City urged to enforce cable agreement

By Paula J. Findlay
Staff Writer

We've waited long enough. It's time for a change.

That is the message coming from the Carbondale Cable Television Commission as it urges the City Council to require Carbondale Cablevision to comply with its franchise agreement.

The commission wants Cablevision to implement 26-channel basic service, in accordance with the franchise, and locally originated programming.

"They have proposed to do some local origination and to have 20 channels, but they have connected that with the rate increases," Charles Shipley, cable commission and SIUC radio-television professor, said. Cablevision has said it needs a $2.50 a month subscription increase to implement the changes. Recommendations from a special committee say that no rate increase will be considered until Cablevision's parent company, Telecommunications Inc., provides financial information requested by the committee. The committee is waiting for that information and is "hopeful" it will receive it before the Dec. 1 deadline.

The special committee was set up by the City Council to negotiate with TCI and in late August its recommendations were unanimously approved by the cable commission. The recommendations won't be formally submitted to the council until the requested financial information is received or until the Dec. 1 deadline — whichever comes first.

The recommendations call for 25 hours per week of locally originated programming to be in operation by Jan. 1, 1984. One half of those hours are to be original programming, and by July 1, 1984, that amount would be increased to two-thirds of the total.

Local origination is programming provided by the local community, such as news, public access programming is time given to other groups in the community, such as hospitals and schools. Shipley explained.

Cablevision has proposed a 25-hour-per-week local origination schedule to the commission. The proposed schedule includes a public after- school children's program, "interesting people and places in the area," a monthly viewpoint-discussion show, City Council meetings and a live sports call-in talk show.

Shipley, a longtime advocate of public access programming, said that Cablevision should provide much more public access.

"Companies, large and small, do voluntarily and even profitably provide local origination and public access to their viewers," Shipley said.

U.S. asks payment for plane casualties

The United States demanded compensation from the Soviet Union Monday for the 51 Americans killed in the Soviet destruction of a South Korean airliner as a Soviet government decision in May to fly flights to Moscow took hold in Europe and the United States, governments prepared to bar the Soviet airline from their airports.

Meanwhile, a third body believed to be from the wreckage of the plane that was found on Japan's northern coast, and the Kyodo news agency reported the plane did not crash for more than 12 minutes after one of its four engines was hit by a heat-seeking missile from a Soviet fighter.

The T.S. demand for compensation was presented in Washington by Assistant Secretary of State for Public Affairs Charles E. Lewis, an acting assistant secretary of state. Lewis is a second-ranking member of the Soviet Embassy staff, but Sokolov refused to accept it.

Lewis also tried to give Sokolov a note on behalf of the South Korean government demanding compensation for its citizens who were killed, but Sokolov rejected it also.

State Department spokesman Alan Romberg said the United States was "hoping the Soviets will meet their clear obligation under international law to pay compensation to the victims of both the United States and Korea." The Soviet Embassy in Ottawa also refused last week to accept the Canadian government's claim for compensation for the 10 Canadians among the 269 victims.

Foreign Secretary Allan MacEachen told the Canadian Parliament, but the demand was delivered to the Foreign Ministry in Moscow.

MacEachen said Canadian representatives would push the compensation claim in every international forum and in such international forums as the United Nations and the International Civil Aviation Organization in Montreal.

KBSI-TV goes on-air; should reach S. Illinois

By Terry Levecque
Entertainment Editor

If you haven't spun the UL-F dial of your television lately, this weekend is the time to test-broadcasting Sunday and officially opened for business Monday.

The new independent station is located at Channel 22 on the dial. The station's 1.3 million watt signal is strongest in a 300-mile radius.

KBSI-TV should reach homes from Southern Missouri and Illinois to Northeast Arkansas and Western Kentucky.

"We went into this thing very seriously, that's why we put up such a great tower," said general manager Everett Martin.

The station's programming is designed to appeal to everybody, Martin said. "Big Valley," the "Nanny and the Professor," and "Starky and Hatch" are some of the syndicated programs that will be aired regularly, along with programs like "The Pink Panther," "The Partridge Family" and "My Favorite Martian."

The station is also equipped with all age "Cable News Network," which will be aired at 1 p.m. and 9 p.m. daily.

The major owner of KBSI is a rapidly growing communication corporation Media Central Inc., which owns 10 other stations from Honolulu to Green Bay.

The station plans to broadcast from 6 a.m. to 1 a.m. although hours may be irregular until the programming schedule is set.

The first few days are all临时性, hardest, Martin said. "We're losing 106 miles per hour to get it all done.

"Everything is going quite smoothly, considering we've been working together for the first time without any old equipment," Martin said.

IBHE standards unrealistic for some students, Shaw says

By Phillip Fiorio
Staff Writer

The Illinois Board of Higher Education is trying to create statewide uniform college entrance requirements, but SIU Chancellor Linda Shaw said the requirement may not necessarily be "realistic expectations."

According to an IBHE report addressed at a meeting in Macomb last week, eight of 10 Illinois public universities, including SIU, do not specify what high school subjects need to be completed before entry into college.

The IBHE recommends that high school students who wish to attend college should have completed four years of study in each of the following areas:

- English, with emphasis in written and oral communication
- Social studies, emphasizing history and government
- MATHEMATICS, including introduction through advanced algebra, geometry, trigonometry and fundamentals of computer programming
- Sciences, which would include biology, chemistry and physics
- Study of a foreign language for two years is also encouraged

by the IBHE.

Guidelines need to be set for entrance requirements, with the administrators at the public universities in the state having the final decision, the report states.

Shaw said he sees no obstacle in the concept of establishing guidelines, but warns that the board must be realistic of realities, as well.

"Not all these districts may be able to offer over the next five years the full curriculum set forth," in the requirements, he said.

Shaw said the IBHE should be seen IBHE, Page 2
Peltier’s lawyers to appeal for new trial in murder conviction

By Karen Terry
Staff Writer

Lawyers for Leonard Peltier, the American Indian Movement leader convicted of murdering two FBI agents in 1975, will make a final attempt next Monday to win a new trial for Peltier, whose supporters claim he was framed by the FBI.

The 8th District Court of Appeals in St. Louis will hear arguments to determine whether Peltier will be granted a hearing in his motion for a new trial, according to Rick Gochal, a member of the Leonard Peltier Defense Committee.

The court agreed to hear arguments after 30 members of Congress filed a motion citing information they claimed would reveal “greater investigative abuses by the FBI than was previously known at the time of the trial,” Gochal said.

The motion argues that the “government engaged in the deliberate deception of the trial court and the trial jury through the presentation of evidence the government knew to be false.”

Peltier, who is serving two life sentences in the Marion Federal Penitentiary, has already made the same arguments to determine a new trial, according to Gochal.

“Peltier’s attorneys have FBI documents that they claim prove that much of the evidence presented in the trial was ‘lies and contradictions.’

“A lot of people feel that Leonard got a raw deal,” said Gochal.

WASHINGTON successor sworn in

WASHINGTON (AP) — Labor leader Charles Hayes was sworn in Monday to succeed Chicago Mayor Harold Washington in the U.S. House and said he would push for legislation to create jobs.

“We’ve got people out there who are having a little problem eating and sleeping,” Hayes, a 46-year-old vice president of the United Food and Commercial Workers union, said at a ceremony in House Speaker Thomas P. O’Neill Jr.’s office after he was sworn in.

Harvest may be worst in 13 years

WASHINGTON (AP) — Dry, blistering heat has cut further into this fall’s corn harvest, likely to be the smallest since 1970 and barely over half of last year’s record crop of 8.4 billion bushels, the Agriculture Department said Monday. That almost surely means another jolt in 1984 food prices.

The new estimate of 4.9 billion bushels was down 16 percent — 846 million bushels — from what was forecast just a month ago, as the August heat and drought continued to crush yields throughout major production areas of the United States.

Soviet diplomats expelled for spying

WASHINGTON (AP) — The State Department disclosed Monday that two Soviet diplomats were expelled from the United States last month as alleged spies, and charged that a U.S. diplomat expelled Monday from the Soviet Union had been mistreated.

The two Soviets were identified as Yuri Petrovich Leonov, an assistant air attaché at the embassy here, and Anatoly Yevgenyevich Skripko, another attaché at the embassy. Both were declared persona non grata “for engaging in espionage,” said Alan Romberg, a State Department spokesman.

News Roundup

Heat wave continues in California

LOS ANGELES (AP) — California cooled and Los Angeles enjoyed some another day Monday in a heat wave that scorched a million people to the beaches over the weekend showed no signs of easing this week.

While a hint of fall was beginning to be felt in much of the country, Los Angeles tied a 105-year-old temperature record Sunday, registering 100 degrees on thermometers downtown. It was also 101 in Sacramento.

Family fights parole of child killer

CHICAGO (AP) — James E. Degnan Jr. and Betty Degnan Finn have suffered in silence for nearly four decades. But Monday, as the parole board of their seven-year-old sister’s killer returned to court, they bravely told him to be there.

“We have lived with this loss and the horror all these years,” said Mrs. Finn, who was 12 when Suzanne Degnan was abducted from their North Side home, strangled and dumped in a nearby sewer.

“I’m doing this for every mother, so they can sleep at night.”

FCC extends AM radio hours

By Terry Levecz, Entertainment Editor

The FCC approved a proposal Friday that would extend broadcast hours for 1,125 AM radio stations by at least two hours.

The new policy affects 220 stations nationwide.

The new policy requires AM stations to broadcast for at least one clear radio signal in the area that would be able to be picked up by at least two hours.

For example, WGGH-AM in Marion, Ill., will go on early broadcast time for daytime AM stations and will become effective Nov. 1.

The new policy was estimated to add 24 hours to the estimated broadcast hours of 1,125 stations to be chosen from among the 2,000 AM stations.

WGGH-AM in Marion is one of those stations that will become effective Nov. 1 as a result of the new policy, according to Matt Metropolis, said the station will go on early broadcast hours.

“The FBC is not on trial here,” Benson was quoted as saying.

Evidence linking Peltier to an AR-15 semiautomatic rifle that killed the agents was instrumental in Peltier’s conviction. Bruce Ellison, one of Peltier’s attorneys, has said he has acquired, through the Freedom of Information Act, government documents that he claims discount the tie between Peltier and the murder weapon.

“We can now prove with scientific certainty that the AR-15 did not fire the shell casing found as the murder weapon,” Ellison has said.

“And we can prove the FBI knew it in late September 1975.”

Gochal added recently that Peltier’s attorneys have FBI documents that they claim prove that much of the evidence presented in the trial was “lies and contradictions.”

“For a lot of people feel that Leonard got a raw deal,” said Gochal.

careful that its actions "do not create unfair barriers for some students." Not all college-bound students need four years of math or even three, he said.

Shaw said the IBHE should distinguish between those who are planning to major in those fields requiring math and science skills and those with interests and abilities that may take them in different directions.

For example, Shaw pointed out that the University of California now requires three years of high school math, and an additional year for those students expecting to major in math and science fields.

SIU President Albert Somit agreed with the chancellor. "I'm not sure every student should be required to take four years of the courses required by the recommendation," he said. Somit: "There's always a problem with recommending an X number of years of anything for anybody."

He said the IBHE has the legal authority to set admission requirements, but is not obliged to provide funding for high schools to meet established guidelines. Both Shaw and Somit said they expect faculty to consider standards during this academic year. Standards are expected to be considered by the Undergraduate Educational Policies Committee of the Faculty Senate.

Somit said he would address the Faculty Senate about the IBHE report at 2:30 p.m. Tuesday in the Mississippi Room of the Student Center.

The report states "SIUC strongly recommends that students complete a comprehensive math and science program." It further states that high school students "should attempt to complete as many courses as possible in English, mathematics, science, etc., before entering college.

Public university admission requirements for freshmen vary by student performance by the individual's high school rank and the individual's scholastic aptitude as recorded by the American College Test (ACT) and the Scholastic Aptitude Test (SAT).

"Community groups do it all," he said.

Information from Bloomington says that the cable system gives the community "substantial financial support," and is paying 25 percent of the costs. The rest of the funding comes from the city and the public library.

In Iowa City, Iowa's Hawkeye Cablevision System, the local origination - public access budget was over $100,000 last year, Shipley said.

Shipley said Carbondale's local origination public access budget doesn't compare. "We've been in the past was zilch." he said.

"The recommendations by the special committee also call for several changes to be made in the franchise agreement, including a requirement for an annual audited financial statement from the franchisee and a requirement for the City Council to hold a public hearing prior to approval of rate changes."

A rate increase would not begin until complete 2-channel service begins, according to the recommendations and the 20-channel service would be implemented within one year from the date of agreement between the city and TCI.

Dean's hearing date set

Sept. 7

At that time Mr. Ratcliffe was officially informed of the charge against him and released on his own recognizance," Irvin said. According to Irvin, any motions that are filed will be filed at the Oct. 7 pre-trial. This is when defendants enter pleas and decide on either a bench or jury trial, he said.

Irvin said the maximum penalty for a conviction of the Class A misdemeanor of drunk driving is a $1,000 fine and up to one year in jail.

CABLE from Page 1

He has contacted five other cable systems to offer in public access programming. The systems he studied also operate in university communities, though they are not at Carbondale, or in a city like Carbondale, but they all offer much more public access, he said.

""In other university communities," he said. "In university system and public library expertise and give access to various sectors of the community," he said.

"Shipley said Bloomington, Ind. System for example, is all public access - no local origination."

"The charges stemmed from fraudulent computer sales and lease agreements authorized by Bateman and Masseny over a six-year period. Equipment worth a little more than $1 million was sold to the University for more than $2 million."

BY ANNE FLASZA

Staff Writer

The sentencing date of two former SIUC employees who pleaded guilty to trying to defraud the University of over $1 million has been continued until Sept. 27, according to Chief Judge James L. Foreman in District Court in Benton.

HARRY L. BATEMAN, former director of computing affairs, and E. Hubert Massey, former assistant director, each face up to 20 years in jail and $21,000 in fines for conspiracy, mail fraud and interstate transportation of fraudulently obtained money.

Bateman and Masseny are also two of nine people named in a $1.4 million computer fraud civil suit filed by the University in March.

According to Proud, the continuance was granted by Chief Judge James L. Foreman in District Court in Benton.

But the government of neutral Switzerland decided after air pilots could suspend their four weekly flights to the Soviet capital and Finland's state railway began adding extra passenger cars to deliver food and necessities to the Soviet Union.

Most of the pilots were out that the University of Illinois at the request of officials of the International Federation of Airline Pilots Associations.

"There's always a problem with recommending an X number of years of anything for anybody," he said.

DAILY EGYPTIAN, September 13, 1980, Page 3
Cable complexities

ATTENTS to unravel the complexities of cable TV service in Carbondale are likely to produce only more complexities — and a wealth of unanswered questions.

Some of the problems include: Getting Carbondale Cablevision to live up to its franchise agreement and provide 20-channel basic service and local origination 18 months ago? Should Cablevision be allowed a rate increase if it provides such service? Should students take a place at all? Who stands to gain the most — the cable company or its customers?

Regardless of your concept of what cable TV should be in the city, you could flip a coin on any of these questions and find folks who agree with you. But the most significant, and perhaps least considered, power is at the heart of the debate: Just how many people are willing to pay more to get improvements in basic service?

NOBODY seems to be asking that one, especially not to the subscribers themselves.

The city's cable commission is one way that Carbondale has sought constituent and expert opinion on cable TV matters. That commission is recommended that Cablevision be forced to honor its contract without a rate increase — with the understanding that subscribers could appeal to the City Council should they want to change that decision.

The City Council chose instead to negotiate — a decision which by its nature implies compromise. Compromise, in turn, implies that Cablevision will get some form of compensation in return for basic service.

But is a tradeoff — rate boosts for service boosts — what customers want? Or would they prefer that things remain the same?

IT WOULD admittedly be a costly and time-consuming process to find out the answer. Yet one might think it would be to the eventual benefit of Cablevision in particular to make some effort to please customers.

If they don't pay more service at greater cost, some subscribers won't pay for it. Cablevision may find that out the hard way — through service cancellations.

Rugby story inaccurate

First of all, I want to say how thankful I am that I read an article on the women's rugby team — a prime spot on the back page and three columns of information. But, as I read the article, I couldn't believe how inaccurate the information had been reported. I would like to correct the story and my mistakes.

First, Karen Paukin, our new coach, played for five years the club was in existence as a woman.

Second, last year we did have three coaches as the article stated. Two coached the forwards or pack, the other coached the back line.

Also, our returning veterans are strong but the only one that comes close to six feet is Britt Van Buskirk.

Fourth, for our fund raiser, we didn’t hold the dinner we sponsored last year at the home of Mr. and Mrs. Bonaire.

Finally, with luck we will have a good year and better last season. Although we lost a few more we'll get another spot and with the information will be correct.

Barbara Cavo, president William J. McGlone, Senior Women's Rugby Club.

Letters

No corn flakes? It won't stop Soviets

We feel that the Daily Egyptian and cartoonist Brad Lancaster owe the students, faculty and staff of SIU an apology for the cartoon that appeared on the editorial page of the September 6 Daily Egyptian. We found the cartoon to be demeaning not only to women students but to male students and faculty as well.

There was only one comment of yours that I liked, which was to give or sell grain to the starving people. But if you expect to sell only to the people who are not engaging in the weapons buildup then you might as well take your corn flakes out of your cabinet and throw them away because you as a taxpayer are supporting the same countries as the Soviets. I hope that this letter does not make you feel that you are being demeaning not only to the Russian government, because you and I both want the innocent people of the Soviet Union to be hurt, as well as the innocent farmers of the U.S.

By the way, I think I found that economic brain you were looking for. I believe the last time I saw him he was sending troops into El Salvador, Nicaragua and Beirut.

William J. McGlone, Senior Education.

'Svirig' strip made light of harassment

We ask that the DE exhibit its concern to the existence of a university community free from all forms of sexual harassment. In the future, we hope that the DE will be more sensitive to this issue by not printing jokes and/or cartoons that attempt to make light of a serious matter.

Mary Finley and three others Women's Services.

Keep underclassmen's cars off campus

Of course, safety is the most important aspect. If half of the 8,000 or so freshmen and sophomores on campus have cars, then an additional 4,000 cars would be added to campus. In 1981 and 1982, 455 accidents occurred on campus, out of the 17,000 cars already registered with Parking Division.

An increase in the number of cars would certainly add more congestion on the roads — and more congestion would probably mean more accidents. If just five more people decide to purchase a car this year, that is an increase, because one car with a yield sign occurs, then incurs injuries on campus.

If an extra 4,000 cars were allowed on campus, one can expect an increase of 4,000 cars on campus, based on an average of the number of accidents and cars registered on campus in the two years before. This figure probably would further increase because of additional congestion.

Some studies show that freshmen just cannot handle a lot of the freedom that they have during their first year at college. Freshmen who don’t have cars their first year, and one from home perform better academically than freshmen who do have cars and sophomore...don’t have cars, then they might keep off the streets and stay out of trouble.

There are 8,000 parking spaces. More than 600 spaces are taken by metered lots, loading zones and service vehicles. That leaves about 1,250 parking spaces for over 17,000 campus vehicles who have decals from Parking Division.

Of course, not everybody has a car on campus at the same time. But if only half of the nearly 8,000 freshmen, and sophomores at SIU-C had cars, that would push the total to 21,000 cars for only 8,250 available parking spaces.

That could prove dangerous to off-campus students and faculty who need a parking spot.

Some freshmen and sophomores who have exemptions and privileges to have a car on campus. For the most part, though, underclassmen won’t be able to have a car on campus, and it should stay that way. This year, freshmen and sophomores have been given three parking lots where they can store their cars until they need to use them. This proves that they are not buying a car in order to park there will result in a ticket if the car is parked in another lot.

Fewer cars probably means greater safety, fewer traffic problems and a way to avoid the parking problem on campus. Remember, freedom is nice, but too much freedom can bring some negative results. Keep the rule and break those students in slowly.

In the Philippines, Marcos is still U.S. champion.

Marcos has served longer than any five of his predecessors.

Marcos' only explanation so far has been that "a subservient assassin has done this acting on behalf of the communists to embarrass my government.

Marcos has repeatedly stated that growing communist rebellion led him to seek "strategic and risky tenure leadership than any five of his predecessors -- a total of 18 years. He has also denied the rumors that he is planning to resign or make way for a young successor.

The recent assassination of Benigno Aquino can be termed the most controversial event in Marcos' presidency. Aquino was a former government official and a vocal critic of Marcos' policies.

Marcos was born in 1917 and has been involved in Philippine politics since the 1950s. He was appointed to the Senate by his father, a wealthy sugar planter, and went on to become the country's most powerful figure.

Marcos is known for his strongman leadership and his authoritarian rule. He has been criticized for his corruption, human rights abuses, and his close relationship with the United States.

Marcos' government has been accused of suppressing opposition voices and using violence against political dissidents.

Marcos is a complex figure, with a controversial legacy that continues to be debated in the Philippines and around the world.
Some students may be eligible for weatherization funding

By John Stewart
Staff Writer

Income eligible students living off-campus can save up to 25 percent on their heating and cooling bills by participating in a state weatherization program.

A one-sixteenth inch crack around a door is equivalent to a four inch square hole in a wall, and that increase the cost of heating a home significantly, according to John Stewarden, Jackson County director of the Western Egyptian Economic Council.

The Illinois Weatherization Program was set up to conserve fuel and help low income households save money, and many student households meet the program’s requirements, Stewarden said.

Students who rent must have their landlord’s compliance and meet income requirements. A household of one cannot earn more than $6,000 a year, a household of two $8,000, and so on in $2,000 increments.

Eligibility is determined within 30 days, and then a state successor estimates what work should be done. Typically, the work is done two weeks after assessment. Stewarden said people should apply now to prepare for the winter heating season.

The weatherization crews install attic, caulk and replace windows, and weatherstrip around doors. Work such as installing storm windows and storm doors are the priority items, Stewarden said.

"Students should have their homes weatherized just so they can have the same as last year," Stewarden said in referring to recent CPS rate increases.

"Only 16 homes in Carbondale were weatherized last year, but I expect that number to increase this year," said Robert Shroeder of the Western Egyptian’s central office in Steeleville. He said he expects 50 homes in Jackson County to be weatherized through the program this year.

There is no charge for the weatherization work, as the program is funded by the federal government and administered through state and local agencies. The weatherization can be done to apartments, mobile homes, and houses as long as other requirements are met.

Ken Sheeley of Ellis Grove and John Krull of Sparta, Egyptian Electric Co. employees, work at weatherizing a house.

Video cassette players in homes throughout the country are playing rented tapes of film fare such as "Inside Seka" and "Debbie Does Dallas."

They are being played and rented in Carbondale for fees that average about $10 a day for a videocassette player and $4 a day for cassettes.

Roland Yost, manager of Home Video Center in Carbondale, said, "A man will pick up one for his kids and one for him and the wife later."

Yost said that of 1,000 feature film titles available, his store rents about 130 that are X-rated.

"It's just your standard X-rated," said Yost, "nothing real kinky." Yost said the adult films constitute about 20 to 25 percent of his business.

Bill Manis, assistant manager of Curtis Mathis Home Entertainment Centers, said that of 1,200 feature film titles he has available, 142 are X-rated.

"We rent out films like "The Last Tango in Paris," which would now rate an R and harder stuff," Manis said.

Dwayne Cavitt, owner and manager of Triette Video which specializes in adult video fare, said few people who come to his store are under 30. "We don't get a lot of students in here," he said.

Cavitt said the market for adult video has hit a temporary plateau in Carbondale, although he added, "I don't think video has hit its pinnacle yet. The penetration of machines into the market isn't great enough yet."

Motorcycle class to begin Tuesday

Free motorcycle riding courses are being offered by the Safety Center.

One class will meet Tuesday through Sept. 24 from 4 to 8 p.m. on Tuesdays and Thursdays and from 9 a.m. to 1 p.m. on Saturdays. Another class will meet from 5:30 to 8:30 p.m. Sept. 23 and 24 and from 9 a.m. to noon and 1 to 5 p.m. Sept. 25.

“Twang Bar King” showcases melting pot of sounds and ideas

By Steve Pavlich
Student Writer

Adrian Belew, until recently, was one of the world’s most sought-after studio guitarists. He demonstrated his unique, extraordinary talent playing with the likes of Frank Zappa, David Bowie, King Crimson and King Crimson. He demonstrates on the release of “Twang Bar King,” his second solo LP, that he is speeding rapidly forward, leaving his session days in the wake.

“Twang Bar King” is a melting pot of musical ideas. The songs are as varied as Belew’s diversity. The last cut on side one, “The Rail Song,” is a distinctive Motown sound again demonstrates Belew’s versatility and willingness to experiment with different styles. It is this versatility that keeps the album interesting.

The fierce rock and roll of “I’m Down,” which refers to the inhumane globalization of the whale, the majestic giants of the sea that are facing probable extinction in the near future. Of the many styles “Twang Bar King” incorporates, there is one common thread—Adrian Belew’s unquestionable talent as a creative guitarist, singer and songwriter. From rock and roll to jazz to Motown, Belew delivers finely crafted music.

Adrian Belew is working on making his name as well known as those masters of musical art whom he worked with in past ventures, like Frank Zappa or David Bowie.

Southern Illinois Airport will have a new $1.2 million air traffic control tower operational by July 14, 1984, according to Eugene J. Hall, air traffic manager.

The six-story facility will have new radio and electronic equipment and will replace the present tower which has been operating since 1955, Hall said.

A $702,000 contract for the construction of the building is being done by Interstate Landscaping Co. of Harrisburg, Hall said. The new electronic equipment will cost approximately $400,000 to $500,000, according to Jack Lewellen, Federal Aviation Administration engineer who is supervising construction and installation of the equipment.

The FAA is funding the project, according to Gary Schaefer airport manager.

According to Hall, visibility is limited at the present tower and the new tower will increase the air traffic controllers’ vision of flight patterns.

With the increase in size of the tower, Southern Illinois Airport could have the capacity to be promoted to an approach control airport in future years, Hall said. It is now classified as a visual flight rules, or VFR, airport.
Photographers to give lectures, discuss their work
By Sara Lyter
Staff Writer

A series of public lectures featuring documentary photographers and their works will be presented and sponsored by the College of Communication and Fine Arts and the Cinema and Photography Department.

The series, titled "Documentary Photography: An Element of Contemporary History," is being made possible by a grant from the National Endowment for the Arts. According to Duane Powell, assistant professor in the Cinema and Photography Department, the grant awarded is a Visual Artists Forum Grant.

"This is a very prestigious award. Very few are given out—only 15 were gathered in Manhattan for the first time," said Powell. He said Research and Development Administration has also helped to make the series possible. Additional grants are pending with the Illinois Arts Council and the Illinois Humanities Council.

Powell said that one of the purposes of the series is to allow people to see that documentary photography can be important to society. "It has an effect on society and the viewing of history. It has a historical vantage point as well as a social vantage point."

The format for the series will consist of a presentation of the artist's work, either on slide or in the original, in the evening with an informal conversation with the photographer the following day. While the lecture is open to the public, the subsequent discussion is intended for students. However, others interested in attending may contact Duane Powell in the Cinema and Photography Department.

The work of Jill Freedman will be featured at 7:30 p.m. Tuesday in Davis Auditorium, Wham 106.

Freedman has published several books, including "Circus Days," "Firehouse," and "Street Cops." For six to eight months, Freedman traveled with the Clyde Beatty Cole Brothers Circus, taking photographs of the life of a circus performer.

The material for her book "Firehouse" was gathered in Manhattan where she went to fires with the firemen. The result was a collection of strong graphic photos showing what it is like to be a fireman from a fireman's point of view.

Powell described Freedman's style as being much like that of Eugene Smith, Dorothea Lange and Cartier-Bresson.

"She goes out like a writer, but instead of writing words she takes pictures. It becomes a strong, graphic statement," said Powell.

Get down to business faster.

With the BA-35.

If there’s one thing business students have always needed, this is it: an affordable, business-oriented calculator.

The Texas Instruments BA-35, the Student Business Analyst. Its built-in business formulas let you perform complicated finance, accounting and statistical functions — the ones that usually require a lot of time and a stack of reference books, like present and future value calculators, amortizations and balloon payments. The BA-35 means you spend less time calculating, and more time learning. One keystroke takes the place of many.

The calculator is just part of the package. You also get a book that follows most business courses: the Business Analyst Guidebook. Business professors helped as write it, to help you get the most out of calculator and classroom.

Fielders 1-2 on trip

By Steve Keslos
Student Writer

In successive games, the SIU-C women's cross-country team looked as different as night and day on its three-game road trip last weekend.

The Salukis returned from the trip with a 1-2 record, but two overall. They opened on the right foot by blanking Purdue 2-0 Friday, before falling to Ball State 6-0 Saturday and national powerhouse Iowa 7-1 Sunday.

SIU-C Coach Julie Illner, who made wholesale changes in the starting lineups for the final game against Iowa, was baffled by her team's performance against Ball State.

"Saturday was just horrible and nothing else could describe it," admitted Illner, whose team had only one goal in the loss. "I couldn't do anything right and nothing seemed to work. They were not as good a team as the score indicated."

The Salukis, who allowed only 20 goals in 25 games last season for a stingy 0.8 defensive average, have already let in nine goals in four games this year.

The six goals were the second highest total allowed in a single game by an Illini-led team and the game was the Salukis' worst defeat since being beaten by St. Louis 7-1 in 1983.

Illner immediately made changes by starting four players at new positions, including three in the midfield, against Iowa.

Senior Mary Beth Mehan and freshman Mindy Thorne switched places in the lineup, with Mehan being shifted to left halfback and Thorne to left link. Senior Terry Horstmann, previously a right link, replaced sophomore Kelly Orley in the halfback spot, and freshman Jennifer Bartley, who had missed the season due to injury, was inserted at right wing.

"I was pleased with the progress made from Saturday to Sunday," said Illner. "Right now I am going to stick with this lineup. The midfield and center area will be strengthened tremendously with the return of senior forward Sharon Leidy and senior right wing Jennifer Bartley, who is now director of Intercollegiate Athletics for Men.

"Murray State cut the number of athletic scholarships to 12," Cornell said. "And that included just tuition, books and a room, but no meals. I just couldn't maintain the type of program I wanted to run.

"This university is run as a first-class organization, unlike Murray State," Cornell said. "Murray State is at rock bottom now and the team is falling apart.

"I realize the significance of starting an outstanding good athletic program."

"The administration and the student body desire to see that what a good athletic program does for a university," he said. "They desire to see the athletic program."

"Students go to school for many reasons besides athletics. This should be a super year for athletics at SIU-C," Cornell holds the SIU-C school record in the mile with a time of 4:04.07. That was in 1961 when Lew Hartzog was still the coach. Then, last season, Cornell took over the coaching job from Hartzog, who is now director of Intercollegiate Athletics for Men.

"Murray State has the number of athletic scholarships to 12," Cornell said. "And that included just tuition, books and a room, but no meals. I just couldn't maintain the type of program I wanted to run.

Salukis nab conference honors

Saluki spiker Chris Boyd was named Monday as the first Gateway Collegiate Athletic Conference Player of the Week. The GCCA Player of the Week will be a regular award, chosen among all women's fall sports.

Boyd, a 5-foot-11 middle blocker, inaugurated the honor on the basis of her first five matches this season, in which she came up with 56 kills, three block solos, 18 block assists, 29 digs and a .337 attack percentage.

In five matches, Boyd was charged with only 10 reception errors, seven service errors and nine ball handing errors.

Probably the biggest contributor to her selection was the Salukis' match against Evansville Thursday. Boyd recorded 11 kills with no errors in 13 attempts, for a whopping .846 attack percentage.

Boyd's 11 kills tied her for the team lead in kills with 18 kills recorded.

'They keep us working hard during practice,' Haywood said, especially on the jumping drills and blocking sleds.

Because of the drills, Foster said that when there are players on the ground in their way, the trio's second-insestinct on the field is to jump over them.

The ability to get off the line at the snap of the ball quickly is another area that Taubert helps them with, Norman said, not to mention that he makes them mentally strong.

They have to be mentally strong, because their football careers could end on any one play throughout the game, and Foster realizes it.

"My season can be over at any second," Foster said. "That thought makes me work harder. If I can do the best I can do all the time,"

Terry Taylor is the second consecutive Saluki to win the MVC defensive award (Donnell Daniel won it last week) and Coach Ray Dempsey said he was pleased.

"He deserved it," Dempsey said. "He had a good game."

Even though the season is young, Dempsey said Taylor probably won't be the last Saluki to win the honor.

"That's two of our players in two weeks," Dempsey said. "The way our defense plays, we could get one every week."

Babcock named to U.S. team

By Sherry Chisenhall
Sports Editor

Former Saluki gymnast Brian Babcock has been named to the U.S. World Games team, finishing sixth in the United States Gymnastics Federation World Championship trials in Eugene, Ore., over the weekend.

Babcock will compete for the U.S. World Games team Oct. 23 to 28 in Budapest, Hungary.

Babcock chalked up 17.70s points of a possible 60 Saturday in optional to top the field of 15 competitors. He finished the meet with a 116.25 mark to clinch sixth on the eight-man U.S. team.

Before the meet, Babcock set his sights on a top-six finish, since the seventh and eighth slots might not travel with the team to Hungary. He was ranked sixth going into the meet, and said he was satisfied holding his position.

"What I really wanted to do was keep the place I had," he said. "I made from the cold I got. I feel really good. I was pleased with my performance and felt my scores were justifiable."

"It was probably one of my best months considering the pressure at the meet. I'm pretty excited about going to Hungary, and I think I can do good there and deal with the heat."

Babcock nailed a 9.56 in compulsory high bar and went 9.80 on compulsory and optional pommel horse, optional rings and optional high bar, one of the best performances, according to Bill Meade has seen from Babcock.

"This is probably the best I've seen under the most pressure that he's been in since the five years I've known him," Meade said. "This is also the first time I've had a gymnast get 9.5s and 9.8s in such a meet."

Meade said he was pleased with Babcock's sixth-place finish.

"He did what I felt was the toughest things," the coach said. "We wanted to do well and have fun, and the meet was that fun at that respect. The guys at that meet were the best. One slip and you go down quick."

The field at the trial was originally made up of 24 gymnasts who were finalists at Regionals. For the trial, two scratched before the meet because of injuries and one scratched because of illness.

Thirty percent of the scores from each event were used to compute the final standings, which Meade said might have kept Babcock from finishing higher.

Selection to the World Games team and Babcock to the trial is a spot on the program for a sport on the Olympic team, according to Meade. He said the world's best meets are second only in prominence to the Olympics.

Meade said the World Games meet is also important because it is a re-ranking meet where the world's top gymnasts can push each other to be chosen for the Olympic team.

"Every interception they get, it's a reason to do better,," Babcock said. "It's a reason to do better, too.""The heat was a definite problem for the meet in Hungary," Babcock said. "I really wanted to do so good there and deal with the weather."

"We'll have to go in and do the best we can. If nail every routine, we should finish at least first and make a claim on the world meet we're we've had.

"The Soviet Union and China will also be sending their top gymnasts. It's a preview of the Olympics. We're a little stronger than last year. The Soviets we've ever had.

Babcock said he has no expectations for the meet in Hungary.

"We've got to do well in Hungary and do well enough in the Olympics."

"It's probably the best team we've ever had."

The SIU-C's women's rugby team opened its fall season by dumping Lakehead 14-0 Saturday at a hot and windy Kopp Park in Chicago.

The match was in SIU-C's hands from the first minute to the final whistle. Tight team work and aggressive support helped the ruggers take control. Shippin by tacklers, Barb Cavoto scored the Salukis' first try.

Rutger Erickson added two points by making good on a difficult field goal attempt at the break.

In the second half, Shannon Owens scored the third try, which was good.

According to Erickson, the scrum was strong, controlling possession of the ball in both set and loose play. The ruggers pushed their way downfield and came close to scoring several times but couldn't close with a try and drop five meters from the goal line.

Numerous penalties by Lakehead led to opportunities for the ruggers to run the ball upfield and score.

An especially bright spot was at the try by both backs breaking through and Lakehead backs and scrumies. according to Erickson, the ruggers scored two tries against Lakehead.

SIU-C dropped its second game of the year to an experienced Chicago club.

The team will play host to Iowa and Illinois Saturday at 1:30 p.m. in the pit behind Abe Martin field.

Defense proves itself

By Jim Lexa
Staff Writer

Saluki football Coach Roy Dempsey may work with the offense during practice, but he sure appreciates his defense.

"Our defense is outstanding," Dempsey said. "They're really strong."

That statement is in contrast to the defense that was on the field last Saturday, as Ken Foster said he was hearing from the media people before the weekend started.

"In the beginning of the year, a lot of people, especially our seniors, were saying that our defensive line was going to be weak," said the 6-0; 225-pound Foster.

Considering the Salukis had only eight participating players at one point of the season, it was considered a strong point. Last year, 5-foot-10, 113-pound Foster was the only freshman to start.

One of the reasons the line might have been considered weak is because of injuries last year.

"Last year I missed a couple of games because of injuries to my ankle and knee," Foster said. "This year we're healthy.

Cornerback Donnell Daniel said he was very fortunate to make his job easier because they put so much pressure on the quarterback that he only has to guard his man for three to four seconds.

The secondary has intercepted six passes in two games. Last year, the Salukis intercepted 20 passes. At their peak, they could finish with 35 interceptions.

"That makes us feel better about running the pass," said Foster, who has registered two quarterback sacks this year. "Even it's interception they get, it's like one for us (the line)."

Norman, who is second on the team with 18 tackles and tied for the team lead in quarterback sacks with Hawley with four, was in on what probably turned out to be the biggest touchdown of the game around SIU-C's favor against Eastern Illinois Saturday.

With more than 12 minutes left to play in the third quarter, Normam and defensive end Mike Brasica sacked Eastern quarterback John Rafferty for an 11-yard loss. That put the football at Eastern's four-yard line for the upcoming punt on fourth-and-10.

Ralph Van "vike, though, rushed in to block the punt. Branches fell on the ball in the endzone for the game-ending touchdown.

"That tackle and sack, Norman said Rafferty was expecting to throw the screen, but Foster had the cover played.

"That play set the block up," Norman said. "The key was to pin him back and not give the punter much room to work with.

Hawley said, "The Eastern game was one of the hardest games on the schedule. We knew we had to get past them to be all right for the rest of the season."

Women ruggers thump Lakeshore in opener

The SIU-C's women's rugby team opened its fall season by dumping Lakeshore 10-0 Saturday at a hot and windy Kopp Park in Chicago.

The match was in SIU-C's hands from the first minute to the final whistle. Tight team work and aggressive support helped the ruggers take control. Shippin by tacklers, Barb Cavoto scored the Salukis' first try.

Rutger Erickson added two points by making good on a difficult field goal attempt at the break.

In the second half, Shannon Owens scored the third try, which was good.

According to Erickson, the scrum was strong, controlling possession of the ball in both set and loose play. The ruggers pushed their way downfield and came close to scoring several times but couldn't close with a try and drop five meters from the goal line.

Numerous penalties by Lakeshore led to opportunities for the ruggers to run the ball upfield and score.

An especially bright spot was at the try by both backs breaking through and Lakeshore backs and scrumies, according to Erickson, the ruggers scored two tries against Lakeshore.

SIU-C dropped its second game of the year to an experienced Chicago club.

The team will play host to Iowa and Illinois Saturday at 1:30 p.m. in the pit behind Abe Martin field.

Runners win opener

By David Wilhelm
Staff Writer

The men's cross country team is under way and once again Coach Bill Correll and his harriers are keeping their winning reputation intact.

They defeated Kansas 31-24 Saturday in their first meet on Western Illinois' home turf.

Junior Chris Young topped the field, finishing first with a time of 24:56. Finishing third was junior Eddie Wedderburn with a 25:22. Wedderburn was followed closely by fourth place finisher Mike Keene, a senior. Keene recorded a time of 25:37. Keene leading runner was second-place finisher Brent Steiner with a time of 25:50.9.

Correll said his team performed well in its first meet despite the 80-degree weather.

"The heat was a definite factor," he said. "But we could have bunched more men together. Some of our back men ran one mile slower than last week's time trials. But I still believe if we get two or three meets under our belt I don't want them to speak yet.

"Everybody was anxious for the big race, and I don't want to do anything that I hope they always have that."

Already, the fast and recent Second Cousin race has produced expected improvement.

"The course record at Midland Hills (for the 4-mile) is 15:45," said Chris Young, about that distance. "This year's a challenge for them with its twists and turns."

The ruggers travel to Lexington, Ky., to participate in the Kentucky Invitational, against a 16-team field, including East Tennessee State, but see HARRIERS, Page 14
