High school teacher named ombudsman

By Jan Traschita
Daily Egyptian Staff Writer

A 27-year-old Williamson County school teacher has been appointed provisionally as a University ombudsman, succeeding Mrs. Mary Walker, who resigned in February to become director of SU’s health care plan.

The new ombudsman, to whom SU people can tell their troubles, is Kristina Haedrich, director of guidance at Crab Orchard High School east of Marion.

The announcement was made Thursday by Ms. Beth Sulzer, chairman of the ombudsman advisory committee of the University Senate.

The new ombudsman takes office in 10 days.

Miss Haedrich said she heard about the opening from a friend and applied after that same day before the deadline.

"I was really interested in this type of work so I pulled myself together and got the application in just on time," she said.

Miss Haedrich was graduated from SU and received her masters in guidance and educational psychology here in 1971.

The ombudsman is very much the kind of job I would enjoy because I like to work with young people and adults. I feel my special training and skills in the area of guidance will be a real asset since my job is one of mediator," she said.

Miss Haedrich said she feels her experiences in helping people would help her in her new job.

The University has been very cooperative with her and so have the people from Crab Orchard High School, she said. She has made arrangements to continue acting as guidance chairwoman at the high school until the end of the school year on a part-time basis.

The first thing she will do after taking office on April 30, will be to orient herself with the student and people involved with the ombudsman program. She has a number of ideas she would like to try out after becoming acquainted with the administration and school policies and problems.

"I am thinking about starting an active outreach public relations type program to make the students more aware of the office and what we can do here to help them," she said.

Miss Haedrich said she also has plans to spend some time going to places on campus, like the union, and just talking to students to find out what type of problems they are encountering.

"If there are any problems that seem to be bothering a lot of people I would like to research them and hopefully come up with some solutions," she said.

Besides counseling activities at the high school, Miss Haedrich also teaches two English classes and a German course that she originated that past fall.

"Part of the reason I began looking for another job was because I feel my full talents of working with people could just not be used in this kind of situation," she said. Therefore Miss Haedrich felt full talents of working with people could be used with the ombudsman position.

"This is really what I was looking for," she said.

Miss Haedrich was chosen from over 50 applicants for the position by the Ombudsman Advisory Committee of the University Senate.

NOW passes resolution

Women's group backs IRS against SIU

By Pat Nusman
Daily Egyptian Staff Writer

The Southern Illinois Chapter of the National Organization of Women (NOW) passed a resolution Thursday, asking that the Internal Revenue Service (IRS) to uphold its charges against SIU.

"In the resolution passed by the NOW board of directors, the organization indicated that the total amount paid to the SIU administrators in excess of wage control regulations could have been used to prevent the termination of two women employees."

The resolution said: "Many SIU women employees have received notices of 'termination' effective June 15, 1972, with excuses such as 'lack of cash.'"

"Since the SIU male administrators have been insensitive to the grievances of these women, they have been forced to seek outside assistance by filing formal complaints with the Department of Health, Education and Welfare (HEW)."

"If the Economic Stabilization Act is enforced, the amount of $2,056 per month can be used to prevent the 'termination' of two women employees, and thus settling two of the formal complaints filed with HEW."

The resolution refers to a charge by the Springfield office of the IRS that the SIU administration has violated the wage control regulations by allowing a 33.45 percent increase for David R. Derge, president of the Carbondale campus and 18 percent increases for John S. Bodelman, president of the Edwardsville campus; Robert G. Lavery, former president of the Carbon­dale campus; and James M. Brown, SIU Chief of Board Staff.

According to the NOW resolution, the total amount in excess of the wage control regulations is $2,056 per month.

That the four executive administrators have succeeded in obtaining high salary increases while most SIU academic women employees have been exploited in terms of salary, the resolution said, constitutes a blatant violation of the Illinois Fair Employment Practices act.

The board is not only violating state and federal regulations by their practices, it said, but also their own resolution on Equal Employment Opportunity—the Affirmative Action Program, passed on August 21, 1970 and reaffirmed July 16, 1971.

Registrar says 3-year plan exists

By Pat Nusman
Daily Egyptian Staff Writer

SIU has essentially a three-year bache­lo­laureate program now "if a student is smart enough to take the 48 hours of proficiency credit," said the chairman of the hearing committee on a proposed shortened bachelor's program.

Robert A. McGrath, committee chair­man and dean of the Office of Ad­missions and Records, commented at the Thursday session that the major change will revolve around testing techniques, which may be administered after the third year rather than at the start of the university program.

"I think the basic question is whether a student should spend four years in the academic womb or should be awarded a degree for achievement," Tom Tyler, of Counseling and Testing said.

Raymond C. Nowacki of Engineering Mechanics and Materials told the committee that he did not feel that it is desirable to award a degree in three years.

The University, Nowacki said, should do a better job with fewer students—presently the only requirement to pass many courses is to register for the course.

"What does the taxpayer get from his money if a course can be passed with so little effort?" Nowacki said. "In general, I believe that the three-year degree would debase the level of a B.S. degree."

The only reason a student could precocious the courses is that they are not easy anyone could pass, he said.

Instead, he said, there should be fewer, more qualified students going to college, therefore the lower levels.

There's a riot goin' on

University Legal Counsel T. Richard Mager said recently that if the SIU has to spend its money on additional attorneys to cope with the growing list of lawsuits against the University, it may be regrettable.

What is more regrettable than the outlay of cash is the failure of the SIU administration to avoid lawsuits by maintaining unfair and oppressive regulations governing housing, parking and employment.

"Most of these are old problems that have been lying around here for a long time," Mager said.

"They have just manifested themselves now in legal problems of one type or another." Yes.

It was the resentment against these and other old problems which sparked the Seven Days in May two years ago. True, the Cambodian invasion and Kent State were rallying cries but even then by only a virtual minority. Once the gas and rocks began flying foreign wars became just that and the local battles were fought for local causes. Yet two years later, the causes still exist and only the battlefield has changed.

A courtroom in Murphysboro has replaced the staging area at Main and Illinois. The students and faculty are armed with briefs and now the University has had to call in lawyers instead of the national guard.

Things have changed. Students have changed. Everyone has changed. Everyone, that is, except the men at the top who cling to old regulations long after everyone else has forgotten that they were there.

So it is regrettable that SIU has had to hire about 40 attorneys at a predictable taste. The administration won't concede anything without a fight. And even if troops no longer ring the East Campus dormitories, there's still a riot goin' on.

Reroute needed

On May 17, John F. Lonergan, the SIU Campus Planner, will, by means of a campus wide referendum, ask the students, faculty and non-academic employees of SIU to either approve or reject his "pet" project, the proposed campus monorail system.

The project, designed to eliminate most on-campus parking, calls for the construction of two outlying parking areas with a total of 14,000 cars. Commuters will be carried from the lots to campus by monorail.

After reading the campus planner's report on the project one cannot help but be impressed with its thoroughness and complete exploration of alternative solutions to the Carbondale area parking and traffic problems. Indeed, a monorail seems to be an adequate and relatively inexpensive solution to the problems.

The proposed project has one major flaw in that its practicality depends upon the relocation of Highway 51 around Carbondale and the campus to the south of the highway. If this were to happen the monorail would be built and the highway wasn't, Lonergan replied that it would "beyond a doubt create traffic problems in Carbondale." He said, however, that it is safe to assume the highway will be bypassed.

Lonergan may have been correct in his assumption but according to Jim Newton, superintendent of Illinois Highway District six, construction on the relocation project won't begin for at least three years and the road won't be open for at least six years.

The monorail parking package calls for the construction of two large parking areas to be located south of campus adjacent to the highway. This means that future traffic to and from the lots will be rerouted around the campus and Carbondale.

Due to the large expense involved, these lots will in all probability be rejected, leaving students to plan whether or not the new highway is there.

Without the relocated highway the only direct route through the parking areas from the north is Highway 51 which at the present time runs through Carbondale. In the future the lots would all be connected with the Carbondale traffic situation. With that in mind, the thought of 36,000 cars per day, the peak number determined by the planner to enter or leave the campus at a given time, is to drive two lanes through town all headed for the same destination tends to boggle the mind. Likewise the resulting congestion at parking lot entrances would be staggering.

Lonergan's proposal probably deserves endorsement from the community on May 17, it will go the SIU Board of Trustees and to the Illinois Board of Higher Education. Within the next year SIU commuters could be riding the rails.

In the next few weeks Lonergan will be conducting a large scale publicity campaign designed to familiarize future users with the project. Unless the campus planner adequately explains how he will handle increased traffic congestion in Carbondale and at parking lot entrances, it is in the best interest of the entire University community to vote against the monorail until Highway 51 is relocated.

Vietnamization?

Vivian Voelker

Editor's Note: The following editorial is reprinted from the Jan. 11, 1972 editions of the New York Times. Bruce Franklin, a tenured professor at Stanford University, has been accused of allegedly inciting students to illegal acts. These allegations prompted a faculty advisory board to recommend his dismissal. Franklin, like Douglas Allen, based his defense on the university's violation of his academic freedom.

The recommendation by a seven-man faculty advisory board that the tenured professor be dismissed for repeatedly inciting students to 'the use of illegal drugs and violence' is a matter of utmost gravity for the nation's academic community. If the Board of Trustees follows suit, this would be the first such step by a major university in the context of recent campus unrest.

Although the professor's defenders have predictably charged that the 5-2 faculty recommendation is a violation of academic freedom, mainstream evidence shows that it is quite the opposite: a painful but necessary attempt to protect such freedom against coercive moves within the academy.

Bruce Franklin, an associate professor of English, has long and publicly encouraged students to commit illegal acts. He urged actions that threatened to inflict damage of property and interference with the lawful activities of other members of the community. He has in effect cried fire in a crowded theater. His conduct has been cowardly as well as irresponsible, manipulating students, endangering their lives and damaging their future careers. It makes paws of vulnerable young men and women while the professor as instigator seeks immunity behind the shield of tenure.

At no time has Professor Franklin's most ideologi notion been an issue. What is at stake is the university's right physically to protect itself. The senior faculty panel's painstaking deliberations, after six weeks of hearings of more than 100 witnesses, led to the unanimous finding that all the evidence being presented to the senate committee is an 'abuse of power' rendered particularly serious when it ignores a teacher's responsibility toward a fragment insistent on its being heard. Last February, a student occupation of the university's Computation Center followed Dr. Franklin's appeal for such a take-over.

The panel's two dissenting members disagreed with the majority on the interpretative coverage of the penalty. Their counsel of leniency might be supported had the offense been an aberration of momentary passion. But Professor Franklin's consistent contempt for the foundations of a free, rational and non-violent community is a real crime re- peated when he responded to the faculty verdict with a call for 'revolutionary counter-violence,' while his wife 'symbolically' stood by his side with a rifle.

A better symbol of the university's determination to uphold liberty under law will be Stanford's notice than institutions that would put a license for coercive and illegal action.

No, thanks...just window shopping.

Temper criticism

To the Daily Egyptian:

A proponent of Mr. C. Kumararatnam's letter (April 11), he contends that Jack Anderson's papers did not unearthen anything new about the U.S. government's role during the last Indo-Falk War. It is true that most people still believe that the U.S. was more interested in the Middle East than in Southeast Asia. But this is not what the top officials at Washington were saying. Mr. Kumararatnam ignored the fact that the U.S. was actively trying to keep the American people in the dark. The U.S. increasingly found itself getting deeper and deeper behind closed doors.

Mr. Kumararatnam appears to be living in colored glasses, if not with 'Jaundiced vision.' He brings to his notice President Nixon's many achievements. Actually, there appears to be a similarity between Dr. Kumararatnam and Mr. Nixon, i.e., both tend to blow hot and cold in the same breath. Mr. C.K.'s letter clearly indicates that he does not know what he is trying to say.

Witness says 'union' behind Yablonski killings

WASHINGTON, Pa. (AP) -- Annette Gilly, who confessed in- volvement in the 1960 Yablonski family murders, says she was told "the union" was behind the slayings and that they had been approved specifically by the "big man.

"To me, that meant Tony Boyle, President, United Mine Workers UMW." The doubt, 31-year-old Cleveland housewife said in a statement read Thursday in Washington County Court.

The union's general counsel, Edward L. Carey, issued a statement denying any complicity of Boyle or other UMW members in the Yablonski slayings. Boyle refused to speak with newsmen but in the past has denied involvement.

UMW insurgent Joseph A. "Jack" Yablonski 59, his wife Margaret, 37, and their 25-year-old daughter Charlotte were shot to death while sleeping before dawn Dec. 31, 1969, at their home in Clarksville.

Yablonski had just lost a bitter battle for his presidency and was about to testify before a federal grand jury in Washington, D.C., that was looking into UMW activities.

The government has charged that the principal motive for his death was to prevent him from appearing before the grand jury and that his wife's and daughter's killings were incidental.

Mrs. Gilly's statement contained a half-dozen references to the union, but there were no further references to Boyle. She did not explain why she concluded that the words "big man" meant Boyle.

The statement was read by an FBI agent -- Mrs. Gilly was not present at a pretrial hearing for Silas Huddleston, 63, of LaFollette, Tenn., Mrs. Gilly's father. Huddleston is a retired coal miner and former president of a UMW local within the union's District 19, which embraces parts of Eastern Tennessee and Kentucky.

Besides Boyle, it mentioned the last names of two men, "Tilter" and "Owens.

They were not identified further, but a George Tilter is vice president of the UMW, and a John Owens is the union's secretary-treasurer.

The statement also mentioned two others -- Albert Pass of Middlesboro, Ky., a member of the UMW's board and a former postmaster, and William Jackson Prater, 52, of LaFollette, Tenn., a field representative for District 19.

Prater was arrested in Tennessee by the FBI Wednesday on federal conspiracy charges in the killings after he was indicted by a federal grand jury in Pittsburgh, making him the sixth person in custody in the case. He agreed Thursday to be taken to Pittsburgh to face the charges.

After conferring with union leaders, Carey said Mrs. Gilly's statement, on the basis of excerpts reported by the press, was "extremely vague." He said the term "Mr. Big" could apply to many persons.

"I categorically deny that Mr. Boyle or anyone else in the union had anything to do with these murders," Carey said.
NEH director to speak on humanities grants

By Sue Millen
Daily Egyptian Staff Writer

Herbert MacArthur, Director of the Division of Education of the National Endowment for the Humanities (NEH), will speak to interested faculty members at a special meeting Thursday at 8 p.m. in the Ramada Inn University Club. His subject will be a review of the ways in which the NEH is assisting educators in the humanities and related fields in grants-in-aid for the support of teaching and research. The NEH was established several years ago to provide funds for preserving university faculty in the Humanities and Social Sciences such as science and engineering have been assisted by the National Science Foundation. It provides support to junior colleges, community college teachers, scholars, and staff in four-year colleges and universities. Its support includes both nine-month and three-month summer stipends. Special programs include fellowships for Afro-American, American Indian and Mexican American studies.

The NEH defines its responsibilities broadly and includes humanistically-related projects in the social and natural sciences as well as engineering and technology in its program. Of some 38 grants-in-aid recently awarded to young scholars, the largest number was to specialists in literature and history.

MacArthur is on leave from the University of Vermont, where he teaches Elizabethan Literature and is dean of the College of Arts and Sciences. Faculty members who wish to consult with him during his visit about support for special projects should contact Betty Mitchell, in the English department.

Following MacArthur's talk David Ogilvie, dean of the College of Liberal Arts and Sciences, will comment on his talk and lead an informal general discussion.

Everyday's Taste in Music
SIU professor earns research grant award

By University News Service

Millan T. Edelman, SIU professor of economics, has been awarded a Fulbright-Hays Program research grant for six months of work in England beginning in January.

Edelman's research in his specialty, industrial relations, will be done in the industrial relations research unit of the University of Warwick.

To obtain the award, Edelman proposed a project which was evaluated and the proposal accepted by the United States-United Kingdom Education Commission headquartered in London. He applied through the Committee on International Exchange of Persons in Washington, D.C.

Edelman, a native of Pennsylvania who obtained his Ph.D. from the University of Illinois, came to SIU in 1968. During the past 10 years, he has been an arbitrator in labor-management disputes and also has done mediation work. He worked for the federal Wage-Stabilization Board in 1951-52 and was a member of Gov. Kernan's Advisory Commission on Labor-Management Policy for Public Employees.

At SIU he was associate dean of the Graduate School for two years and has served on the Graduate Council, the Faculty Council, and the University Council. He has co-authored a book and has written several articles on collective bargaining for professional journals.

This will be Edelman's third leave abroad. He taught at the School of Advanced International Studies at Johns Hopkins University at Bologna, Italy, in 1957, and in 1964 spent a sabbatical leave in Israel, where he studied labor-management problems of public and labor-owned enterprises.

Group approves plan to warn demonstrators

By Richard Lorenz

Daily Egyptian Staff Writer

The community conduct code committee Wednesday approved a warning procedure based on the Internal Policy for Demonstrations.

Under the provision, the assistant to the president for student relations or his designate will notify individuals that they are in violation of University regulations. The individuals will be asked to confirm or cease their activities or certain amount of time. Failure to comply could lead to arrest and penalties. If the individuals view the request as unreasonable, an appeal can be made.

The committee defeated a motion made by William Hardenberg, graduate faculty representative, dealing with obstructing the view of an audience while a speaker is speaking.

Some amendments were made to the Community Code Review Board, the appellate body under the code. Hearing panels of the CCRB will consist of seven members, two from the constituency of the charged party and five from each of the other constiuencies.

The CCRB will be composed of members certified by each constituency. The minimum certification will be five. The maximum certification will be 30. If a constituency fails to provide a list of members for the CCRB, the board will function without representation from that constituency. The charged party or the University advocate may appeal to the chairman of the CCRB for replacement of any member of a panel.

Some discussion on the time table for procedures took place, but no formal action was approved.

High school mathematicians to take over Arena Saturday

By University News Service

High school mathematicians will take over the Arena Saturday for a two-day test of their problem solving abilities.

The annual Mathematics Field Day is expected to draw 770 students from 41 prep schools for a mass examination that will include multiple-choice testing and written analyses of problems.

Certified prizes will go to individual and team winners in the four high school classes. Edwardsville Senior High School swept all team first-places last year.

At the same time Saturday, the Illinois Council of Teachers of Mathematics will meet at the James W. Nex drones Physical Sciences Building. They will hear Terry Vega, mathematics instructor at John A. Logan College, talk on "Mathematics and the Justices," and S. Panichiokasian, SIU mathematics professor, give some "Random Observations on Statistical Models.

The second half of the field day test will be limited to those who finish in the top 10 per cent on multiple-choice results. The first test will be computer-graded in time for awards presentations at 2 p.m. according to Larry Wimp, Field Day chairman and instructor in mathematics at SIU.

Funeral mass to be held for cycle accident victim

Funeral mass for Ramon W. Camarata, the SIU student killed Wednesday in a car-motorcycle accident southeast of Carbondale, will be said at 10 a.m. Saturday at Hanekamp Funeral Home in Northbrook.

Interment will be in the Sacred Heart Cemetery in Northbrook. Friends may call at the funeral home from 2 p.m. to 9 p.m. Friday.

Camarata, 20, of Northbrook, was killed about 10:45 a.m. Wednesday on the Giant City Road when the motorcycle he was riding ran into the rear of a car turning off the road. Both vehicles were traveling north.

Camarata was a sophomore majoring in psychology. He is survived by his parents and a sister.

**Battle predicted at Hue**

**Viet Cong attack expected**

WASHINGTON (AP) - American military experts warned the North Vietnamese "to take a swipe" at the ancient imperial capital of Hue in the next few days, an attack viewed as a major test of President Nixon's Vietnamization program.

Predicting a real battle between the North Vietnamese 20th Division in league with elements of the 324th and the 1st South Vietnamese Division, one military expert said the fighting "will be the final examination of Vietnamization."

The officials said the 1st Division is the best in South Vietnam's army and they point out the unit has not been committed to battle in the current fighting despite having been ready to go.

One source, citing captured North Vietnamese documents and testimony from prisoners, says Hanoi hopes to capture Hue and other cities in an effort to incite a countryside uprising, undermine the Saigon government and play on anti-war sentiments within the United States.

As the United States sent more ships and planes to Southeast Asia, U.S. officials and some members of Congress said the U.S. government appears to be re-establishing American involvement in the war.

"If news reports are accurate, our country is now assembling in Southeast Asia one of the largest air armies in military history," they said in a letter to President Nixon.

One member of Congress for Peace Through Law asked Nixon in the letter for a full report on the size, scope and purpose of contemplated U.S. military action in Indochina.

The American position would be affected enormously by a battle for Hue.

Failure to hold the city would dangerously weaken defense lines in the north, the source added, adding that "attacks the American air base at Phu Bai just south of Hue."

Moreover, the failure of Saigon's best troops could indicate South Vietnam is not able to defend itself and, therefore, the failure of Nixon's program of troop withdrawal and ultimate reduction of U.S. military involvement, officials say.

They add that a North Vietnamese victory at Hue would not only weaken the morale of troops in the rest of the country but would further dishearten American public opinion.

"The riggles also would reach the United States, according to the sources, where President Nixon is said to be trying to avoid an air battle that would again set off the visible anti-war dissent he succeeded with his withdrawal program."

If the base at Phu Bai were endangered, its defense probably would increase the U.S. combat casualty rate and refocus America's public attention on the American involvement. American reinforcement units were flown to Phu Bai Wednesday.

Beyond that, officials speculate, the city's loss might lend weight to increased criticism of U.S. support for a tion unable to defend itself in spite of massive American military and economic aid.

An Loc has been predicted in the region 240 miles north of Saigon for many weeks. On Highway 15, which links the highlands to the central coast area, enemy troops continued to hold fortified positions controlling An Khe Pass.

On the northern front, a senior U.S. officer termed the situation "very good," adding the South Vietnamese "have the situation in hand" below the demilitarized zone. Fighting continued around Fire Base Bastogne, guarding the southwestern approaches to Hue 12 miles from the city and 60 miles south of the DMZ.

---

**U.S. bombs enemy-caught An Loc airport**

SAIGON (AP) - Waves of U.S. bombs targeted the An Loc airfield with fire and explosives Thursday as North Vietnamese artillery assaults that captured part of the provincial capital and twin bases north of Saigon. The government troops there were surrounded and in danger of being overwhelmed by the enemy over the battleground radiated.

Enemy troops and tanks, apparently at the price of heavy losses, braved all the bombs, bullets and artillery that could be brought to bear on them and drove deep into the area, 40 miles north of Saigon. Field reports said they also captured a nearby airfield during the bombardment and reinforcement of the 1st Air Force Group at An Loc was left of them, extremely hazardous.

About 30,000 North Vietnamese troops were reported committed to the battle just south of the Cambodian border. Earlier they seized a key district headquarters.

For the North Vietnamese, the capture of a provincial capital would be the high point so far in their 13-day-old offensive. President Nguyen Van Thieu has ordered An Loc held at all costs, fearful of the effect the town's capture would have on the morale of his soldiers and civilians loyal to his regime.

Fifteen miles to the south of An Loc, a 30,000-man army and infantry rescue force remained stalled in the face of enemy fire. Commanders said they could not advance because of enemy resistance, a factor totally disregarded by the enemy just to the north. One U.S. adviser voiced impatience with the government commanders, saying: "I wonder why we stay bogged down here."

As the situation deteriorated hourly, some quarters in Saigon expressed belief the senior U.S. adviser in the region had underestimated the enemy, something the allies often have done in the past. Maj. Gen. James F. Hollingsworth, senior adviser to the 3rd military region, which surrounds Saigon, said Tuesday after earlier battling that the enemy had "failed miserably" in their attempts to take An Loc with enemy survivors put "on the run to Cambodia." He had predicted the huge government relief force would arrive in An Loc by Wednesday.

All available airpower was thrown into the battle Thursday in the hope that aerial bombardment would prevent defeat. U.S. pilots, in exchanges of radio conversations, told of bombing factories and a village near An Loc. There were no reports on the numbers of casualties on either side. They were expected to be high.

Militarily, An Loc has little significance, but if the defenders are overwhelmed it could be the worst single disaster of the war for Saigon's forces.

Military sources said the increased attacks and their fury indicated the Communist command has opened a new phase of their 15-day-old general offensive, their second greatest of the war. Intelligence had predicted this all along. In view of this, the sources said, Saigon itself may be the target of rocket attacks.

Military sources said the North Vietnamese have moved most of an estimated 30,000-man force from northern Cambodia and southern Laos across the border into South Vietnam's vulnerable central highlands. A major enemy push on the order of that now under way at the An Loc has been predicted in the region 240 miles north of Saigon for many weeks. On Highway 15, which links the highlands to the central coast area, enemy troops continued to hold fortified positions controlling An Khe Pass.

On the northern front, a senior U.S. officer termed the situation "very good," adding the South Vietnamese "have the situation in hand" below the demilitarized zone. Fighting continued around Fire Base Bastogne, guarding the southwestern approaches to Hue 12 miles from the city and 60 miles south of the DMZ.
Audio alternative to braille
opened to Minnesota's blind

ST. PAUL, Minn. (AP) — If you're blind and don't know where you can get the most for your grocery money on a given day, you're out of luck without someone to read the newspaper ads to you.

If you're blind and want to read "The Sensuous Woman," you either have to find someone to read it to you or wait until your order for a tape recording can be processed, usually weeks and often months.

If you're blind and want indepth information on local, national and international news, you need someone to read it to you.

In Minnesota, the State Services for the Blind believes blind people need the same kind of information as people who see. And that's what the Radio Talking Book provides, 17 hours a day.

The closed-circuit radio station specifically for the blind has been in operation nearly three years. Kansas recently started a similar station based on Minnesota's.

Hawaii and Oklahoma also have expressed interest, and England's British Broadcasting Corp. (BBC) sent a team to study the plan.

Programming runs the gamut from local newspapers to their entirety-to books and magazines read widely by the seeing public. There are also interviews with all kinds of people.

The program's basic purpose is to make available to the blind the full breadth of material available to seeing people. The only criterion for selection is that it be widely read.

"We do books people are reading, regardless of content," said C. Stanley Potter, services director. "There is no editing, although many of the books we read contain language some people may find offensive."

In cases of questionable language, Potter said, the reading is preceded by a statement to the effect that some may find it offensive but that it is the right of the individual to select the books he will read or hear.

The receiver, which looks like an ordinary radio except that there's no tuning dial, comes equipped with an earphone for private listening if desired.

Among books read recently are "The Sensuous Woman," "Soul on Ice," by Black Panther leader Eldridge Cleaver, and "Do It!" by Jerry Rubin of the Chicago Seven.

Also included among recent selections were Lawrence Welk's "Wunnerful, Wunnerful!," "The Dark Night of Resistance," by the imprisoned Father Daniel Berrigan at Ram in Paterson's "Sexual Politics.""-

Listeners have a variety of eight books to choose from daily, each read in one-hour segments. And if someone misses a segment, he can call State Services and they'll send him the tape.

Book selections are made from best seller lists and recommendations by librarians in Minneapolis and St. Paul. Potter said the St. Paul Public Library orders 20 books monthly specifically for Radio Talking Book, then puts them on library shelves when the station is finished taping them.

The weekday schedule includes two hours of morning newspapers, one of short stories, one of children's stories, three magazines and two hours of evening newspapers.

Randy Thomas, Daily Egyptian staff writer, won first place and a $900 scholarship in the William Randolph Hearst Foundation's national competition for college journalists.

Announcement of Thomas' achievement came at the annual Scholastic Journalism Program Thursday, part of Journalism Week, at which five scholarships were announced.

Thomas, a Homewood majoring in journalism, covers student government for the Daily Egyptian. He won the top Hearst Foundation prize for his story on the March 6 construction crane accident at the Humanities Building in which a student was killed. The competition was for spot news-stories written under deadline pressure.

He will go to Washington, D.C., May 6 to compete with other national winners in the monthly Hearst contest for a national writing championship and a $1,000 scholarship.

Other scholarship winners announced at the awards program were Richard Lorenz, Shippan Memorial Scholarship sponsored by Capley newspapers, Jan Tranchita, Garnett Newspaper Foundation; Robert W. Gropp, Paskaly Family of Marion, Ill., scholarship; Tom Finn, Larry Mann Memorial Scholarship; and Larry Barnhart and Donald G. Hileman Advertising Scholarship.

Most lemon beauty products
just give you lemon perfume. Or a dab of lemon extract.

Only Lemon Up gives you the natural juice of one whole lemon in every beauty product. And lemon juice in nature's own grease-cutter.

So Lemon Up Shampoo cleans cleaner and rinses fresher, for brighter, longer-lasting shine.

Lemon Up Facial Cleanser whisk's away dirt and oil and leaves your skin naturally fresh and glowing.

And there's Lemon Up Anti-Blemish Lotion, a special cleanser for complexion problems. It cleans pores and kills bacteria on skin with its anti-bacterial formula. Lemon Up, the only lemon beauty products in the world with the natural juice of one whole lemon. And that's a promise we keep.

During the hour devoted to women's magazines, the reading often includes information strictly for women, from hygiene to birth control to hairdressing tips.

"Nobody reads that kind of stuff to blind people—except us," Potter noted.
Impressions on tap for ‘Wild Thang’ dance

By Daryl Stephens
Daily Egyptian Staff Writer

A performance by the soul group The Impressions will highlight the festivities of the annual Omega Psi Phi “Wild Thang” set for April 21 and 22 at SIU.

The Impressions will perform during a dance from 8 p.m. to 1:30 a.m. April 21 in the Student Center Ballrooms. Jay Johnson from radio station WVON, Chicago, will host the dance which will be followed by an after set beginning at 2 a.m. at Bonaparte’s Retreat. Admission to the dance is $3.

Also planned for the weekend by Omega Psi Phi is a preset at 9 p.m. April 21 in the Student Center Cafeteria.

The Impressions have been performing as a group for over a decade. Formed in 1968, the original group consisted of Curtis Mayfield, Jerry Butler, Sam Gooden and the Brooks Brothers. The group recorded its first hit, “For Your Precious Love,” featuring Butler on vocals. Shortly afterwards, Butler left the group to go on his own, and the Impressions broke up.

However, the group reorganized in 1980 with Mayfield, Gooden and a new member, Fred Cash. They signed a recording contract with ABC-Paramount Records, and throughout the 1980’s became famous for such hits as “Gypsy Woman,” “Amen, It’s All Right,” “I’ve Been Trying,” Keep on Pushing,” “We’re A Winner,” “People Get Ready,” “I’m So Proud,” “This Is My Country,” “Choice of Colors,” “Fool For You,” “Check Out Your Mind,” “Baby Turn on To Me,” “Ain’t Got Time” and “Love Me.”

In 1970, the Impressions underwent another personnel change when Mayfield left to go solo. He was replaced by Leroy Hutson, who had previous experience as a group Mayfield had managed called The Mayfield Singers. Upon joining the Impressions, Hutson established himself as the leader, singing the lead vocal parts and writing most of the songs. As well as writing for the Impressions, he also wrote songs for Roberta Flack.

The group’s current album is called “Times Are Changing.”

Maryland State Police
plan course for women

PIKESVILLE, Md. (AP) — Maryland State Police are planning a special training course in small arms exclusively for women.

Ag Economics Club trip cancelled

A trip planned by the Agriculture Economics Club for Thursday, Friday and Saturday, has been cancelled.

Donald W. Lybecker, assistant professor in agriculture industries and advisor to the Agriculture Economics Club, said not enough students signed up, making the trip too expensive for the few who planned to go.

The club had plans to spend the three days in Chicago visiting the Board of Trade, the Central National Corporation and representatives from International Harvester.

Lybecker said that the annual event will be postponed until fall.
WHAT'S IN A NAME?
Nothing much. Like book covers, names don't reveal much beyond themselves. But, some names take on depth and meaning through association with something else. Names like Ferrari, Dior, Nikon, Tiffany and the like are known the world because each is associated with one thing—unquestioned quality.

The next few months in Carbondale you'll be hearing a name that you will begin to associate with quality living. The name is LEWIS PARK APARTMENTS.

We have put a lot of time and energy into making LEWIS PARK a new approach to living. We have gone beyond the idea of building just another apartment complex. Instead, we have tried to create a community.

Lewis Park, located on East Grand in Carbondale is designed for people who enjoy the convenience and social excitement of neighborhood living. Within the complex are pool facilities, a clubhouse, a post office, a laundromat and a community center, all designed with the idea in mind of bringing people—you and your neighbors—together.

Within walking distance of LEWIS PARK are a major shopping center, several groceries, many fine restaurants, a large department store and a theatre. We are close enough to the Southern Illinois University to be convenient for students; we are far enough away to avoid the congestion of downtown.

The living units themselves are completely furnished right down the the dishwasher in each kitchen. Each apartment is carpeted, has central air conditioning and is pre-wired for cable TV and telephone.

We have included everything anyone would want in a home...plus more. We have designed in flexibility so that the apartments can satisfy anyone's needs. Students, couples and families—all will find LEWIS PARK APARTMENTS, suited to their tastes. If you're ready for something new; if you're ready to get back to living, give us a call at 457-6522. We'll be glad to show you all we've been talking about. You'll see for yourself the quality behind the words.

LEWIS PARK APARTMENTS
A NEW CONCEPT IN QUALITY LIVING
COME TO OUR OPEN HOUSE CELEBRATION MAY 5-15. BUSES WILL RUN FROM CAMPUS & DOWNTOWN TO LEWIS PARK ON MAY 5, 6, 7; 14, 15. BE SURE TO REGISTER FOR OUR OPEN HOUSE DRAWING.

Developed by the Valley Forge Corporation, 92 Luckie Street, Atlanta , Georgia

"Our Business is Providing Shelter for People."
By Sue Miller
Daily Egyptian, Champaign, Ill.

Ted Mack, speaking in an interview before Convocation Thursday, said he has no regrets about doing Geritol commercials.

The Geritol company, former sponsor of the Amateur Hour, has had recent problems with the Federal Trade Commission. (FTC) In one case, the courts upheld the FTC ruling that Geritol had used false and misleading advertising.

"I think the product is basically good and that the whole problem with the FTC is a matter of semantics," Mack said.

Mack, an interesting person on an informal level, did not seem to be generating this interest in his lecture, "What do the Young Viewers See?"

He told of his rise from fog farmer to the Amateur Hour and the audience with short anecdotes.

About 10 minutes into his talk, Mack finally began to speak on the subject he was billed to discuss.

He said he thought that the Federal Communications Commission (FCC), had put some controls on the "giant television industry."

"I think FCC censorship allows for what the public will accept. Sometimes they are too strict, the Amateur Hour was even censored sometimes, and we ran a close second to the sign off prayer as far as decency goes," he added.

However, Mack thought that the restrictions did not really affect advertising at all that much. "There are ways to get around the regulations and advertisers do," he said, and cited several cases of this.

In the interview Mack also spoke of his experiences on the Amateur Hour.

"I think the best thing the Amateur Hour offered was a chance for young talent to perform before millions of people and let the public decide if you've got what it takes," the King of talent scouts said.

"If I had it to do all over again—the orchestras and my show—I would do it exactly the same way," Mack said as he settled back in his dressing room chair.

He said that he saw that his show had not lost its popularity, but rather went off the air because of some unusual circumstances.

"We were not cancelled," Mack said firmly. "We just refused to take that 3:30 p.m. time slot on Sundays anymore. We ended up out-facing ourselves, since that was the only time period available."

Mack said there had been many high points on the Amateur Hour: "I think the best show was the Constitution Hall charity benefit show we held in Washington during the Truman administration."

He said his most frustrating experience on the Amateur Hour was when it was live. "One contestant got on the show and started to explain in great detail—how his wife was going to have her baby delivered. I just couldn't shut him up."

When asked if he ever felt like an opportunist living off the talents of others, Mack emphatically replied, "God, no."

He explained that while some talent operations do sign their talent and then manage their careers, his show did not. "We never felt like it was our business to manage the stars," he added.

Mack then took off his coat and cuff links, rolled up his sleeves and began to prepare to face the Convocation audience.

As he related himself, Mack admitted he was nervous. "I've always talked after dinners, but I've never spoken before college audiences like this before and I am a little nervous."

Mack said he hopes he wouldn't be doing only speaking engagements. "We're negotiating now to get the Amateur Hour back on the air as a syndicated show. If that doesn't happen, I don't plan to retire. I have to be doing something."

"I think the greatest moment in a performer's life is when he is up on that stage trying to prove himself in hopes of getting that big break." Mack began.

Today, the end of the talk Mack switched back to the Amateur Hour with an occasional note on his philosophy of life.

Amateur Hour's Mack has no Geritol regrets

Ted Mack, the man who gave millions of amateur performers their first chance on television, seems ready at home in this shot by Egyptian photographer John Lopriol. The effect was achieved by printing the picture of Mack through a horizontal line screen then superimposing it on a shot of a 1951 Zenith console television. Mack was Thursday's Convocation speaker.

Right at home

Ted Mack, the man who gave millions of amateur performers their first chance on television, seems ready at home in this shot by Egyptian photographer John Lopriol. The effect was achieved by printing the picture of Mack through a horizontal line screen then superimposing it on a shot of a 1951 Zenith console television. Mack was Thursday's Convocation speaker.

Win 22 days in Europe and a VW to bring home. Free.

We're having a contest. If you win we'll give you Holland - Switzerland - Germany tour to our Volkswagen Super Beetle. And France.

We'll give you twenty days, with deluxe and first class accommodations, and breakfast and dinner on us. We'll give you a Volkswagen Super Beetle for sightseeing. And afterward we'll bring it home as your souvenir. We'll give you all this free, if you do two things.

One, come in and test drive a new '72 Volkswagen. You'll discover it's ahead of its time.

And two, come up with the winning entry in the contest to name our new computer.
Familiar problems await new city manager

By Barry Cleveland
Daily Egyptian Staff Writer

Carbondale's new city manager comes to Southern Illinois with a background in a number of problem areas similar to those he will encounter here.

Carroll J. Fry, 37, hired Tuesday night to take over the position of Carbondale city manager in June, has held a similar position in Winona, Minn., since 1968.

Winona, population 28,000 (compared to Carbondale's estimated 25,000), is the home of three colleges and a state college.

In addition, the city of Okmulgee, Okla., where Fry served as city manager from 1968 to 1961, houses a branch of Oklahoma State University.

Fry has also served in coal mining and light manufacturing areas and has experience in the administration of Model Cities programs.

In an interview with the Daily Egyptian, Fry said Wednesday that he looks forward to working with the University in an effort to improve the Carbondale community.

An important factor in influencing his move to Carbondale is the salary hike from $13,000 to $25,000, which was the presence of SIU in the community, Fry said.

"Calling the University "very impressive school," Fry said he will welcome the help of its personnel in terms of research and technological skills.

"That's where the manpower is," Fry said. The city will have to come up with innovative ideas and then call upon University people for help in planning and development, he said.

Fry said his daughter's desire to enroll in the School of Journalism at SIU had some bearing on his decision to leave Minnesota, along with his wish to "come home" to the lower Midwest.

Fry is a native of Missouri and has spent most of the past 25 years in Kansas and Oklahoma.

One of the first priorities to be considered upon his arrival in Carbondale will be the city's financial state, he said.

"We'll take a good hard look at finances, decide what needs to be done and then move to help alleviate our problems," he said.

A long-range capital improvement program and industrial development effort will also be necessary, Fry said.

Fry will visit the city "probably some time in May" to look for housing and further familiarize himself with Carbondale.

A member of the citizens group which interviewed and rated the five finalists for the position praised both the selection process and the choice, while another reserved judgment on the situation.

Chester Williams, a consultant in the University's Department of Community Development and a former manager of two cities, termed Fry "a very dynamic person."

Williams said Fry's perception of the city's problems, his frankness in discussing them and his understanding of people and "people needs" impressed the selection committee.

The citizens group then presented its evaluation to the council, which had also interviewed the five and the council voted 5 to 4 to hire Fry.

Norvell Hayes, a representative of the Northeast Congress and a member of the citizens group, would say only that "Fry did impress me." Hayes said he would have no other comment until he reports to the northeast citizens group Thursday night.

Other members of the selection committee included Paul Conti, an SIU student; C. E. Peebles, representing the SIU administration; Don Meyer, Chamber of Commerce; Harold Hill, city employee; and Betty Evanson, Citizens Advisory Committee.

WALL STREET QUADRANGLES

$165.00 for Summer quarter

The Daily Egyptian doesn't have everything, but it does have the DAE Classifieds.
And that's really all you need to find a room for next year.
**Sports pros to speak at ‘Olympics’ dinner**

By University News Service

Professional sports personalities, Wayne Embry and Ziggy Zabrowski, will be guest speakers at the annual Special Olympics fund-raising banquet at 7 p.m. Saturday at SIU, said William Freeburg, SIU director of fund-raising events.

Embury is general manager of the world champions Milwaukee Bucks basketball team. Zabrowski is a former All American and Chicago Bears football player now with the Chicago department of human services.

Other guests at the banquet, Freeburg said, include Tom Meagher, president of the Mentally Retarded Olympian Programs, Inc., and Laurence Bernbe, president of American Youth, Inc.

Approximately 100 women were expected to attend the banquet.

**100 women asked to join Phi Lambda**

By Jan Tranchila
Daily Egyptian Staff Writer

Over 100 prospective women, presently enrolled at SIU, have been invited to join Phi Lambda Pi, a scholastic honorary fraternity, for their achievements at SIU.

To be eligible for membership, a woman must be presently enrolled, have been married at one time or be presently married and have a minimum overall grade point average of 4.0.

Julia Muller, dean of student services, said the women range in age from 18 to 45.

"Most of these women are returning to school after getting married and to maintain a 4.0 average or better is quite an achievement," she said. "These women usually take care of a family and a husband and go to school, so they are very busy."

Mrs. Muller said the fraternity holds quarterly meetings and invites guest speakers regularly. Other events include a potluck picnic for the wives and their families usually held in late spring or early summer.

**Correction**

The aviation technology program offered by SIU at the Southern Illinois Airport currently has an enrollment of 200 students, according to program head E. A. Dahlous.

An article in Thursday’s Daily Egyptian put the enrollment level at 176.

All you need is love and the D.E. Classifieds.
These three young men just made the discovery of a lifetime. The oldest is 34.

Remember when a young man could get ahead in business simply by growing old? It was a good system for those with a little talent and a lot of patience, but today’s technology moves too fast to wait for seniority.

At Kodak, our extensive involvement in basic research has made the need for fresh, young thinking more pressing than ever. So we hire the best new talent we possibly can. Then we do both of us a favor by turning them loose on real problems, and giving them the freedom and responsibility they need to solve them.

That’s how three Kodak scientists in their early thirties just made a breakthrough in liquid lasers, developing an organic dye laser with a continuous beam. Their discovery means more than just a new kind of laser. It means a whole range of new laser applications, in fields from medicine to communications.

It was the kind of discovery most men work a lifetime for. Yet these young men still have most of their lifetimes ahead of them.

Why do we give young men so much freedom and responsibility? Because it’s good business, and we’re in business to make a profit. But in furthering our own business interests, we also further society’s interests. And that’s good.

After all, our business depends on society. So we care what happens to it.

Kodak More than a business.
Offer to resume Viet talks made

PARIS (AP)—U.S. Ambassador William J. Porter disclosed Thursday that President Nixon made a secret offer April 1 to resume the Paris peace talks.

"I can reveal to you for the first time that after a thorough review of the situation President Nixon—on April 1—personally directed that a message be sent through a private channel to the other side stating our willingness to resume the Paris talks on April 13," Porter told reporters.

The only response to this overture came in the form of a mushrooming invasion of the Republic of South Vietnam by North Vietnamese troops.

Nixon broke off the talks March 23. The North Vietnamese and Viet Cong from that moment on demanded that new regular sessions be held.

Porter said of the Communists' demands: "the thought of meetings at gunpoint, which would also waste time, is even less acceptable." says.

Peacetime Army forcing retirements

FT. DIX, N.J. (AP)—The Army says it "RIF" and lots of old service men remember the last time it happened—when they traded oak leaf clusters and silver bars for the stripes of an enlisted man.

RIF stands for reduction in force, and it presently is being used forcing the Army's peacetime strength to less than one million.

This time, however, RIF is different than it was following the Korean War. After Korea, many Reserve officers on active duty who were RIFed were given the option of remaining in the service as enlisted men, mostly non-commissioned officers. This time they are being mustered out completely.

The Army's goal is a peacetime strength of 926,000 in 1972.

The RIF program has brought an air of uncertainty among the thousand Reserve officers at Ft. Dix. According to Lt. Col. William Bramblet, director of personnel, 50 officers, including 3 majors, already have been informed that their services no longer are required, and the records of several hundred others have been sent to an Army board of officers in Washington for review.

RIF. Bramblet explains, is across the board. A total of 1,687 enlisted men—all regular draftees—who were scheduled for release next June, were released in December and last month under a special early release program. This, he says, was in addition to those "normally" scheduled for release at that time.

Efficiency, he says, was the first criterion used as a basis for elimination.

According to Maj. G. F. Kallina, finance and accounting officer, Reserve officers who are eliminated under the RIF program are entitled to readjustment pay after five years of continuous military service.

Readjustment pay for officers with "clean" records is being computed on the basis of two months' salary for each year of service, with a maximum of two years' salary or $13,000, whichever is less, he says.

Officers with "substandard" records, Kallina points out, will get half a month's pay for each year of service, with a maximum of nine months' pay or $5,000, whichever is less.

Because they are being retired before they can attain "normal" retirement status, the question of pension doesn't come into play, Kallina says.

According to letters sent out by the Department of the Army, the Army will assist the men in retiring involuntarily "in every way possible to make your transition from military to civilian life."

Bramblet said enlisted men released early from service are eligible to participate in the post's Project Transition program, designed to teach civilian skills to persons who have military skills that are obsolete in the civilian world.

You, too, can find fame success and fortune. Elmer Morri was a nobody until he read the DE Classifieds, and look—here he is now.

The same can happen to you, don't hesitate, read the DE Classifieds today.

Neither he nor his spokesman would discuss the possibility of new private meetings.

Nixon's secret effort to get the talks moving as North Vietnamese troops began invading South Vietnam across the demilitarized zone may have been accompanied by conditions the Communist side held unacceptable.

This was indicated in a statement issued by three members of the French-Vietnamese Friendship Society. They saw the North Vietnamese Politburo member, Le Duc Tho, in Haasi April 7, a week after Nixon put his meeting proposal through the private channel.

The society members said Tho told them he was ready to "go immediately to Paris if the government of the United States was disposed to seriously resume the negotiations."

The Rev. Maurice Yoge, one of the society members, quoted Tho as saying "the United States says it wants peace, but its own kind of peace."
'Proficiency wizard' wants grade lowered

By Jau Tranetha
Daily Egyptian Staff Writer

Have you ever heard of anyone trying to get a grade lowered? Well, it's happening. Garry Seltzer, a sophomore majoring in government, just recently asked the math department to lower his grade on a proficiency test. The grade he received on it, a B, would lower his overall grade average, so he asked them to change it to a C, in which case, the hours would be credited to him but not the grade points.

This math proficiency brought Seltzer's total of proficiency hours up to 48, the maximum amount allowed by the University toward graduation.

Seltzer is one of many students utilizing the proficiency program at SIU. Robert McGrath, dean of admissions and records, said nearly 8,000 exams were given last year and 4,976 courses were passed by students without ever attending a class.

However, this figure does not mean that many different students took the tests. Nearly 800 students proficiencied two or three courses while another 250 passed four or five. And more than 200 students managed to proficiencied nine courses through six to 13 different courses.

Seltzer proficiencied nine courses and also received 14 hours credit from the College Level Entrance Program Examinations (CLEPE). Seltzer said he took all the exams because he wants to get out of college as fast as he can. Just as certain exams have prerequisites, Seltzer said he feels the University is a prerequisite to life.

"The sooner I get out, the happier I'll be," he said.

He plans to graduate in 1973, a year early. He is already out of General Studies and has passed tests in French, health, history, math, chemistry plus the 14 hours from CLEPE.

"I never would have gone this far with all these tests if Allen Langer didn't tell me about them and help me out," Seltzer said. Langer is director of the President Scholars program of which Seltzer is a member.

Seltzer plans to go to graduate school and receive a masters degree in ornithology. After that he plans to become a tropical bird raiser. He would like to raise such birds as parrots and cockatoos.

Seltzer, you will remember, was in the news last month when he was chosen as the Illinois winner in a potato chip recipe contest.

The winning recipe was made up by Seltzer and never tried out.

Nonacademic employees topic of talk

"The Role of Nonacademic Employees," will be the subject of a television panel discussion at 9 a.m. Monday on WSIL channel 2, Harrisburg.

Panelists on the program "The Hour" will be C. Eugene Poeblen and Donald Ward. Both are assistants to SIU president David Derge.

Jim Cox is moderator of the program.
Air taxi mail delivery steps-up service to Springfield, Rockford

By Rita Fung

First-class mail service between Carbondale and Springfield was stepped up Monday, midnight when air taxi mail delivery service went into operation. The service replaced the traditional highway post-office van which dated to 1960. Dispatch times for Carbondale mail, however, remain unchanged, said Hubert Goforth, Carbondale postmaster.

The air taxi originates at Paducah, Ky., and makes its initial stop in Carbondale, the sectional center of Southern Illinois. First-class mail from Carbondale and its 81 associate offices between the area south of DuQuoin and Cairo are collected and put on this dispatch flight. The twin-engine Beechcraft then heads for Springfield with its 2,200 lbs. of mail. In Springfield, the load is re-arranged and the plane moves north to Rockford and Madison, Wis.

Simultaneous with the flight leaving Paducah at midnight, another flight leaves Madison, Wis., carrying with it second-class first-class mail to Rockford, Springfield, Carbondale and Paducah.

Since the air taxi service is limited to first-class mail only, second, third and fourth-class mail is still trucked to centers in Chicago, Springfield or St. Louis, Goforth said.

"The air taxi service is actually an expanded overnight delivery service rather than an economy thing," Goforth explained. "The cost factor involved in using these air taxis instead of the mail vans is not known yet."

He added that the air taxi operation enables overnight mail to inter-change between regional centers in Illinois and the surrounding states—a service which would be impossible for the highway postal vans to accomplish.

Since the mail will now arrive at the regional centers its few hours earlier, more time can be allocated for sorting the mail and dispatching it to the associate offices, he said. Sorting of the mail, which was usually done by three post-office employees aboard the mail van en route to its destination, is now being done in the post offices of the regional centers when the raw mail arrives in a pouch.

The employees who used to work as the van crew are now transferred to other offices since no sorting is done on the plane. But the pilot and the copilot on the aircraft are contracted with the plane from Seno Aviation Co. in Malden, Mo., according to Goforth.

Besides the Paducah to Madison air taxi, mail from Carbondale is also channelled out by another flight from Southern Illinois Airport to Chicago Midway Airport nightly. The mail on this flight goes to Indiana, Ohio, Missouri, Michigan and Wisconsin.

The only highway mail van running in the state of Illinois at present is the East St. Louis—Chicago one. A date is not yet set to replace it by the air taxi services, Goforth said.

SGAC will present 3-D horror film, 'Eyes of Hell'

The Student Government Activities Council in association with New Line Cinema Corp. will present "Eyes of Hell," a 3-D horror film, at 7:30 p.m. Friday and Saturday in the Student Union Auditorium.

Admission to the film is $1.

According to a press release, the story deals with a psychiatrist who is given a ritual death mask by one of his patients before the patient commits suicide.

SIU will host prep music contest

Eleven high schools will participate in the Darrett 2 Illinois High School Association Music Organization Contest at SIU Saturday.

The contest is open to entering bands, choruses or both, according to Michael Hanes, contest manager.

Nine bands and 12 choruses—mixed vocal ensembles, some girls' choruses, and one male chorus—are expected to participate, Hanes said.

Women's Club may buy tickets to play premiere

SIU Women's Club members may now order tickets for the award-winning drama "Brothers" premiering at SIU April 30.

The play, which concerns the life of the late Martin Luther King, Jr., was chosen winner of a $5000 award after beating out 90 other entries in this year's play-writing contest conducted by SIU.

"Brothers" will be performed at 8 p.m. April 30 and also April 30, May 1 and May 6, with all performances scheduled for the University Theater in the Communications Building.

Women's Club members wishing to reserve seats for the premiere should send $2.25 per person to Anne Atwood, 619 Remicott, Carbondale, by Thursday. Checks should be made payable to Southern Players.

A reception will be held in the theater lounge following the initial performance.

Skolnick discusses dissent control schemes

By Monroe Walker
Daily East Side Writer

The government is unwilling and unable to deal with corruption and injustice, therefore the government must find new and creative methods to deal with the problem. The Chicago Civic Organization, the National Civic Foundation, and the Chicago Police Department are all working together to combat these issues.

Skolnick, a former justice official, was recently released from prison after serving three years for perjury. He is now working as a legal researcher in Chicago.

One of the ways to control dissent is through the use of federal money and organizations connected to federal money. Skolnick and others who have been involved in the Chicago Sun-Times case have been sent to prison for their involvement.

Skolnick, along with other officials, has been providing information to the Chicago Sun-Times, which has been suppressed due to the corruption of the government and its effects on the media. The government has been accused of using its power to suppress information.

Skolnick and others have been working to bring attention to the corruption of the government and its effects on the media. They have been working to bring attention to the corruption of the government and its effects on the media. They have been working to bring attention to the corruption of the government and its effects on the media.

Skolnick and others have been working to bring attention to the corruption of the government and its effects on the media. Jack Anderson -
He acts, he orates, he pulls no punches

By Sue Ball
Daily Egyptian Staff Writer

It isn't enough to say that Jack Anderson spoke to 500 people who turned out for the School of Journalism's annual Lovejoy Lecture at the Student Center Wednesday night. He commanded them. He oraged his listeners. He lectured and shook his finger at them. He delighted and amused them. He was a hit.

The Washington columnist, whose name has become a household word almost everywhere newspapers are read, delivered his talk with the gusto and righteous indignation of an evangelist. At times his voice boomed. At other times he spoke in a dramatic near-whisper, and the audience hushed to catch every word.

Anderson also demonstrated his ability to turn an Aneuracous phrase. "The Washington press corps is top heavy with ponies," Anderson observed, "initiating one another with pithy pronouncements." Poking at a joke at his own humaneness, Anderson said, "I am the father of nine kids." Muffled chuckles from the audience. "And we've bled them by every known means of birth control!

Anderson, whose presidential hero, if he has any, would be John Kennedy, said he doesn't know whether Kennedy's assassination was a one-man plot or a group effort. What about the Warren Commission's report? "The did the best they could," he said. "They came to the only conclusions they could come to based on the information they were given," which, he indicated, at times was.

Anderson spoke for an hour and his question and answer session ran nearly another hour. Perhaps the measure of the reception given him is that after his speech only a few left the ballrooms when Anderson said he would be glad to answer questions and would not be offended if none had to leave.

In relaxed interview with Daily Egyptian staffer Wednesday afternoon, Anderson demonstrated that his chatty onstage speaking manner is not really his personal bag. He criticized the Washington press corps for too often fretting with its sources and trying too hard to become part of the inner circle.

"They tend to be journalistic elder statesmen," he said. "They have this habit of ascending to the Olympian heights and making great pronouncements. They dislike getting down into the bushes. There's not enough grubbing for the news." Anderson said renewed efforts to crackdown on security leaks and step up government surveillance of him has had no great effect on his column.

"My sources are frightened because I know they're under surveillance," he said. "And I'm not getting any new sources during a time like this. But we're still getting the stories.

Aside from his formal sources in Washington, Anderson said he receives about 300 letters and 200 phone calls on news tips each day. Anderson has a staff of three investigative reporters, another man who only investigates and at present be two interns. The number of interns is usually increased to six or more during the summer.

In response to the FBI's surveillance of him, Anderson said he now has his interns tailing J. Edgar Hoover and counter-tailing the man assigned to tail Anderson. Anderson said he tells them to park in front of Hoover's house for hours and "read a newspaper conspicuously.

One twilight episode included riding through Hoover's garbage. The verdict? "Hoover obviously suffers from gas pains.

One of Anderson's aides, Les Whitten, is known to be his top man. Does Whitten hold a position comparable to that which Anderson held under Drew Pearson? "He's only been with me two years," Anderson smiled. "He's not quite reached that status yet. But it's a possibility.

Since his exposure concerning the Pakistan-Bangladesh and ITT controversies, subscribers to Anderson's column have increased. When Anderson inherited the column after Pearson's death, 600 newspapers ran the column. In January the number had increased to 700. Now it is 746.

One of the latest subscribers, Anderson reported, is the St. Louis Globe Democrat. The Globe's subscription followed a ribbing of the St. Louis papers' refusal to carry the column by Whitten at a regional convention of Sigma Delta Chi, the national journalism society.

Anderson's current notoriety has also resulted in a flood of speaking engagements. He used to do one a month but has stepped up his schedule to one a week now, he said.

While Anderson is away, Whitten handles the muckraking in Washington. Anderson said that so far he has been able to maintain contacts with his sources despite his heavy personal appearance activity.

Expressing an extreme irremissiveness for the glory of public office holders, Anderson said he usually has no trouble getting to sources at the White House.

"We have more clout than the regular press," he said. "They know that if we can't get through to them about a story, we'll write it anyway.

Who, me?

Columnist Jack Anderson sizes up his audience before taking over the lectern for the journalism school's annual Elijah Parish Lovejoy Lecture. His expression perhaps described by one student-as Bryce Rucker, journalism professor, was his reaction to being introduced by Mr. 'Who should be the Cosmopolitan magazine centerfold.' Below Anderson gives 'em hell in condemning government practices in over-classifying information which he said the people have a right to know.

Antitrust suits sought against TV networks

WASHINGTON (AP) — The Justice Department Thursday it intends to sue the major television networks for alleged antitrust violations. A spokesman for the Columbia Broadcasting System (CBS) said the government seeks to transform the networks into conduits for independently produced programming.

In a brief Washington announcement, the department said it had advised CBS, the National Broadcasting Company (NBC), the American Broadcasting Company (ABC) and Viacom International, Inc. of its intent. Viacom operates cable television systems and the syndicated program business formerly owned by CBS.

Department spokesman declined to discuss the suits until they are filed, possibly within a few days.

A CBS spokesman said Tuesday he was not aware of any such move by the government.

A CBS spokesman said he understood the Justice Department’s goal to be an arrangement whereby advertising agencies would produce programs or purchase them from independent producers, then purchase time from networks.

Presently networks control their own programming, buying or producing programs, scheduling them in specific time slots and then selling advertisers time within those programs for commercial announcements.

A CBS spokesman said he was opposed to networks having to produce programs and will have no effect on news operations.”

ABC said the suits dealt only with entertainment.

Both networks said the suits were expected to be filed Monday.

A CBS spokesman said it was impossible to tell whether or not the suits would have any effect on programming for the 1972-1973 season for which schedules have already been announced.

The department said ABC, CBS and Viacom has rejected out-of-court settlements on terms offered by the government. It said NBC had not responded to an offer.

ABC said the suit was “without merit.”

Hijacker interviewed in flight, surrender

LOS ANGELES (AP) — A Mexican man hijacked a Frontier Airlines flight from New Mexico to Los Angeles Thursday, kept the crew at gunpoint while he was interviewed on radio and television and then surrendered his gun to the pilot.

He was taken off the plane in custody of FBI agents. Authorities said there were no bullets in the gun.

He was identified by the Federal Aviation Administration in Washington as Ricardo Chavez-Orozco, 32, a Mexican national with a history of psychiatric problems. He told newsmen he is the father of eight.

He gave himself up about six hours after the plane was hijacked.

For more than two hours the hijacker, at his insistence to “tell my story,” had been interviewed by three radio and television newsmen at Los Angeles International Airport.

To a live audience of thousands around Los Angeles, he complained about injustices suffered by the poor.

“Thank God, ask God that I die, and I shall come back and repay them for all that they have done to the poor.”

He talked about injustices to Mexican-Americans, blacks, foreigners and other minorities. He described his life as a chef, pilot and mechanic in Mexico. He mentioned low wages and the deteriorating environment.

When the next student migration to Europe begins this summer be one of the people who discovers Milton and Spenser at Oxford instead of one of the people who discovers the vagaries of continental hitch-hiking. If your friendly, neighborhood professor would like to head up one of these BOAC, BSC programs for fun, profit and travel, he or she should contact Helen Warde, Youth Travel Executive, British Overseas Airways Corporation, 245 Park Avenue, New York, N.Y. 10017, Tel. (212) 983-8260, or clip the coupon below.

BOAC’s summer student programs. Nice work if you can get it.

Astronauts rehearse for moon trip Sunday

CAPE KENNEDY, Fla. (AP) — With the start of their moon journeys days away, the Apollo 16 astronauts spent Thursday taking a refresher course in geology and rehearsing some scientific tasks they will perform in lunar orbit.

The countdown was on schedule for Sunday’s blastoff at 11:34 p.m. EST, and the National Weather Service said the Saturn 5 booster rocket would get away in good weather, perhaps just ahead of afternoon thunderstorms.

During their 13 months of training for this flight, John W. Young, Charles M. Duke Jr. and Thomas K. Mattingly II devoted 35 to 40 percent of their time to geology, particularly in volcanic terrain.

This was to equip them for man’s first visit to the moon’s mountainous highlands, where their prime objective is to find evidence that the moon once was torn by volcanic eruptions, just like the earth, some billion years ago.

During their three trips outside the lunar lander, Young and Duke also hope to pick up samples of the moon’s primordial crust from the Descartes region. That region is believed to have largely escaped meteorites that heavily scarred the rest of the lunar surface.

Dr. Parrook el-Haz, a space agency geologist, had a two-hour session with the astronauts, brushing up on aspects of their training in which they studied meteorite-impact areas and volcanic fields in the western United States, Canada and Hawaii.

The weather forecast for launch time is partly cloudy skies, 25-mile-an-hour southwest winds and a temperature of 80.

If liftoff should be delayed until later in the day, it would have to be scheduled between scattered thunderstorms. The Saturn 5 can be launched as late as 3:52 p.m. If it is not, it would be delayed until May 14, because Sunday is the only day in April in which the moon is in favorable position.

Five papers win top prizes in area contest

The Collinsville Herald took two first place awards for general excellence feature weekly newspapers and overall news coverage in the annual Southern Illinois Editorial Association contest. The contest is held in conjunction with SIU-Journalism Week.

Also receiving two first place awards was the Champaign-Urbana News- Gazette for best advertising quality and news coverage for a daily paper.

First place in large weekly competition for overall news coverage was awarded to the O’Fallon Progress.

First place for best advertising quality for a daily newspaper went to the Springfield Sun.

The Southern Illinoisan was awarded first place for best use of pictures in a daily newspaper.

Antitrust suits sought against TV networks

WASHINGTON (AP) — The Justice Department announced Thursday it intends to sue the major television networks for alleged antitrust violations. A spokesman for the Columbia Broadcasting System (CBS) said the government seeks to transform the networks into conduits for independently produced programming.

First place in large weekly competition for overall news coverage was awarded to the O’Fallon Progress.

First place for best advertising quality for a daily newspaper went to the Springfield Sun.

The Southern Illinoisan was awarded first place for best use of pictures in a daily newspaper.
Analysis of an Angel

Atomic Number: 79
Symbol: W
Accepted Atomic Weight: 183

Physical Properties: Uncommonly stable; boils at nothing yet always warm; melts when properly treated; becomes very strong under tension.

Chemical Properties: Possesses special affinity for gold silver platinum and precious stone. Violent reaction if left alone known to turn green when placed next to a better looking specimen.

Uses: Highly ornamental, useful as a tonic in abstraction of low spirits and an equalizer in the distribution of wealth. Has a special quality for bringing pleasure by singing. Highly explosive in inexperienced hands.

Bread,' top record group set for April 21 performance at SIU

By Glen Amao
Daily Egyptian Staff Writer

There are many excellent tickets available in all price ranges for the Bread concert at 8 p.m. Friday, April 21, in the Arena.

Bread's latest album, "Baby I'm A - Want You," was recently cited rock band's lead vocals and guitar sections. Griffin also plays piano, while Gates handles bass. Mike Bates provides the beat and Larry Knechtel plays bass and keyboards.

The Bread concert will also feature England Dan and John Ford Coley, whose latest release on the A&M label is "New Jersey." Tickets are priced at $2.50, $3.50 and $4.50. SIU students can receive a $50 cent discount on the top two tickets by presenting a paid spring statement at the Student Center or Arena. Regular price tickets are also available at Penny's, Sav-Mart and Tempo.

House to an uncertain fate. The House passed, without debate last August a weaker resolution reaffirming the right of Congress to declare war and recognizing the authority of the president to move without prior consent of Congress in emergency situations.

Soccer team needs more travel funds

The SIU International Soccer Club, which has long sought to be recognized as an intercollegiate activity under the SIU Athletic Department, is having financial problems which could limit its play this season.

According to club business manager, Volker Rieser, the club's total fund for the 1972 spring season amounts to $542.

"With that money we're really cutting the season thin," said club president Bill Mehertens.

That figure would allow the club enough money for one single day trip and one overnight excursion.

Mehertens said that the booters have two games scheduled so far and a number of others pending confirmation. Most contests, he said will be played at home.

On May 5, Southern Illinois will participate in the University of Illinois Invitational in Champaign along with eight other teams from the area.

Then May 20 and 21 the club will play Springfield YMCA and Illinois State University in a swing throughout the Bloomington-Springfield area. The match with Springfield is confirmed. Mehertens said, but the ISU match is not.

Mehertens said the University of Alabama has notified the club that they'll be in Carbondale for a game April 28.

The club is waiting to hear from teams like the University of Missouri at Rolla and Indiana State.

Golfers to host triangular match

By Jim Braas
Daily Egyptian Sports Writer

Victories No. 2 and 3 loom as the big goal for the Sahki golf team this weekend.

But, as head coach Lynn Holder puts it, "It won't be easy."

Illinois State and Murray State are the opponents for a triangular straight-medal of match which starts at 10 a.m. Saturday at Benton Country Club.

"Both have excellent teams," Holder said, but the 36-hole coach at Southern expects a tougher challenge from the Redbirds.

Illinois State won the 17-school Mid-School Classic in Sewanee, Tenn., last weekend in a tournament cut short by inclement weather.

SIU held third and two strokes over the bunch in Sewanee.

"I thought that our boys did a fine job there," Holder said, "but there are a couple of guys on the team who are capable of doing much better than they have been.".......

The two were Vito Sapiuto and Jay Wilkinson, presently fourth and fifth, respectively, in Southern's lineup. Sapiuto posted the best average of the 1871 squad (75.5) while Wilkinson was a little behind at 77.4 (strokes per 18 holes).

"If they get going for us," Holder said, "we'll be tough to beat."

Sapiuto, a senior from Springfield, and Wilkinson, sophomore from Carbondale, shot respective scores of 39 and 40 in last weekend's nine-hole tournament. Both were preceded by four other teammates in which the top four scores counted towards the team score.

Top scorers in the meet were Mike Cumb of Austin Peay and Illinois State's D.A. Whitting with scores of 38 and 36, respectively.

"I was proud of the way we played," Holder said, "but the weather was not the only problem."

The meet was held in heavy rain and mud that slowed the players to a crawl. The 36-hole meet was cut short to 18 holes after bad weather forced officials to stop the meet.

Next week, Southern State hosting the tourney.

The number of runs scored in the Illinois State-Murray State triangular meet was high because the weather was bad and Felton Holmes got a hole-in-one on the 14th hole.

Kelley, the Illinois State captain, said, "It's been a tough year."

"I expected better," he said. "Our team has had to work hard this year."

The Indians had to absorb his first defeat in nine starts.

After finishing in second place in the spring season, Kelley said, "we'll be tough to beat this year."

"I'm looking forward to the meet," he said. "I hope we can win."

Kelley's opponent was Junior Thompson from Murray State.

"I thought I could win," Thompson said. "But I'm not sure."

"I think I'll have a good chance," Kelley said. "I've been working hard this year."

By The Associated Press

The baseball strike ended in its 13th day Thursday when the owners and players agreed to start the 1972 season on Saturday without rescheduling any of the 86 games postponed by the player-walkout.

The end of the strike came after day-long discussions between the owners meeting in Chicago, and the Players' Association, in New York, that resulted in a three-part proposal made by the owners and accepted by the players.

The proposal was that the season start on Saturday, none of the postponed games be replayed and no money be paid the players for the games postponed during the first general strike in the 108-year history of the sport.

Announcement of the settlement was made simultaneously in New York by Marvin Miller, executive director of the players' association, and, in Chicago, by Commissioner Bowie Kuhn.

Frazier immediately hailed it as a triumph for the players.

"Clearly the players have triumphed," said Miller. "They have stood together. Miller also insisted that "this could have been settled last Sunday," emphasizing that there never was any "back pay" issue. It all came about because the owners wanted to reschedule all the games. The players never asked for back pay.

"I'm delighted to have this over," said Kuhn. "I hope we've all learned a lesson. I will work with people in baseball for procedures to prevent this sort of thing in the future. Nobody will make money other than the players, the clubs or the fans.

"It's inevitable that there will be hard feelings," Kuhn acknowledged. "My job is to hold them to a minimum. Our bonus is to get them to sit down with the players. Who won? Nobody. The players suffered. The clubs suffered.

Because of the fact that games postponed will not be rescheduled, this season will now range from 153 games for some teams to 156 games for oil or gas teams. Division winners will be determined on the basis of won-lost percentage.

Under terms of the overall settlement, the owners also will contribute $500,000 to the players' pension fund and $400,000 to the health care fund in addition to the annual $4.4 million contribution they already had been making.

Losses involved for the park concerned are difficult to estimate, b. biggest guesses place the owners' losses over $5 million from gate receipts, parking, concessions, etc., and one canceled game.

The compromise that led to the end of the strike actually was made among the owners in Chicago, where the National League bowed to the American League and agreed to play a schedule. Previously NL owners had been adamant about rescheduling the postponed games.

Saturday's schedule lists the following games:

American League

Minneapolis at Oakland

Texas at California, night

Chicago at Kansas City

Boston at Detroit

Milwaukee at Cleveland

New York at Baltimore

National League

Pittsburgh at New York

Montreal at St. Louis

Atlanta at Atlanta

San Francisco at Houston

Philadelphia at Cincinnati

Los Angeles at Cincinnati.

Ms. Ump is in

COLUMBUS, Ohio (AP) — The National Association of Professional Baseball Leagues approved Thursday a contract allowing umpires to become admission agents in the New-York-Pennsylvania baseball league.

Association President Henry J. Peters announced the approval.

Ombudsman may be new

freshman football coach

Southern Illinois' vacant freshman football coach position is to be filled by University ombudsman Isaac Brigham, a former St. Louis first baseman.

The position was vacated by Bob Ledbetter, who resigned last quarter to become head football coach at Norfolk State College in Virginia.

Brigham will be selected om­ budsman last year after being a s assistant at University Services for Carbondale, the sport is not foreign to the 1969 graduate.

He is a former Dallas Cowboys and Atlanta Falcons professional football player and the Florida native played for Southern from 1964 to 1967 as offensive guard.

Brigham couldn't be reached for comment when asked if an SIU athletic official said no official decision has been made. However, unconfirmed reports say the 28-year-old Brigham is the prime candidate for the post.

Besides coaching the Saluki freshmen, he probably would be heavily in recruiting as did Ledbetter.

The "freshman" team in September covered. He said sophomore since a rule by the NCAA now allows fresh­ men to play a year in college.

Brigham received his bachelor's degree in education and is working on his master's degree in recreation which he expects to have by September.

He and his wife, Patricia, have three children.

Sycamores

host netters

Off to its best start ever, the 66th Southern Illinois tennis team is in Terre Haute, Ind., Friday for two days of competition.

SIU will face Indiana State today for the first of two meetings this season. The Salukis and Sycamores will meet again in May in the Midwest Conference.

On Saturday, Notre Dame visits the Salukis at the Valley city for an engagement with SIU. The Irish currently boast a 5-1 record.

Canadianis lose

MONTREAL (AP) — Billy Fairburn fired two goals and then set up Walt Tkaczuk for the winner 29 seconds into overtime Saturday to give the Canadian national hockey team a 4-2 victory over the Rangers defeated Montreal, 3-2, Thursday night, eliminating the defending champion Canadian national television game in the sixth game of their National Hockey League Stanley Cup playoffs.

The victory moved the Rangers into the Ca, semifinal round against Chicago. Go ahead, scheduled for Sunday in Chicago.

Tkaczuk's winning goal came on a 40-foot slap shot that just made it inside the left goal post past the range of goalie Ken Dryden.

Baseballers to host

St. Louis Saturday

By Byron Nelson

Daily Egyptian Sports Writer

Judging from pre-game statistics, it looks like more "fun and games" for the Saluki baseball team beginning at noon Saturday at the SIU diamond.

That's when St. Louis University opens its season at Saluki's 14-game streak, which includes four doubleheaders in nine days.

St. Louis's doubleheader could turn out to be another "easy win" for Southern, who has overpowered opponents in seven of the nine home games so far this spring. In those seven contests SIU outscored its foes, 72-7.

Evidence statistical to back the easy win claim is as follows:

- St. Louis is ranked eighth in the NCAA while the Billikens are not ranked.
- The Salukis sport a 15-2 record while their St. Louis foe is 6-7.
- Last season, St. Louis finished with an 11-28 mark and in the lower division of the Missouri Valley Conference while SIU was second in the College World Series.
- The Bills tentative starting pitchers are Rich Kefer (11-3) and Steve Walnut (2-1) who will face Scott Waldemate (2-1) and Ricky Ware (3-4).
- The most productive St. Louis hitter has been leftfielder Butch Brown whose average is around .320 Accor­ ding to St. Louis athletic officials, he's the only hitter over the .300 mark.
- The Salukis have scored 306 runs in 38 games, while St. Louis's total is 287. The most prolific hitters in the game is Southern Illinois' vacant freshman starting pitcher Rich Kefer.
- St. Louis leads the pack with 287 followed closely by Joe Walis with 283. Mike Eden is next with 285 and only a point behind him Ken Kefer and Jeff Mitchell is hitting .350, and Dan Radison has a .302 average, with six homers and 28 runs batted in.
- Despite the nearly overwhelming odds, Salukis coach Jim Calhoun is not overlooking St. Louis. Calhoun is setting his team's 15-2 record.
- St. Louis has had its share of defea­ ture, losses to University of Missouri at Columbia, Creighton, Nor­ thwestern, University of Illinois and University of Missouri at St. Louis.
- Another "minus" factor for Jones is that two of his best hitters are still below 225. Former cleanup batter Larry Calhetti will be moved down the order, according to Jones, because of his stature.
- "It might take some of the pressure off him," Jones said. "I'm still con­ fident we'll be okay, that we will come around with his hitting.
- The "other problem" is shortstop Steve Gogan who's swinging at a .194 pace, despite a two-for-three performance against the University of Illinois.
- Despite these "problems," the Salukis should be able to compensate with speed. So far, they've stolen 39 bases in 19 games, and Thomas leads the team with 10.
- "We've won several games already because of speed," Jones explained. "And I expect we'll have to rely on it more as the season progresses.
- If the Salukis sweep Saturday's doubleheader, it will be their fifth straight win over St. Louis. The series stands 16-6 in favor of SIU.
- A foe from a small college ranks, MacMurray from Jacksonville, will be in for a doubleheader Sunday. Steve Randal (1-0) and Dan Horn (6-0) will pitch for SIU.

Knicks win in playoffs

BOSTON (AP) — The New York Knicks, led by guard (and former Saluki) Walt Frazier, opened up a 26-17 lead after the first quarter as they hit on 13 of 23 shots from the floor while Boston was ice cold, shooting 29 percent.

The Knicks had opened up a 26-17 lead after the first quarter as they hit on 13 of 23 shots from the floor while Boston was ice cold, shooting 29 percent.
