Carbondale Council to sue Marion

Council claims Marion misused governmental financing funds

By Lisa Miller  
Staff Writer

The Carbondale City Council is joining forces with three other plaintiffs to sue the city of Marion for misuse of governmental financing programs to fund the new Marion mall project.

The council called a special meeting Monday in the city council chambers to announce its plans for litigation.

The council claimed Marion is using extended tax increment financing, or TIF, to lure businesses from Carbondale.

The other plaintiffs, Castel Properties, Carle Loan Corp., and a private citizen, Ron Enery, filed the lawsuit in January in the Williamson County Circuit Court. Jim Volk, an attorney representing the city, said.

Carbondale Mayor Neil Dillard said in a written release it was an attempt to "Carbondale poised in the litigation because we, as a community, are just as threatened as the other plaintiffs in the lawsuit who will be financially harmed by the unauthorized use of funds from the Marion City Council."

The Carbondale council said it was specifically concerned with the Sears department store, currently in University Mall, moving to the new Marion site, the Illinois Center.

Steve Hoffner, city manager, said the managers of Sears on two occasions to persuade them to stay at the University Mall.

Hoffner said the managers were still "weighing their alternatives," and no decision had been made yet.

Dillard said the city of Marion and its developer partners will "seriously step up to the business away from other communities by offering incentives and assistance," but this cost only "scarcely costly but also a gross interference in the free market and the community.

Dillard said he was calling on Gov. James R. Thompson, the Department of Commerce and state legislators to "begin action to see the practices that the Marion City Council followed to lure the Sears Department Store from Carbondale to Marion."

Councilman Keith Tusken said he wrote a letter to the mayor of other towns in Southern Illinois asking them to support the lawsuit.

Councilman Richard Morris said "community should be working together instead of one trying to steal business from the other."

Marion Mayor Robert Butler was unavailable for comment.

ISA calls for tuition freeze on increases

By Jeanne Bickler  
Staff Writer

The Illinois Student Association will kick off its "Open the Doors to Higher Education" campaign today with a press conference in Chicago.

The campaign is designed to combat tuition hikes, declining state support and the shift in financial aid from grants to loans. Brian Monahan, ISA field director, said.

The ISA designed this grassroots campaign to increase student access to higher education in the midst of a financial setback, Monahan said.

"The ISA will be looking for tuition freezes for the fiscal year 1991, as a start," Monahan said.

He said tuition needs to be based on student's ability to pay, rather than university ability to spend.

Monahan said student support for a state wide tax increase was supposed to help higher education.

The tax, to counter these gains, on July 26, the governor vetoed nearly $7.5 millions in appropriations to minority student access and retention programs.

The campaign seeks to open the doors to higher education by obtaining an override of the governor's veto, Monahan said.

The focus of the campaign will be local coalitions, Monahan said, and the issue is a "hot button" on campuses such as Illinois, in Carbondale.

A number of individuals attending the meeting expressed concern that the project was being rushed, and that people didn't have time to research and make an educated decision on the issue.

"We wanted to give people more time to look at the information we provided," Monahan said.

Citizens receive more time to comment on EPA cleanup

By Phil Pearson  
Staff Writer

The period for public comment concerning the cleanup of toxic materials on the Crab Orchard National Wildlife Refuge has been extended from the October time to consider actions proposed by the Environmental Protection Agency, Mary Logan, remedial project director, said.

Logan said the decision to extend the public comment period stemmed from citizen's asking for additional time to investigate the EPA's proposed cleanup methods at a public meeting held Aug. 30 at John A. Logan College in Carterville.

A number of individuals attending the meeting expressed concern that the project was being rushed, and that people didn't have time to research and make an educated decision on the issue.

"We wanted to give people more time to look at the information we provided," Monahan said.

Industry shatters Illinois bottle legislation

A strong Illinois bottle industry could keep the General Assembly from passing bill

By Jackie Splinner  
Staff Writer

A strong Illinois bottle industry could prevent the General Assembly from ever passing bottle deposit legislation, a representative of the Citizens for a Better Environment said.

The conventional bottle deposit bill which has been adopted by nine states places a 10- to 15-cent deposit on beverage containers and then requires the retailer of the product to collect and store the containers.

The last attempt for a bottle bill was made by Sen. Jerry Joyce, D-Kankakee, last year. He bill would have raised over $109 millions in revenue by placing a 10-cent deposit on all beverage containers.

"If one of the most powerful senators in Illinois can't get one through, then there isn't much hope," Andrew Konnai, research assistant for Citizens for a Better Environment, said.

Tom Reid, Illinois Manufacturers Association vice president for education and environment program, said companies are against bottle legislation because it could mean a loss in investments for them.

"(It a bottle bill) would hurt companies which had invested in machinery that would not be able to make disposable bottles," Reid said.

Reid said the association would favor a national tax on certain beverage containers.

All means would then be equally taxing products and feeling the effects of the legislation with revenue going toward encouraging recycling, he explained.

Patrick Welch, D-LaSalle-Peoria, introduced a bill last session that would place a 1-cent tax on plastic items that were not being recycled.

The revenue from the tax would be placed in a fund to develop plastic recycling in Illinois.

The bill was amended on the
East Germans flee country after Hungary opens door

PASAU, West Germany (UPI) — Thousands of exhausted East Germans fleeing refugee camps, many with children, have flooded into the West Monday after Hungary opened the door to what could be the largest East German exodus since troops began erecting the Berlin Wall 25 years ago.

Everywhere the same words could be heard: "We could not stand it anymore." The exodus started at 12:01 a.m. Monday after Hungary suspended an agreement with the Warsaw Pact ally East Germany and allowed East Germans to leave without warning, especially the Hungarian refugee camps, to cross Austria without exit visas.

Soviet politician seeks aid for Gorbachev

NEW YORK (UPI) — Maverick Soviet politician Boris Yeltsin, despite his continued criticisms of Mikhail Gorbachev, called on the United States to help him oust the Soviet leaders.

Yeltsin, who has created a stir during his two days in New York, met reporters Sunday in a Manhattan apartment following a helicopter tour of the city and a visit to Central Park, where he shook hands with smiling New Yorkers. Before answering questions, Yeltsin, who was a red Soviet flag pin in the lapel of his suit jacket, said he was impressed with the capital of the capitalist world.

Proposal to start Palestinian-Israeli talks

JERUSALEM (UPI) — Vice premier Shimon Peres Monday floated the idea of using the Israeli peace proposal and a 10-point plan by Egypt as the basis for opening talks on the Palestinian-Israeli conflict. But Prime Minister Yitzhak Shamir, leader of the right-wing Likud party and head of the Labor-Likud government coalition, told Israeli radio that Israel stood by only its peace proposal. Shamir and foreign minister Moshe Arens both have said the Egyptian proposals never got beyond the paper stage to the Israeli government and therefore, the only proposal on the table is the Israeli initiative unveiled this spring.

Solidarity labor minister favors wage freeze

WARSAW, Poland (UPI) — Solidarity labor minister-designate Jack Kuron, who got his political training alongside striking workers and before police batons, said he favors a wage hike moratorium instead of a strike moratorium to try to control inflation. Khan, often the target of hard-line communist districts in the past, also told a parliamentary hearing Sunday his first action in the office will be to call the labor ministry workers if they can keep their jobs — except deputy ministers who hold political positions. Kuron, who spent nine years in prison for human rights activities, said his prime goal was to control inflation.

Investigation: No detonator on USS Iowa

WASHINGTON (UPI) — A review of Navy documents in the USS Iowa investigation showed no detonator existed, and the report raises questions about the official conclusion that a gunman's state probably sparked a huge explosion aboard the ship to kill himself. At the same time, the documents provide grisly details of the devastation left by the fireballs in the battleship's No. 2 gun turret April 19, a blast that instantly killed 47 sailors. The Navy testified in a Senate subcommittee investigation that investigators had ruled out accidental detonation as the cause of the explosion.

Poll puts Koch closer in mayoral primary

- NEW YORK (UPI) — The same poll that gave David Dinkins a 7-point lead against Mayor Ed Koch this day ago cut that lead to 4 points Monday as both leaders worked hard in the final hours of the city's democratic mayoral primary campaign. The Daily News-WABC-TV poll of 294 likely democratic voters taken Friday and Saturday nights gave Dinkins, the Manhattan borough president, 49 percent and Koch, the three-term incumbent 45 percent. The poll, conducted by Chilton Research Services, Brooklyn, N.Y., had a margin of error of 6 percent, making the race a statistical dead heat.

City police officers to receive training in force, field tactics

By Douglas Powell
Staff Writer

Carbondale Police officers will take part in "Use of Force and Field Tactics" training the first week of October, Police Chief Edward Hogan said.

Hogan said the course is necessary because "it has been several years since the department has had outside training and I want to keep my officers as current as possible."

University Security Director Bob Harris said the University Police undergo tactical training twice a year for a two-week period.

"We also send our officers to other places for more extensive training, including FBI school in Quantico, Va.,” Harris said. "That is part of our shift commanders are graduates of the FBI school."

"Training depends on what the sworn personnel need. Sometimes we feel they need more campus training or community relations or even report writing," Harris said.

The training of Carbondale officers will be provided by the International Association of Chiefs of Police. Hogan sits on the executive committee of the group.

The trainer will be retired Staff Sgt. Ron McCarthy of the Los Angeles Police Department.

"McCarthy is considered an expert in his field," Hogan said.

According to the course syllabus, the hands-on workshops instruct officers in proven field tactics and techniques that will save officers' lives and will guard against developing a paranoia in the officers.

The course will teach on gun take-aways, gun retention, vehicle stops and cutting and searching techniques, according to the syllabus.

Sworn personnel also will receive classroom instruction on recent case law regarding deadly force and the impact of litigation on the officer and the department.

The course will involve 26 hours of instruction over a three-day period.

Carbondale City Council approved the training at its Aug. 29 meeting.

WSIU pockets equipment grants

University broadcast stations WSIU-TV and WSIU-FM received two separate grants, according to a news release by Rep. Glenn Pondel, D-III. Pondel had joined Sen. Paul Simon, D-Ill., and Sen. Alan J. Dixon, D-Ill., in announcing the award.

The Broadcasting Service at SIU-C will receive $166,617 to replace obsolete studio and field cameras and field video recorders at WSIU-TV.

WSIU-FM will receive $43,912 to replace obsolete audio and production equipment.

"We're obviously delighted at being successful at getting the grants for the new equipment," executive director of the broadcast service Lee D. O'Brien said.

The grants are from the National Telecommunications and Information Administration of the U.S. Department of Commerce.

A total of 137 grants totaling $27.2 million will be awarded this year to extend public telecommunications to all areas of the country and to enhance essential public broadcasting services.

"We will be able to improve our overall signal quality on both television and radio," O'Brien said.

He added that the equipment also is an improvement in the quality of equipment which the professionals and students involved in the operation have work.

"It means a very great deal to our continued efforts at providing the southern Illinois area with quality programming," O'Brien said.

Postcard wrote to the Department of Commerce on behalf of the WSIU-TV and WSIU-FM applications, as did Simon and Dixon.

"I know firsthand the quality of work produced by the professionals and students at WSIU and in the Broadcasting Service," Postcard said.

He added that the combination of service in the areas of news, public service and entertainment makes the Broadcasting Service a worthy recipient of the grant.

Simon said, "WSIU is an important voice for southern Illinois, and these grants will help promote the University's outreach into our communities."

Opinion & Commentary

SIU-C's drug policy serves adequately

As IT stands now, SIU-C's policy seems to be logical and helpful to the student. The range of the Student Code is wide, from a disciplinary reprimand to an indefinite suspension from the University. The different degrees of disciplinary actions are there for a reason. If a student is identified as having a drug problem, the student is referred to the Wellness Center and the Counseling Center. This is for the student's welfare, not to punish the student. But, as always, there is another side to the story. Some believe that an indefinite suspension of a student who is repeatedly connected with drugs and the abuse of drugs makes sense because of the severity of the problems drugs can cause at a campus and the consequences drugs can have on a university community.

Some students who abuse and sell drugs should be suspended from the University in order to protect others against drug abuse. Others should be pointed in a different direction through counseling before they lose sight of their mission at the University and become candidates for suspension from the University.

Honor society still sought

Usually when a request is denied as many as five times, the idea is abandoned and left for dead.

It was a Phi Beta Kappa Association at: SIU-C doesn't apply that theory to its bid to gain a national honor society chapter of Phi Beta Kappa.

The association, consisting of local Phi Beta Kappas, has applied to the national organization, in the fall of 1991. The efforts of the association are commendable for the simple reason that through their work and diligence the University could get additional recognition and respect.

And regardless of the outcome, the University can learn from these associations.

Improvement at the University is never gained by a title or an organization, though respect is. It is through examination and positive change that improvement is found and fostered.

Letters

Raising entry age a good idea for Carbondale

I would like to congratulate the Carbondale Police Commission for finally recognizing the root of the underaged drinking problem. I now hope that they do not succumb to pressure to put upon them by the same drinking establishments that underaged people can walk into a bar without greeting and buying alcohol, to allow underaged people in bars and think they do not have easy access to alcohol.

Many times underaged people feel pressured to buy their underaged friends drinks. Other than underaged people can walk up to a bar and be served without even being checked.

There are even incentives (tips) for bar employees to serve underaged drinks. And even if they do, the people serving the drinks are as young as the underaged patrons.

It is true that this will make many people out of the bars and these businesses will suffer. Perhaps though this will encourage the bars to aim themselves more towards pleasing the people who belong in the bars rather than trying to attract underaged patrons.

Also, this will be an ideal opportunity for local business to be more restrained—electricity establishments that offer entertainment such as music, dancing, or drinking. The city of Chicago never shut down who's 18 and under (were prohibited from bars).

I realize this is not the solution to the underaged drinking problem. But in the long run, it really cuts off the fruit—Douglas Co. or Steinbock, senior in public relations.

Viewpoint

City inconsistent on anti-alcohol stand

Carbondale Mayor Neil Dillard has issued a proclamation. Whether we like it or not, the 1989 Saluk football season has been named "Saluki Spirit Days," as printed in the September-October issue of the Carbondale Community News, a bi-monthly community newsletter.

This bold move is designed to "reckindle and expand the fan support for the football team by introducing such events as the "Hall of Fame and Stadium Select Day" on Sept. 9. This was a wash out attempt.

In his proclamation, Dillard endorses the "Great Saluki Tailgate," an event which involves drinking and partying in the parking lot across from McAndrew Stadium. This is the month near the "Great Saluki Tailgate" has been celebrated.

The proclamation states Dillard is urging citizens to support the Saluki football team and Saluki athletics by attending games and watching events on campus. As far as associated events go, the main one is tailgating. Urging someone to attend the games makes sense. This is a way to show support for a team which needs support to justify it's existence.

Urging someone to attend tailgating makes sense too. The proclamation noted the "Halloween Fair Days" now endorses tailgating. There's a hit and miss situation in here.

It's okay to drink on school grounds in the name of school spirit, but not to celebrate a holiday. I am not saying the Halloween celebration is a good idea; actually I'm glad to see it gone. But recreational drinking is more serious and needs to be supported.

Also, Mayor Dillard is mistaken if he thinks students who attend tailgates stop drinking when the tailgate is over and go into the game. Most leave, this means students get in their cars with half-empty kegs in the back, and drive somewhere else to finish it.

The proclamation states that if Dillard thinks "Saluki Spirit Days" by displaying signs and marquees to the public this is a nice idea, but in reality, it's a bad one.

This is a political statement about the management inside. Most businesses would be reluctant to stem the growth of one business in favor of another other things, for example, job creation.

"Saluki Spirit Days" may be a nice idea, but in reality, it's a bad one since the city doesn't have been well thought out.

If we're trying to get away from the traffic, we've failed. We've only made it worse. It's a nice idea, but in reality, it's a bad one.
**Police Blotter**

Carbondale Police reportedly arrested two females after a confrontation at Frank's Bar and Grill, 204 W. College St. shortly after midnight Saturday.

Ross McKnight, 18, and Ashley Chavez, 19, were arrested on the north side of McAndrew Stadium.

work. A bodyguard identified as Oswalo Rodriguez also was shot and was wounded, officials said.

"The bullet hit the thorax in the abdomen, a wound in the abdomen and two wounds in the arms and legs," Carlos Policardo, director of the General Hospital. He said the police officer died before he arrived at the hospital.

Justice Minister Monica De Gerlstein, who with her family has been threatened by cocaine cartels, was on Monday in Panama with her husband Virgilio Barco after returning from a two-week stay in Washington, where she discussed details of U.S. assistance in the drug war and a request for a program to protect Colombian judges.

De Gerlstein did not make a public statement after her meeting with Barco.

**COMMENT, from Page 1**

headed out at the meeting," Logan said.

The public comments period con-
cerning the four sites contaminated with Polychlorinated Biphenyls (PCBs) will begin Oct. 10. The period will end Oct. 16, Logan said.

Logan said the period for public comment on the three sites contaminated with lead and cyanide - has been extended one week, ending Sept. 23.

The seven contaminated areas under consideration are formerly industrial sites.

Logan said a public meeting concerning the contamination of PCB-laden earth will be held Oct. 3 and a meeting concerning sites contaminated with metals will be held Sept. 18.

She said there were technical data, details of remediation operation and other aspects of the proposal will be made at the two meetings.

Locales and times for the meet-
ings are pending Logansaid.

Rep. Glenn Posbard, (D-Carbondale), said he asked the EPA to extend the public comment period after he saw the public concern Aug. 30. Logansaid.

"The public comment period was much too short for people to digest the information on the issues," Logan said.

The refuge manager, however, said he doesn't read the newspapers or want to get work removing the contaminants.

"I want to get the contaminants off the refuge and incinerate them at the proper facility," Logan said. "It's the right thing to do."

**RECYCLE, from Page 1**

Senate floor to exempt Chicago, which Welch said killed the bill.

Welch said passing any environ-
mental protection or the incineration of PCB-laden earth will be held Oct. 3 and a meeting concerning sites contaminated with metals will be held Sept. 18.

She said there were technical data, details of remediation operation and other aspects of the proposal will be provided at the two meetings.

Locales and times for the meet-
ings are pending Logan said.

Rep. Glenn Posbard, (D-Carbondale), said he asked the EPA to extend the public comment period after he saw the public concern Aug. 30. Logan said.

"The public comment period was much too short for people to digest the information on the issues," Logan said.

"I want to get the contaminants off the refuge and incinerate them at the proper facility," Logan said. "It's the right thing to do."

**OPEN, from Page 1**

voter registration drives to get people listening.

Local coalitions include campus groups, Troy Hale, Graduate and Professional Student Council president, said. Examples of these might be the Black Affairs Council and the Inter-Greek Council, Hale added.

The campaign also will appeal to state organizations like the teach-
ers' unions, she said.

Virginia Scott said.

Many people are offended by the throw-away mentality that disposal containers imply, she added.

The Illinois Department of Transportation also could benefit from a bottle bill because it would save money spent on collecting roadside litter, IDOT roadside manager Larry Brown said.

The department spent $5.15 mil-
lon on litter pickup and litter patrol last year.

Sanitown said a program in northern Illinois in which the litter is actually counted piece-by-piece found that 60-80 percent of the litter was paper and plastic.

Of that paper and plastic content, 10-15 percent was glass container.

Sanitown said a bottle bill would eliminate some of that litter because IDOT workers have found much aluminum litter since aluminum recycling became popu-
lar.
Oral, genital herpes caused by two major strains of virus

By Jamie Shaw

Wellness Center

By the time people reach adulthood, most have had "cold sores" or "fever blisters." These seemingly harmless blisters are actually infections caused by one of the forms of herpes virus. A smaller, but still substantial proportion of adults have experienced another herpes virus, the one that usually causes genital herpes.

Both oral and genital herpes are caused by a virus. There are two major strains of the virus, Herpes Simplex Virus Type 1 (HSV-1) and Herpes Simplex Virus Type 2 (HSV-2).

The majority of herpes infections of the mouth area are caused by the HSV-1 strain and the majority of herpes infections of the genital area are caused by HSV-2 strain. Either strain, however, can cause an infection in either location. Symptoms usually are similar regardless of which strain causes the infection.

At the present time there is no cure for herpes. Once the herpes virus enters a person's body, it remains there. For some unknown reason, the virus is not clearly understood, the virus period­odically becomes active and produces an infection, or it remains inactive indefinitely. In general, however, the more times a herpes virus has become much more common.

There are more than 20 million Americans infected with genital herpes at this time and more than 500,000 to 1 million new cases appear each year.

Mary Robbins, a physician at the University Health Service, reports double the incidence of positive herpes cultures taken at the Health Service from 1997 to 1989. She states that the culture test used to diagnose herpes is more likely to be accurate if a person is tested as soon as they suspect they are infected.

To Your Health

Typical herpes lesions start as one, several, or more pin-head size, lister-like sores that are often painful. The lesions dry up and go away in about one to two weeks, but they may return. The average patient has four to seven flare-ups a year.

Genital herpes is considered a sexually transmitted disease. Herpes is highly contagious when one has open sores present. It is also possible, but not as likely, to transmit herpes even when no sores are present.

Most genital herpes occurs as a result of genital-to-genital contact. There need not be actual penetration. Herpes can also be transmitted through oral-genital contact from a cold sore.

A person who has genital or oral herpes must be careful not to transmit the virus from one part of their body to another. If an infected individual touches a virus-shedding lesion and then touches someone or rubs another susceptible part of him or her own body, the virus could be spread to the second location. If the second location happens to be the eye area, this infection could cause serious eye infections that could possibly lead to blindness.

If a person chooses to be sexual­ly active, there are ways to decrease their chances of getting herpes, along with all of the other sexually transmitted diseases.

The more partners, especially new partners, the higher the risk that you might get genital herpes. If you do have more than one sexual partner, your best protection might be to use a condom. But since close skin-to-skin contact can transmit the virus, the areas that are not covered by a condom will not be protected.

The best and most obvious way to decrease chances of catching genital herpes is to use all sexual contact with any person who has active herpes lesions. If there is any question, it is safest to avoid contact.

For more information and for counseling services, contact the Wellness Center at 536-4441. The Wellness Center offers counseling and education to all interested. The Student Health Assessment Center, in the Student Center, has books and pamphlets.

Health and Fitness Guide

BODY WORKOUT is currently canceled, but will be rescheduled. Call 536-5531 for details.

ADULT SWIM (Session 1). Red Cross Water Safety Instructors will teach basic swimming skills and stroke improvement techniques and teach basic rescue instructions. Instructional and pre-payment required at SRC Information Desk today.

PRE-BEGINNER AEROBICS meets 5 p.m. Mondays, Wednesdays and Fridays in the SRC Dance Studio Room.

FITNESS WALKING meets at 5 p.m. Tuesdays and Thursdays at McAndrew Stadium Track.

LOW-IMPACT AEROBICS meets Mondays, Wednesdays and Fridays at 5 p.m. in the SRC West gym.

HEALTHY WEIGHT, a class to learn to lose weight permanently meets at 9:30 a.m. Wednesdays in the Wellness Center Classroom, Keoner Hall.

STUDENT STRESS SUPPORT Group meets at 3:30 p.m. Thursdays in the Wellness Center Classroom in Keoner Hall.

BIRTH CONTROL UPDATE, all first time birth control users need to attend this update before going to the Health Service. Class meets at 3 p.m. Tuesdays and at noon Thursdays in the Wellness Center Classroom in Keoner Hall. For more information call 536-4441.

Procurement Center creates state, federal jobs

The Procurement Assistance Center based jointly at John A. Logan College and Southeastern Illinois College has announced that it has exceeded the $1 million mark in helping area manufacturers obtain federal and state contracts.

Since its inception in 1985, the Procurement Assistance Center has helped area businesses and industries secure $1,008,182 in contracts for products. Of this amount, $65,702 was procured during fiscal year 1989.

Donald W. Denay, procurement assistance specialist at John A. Logan College and Southeastern Illinois College, stated that in fiscal year 1989 alone, 46 new jobs were created and 37 jobs retained as a result of the 33 contracts procured with the help of the center. The center contracted 396 businesses and manufacturers during fiscal year 1989 and added 56 new businesses to its list of contracts.

Denay indicated that various business and manufacturing concerns have benefited from the center’s assistance over the past five years, including highway contractors and painting, printing and trucking concerns.

Janitorial services, post and terminal control units, lawn maintenance groups and professional service organizations also have been helped.

Recycling companies, wood-working and cabinet shops, video stores, suppliers, machine shops and the popcorn industry also have benefited.

In addition, a number of businesses have been assisted by the center, which covers the 14 southernmost counties in Illinois making up service delivery areas 25 and 26 of the Private Industry Council: Alexander, Pulaski, Massac, Pope, Franklin, Johnson, Union, Gallatin, Saline, Perry, Williamson, Jackson, White and Hamilton.

The John A. Logan College and Southeastern Illinois College Procurement Assistance Program provides counseling, information and assistance to firms to help them enter government markets and to help insure that Illinois firms are successful government contractors.

This program was initiated to complement the state’s economic development efforts by assisting established Illinois firms in realizing growth by expanding their markets through government contracting opportunities.

The overall goal of the program is to help improve economic stability in the State of Illinois through the creation and retention of jobs resulting from contract awards.

In addition, the program assists the Department of Defense and other federal agencies in increasing contracting opportunities by identifying qualified contractors and assisting them in entering the government contracting area.

The program is structured to provide a statewide network of local procurement outreach.
Touch offers nature activities

Imagine a full moon, waves breaking quietly, and you with your main squeeze, canoeing the strolling, shoreline waters.

Start out the evening learning how to paddle. End it beside a bonfire.

It makes for an inexpensive, romantic and unusual weekend night and it's happening at the University's Touch of Nature Environmental Center.

The offering is just one of many public programs and workshops scheduled in the months ahead at the University's outdoor education center, located about nine miles southeast of Carbondale off the Giant City Road.

All programs or events on a first-come-first-served basis. Advance registration is required, but late-comers can sometimes be accommodated. Children under five are admitted free. All-day activities begin at 9 a.m.

For additional information or to register, phone or write Registrar, Touch of Nature, SIU-C, Carbondale, IL 62901, (618) 453-3061.

The fall lineup includes:

- Touch of Nature, an old-fashioned evening. Enjoy an old-fashioned hayride on a chilly fall night. As you pass through the forest, listen for the boom of the horn and owl and learn more about these "winged cats of the night." Offered Friday, Oct. 6, and Saturday, Oct. 28 at a cost of $6.50.

- BIG MUDDY/CEDAR CREEK CANOE AND HIKE: Canoe six miles down the Mississippi, then hike into a scenic box canyon near Cedar Creek. This all-day trip covers a variety of terrain, Sunday, Oct. 15 for a cost of $14.

- A N ALL HALLOWS OVERNIGHT: Junior high students and older students will enjoy this Halloween alternative. Hear spooky ghost stories, bob for apples and meet new friends at this overnight extravaganza. Counselors are on duty all night for this outdoor-indoor "lock-in." Saturday, Oct. 28, for a cost of $22.

- CAVES ECOLOGY: Enter an exciting underground world with expert guide. Journey into a "wild" cave and view the fragile ecosystems that exist below the earth's surface. An all-day affair offered Saturday, Nov. 4 for a cost of $14.

- CANYONLANDS MOUNTAIN BIKING: Recomended for seasoned bicyclists, this trip covers remote back roads and trails in Arizona's rugged canyonslands.
  The trip is from Sept. 22 through Oct. 1, and costs $585. This price includes transportation, food, insurance and overnight accommodations.

- BACKPACKING THE GRAND CANYON: For the 11th consecutive year, experienced SU-C counselors will lead backpackers through this mile-deep canyon. Hike, camp and spend two full days backpacking in the sun on the canyon floor. Participants need not be experts, but should be in good physical shape. Offered Oct. 6-8. For a cost of $395 participants will receive transportation, overnight accommodations, food, some equipment and insurance.

HAYRIDE/OWL PROWL: Enjoy an old-fashioned hayride on a chilly fall night. As you pass through the forest, listen for the boom of the horn and owl and learn more about these "winged cats of the night." Offered Friday, Oct. 6, and Saturday, Oct. 28 at a cost of $6.50.

Speaker will explore east-west relations

By Carrie Pomeroy
Staff Writer

Cedric Pan, a visiting scholar from the National University of Singapore, will explore the relationship between Eastern and Western philosophy in a speech sponsored by the philosophy department.

Pan, who earned his doctorate from SIU-C in 1973, will speak on "Lao Tzu and Wittgenstein on the Unnameable" at 4 p.m. Sept. 14 in Faver 3059.

Pan, currently on one-year sabbatical leave, is spending three months at SIU-C before leaving for the University of California-Berkeley and Stanford University in October.

During his stay at the University, Pan said he has researched American philosopher John Dewey's influence on the Chinese intellectual scene. His research has specifically dealt with Dewey's correspondence from 1919 to 1921, he said.

Pan said he chose not to speak about his research on Dewey because the material he studied is "not groundbreaking."

"What I found in Dewey is not as interesting as the topic I'll be speaking on," Pan said.

Pan said there has not been extensive research on the topic of the relationship between Lao Tzu and Wittgenstein.

David Clarke, a member of the philosophy department's colloquium committee, said Pan's speech should be understandable to listeners with little or no philosophy background, as well as experienced philosophers.

Anyone interested in the relationship between Eastern and Western philosophy should be able to profit from it," he said.

Pan said his speech would be of interest to linguists as well as philosophers.

Clarke said the audience for the speech will be limited because of space considerations. Faver 3059 can accommodate only 25 people.

John Howe, chair of the colloquium committee, said Pan was chosen to speak for a variety of reasons.

"We're glad he's with us, if only for a short time, so we want to capitalize on that," he said.

Pan was also chosen for financial reasons, Howe said.

"We have a zero budget, so we have to go for people who'll speak for free," he said.

Pan, whose main teaching and research interests include comparative philosophy, Buddhist philosophy and Chinese philosophy, is the author of numerous publications. He has written a book in Chinese comparing Nietzsche's philosophy with Buddhism and has published several articles and papers on Eastern philosophy.

Pan said there has not been extensive research on the topic of the relationship between Lao Tzu and Wittgenstein.

Pan was also chosen for financial reasons, Howe said.

Society releases fall agenda

Nora Bentley
Entertainment Editor

Donald Beadle is excited about the coming year, and for good reason.
Beadle, the director of the Beethoven Society for Pianists and an associate professor in the School of Music, said the sixth season of the society will start on Sept. 13 with Anna Maria Trenchi de Bontazzi, who recently played her 10th Anniversary Carnegie Hall Concert, followed by Fernando Laires, Maurice Hinson and Sylvia Kernbaum.

De Bontazzi is a success story of overcoming the odds and regaining lost talent. After a near-fatal car accident that caused brain damage that doctors said would prevent motorization and block coordination, de Bontazzi made a comeback in 1974 after being away from her career for 13 years.

Pianist Maria Trenchi de Bontazzi made a comeback in 1974, 13 years after she suffered brain damage in a car accident.

She is a gold medal winner and the 1982 Outstanding Woman of the Year. She also has toured Europe, South America and the United States. “She’s really quite remarkable. She’s just an amazing artist,” Beadle said.

De Bontazzi will perform at 8 p.m. Sept. 26 at Shryock Auditorium.

SIU-C museum offers free training for guides

Free training for those interested in becoming volunteer guides at the University Museum will take place in the museum auditorium Sept. 20 from 9:30 a.m. to noon. Each workshop begins at 9:30 a.m. and lasts until noon. Prospective guides must attend all three. Pre-registration is not required.

Volunteers lead most of the tours offered to visitors by the museum. As part of their training, they learn about the museum and many of its exhibits. Workshops also cover topics such as communications skills.

After training, new guides work with experienced docents until they feel comfortable leading tours on their own. Monthly follow-up sessions keep volunteers up-to-date on new exhibits.

While the museum is open on Sunday, tours are only scheduled during weekday hours - 9 a.m. to 3 p.m.

“Tours are a great way to explore the museum with others and be able to ask questions,” said Geraldine Kelley, museum education coordinator.

Docents can expect to take one or two groups of 25 to 30 visitors through the museum each month. Autumn exhibits this year include art, films and photography by University graduate students, a regional toy collection, sculptures and art from Africa.

If you have any questions, call 457-3658.

Ruggers maul Scott Air Force team

By Kevin Simpson
Staff Writer

The SIU-C rugby club used a strong second half effort to defeat Scott Air Force Base 12-3 on Saturday.

Seniors Tom Braun and Bob Schramm scored tries (worth four points), and junior Nagi Kizzi made two conversion kicks (two points), to complete the scoring. After trailing 3-0 at the half, the club dominated the rest of the way.

The club played a tough game in the first half but failed to score any points. Junior Norm Smyth gave credit where credit was due.

"We all played exceptionally well," Smyth said. "We really picked it up in the second half. Our forwards really dominated the play."

Smyth said his team worked extra hard during the week to prepare for the contest. "We were really concentrating all week on our conditioning," Smyth said. "It really paid off."

The B-side club won the second match, 9-3.

SIU-C's record is 1-1. The next game is Saturday, Sept. 16, vs. University of Illinois-Urbana.

NOTEBOOK, from Page 16

Harmke aggravates hamstring injury

Senior Chuck Harmke will probably miss the EIU game because he irritated a hamstring injury during the Western game, Smith said. Harmke rushed for 13 yards on two attempts in that game.

Linebacker Darrell Crews also will be lost for the EIU game because of a strained knee against WIU, Smith said.

Others with injuries include: Tyrone Johnson, sprained ankle; Yog Herrenon, smashed fingers; and Tim Schiller, bruised shin. All are expected to see action this week, Smith said.

Guard Tom Roth, who missed the first game of the season against Nevada-Reno with a badly bruised thigh, played all of the WIU game in good shape, Smith said.

Top players named

Smith said the coaching staff named Antonio Moore the "defensive player of the week. Moore, a junior running back, scored the Salukis' only touchdown on a 5-yard pass from Fred Gibson. Moore ran for a total of 33 yards on 14 attempts, leading the Saluki rushing."}

Saluki kicker also stars as decathlete
By Dale Walker Staff Writer

Saluki placekicker John Bookout may have had a disappointing outing last Sunday, but he has had a successful career overall for the Salukis.

Head Coach Bob Smith hopes for a successful future for John Bookout. "I see him playing a major role on this team. (His last year, this year) is to kick extra points and field goals," Smith said.

Bookout sees the new coaching staff playing an important role for the team as well. "I like the new coaching staff. They're a lot more relaxed and organized than last year," he said. "Coach Smith has good attitudes toward kickers. If you miss, don't dwell on it. Just concentrate on next week's game." Bookout, a sophomore, had a successful season last year as a kicker making 83 percent of his field goal attempts. Bookout earned this season with an unwritten string of point after conversions that now stands at 24.

"I had not all John accomplished for the Salukis this freshman year. He is also a deacon for the track team. His score of over 4640 points scored last season was more than what won the conference championship the year before.

"Bookout hopes to continue to improve in both sports but he knows the two-sport schedule is demanding. "As a senior I want to still be doing both sports," he said, "but I know that I have to get better in college sports you have to work year-round."

Smith likes Bookout's work ethic. "In practice he works hard and he's still young, and that can only work in his favor," Smith said.

As an all-star kicker for Herrin High School in Arlington Heights and a placekicker at the 1986 National Junior Olympics in the decathlon, Bookout found that he had to become more successful at playing football. The problem he encountered when searching for a college to attend was that most schools wanted their athletes to concentrate solely on the sport that they received the scholarship for. Bookout said, "Southern was the only school that would let me do both sports," he said, "The other schools that recused me wouldn't let me do both sports."

Although he has enjoyed a lot of personal success and he is only 19, John is not selfish. "If I could sacrifice my personal satisfaction for a win I wouldn't hesitate," he said.

For now he is looking forward to the upcoming season and he wants to put the bad brakes behind him. "I hope to kick four or five extra points this weekend," Bookout said, "meaning the team needs to work to score some touchdowns.

Last year the Salukis lost 35-0 to Eastern and now they want to break out of their slump with a victory this weekend. As for now Bookout is concentrating on improving. "I do a lot of sprinting and things that aren't mandatory for kickers," Bookout said. "I hope to be a better shape for track next spring and I'm going to have to work this fall to get there."

Hartmg's golf lineup set; Cowen, Pavelonis among top five players

Mulligan, Bellas and Leckrone round out first 5

By Kevin Simpson Staff Writer
Men's golf coach Lew Hartong has decided on his top five for the Northern Illinois Golf Invitational held Friday, Saturday and Sunday in Cedar Falls, Iowa.

Senior Mike Cowen, Juniors Brit Pavelonis, Mulligan, Bellas and Leckrone will make the trip to Iowa.

Among the 18 division I teams, defending champion Illinois, along with Wisconsin, Iowa and Minnesota are repre­ sented in Big 32, Illinois State, Bradley and Drake represent the Missouri Valley Conference.

The tournament will be held at three different locations: Beaver Hills, Sunnyvale, and Pleasant Ridge golf courses will each take part in the outcome.

The Salukis tied for eighth place in last year's tournament.

"It's a very respected tournament. I'm looking forward to it," Hartong said. "It's a lot of fun. The team is very close and we really play well. I really want to try to get a good year. We're basically the same team," Hartong said. "We're just older and more experienced.

"I want to thank the fans who bought tickets," Smith said. "I appreciate the idea for the promotion and I think it came off well."

"Fred Huff and Jim Hart put a tremendous amount of effort," Smith said. "It's unfortunate the weather didn't cooperate."
