22, from the University of St. Louis scored a sparkling 10.28 in the 100-meter sprint, 1/2 second ahead of teammate Bart Williams, who clocked in at 10.32.

Other men's winners included Don Page of Villanova, who won the 1-mile run in 3:50.96; James Butler of Oklahoma State University, who continued his surprising string of success in the 200-meters, winning in 20.65; and Tom Hintnaus of Villanova, who won the 200-meter dash in 20.65.

NEW YORK (AP) — Lee Mazzioli's second home run of the game, a three-run shot in the New York's six-run eighth inning Sunday, gave the Mets a 7-4 victory over the St. Louis Cardinals in the opener of a doubleheader.

Doug Flynn and pinch-hitter Alex Trevino singled before Mazzioli slammied his ninth home run and eighth in 15 games to give New York a 4-3 lead.

Frank Tavera followed with a single and St. Louis starter Bob Sykes, 3-7, was replaced by John Urrrea, who walked Tavera to second. Urrrea walked Steve Henderson, and threw wildly in attempting to pick off Tavera — allowing the runners to advance a base.

John Stearns walked to load the bases, Joel Youngblood singled to right to score Tavera, and Jerry Maldan ranged to ground to Tavera, who executed the hit for an error, allowing two runs to score.

George Hendrick's 19th homer of the season, a two-run eighth-inning shot, had lifted the Cardinals to a 3-1 lead prior to the Mets' rally. Hendrick hit a 1-0 pitch off Met starter Pete Falcone, 5-5.

St. Louis scored in the fourth when Ted Simmons doubled, went to third on a single by Ken Reitz, and scored.

Rams sign Petroff

Former Saluki grid kicker Les Petroff has signed a series of one-year contracts with the Los Angeles Rams of the National Football League.

The 22-year-old North Olmsted, Ohio native signed three contracts. The first calls for $25,000, the second, $30,000, and the third $35,000. Petroff said Petroff added that if he does well, he could receive additional bonuses, such as $2,500 for becoming a starter.

"It looks pretty good. They have a new specialty teams coach and are looking to improve their specialty teams," Petroff said. "L.A. is a real good team and I should have a pretty good shot at making it." Petroff said he signed the contracts June 11 after trying out with two other teams, the Cleveland Browns and the Detroit Lions.

"The Rams were the only team to make me an offer right away," he said. "So I took it. Petroff has to report to a Los Angeles training camp this Friday.

Weight man to sign with Pats

By Paul Reck Staff Writer

One of many people are surprised when they hear of a 6-5, 350-pound man signing a professional football contract. While a person of that size is certainly much larger than the average human, he can find several peers of equal bulk in either the National or Canadian Football Leagues.

What makes for a more interesting story is when the 6-5, 320-pound did not play a minute of collegiate football, competing rather as a weight man on the track and field team.

Stan Podolski is the man that fits the above description. An All-American for Coach Lou Hartung's Saluki in 1979, Podolski holds school records in the hammer throw, discus and shot put. And, if all goes as planned, he will sign a one-year contract with the New England Patriots of the National Football League's New England Patriots Monday.

The contract's terms include a provision stating Podolski is guaranteed a slot on the Patriots' taxi squad next year, giving him a full year in which to develop.

After competing in last month's Olympic Trials at Eugene, Ore. (the he did not qualify for the finals), the St. Louis native signed with a Patriot's scout about the possibility of a professional football tryout.

"The scout came up to me in the lobby of the hotel I had been staying in, and just started talking about my thoughts on professional football, in general," Podolski said. "Then he told me he thought that with my strength and speed, I had the potential of making it as a defensive lineman in the pros."

Podolski runs the 40-yard dash in 4.9 seconds, a very respectable time for a professional lineman.

In making his decision, Podolski, who earned a degree in accounting, also had to weigh the offer made him by a St. Louis accounting firm long before the professional football possibility came along.

"I have talked to the people who offered me the accounting job, and if looks as if I'll be able to work with them in the off-season," Podolski said. "Then, if the football tryout isn't successful, I'll go to work for them full-time, as I had planned before."

Podolski's tryout at the Patriots' Providence, R.I., the second time he has been there since he played football for St. Louis Rosary High School.

As a 6-4, 280-pound senior fullback, he averaged an incredible nine yards per carry, also he played tackle on defense.

In order to prepare himself for training camp, Podolski has enlisted the help of Saluki football coach Rey Dempsey and his assistants.

"Coach Dempsey has helped me a lot as far as telling me what to look for in my contract — just how much money I should deserve as a free agent," Podolski said. "I've also been working with a few of his assistants as some fundamentals, conditioning and other things, I should know before I go to camp."

"If things work out with the Patriots, that's great," Podolski continued. "If not, I still have accounting job to fall back on."

"I'm just happy to be getting a chance like this."
