UNIONIZATION:
SIUC Administration and faculty and union representatives will begin the process of contract negotiations.

Planing the future

BRAINSTORMING:
Barry Malik, union board executive (left); Jim Sullivan, president and spokesman for the SIUC faculty union, and union executive board member John Magney listen to other members of the SIUC union board discuss how to get feedback from faculty Monday in Whom.

GROUND ZERO

William Capie, vice chancellor and current spokesman for the SIUC administration on union matters, said the process of redefining the roles of the administration and the union in University governance will begin with a black conference.

"We're going to start from ground zero with a blank piece of paper," Capie said. "We're not going to throw out a hundred years of the University's history and tradition of how to govern the institution, but the law requires us to reduce to writing the roles and responsibilities of both parties.

"If it's not in the contract, it doesn't exist," Capie, who also serves as the administration spokesman for the University's civil service union, said one of the biggest challenges facing both union officials and administrators is determining how the parties can work together for the benefit of the entire school.

"Obviously, no one here has the experience in dealing with a faculty union because there hasn't been one at SIUC before," Capie said. "The administration is compiling information on how unions have worked elsewhere, but this is going to be a different experience for both parties."

Capie said he fears that adversity between the union and the administration and within the union itself will also draw out the negotiating process.

"There is going to be a lot of fighting within the union," Capie said.

"As much as we want to develop a peaceful coexistence, collective bargaining always creates some kind of adversarial relationship.

"We will establish a series of positions and we will fight hard to maintain our management rights as delegated to us by the state of Illinois. And the union will fight equally hard to develop union rights."

However, James Sullivan, spokesman for the SIUC faculty union, said it is the goal of the union to seek fair compromises that benefit the entire school.

"We are wanting to work in a cooperative way toward the improvement of the University," Sullivan said.

University prepares for 10-year evaluation

ACCREDITATION:
Commission will allow SIUC degree program to be recognized.

WILLIAM HAYFIELD
DAILY EGYPTIAN REPORTER

Following the approval of an assessment plan, SIUC administration is preparing for a 10-year evaluation of the University by an accreditation commission that will allow SIUC to have its degree programs recognized by other schools.

Sheryl Bruten, director of the University assessment program that evaluates student learning, said accreditation allows SIUC degrees to be recognized by other universities.

"Accreditation is the basic certification that allows us to function as a University," Bruten said. "Our being accredited by North Central Association (of Colleges and Schools Commission) makes it possible for us to receive federal money."

Every 10 years, the University is evaluated by the North Central Association of Colleges and Schools Commission (NCA). The NCA is a regional commission that accredits SIUC and other schools, said John Dotson, chairman of the NCA's meeting committee.

Dotson said the committee is preparing task forces to create a self-study for a team of outside evaluators coming to SIUC from the North Central Association in spring 1999.

Dotson said the self-study will be used in the evaluation and is being prepared to include all aspects of SIUC, such as faculty relationships or the adequacy of the power grid.

"It may seem outrageous that we began this process in the summer of 1996 for something that is not going to happen until spring of 1999, but it is just barely enough time to get it all done," Dotson said.

He said the University must show the evaluators it has a stated purpose, effectively organized resources, integrity in its relationships and the ability to accomplish and strengthen its purposes.

Dotson said few education institutions are not accredited.

"It is so difficult to function without accreditation that that isn't many unaccredited schools," Dotson said.

"The ones that aren't usual the kind of places that advertise in the back of Popular Mechanics. He said the evaluation must also show the evaluators that the University is a functioning institution, not a political organization.

"We will establish a series of positions and we will fight hard to maintain our management rights as delegated to us by the state of Illinois. And the union will fight equally hard to develop union rights."

However, James Sullivan, spokesman for the SIUC faculty union, said it is the goal of the union to seek fair compromises that benefit the entire school.

"We are wanting to work in a cooperative way toward the improvement of the University," Sullivan said.

SUICIDE AWARENESS WEEK

The Daily Egyptian is published Monday through Friday during the fall and spring semesters and Tuesday through Friday during the summer semester. The Daily Egyptian measures 10.625 by 16 inches and consists of 25 pages. The newspaper is published by Student Express, Inc., 1-800-545-5575.

Advisement

TODAY

• SUC Library Affairs - "International Writing Workshop" Seminar, Jan. 20, 10 a.m. - 11 a.m., Wanda Library 1020. Contact the Undergraduate Office at 435-2818 to register.

• SUC Women's Giving - "Get Involved: Raleigh's Rosemary Simmons and Denise Wilkes," Honorary Fraternity Sorority Rush Workshop, Conshin Room in Student Center. Contact Patricia Wait 435-4500.

• Orchestra Christmas Fellowship - noon prayer service, Jan. 22, 12 p.m. in O'Fallon Chapel. Contact David 435-2461.

• SUC Library Affairs - "Intermediate Web Publishing Workshop." Seminar, Jan. 22, 11 a.m. - 12:30 p.m., Wanda Library 1020. Contact the Undergraduate Office at 435-2818 to register.

• Egyptian Showers Club Meeting, every Wednesday, 6:30 p.m., Room 109, Contact Amy 549-5536.

• Student Development - Student Life Advisory Council, Jan. 22, 5 p.m. in Room 109. Contact Janet 435-2457.

• College Republicans "Meet the City Council Candidates" Seminar, Jan. 22, 8 p.m. in Alumni Reading Room in Student Center. Contact Andy 331-1799.

• Women in Communications, general meeting, Jan. 22, 5 p.m. in Animal Reading Room in Student Center. Contact Amy 331-1799.

• NAACP SUC Chapter - first meeting of the semester, Jan. 22, 7 p.m., Activity Room B in the Student Center. Contact Allen 339-1634.

• African American Student Workshop - Auditions, "Portraits in Black," SUC University Library, 7 p.m. in Room 109. Contact Sherry 435-7909.

• SUC Library Affairs - "Introductory Writing Workshop" Seminar, Jan. 22, 11 a.m. - 12:30 p.m., Wanda Library 1020. Contact the Undergraduate Office at 435-2818 to register.

• Jordan Tim, Thursday, 8th hour, 12th floor, 8:30 a.m. - 11 a.m., Room 221. Contact Amy 531-1736.

UPCOMING

• Phi Alpha Theta History Society - Next meeting, Jan. 25, 9 p.m. in Room 109. Contact Rodney 529-3223.

• SUC Library Affairs - "Info Tech" Seminar, Jan. 21, 10 a.m. - noon, Student Union Library 1020. Contact the Undergraduate Office at 435-2818 to register.

Adopting a pet project

PUPPY LOVE: Local bar owner plans benefit for Humane Society.

ANNE FITZ BARR
DE FEATURES EDITOR

After adopting a puppy named Ozzie, and two cats, Yogi and Princess Zelda, from the Humane Society last summer, Sally Carter has now made the shelter her new pet project.

After going through the adoption process three times herself, Carter, owner of Hangar 9, 511 S. Illinois Ave., said she realizes all the work the Humane Society of Southern Illinois, located on Rt. 13 in between Carbondale and Murphyboro, does and said she wants to do what she can to help the shelter.

"It's a personal project," Carter said. "I adopted some animals from them last summer."

Carter said she is pooling her resources to do what she can for the shelter.

In an effort to raise money for the Humane Society, Carter is sponsoring a fund-raiser, "Howlin' for the Humane Society," tonight at Hangar 9. The $2 cover charge will go directly to the shelter.

"I think that we have an obligation to make sure animals are attended to," Carter said.

The Humane Shelter relies on people like Carter for more than half of its funding.

Janet England, manager of the Humane Society, said Carter approached her with the idea of a benefit — the first of this kind for the shelter.

"The more she (Carter) was out there, the more she saw and the more she could appreciate what she saw," England said.

The shelter takes in about 7,000 animals every year. So far this month, the shelter has seen 301 animals come through its doors.

One of those animals, a dark-brown tiger cat, snuggles with Becky Bass, who thinks she just might have a newfound friend.

"I lived on a farm, and we always had animals outside. Now I live in Carbondale, so I want to get a cat for inside," Bass, a junior in biology from Carbondale, said.

Although Bass may be taking home one of the many animals from the shelter, not all are so lucky.

England said the benefit hopefully will help the shelter provide a spay-and-neuter program it has been trying to start for two years. She said the program will help control the pet population in the Carbondale area.

"We do have an impact on the community," England said. "Without us, there would be a serious animal problem."

She said even though many animals from the shelter are placed in good homes, the public needs to be aware of the huge pet population.

"If they were all good homes we wouldn't be here," England said. "That's the biggest cruelty of all — not getting a pet spayed or neutered."

There will be three bands performing at the benefit who have agreed to donate their time and talent for the good of the shelter.

Candy Baker, rhythm guitarist of the Alboro Wine & the Cobalt Blues Band, said she is happy to be doing her part.

"We've all animal lovers and all have pets and have used the humane shelter," Baker said.
Confidential
On-campus HIV testing service positive move for SIUC students

IT TOOK A LONG TIME FOR SIUC TO initiate an HIV testing service to students on campus. Students have been paying an additional $3 student health fee for this service since 1994.

And when students finally began to receive what they were paying for, the testing service was limited to only "high risk" patients — those who fitted into a category of risky sexual behavior and intravenous drug use.

The confidential service now is offered to any SIUC student — regardless of behavior or sexual orientation — at the Student Health Service. A local health company ensured the service this semester by giving SIUC a $7,622 grant. Now it is up to the students to take advantage of the service's accessibility and locality.

There is counseling before and after the test, and students can only be tested every six months. Although there are at least 200 cases reported in 1995, actual numbers are estimated at more than 300, according to health officials.

AIDS IS THE SIXTH LEADING CAUSE OF death for 15- to 24-year-olds in the United States. That same age group is highest at risk for contracting the HIV virus.

Since its discovery in 1981, AIDS has engulfed this nation in a bitter, emotional battle to combat this incurable disease. In 1994, AIDS had claimed more than 250,000 lives since the disease was discovered.

In this state, 3,118 cases were reported in the same year and reports estimate that the actual number of cases is four times as much as reported. In Jackson County, 40 cases were reported in 1995, and actual numbers are estimated at more than 300, according to health officials.

UNTIL ALMOST THREE YEARS AGO, SIUC students had to go off campus to get tested for HIV. The option now is open for SIUC students. Get tested early and often enough to protect yourself, your partner(s) and your family.

“Our Word” represents the consensus of the Daily Egyptian Editorial Board.

Overheard

“My I don’t envy the union as a terrible, evil thing. But we should not just look at how the faculty can get the most money. Some perks and other benefits of being a faculty member go beyond the money. The question is whether the union will be successful in attracting good, quality faculty. I don’t think it will.”

— Larry Busch, SIUC professor in the School of Art and Design, on the possibility of using the new union to draw better faculty to the University.

FACING THE CHARGES: Plastic can be expensive convenience

As a junior and veteran SIUC student, I find it my duty to pass on what I’ve learned in these last four years to those less experienced. Today, I will make my suggestion relatively simple advice but a truth and wisdom to those who have yet to be tainted with the sorrow I bear. It is with fear that I write these words, for all of this too easily could have been avoided.

Fellow students, I beg of you, the next time you are propositioned over the phone or even on your walk to class by these vile seducers of youth, remember my words:

Credit cards can kill.

The credit-card companies took the best years of my life and replaced them with a 15.5-percent Annual Percentage Rate.

Bippy was a bright-eyed, fun-loving youth that arrived at the university in the autumn of his freshman year. Please to finally be away from home, Bippy immediately began the things that his parents warned him against, such as staying up late and curfiring under his breath. He could handle most of these vices without affecting his grade point average, but he also knew he hadn’t tried everything yet.

One day, as he walked home, Bippy was propositioned by a group of wizards who wanted to give him a magic wand — a wand that would enable him to purchase practically anything and would even produce cash on demand if stuck into the mouth of Gcho, the Happy Bank Cube.

This temptation was too much for Bippy, so he stole the wizard’s offer and took the magic wand. At first Bippy only used the wand to purchase fuel, food and the occasional $30 from Ksho for weekend festivities. Soon, he began to buy hopelessly needless items, such as 6-gallon tubs of mayonnaise and lawn ornaments even though he lived in a dorm.

It was rather obvious that Bippy was becoming addicted to the concept of "Buy Now, Pay More Later," and his roommate were worried.

When Bippy finally received his financial statement at the end of the month, he was horrified to discover that he was no longer the master of his financial future, for he was horribly in debt. To make a long story short, Bippy decided right then and there to destroy his magic wand.

Bippy now tells notes for the "Blow off Class Until Midterms" crowd in an effort to pay off his gargantuan magic wand bill.

Sound familiar, anyone?

I was seduced by the wand, and I destroyed it in a fit of rage. The credit-card companies took the best years of my life and replaced them with a 15.5-percent Annual Percentage Rate and a nauseating feeling in my stomach.

Now, I realize there are those out there that have successfully been capable of utilizing the wand and have paid off their bills on a timely basis. There is a name for these people. They are called Adults. Anyone with money he or she does not possess (college loans do not count) is not truly an adult.

I used to spend money that didn’t truly exist, and I am now paying the price. As two of my roommates, Credit cards can kill.

It seems wrong to me that these companies are allowed on this campus and are given the opportunity to seduce the innocent — like myself — offering a good old time for a substantial fee.

In closing, heed my words. Credit cards can kill and probably will ruin your once-promising future if you allow yourself to place one into your wallet and purse. They are agents of the dark side, and for those of you that have yet to allow yourself to become stuck in this insidious web of poison, please be wary.

As Mr. Vader once explained to his well-meaning son: "You Don’t know the power of the dark side."
Breast cancer deaths on the decline

SURVEY REPORTS: Increasing numbers of mammogram X-rays are preventing breast cancer in women.

WASHINGTON POST

More than three decades after the first large-scale studies of mammography began, an increasing number of American women appear to be getting the message that the X-ray test for breast cancer can save women’s lives.

In 1994, 56 percent of women aged 50 or older reported having had a mammogram in the preceding one or two years, according to a government-funded survey. But experts say the test still is underused, especially among women over 65 at an age group with an especially high rate of breast cancer.

For women in their forties, in whom breast cancer is much more uncommon, the question of whether to have regular mammograms has remained controversial because of disputes about its effectiveness and risks.

At a conference opening Tuesday at the National Institutes of Health, a panel of experts still hears new evidence suggesting that mammograms do prevent cancer deaths in women in their forties, although the benefit of the test is less than for older women.

The panel is to consider whether the data justify a recommendation for regular screening in this age group.

But for women who are 50 or older, there is no controversy.

The death rate from breast cancer in the women two to five years after their first mammogram. The death rate from breast cancer among women with a lower rate has been declining gradually during the 1990s, and most experts agree that the increasing use of mammography is a major reason.

Analysis of data combined from eight large studies suggests that while the age of 50, having regular mammograms reduces breast cancer mortality by about 30 percent because women are detected at an earlier, more curable stage.

Yet the test is imperfect. It misses about 15 percent of breast cancers and three out of four times, when a mammogram identifies a "suspicious" area of tissue, the lesion turns out to be benign.

Women whose mammograms are abnormal usually must undergo follow-up tests, which can be expensive and worrisome.

"Mammography is a life-saving technology and we must work to increase its utilization among women," said Susan Blumberg, deputy assistant secretary for women's health in the Department of Health and Human Services. At the same time, she added, "it is still a 40-year-old technology and it doesn't improve its efficacy.

"We're working on that front as well," she said.

James Saladin
Spokesman for SIUC Faculty Union

Our average pay is below our peers.

John Jackson
Vice Chancellor of Academic Affairs

Salaries and negotiations

Capie said the process administrators and union representatives will use to negotiate — known as collective bargaining — will continue because issues like salary increases will constantly have to be renegotiated.

"If there's a format we have to follow," Capie said, "When you get into issues like academic freedom, responsibility, promotion or tenure, and salaries, those things will be points of contention that will require constant compromise.

Capie said prior to faculty unionization, issues like salary increases could be resolved by faculty negotiating as individuals with the administration. Negotiations now will all have to get through a process that will have to be specified in the contract, Capie said.

She stated, if faculty members wanted to negotiate pay increases, Capie said those faculty members would find who is more than willing to pay them higher salaries.

He said those faculty would then use those counter offers as bargaining chips.

"Now you're going to have a confrontation with questions like, 'How do I deal with a counter offer?'" Capie said. "Some people do not like to be able to insist that you have the ability to negotiate individually, but we're not going to be able to retain that unless it's in a contract." But Albert Meleone, a political science professor who voted in favor of the union, said the members will have a stronger voice by being part of the union than by negotiating individually.

"Some people believe that the union will enable them to negotiate to negotiate for themselves," Meleone said. "But on the other hand, they think they have the power without a union anyway. They are told after the fact by the union what the outcome of their negotiations are going to be.

"And the technique of bargaining that says, 'I'm looking elsewhere, so what will you do to make me stay', is basically a dishonest line but that's the lineity in Anthony Hall. That's what you have without a union.

Also, Capie said the Union will give the faculty more leverage to negotiate with the school directly for more funding. He said those negotiations will be consistent with the Illinois Education Association — a state branch of the American Federation of Teachers that has been involved in more effective lobbying can be done on behalf of the faculty.

Sullivan said members already have spoken to local legislators about future cooperation with the school.

But Capie said faculty have no need for a union if they are already lobbies on issues that concern them.

"The assumption that this will be an effective way of getting lobbying power is absurd," Capie said.

"The faculty have always had this power. I don't know if any faculty member who before would have hesitated calling a legislator if really was a need because these are educated people.

"And even if the faculty do have a unified means of lobbying the Legislature, Jack Jackson, vice dean of academic affairs and provost, said the union still will have to convince the General Assembly that the university needs more money in SIUC faculty salaries.

"There is clear need for salary improvement," Jackson, who also is a professor in political science, said. "Our average pay is below our peers. That's why faculty pays faculty badly. The legislature has just not been willing to invest as much in higher education.

"The state ought to do a better job, and I hope the union can get the state to do a better job," Capie said. But Meleone and Sullivan agree that the individual bargaining of the parties can be more effective.

"There has been no real concerted effort of the faculty to lobby the state legislature in the past," Sullivan said.

"And it is hard to attract quality people and keep quality people if you have better salary levels." Giving faculty a greater voice in running the school will increase living conditions on Illinois.

Merit pay

Professors like Meleone also are concerned about the fate of merit salary increases, currently under debate at the University. Merit can be judged by the quality of a professor's research or by articles a professor publishes.

Jackson said faculty have reason to be concerned about the fate of merit increases because it is the natural tendency of unions to keep members on an equal playing field. And some faculty are concerned about whether the changes will include provisions for a system of graded merit pay with a merit fund to reward faculty who achieve above - average performance.

All professors and union organizers think merit pay is in any event important. And through his work as a professor, Sullivan said union members have spoken to local legislators about future cooperation with the school.

But Capie said the fact the school need the power that a union can provide to make a more significant impact. And if he said with pay raises already have spoken to local legislators about future cooperation with the school.

As a professor in the School of Art and Design, Busch said he also helps shape students. In the past, while he opposes the idea of a faculty union, he said that reality is that it is here and must be dealt with.

"I don't envision the union as a bad, evil thing," Busch said. "But I don't think they will ever get the money. Some perks and other benefits of being a faculty member go beyond the money.

The question is whether the union can give them a better, good quality, faculty. I don't think it will.

Israel shows concerns over South African arms proposal

No big deal: Israel's reaction to proposal more muted than expected.

Johannesburg — When a proposal by South Africa to sell $650 million worth of high-tech fire systems to Syria became public knowledge last week, the news set off verbal con· tests between the U.S. government and Peres, and raised questions about whether there would be any turbulence in otherwise smooth relations.

But the reaction was more muted from Israel, which might be expected to be far more alarmed at the prospects of South Africa helping its sworn enemy to potentially more fully equip its armed forces.

In contrast, the State Department, which threatened to cut off $32 million in U.S. economic aid to South Africa, Israeli officials have been more extravagant in their complaints that the transaction, if it were to go ahead, would be unhelpful to prospects for Middle East peace.

One reason for that low-key response would appear to be the possibility that breakdowns in South Africa build the weapons system in question — an electronic surveillance system that could help the Syrians upgrade their aging Soviet S-200 E272s, according to a U.S. government official.

The equipment would enhance the capability of the Syrian tanks for precision firing even in the dark, as well as their already formidable artillery.

Israeli officials have traditionally refused to comment on the nature of their military cooperation with South Africa during white minority rule and Visiting experts can.

Israel's chief arms supplier is the United States, which has a policy of not commenting on sales deals until those agreements have been signed.

But the officials have made it clear that they regard South Africa's military technology as a potential threat.

"There is a shared concern that although the sale may be acceptable to the U.S. government, it may not be acceptable to the South African government," one official said.

"The official said that if the sale were to go through, it would be a blow to the U.S. government's efforts to improve relations with South Africa."

**JUMPER**

continued from page 16

Maravich, an all-time basketball great and the first player to score 10,000 points, was killed in a car accident.

Maravich was known for his scoring ability and his unselfish play, which helped him set many records.

**NOVEMBER 14**

Maravich's death was a significant loss for the basketball world, as he was widely regarded as one of the greatest players of his time.

Rams name head coach

Dick Vermeil will be the new head coach for the St. Louis Rams, even though Vermeil has not coached in 14 years. Vermeil's contract was reported to be worth between $7.5 million to $9 million for five years. He replaces former coach Rich Brooks, who was fired after a 6-10 season with the Rams.

Vermeil left coaching after resigning from the Philadelphia Eagles in 1982, citing burnout as his reason. The 60-year-old coached the Eagles for seven seasons, while compiling a 57-51 record. He led Philadelphia to the playoffs in four straight seasons and also to a Super Bowl in 1980, which resulted in an Eagle loss. Prior to coaching for the Eagles, Vermeil spent two seasons at UCLA, where he took his team to the Rose Bowl in 1976 and compiled a 15-5-3 record.

Chicago replaces Turner

The Chicago Bears have hired Matt Cavanaugh, the former quarterbacks coach of the San Francisco 49ers, to replace Ron Turner as offensive coordinator. Turner left the Bears to become the head coach at the University of Illinois.

**NHL**

Lalime is player of week

The Pittsburgh Penguins' rookie goalie Patrick Lalime has been named the NHL Player of the Week. Lalime went 2-0-1 last week, including one shutout, and compiled a save percentage of .984. Pittsburgh is 13-2-3 in the games he started, is 11-0-2 in league play. Lalime leads the league in goals against average at 1.98 and in shutouts with 14. In the last 10 games, Lalime has allowed just 19 goals on 320 shots.

Lalime is the victor of the Penguins' unbeaten streak and goalie Patrick Lalime is the NHL's Player of the Week.

**NCAA BASKETBALL**

Kentucky loses top scorer

The Kentucky Wildcats have lost their leading scorer, Derek Anderson, for the rest of the season. Anderson will have reconstructive knee surgery that will end his college hoops career. He injured his knee in Saturday's game against Auburn University, and a MRI performed Monday showed that he had torn his anterior cruciate ligament. Surgery is planned for the next week to 10 days.

NCAA's No. 4 scorer out

After suffering a dislocated elbow Saturday against the University of Hawaii, Wyoming's LaDrell Whitehead may be out the rest of the season. The 5-foot-9-inch junior suffered the injury when he was fouled while driving to the hoop for a layup. He is expected to be sidelined for six to 12 weeks, which is the rest of his junior season.

Whitehead has been averaging 25.1 points per game, and he scored 27 points in the Cowboys 92-87 Dec. 27 win over the Salukis at the Cowboy Invitational.

Cyprus athlete jumps for SIUC

**AMERICAN STYLE:**

Kalogerou came to USA to train with Saluki coach Cornell.

**LEON DIVANCE**

DAILY EGYPTIAN REPORTER

Neophytos Kalogerou always wanted to become a champion high jumper. However, Kalogerou realized that if he remained in Cyprus the competition could not force him to work hard, simply because it was not challenging as in the United States.

For Kalogerou the way to become a champion was to come to America to train.

So when Kalogerou was recruited by SIUC track and field coach Bill Cornell in 1994, he was intent on reaching that goal. "I came to SIUC to work on becoming a high jumping champion," Kalogerou said. "I want to become an All-American. My goal this year is to jump 7-3. That's my ceiling."
