Task force suggests teacher merit pay

By John Schrag
Staff Writer

All public school teachers should get larger salaries, and the best American educators may deserve to be paid more than their colleagues.

The task force unanimously agreed that while the basic pay of all teachers needs to increase, states and local school boards should also try using merit pay systems.

Merit pay is "neither inexpensive, nor easy to achieve, according to the group's report, but nonetheless we support and encourage experiments with performance-based pay."

The task force recommended that the merit pay system be to be used on a small scale, not the whole of the public school system.

Simon A. D. Hall District, cautioned that merit pay should not be expected to solve all the nation's educational problems. "Merit pay is just one small piece of the overall puzzle," Simon said. "Those who are looking for a simple, easy, inexpensive, overall solution will find that it simply isn't there."

Although the concept of merit pay for teachers is new, it became a subject of national debate early this summer when President Reagan and Secretary of Education Terrell Bell promoted giving monetary awards for superior teaching performances.

Reagan's appeal for personal remarks have been opposed by the National Education Association. The NEA asked for across-the-board salary increases.

National President Mary Hatwood Futrell was a member of See MERIT. Page 3

Funding held; until library site decided

By Phillip Fiorini
Staff Writer

A $1.6 million state appropriation for a library storage facility at SIU-C will not be released until the University indicates a specific site for the library.

But Vice Chancellor James Brown said that the University, by way of a priority list, has indicated a site the BOB can accommodate. The University's first preference for a storage facility is the Bracy Building, a grocery warehouse in Marion.

Pat McKinzie, a BOB spokesman, said that the University wants "a specific site before the money can be released." She said that it's still a matter of where the University wants to go.

However, the state Capital Development Board can't make an offer to the owner of any of the sites the University has listed until the owner has signed a lessee agreement released by the BOB, according to Les Pauly, CDB director of public affairs.

He said the CDB, which must approve all university capital requests, cannot "set that direction."

Last month, the CDB, which approves all university capital requests, approved a proposal and requested that the BOB demonstrate it has enough funds to cover the $1.6 million appropriation. Pauly said the proposal didn't identify any specific sites.

Pauly said that he doesn't know what type of combination will be needed, but he said apparently the BOB hasn't received enough information to release the funds. He said it's a normal procedure for the BOB to request specific sites.

Pauly said that the "things needed doing are getting done." He said he thought the CDB was "in the process of developing negotiating documents and said that the University couldn't know which site could be purchased until the CDB had agreed on a price with the owner of one of the buildings.

Organizing bands for this year's Homecoming has gotten expensive, and the Undergraduate Student Organization has asked the Carbondale City Council for financial aid.

The USO and the Student Programming Council have taken the responsibility for providing entertainment on East Grand Avenue during City Fair Days, and they have run into expenses: $1,400 more than the $2,500 they had anticipated.

Marc Furman, USO city affairs commissioner, asked the City Council Monday night to waive the $100 booth license fee for the USO and the council indicated it will comply with that request.

Furman said that the booth will be used to offset the additional expenses which will be divided equally between the USO and SPC, Furman said.

Bill Fuller, USO chief of staff said Tuesday. Both the USO and SPC are selling Halloween T-shirts and buttons for the Chamber of Commerce and will split the profit with them, be said, and SPC will be using a booth supplied by the chamber.

In a special formal session, the council unanimously passed a resolution commenting on the University's first preference for a storage facility is the Bracy Building, a grocery warehouse in Marion.

Pat McKinzie, a BOB spokesman, said that the University wants "a specific site before the money can be released." She said that it's still a matter of where the University wants to go.

The groups have arranged for Big Twist and the Downtown Band to perform Saturday night, Oct. 29, at the east end of the Recreation Center. Costs for lighting and security are $5,500, and so far the groups have come up with only $2,500, said the USO's Vince Demuzio.

Demuzio said that the USO will guarantee, to the USO to cover the cost of the bands for the contracted band, according to background information supplied to the council.

Attempts to secure corporate sponsorship have been unsuccessful, according to the background information.

The bands were part of a plan to disperse the Halloween crowd from South Illinois Avenue onto East Grand Avenue and since the USO "went out on a limb" to help do that, the council indicated that the booth license fee for the group should be waived.

The USO will be selling hot dogs and soft drinks at its booth during City Fair Days.

Teachers’ contract approved

By Patrick Williams
Staff Writer

By a 4-3 vote, Carbondale Community High School District 160 Monday night approved a contract that would give teachers raises of 5.3 percent and 6.5 percent.

The teachers approved the contract 72-5 last Friday.

The deal, which includes increases in extra duty pay and money for insurance premiums, is $171,225 over last year’s contract.

Although board member Richard Cannon agreed that CHS teachers “had taken it on the chin” in past years due to tight district budgets, he said the contract is “definitely not in the best interest of the district as a whole.” He voted against the proposal.

The contract is about $30,000 over the board’s most recent offer, which was rejected by the teachers 66-8 in early Sep­tember. The teachers have been working without a contract for the past seven weeks. The pay increases make the contract retroactive to the beginning of the school year.

The contract increases the base pay rate by 5.3 percent and gives teachers whose pay is $6,900 or less a 6.5 percent raise, said board member Barbara Bennett, a member of the district’s negotiating team.

It also includes a $28,425 increase in the amount the district is paying for teachers’ health insurance coverage, Bennett said, and $8,500 additional extra duty pay to be divided between about 40 teachers. The contract will pay the full amount of individual premiums under the board’s two health insurance plans — $65.49 for Blue Cross-Blue Shield and $52.31 for Shawnee Health Insurance.

For family insurance coverage, the district will pay $90.91 of the premiums, Bennett said. Family premiums for Blue Cross have gone up $100 over the past year to $394.93 and up $165 to about $105 for Shawnee.

The amount the district will pay for insurance premiums is about double that of last year’s.

A mediator was called in to assist in the negotiations. Although the mediator left before the dispute was settled, district superintendent Reid Martin said he was helpful in bringing the two sides together.

In addition to Cannon, board members Carol McDermott and William Schwegman voted against the contract. Members Robert Brewer, Arthur Black, Larry Young and Bennett voted for the contract.

“I would not be voting yes if I thought it would put the district in financial jeopardy,” Bennett said.

McKillop drafted a resolution opposing outside sponsorship of events and activities by liquor companies. McKillop is asking the GPSC, the College of Liberal Arts Council, the Faculty Senate and the Graduate Council, the Graduate School’s faculty-student policy making board, to consider the resolution.

Representatives will be asked for their views in a survey about a proposed athletics fee increase to repair, replace, and modernize athletics facilities. Vice President for Student Affairs Bruce Swinburne will present the fee increase at a GPSC meeting Oct. 13.

Reputed mob bosses charged

KANSAS CITY, Mo. (AP) — Fifteen men, including several reputed organized crime bosses, were charged in an indictment unsealed in federal court Tuesday with conspiring to murder three Kansas City mobsters.

Justice Department officials said the indictment was one of the most far-reaching ever returned linking groups in numerous cities to hidden ownership of Las Vegas casinos.

One federal law enforcement source said it reads like a “who’s who of organized crime in the Midwest.”

Supreme Court denies His­s retrial

WASHINGTON (AP) — The Supreme Court on Tuesday refused to help clear the name of Alger Hiss, whose prosecution 33 years ago symbolized the Cold War scare over communist infiltration and remains, by his account, “an unhealed wound in the nation’s body politic.”

The justices turned away arguments aimed at reopening Hiss’ 1950 perjury conviction, which he held that he lied by denying he was a spy for the Soviet Union.

Israeli cabinet devolves currency

TEL AVIV (AP) — Israel’s new government devolved the currency 25 percent Tuesday and raised the price of basic foods 16 percent, setting off a stampede to buy meat, milk and bread before the increases took effect.

The Histadrut, Israel’s 1.5-million-member labor federation, set a two-hour warning strike for Thursday to protest the steadily eroding purchasing power of working people.

The devaluation of the Israeli shekel and the price hikes were adopted at a nine-hour overnight cabinet meeting held just hours after Prime Minister Yitzhak Rabin, who of organized crime in the Midwest.”

City says it can't afford to pay for restoration of brick street

By Paula J. Finlay
Staff Writer

Restoring the brick pavement on North Washington Street to keep in character with the neighborhood's historic buildings sounded like a good idea to the City Council, but the extra $30,000 needed for the project didn't.

By council Monday night indicated that it would go along with a request from merchants on the 100 block of North Washington to replace the brick pavement on their block to maintain the historical neighborhood — if the funds could be found.

The street will be replaced after a wastewater transfer sewer is laid there this fall and the brick restoration would cost more than $30,000 more than the planned concrete paving.

"I certainly would love to see this brick pavement restored," Councilman Neil Dillard said.

"Our problem will be financing it over the long term," Councilman Archie Jones agreed, saying that the brick pavement would be "a fine thing to have, but that he didn't think the extra money could come from city funds.

The council directed the staff to examine alternatives for the brick restoration and possible sources of funding.

Many buildings on the block were built during the mid-19th to the early-20th centuries and are architecturally and historically significant and are being restored to their original look. Gail White, a Carbondale architect, told the council.

White, who has helped to preserve several historic buildings in Carbondale, made the brick restoration request on behalf of the businesses on the 100 block of North Washington — Gail White and Associates; A B C Liquor Store; Tres Hombres Restaurant; The American Resources Group, Ltd.; and The Jackson County Stage Company, which recently opened in the old Carbondale Opera House.

Michael McNerny, a member of the Illinois Historic Sites Advisory Council, said that the area, which was formerly known as the Carbondale Square, could be designated as an historic district and qualify for funding.

Brick pavement would cost more initially. White said, but would have long-range benefits of lower maintenance costs and slowing traffic.

Edward Reeder, superintendent of public works, cautioned that a contract for the sewer project has already been awarded to J and L Robinson Development and Construction of Murphysboro and that a delay might result in penalties to the city.

"We've actually had to hold him off from the area until they made a decision," he said.

Library from Page 1

The task force endorsed experimentation with merit pay. In a televised interview Tuesday, she said that the NEA still has "reservations" about merit pay, but is willing to discuss it.

David Carle, Simon's press aide, said that the task force responded to critics' concerns about favoritism by recommending that schools use a system of peer review in determining merit, rather than give any detailed proposal for how the system of merit pay be implemented in schools, he said.

Sanders responded to critics' concerns by agreeing to a two-year trial of merit pay, he said. Sanders also said he would work to "out a workable system of merit pay.'

In a press conference Tuesday, she said that the NEA is "evaluating that there's still a place in our school system to reward a good teacher," he said.

Although the report recommends that teachers' salaries be increased, it doesn't give any detailed proposal for financing the increased salaries, Simon said.

Simon said that although it was not a formal recommendation, the "general opinion" of the task force was that reasoning taxes should not be increased to raise salaries. He said he would encourage states to consider increasing their income taxes or cigarette taxes to finance increased teacher salaries.

Sanders agreed that increased salaries should not come from higher property taxes. "The present system of taxation being used to support public education will not work," he said.

But Sanders said that alternative funding methods, such as increasing the state income tax, would not work unless the public is shown that teachers deserve higher salaries.

"We need to take this program to the people and show them how kids test scores are going down and how we are falling behind other countries in education," he said. "Until we get that story out we won't get anything done."

A few of the task force's other recommendations will involve the federal government. Simon said Sanders would help develop legislation to enact them.

One proposal that Simon will push for is a $50 million-a-year project to provide scholarships — 23 in each congressional district, for the most talented high school graduates who plan to go into teaching. Carle said that in return for the scholarship the students would agree to a two-year teaching commitment.

Simon will also promote federally funded summer retraining programs designed to introduce educators to new information and teaching techniques, Carle said. Another federal project Simon will promote is a fellowship program to reward "standing" teachers.

It is estimated that the cost of the federal programs would be below $200 million, Carle said.

The task force also recommended upgrading departments of education in colleges and universities and raising the standards needed to be met by new teachers, Carle said.

The group also urged institutions of higher education to strengthen student-teaching programs and teacher retraining programs, he said.

Another recommendation of the report is that schools provide periodic evaluations of administrators.

**Opinion & Commentary**

WATERED-DOWN RECORDS ACT A PAPER TIGER

A RESPONSIBLE government must be held accountable for its actions. That is the premise of the federal Freedom of Information Act and similar FOI or "open records" laws on the books in 49 states.

When we say 49 states, we exclude Illinois—though it is technically wrong to say that Illinois does not have public access to government records. The State Records Act, in effect since 1977, does not allow public records to be searched by the public. Yet comparable laws in other states that have adopted such a law do allow the public to do so. The new FOI proposal laid out in the legislature's last session is like holding a candle to the sun.

Thus, the new proposal merely allows access to records which are required to be kept by state law. That excludes many documentary materials which may be useful and in the interest of the public—which but aren't required under state law.

AS IT WAS SENT to the governor, the new proposal simply made access to records, kept by law or not, the ruling of the trial court. But perhaps Governor James Thompson was a bit less than accurate in what he said in his letter to the state Senate. It may be and may not be useful in and of the public—but without any state law

"In virtually all aspects of the original measure, the burden is laid upon the private citizen that a record does not meet public records criteria in order to withhold it."

**Does education need merit pay quick-fix?**

A LACK OF sufficient numbers of quality teachers is an ongoing crisis in American education. Teachers and administrators—merit pay—has been suggested as a possible answer. But some educators think that merit pay will cause unnecessary conflict and competition between teachers.

Gov. Lamar Alexander of Tennessee favors the merit-pay system. He thinks it is a viable option for improving teacher quality without a flat, across-the-board pay raise for all teachers. Across-the-board raises are a strain on already-strapped U.S. school systems.

"But some educators—particularly the Baptist Center proposal should be studied in the rational way appropriated to a university community. Where is the evidence, for example, that experiment, deve for moder-..." — A.L. Auerbach, Professor Emeritus.

"But without the criminal penalty for noncompliance laid out in the original version—a Class C misdemeanor carrying a $500 fine and/or 30 days imprisonment—the only thing a state official need fear is that a record in the possession of the court that will..."

**Free Forum Area should be marked, used by orators**, ...("an open forum," an open forum for open orators and hecklers from the area between the Student Center and Fa..."

**BSC proposals deserved a rational study**

Probably more passion and fear are raised by crime and public safety issues because they represent a unique and unusual opportunity to obtain the attention of readers. The Daily Egyptian is presenting an excellent case study. However, the proposal the Baptist Student Center building become a facility to house a number of young men who were convicted of criminal acts.

"The majority of prisoners and the rest of us in terms of behavior and ethics are simply not susceptible to corruption and are only a drop in the bucket for financially strained teachers facing to other occupations. Something needs to be done to make education more lucrative for all of our teachers and not just a chosen few."

"Don't eliminate black studies"
Playn Men set themselves apart from the average Strip group

By Lisa Nichols

Carbondale is full of bands making the circuit, playing an interchangeable repertoire of simplistic top 40 hits in various establishments up and down the Strip.

Occasionally a new band will appear, winning a few loyal followers, but basically just blending in, with basically just blending in, with the rest of the night-club scene and the rest of the Strip.

But one band that recently emerged in the Carbondale area has much more to offer than the usual box-office standards regularly heard on "American Top 40." The members of Playn Men, who joined forces late this summer, are serious musicians who keep their rhythm-and-blues-flavored music sophisticated enough to please the most discriminating ear.

The band should be good enough to attract the attention of the members of other bands and the rest of the night-club scene.

Greg Naas is the group's lead vocalist, Rick Sewell is the lead guitarist and Joe Fromme is on the bass guitar. Not to be overlooked are the strong lead vocals of Paul Russell, who dances around the audience, belts out the lyrics to tunes by artists as diverse as George Benson, Al Jarreau, Haircut One Hundred, Chicago, Billy Joel and Blood, Sweat & Tears.

Kammerer said that with eight band members, the music played can't help but be diverse. Their collection of numbers comes from the pot.

Benchley adaptation to open Calipre Stage season

By Liz Myers
Staff Writer

Calipre Stage is neither a place for typical plays nor conventional performances, but it is a place for elaborate props and sets to be set aside and the true talent of the actor left to show through.

Calipre is starting its 18th season with Marion Kleinau's adaptation of "The Girl of the Sea of Cortez," which opens Thursday through Saturday.

Kleinau, a professor in speech communications, said the performers are trying to maintain a "chamber type" of production.

"This is where we try to preserve the narrative point of view, while playing up the imagination," she said.

Kleinau adapted the play from Peter Benchley's novel with the same title. Benchley also wrote the sea-adventure novels, "Jaws" and "The Deep."

The theme of the play is man's relationship with the sea. The story focuses on a girl's fantastic adventures with an old sea creature from the past.

"We create our own scripts," Kleinau said. "We begin with the original script and then ask ourselves, 'Where does this take us?'"

The play tells the tale of a girl who grew up virtually under the sea and whose imagination. "It's a very different kind of performance," Kleinau explained. "We don't use realistic sets, instead the action is suggested by the way the performers use pantomime."

The actors were selected for "The Girl of the Sea of Cortez" on the basis of their ability to handle a narration that requires a great deal of memory. Kleinau said.

In contrast to ordinary theater, Calipre Stage production requires a more adaptable type of performer.

"Although sometimes we cast someone to portray a single character throughout the play, in narrative theater, an actor has two roles and occasionally three or four in one production," Kleinau said.

The leading roles in "The Girl of the Sea of Cortez" are played by a group of younger actors, who, according to Kleinau, give a professional as well as captivating performance.

The core of performers who will enact the various roles in "The Girl of the Sea of Cortez" include: Ken Jacobs, a freshman in radio and television; Bridgit Corgyn, a freshman in theater; Kelly Dixon, a freshman in speech communication; Becky Remaghy, a freshman in speech communication; Adam Fogelson, a senior in speech communication, and Tori Arndt, a graduate student in speech communication.

Actively involved with the Cast of the Calipre Stage since its inception in 1967, Kleinau said that over the years, "Everybody that has worked in it has contributed a little." Kleinau added that students even carpeted the floor.

"Catch 22" by Joseph Heller will be the next Calipre production and is scheduled for Nov. 3 through 5.

Tickets are available for "The Girl of the Sea of Cortez" in the McLeod Theater box office in the Communications Building. Tickets are $2.50 for adults and $1 for children 6 to 12.

PLAYN FROM PAGE 5

pourii of ideas the members bring to rehearsals. The band members, after "haggling over the ideas," decide democratically what they will play. Kammerer and Lamberson said, "There are special considerations for song made when you work with eight people. But everybody realizes that not everyone can have his way all the time. There has to be compromise.

Indeed, the Men work well together as a team. It is evident that no one tries to hog the spotlight. Every note played by one member blends together with the sounds coming from the other members' instruments.

Kammerer attributes part of the credit for the well-blended sound to their mixer. Steve Lamberson. Kammerer said that Steve Ryttersak and Lamberson used to play together in the defunct Dr. Bombay Band. At mixer for "Playin. Men," Lamberson "brings out our best, covers any mistakes and takes care of any technical problems we might have," Kammerer said.

"Our strongest point as a band," Kammerer continued, "is that we are eight individuals able to channel all of our energies and feel into a strong focal point on stage. Everyone coordinates with each other on stage. We all enjoy it and really give it our best."

"We are our own worst critics," Kammerer concluded. "This is not only really satisfied with our performance. But I have been satisfied with our improvement. We try to give our shows a cohesive, unified direction. We want people to identify an emotion with our songs. That's what gives a band its personality."

Kammerer is optimistic about the band's future. "I think we have the potential to be one of the best bands in this area in a long time," Kammerer said. "I don't mind being criticized, but someone told me just the other day that you have to follow what you're doing and face everyone else will like it.

Kammerer said, "We especially stock the scenes in the play. "The Girl of the Sea of Cortez" is neither a conventional place for typical plays nor a theatrical play. It is a 'chamber type' of production." Kleinau said.

Kleinau's adaptation will be performed at the Sea of Cortez, a 1967, Kleinau said that over the years, "Everybody that has worked in it has contributed a little." Kleinau added that students even carpeted the floor.

"Catch 22" by Joseph Heller will be the next Calipre production and is scheduled for Nov. 3 through 5.

Tickets are available for "The Girl of the Sea of Cortez" in the McLeod Theater box office in the Communications Building. Tickets are $2.50 for adults and $1 for children 6 to 12.

Hospice care to be available to Jackson patients in December

By Sara Lyser
Staff Writer

Hospice Care, Inc. will begin offering services to terminally-ill patients in Jackson County on Dec. 1. The hospice philosophy is to enhance the quality of life and provide comfort for people with limited life expectancy.

When active treatment is no longer useful, the hospice concept allows patients to die with dignity and support. JoAnn Bean, R.N. and Social Services Director at St. Joseph Memorial Hospital in Murphysboro. Many patients prefer to remain in their homes for as long as possible. With hospice care, that becomes possible.

Hospices differ around the world. In England, a hospice is a building in a place where people go. In Southern Illinois, a hospice is a response to a concept that is developing on an international level Hospice Care, Inc. has been a part of the planning and organizing stage since February 1982. Volunteers with various backgrounds in nursing, social work, and caring for supportive individuals are the backbone of the hospice team.

The family is the main unit of support and care, playing an active role in caring for the patient. A team from Hospice Care, Inc. is assigned to the family to visit the home and offer additional support, care and comfort, according to Bean. "What is most important is the family's own smoking habits, family must make a commitment," Edith Spees, a Carbondale family therapist, said. "Grieving is difficult. Having someone who is very ill is difficult. I am very supportive of people in the tremendous support this kind of care gives to families." A patient can be referred to Hospice Care, Inc. either through the family, the patient or a physician. Each patient must have a physician who would care for the patient and the medication is necessary.

"The doctor is in charge of the care of the patient," said Spees. "Hospice cannot interfere with the doctor-patient relationship."

Sometimes, the patient may have to go into a hospital or nursing home if the family can no longer carry the burden. If the patient wishes, the hospice concept will be carried on by the team, who will visit the patient at the hospital.

According to Bean, most patients are middle-aged and older, but she said they will serve all ages. "Hospice is not for everyone," she said. "Some people will go to the ends of the earth for treatment."

The word "hospice" is a medieval word meaning "a place of shelter and rest for the weary traveler on a difficult journey." Once the "difficult journey" is over, the hospice team will continue to visit the family as needed.

Death of a loved one triggers a grief response which can be confusing, painful and bewildering. "The grieving process can be turned into an opportunity for personal growth with the help of supportive, understanding individuals," Bean said.

Funding for Hospice Care, Inc. has come largely from grants from the United Way, "people are going to have different understandings of life and death."

A Hospice Week is being planned from Nov. 7 to 12 to acquaint the community with hospice care and its philosophy. A balloon send-off will preview the week with movies, a social, and an information center at the University Mall following the week. Volunteers from Hospice Care, Inc. will be available to provide information and answer questions.

Individual memberships in the hospice are being sought for $10, which gives the member the right to vote in the organization. A speakers bureau is also available.
Unmarked paths, broken glass make bike routes hazardous

By Joyce Vanderheide
Staff Writer

Deb Bartlein, graduate student in journalism, was biking along the Bikecentennial Route from Devil's Kitchen Lake to the Giant City Road when her bicycle hit a six-inch deep, 12-inch wide pothole. Bartlein’s "face plant on the pavement" resulted in a broken nose and a fractured thumb. Two teeth were also knocked out and had to be reinserted into her mouth.

While in the emergency room at Carbondale Memorial Hospital, Bartlein said the nurse on duty noted that five people had been brought in during a two-hour period with bicycle injuries. Since her accident, Bartlein said several people have noticed her injuries and commented about less serious injuries they have received as a result of bike route conditions.

Kemp warns, however, that "not a lot of alternative routes." Bartlein said people should be more aware of bike route problems to prevent future accidents. "I didn't expect a chunk of road to be gone," Bartlein said. Routes are not well marked and "the routes that are marked are not suitable bike routes."

Counselor lists five steps that may help to find a job

By Greg Severin
Staff Writer

Ever wonder how some people seem to be in the right place at the right time when it comes to finding jobs? According to Kemp, a counselor at the career information center, it's more than just luck. Kemp outlines five steps for people who want to find jobs by being in the right place at the right time.

"Understanding oneself is the first step to being in the right place at the right time," Kemp said. "A person has to know who he is and what kind of God-given ability he has to do certain jobs.

After establishing a self-understanding, Kemp said, a person has two goals. "There are different paths we can take to reach our goals," he said, "but how fast we reach them is dependent on how well we focus in on our goals." Kemp's third step in his outline is planning. "People should do a lot of exploration," he said. "A good habit to get into is to read about what's going on in the world and become aware of what might be opening up in the job market." Kemp said another way to find out about jobs is by talking to people.

"The word of mouth is an excellent way of finding jobs," he said. "In fact, it's vital."

Next comes the implementation, or as Kemp puts it, "the gutsy stage."

"Anyone can send in resumes and explore jobs," said Kemp. "What takes guts is following up the job."

To use an obvious example, Kemp said, "tactically or a "stick-it-until-it-gets-done" philosophy.

The fifth step in Kemp's outline to being in the right place at the right time is training and education.

"This very important. People should be made aware of bike route problems to prevent future accidents. "I didn't expect a chunk of road to be gone," Bartlein said. Routes are not well marked and "the routes that are marked are not suitable bike routes."

Professor: Fall hues colorful, but not spectacular in 1983

By Bob Railey
Student Writer

Nature's fall colors won't be as spectacular as last year's because of this summer's drought and high temperatures. However, John Preece, assistant professor of plant and soil sciences, said this fall will be a "no color" year either. "I can predict that, but I don't expect a spectacular season," he said. "Some species are going green to brown, but most will go green, to yellow, to brown."

Preece said predicting fall colors is difficult. "I heard some TV stories predict leaves will turn brown and fall off. I disagree with that. I don't think the high temperature and lack of moisture will result in no color, but it may have the effect of less color."

Compared to a normal year, the color change may be a little late this year, Preece said this has to do with the photoperiod and the night temperatures. "The photoperiod, the relative exposure of plants to daylight, is decreasing, but the above-normal nightly temperatures are "delaying the onset of the coloration," Trees also have built-in mechanisms to combat droughts and high temperatures. An extensive root system, sometimes twice as long as the tree itself, acts as the tree's water source. Trees also produce smaller leaves during hot summers. Smaller leaves require less water. "Colors in the leaves are caused by pigments," Preece said. "Chlorophyll will break down, and then you can see the pigments left in the leaves. Chlorophyll masks the other pigments."

Hormones in the leaves responding to the photoperiod reduce production of chlorophyll. "It's just a natural process," Preece said.

BIKE ROUTES from Page 8

"Due to erosion, heavy traffic and lack of shoulders, she said. How many people are injured while bicycling on bike routes in and around Carbondale is difficult to measure. Memorial Hospital does not keep statistics concerning bicycle-related injuries, and Carbondale Police Department records indicate only injuries involving bicycles and motor vehicles."

"From January 1 to August 31 of this year, 16 bike accidents with 10 injuries were reported to the police," said Zwill. "From January 1 to August 31, 1982, 10 accidents with four injuries were reported."

The subject of bike route conditions in and around Carbondale produces a variety of opinions, depending on who is questioned. Broken glass in bike routes is one problem, according to students and bike repair shop employees. Of 10 to 15 flat tires repaired in a day at Phoenix Cycles, employee Cyril Friend said eight or nine are due to broken glass. Friend said glass is pushed over by cars into the bike lanes, and if students don't want to risk a flat tire, they have to move into the regular traffic lanes and get off the bike trail.

Friend said he has noted bad potholes in the bike lanes on Poplar Street. Mark Robinson of Bike Surgeon said he has repaired 50 flat tires since May, and about 150 of those are due to glass on the trails.

Another complaint from Robinson's customers is that the trails are in bad condition. "Folks just don't know where trails are in general," Robinson noted.

Carol Dombrowski, freshman in engineering technology, said, "The glass is out of this world," especially on Park Street and St. Germain in front of Lewis Park Apartments.

My bicycle is my mode of transportation and I'm pretty careful about how I ride," said Dombrowski, who bikes about five miles a day.

Wayne Wheeles, Carbondale street superintendent, said he was not aware of problems with glass in the bike paths and has received no complaints. Main streets - Walnut and Main and Main Streets and University and Illinois avenues - are swept every other day. Wheeles said arterial streets, such as Wall, Mill and Willow streets and Oakland Avenue, are swept once a week, while subdivision streets are swept every two weeks.

Jackson paramedics working to help life beat out death

By Dave Saelens
Staff Writer

At the scene of a medical emergency, immediate treatment of the victim can make a difference between life and death, between recovery and permanent disability.

A new program in Jackson County is working to make that difference.

The Jackson Advanced Life Support System began Oct. 3 as the county's first paramedics-boarded ambulance to provide pre-hospital care to residents in medical emergencies.

In a joint effort by the Jackson County Ambulance Service, Carbondale Memorial Hospital and the Jackson County Board, JALS will provide immediate life-saving treatment at the scene from trained paramedics, where before only basic life support was provided for victims during transportation to the hospital.

JALS Coordinator Karen Miller, registered nurse at Carbondale Memorial Hospital, said the paramedics have been trained to administer intravenous (IV) therapy, perform advanced airway procedures, do cardiac monitoring and defibrillation, and give drugs under the direction of a physician.

Miller said paramedics at the scene of an emergency will receive medical instructions from nurses at the hospital, and from JALS Program Coordinator Dr. Jerry Thurman.

Miller said paramedics at the scene of an emergency will receive medical instructions from nurses at the hospital, and from JALS Program Coordinator Dr. Jerry Thurman.

Two of Carbondale's new paramedics, Bob Koneck and Dottie Ehlers, demonstrate "Lifepeak 5," a cardiac-monitoring device on Linda Koelle, a graduate student in health education.

The role of a cancer patient in his treatment plan will be the focus of an American Cancer Society program offered by Memorial Hospital and the Carbondale Clinic.

"I Can Cope" classes will be held from 7 to 9 p.m. Wednesdays, Oct. 20 through Nov. 16 in Memorial Hospital Conference Rooms 1 and 2. Sessions will be taught by physicians, nurses and social workers.

The program is designed to help cancer patients and support people to better understand cancer and learn more about dealing with their feelings.

A $6 donation from each person attending is requested. People who would like to register may call Marlene Matten at 546-6791.

Cancer patient role is program topic

National, low prices you can believe in...

Daily Egyptian, October 12, 1983, Page 11
A Marion man was arrested for possession of a controlled substance early Sunday outside T.J. McFly's, 315 North 11th Street, according to Carbondale police.

Jamie L. Koechner, 21, was observed by plainclothes officers preparing to sniff what appeared to be cocaine at 12:30 a.m., police said. As they approached him, he tried to destroy the white powder.

The officers confiscated the substance for testing at the Carbondale state crime lab in De Soto. Koechner was arrested and released after posting $200 a.m., police said. As they approached him, he tried to destroy the white powder.

THE CAMPUS BRIEFS

WEDNESDAY MEETINGS:
College Democrats, 7 p.m., Orient Room, The Society for the Advancement of Management, 7 p.m., Rehn 108, and Shawnee Mountainers, 7 p.m., Recreation Center Climbing Wall.

RECREATION FOR Special Populations is offering individualized weight training and exercise programs to students with disabilities. Students may register by calling Rick Green at 536-531.

INTRAMURAL SPORTS wrestling, tournament entries close at 5 p.m. Wednesday at the Recreation Center Information Desk. A FORESTRY seminar on the basics of wood machining research will be given by Forestry Professor Harold Stewart at noon Wednesday in Ag 182.

A WORKSHOP on improving study skills will be given by Career Counseling from 1 to 2 p.m. Friday in Woody B-142.

BRIEFS POLICY — The deadline for Campus Briefs is ten days before publication. The briefs must be typewritten and must include time, date, place and sponsor of the event and the name and telephone number of the person submitting the item. Items should be delivered or mailed to the Daily Egyptian newsroom, Communications Building, Room 102. A brief will be published once and only as space allows.

Divorce a 'blue light special':
lawyer offers one-day service

CHICAGO (AP) - Anthony Palumbo and his wife tried for almost a year to end their marriage before they heard about a lawyer who promised one-day divorces.

A few days later, their 15-year marriage was history.

"No hitches, no problems and as far as anything, can be said Palumbo, 36, a private detective. "We heard the ad on the radio, made an appointment for a Thursday afternoon, and Friday morning it was all over."

The couple is among scores flocking to "Hotline Legal Services," the law offices of Gregory Tuna, who runs what he calls "a quickie divorce firm ... a blue light special" for people seeking fast, uncontested divorces.

"I'm a divorce specialist," says Tuna, whose business has mushroomed since he figured out how to deliver a quick end to a marriage - if the couple agrees.

"These are strictly uncontested cases," Tuna explained, adding that the party filing the divorce must be an Illinois resident for at least 90 days. "A couple has to know, at least in general terms, what the agreement is between themselves. This includes not only the decision to get a divorce, but all the ancillary issues such as how the property is divided, who gets custody of the children, the approximate amount of child support and visitation rights.

Tuna says he can assist couples who are tentative about their marriage by explaining the agreement by obtaining their written consent. But most of his cases are "all or nothing," where a rational option is usually not what will be accepted.

When the agreement is reached, Tuna translates it into legal terms and prepares all the documents in his office. Both the husband and wife must sign the agreement, but only the person filing for the divorce must appear in court, where he or she is almost certain to appear before Circuit Judge Louis J. Hyde.

"All the statutory requirements are complied with. It's only a matter of time before they will be accepted," said Hyde, who handles "so many divorces a little bit dizzy listening to them."

Wendy Massengill, 28, said she couldn't believe how easy it was to divorce her high school sweetheart after 10 years of marriage.

It was faster and easier than getting married - and less traumatic, said Ms. Massengill, a service representative for a communications company.

She said she and her former husband sought Tuna's assistance out of a sense of urgency, "but because I was on vacation that week." She added that the couple also was concerned about maintaining a cordial relationship with another.

"Sometimes, I think it's more important to be friends," she said. "We didn't want to get nasty or anything." 

Kathleen Martin, 37, of Des Plaines, agreed.

"I had made a decision in my life and I wanted to make it as painless and as unemotional as it can be," the distribution facility manager said.

"Why go through the emotional hassle of dragging out a marriage when we could both go on with the rest of our lives?" she asked. "You can stretch agony on for years."

Not to mention attorney fees. Palumbo said he considered Tuna's fees "cheap, because he got the job done." He added that his former wife's attorney tried to collect $4,000 "for doing nothing."

Tuna charges a standard $250, but takes on a special $75 if children are involved, and another $50 if property has to be divided. Court costs are always $130.

He advertises those prices on the radio, which is considered "bad form" in the local legal circles, according to Bruce Natkin, an attorney who initially threatened to sue Tuna when the ads first were aired.

"He didn't think we could do it," Tuna said. "But I checked it out and then called back to apologize."

Natkin, who also specializes in divorce cases, still calls Tuna's practice "sort of chintzy."

"I guess it was the approach, more than anything else, that irked people," Natkin said. "Tuna has little regard for what his competitors say."

"There's a very rational, real value for some people to get it over with quickly," he says. "I think it's legitimate to take into account the clients' desire as well as who gets the kids and the car. The philosophy is that they're happy, I'm happy. I don't play upon a client's emotions to get them."

But he says he's making a pretty good living through sheer volume.
Women's Rugby Club snare second in state championships

Even wet, windy, cold weather couldn't put a damper on the weekend for the women's Rugby Club. The club grabbed second place at the Illinois Union Championships in Champaign, setting a 3-1 weekend record.

The ruggers knocked off Lakeshore 14-6 and damped Illinois State 14-4 with ease Saturday. Sunday, the streak remained unbroken, with SIU-C recording a 14-0 win over the University of Illinois, until the team dropped the championship match to Chicago, 14-9.

Six members of the club were honored by being named to the Illinois Select Side team. Representing the back line were fullback Martin Erickson, fly half Barb Cavuto and center Anita Coleman. Selected from the scrum were Sharon Maudling, scrum half; Laura Michalek, prop; and P.J. Jordan, hook.

In the match with Lakeshore, the pouring rain couldn't slow the ruggers. After several strong attacks and counter-attacks, the SIU-C club made an opening for an Anita Coleman try and a conversion by Martin Erickson.

Right defense blanked Lakeshore, while SIU-C was able to chalk up two more tries, sealing the opening victory.

In the club's second match, Illinois State showed signs of quickness but couldn't match the speed of Coleman's speed at center for SIU-C. Coleman ripped through two holes in the ISI defense for two tries. The scrum walked over an ISI goal-line wall and Erickson received a conversion kick to give SIU-C a 14-0 win.

The win over Illini was a storybook win for SIU-C. The ruggers rapped Illinois in lonesome play, and runs and kicks by the backs baffled the Illini defense. SIU-C's offensive surges put Illinois against the wall, and twice the scrum pushed the opposition back over the goal line with the ball in SIU-C's possession for two scores.

SIU-C came down in the mud and found itself outmatched in the championship game with nationally-ranked Chicago. The ruggers turned back the strong Chicago running attack hard and kicking the ball out of danger.

Coleman put a scare in the unbeaten Chicago club in the first half with several breakaway runs. With a minute left in the half, Chicago squeezed through an SIU-C goal-line stance for a try, but missed the conversion kick. SIU-C left the field at halftime down 4-0.

SIU-C's defense cut short several Chicago surges in the second half. Despite aggressive play, though, SIU-C was unable to cash in with a score and Chicago walked away with a 12-0 win and the tournament trophy.

HOCKEY from Page 20

and Coch and Visconti were the doubles teams.

The only Saluki to advance to the quarterfinals of the singles tournament was Barbara Cavuto (5-2) for the fall season, as she beat Beth Gordon of Illinois 6-3, 6-3 in the first round and David Goodman from Illinois 7-5, 6-3 in the second round and lost to Young Min Kwon of SIU-E 6-1, 6-4 in the quarterfinals.

Wadmark (5-2), who was seeded third in the tournament, was given a bye for the first round, but lost a heartbreaker in the second round to Marcos Wess of Northwestern 6-4, 7-5, 7-6, with a 6-7 lossener in the final set. Visconti (5-3) easily won his first round match against John Metzger of SIU 60, 6-1, but lost to Bright in the second round to Doug Burke of SIU-E 6-2, 7-6. Coch (3-4) was stumped by SIU-E's Johan Sjogren 6-3, 6-0 in the first round. Sjogren is ranked in the top 10 for Swedish juniors.

Freshman Lars Nilsson (1-1) showed some promise on the courts as he won his first collegiate tennis match in the first round against Peter Arens of Illinois-Chicago. 6-0, 6-9. But郑州 was marked by Peter Moore of SIU-E for the second round and lost 6-1, 4-6, 6-4.

In doubles, Wadmark and Nilsson (6-4, 6-1) got a bye for the first round and won the next three rounds, including beating team mates Krueger and Nilsson (2-1) to advance to the finals. But LeFeve had to withdraw Wadmark and Nilsson from the finals because of an injury. Eight hours of rain delay Saturday which made play last longer Sunday.

The Salukis, who have allowed 18 goals in 12 games, lowered their defensive average to 1.5 goals a game.

"We played a good game against Eastern Kentucky," said Illner, whose team ousted EKU 2-2.

...and the fall season...
Van, •

and the Category I, II and III cyclists traveled to the veteran men, women and tenths mile loop in Forest Park. Leidy scored one goal in each game to help the Salukis defeat Eastern Kentucky 3-0 and 1-1. Eastern played with more confidence in the past years it was more of playing the cage, but this season we had a better team than we've been showing. This is the first time we saw how good we can be, even though the match was tough when she gets total control at the end of our breakaways.

In the veteran men's race, Mike Jenkins kept the pace fast with nine goals and is ranked team in the nation, 18-hole tournament, since everyone was playing the same course and no one had played it before. We were so tired and is finishing things and is really going to be tough when she gets total control at the end of our breakaways.

The Salukis arrived in Richmond, Ky., early Saturday morning and had only five to five-and-a-half hours of sleep before blanking Eastern Kentucky, 75-30, and fighting nationally-ranked Davis and Elkins College to a 1-1 tie which lasted through two overtime periods.

SIUC Coach Julee Illner thought her team played its best game of the season against Davis and Elkins, which was ranked 11th and carried a 5-1 record into the game.

"It was by far the best game we had played this year," said Illner, whose team improved to 4-7 overall.

"We did a super job in the second game and everybody played real well. The team was exhausted after the Davis and Elkins game." Davis and Elkins opened the scoring three minutes into the game on a controversial goal, which brought a wild scramble in front of the net.

"I would say there were at least 10 or 12 fouls by both teams and the official didn't call anything," Illner said. "They should have had a corner or we should have had a free kick."

The Salukis retaliated at the 16-minute mark of the second half when left wing Sharon Leidy scored her ninth goal of the season, a total which leads the team. Leidy's goal was assisted by right back Janos and center right back Molly Wasko.

"We controlled the first half and they scored, and the second half was pretty even," said Illner, whose team outshot the Hilltoppers 13-2 in regulation, but was outshot 5-2 in overtime.

"In the overtimes they were getting stronger and wearing us down. We were the aggressors when they controlled the game and were the underdogs when they have the second overtime to hold on." Illner said.

SUNYJ coaches Sandy Wasko entered in a solid performance and Maria McCauley saved for right back and in the second overtime to hold on.

Illner said she was particularly pleased with the performance of the deep defense, which included left back Lisa Serolla, center right back Jeannie Jones and McCauley at right back.

"Janos played extremely well at right back and was on her best game of the season," she said.

Tennis team places fourth in Champaign

The SIU-C men's tennis team ran into some tough competition at the Gateway Conference, but still managed a fourth-place finish in the Illinois Collegiate Tennis Tournament.

The seven-team tournament brought eight players, with the University of Illinois leading the pack at 27 points. Northwestern University placed third with 53 points, followed by Illinois State, Eastern Illinois and Illinois-Chicago, who rounded out the bottom standings with 16, eight and five points, respectively.

All of the teams entered in the tournament brought eight singles players and three doubles teams. There were also seven men's and women's teams. The University of Illinois officials divided the singles into four flights of one for the top four players from each team and the other for the four below, then took a round in doubles.

Contributing to the team's performance was the outstanding play of senior Mark Maxwell, who leads the GAC in singles. Maxwell, who leads the conference in singles, is tied for the lead in doubles.

Coach Dick LeFevre entered Per Wadmark, Holli Oligno, Gabriel Coch and Chris Visconti, defense, and Mathias Scotten, Marie Paus and Paul Rasch, Lars Nilsson.

The Salukis were one of the few teams able to take down the Panthers with a narrow victory over Illinois State and Illinois-Chicago.

The Salukis stack of three players, with six to eight players making the cut, are: Janos, Madsen and Leidy. Leidy notched 13 kills in 22 attempts for a .591 hitting clip, with five errors in 15 attempts with two errors.

Backup split end Tony Adonis missed two games because of a football injury, but Adonis was not going to play in last week's Drake game, he said, so action was with limited opportunities.

"I thought if Coach Dempsey returns clean, he's going to be back in our lineup," he said. "I would have used me early in the game," Adonis said. "After the first half, I figured he was trying to give me another chance to recover. I was surprised to be played in the fourth quarter."
