SIUC recognizes 1,200 for grades

By Christine Leniger
Administration Writer

SIUC student Kimberly Talley walked away Sunday with an achievement award and honors recognition during campus Honors Day ceremonies.

But it was her parents whom the senior gave the credit for her academic successes.

Talley, a senior in zoology from Carterville, said her parents have not been strict concerning her education.

"Most people I know think parents have to be strict to get their kids to achieve in school, but my parents have let me do it on my own," Talley said. "My parents have been supportive but never overbearing.

Talley was recognized for her scholastic accomplishments along with 1,399 other SIUC students Sunday during campus Honors Day ceremonies.

Honors Day recognition goes to students with grade point averages of at least 3.5 on a 4.0 scale for all college work.

Each college within the University sponsored its own ceremony where students, parents, faculty and administrative personnel honored their scholars.

Talley received the Charles L. Foote Achievement Award in zoology and recognition for being a student in the University Honors Program.

Her father, Bruce Talley, said "I especially am proud of his daughter, Kimberly.

"Kim is a real self-starter," Talley's father said. "She has not needed supervision since day one of college, so I'm especially proud of her and I support her in her education.

Talley, who also is a top five senior, plans to graduate in May and begin veterinarian school in August at the University of Illinois.

Many of the students awarded for their grade point averages found the effort put into the grades does pay off.

Tracy Tinsley, a junior in animal science from Poplar Bluff, said she is honored to have won honors because she is a transfer student from Southeast Missouri State.

Bill would eliminate PACs

Poshard proposes law to limit amount people can give to campaigns

By Todd Welvaert
Politics Writer

A local congressman has introduced a bill to eliminate political action committees and to place a limit on how much an individual may contribute to campaigns as a response to a House bill that takes a less aggressive stand on the same issue.

U.S. Rep. Glenn Poshard, D-Carterville, and U.S. Rep. Ron Mazzoli, D-Kentucky, have sponsored a bill to eliminate PAC contributions altogether and to place a cap of $500 to $1,000 on the amount any individual may contribute.

The House bill, which passed last week on a 290-165 vote, limits PAC contributions at $200,000, sets up a voluntary campaign spending limits at $900,000 and provides incentives, such as lower postal rates and matching funds, for politicians who abide by the spending limit.

Poshard, who has refused PAC money since 1984, called the House bill "watered down.

"(My bill) answers the battle cry for reform in Congress like nothing else," Poshard said in a press release. "We can eliminate perks and adjust some of the routines and practices, which we should, but can do nothing more important than cutting out the influence of special interest campaigns.

Poshard said he supported the House spending limits but thinks the spending limit still is too high.

Both Representatives attacked the process of mass mailings of newsletters, called franking, outside a member's district and called for the elimination of a politician's

Ashes from Cerro Negro volcano in Nicaragua threaten coffee crops

MANAGUA, Nicaragua (UPI) — The spread of ash and debris from a volcanic eruption last week could cause serious damage to two of Nicaragua's most important crops, officials said Sunday.

A huge cloud of ash—spewed by the Cerro Negro volcano was drifting toward the northern provinces of Esteli and Jinotega, the principal coffee growing region, and could damage the country's coffee crop, said Alejo Moreno of the Nicaraguan Meteorology Department.

Moreno said the ashes could have a "catastrophic" effect on the coffee harvest. Coffee is one of Nicaragua's leading exports.

Jaime Incer, head of the government's Environmental Institute, said the ashes also could damage the cotton crop, the principal crop grown in the region near the city of Leon, about 56 miles north of Managua.

Focusing on the iris

Emma McAdams, left, and Cora DeWitt from Carbondale, look at a Louisiana iris for sale at the farmers' market. The farmers' market, located at Emerald Lane and Route 13, is open from 7 a.m. until noon on Saturdays and offers plants, vegetables, crafts and baked goods from local producers.

Clinton leads first round in Virginia caucuses

By United Press International

Democratic front-runner Bill Clinton took a strong lead over Jerry Brown in the first round of Virginia's presidential caucuses while President Bush played golf Sunday as the race for the White House dwindled along.

The first round of Virginia's Democratic caucuses was Saturday and the next round is Monday. The next primary in the country will not be until April 28 in Pennsylvania.

Bush, fending off a weak challenge by conservative commentator Pat Buchanan, spent Sunday on the links in suburban Washington.

A Time magazine and Cable News Network poll, released Saturday, shows Clinton trailing Bush 43 percent to 33 percent, indicating an erosion in support for the Arkansas governor. A similar survey in mid-March had the governor and the president running neck and neck at 43 percent.

To date, Clinton is leading the contest for the Democratic nomination.

Clinton, whose doctors advised him to rest his taxed vocal cords, scuttled campaign stops in Virginia last week, yet still managed to take a lead in the first round of the state's local caucuses Saturday. The second round is Monday.

Democratic Party spokesman Harry Carver explained how the caucuses worked.

Seve 5,500 delegates were to be elected Saturday and Monday to go to congressional district conventions next month and the state Democratic Convention in Roanoke June 5 through 6. At the district and state conventions, 78 delegates will be elected to be sent to the Democratic National Convention in New York City in July—all pledged to one candidate.

### Sports

#### Salukis senior first baseman Darrin Barton slide into second in an attempt to break up a double play. Barton failed to break up the play, and SIU went on to lose Game one of a doubleheader against Bradley Braves Saturday at Abe Martin Field.

#### SIUC loses 6-3 to MVC Drake in dual match

By Thomas Gibson

Sports Writer

The SIUC men's tennis team faced the toughest competition it has seen all season. The netters were edged by Missouri Valley Conference rival Drake University, 6-3, at the University Courts Saturday.

Coach Dick LeFevere said Drake is the best team the netters have faced all year.

No. 1 singles man Junior Jay Merchant was defeated by Donny Isueak 7-6, 6-4.

Isueak was a semifinalist in the NCAA Tournament in 1991 was ranked third in the nation at that time.

No. 2 singles man junior Tim Demouin lost to Johan Hesser 7-5, 6-4.

"Tim is a good player, but he doesn't play well in windy weather," LeFevere said.

#### Baseball team still struggles against Missouri Valley foes

By Scott Wuerz

Sports Writer

The Saluki avoided a sweep by Missouri Valley Conference foe Bradley University, winning the third game of a three-game series Sunday at Abe Martin Field.

Dawgs have struggled against MVC opposition this season, posting a 3-6 record in Valley games and prompting head coach Sam Riggelman to be concerned about his team's post season chances.

"I'm not at all pleased with the fact that we've lost the three conference series," he said. "Only six of the eight MVC teams got to compete in the tournament, so we're going to have to do better if we want to compete in the post season.

The Salukis made little progress toward their goal over the weekend, splitting two out of the 3-5 losses in a double headed played Saturday. They were able to turn things around in the finale on the strength of an eight-inning, two-run outing from senior Mike Van Gilder.

The Dawgs scored five runs to take the lead in the third, then coasted to victory as Van Gilder struck out four and walked one, earning his fourth victory of the season.

In the fifth Saluki center fielder Leland Macon lead off with a double down the right field line. Macon scored on consecutive singles by shortstop Clint Smothers and second baseman Pete Schlosser, then with two outs catcher Derek Shelton and right fielder Scott Foster singles, and were plated on a double from designated hitter Ed Jankie.

Van Gilder held the Braves scoreless through the fifth and allowed only singles run in the fifth inning. He covered 7.0 against MVC opponents with a 1.59 earned run average, but has a

#### Salukis cut five-game losing streak

By Norma Wilke

Sports Writer

Opposing pitchers gave the SIU softball team trouble at the mound and at the plate in Gateway action.

The Salukis dropped two games in a doubleheader at Indiana State 2-1 and 3-1 Friday. On Saturday, SIU lost their first game at Illinois State 1-0 but came back to win the next game 7-4 to break a five-game losing streak.

The first game against Indiana State was a battle between pitchers Angie Mick and Debbie Styx. The game stayed tied at 1-1 until the ninth inning when Styx singled in Courtney Sigler who had doubled with two outs.

Indiana State coach Donna Bonebrake said Styx had only mistake on the day. She gave up a leadoff homerun by soprornome catcher Laurie Wilson in the second inning to give the Salukis their only run.

The Salukos scored one in the sixth to tie the game. Styx improved to 7-2 on the year giving up four hits and tallying 15 strikeouts. Mick gave up seven hits and had six strikeouts.

Coach Key Brechtel said the Salukis had some tough losses.

"There were great pitching performances in the first games against Illinois and Indiana," she said. "I just proved what I've been saying all along that the Gateway is going to be a tight league this season and all we have to do is make the right move at the right time."

#### Couples wins Masters, beats Floyd by two shots

AUGUSTA, Ga. (UPI) — Four Couples confirmed his status as golf's leading player Sunday by conquering the pressure that filled his rivals and winning the Masters, the first major championship of a career that suddenly seems limitless.

Couples beat his good friend and mentor Raymond Floyd by two shots and finished off a three-month stretch in which he has won $1,000,162.

Five players have managed to win $1 million over the course of a single year on the American tour and Couples has now done so in a mere 91 days. The Masters was Couples with victory worldwide since last June and since then he has finished sixth or better in 14 of his 18 tournaments.

GADAFI: BOMBING SUSPECTS CAN SURRENDER — Libyan leader Col. Muammar Gaddafi said Sunday two Libyan suspects in the bombing of a Pan Am jet can surrender themselves to a neutral nation, according to JANA, the official Libyan news agency. Gaddafi also announced April 14 "mourning day" in memory of the 1986 attack by U.S. warplanes on the north African country. He reiterated his "clear and legal position" regarding the downing of an airliner over Scotland.

NICARAGUANS TO BEGIN PAYING TUTUION — When classes begin at Nicaragua's public universities next week, the government received a quick lesson in economics: Each had to fork out a tuition fee of up to $2. The payment plan is part of a broad package of school reforms initiated by President Violeta Chamorro, whose election two years ago ended a decade of Sandinista rule in the Central American nation. Other measures, are meant to "de-politicize" education.

FRANCE RELIES ON ATOM BOMB FOR DEFENSE — France's President Francois Mitterrand said Sunday France continues to rely on the atomic bomb as the cornerstone of its national defense despite the suspension of nuclear tests in the South Pacific until the end of the year. Speaking in a television interview, Mitterrand urged his fellow European nations to renounce other nuclear powers to seize the opportunities created by the downfall of communism to devise a moratorium on further testing.

FIGHTING EUPHORUS IN BOSNIA DESPITE TRUCE — A European Community mediator broke a cease-fire accord Saturday between the ethnic leaders of Bosnia-Hercegovina but now fighting flared and the Serb-dominated Yugoslav army announced new territorial gains in clashes with Croatian forces. The truce was to take effect at midnight. As the accord was announced, Sarajevo Television reported new Serbian attacks in Foca, Vigadap and Capljina.

nation

CLINTON SLIPS IN POLL AGAINST BUSH — Virginia began its Democratic presidential caucuses Saturday, while Bill Clinton dipped in a new poll pitting him against President George Bush. The former governor affirmed he will stay in the race for the White House through his party's national convention. Possibilitag party candidate Ross Perot, the Texas billionaire, emerged clean but miffed from a grilling by an assembled audience of journalists in Washington.

HELMSLEY SAYS AYAN GROUP SENT THREAT — Host Queen Leona Helmsley, fighting to avoid a prison term due to start this month, said the Aryan Brotherhood sent her a cease-fire message to "de-politicize" the Serb minority. "I received a letter, signed Aryan Brotherhood," she said in a new television interview. U.S. Attorney General Richard Thornburgh reiterated his belief in a cease-fire agreement. "There is no fighting in the park on the streets of New York," he said. "We have made our decision to prosecute these hate groups..." Thornburgh said he now believed the Serbs were "outsmarting" the U.S. government.

CATERPILLAR, UNION TO MEET MEDIATION — A warhorse who can smeal battle has put himself in the midst of a fight between two well-armed opponents—the United Auto Workers union and Caterpillar Inc., the world's largest heavy equipment maker. Negotiators for both sides in the strike that has resulted in unfair labor charges readied for a Monday meeting in Chicago of Caterpillar's western suburbs with Bernar DeLury, head of the Federal Mediation and Conciliation Service.

GROUP PROPOSES TATTOO REGULATION — The House of Delegates of the Illinois State Medical Society Sunday adopted resolutions calling for regulation of tattoo parlors and electrolysis practitioners. The policy-making body passed a series of resolutions during the society's annual convention. The group dealt with wide range of public health issues, including drug use and requiring informed consent will help avoid health problems.

New fire chief brings experience of 22 years to job

By Teri Lynn Carlock
City Writer

It is late fall in the year 1970, and a house catches on fire in rural Carbondale. Clifford Manis is riding on the back of a pumper fire truck, leaning from the cold air hitting against his face. He is heading to his first fire. Without any previous training to help him cope with the heart-pounding experience, Manis was thinking one thing:

"What the devil have I gotten myself into?"

Twenty-two years later, Manis said becoming a fireman was a wise career choice. "It's the best move I ever made in my life," he said. "I absolutely love it— I've worked hard and devoted my life to it."

Manis will become Carbondale's new fire chief when Everett Rushing, the fire chief since 1987, retires May 15.

Before joining the fire department, Manis sold photocopies at Brunner Supply Co. in Carbondale from 1963 to 1970.

Manis became interested in being a fireman after dropping by the Carbondale Fire Station to see his brother, who was a fireman.

"They all seemed so content at what they were doing and I got some exposure to it," he said. "People in the fire service as a whole tend to be tightly-knit and compassionate people."

Manis first volunteered for the department, then decided to take the entrance exam, which included a physical and an interview.

"We didn't have the training we do today, so I went right on the shift and became a firefighter," he said. "I had strictly on-the-job training.

The worst part of his job is witnessing the fatalities, Manis said.

"In the majority of times, the fatalities didn't have to happen," he said. "A lot of it is carelessness— leaving food unattended while cooking. I've dealt with matches and cigarettes left burning."

The fireman is required to install smoke detectors in their homes to lower the number of injuries and deaths, Manis said.

"We have a quicker response because trucks are called in sooner and it saves a lot of lives," he said. "That's an advantage we don't have anywhere else."

Clifford Manis, a fireman in Carbondale for 22 years, will take over his new position as fire chief on May 15.

Anson investigators work at three levels in the department with five trained officers. The investigators suspect arson to be blame for quite a few fires in Carbondale, Manis said.

"There is a particular way things burn—it's different from any other crime scene," he said. "If the fire doesn't burn in that pattern, then that's the first indication it probably wasn't an accident."

An extensive investigation, including a reconstruction of the scene, is performed after a fire, Manis said.

"We utilize the forensic lab to track down everything and determine the cause," he said.

As chief, Manis said he will have more control over the direction the department will travel in the future.

"I believe I'm progressive, and I want to make our department more visible to the community," he said. "We will get more active in daily programs with the public and inform citizens of all our functions."

Manis, 47, is a 1962 graduate of Carbondale Community High School. He also attended SIUC. He and his wife, Nancy, have four children—Julie, Francine, Mike and Tom.
Spring cleaning can clear USG’s image

U.S. CITIZENS ARE QUESTIONING their leaders’ motives regularly these days. Granted, it is an election year, but voter distrust of politicians seems to be at an all-time high. Universities are microcosms of the nation, and at SIU, student voters have new reasons to doubt their leaders’ credibility.

The victories won by Undergraduate Student Government this semester seem overshadowed by setbacks. USG and the Carbondale City Council put their heads together to head off stringent anti-Springfest ordinances, much to the joy of student party hounds. But even as the council’s “no vote” was announced, the date for new USG elections was in dispute after constitutional guidelines failed to keep the election process on track.

IN THE SAME PERIOD, USG WENT TO BAT for students’ automotive freedoms with the ad hoc parking committee and registered a strong protest against tuition increases, but rival active-facilities activities funds to distribute to registered student organizations.

Perhaps USG needs a temporary guiding hand. SIU President John Guyon has said he will not interfere with USG, but an independent commission to study the problems plaguing student government might be in order. Better yet, the administration could be bypassed altogether, and students without previous ties to USG could compete for commission slots in the April 29 election.

SUCH A COMMISSION WOULD NOT BE an Inquisition-style tribunal to punish wrongdoing, but a commission designed to study USG and advise it on how to best solve its own problems. Sometimes difficulties that are obvious from the outside are not so visible to those in office.

At the very least, USG has a problem of public perception. By consenting to recognize such a commission, USG would demonstrate that it cares about its own efficiency, and is not afraid to take public steps to improve that efficiency.

Physics pros say no biases in TA awards

In the past week, the DE has published letters by students that are not to be subscribed to by one of our own colleagues, alleging a bias against Americans. We wish to set the record straight.

The Department of Physics has for years held an “affirmative action” policy for Americans in the awarding of teaching assistantships.

We go to great lengths to award assistantships to every American applicant whose record indicates that he or she has the ability to successfully complete a graduate program. When an American is turned down for a TA post, it is usually because the Graduate School has refused the person admission. We are sorry, Mr. Buyer, but these good Americans would love to work for you, but you would like as teachers simply do not exist in sufficient numbers.

As for our colleague who wrote that he has been treated unfairly, we are definitely aware of no national biases, pro or con, in the treatment of any faculty members.—Walter C. Henneberger and Robert N. Zitter, professors of physics.

Economic evils

SIU contributes to domestic losses

As an employee of Southern Illinois University, I am disgusted and outraged that the Small Business Incubator would even consider having a seminar on starting a business in the Pacific Rim nations.

This is exactly the reason why the United States is losing its economic base in this country. Companies would rather ship their holdings overseas, lock, stock, and barrel than pay workers a decent working wage. Management would rather pay the workers slave labor wages and a bowl of rice a day, than reap all the profits.

When businesses and plants close in the United States, people are unemployed, so it doesn’t matter how cheaply you can make merchandise overseas. If people don’t have jobs, they’re not going to be able to buy the product anyway.

Thanks to the Reagan and Bush administrations and organizations like the Agency for International Development, the Overseas Private Investment Corporation and the Council on Foreign Relations, our government is selling American business down the river as fast as they can.

General Motors was recently quoted as saying it was downsizing one of its Michigan plants to promote efficiency. They downsized it, all right—straight to Mexico.

If the American people don’t stand up and say enough is enough and stop being walked over by foreign governments and lobbyists, we never get to stop this economic downward spiral towards disaster.—C. Dennis Amsden, Payroll Clerk II, Student Payroll.

Pardon my TA: French grads’ teaching fine

It seems to me that all the French 101 and 102 professors are doing what is to be expected. Their students are wonderful maids in presenting the materials required by the course.

Learning an additional one or two languages is not a waste of time.

One will never realize this until they are in a foreign country.

I am doing French 12B this semester, and I have a very talented instructor who is always there to lend her students a helping hand. And I also appreciate her good teaching and fine grades.

I would like to inform the French Department to keep up the good work and stay healthy all the time.—Alvin Tam, senior.

Reader misses the big picture

I would like to reply to Mr. West’s April 10 letter. I know people enjoy illustrated magazines. I do too. I’m not crazy about pornography, but I would not ban its sale. Pornography may or may not cause violence against women. I definitely do not subscribe to it.

I also enjoy literature. Most of my books have few pictures compared to Playboy and Penthouse. My Bible has little or no illustrations—probably pretty boring to you, Mr. West. You were pretty inventive with your vision of the Bible. Did Playboy or Penthouse print your version? Anyone, that cares about the Bible probably looked up the scripture you presented and was pretty puzzled by your misinterpretations. The ignorant probably even believed you. Why don’t you check out Revelations (22:19), King James version. Check out a Bible at the library and re-read the scripture you presented. Maybe your Bible is messed up. Maybe you spend too much time looking at pictures.—Thomas Andersen, junior, electronics management.
CONGRESS TO CHANGE THE WAY IT OPERATES

The U.S. Senate will vote on the House bill later this month, but Poshawk said President Bush likely will veto the measure.

Barb... a Brown, SIUC political science professor, said although there has been no clear link between PAC contributions and the way legislators vote, good measures should be taken to amount the contributions.

"There is no hard evidence that tracks legislators' votes and when their contributions come from," Brown said. "It is apparent in tracking votes that contributors have greater access to legislators and the legislators may base votes on the information they have from the contributors.

Brown said the link between contributions and access to legislators should be proved to system influences votes.

"A legislative is conservative and a conservative PAC gives the legislator campaign funds and later changes on a conservative issue, they might well have voted conservative regardless of the contribution," she said.

Most of the students also should be acknowledged because they travel from far distances to ensure their children receive these in few human yards.

Nancy Hunter-Pei, director of student affairs, said she coordinated the reception that allowed students and parents to meet with administrative and faculty personnel on a more personal level.

PACS, from page 1

"I believe the taxpayers could be saved millions if just one person with the City Council does not put some of the people out of business," Poshawk said in a news release.

"The production cost and the mailing cost all the cost the people money.

Poshawk introduced a bill to abolish the PACs, but no detailed information was given about the reform of the franking privilege, which he said is a much greater informal advantage that the PACs which are currently used under all circumstances.

"A combination of campaign and franking reforms would solve a lot of what the taxpayers pay for," Poshawk said. "I understand why people want to Congress to change the way it operates, and I support that, but I hope we can go to a core of the issue and make real changes on very substantive issues.

The U.S. Senate will vote on the House bill later this month, but Poshawk said President Bush likely will veto the measure.

The Senate bill, which was scheduled to go to the House later this month, will include provisions that would limit contributions and the way legislators vote, good measures should be taken to amount the contributions.

Volcanic eruptions continued in offshore, which prevented the tourists from the shoreline the mountain top. The operators said the flight was under way Monday evening after the last intakable explosion to blast open the opening. The volcano remained hot and liquid and erupted from the volcano in order to cool it and slow its progress.

They said the operation was delayed by high winds, mist and snow, which prevented helicopters from approaching the mountain top.

Officials said the operation should get under way early Monday if weather conditions improved.

Local workers used heavy earth-moving equipment to throw up a fifth dyke to try and protect the mountain, which has pushed past four similar obstacles to less than one mile from Zaffraans and that devastated a few hundred yards of three isolated houses.

The latest lava eruption began Dec. 15, 1984, when a new, giant red lava formation on the flank of the 10,700-foot-high volcano in the northwestern corner of Sicily.

Since then the lava has crept across the slopes and blocked the slope toward Zaffraans, moving at constantly changing speeds.

Since then the lava has crept across the slopes and blocked the slope toward Zaffraans, moving at constantly changing speeds.
SIUC awards 41 promotions, 33 tenure for faculty

University News Service

Academic promotions have been awarded to 41 SIUC faculty members,effective April 1. Tenure awards, ratified April 9 by the SIU Board of Trustees, have been granted to 33 faculty members, including 24 of those on the promotions list.

Promotions, by rank and academic unit:
From associate professor to professor: W. Eugene Baugum, law; John J. Bozziola, plant biology; Robert A. Curry, civil engineering; S. Beverly Gulley, curriculum and instruction; William N. Haurowitz, mathematics; Salihul Ilyasvarani, mathematics; Mary Ellen Lamb, English; Ronald J. Petas, speech communication; Charles A. Rawlings, electrical engineering; and Paul D. Sarvera, health education.

From assistant professor to associate professor: Mark J. Bausch, chemistry; John Benthoff, Rehabilitation Institute; Elaine M. Blaude, physical education; James A. Campbell, curriculum and instruction; Thomas C. Castellano, crime study center; Shelley M. Cox, library affairs; Jan D. Davy, architectural technology; Paul Devita, physical education; John E. Dowling, history; Gary M. Elff, aviation technology; Mary Anne Fricke, library affairs; Brenda O. Gilbert, psychology; James M. Glover, recreation; Nancy M. Gorenzabich, office systems and specialties; Laila Gupta, electrical engineering; Mark J. Kuttroon, health education; Michael A. Krupa, geology; Thomas M. Mitchell, economics; Markel J. Morris, radio-television; Michael D. Parker, social work; Barbara G. Preece, library affairs; Ruby K. Parr, civil engineering and mechanics; Stuart Rossol, business; Anne F. Saunders, arts and design; Robert J. Sheehan, zoology Juke L. Swanson, psychology; Janice F. Wagner, music; Wayne Wanta, journalism; and Lisa S. Water, linguistics.

From instructor to assistant professor: Ivan L. Long, physical education; and Herbert L. Vogel, health education.

Others awarded tenure included: James E. Brantket, commercial graphics; Ronda R. Demattei, dental hygiene; Michael L. Grey, radiologic technology; Donald P. Jeffries, dental hygiene; C. Duane jap, physical therapy; Joyce L. Sheeks, office systems and specialties; Mark L. Szary, technology; James L. Thiegen, airport technical studies; and Linda L. Woold, computer information processing.
Rubber ducky you’re the one:

By Trumier Camphor
General Assignment Writer

Rubber ducky did more than make bathtub fun Saturday at the University Mall in Carbondale.

Visitors to the mall raced ducks outside the mall to raise money for babies in a special care nursery at Memorial Hospital of Carbondale. Mall visitors who purchased a rubber duck were able to participate in duck races outside the mall.

After four weeks of promotions, the derby sold more than 3,500 ducks.

Race participants bought rubber ducks for $5 and placed the duck in the outdoor 12-foot wide swimming pool to participate in the winding water race course. The first 10 finishers in each of the five preliminary duck races won prizes donated by University Mall stores.

The winner of the final race received a seven night, all expenses paid cruise for two sponsored by University Mall and B & A Travel.

Debbie Mack, marketing director for University Mall, said the proceeds from the Derby will go to benefit the Special Care Nursery at Memorial Hospital of Carbondale.

Jeanne Foster, director of development of Memorial Hospital of Carbondale, said since the nursery opened in 1975, it has served 200 to 250 critically ill babies a year.

"The nursery which is actually a special unit provides services to the entire Southern Illinois region," Foster said.

Foster said the babies that go to the unit are usually premature and are sick or for related problems and conditions.

"Other infants that go to the unit have problems like breathing disorders or infections," Foster said.

Foster said past donations to the unit have helped provide needed equipment that save the lives of critically ill newborns served by the nursery.

"The funds raised from the derby will be a great help to the unit," she said.

Mack said the University Mall stores donating prizes choose community projects that support the Carbondale community.

"We have been coordinating this project with Memorial hospital since Christmas and I am very pleased with the amount of support we have received," Mack said.

Mack said because of the success of the derby this year, the University Mall probably will sponsor it again next year.

The winner of duck number 9526 won the race and the all expenses paid Caribbean cruise for two.

The race was sponsored by WSIL TV 3 and the University Mall.

Duck Derby ’92 official Tom Mack of Carbondale calls out the leading ducks in the final race of the derby. The owner of duck number 9526 won a seven day cruise for two to the Caribbean. The ducks were sold at the University Mall for $5 and proceeds went to Memorial Hospital of Carbondale Special Care Nursery.

Saturday - May 2 - 1992

Get Your Team Together Today!
The triathlon is open to the first 25 teams ages 18 and older. Each team member will be responsible for one leg of the race:

Join the Individual Competition!
The triathlon is open to the first 300 individuals, who will compete in separate age categories.

The Race
The race begins 8:00 am Saturday, May 2 and includes:
1/4 mile swim in Lake-on-the-Campus
5 mile bike ride near Lake-on-the-Campus
2 mile run on path around Lake-on-the-Campus

Practice Swim
Meet at the Boat Dock at Lake-on-the-Campus and “test the waters” Tuesday, April 29 from 4-5pm.

Registration
Pick up an entry form at the SRC Information Desk or register on site at the race Saturday, May 2, 1992 between 6:30 and 7:30 am at SIUC’s Campus Beach. Entry Fees are required:

Laughter is best when everyday woes

**By Joyce Combos-Becker**

Wells Center

Laughter and humor are often seen as positive and enjoyable. A half century ago, Forrest Ford wrote that laughter aids the circulation, massages the abdominal muscles, stimulates digestion, "begs optimism and self-confidence and relegates doubt and pessimism to the background." At this time in the school year, when many students are up about finals, challenged by homework, and uncertain about summer plans, a lower blood pressure, some optimism, and a healthy dose of self-confidence could make a big difference.

In order to obtain the positive results of laughter and humor, they must be experienced with the framework of love, understanding and support. Laughter and humor, whether in a positive or a negative setting, are a part of people. If this is the case, do not be discouraged: a sense of humor can be developed. Following are ways to develop a sense of humor as well as to build more fun and laughter into one's life.

- Remember that just as human beings are equipped to express anger, fear and sadness, they are also equipped to express joy, delight and glee.
- Decide to be hopeful and positive about life. Look for the humor in small and large situations.
- Surround yourself with people who are positive and find humor in everyday life situations.
- Look for the causes of humor, such as the distortion of social distances, the enhancing of learning and the establishing of trust and fellowship.
- The positive relationship between laughter and humor cannot be denied. Take care of yourself. Laugh.

For more information about laughter and the role it can play in your life, call the Student Health Program Wellness Center at 530-4441.

**Stephen King’s film ‘Sleepwalkers’ leads weekend box office earnings**

Film to face stiff competition next week from ‘Babe’

**HOLLYWOOD (UPI) —** The debut of feline shocker Stephen King’s ‘Sleepwalkers’ scare up about $9.5 million at about 1,700 screens to lead the Fridays-through-Sunday weekend box office, according to industry estimates Sunday.

**COLUMBIA’S ’Sleepwalkers,’** King’s first original screenplay, easily topped TriStar’s ‘Basic Instinct’ and 20th Century-Fox’s ‘White Men Can’t Jump,’ which had dominated the box office for the previous three weeks.

‘Insinct’ grabbed about $8 million, and ‘White Men’ pulled down about $7.5 million, both at about 1,500 screens.

‘SLEEPWALKERS,’ which uses the King staple of showing surreal adventures, will face strong competition next weekend from the opening of Universal’s ‘Babe,’ starring John Goodman as baseball legend Babe Ruth.

‘Insinct’ grabbed about $8 million, and ‘White Men’ pulled down about $7.5 million, both at about 1,500 screens.

‘SLEEPWALKERS,’ which uses the King staple of showing surreal adventures, will face strong competition next weekend from the opening of Universal’s ‘Babe,’ starring John Goodman as baseball legend Babe Ruth.

**THUNDERHEART,” a murder-mystery set on a Sioux Indian reservation, took in about $3.3 million at about 1,000 screens in its second weekend.

**WAYNE’S WORLD,” which led the box office for its first five weeks, also grossed about $3.3 million at 1,715 screens to give it a 59-day total of nearly $98 million. The goofy comedy should cross the $100 million mark next weekend.

**FOX’S COURTROOM comedy “My Cousin Vinny,” took in about $3 million at more than 1,000 screens, while MGM/Paradise’s ice skating drama, “The Cutting Edge,” grossed about $2.5 million at about 800 screens.**

Neither of the openings of two family-oriented films—Fox’s “FernGully: The Last Rainforest,” and Disney’s turn-of-the-century musical “Newsies”—generated much interest among moviegoers.

Both debuted at about 1,000 screens.

**SIUC Gay Awareness Week to focus on AIDS, acceptance**

**By Sherri L. Wilcox**

**By Sherri L. Wilcox**

General Assignment Writer

The second half of Gay Awareness Week centers on AIDS awareness, emphasizing ways to understand the gay/lesbian/bisexual community and the straight community.

Gay Awareness Week events include:

- a workshop on AIDS and STDs by Paula Hendricks, a health educator who excludes and tears down, whereas with a person infofiles and connects.
- a look at AIDS in Southern Illinois, by Virginia Scott, coordinator of the Southern Illinois AIDS Task Force. She will report new updates and facts about AIDS and HIV in the Southern Illinois Area at 1 p.m. Monday in the Mississippi Room of the Student Center.
- a film on AIDS Awareness Week, by Carmen Suarez of the SIUC Assistance Action Office. She will explain how SIUC holds regarding sexual orientation as well as relationships between the policies of other colleges at 2 p.m. Monday in the Mississippi Room of the Student Center.

"Going Toward the Light," a production by students of Carbondale Community High School. They will present a play that delves into the topics of AIDS, living and love. The performance is organized by Mary Boyle and begins at 3:30 p.m. Monday in the Student Room of the Student Center.

In other events:

- Film “My Own Private Idaho” begins at 7 p.m. and 9:30 p.m. Monday in the second floor auditorium of the Student Center.
- Video: “1500 Years of Gay Holy Unions: It’s Nothing New,” begins at 10 a.m. Tuesday in the Troy Room of the Student Center.
- Jobs, Bobwell, a Yale University professor, discusses the history of same-sex marriages and compares them to heterosexual ceremonies and vows.
- Workshop: Parents of Gay, Lesbian, and Bisexual Children will be at 1 p.m. Tuesday in the Thebes Room of the Student Center.
- Video: “instinct” of the SIUC Counseling Center’s workshop on AIDS, love and life.
- Workshop: Gay, Lesbian, and Bisexual Self-Esteem will be at 5 p.m. Wednesday in the Student Room of the Student Center.
- Video: “Sleepwalkers,” King staple of showing surreal adventures, will face strong competition next weekend from the opening of Universal’s ‘Babe,’ starring John Goodman as baseball legend Babe Ruth.

 Registrants:

- Over 20 people have signed up for the event.

STLC visiting artist Matthew Thomas, who calls his art “a purification and search for truths in an array of dérive patterns and subject matter,” says spiritualism plays a large part in his artwork.

“It’s the primary source for my work,” Thomas said. “It’s more the motivator than anything else.”

The artist will lecture at 7:30 tonight in the University Museum Auditorium at STLC.

Robert Paulson, director of the Visiting Artist Program, said Thomas has “steeped in eastern philosophy.”

“Matthew has attained recognition for his art. His art is possibly a lot more spiritual than for other reason I think he’d be very interesting to hear how he makes the connection between the visual and the spiritual should be very interesting.”

An interest in eastern religions led Thomas to study Buddhism and to live for a time in a monastery. He also has studied Islamic art and religion and color through ancient tantric art processes.

Thomas said these studies were journeys into the very nature of his art.

“Being an artist,” Thomas said, “it wasn’t enough to be satisfied with just the effects of what art does. I wanted to know the causes and sources from within myself as opposed to a linear of historical view.”

Thomas said soul searching is a message he tries to bring across in his work.

“3’s about reflecting back and probably underlining the messages of divine equality,” Thomas said. “It’s about the dissolving of the boundaries we have. They are about working more and more toward the essence of life and discovering that the essence is more than separation.”

“Thomas said his most successful paintings are ones that are true to the underlying feelings. “It’s the sense of joy that one will bring or the sense of abandonment,” Thomas said.

“The sense of courage that it takes to go somewhere for something greater. Those are the types that seem to be most successful.”

His articles “The Essential Ground” and “The Announcement” at two of his favorite works.

Thomas was born in 1943 in San Antonio, Texas. His grandfather’s African Methodist church altar in his home and the sight of him laying carefully whitewashed stones at the boundaries of his property both left indelible impressions on him.

Thomas received his formal education at the Chouinard School of Fine Arts, the Honolulu Academy of Arts and San Fernando Valley College.

He has had art and teaching positions at the California Institute for the Arts and the Los Angeles County Museum of Art’s Education Department.

Thomas also will conduct a workshop with students of Downstate Art Educators at 4:30 today in the Alumni Building.

individual critiques from senior faculty help each student confront the complex problems facing artists developing their own personal language.

Rigorous group critiques allow students the opportunity to share what they have learned and to develop a vocabulary for discussing each other's work.

Students are given their own studio space and have daily access to the collection, exhibitions, and libraries of The Art Institute of Chicago.

Prominent visiting artists are available each week to discuss student work and give evening lectures.

Deadline for application is May 15, 1992.
Berlin hurt by cost of staging Olympics

Bonn, Germany (UPI) -- The mayor of Berlin says his city's chances of staging the 2000 Olympics are being hurt by a dispute over the cost of the project.

"A public fight about the financing and the will of German politics to hold Olympic Games in the year 2000 can indeed endanger the bid," Mayor Eberhard Diepgen told the German news agency DPA. However, the mayor believes the "discusion was dying down, if not over."

German Finance minister Theo Waigel earlier in the week handed the city department its bid by four years because of its poor financial situation and the relocation of the federal government 'nd parliament from Bonn to Berlin. Diepgen told DPA the costs for the Games were estimated at 3.5 billion marks. The city did not include the modernization of public transportation or housing, for which millions of dollars were needed.

The mayor said the federal government could assist in this matter. He also pointed to the 1972 Olympics in Munich, where civic improvements were accelerated because of the Games. Diepgen said the modernization would benefit economically from the Olympics and predicted an income of up to $2.5 billion from the Games.

The 1996 Summer Games will be held in Atlanta. Aside from Berlin, the bidders for the 2000 Olympics are: Beijing, Brasilia, Istanbul, Madrid, Milan, Sydney and possibly Tahkent. The host city will be selected by the International Olympic Committee in September 1993.

"Television revenues and incomes from television rights at Olympic Games and the advantages in the bidding cities play a critical role," Diepgen said.

Masters, from page 16

Calcavecchia sets new record, ties others

AUGUSTA, Ga. (UPI) -- Mark Calcavecchia didn't come close to winning the Masters Sunday, but he left his footprint all over the closing nine holes of the Augusta National Golf Club course.

Although winging up with a 3-under par 32 on the back nine that figured to leave him far to the rear of the leaders, Calcavecchia caught fire on the back side of the Augusta National Sunday to set one record and tie another.

As he left the 18th green in even par, and standing 4-over through 63 holes, Calcavecchia birdied all of the last six holes, tying Johnny Miller's 1975 Masters record for consecutive birdies.

That streak and a previous birdie at No. 10, gave Calcavecchia, who had a final round 65, a 7-under par 29 for the closing nine holes.

It was the first time in Masters history anyone had played nine holes in less than 30 strokes.

"Some guys will think it is unbelievable, including myself," said Calcavecchia, who won the Phoenix Open earlier this year. "It was just one of those things. I swing on the front nine, trying to her back."

Calcavecchia, 31, has won six tournaments and more than $3.7 million in a decade on the PGA Tour. And he finished second to Sandy Lyle in this tournament in 1988.

But he appeared to just being for the ride in this year's Masters as he shot 73-75-71-68 for his first major.

"That sort of made it easier for me today," he said. "In my position, I wasn't trying to win the tournament. I worked on my swing on the front nine, trying to improve a lot of things. I had actually made the first 63 holes. Earlier in the week, every time I hit a good iron shot it turned out to be a little short or a little long."

Calcavecchia, 31, has won six records in the six holes, and shot a 71 for 15th place.

From Venonys, SIUC put the game on ice with a 1-0 lead in the third inning when senior shortstop Cheryl Verovksky singled home a sacrifice fly by senior catcher Andrea Rudanovich. Says singled in the sixth to bring home infielder Tenley Murphy tying the game. The Symancutas took the lead in the seventh when two runs scored off of freshman relief pitcher Shelly Lane's throwing error.

In Game one against Illinois State, the Redbirds scored only one run in the first inning when pitcher Monica McClain brought a runner in on a double, but that was enough to give them the win.

In Game two, the Redbirds took the lead in the third scoring four runs. The Salukis brought in one run in the fourth off of a double from Venonys. SIUC put the game away with a 6-0 lead in the sixth inning with six runs. Radunovich came in after the pitcher Brandi Pock walked and singled a left hitter Tracy Mize. Venonys singled to bring in one run, Wilson doubled to bring in two more runs. The final run came in on a sacrifice fly from sophomore designated player Jenny Kloz.

Brechtleibauer said she was pleased the Salukis could fight back and beat Illinois State.

"We had a great comeback against Illinois State," she said. "We kept pushing and pushing until we got it done. We had five tough losses, and I'm just pleased we could stay with the game and battle back."

The Salukis next play at 3 p.m. Tuesday against SIU-Edwardsville in a doubleheader at SIUC.

NHL players end strike

NHL players Saturday ratified a new two-year collective bargaining agreement and return to practice in 22 cities, from Vancouver to New York, signaling the official end to the first strike in the league's 75-year history.

The new basic agreement, reached just prior to midnight Friday after a marathon, bargaining session in New York, was passed by a vote of 409-61, an 87 percent approval rating.

The agreement is retroactive to the beginning of this season and expires Sept. 15, 1993. The ratification officially ended a 10-day strike by the NHL Players' Association in its entirety — including supersets such as the NHL Superstars, the Great Laker United Nations, and Brett Hull and playoff-bound teams. The previous collective bargaining agreement expired last Sept. 15, and the players walked out April 1, forcing the postponement of the final 30 regular-season games and the Stanley Cup playoffs, originally scheduled to begin this past Wednesday.

"This is a breakthrough for professional hockey," NHLPA Executive Director Bob Goodenow said.

In the second game against Indiana State, SIUC jumped out to a 1-0 lead in the third inning when senior shortstop Cheryl Verovksky singled home a sacrifice fly by senior catcher Andrea Rudanovich. Says singled in the sixth to bring home infielder Tenley Murphy tying the game. The Symancutas took the lead in the seventh when two runs scored off of freshman relief pitcher Shelly Lane's throwing error.

In Game one against Illinois State, the Redbirds scored only one run in the first inning when pitcher Monica McClain brought a runner in on a double, but that was enough to give them the win.

In Game two, the Redbirds took the lead in the third scoring four runs. The Salukis brought in one run in the fourth off of a double from Venonys. SIUC put the game away with a 6-0 lead in the sixth inning with six runs. Radunovich came in after the pitcher Brandi Pock walked and singled a left hitter Tracy Mize. Venonys singled to bring in one run, Wilson doubled to bring in two more runs. The final run came in on a sacrifice fly from sophomore designated player Jenny Kloz.
Chicago Cubs to play St. Louis Cardinals in the seventh inning Sunday, lifting the Chicago Cubs to a 4-2 victory over the Cardinals. St. Louis lost Chicago 11-6 on the day, but stranded 12 runners.

Chicago grabbed second straight victory over St. Louis Cardinals falling to record a strikeout. Heathcliff Slocombe pitched the final 1-2-3 innings to earn his first save. Olivarats, 1-1, had a no-hitter through four innings and was walking along until the sixth. Maddux led off with a double and scored on Mark Grace's one-out single. The Cubs tried to tie the game 3-1. Center fielder Ray Lankford had a chance to rob Maddux, but allowed the ball on the throw.

The Cardinals took a 2-1 lead in the seventh when Olivarats loaded the bases. But Sammy Sosa walked and David Smith singled for the Cubs in their half of the seventh. The Cardinals followed up with his game-winning blast.

The Cardinals put two runners on in both the ninth and eleventh innings, but couldn't convert.

St. Louis outhit Chicago 11-6 on the day, but stranded 12 runners.

After wasting scoring opportunities in the first and third innings, the Cardinals finally broke through against Maddux in the seventh.

Olivares walked with one out and two down, Tim Jones lined a single. Ziele continued the looper over diving first baseman Grace into shallow right field.

Zeile leads the team with eight runs.

The Cubs again played without right fielder Andre Dawson and shortstop Shawon Dunston. Dunston, suffering from a sore left knee, is expected to be ready for Saturday's game in Pittsburgh, but Dunston might not be able to go on the disabled list.

He strained his left hamstring while warming up on Friday afternoon.
