Snow Blankets Midwest; 
Warmer Weather Forecasted

By THE ASSOCIATED PRESS

A massive March snowstorm, the worst in recent years in some areas, closed schools and businesses, blocked roads, and disrupted ground and air travel Tuesday in a sweep from the Great Plains to the Northwest.

The storm dumped snow up to an estimated 18 inches in northwestern Arkansas and gusty winds whipped it into drifts 5 feet high. It was the area's worst snowstorm in recent memory. The storm was the worst of the winter in Oklahoma where up to 8 inches fell. Paris of Missouri had as much as 17 inches.

The snowstorm howled across Illinois leaving roads throughout the state icy and hazardous.

Snow continued to fall early in the evening in southeastern Illinois and some central sections. The snowstorm moved through Illinois on gusty northeast winds of 20 to 30 miles and hour.

Temperatures dipped during the late afternoon and readings early Tuesday evening ranged from 26 at Chicago and Champaign to 34 at Quincy.

The snowstorm caught highway departments by surprise and slowed morning rush hour traffic in Chicago and Downstate areas. There were numerous accidents due to road conditions police reported.

Skies cleared in the northwestern Illinois-Temperatures will average 5 to 10 degrees above normal Thursday through Monday; temperatures will average 40 to 47. Normal lows are 23 to 30. Warming trend continues.

Student workers paid their fees Tuesday evening up to 30 miles an hour in many areas.

Five day forecasts: Northern Illinois-Temperatures Thursday through Monday will average 4 to 6 degrees above normal. Normal highs are 40 to 47. Normal lows are 23 to 30. Warming trend continues.

Southern Illinois-Temperatures will average 5 to 10 degrees above normal Thursday through Monday. A little cooler Saturday and otherwise warm. Normal highs are from the upper 40s north to around 60. Normal lows range from the upper 20s north to around 40 south. Precipitation Friday and again by late Sunday will average one-half to three-quarters of an inch.

Gus Bode

Gus says it turned out to be a pretty good quarter after all. He flunked only two courses this one and went only $700 into the hole.

Textbook Service

Hours for returning books to textbook service in the basement of Morris Library this week have been announced.

Today and Thursday the service will be open from 7:30 a.m. to 8:30 p.m., and on Friday from 7:30 a.m. to 4:30 p.m.

Saturday and Monday it will be open from 8 a.m. to noon.

A Look Inside

$6,000 Granted

Anthropologist

The Social Science Research Council has awarded SIU anthropologist Roy Wagner a $6,000 grant for a year-long research study among the Daribi tribesmen of New Guinea.

Wagner, assistant professor of anthropology at SIU, will analyze the social structure of the Daribi, a primitive culture located in the foothills of the old Papuan territory now controlled by Australia. Special emphasis will be on rates of marriage, divorce, polygamy and other social customs.

Wagner will leave for New Guinea in June. An earlier study of his work will be the University of Washington and the Bellagio Foundation, resulted in a book, "The Curse of Soww," dealing with native symbolic principles of the Daribi. It was published last year by the University of Chicago Press.

Wagner was at the University of Chicago before joining the SIU faculty in 1966.

Guilty Plea Entered

An SIU student, Sandra Addison, 21, from Chicago, has entered a plea of guilty to the Carbondale City Court to a charge of illegal possession of a narcotic drug and was fined $500 fine, $50 costs and placed on three years probation.

Poster Philosopher

Reflects Final's Spirit

Sign of the Times: "BECAUSE OF LACK OF INTEREST TOMORROW WILL BE CANCELLED," a campus-wide poster bearing this announcement appeared in the window of a student-occupied house as the open of final examination week.

International Students Plan Party March 22

The Visiting International Student Association will sponsor an international party during the spring break. The party will be held at 7:30 p.m. on Friday, March 22, in the University Ball Rooms.

Any SIU students, international or American, in Carbondale during the spring break are invited to attend the party.

Demonstrations of dances

'Exceptional Child Study Subject for Faculty Members

Four SIU education faculty members will appear on the program of the 46th annual International Convention of the Council for Exceptional Children in New York City April 14-20.

They are Chairman James Crowner of the Department of Special Education, Thomas E. Jordan, Lee M. Joiner, and Thomas M. Shea.

Crowner said he would present a paper, "The Field Conference: An Alternative for Teacher Educators," and Jordan will preside over a research symposium on factors that influence learning in exceptional children and at another session will present a paper titled "The Early Developmental Diversity Program."

Joiner's subject will be "Self-Concept Research: Definition Problems with a Common Language Construct," as main symposium speaker at one session. Shea's symposium paper is titled "The Teaching-Learning Process in Observation Seminars."

Political Blackmail

Political blackmail has been accomplished in Carbondale.

The city employees, by walking out on March 15 and thus mobilizing opponents of the Blue Ribbon slate and the city manager form of government, have caused a community of wide debate, serious turmoil and economic hardship.

The question was unfortunately become one of blackmailing the city government into final capitulation on grounds other than the employee's grievances.

The validity of those grievances will now never be determined. What is determined is the employees placed the city in danger, sought to assert their own power over that of the mayor, and embittered opening festering wounds to a large part of the country.

What must seriously be questioned is the employees' willingness to let political opponents of the majority of the administration counsel them and speak for them.

If the employees through their attorneys, stayed on the job and worked through legal channels, their grievances might have been respected.

The proper channel to fight the administration is the channels of the majority of the administration is through the ballot box, not through a power play before the eyes of the country.

The wounds may soon disappear under surface, but the city will continue to bleed internally.

John Epperheimer

From The Chapel Hill Weekly
Chapel Hill, North Carolina

The report of the University Trustees meeting last week contained a bit item, to the effect that the "members of the Visiting Committee suggested that the administration attempt to improve what appears to be unbalanced reporting by the news media of campus events."

This suggestion undoubtedly had reference to last year's Chapel Hill visit by Vice President Hubert Humphrey when a handful of peace pickets received more attention from the news media than the Vice President did.

The Chancellor was somewhat chagrined by that news coverage and said so publicly.

The Visiting Committee members didn't cite any campus events specifically, but they obviously felt that the news media is too often inclined to the spectacular and neglecting many of the quiet but truly significant events.

We can't argue with that, because it is plain truth. Newspapers, radio and television stations being the treasurers they are, and whose existence depends largely on compelling attention, reach for the spectacular, more or less as a conditioned reflex.

The question we raise, however, is just how the Visiting Committee would suggest the University administration attempt to improve reporting of campus events.

Is the Visiting Committee suggesting that the University tell newspaper, radio and TV reporters how to do their jobs? Is the Committee suggesting, perhaps, that the University attempt to manage the news, suppress, or maybe color it slightly?

We have an idea that the Visiting Committee didn't really have anything concrete in mind and just tossed out an idle suggestion as an expression of its desire. For the sake of the University, we hope the administration will interpret it that way and do nothing to implement the suggestion.

We don't mean to say that the University administration is unresponsive to student protestations.

But it is a shame to have such beauties as the Trojan and his beautiful white charger, and the Saluki with his pointy nose and alert ears, not get their chance to perform.

I'm not pretending to be an expert in the football world of the past years, but I think the Salukis and the Trojan were the best mascots that I saw.

The Salukis and Trojan are more than just animals, they are intelligent animals and should be presented as such, and this is especially true in SIU's case for it is the only university with this particular mascot.

A Saluki would be a great mascot for the University, and I think the University would be well advised to buy a Saluki and train it to perform as the Trojan does.

We can't say that the Salukis and Trojan would be as good as the Trojan, but they are certainly better than the SIU mascot, the Herdman.

The Salukis and Trojan are more intelligent than the Herdman, and they would be more fun to watch.

We think the University should seriously consider buying a Saluki and training it to perform as the Trojan does.

Topics of the Times

The Spread of the Eagle

By L.D. Bergin

In the National Ledger Times, Carlow, Ireland

WHAT ARE American aims in relation to world power? Does the United States threaten every possible means to maintain her position?

If we have any doubts about these aims, we might study the request of Senator J. William Fulbright, the Democrat foreign policy spokesman, who has pressed the United States Department of Defense to make public a highly secret study on how the United States can "maintain world leadership in the future."

Senator Fulbright has read this secret study, which was carried out at the request of the United States Defense Department by the Douglas Aircraft Corporation under the original title of "Strategic Alignments and Military Objectives." It was later given the more involved title "Strategic Alignments and Military Objectives in World Power Configurations, the United States and Canada." Senator Fulbright has asked for the de-classification of this document which cost the American Army $89,500.

His reasons are that it involves American foreign policy as followed by the Washington Administration of President Johnson.

When the American Assistant Secretary of Defense, Mr. William P. Wilson, was asked why this material was not now made public, he remarked that publication could produce serious repercussions to the United States abroad.

Several senators have been permitted to read it. One of them has remarked that some of the conclusions of this report are plainly frightening.

The American Department of Defence apparently espoused a propaganda on what they call "social science research." About $14 million of this goes to the Federal Reserve System, Contract Center, which is a cover name for several brains Trust organizations like the Douglas Aircraft Corporation, the Institute for Defence Analysis and the Research, Analysis Corporation.

American Policies

Universities also get some of this money for suggesting their plans to American foreign and military policy.

"Over half a million goes to the large industrial concerns which have so-called "social science" research departments like the Douglas Aircraft Corporation, which has, of course, a vested interest in American foreign policy." The official publication of the American Commerce Department lists contract awards and invitations to bid for such contracts. And one of these which was granted to the Douglas Aircraft Corporation asking its researchers to perform the research study called "Pax Americana" describes this as a research study of the elements of national power, the ability of select nations to apply the elements of the United States national power and the variety of world power configurations to be used as a basis for the United States to maintain world hegemony in the future.

The people of the United States have many great and wonderful virtues. And their system of government has been copied and envied in many countries of the world. Their Constitution is a fine document and guaranteeing the very best in terms of human liberty. The United States is, of course, a new nation. But because it has all the fine attributes which are so well known never to mean that it has not imperial designs. Every new nation tries to expand, onwards to its periphery. And most territorial conquests can be seen as part of economic acquisitions and part of the peripheral expansion for the purpose of "preventative defence."

Power Vacuums

The power vacuum of the world have in history become the prey of great and powerful nations.

A recent article in "The Messenger" of Madison, North Carolina, nails the legend that the United States is the most benediction country. This legend is advanced since most citizens of the U.S. regard themselves as part of the most benedictory country under the
Graduate Study Offers Little Draft Protection

(EDITOR'S NOTE: Members of the Feature Writing Class recently conducted a number of interviews to get a sampling of student opinion on the current draft situation. This story is based on information gathered in those interviews.)

The Ivy-covered walls of the college campus are no longer a citadel for those who seek knowledge and growth. Increasingly they have become a means of protection from Uncle Sam's Draft

However, according to Li. Gen. Lewis B. Hershey, national director of the Selective Service, those protective Ivy walls will soon come tumbling down, the result being the elimination of draft deferments for graduate students.

Fish Research Laboratory

Fish Beste Pages for Insect Spray

A common household insect spray shows promise for use as a fish drug, according to SIU fisheries researcher William Lewis.

Lewis said the spray "Thanite" is superior to the commonly-used rotenone in that it permits live removal of bass from treated waters.

Fish exposed to rotenone die unless put through a complicated "detoxification" process.

He said it is less dangerous to handle than sodium cyanide, which also can be used selectively. Writing about his study in the Progressive Fish-Culturist, Lewis emphasized that the insecticide has not been approved by the U.S. Food and Drug Administration for fish-drugging outside the laboratory.

The insecticide was two to three times more effective on bass and sunfish than catfish, tadpoles and shiners, suggesting use for selective management.

Lewis said Bass recovered readily when returned to fresh water.

Lewis is director of the SIU Cooperative Fisheries Research Laboratory.

in 1968.

In the long run it can hurt your country.

The new draft regulations also, of course, affect women.

Sarah Warneke, a junior majoring in business education, and Alex Hardy, also a junior, had planned to be married the summer after their graduation.

Alex wanted to go to graduate school then," Miss Warneke said, "but this new draft regulation will prevent that.

"I think all undergraduate and graduate school students should be exempt," she said.

Looking into the future we must have some more highly educated people working for this country when the war is over.

Thus, the draft controversy on this campus rages on and apparently will continue in spite of objections from students and educators.

One student who asked for anonymity reduced the whole matter to resigned absurdity: "Draft best-o-No students."
Workers Will Receive Paychecks on Friday

SIU students who work for the University will be paid this Friday at the Bursar's office.

3 Students Fined For Goods Stolen From Holiday Inn

Three SIU students, all living at Stevenson Arms Dormitory, entered pleas of guilty Tuesday to theft of goods valued at less than $150 from the Holiday Inn, Carbondale, in Jackson County Circuit Court. They are: Robert J. Blaske, 19, Nevada; Joseph Logsdon, 18, Shawneetown; and Danayton, 18, Sycamore, were fined $250 plus $15 cost each and placed on probation for two years.

Richard Richman, state's attorney, said the original charge had been reduced.

Coed Guilty on Charges Of Theft in Book Store

An SIU coed entered a plea of guilty to theft of a book valued under $150 Tuesday after being charged with taking a high intensity light bulb from Southern Illinois Book and Supply store, Carbondale. Kathryn Bloor, 21, of Geneva, was fined $25 and $15 costs and placed on probation for one year, according to Richard Richman, state's attorney.

Driver Fined $150

Rodney Fitzgerald, 21, from Clifton, entered a plea of guilty in Jackson County Circuit Court to reckless driving and was fined $150 plus $15 costs.

High Speed Train Serving Carbondale Appears Far Away

Some day there may be an Illinois Central passenger train which can zoom between Carbondale and Chicago at a cruising speed of about 160 miles per hour.

Vernon R. Paul, district passenger sales manager for the IC, said plans for such a train are just in the thought stage.

Whether it ever becomes a reality will depend upon the success of the high speed trains which are being run in the megalopolis area in the northeastern United States.

Paul said the development of these high speed trains, modeled after Japanese trains, is primarily being handled by the government much the same as passenger planes are being developed.

"The trains being used in the Northeast were built by the government and are leased by the railroad company," he said.

Little of the railroad industry's research dollar is being spent on the development of passenger facilities, Paul said. "Even the Santa Fe which has spent much more money promoting passenger travel is finding its passenger loss is greater every year," he said.

This high speed train, if it were installed at the Illinois Central, would serve just the principal cities between Carbondale and Chicago. The 160-mile-per-hour cruising speed is about twice as fast as present passenger train speed, according to Paul.

Paul said he would guess that the passenger fare on the new high speed trains would have to be about 15 per cent more than present fares.

James P. Ritey, Formerly of SIU, Dies in Khe Sanh

Rites for James P. Ritey, an SIU graduate from Zeigler killed Feb. 22 in Vietnam, were held Tuesday at Royalston. He was the first Vietnam fatality of an Air Force ROTC officer commissioned at SIU to be reported to AFROTC headquarters.

Funeral services for Ritey were scheduled for 10:30 a.m. Tuesday at St. Aloysius Catholic Church in Royalston with burial in the church cemetery. Ritey was a Marine Corps captain at the time of his death, having joined the Corps after serving six years in the Air Force. He was killed near Khe Sanh Air Base when a helicopter he was operating was hit by ground fire.

Ritey was a cousin of William O'Brien, SIU faculty member and a colonel in the U.S. Marine Corps Reserve.

CIVIL WAR LETTER—Jane Merchant, document classifier in the Archives of Morris Library, displays a letter to Civil War General William T. Sherman authorizing the surrender of the city of Raleigh but begging his protection for the state's charitable institutions and the State Capitol. At left is a portrait of the Union conquering general. Both items have been acquired by the library in a collection of some 300 documents, letters and portraits given to the University by Philip D. Sang of River Forest.

At Bursar's Office

The pay will cover the same two-week period which would have been normally scheduled for the coming Monday.

According to a spokesman, the checks will be available at the Bursar's office for a week, then those which have not been claimed will be turned over to the disbursements office.

"Those students who want to have their checks forwarded to them can leave a self addressed, stamped envelope with the disbursements office," according to Roy Earl Tally, disbursements officer.

All other checks can be picked up when the students return for next quarter, he said.

Warning Device Test Reset for Wednesday

The new civil defense warning device on top of the SIU power plant is scheduled to be tested at 3:45 p.m. Wednesday, according to Frank Bridges, coordinator.

The test was originally scheduled for last Friday, but was postponed until this week, he said.

The new device is supposed to be much louder than the one it replaced.

Fulbright and Rusk
Reach No Agreement

WASHINGTON (AP) - Sen. J. W. Fulbright failed Tuesday to win the administration's promise to consult his Foreign Relations Committee before deciding whether to send more U.S. troops to Vietnam.

"If more troops are needed," Secretary of State Dean Rusk told the committee, "we will—as we have done in the past—consult with appropriate members of Congress.

With that, the two-day nationally televised and broadcast Rusk-Fulbright confrontation ended. Although the Arkansas Democrat told a newspaper he was not satisfied with Rusk's answer on consulting Congress, he appeared publicly to accept Rusk's promise to appear in closed sessions to expand on his limited public explanation of the administration's Vietnam policy.

The testimony-totaling almost 1 1/2 hours in two days—produced no announced changes of mind or policy on either side. Most of the 18 committee members took advantage of the national television exposure to make public statements of their stands on the war.

Rusk repeatedly told the committee he couldn't get too specific about the war in such a public forum.

He said the United States will adhere to its present policy and stick out the war until an acceptable peace can be negotiated with North Vietnam.

But Rusk said he can offer the committee no present hope that Hanoi is interested.

"We have no reason to believe," he said, "that they will not continue military operations full-scale.

But the key question that dominated the hearings—congressional involvement in future decision-making on the course of the war—went unanswered.

"He never did answer us," Fulbright told newsmen later. "He didn't say positively he would, and he didn't say positively he wouldn't.

"Asked whether Rusk's testimony had altered his opposition to President John F. Kennedy's course in Vietnam, Fulbright said, "I was convinced—my worst fears."

Sen. Joseph S. Clark, D-Pa., said he had "reluctantly come to the conclusion that it is more and more likely the decision will shortly be made to send more troops—and that we on this committee are more and more likely to read about it in the newspaper.

On the other side of the Capitol, meanwhile, Rep. Paul Findley, R-Ill., announced that more than one-fourth of the House had agreed to support a resolution calling for an immediate study of U.S. policy in Southeast Asia.

Findley said there is "a strong, substantial and bipartisan feeling in the House that no decision to commit large numbers of additional troops to Vietnam, nor any other fundamental decision on war policy, should be made until and unless there is a serious consultation with and action by the Congress.

There have been reports the administration is considering dispatching up to 20,000 additional troops to Vietnam, but the United States will stem the drain of terrorists over the Vietnamese New Year.

Fulbright, demanding a congressional role in deciding the future course of the war, told Rusk the conflict is "at a crucial turning point."

"What I want to talk about," he said, "is the exact, precise plans you have on escalation...I believe we could make a decision if we were given a chance to do so."

The war, Fulbright said, has reached a point where new decisions will determine "whether we either go down the road to all-out war or to a negotiated solution."

Gold Speculators Raid European Markets

LONDON (AP) — Gold speculators stepped up their raids on Europe's markets Tuesday and economists said only "concrete measures" by the United States will stem the steady drain threatening the world monetary system.

Gold sales were heavy in Frankfurt, Rome and Brussels and reached a 1968 high in Paris.

In London, by far the biggest center for gold dealings, demand was building apparently toward an end-of-week peak.

Close to 100 tons was believed drawn off in dealings in Europe Tuesday from the monetary reserves of the Western banking nations.

The U.S. Treasury announced the transfer of another $450 million worth of gold—about 400 tons—from the nation's dwindling stock to meet the American share of sales through the seven-nation international gold pool in London.

McCarthy Runs Strong Second

CONCORD, N.H. (AP) — Sen. Eugene J. McCarthy, D-Minn., whose challenge to President Johnson's Vietnam war policies was pooh-poohed by the political pros, ran a strong second Tuesday night in returns from New Hampshire's presidential primary.

With 38 per cent of the expected total vote tabulated as press time, McCarthy, the soft-spoken, easy-going campaigner who has no expectation of being nominated, was collecting 36 per cent of the counted ballots.

McCarthy's name was on the ballot and Johnson's was not. But in his rosiest dreams, the Minnesota senator had hoped for only about a 30 per cent vote.

This much was calculated to keep his drive against Johnson's Asian course emotionally and financially alive for a series of additional primary challenges in Wisconsin April 2 and in Nebraska and California.

On the Republican ballot former Vice President Richard Nixon was running away with 80 per cent of the tabulated vote. He was opposed by a write-in campaign for New York Gov. Nelson A. Rockefeller.

Nixon has called for more effective use of military power to end the conflict. He has contended that Johnson has drifted into a position where he cannot gain an honorable settlement. He has promised to end the fighting, if elected, but hasn't said how.

McCarthy has called for greater efforts to bring about negotiations. He has opposed escalation of the fighting and has plugged for a coalition government in Saigon in which the Viet Cong would be represented.

The Rockefeller write-in was aimed at equaling the 15,587 count Nixon got on a similar write-in in New Hampshire in 1964 when he was not an avowed candidate.

In that year Barry Goldwater topped Rockefeller 20,692 to 19,504 but Henry Cabot Lodge won the top spot with 33,007 write-in votes.

Rockefeller To Announce Decision By March 22

PITTSBURGH (AP) — New York Gov. Nelson A. Rockefeller was expected to decide by March 22 whether to become an active, declared candidate for the Republican presidential nomination.

He observed newsmen that March 22 was the deadline for deciding whether to withdraw his name from the primary ballot in Oregon.

If he should withdraw, he said, it would be difficult to become a declared candidate later. To withdraw from the Oregon race, he said he would have to file a statement that he was not a candidate now and would not become one.

"That would be a very difficult thing to do," the governor said. Therefore, Rockefeller agreed, March 22 was the critical date for deciding whether he should plunge into the White House contest.

Meanwhile, he repeated that he was "ready and willing to serve the country when and if there is a genuine call." Rockefeller commented at a packed news conference after receiving an award in Pittsburgh for his efforts in promoting modernized transportation in New York State.

"He deserves it," Rockefeller said, predicting that Nixon would capture 70 to 75 per cent of the vote. "He's worked hard for it."

Rockefeller said he expected the write-in effort for him would net 10 to 15 per cent of the vote.

At a news conference, Rockefeller discounted the importance of the New Hampshire primary, saying it was "not a true test" since Michigan Gov. George Romney pulled out if there had been a major official entry.

He also denied a report that he had offered the vice presidential nomination to California Gov. Ronald Reagan.

"First, it isn't true," he said. "Secondly, it would be presumptuous..."

DE BATE FINALISTS—Novice and varsity debaters from SIU participated in a joint tournament Saturday at Southern Illinois University at Edwardsville. They are, from left, Dick Holt, John Sims, Bob Harris and Dick Montgomery. Holt and Montgomery placed first in the novice competition, and Harris and Sims finished third.

$150 Device for $5

Student Builds Own Balance

A student in the Department of Geology has duplicated a $150 device at the low cost of $5, and it works! Victor Gallagher, a junior from Evansville, Ind., majoring in geology, constructed a jolly balance, a device used to measure the specific gravity of minerals, as an extra project for his mineralogy course.

Gallagher used for the balance two curtain rods, a small piece of sheet metal, the cap from a prescription bottle, a few pieces of wood, a strip of paper, a spring, a small piece of string and several bolts.

The regular device is basically a metal structure, but the homemade representation observes all of the fundamentals of the jolly balance and works effectively, Gallagher said he completed the construction after about four hours.

Jen-bo Fang, associate professor in the Department of Geology, said, "This was something he (Gallagher) wanted to do, and he did a good job. There are many things students in geology can do with a few dollars if they are willing."

Gallagher became interested in a professional career in geology after working in oil fields for four years after completing high school. Presently he is working during the mornings at the Ziegler Oil Field, Ziegler, Ill. He said he hopes to become an independent operator in the petroleum industry after graduation. This summer he will take the geology field course sponsored by the SIU department in Canon City, Colo., for eight weeks.

"I'm going to take it (the homemade jolly balance) along. I think it will be very helpful," he said. He will study rock structures and types in the field course.

Gallagher said his device also makes his hobby convenient, for it can be used to measure samples he collects.

Summer Seminars Announced

The International Field Studies Program, sponsored by the Education Division of the Edwardsville Campus, will conduct four travel seminars this summer open to both undergraduate and graduate students.

Students may receive four hours credit for one of the courses.

The courses, instructors and dates are as follows:

The course in East European History, Stanley Kimball, June 8-29; Innovations in European Education, Henry T. Boon, June 9-30; Seminar in European Geography, Melvin E. Kaseck, August 3-24; and Mexico: Window to Latin American Education, Harvey Taylor, June 7-17.

BIG CITY NOT ON MAP

The nation's fourth largest city in land area was not on maps six years ago. Chesh- poake, Va., covers 377 square miles.

BIG CITY NOT ON MAP

The nation's fourth largest city in land area was not on maps six years ago. Chesapeake, Va., covers 377 square miles.
College Competition Varies by Degree

Competition for 1968 bachelor's degree candidates at the nation's colleges and universities is running slightly ahead of last year's record high, although offers to doctoral candidates are down 18 per cent and those to master's degree candidates have slumped 31 per cent.

These figures, based on a nation-wide survey at 115 colleges and universities conducted by the College Placement Council, were cited today by Roye R. Bryant, director of SIU's Placement Services.

Bryant attributed the dramatic drop in job offers to advanced degree candidates to business and industry fears that many of these graduates would be drafted shortly after graduation, even though the survey was under way (January and February) before the recent Selective Service directive restricting draft.

Theta Xi Initiates New Members, Pledges

Theta Xi Fraternity recently initiated new members. They include Bob Aikman, Fred Brooks, John Cooper, Bill Fusselm, Bob Gereg, Dave Greeness, Bill Harmon, Joe Logsdon, John Mullins, Jim Norman, Ray Genius, Rick Roemer, Gary Swiecik, Wayne Tate, Murry Watson, Pete Wickman and Ron Willis.

Initiated recently into the winter pledge class were: Clayton Behm, Chris Buntin, John Carter, Ralph Davis, Burnett Franks, Pete Gohardy, Tom Kaseenberg and Doug Zeni.

Materials Institute Scheduled for Experienced Teachers

As institute to develop teacher competencies in both book and non-book equipment and materials necessary to enable them to direct college instructional media centers will be held at SIU. It will be financed through a $148,000 federal grant.

Announcement of funds to operate the project, an institute for training directors of instructional media centers for junior colleges and small senior colleges, was made by Rep. Kenneth J. Gray. The money, granted by the Department of Health, Education, and Welfare, will support an institute to be conducted by the department of instructional materials in the SIU College of Education, Gordon K. Butts, associate professor of instructional materials, will be program director.

Experienced teachers with master's degrees will be trained. Participants will be given intensive courses in the latest technology developments of responder systems, computer-assisted instruction systems, and other equipment including video tape replays.

Entomologist Gets $9,900 Subsidy

The National Science Foundation has awarded SIU entomologist John Downey $9,900 to continue support of his research on the immature stages of Lycaenidae, a family of butterflies.

The project was started with a NSF grant in 1964 and continued two years later. The latest grant, supporting the work until June, 1969, brings the total amount of funds provided by the Foundation to $35,500.

The Downey project involves variations and evolution in Lycaenidae collected from all parts of the world and is expected to provide clues as to how patterns of evolution develop in lower animals.

The institute will be, for the academic year starting Sept. 15. The pre-institute period of the program will start later this month.

American Folk Ballet Tickets Being Sold

Tickets for the presentation of the American Folk Ballet on Saturday, April 6, at 3:30 and 8 p.m. are now on sale at the Information Desk at the University Center.

Tickets which range in price from $1 to $3.50 may be secured by mail from the Student Activities Center.

Corner of E. Park & S. Wall (Across from Brush Towers)
Concern Group Favors Vietnam De-Escalation

A group of seven clergy and about 40 laymen met Sunday at the Student Christian Foundation to discuss policies concerning de-escalation of the Vietnam war.

The group adopted the title Clergy and Laymen Concerned About Vietnam and discussed the position taken by the national organization of the same name. The meeting represented a variety of opinion and all present were not in complete accord with the "position paper" on every point.

The group did unanimously support these resolutions: The war can and should be de-escalated, particularly by stopping the bombing of North Vietnam; steps should be taken to bring a settlement of the political, social, and economic issues in South Vietnam; and resources now devoted to the war should be redirected to the solution of pressing problems at home and abroad.

The Rev. Mr. Allen Litt was elected chairman of the group. Five committees were formed to give attention to the following areas: communications with the media, draft information, political involvement, relations with churches and community organizations, and group action.

The following persons are acting as chairmen of the committees: James Benziger, the Rev. Mr. John P. Meyer, Paul Schlip, Mrs. Charles Rice, and Mrs. Joseph Leonard.

Five Ag Students Initiated in FFA

Five SIU agriculture students are new initiates of SIU's Collegiate Chapter of Future Farmers of America. The winner term membership additions are: Michael Thompson of Buffalo; Ronald Monte of Kenney, John Rentfrow of Neoga; Robert Maschoff of Nashville and Jonathan Cox of Omaha.

The SIU organization is the only collegiate chapter of FFA in Illinois. Its membership is composed primarily of agriculture students who are preparing to become high school agriculture teachers or who were active in Future Farmers of America activities while in high school.

Cut loose in a Cutlass.

We'd invite you to check our specs against competition (we'd love quite nicely, thank you!), but that's too much like homework. And you've got enough of that. Indeed, slip into this low-along, low-priced youngmobile—and let Cutlass S do the teaching.

Cruise it. Corner it. Brake it. Park it.

This one handles like it had handles.

And the best part is the Cutlass S price. It's as streamlined as its styling. Hide-away wipers, levered hood, side marker lights, all the new GM safety features—all standard. Today. See your Olds dealer. Tonight. Cut loose in Cutlass.
Wilkinson Boosts Caliber of Wrestling

By Dave Palermo

Few SIU coaches can boast of increasing the caliber of their respective sports as well as Coach Jim Wilkinson has in wrestling.

When Wilkinson arrived at Southern in 1950, he was faced with a 3-3 record in football and a 1-5-1 record in basketball. Since then, he has led Southern to a record of 96-51-6 in 16 years.

The Salukis have scored points in NCAA competition every year since his arrival and in 1964 finished fourth in the nation. It was that year that he was chosen "College Wrestling Coach of the Year."

From 1955-61, Wilkinson's teams have won a total of 42 matches while losing only seven. In the last two years he was credited with a 25-8 record. Wilkinson's desire is to schedule the toughest teams possible and not to accumulate an outstanding record. "I don't really care about a good win-loss record," said the veteran coach. "What I try to do is schedule the best competition possible for the boys."

This season has been a prime example of his philosophy.

The Salukis opened the dual meet season against a strong Colorado State team and also met Oklahoma State, Indiana State and Iowa State, all included among the top ten wrestling teams in the nation.

A veteran of four years in the Army, Wilkinson is constantly on the go. When not leading the SIU grapplers, he instructs a junior class composed of persons just trying to get back into shape or attempting to learn self-defense procedures.

Wilkinson, president of the NCAA Wrestling Coaches Association, is one of the chief architects of the plans for developing a Wrestling Federation to combat disagreements with the NCAA.

A collegiate wrestling standout, he won the Big Ten title at 157 pounds in 1943 when he attended the University of Indiana. He then enlisted in the Army before coming to Southern as a coach in 1946.

For the 1950 season, Wilkinson moved to Oregon State University, where he gained a second-place finish in the strong Pacific Coast Conference.

No Standards Set for Selection of Referees

By Greg Stannard

Today rules cover almost every conceivable aspect of college sports, yet no national rule exists for the selection of referees in wrestling.

What keeps the officials honest is simple, said Fred Huff, sports publicity man for SIU. "A coach isn't going to come in to play you unless you have good officials," said Huff.

Officials are usually assigned to a game by conference. SIU is affiliated with the Missouri Valley Conference, which, said Huff, "include officials as part of that contract."

Without conference accreditation of officials, said Huff, "it's a school who go out and hire men ( referees biased to the school hiring)." Even with conference referees, said Huff, there are times when you are not happy with the officials. If so, you can do one of two things, refuse to play with the referees selected or else not schedule the team in the future, he said.

The Missouri Valley Conference had "four or five good men," said Huff, "all of them capable of a fine game but not to a college's liking."

Unitas Hopes To Play At Least Five Years

COLUMBUS, O. (AP) — John Unitas, star quarterback for the Baltimore Colts, hopes to play football until he's 25.

That's what the former $60,000 game semi-pro quarterback said when the Touchdown Club here recently honored him as the pro football player of 1967.

"I feel that I can play five more years," said the crewcut athlete who will be 35 on May 7. "Of course, that depends on the type and extent of injuries I might receive."

Unitas has a knuckle injury which required surgery in 1965 and has a painful shoulder in 1966.

At Colt Coach Don Shula's suggestion, Unitas did cut down some on his practice time last fall. Even though he altered his passing style by using more shoulder motion with a more rigid elbow, limited practice seemed to help his passing.

The quarterback had a .585 completion record (255 out of 438 and 3,428 yards for 20 touchdowns.

Unitas thinks it is unfair that the Colts and Los Angeles Rams didn't meet in a playoff after finishing with identical 11-2 records in the Eastern Division. The two teams split but the Rams had more points in the two meetings, 58-34, and got the National Football League semi-final spot against the Packers.

The Rams bowed to the Packers but that's not to say that the Colts would have lost to Green Bay.

"Anytime two teams end up with the same record, there has to be a playoff in fairness to both," said Unitas. "But there was no playoff. It was like taking $15,000 out of our pockets."
SIU Gymnasts Confident Of Regionals Victory

The SIU male gymnasts don’t know what other teams will be in the NCAA Regional at Kalamazoo, Mich., March 22 and 23, but that doesn’t bother Coach Bill Meade.

“I don’t look for anybody to stop us in the regional,” Meade said confidently. “It’s going to be a question of how many individuals we can qualify for the NCAA Nationals rather than if we win the regional.”

Meade thinks that the Salukis can qualify men in 16 of the 24 available slots for the nationals: two each in the seven individual events and two in the all-around competition.

“If you look at my own kids,” Meade said, “we should qualify many. We (SIU) have at least two good boys in each event.”

As team competition in the regionals, Meade doesn’t expect more than three teams at Michigan, “although there might be more.”

And the gymnasts are pointing for the NCAA championships at Tucson, Ariz., on April 4-6. Speculating on who will be in tournament, Meade said the field will probably consist of SIU, Louisiana State, Temple, Iowa State, New Mexico, California, Michigan State and either Colorado State or Denver.

MSU is still not a certain NCAA pick. It tied with Iowa and Michigan for the Big Ten title. The Big Ten will either have a playoff or the athletic directors will choose which team will represent them in the nationals.

“My choice is MSU,” Meade said. “If the Big 10 doesn’t pick Iowa, it will help us.”

Iowa handed the gymnasts their only loss of the season, although the Salukis gained revenge two weeks later.

Eight Teams Open Competition In NCAA Division Championship

Action starts tonight for the remaining eight teams vying for the 1968 NCAA College Division Basketball Championship in Evansville, Ind.

The eight teams from an original field of 36 include: American International of Massachusetts (21-4), Ashland of Ohio (22-5), Cheyney State of Pennsylvania (22-6), Evansville (20-7), Indiana State (21-7), Kentucky Wesleyan (23-3), Nevada Southern (22-6) and Trinity of Texas (22-7).

The tournament will continue through Saturday.

All the teams except Evansville, Wesleyan and Cheyney State are making their first appearance in the finals. Last year Wesleyan was defeated by Winston-Salem for the title.

The top team-scoring averages are held by Nevada Southern and Trinity with 95.1 and 93.6 points per game averages respectively.
