Youths observe nature’s weather phenomenons

Illinois’ Wild Weather Program: Students from area grade schools are treated to hands-on activities through education program.

By Dave Kazak

A tornado stormed through Winkler Elementary School’s gymnasium Monday afternoon, but students were not huddled in the hall. Some students actually laughed at the tubular terror, and a few brave souls dared to place their hands in the center of the swirling maelstrom.

The tornado was three feet high and four inches wide, with wind speeds reaching from 15 to 20 mph.

"Of course, if this were a real tornado, I wouldn’t be standing so close," Jim Mueller, a science teacher at Carbondale Municipal Elementary School, said. "This is great." Mueller said, "This class has been very interested in the exhibit."

The students’ excitement revealed itself when Mueller told each group to switch to a different exhibit. Every child ran to the next exhibit with Christmastime anticipation.

Principal Mary Hagan said, "This program is dynamic, interactive and positively based. The children are able to understand what they are learning because it is something they can actually manipulate."

The science center program is being repeated at schools all over Illinois by the "S.P.A.R.C. Collaboration." The "S.P.A.R.C. Collaboration" includes Carbondale’s Science Center, Sci-Tech in Aurora, the Discover Center in Rockford, the Lakeview Children’s Museum in Peoria and the Springfield Children’s Museum in Springfield.

In Southern Illinois, the exhibit is taking the exhibit to Carterville School, McLeansboro Elementary, Brookport Elementary, Thomas School in Carbondale and Lincoln Junior High School, also in Carbondale.

Science center spokesperson Faith Kegnep said: "Weather program was a more detailed lesson on the weather."

Julie Heller aid. "We were taught to play, but it sparks their interest and I can't even make a good cup of coffee."

Baptist union near completion

The state’s oldest and largest Baptist student union will be able to once again call SIUC home as the construction of a 7,000 square foot ministry center, at the corner of Mill St. and Forest Ave., nears completion.

The Southern Baptist Ministry is affiliated with the Illinois Baptist State Association, which has about 1,400 member churches in Illinois.

Sam White, SIUC campus minister, said the new building will replace the former Baptist Student Center and dormitory located on the northwest side of campus.

SIUC purchased the former Baptist Student Center in July 1993 and renamed the building the Northwest Annex.

White said the annex, built in 1967, was the largest Baptist stu-
dent union in the nation.

The new facility, located directly west of the annex, will not be as large, but White said it has many conveniences the old building did not have, including a classroom, game room, library, a lighted sand volleyball court and an expanded parking lot.

"This facility will provide needed space for our ministry to SIUC and will help us continue to reach out to international students," White said.

The ministry reported that about 400 students attended meetings last year.

**STRIKEN KOBE BEGINS RETURN TO NORMALCY**

KOBEn, Japan, Jan 23—With electricity available almost everywhere and water trickling in half the homes, this earthquake-devastated city took a first step toward normality Monday as crowds of commuters headed to work and children returned to school. "People bringing food from Osaka are coming in by train, buses are running to Nishinomiya (a nearby city where direct trains to Osaka are functioning), and boats are available to Osaka. So I felt I had to go to work," Masami Hamaguchi, 49, an auto company executive, said.

**JN5T OUR LITTLE COTTAGE IN THE FATHERLAND**

**BERLIN**—For all of you who would be counts and countesses, the German government is peddling castles to fit every aspiration to nobility, hau­siing or even eroding. There are sublime or ridiculous. But bring cash, and plenty of it. In a marketing campaign called "Fairy Tales for Sale," the federal agency responsible for property once owned by the East German state has put together a portfolio of former mansions ranging from simple manor houses to mammoth castles replete with turrets and battlements. The first batch of 20 properties drew 270 offers, including 16 from the United States, before bidding closed.

**DRIVE ACCELERATED FOR ONE EURO CURRENCY**

**PARIS**—Sure that Germany and its all-powerful mark are steering control of Europe's economic destiny, France's political leadership has vowed to accelerate the drive by the European Union to achieve a single continental currency within the next two years. In what aides described as a closely orchestrated policy, Socialist President Francois Mitterrand and conservative Prime Minister Edouard Balladur have delivered ringing appeals for a single European currency by 1997.

**Nation**

**DESTRUCTION OF SMALLPOX VIRUS POSTPONED**

WASHINGTON—Destruction of all samples of smallpox virus, sched­uled for next month and July, has been put off indefinitely. The executive board of the World Health Organization decided last week there was no consensus on destroying the virus. Smallpox, which can be fatal, was eradicated in 1977, although much of the world's population is no longer immune.

**COURT SAYS EVEN LYING EMPLOYEE HAS RIGHTS**

WASHINGTON—The Supreme Court ruled unanimously Monday that a worker who sues for job discrimination still has a case even if the employ­er later discovers he or she lied to get hired or engaged in misconduct once hired. The ruling reverses a policy in some appeals courts of dismiss­ing a bias victim's lawsuit when an employer discovers, while preparing for a bias victim's lawsuit when an employer discovers, while preparing for a lawsuit, that the employee had deliberately misled while preparing for the lawsuit.

**NOW UNCLE SAM PLANS TO TAX PARKING**

WASHINGTON—In what could be called Jimmy Carter's Revenge, many federal workers who have employer-provided parking spaces will be hit with higher tax bills in 1994 and the future. Their taxable income will be boosted by the amount that the value of their parking space exceeds the tax-free parking perk ceiling. The Department of Justice also issued a memo instructing its lawyers to try to sue the government over the tax on parking, but the government has not yet acted on the memo.

Youths sing international songs

Multicultural music: Children’s choir, art combine to form “Horizons” selection

By Dustin Co, Daily Egyptian

An area youth choir is bringing the sounds of the world to Southern Illinois in a new cassette and songbook of international children’s songs.

Members of the SIUC faculty compiled “Horizons,” a songbook and cassette of 11 different international children’s songs stressing cultural diversity.

The songbook and cassette were the idea of Jo Ann Nelson, a lifelong student of cross-cultural children’s music.

“I have always been interested in international children’s songs,” she said. “I have always invited SIUC children’s music.

Rainbow genesis

Nelson said the idea for the songbook and cassette stems from a collection of international stories called “Rainbows.” Nelson approached the creator of “Rainbows,” Nasseem Ahmed.

“Rainbows” was well accepted in the international community and we hope that “Horizons” does the same,” Ahmed said.

Ahmed said an advisory board was created to decide which songs would be in the book.

“We made it a contest among this international community,” she said. “We received 2,000 songs from 24 different countries.”

The final outcome was a selection of 11 songs from Costa Rica, South Korea and China, said Gary Ritcher, assistant professor at the SIUC School of Music, and director of the Southern Illinois Children’s Choir.

“The advisory board sat down and decided which songs were best,” Ritcher said. “We decided which songs were childlike and appropriate.

Variety selected

Ritcher said many good songs were submitted, but they decided to pick a wide range of international songs.

“There was a lot of good music, but we had to have a balance from around the world,” he said.

After the songs were selected, they were transferred into music notations by project assistant Kok Heng Mah. Ritcher said.

The Southern Illinois Children’s Choir sang the songs on the tape.

“They sang the songs in the native language,” he said. “Many language barriers had to be broken down.”

Book included

A book, giving information about each song, accompanies the tape, said Tammy Coor, assistant director of programs for University Housing.

“The book contains the native language, the English translation, the music notations, and directions for the songs such as stomping, clapping, or snapping fingers,” Coor said. “It also gives the location, population, language, climate, and currency of the country from which the song came.”

The song also contains artwork from children collected by Coor from the Evergreen Terrace recreation program, and from Sherry Lenee, who collected art from her students in Carbondale District 95.

“We picked the illustrations that best fit the songs,” Coor said. “The pictures are a mixture of art from American and international students.”

The book and cassette will go on sale at the International Festival which runs from Feb. 13-19 in the Student Center.

Former SIUC administrator Lacey dies

By Christian Kenworthy

Jerome “Jerry” Lacey, who served in many capacities at SIUC, most recently as associate dean of student services, died Tuesday at his home in Indiana.

Lacey was 54.

Lacey came to SIUC in 1969 and served here until accepting the position of dean of the Ivy Technical College in Gary, Indiana last year.

Co-workers and friends of Lacey said he contributed greatly during his time at SIUC.

Seymour Bryson, director of the SIUC Affirmative Action Office, said Lacey was an invaluable asset to the University.

“He was a pioneer and opened up Southern Illinois in the ‘60s so that minorities would have an opportunity,” he said. “Jerry was well respected — I think Jerry’s going to be missed.”

Bryson said Lacey was a fellow member of the Kappa Alpha Psi fraternity’s Dayton chapter.

Flying was a major interest of Lacey’s, according to former SIUC president David Derge, who headed the university when Lacey was a junior administrator.

“Jerry was very dedicated to educating young people in... LACEY, page 5
Kobe victims closer than miles indicate

IT IS EASY TO TAKE THINGS FOR GRANTED when we have so much.

Most of the time, SIUC students' lives are fairly stable. We know where we will sleep, where we can find something to eat and when we will receive our next paycheck. We have student loans, part-time jobs, credit cards and purchasing power. If we get into trouble, our family and friends usually are willing to open their arms and pocketbooks to help us. But above all, we have the security of knowing that our loved ones are just a phone call away, safe and sound.

LAST WEEK, A NATURAL DISASTER ON THE other side of the earth disrupted that security for 300 SIUC students.

In the aftermath of an earthquake that rocked Kobe, Japan, some Japanese students found themselves glued to television sets and clinging to telephones, frantically searching for some clue about their families' safety. Although most of them had been produced while TV was down, they still are waiting. a week after the disaster, to find out what happened to more distant relatives, friends and neighbors.

As we offer our sympathy to the victims of that earthquake, their families and our fellow students who continue to watch the situation and search for information about loved ones back home, we should take a moment to think about how natural disasters affect us all.

HERE IN SOUTHERN ILLINOIS, WE ARE SITTING on a fault line that is due for a major tremor. A few years ago, we rushed to pack "earthquake kits" and learn earthquake-safety precautions after a scientist announced two possible dates for the impending disaster. When the quake did not happen as scheduled, we relaxed a little and began to forget about the danger. Seeing the aftermath of the Kobe earthquake, their families and our fellow students who continue to watch the situation and search for information about loved ones back home, we should take a moment to think about how natural disasters affect us all.

Carbondale Police Department gives people chance to walk in their shoes

By Rob Neff
Daily Egyptian Reporter

Carbondale residents will have the opportunity to view law enforcement through the eyes of the Carbondale Police during a series of classes beginning in February.

The series, titled Citizens' Police Academy, will be taught by Carbondale Police officers as well as outside instructors.

Don Priddy, community resource officer for the Carbondale Police Department, said the classes are designed to provide residents with a feel for what police officers go through.

"It's just a way to exchange information with citizens," he said.

"People who take the class learn a lot about what we do," Priddy said a different instructor will teach each class session and each session will cover different material, including hands-on training simulations.

In one class, applicants will play the part of a police officer making a patrol traffic stop. There are no educational requirements for the class, however, applicants must be at least 18-years-old and must allow the Carbondale Police to run a background check to confirm they have no felony convictions.

The class will be limited to 20 people and Carbondale residents will be given priority during the selection process.

Candidates continued from page 1

candidates' nominating papers.

In a press release announcing the meet­ing, Vaught said that even though the meeting would open to the public, the board would not comment on the pending litigation before or after the meeting, but City

Baptist continued from page 1

year, and White said the new facility should make them more visible. The new facility will allow Carbondale to continue to be the largest of the 33 Baptist student centers in the state, Bob Blatter, director of ISBA's student minist­ries, said.

Loretta Boyd, international student coordin­ator for the SIUC Baptist Center, said the new facility will benefit SIUC's international community.

The classroom will be used by teachers who volunteer their time to teach the English language, and the conference room will be used to host weekly international lunch­es, Boyd said.

"We offer a place for interna­tionally students to relax and visit with American students," she said.

Blatter said the building, which broke ground in May, should be finished by March, and the Baptist center will continue to use the annex until then.

Both the classes and the lunches will be free to international students.

The new building will continue a long tradition of Baptist student centers at SIUC.

An ISBA publication states the first organized union at SIUC was started in 1928 and has existed here since that time.

White said the campus ministry is open to everyone, regardless of their denomination.

"He was an excellent person and, I thought, a fine administrator," he said.

"Early on I had identified him as a potentially very successful administrative type. Deep into the record of Lacey is great on both a human and professional level." This was a very talented man and his death was premature," he said.

Lacey continued from page 3

aviation careers," she said.

Lacey told himself and also served as a captain in the Civil Air Patrol, Derge said.

Don Priddy said Lacey's performance at SIUC was well above par.

Priddy said the applicants selected to take the course will represent a balanced mixure of Carbondale's population.

"We just try to get a good mix of age and demographics," he said.

"We have had people from 18 to 70-year-olds take the course. We usually get a couple of students each class."

The Citizens' Police Academy will meet for 10 consecutive Thursdays from 6 to 9 p.m. beginning Feb. 23, with one additional class session on April 22 from 1 to 4 p.m.

Applications can be picked up at the Carbondale Police Department between 8 a.m. and 5 p.m. Monday through Friday, and must be returned by 5 p.m. Feb. 8.

For further information about the Citizens' Police Academy, call Don Priddy at 457-3200 ext. 428.

Tornado continued from page 1

the other science museums will be exhibiting weather models at schools in their region as well.

"Each museum will have an exhibit for permanent display and one that will tour the schools," she said.

"It's all being funded by a $1.2 million grant from the Illinois State Board of Education."

She went on to say that the facilities at the center are already ade­quate.

"Actually, we're kind of lucky," she said. "The Springfield museum doesn't even have facilities to put the exhibit in." The program is welcome news for teachers in Southern Illinois because programs like this are expensive and are not as abundant as in a bigger city, Hagan said.

"I wish we had more of them," she said.

"Many of the children don't have the opportunity to see exhibits like this. We know it's accessible now, and we will use it."

Calendar

Today

SOCIETY FOR ADVANCEMENT of Management will have an execu­tive meeting in the Ohio room of the student center at 7 p.m. For more info. call Sid at 457-8890.

STUDENT ORIENTATION committee will hold its last meeting at 7:30 p.m. in the Jakkalski/Missouri room of the student center. For more information, call Ti at 217-380-1928.

PRE-MEDICAL PROFESSIONS association will have a seminar on medical school admissions at 7 p.m. in the student center auditorium. For more info. call Gene at 549-8807.

Upcoming

ANIMAL RIGHTS ACTION TEAM will meet every Thursday at 5:30 p.m. at the Interfaith Center (Illinois State University). For more info. call 549-9351.

CALENDAR POLICY -- The deadline for listing upcoming events in the Daily Egyptian is two publication days before the event. The Daily Egyptian reserves the right to exclude any event and the space and telephone of the editor. Information for cal­endar items is available in the Daily Egyptian Newsroom. Items should be delivered or mailed to the Daily Egyptian Newsroom, 300 E. Main St., Carbondale, Ill. 62901. No calendar information will be taken over the telephone.
By James J. Faers
DTE Entertainment Editor.

If you were wandering past Hanger 9 Sunday you may have heard the jumpy jukebox of ska-The-Cowboys singing along to the Carbondale night air. If you were smart, you would have stopped to hear Grim Skunk and Billy Goat play for an eventual evening of slaming yourself into the music inside.

Opening, for Billy Goat was the Monroevia-based band Grim Skunk, a ska-metal group that showed many styles of rock.

Their classical and creepy Phantom of the Opera-type show sent chills through the crowd every time Joe Burnett let his fingers do the talking on keyboard.

Burnett, who sported a black "Mex-ecos" tie-shirt, did not let the early crowd of non-boogiers affect his performance the slightest bit. Hunched over, he jammed on his keyboard, resembling Ray Manzarek, and sang with the intensity and energy level of all three of the Beatles Boys.

Although the lyrics were at times difficult to understand, it didn't take away from the surge of music and often hard to understand, it didn't take away from the surge of music and often hard to understand, it didn't take away from the surge of music. The B Castie Boys.

Power Burnett sent through to the University of Illinois to talk to. In ending his small talk Schueeller explained why she had been there sometime or another — "I know I have." While jumping around in his Edward Van Halen-type style, Schueeller played a loud guitar mixed with vocals and would often bump into Burnett at the conclusion of songs.

Peter Edwards, lead guitarist for the band, explained that touring with Billy Goat is an experience they enjoy and will continue to do. "We work together with Billy Goat," Edwards said. "It's a good mix." The band, explained that touring with Billy Goat is an experience they enjoy and will continue to do. "We work together with Billy Goat," Edwards said. "It's a good mix."

Niners are one of many problems facing Chargers

By Joe Gergen

At a time like this, he is acknowledged as football's prophet. Joe Namath's popularity nationwide is discomfiting to the San Diego Chargers. Fifty minutes of Super Bowl XXIX. The higher the latter climbs, the more dangerous the Niners will be.

The one-time rebel has become the paragon of a generation of copycat football coaches. Twenty-six years after he guaranteed the New York Jets would shock the world of Pro Football by beating the Baltimore Colts in Super Bowl III, Namath was the first choice of editors, columnists and reporters seeking to analyze what oddsmakers listed as the most one-sided matchup in the history of the NFL's showcase event. First thing Monday morning, soon after everyone digested the installments on the San Francisco 49ers as 19-point favorites to defeat the San Diego Chargers in Super Bowl XXIX in Miami, the media requests for Namath's telephone number began in earnest.

Eventually, the Jets made Namath available on a telephone conference call. Eighty-two agencies were represented. Broadway Joe declined to predict a colossal upset, but who could blame him? Sure, Joe Montana is in charge of the Niners and those Chargers have little in common with those Jets beyond charter members of the American Football Conference. In a real sense, San Diego may be the American Football Conference's most representative in a decade. And that's no laughing matter, considering the National Football Conference has won the last 10 Super Bowls, some by embarrassing margins. What sets the Chargers apart from even the four-time champions from Buffalo and the four-time Super Bowl champs is their offensive limitations. For the first time since Super Bowl XXV, the AFC enters the game without a celebrated quarterback.

Ever since Namath swaggered off the field at the Orange Bowl on that distant January afternoon, quarterbacking has been the conference's calling card. The AFC, with future Hall of Famers Bob Griese and Terry Bradshaw, had ruled the 1970s, but not even the rise of the NFC had brought a DC elite. The Niners' offensive line on Super Bowl XXV was directly proportional to the latter's climb, the more Namath's popularity nationwide is discomfiting. Hence the Niners are likely still without the complementary running game and defense to push the Dolphins to the top. Elway and Kelly will be 35 and their teams appear in need of overhauls. And once again, Namath is on the move for the Jets now and already has proven he's no Namath.

Instead of the Oil Bowl, the AFC Championship Game last season was a backyard brawl between Humphries and Neil O'Donnell, two QBs who once served as understudies to Bunny Briner (the former in college, the latter in the NFL). Humphries, who completed one of his five passes in the first half, emerged as the winner on the strength of two 45-yard scoring plays and Pittsburgh's failure to negotiate 9 yards in its final set of downs. He will have to do it all again Saturday, and he might have to do it much as Drew Bledsoe or perhaps Rick Mirer, tortured by a new coaching staff, is ready to reprint the AFC.

For now, the NFC not only has the team but the quarterback in Steve Young, the league's top-rated passer for the last three years. Behind him are Troy Aikman, who owns two championship rings, and Brett Favre. Humphries may be ideal for the Chargers, whom General Manager Bobby Beathard has built on the model of his Washington power teams. Place him with the Washington Redskins of the 1980s, with whom he owned two championship rings, and he might be the equal of Joe Theismann, Doug Williams and Mark Rypien. But the Chargers do not have those teams' depth of talent and they're facing a lethal opponent.

San Diego's defense is excellent against the run. Also, the Niners are more likely to plunder with the pass and the Chargers' secondary is average at best. Ironically, the year the Holts—the franchise of Alworth, Garrison, Hadl, Winslow, Joiner and Feaster—got to the Super Bowl, they're synchronized with thunder. It's San Francisco that has the lightning.

There's another advantage the Chargers don't share with the old Miami Dolphins. All the 49ers knew about the Jets was what they had seen on film. Weeb Ewbank, who had won two NFL championships in Baltimore, had a much better grasp of the Colts' talent and schemes. San Diego had the misfortune to meet the Niners in mid-December. Despite playing at home, the Chargers were mauled, 38-15.
World Series balls commemorate 1994, the season that never was

By Cynthia Sheets
Daily Egyptian Reporter

Get 'em while they're hot! America's national pastime has produced 1994 World Series baseballs, and fans are grabbing the unique collectibles while they can.

The last World Series to be canceled was in 1994, so these baseballs have marked another historical event in the sports world. Rawlings Sporting Goods has capitalized on this event, manufacturing 50,000 baseballs early in the season.

What could have been marked as a loss to the company turned into a profitable venture for Rawlings.

Due to the Major League Baseball players' strike that ended the season, along with strong media coverage, these commemorative baseballs have sparked the interest of people in countries all over the world.

James Vincent, the president of Ballpark Furnishings, said his company has sold baseballs to people in the United States, as well as Japan, Canada, and Europe.

"The type of people who own these balls are the type who will hold on to them for years and years because of the sentimental value," Vincent said.

This year, more of the collectibles are being sold to the general public, rather than to the investors and collectors that normally show interest in these products.

Scott Luttenbacher, employee at All Star Cards & Comics in West Frankfort, said his store refuses to carry them because each baseball would cost between $25 and $30 to order, and in the long run will not be worth as much.

Comeback
continued from page 12

before the game. "I watched him warm up and I played ball all my life so I know what it is. If you can run, you can play," he said. "He shot a layup off the left leg and put it in, there wasn't any doubt about it. I knew he would play."

Norris City native Reed Jackson had 19 for UIE (11-4) and guard Chris Quinn had 10.

SIUC returns home Thursday night for a showdown at the Arena with Valley rival Drake.

Victory
continued from page 12

competition enabled SIUC to put out 12-2 points to tied place Arkansas-Little Rock's 8-8.

"It's hard to tell whether we're that good or everybody else is that bad," DeNoon said. "I didn't think we had a really good meet."

The Salukis had four first-place finishes out of 14 events, but DeNoon was hoping for more.

"Looking at the performance of the other athletes (those that did not finish first), we should have won eight of them," DeNoon said.

The distance medley relay team of Dablier, Kelly French, Mindy Saracco also had first-place finishes in the 4x1226.6, for first place.

Dablier also had a first-place finish in her first time running the mile. But her attitude towards aer was high.

"A bad mile time (5:14.01)," she said. "I was hoping to finish seven seconds better."

Latonya Morrison and Stefany Kesnar, HaU Classroom (across from the Health Service) Wednesdays 1:00 p.m. - 8:00 p.m.

• Basic: Wire
• Beginning Guitar
• Drawing
• Jewelry Design - Friendly People
• Jewelry Design - Fine Jewelry
• Jewelry Design - Assembly
• Jewelry Design - Friendship Beads

ADULT 5-WEEK CLASSES

The cost of each course is $12 for SIUC students, $23 for SIUC faculty and staff, and $30 for community members, plus supplies.

Session I: February 3 - March 3
Session II: February 6 - March 6
Session III: February 9 - March 9
Session IV: February 12 - March 12
Session V: February 15 - March 15

For more information contact the Student Health Programs Clinic for birth control, attend one of these classes.

Spring Schedule

Wednesday 1:00 p.m. - 2:00 p.m.

Kesnar Hall Classroom (across from the Health Service)

Every other Tuesday beginning January 24, 1995 from 6:00-7:00 p.m.

in Trueblood Hall, Room 106.

For more information, contact the Student Health Programs Wellness Center at 536-4411.

Additional sessions available later in the semester. The Craft Shop now accepts Visa, MasterCard and Discover credit cards!
**Women's Track victorious at 'eventful' Indian Invite**

By David Vingen

*Daily Egyptian Reporter*

A late arrival, a computer breakdown, and an unusually scheduled meet may have hindered the Saluki women's track team performance, but it did not hurt them in the final standings.

Saluki women's head coach Don D'Noon said he was impressed with his team's performance and said he was proud of his team's performance. "I was very happy with the way we did," D'Noon said. "I thought we did a great job." The Saluki women's team finished third in the meet.

The Salukis were unable to win a title, but they did win a number of events. The Salukis finished second in the 4x100 meter relay and second in the 4x400 meter relay.

Saluki women's head coach Clay Scott said that the Salukis are going to continue to work hard on their defense.

"We're going to have to have a good defense," Scott said. "We need to get better on that end of the court." The Salukis finished the season with a 15-15 record.

The Salukis were able to win a number of games, but they also lost a number of games. The Salukis lost to Northern Iowa in the final game of the season.

**Weekly Wrap-Up**

The Salukis will continue to work on their defense in the off-season.

"We need to work on our defense," Scott said. "We need to get better on that end of the court." The Salukis finished the season with a 15-15 record.

The Salukis are scheduled to play Northern Iowa in the first game of the season.
