SIU struggles to meet set aside goal

By Tim Crosby
Staff Writer

without a formal hearing, the University will not be able to set aside 10 percent of its contracts for minority- and female-owned businesses, after a Supreme Court ruling on permissible legal challenges. Donald Wilson, vice chancellor for Guss's institutional affairs, said this would make it more difficult for the University to meet the goals of the law in the time remaining. The law says universities should be in compliance by June 30, 1990.

"We were planning on limiting some categories of contracts to exclusively minority and female owned vendors," Wilson said. "I suspect this will make it more difficult for the University to meet the guidelines of the law."

The amendment to The Minority and Female Enterprise Act of 1984 requiring formal hearing take place between the Minority and Female enterprises, after a Supreme Court decision. Hall would be assisting in the decision. The board will be considering the amendment to The Minority and Female Enterprise Act of 1984. Hall has been the acting chancellor for the past six years.

"The amendment brings the law into compliance with a January Supreme Court ruling that struck down set aside practices for being an illegal form of discrimination against all minority and female-owned businesses," Wilson said. "The board was directed to the Board of Trustees under the amendment, universities probably will no longer wish to be involved with these practices."

"The amendment makes a university admit that it was discrimination before it can set aside contracts for those vendors," Grumy explained.

Mike Lang, a spokesman for Central Illinois Insurance, said that the MAFBE council is a part, set aside is not absolutely essential to meeting the law's goal. Mike Lang said he had very good success with only minimal use of set aside.

"Lang said, "in fiscal year 1988, 18 percent of state agencies"

Chancellor Law. en-ke K. Pettit will get his annual report card today. From the UI Board of Trustees.

The board will evaluate Pettit's job as chancellor during a closed executive session. The board's current position of chancellor, prior to his appointment in Texas, was definitely changed. Pettit graduated with honors from Monza State University in 1965 with a bachelor's degree in history. He received his master's degree in political science from Washington University in 1962 and a doctorate in political science from the University of Wisconsin-Madison in 1965. He also taught political science at Rutgers University for three years.

Pettit said he hopes he has brought a mixture of policies and academics to his job as chancellor through his previous experiences in the public and private arenas.

"I have the kind of experiences that serve a chancellor," Pettit said.

The Illinois Comity College Board has rescinded its prior nomination for the student committee position of the Illinois Student Assistance Commission and nominated Susan Hall, an SIU-C student.

This nomination is a part of the Illinois State Scholarship Commission, is responsible for the administration of numerous financial aid programs. Hall would be assisting with these programs.

By Tim Crosby
Staff Writer

Mike Leonard, chairman of the IGCC Student Advisory Committee, said the decision was changed because of the original decision process had some flaws in it. Leonard took over as chair of the student advisory committee this summer.

"The way the nomination selection worked about last year was not the correct way," Leonard said.

First, he said, a small amount of people on the committee were polled about the original nomination of Oakton Community College student Al Galas. A vote on the nomination was never listed on the student advisory committee minutes, he said.

The ICIC-SAC staff drafted a letter of nomination for Al Galas and asked the chair of the committee to sign it and send it out. Leonard said.

The students, not the staff, are in charge of what to do, he said. Also, the committee has no record of when the letter was signed by last year's committee chair. It only knows that it was sent to Gov. James R. Thompson's office, Leonard said.

Hall and Galas both gave prepared remarks. Hall Sept. 29, and Hall obtained the nomination from the committee, he said.

"Susan Hall was definitely the more qualified person," Leonard said. "By majority vote, we decided on Susan Hall. She has the credentials." Leonard has sent a letter to the student committee's office, saying the present nomination of last year's committee is rescinded and Hall is the present committee's new member.

"With the nomination from the committee, Hall now has the nomination of the three major organizations that represent Illinois students. She also has received the nomination from the Illinois Board of Higher Education - Student Advisory Committee and the Illinois Student Association, Hall said.

Hall has served on several campus organizations, including a three-year term on the Illinois Board of Higher Education. The position of student committee member to the ICIC is a full-time and full-member position.

State official: Raise coal subsidence insurance rate

By Lisa Miller
Staff Writer

"We know there needs to be a way to protect people's investment and for coal owners, but we're not certain that it needs to be raised yet for owners of individual homes," St. Aubin said.

The state-funded subsidence insurance program protects property owners from subsidence caused by mining. The program provides insurance for injuries to businesses and homes, but not for personal injury. The policy covers a maximum of $18 per year for $100,000 worth of protection.

In response to the phenomena of mine-related subsidence problems, the Illinois Department of Conservation and the Illinois State Geologist have implemented a new insurance program. The program provides insurance for structural damage caused by mining. The policy covers a maximum of four homes in a one- or two-family building, with a maximum value of $50,000 per building.

"We know there needs to be a way to protect people's investment and for coal owners, but we're not certain that it needs to be raised yet for owners of individual homes," St. Aubin said.

Sri Lanka peace gathering leads to 26 deaths on island

COLOMBO, Sri Lanka (UPI) — Bloodshed fueled by a leftist insurrection claimed 26 lives as political parties prepared Wednesday to resume a conference called by President Ranasinghe Premadasa to seek peace in the island republic, officials said. Defense Ministry officials reported rebels of the People's Liberation Front, who are mostly ethnic Sinhalese, killed eight civilians and three security personnel during a 24-hour spell ending Wednesday morning, regional media said. The rebels also said police and military personnel overnight killed three insurgents and reported authorities recovered 12 bodies island-wide.

Poland to stop deporting German refugees

WARSAW, Poland (UPI) — Poland has stopped deporting East German refugees who cross the border illegally hoping to eventually immigrate to West Germany, the Solidarity newspaper Gazeta Wyborcza reported Wednesday. "The seeking home of refugees is not (occurring) and will never take place in the future," the newspaper quoted government spokeswoman Malgorzata Niezbozinska as saying. From Sept. 24 to Oct. 10 Polish border guards deported more than 600 refugees, many of whom swam the cold waters of the Oder and Neisse rivers that form the Polish-East German border in bid to free homeland.

Czechoslovak paper tricked by dissidents

WARSAW, Poland (UPI) — A Czechoslovak Communist Party newspaper was tricked into publishing an item congratulating a leading dissident on his birthday and praising his human rights work, the official Polish media said Wednesday. Radek Rudzka, an official organ of Czechoslovakia’s hardline communist government ran a picture of leading Czech dissident Vaclav Havel on Sunday, along with an item about him on his 53rd birthday in a column reserved for birthday congratulations. Several Polish newspapers, including the official Rzeczpospolita, ran articles Wednesday about the item.

Alabama high school erupts in racial brawl

ADAMSVILLE, Ala. (UPI) — Racial tensions at a high school in suburban Birmingham erupted Wednesday into a brawl between black and white students, leaving the principal and a 17-year-old student with sub wounds, officials said. The melee broke out at Minor High School in suburban Adamsville about 7:30 a.m. during a morning held by Principal Lydon Jones in the school cafeteria to discuss fights between black and white students. About 75-100 people attended the gathering. About four or five people suddenly began fighting, and the melee quickly spread to the gymnasium and throughout the school campus.

Three students charged in Illinois’ AstroTurf fire

CHAMPAIGN (UPI) — Three University of Illinois students faced arson charges Wednesday in a fire that damaged the AstroTurf at Memorial Stadium, University Police Chief Paul Dollins said Tuesday. The students were arrested after a 15-year-old student informed them that the fire was not started intentionally, Dollins said. The students were charged with criminal damage to property and possession of an instrument to commit a felony. The students were due in court Thursday.

Corrections & Clarifications

Carla Coppi is acting assistant director of International Programs and Services. The current of SIU-C tuition for fall 1989 is $2,340. Tuition and fees for fall 1989 is $2,643, according to the Business Office. This information was incorrect in the Sept. 26 issue of the Daily Egyptian.

Victoria Molfese is the director for the Office of Research and Development. This information was incorrectly reported in the October 3 issue of the Daily Egyptian.

Forestry Club enters competition

By Tony Mancuso
Staff Writer

The SIU-C Forestry Club is trying to repeat last year's total domination of the 38th annual Midwestern Forester's Conceal competition, when they won the overall competition as well as every event within the competition. Team member Robert Gentry said eight to 10 clubs from Midwest universities will compete in a series of events designed to display various forestry skills and knowledge.

"When the event was first started [in the early 1970s] it would draw 15 teams every year. Now it's lucky to get eight," Gentry said. This year's competition will be held Oct. 21 at Lake of the Ozarks.

Queen and King candidates. The election was rescheduled because of alleged illegal campaign activity and vote tampering last week.

Local ACLU reactivated after seven-year hiatus

By Sean Hannigan
Staff Writer

The American Civil Liberties Union will have an active chapter in Carbondale for the first time since 1982.

Arnold J. Auerbach, visiting professor to the School of Social Work and former chairperson of the local ACLU chapter, said the group plans to elect officers and choose committee chairpersons at its Oct. 31 meeting at the Lutheran Church at 301 W. Edin.

"The ACLU was active and busy during the '60s, '70s and early '80s. Then in 1982 some of the members moved and it went into hiatus," Auerbach said.

"We're in Southern Illinois, where you have students who are not always welcomed in leadership. You have a minority population who is disarmed with rulings in education and the treatment they get in the community," Auerbach said. "We are an organization committed to fighting for the rights of minorities. We are a group that they can turn to for help and advice."

Auerbach, former director of the School of Social Work at SIU-C and director of the Ermontary College for seven years, until last June, said the ACLU will work on four levels in the community.

The ACLU will set up a law review board, investigate complaints of violations of civil liberties, provide educational programs and mobilize six members on important issues, Auerbach said.

The law review board "will be a panel of lawyers who will review individual complaints or accusations of infringements on constitutional rights," Auerbach said.

Made up of six lawyers, including some from SIU-C, the board will not litigate, but recommend litigation to the main office in Chicago, if necessary, Auerbach said. In many cases the board could resolve disputes without litigation.

"We will investigate complaints of harassment by police or other violations against civil liberties," Auerbach said. He also said the ACLU is sworn to defend the rights of unpopular and minority groups.

Speakers will address important civil liberties issues every month at open meetings in an effort to increase education.

"The problem with understanding what America stands for is based on education. People need to understand what their civil liberties are and why they're important," Auerbach said.

He said student interest has been strong, particularly among law students. "Not all law students just want to get rich, some have some ideals," Auerbach said.

The ACLU is taking a more active stance on civil rights issues, Auerbach said. "The issue today is free choice. The ACLU is mounting a campaign to clarify the issue and support the constitutional right of women to have a choice," Auerbach said.

He said although the ACLU is taking a leadership role on the issue, they would not hesitate to defend a "Right to Life" group as a civil liberties case.

"If their civil liberties were violated, we would represent them. We're not going to join their demonstrations, but there may be members of the ACLU who are profiteers," Auerbach said.

Gabbert awarded Player of the Week

IN A season that has been riddled with losses, it is refreshing to see credit go where credit is due. Sophomore quarterback, Scott Gabbert, was named Offensive Player of the Week for the national Division I-AA. Gabbert’s efforts in a game that the Salukis would lose were recognized when the conference voted for the honor. Tracie Dittemore, director of information for the Gateway Conference, said, "It was also the first time in the five year history in the Gateway Conference that a Saluki was chosen for the award, Dittemore said.

GABBERT ALSO received, for the second time, the Gateway Conference Offensive Player of the Week. These awards were prompted by Gabbert’s momentous performance against Northern Illinois University. Gabbert threw for 381 yards, and completed 41 of 60 passes. Gabbert broke all Saluki records, including a 25-year old record set by Saluki Athletic Director Jim Hart. Hart threw for 357 yards against Northern Michigan in 1964. Gabbert credits his game to the entire offensive line as well as the coaching staff for letting him play. At the beginning of the season, Gabbert was playing only as a holder in the first three games. However, because of an injury, starting quarterback Fred C:onson was replaced in the first game by Gabbert. Gilson has undergone surgery and Gabbert has been filling in as the No. 1 quarterback.

PLAYERS SUCH as Gabbert, as well as the countless others, often go unnoticed for their athletic ability. It is nice to see a team that is struggling hard get some positive attention.

We would like to congratulate Gabbert on a job well done, as well as the whole Saluki football team for its efforts. Awards such as this show that the Salukis do indeed have talent.

We wish the team good luck for the remaining season.

Jackson County deters litterbugs

THERE SEEMS to be an attitude problem in Jackson County. The problem is people dumping their trash along the roadsides instead of the Jackson County landfill. Coaches, automobile tires and such are discarded on the roads or in remote areas that are not designated as landfills, thus causing unnecessary clutter and litter in places that the garbage does not belong.

The cost to dump items in the certified landfill seems to be the culprit of this problem, and the “people are utilizing the roadside ditch,” George Browning, administrator with the Health Department, said.

A lot of dumping is taking place along the roads to the landfill site. This is because of the extra cost of some items. Instead of paying to put the garbage in the landfills, people “just dump them outside of the landfills gates,” a spokesperson for the landfill said.

THE JACKSON County Health Department has been taking steps though to curb illegal trash dumping, and its efforts seem to be working. Before the Environmental Protection Agency regulations were applied last spring, the health department did not have the power to enforce dumping laws.

Currently, however, there is an instant fine of $500 to $1,500 to those who choose to use the side of the road as their personal garbage dump. The enforcement officers do not have the power to enforce dumping laws.

On Monday, Oct. 9, I wiped out on my Suzuki 450 motorcycle around 5:43 p.m. I came to a stop at the corner of Poplar and Mill. I began to turn right onto Lincoln Drive off of Mill Street. I believe the reason for my spill to be a result of a mixture of road dirt and Armor All on my tires. The reason I’m writing this letter is because I want to thank those who helped me. A man (possible riding a bike) and a girl, who resides at Stevenson Arms, helped me.

I thought I was dreaming as I held the handle bars and the windshield scraped the ground.

Everything I experienced was in slow motion.

I thought, “Let the bike go! Don’t let it land on you.”

I was trembling and wet with gas dripping on my jacket and pants. I lifted my chest off the ground and saw my bike near the other lane.

I walked away with tracks of dirt on my chest, minor nicks, a painful knee, and in a state of shock. This is minor to what we’ve experienced.

I could have injured someone else or lost my life. Perhaps you may think I’m making a big deal out of this, but a freak occurrence such as this causes a person to look at their own life and God for all their blessings.

As I rose off the pavement, several cars circled around my motorcycle and myself. I wasn’t seriously hurt, but I was more aware where I put my foot and gave more attention to what I was doing.

Take both of you who helped me to Saks and TV and make cards that passed by. I’m glad both you and I were not hurt but I was very shaken up but your conversation soothed me. Thank you! SCARLETT

We must be very careful. If football is eliminated, and later we decide we made a mistake, it would be next to impossible to ever get it back, once the money for football is eliminated from our budget.

This is not a reversible decision. If we lose football, it’s gone forever!

This has got to be a depressing, de-moralizing and hard to understand experience by all the coaches, players and fans. Let’s put this thing to rest and get back our football team and show we are the place people want to be to play football.

Jimmie Rainbou, Carbondale.

Victim of motorcycle accident offers message

Indiana man charged with kidnapping found in Florida

WEST PALM BEACH, Fla. (UPI) — A Fort Wayne, Ind., man accused of kidnapping his former girlfriend was arrested without incident Wednesday, 10 days after police said he allegedly abducted were last seen, FBI agents said.

James Joseph Quillen, 25, was surrounded by an FBI special weapons team when he walked into a Lowe's in West Palm Beach, Fla., authoritarian with Dorothy James, 25, who was police said was abducted Oct. 1 from her Sullivan, Ind., home.

Surveillance video of the FBI Miami office said James, who had gone to the auditorium to apply for a job, was "overwhelmed" by agents while others pulled Quillen away. No one was injured, Miller said.

Agents found a .38-caliber semiautomatic rifle on the street when, that James was last seen driving Oct. 1, when he and Quillen eluded a dragnet set up by authorities in Eastern Illinois' Crawford County, Miller said.

Authorities said James is due for a hearing Thursday in front of a federal magistrate in West Palm Beach. FBI agents questioned James and Quillen Wednesday night, officials said.

Florida authorities began searching for James when the FBI in Indianapolis filed kidnapping charges against him and investigators discovered he had relatives in West Palm Beach.

James allegedly abducted Quillen at gunpoint in front of her family, police said, and three of her friends witnessed James in a chair went across the Indiana-Illinois border.

James crashed his car, police said, and then locked a Flat Rock, Ill., on her head and stole their pickup truck and a pistol.

Police said James and Quillen had known each other about a year, and Quillen had moved back from Fort Wayne to Sullivan to avoid James, who was arrested by Fort Wayne authorities in June and July on charges of beating Quillen.

Police also said James was a suspect in the September robberies of a restaurant and motel in Fort Wayne.

POLICE OFFICERS TESTIFY ABOUT BAND OF ROAMING TEENS IN CENTRAL PARK

NEW YORK (UPI) — A police officer, testifying Wednesday about the roving band of teenage boys in Central Park, recanted a previous story about "screams" and seeing a bearded male joker who "looked like he was bleeding." The blooded man, John Loughlin, 40, was the last victim attacked by the teenagers.

Several of the officers testified at an open-jury preliminary hearing in the rape and attempted murder case against six Harlem teen-agers. Prosecutors are trying to show why they questioned the six youths, who gave damaging confessions to crime. The law is now trying to have them thrown out of court.

At about 10 p.m. on April 19, Loughlin was spotted by two officers as he bridle path around the reservoir when he met a man who reported hearing "screams." The man said the screams were coming from the northern section of the park but never noted they were male of female.

Carlson then headed toward the northern section of the reservoir, where he found Loughlin "bleeding profusely" in the seat of an auxiliary police car. "He looked like he had been dunked in a bucket of blood," Carlson testified.

Loughlin, a Newark, said he was attacked by a group of between four and five young men, Carlson said.

"He was attacked at one end of the reservoir," Carlson said. Selleck’s ‘ Innocent Man’ shows rights, wrongs on street, in prison

By Doug Toole
Staff Writer

“An Innocent Man” with Tom Selleck is a disturbing and infuriating but very enjoyable film. Selleck plays an airline employee who is framed on drug charges by twenty cops to cover their mistake and sentenced to prison. Selleck then must try to survive the state prison in which everything, from the inmate con vict played by F. Murray Abraham, who becomes his mentor) and get justice on the two cops. If this sounds a lot like Sylvester Stallone’s “Lock Up,” it’s because it is. But where Stallone concentrated on overwhelming the system and those who put him down, Selleck is frequently reminded of how powerless he is. Like Stallone, he is pushed around by those in authority, but Selleck just wants to put his life back together, he isn’t interested in escape or a high body count.

After being framed by the detectives, Selleck refuses to plead guilty. It’s the lesser charge offered, and he turns his back and never returns. He knows that it gets in the way of his attackers. On the outside, he must try to get justice while still remaining within the bounds of his parole rules.

All these factors stand between Selleck and the ordinary life he wants to lead. Realizing his problem will not leave him alone, he finally decides to start dealing with his problems head-on, using whatever methods are necessary. This all sounds hokey, but the movie manages to use this over-done premise and still add some suspense and drama to the story. The cops who frame Selleck are not satanic baby-killers, just two not-so-clean guys who screwed up and are trying to cover themselves.

The state prison is truly scary, but unlike other movies, it’s not the guards who make the place a nightmare. It’s the other convicts. The prison is a claustrophobic place filled with dangerous people, especially the inmates Selleck runs up against. There are some scenes in the movie dealing with prison gangs that are so strong you think twice before exceeding the speed limit again.

Selleck’s wife played by Laila Robbins tries to prove his innocence while he is serving his time. She is infuriated by the detectives and plays outside the rules to deal with them, just as Selleck is doing inside prison. She also plays a large part in the film’s conclusion, which is slightly predictable but very suspenseful and satisfying.

On occasion, the dialogue gets a little corny. Lines like: “Turn my face into your memory,” and “I might be new, but I know how some things work in here” find a little unnatural and the prison slang gets slightly overdone, but never so badly that it gets in the way of what’s going on.

Selleck gives a very good performance in this film. Abraham is also good, explaining the insane rules of the state prison and making them seem almost natural. The movie contains little statements about the legal system, but not strongly enough to make this a “message movie.” It also contains a hero who is pushed as far as he can take and then starts pushing back, but it is not as overdone as a Stallone movie. This film fails somewhere in between both of them, and does it rather well. Take a break from studying for midterms and see this one.

Robbins’ portrayal of Laila is one of the film’s strongest strengths. Her performance is believable and she handles the emotional demands of the role with ease.

The film’s score, composed by John Williams, is haunting and effective. It manages to capture the mood of the prison and create a sense of foreboding.

Overall, “An Innocent Man” is an enjoyable film that keeps the audience on the edge of their seats. It’s a film that will appeal to fans of thriller and drama genres.

**Museum exhibits antique, modern trinkets**

*Southern Illinois Collects: Toys* is an exhibit featuring antique and modern trinkets, is open at the University Museum in Payer Hall.

The exhibit is guarded by an old teddy bear adorned with an occasional hair, but predominantly bald. Seven display cases, three of modern toys and four of antique, make up the exhibit. The older toys in the exhibit are wooden doll cradles made in the 1800s and a steam engine made in the 1820s.

Other antique toys include two inch spiral blown glass marbles, with a dead man and miniature people and animals inside. *Some were reproduced in the 1930s, so they've been quite a collector for a long, long time*.

No foul play suspected in crash killing three Trump lieutenants

LACEY, N.J. (UPI) — Federal investigators said Wednesday there was no evidence of foul play in the crash of a helicopter in which three top aides to Donald Trump’s casino empire died.

The three businessmen and two crew members were killed in the crash Tuesday.

Security for Trump himself was scheduled to be on the flight but decided at the last minute he was too busy to travel New York.

State police secured the heavily wooded crash site along the Garden State Parkway in the southern part of Atlantic City so the National Transportation Safety Board and the Federal Aviation Administration could inspect the wreckage and search for missing parts of the aircraft.

“We have no evidence that it was any foul play at this point,” Frank Ghiorello, regional director of the NTSB said.

Ghiorello said it appeared from the sole eyewitness account of the moment before the helicopter plunged into the median that the five-seat helicopter lost its main rotor blade.

“He said he heard a loud bang. It appears, based on the witness’ account, that the main rotor blade separated from the aircraft,” Ghiorello said.

Forensic science

Forensic science is the application of scientific principles and methods to the evaluation and interpretation of evidence relevant to the investigation of crime. It is a multidisciplinary field that includes disciplines such as chemistry, biology, physics, and computer science.

Forensic scientists use a variety of techniques, including DNA analysis, toxicology, and microscopy, to help solve crimes and bring criminals to justice.

Forensic science has been an important tool in modern crime investigation. It has led to the identification of suspects and the exculpation of innocent people. It has also helped to improve the accuracy of criminal investigations and the legal system.

Forensic science has also been controversial, with concerns raised about the accuracy of some of the methods used and the potential for misuse.

The field of forensic science continues to evolve as new technologies and techniques are developed. It is an important and dynamic field that plays an important role in society.
Advertising student makes winning scholarships routine

By Mario Milinkin
Staff Writer

For most college students, being awarded scholarships is significant accomplishment. For Deb Edwards, it's almost routine.

A native of Virginia, Madame and William Lyons scholarships, the top scholarships available through the advertising department, Edwards started a $1,000 scholarship program for the Advertising Club of Greater St. Louis.

"I was on a roll then," said Edwards, a senior in advertising.

Edwards was one of five winners of the St. Louis scholarship offered to outstanding Midwestern students studying advertising or some area of communications. She is the first SJU student to receive this award and was joined by students from St. Louis University, University of Illinois, and the University of Missouri.

When Edwards received the award, it came as a surprise to her, her faculty sponsor for the competition, Richard Rice, said. "I expected her to win," Rice said.

Rice said he knew the competition would be tough, but also knew it would be tough for anyone to beat Deb.

Edwards worked in the Daily Egyptian Department during the fall semester of 1988. She was then promoted to student assistant in the advertising department. Over the summer she worked as a student representative. Now she is at the journalism computer lab working as an assistant manager.

"Working at the DE was very, very time consuming, it's a full-time job really," Edwards said.

Edwards also serves as the director of research for the AAP club and is the advertising student member on the Student/Faculty Life Committee.

"Overall, she is absolutely outstanding in all that she does," Rice said. "She gives 100 percent effort to whatever she is doing."

The award was not unexpected for Deb, having developed "a bumble" man often found in his Norwegian mountain community. The old professor at the University of Wisconsin was aware of the Nobel Swedish Academy of Sciences for his work in the 1940s.

"Every time you open a newspaper and see an analysis made of economic trends...it is based on Haavelmo's economic theories," said professor Asnar Lindbeck, chairman of the Nobel awarding committee.

"He is the father of modern econometrics," Lindbeck said, recalling the role of the mathematical and statistical methods to verify and develop new theories. "He applied the theory of probabilities to economic theory and since then has developed Haavelmo's shoulders."

Norwegian National Bank Chairman Osmund Skau said, "For my generation of economists, Haavelmo was a role model to the teacher. For students, Haavelmo was perhaps the man who came close to merging economics with science as we know it."

Norway was neutral in World War II. The area was occupied by Germany from April 9, 1940, to May 8, 1945, Haavelmo, who went to the United States, produced his most influential study entitled "The Statistical Approach to Economic Problems," at Harvard University in April 1941, and it appeared in the same year.

"The professor, who returned to Norway after the war, was still engaged in research, and he had no comment for the moment," when he was crowned as the best student at Oslo University.

The Nobel Committee said in a statement that Haavelmo was awarded the prize for his "foundational contributions to econometrics."

Haavelmo was a pupil of Norwegian professor Ragnar Frisch, who received the first Nobel Prize in Economics in 1969 for having developed and applied statistical methods to the analysis of economic processes.

"Every time you open a newspaper and see an analysis made of economic trends...it is based on Haavelmo's economic theories," said professor Asnar Lindbeck.

"Both Frisch and Haavelmo were pioneers in the use of mathematical statistics for interpreting economic data," said Asbjorn Rearden, Head of Economics Institute at Oslo University.

"It is a very good news both for Norwegian Social Economics and for us at the University of Oslo," Asbjorn said.

The award committee said Haavelmo showed how economic systems could be analyzed with the use of probabilities, could be used to draw conclusions from sample data.

"This is a very humble person, a typical Norwegian who likes to spend time up in his mountains," said Ragnar Bentzel, of the awarding committee told United Press International. "But he would probably have developed more as a scientist if he had stayed in the United States."

The 1989 award to Haavelmo, which includes a $60,000, was the second year running the prize did not go to American economists, who have won 15 of the 26 awards since the prizes instituted by Sweden's National Bank in 1968.

Bentzel said the fact that Haavelmo was the second European in a row to win the prize was "more coincidence."

"American economic research still dominates, but we are pleased that we found a European," Bentzel said, adding Haavelmo's methods are vital to modern economics.

"It was a shock to most people when his new theory became known," said Bentzel, who has known Haavelmo since 1949. "But if you had asked me after five to six years we have realized what a outstanding person he is. He has been extremely active in improving the methods of the last 50 years."

Magnar Bentsen, chairman of the economics department at London School of Economics, said Haavelmo laid the foundation for applying statistical methods to the study of economic data and problems in 1943 and 1944.

"Until then, people mostly did what statisticians ... did — finding curves to data," Desai said.

"In a sense he explained how things are interrelated in economics, which makes econometrics different from statistics, by incorporating those sorts of things, supply and demand, which should be a way we model data."

"I'm thrilled that he's won because I was certain he was going to be ignored," Desai said. "He's a very quiet, scholarly person."

Unlike the five other Nobel awards, the economics prize was not instated to the 1895 will of Swedish dynamite mogul Alfred Nobel but was started in his memory by the bank.

Last year, French Professor Maurice Allais broke a three-year U.S. winning streak for his "pioneering research in market theory and for the efficient use of resources."

With Wednesday's award, Norway has two laureates. Britain has five, Sweden has two and the Soviet Union the Netherlands and France each have one.

The economic award followed Monday's medicine award to two American cancer researchers, J. Michael Bishop, 53, and Harold E. Varmus, 49. It was the third in the series of six 1989 award announcements, which began Oct. 5 in Oslo, Norway, with the awarding of the peace prize to Tibet's exiled godfather, the Dalai Lama.

Award announcements for physics and chemistry were to be made Thursday, while the date for the literature prize announcement has yet to be announced.

Award ceremonies are to take place Dec. 10, the 93rd anniversary of Alfred Nobel's death.

Norwegian economist awarded Nobel prize for work in WW II era

Second European in two years wins coveted Swedish award

STOCKHOLM, Sweden (UPI) — Norwegian Professor Yrving Haavelmo was awarded the 1989 Nobel Prize in Economic for pioneering use of statistical methods to analyze economic data, a theory he presented at Harvard University after fleeing the Nazis.

Called a "bumble" man often found in his Norwegian mountain community, the old professor at the University of Oslo in Norway was aware of the Swedish Academy of Sciences for his work in the 1940s.

"Every time you open a newspaper and see an analysis made of economic trends...it is based on Haavelmo's economic theories," said professor Asnar Lindbeck, chairman of the Nobel awarding committee.

"He is the father of modern econometrics," Lindbeck said, recalling the role of the mathematical and statistical methods to verify and develop new theories. "He applied the theory of probabilities to economic theory and since then has developed Haavelmo's shoulders."

Norwegian National Bank Chairman Osmund Skau said, "For my generation of economists, Haavelmo was a role model to the teacher. For students, Haavelmo was perhaps the man who came close to merging economics with science as we know it."

Norway was neutral in World War II. The area was occupied by Germany from April 9, 1940, to May 8, 1945, Haavelmo, who went to the United States, produced his most influential study entitled "The Statistical Approach to Economic Problems," at Harvard University in April 1941, and it appeared in the same year.

South African official meets with anti-apartheid leaders

Government releases one of eight most prominent prisoners

PRETORIA, South Africa (UPI) — President Frederik de Klerk began the highest-level talks with black anti-apartheid leaders in three years Wednesday as his government released the first of eight of the country's most prominent prisoners.

Police spokesman Maj. "Div" de Villiers confirmed the release of the first of eight — the alluring 40-year-old Oscar Mpeula — but said none of the others would be freed Wednesday. He denied as "sensuous" reports they had been moved from their cells at Cape Town's Pollsmoor prison to Johannesburg.

A march to celebrate the release of Mpeula, a woman trade unionist and African National Congress member sentenced to five years imprisonment for terrorism charges in 1983, was cancelled after police sealed off the stadium where it was to start.

Police fired tear gas to disperse 200 students marching to Athlone Stadium in a mixed-race salute of Cape Town, causing organizers to move the rally to a nearby sports field. About 4,000 mainly black people gath- tered, singing, dancing and waving banners of the outlawed ANC. Police cordoned off the field and temporarily detained a Worldwide Television News crew and confiscated their film.

Organizers then called off a march to Mpeula's home in nearby Nyanga, a black township on Cape Town's eastern outskirts.

"It is too early to give details as to when, where and how each prisoner is to be released," Justice Minister Kobie Coetsee said in a statement Wednesday confirming the prisoners' unconditional release.

Colombian police search for hitmen

BOGOTA, Colombia (UPI) — Police searched Wednesday for suspected drug cartel hitmen who raked a crowded cafeteria with gunfire, killing four people, and shot down three others in a rash of attacks in the blood-splattered cocaine capital of Medellin.

Police said the four separate shootings Tuesday in the hometown of the notorious Medellin cartel were the latest attacks in the "total war" against society declared last month by hit squads financed by the Medellin and Cali cartels.

A search for the gunmen so far has turned up no suspects, police said.

In Bogota, police Wednesday sensationalized the arrest of Jose Rafael Abello Silva, a suspected member of the Medellin cocaine cartel.

Authorities said Abello Silva was wanted on drug trafficking charges in Oklahoma and had undergone plastic surgery and adopted a false name to conceal his identity. Details of his capture by Colombian smear police were not disclosed.

A Bogota newspaper reported that reputed drug kingpin Efrain Porrass, who was deported to Colombia two weeks ago after being arrested in Ecuador, will spend the next 15 months in Colombia.

Forrest was convicted of illegal possession of a sawed-off shotgun in 1986 and his appeal was rejected the following year, the newspaper said.

Police said they believed the drug cartels were behind the shootings Tuesday at a crowded cafeteria in a northeast Medellin bus terminal. Gunmen stormed into the eatery and opened fire, killing at least four customers and wounding four police.

In a separate incident, Rodrigo Sarasti, a former worker in the national Senate whose brother is the bishop of Barranquilla, was gunned down Tuesday night in Medellin, police reported.

The two newspaper employees slain Tuesday worked for the daily El Espectador, whose aggressive campaign against the drug cartels made it the target of a 300-pound dynamite blast Sept. 1 that damaged the building and killed two policemen.

The newspaper's regional man- ager, Marina Lopez, was driving home with her mother at 1:15 p.m. Tuesday when gunmen sprayed the car with machine-gun fire, fatally wounding Lopez, police said. Her mother was wounded.

South African official meets with anti-apartheid leaders

Colombian police search for hitmen
Florida legislature refuses to further limit abortion laws

TALLAHASSEE, Fla. (UPI) — The Legislature, soundly rejecting Gov. Bob Martinez’s call for more restrictions on abortion, adjourned its special session on the issue Wednesday with passage of any new limits.

After meeting for only a little more than two weeks, the Senate and House, most of the Republican governor’s program in its wake, adjourned as female legislators closed down the session shortly after 3 p.m. The session had been scheduled for 30 days.

The Senate was the first to adjourn, voting 30-17 to reject a last-ditch effort by anti-abortion senators to force a floor vote on an abortion bill. The House adjourned minutes later to the cheers of legislators.

The quick end to the session was predicted earlier by key legislative leaders, most of whom believe there is little enthusiasm among Florida voters for new abortion limits and were unhappy that Martinez, a staunch abortion foe, called the special session to deal with only one issue.

The complete defeat for Martinez came as a shock in Washington by House Speaker Steve Bilirakis, who was in the midst of a nationwide tour to educate lawmakers about abortion rights.

Martinez and anti-abortion forces, having seen most of their legislative package killed by legislative panels, had hoped Senate Speaker Don Tucker and House Speaker Steve Bilirakis would approve a bill strengthening state regulations for abortion clinics, one of their more modest proposals.

But that measure, which was believed to have had the best chance of passage, was defeated by the House.

“I think it’s virtually over,” said Senate President Bob Crawford after that vote.

“They’re going to end as predicted,” added Democratic Rep. Lois Frankel.

The House’s action in this session is that the right to abortion that the U.S. Supreme Court ruled in 1973 is a recognized constitutional right that’s not going to be easily taken away, Frankel said.

Only 30 minutes into their meeting, members of the Health Care Committee met to override a Senate bill that would have placed a constitutional amendment on the 1991 ballot to ban abortion outright. The bill also would have permitted local governments or businesses to raise taxes in order to pay for care and treatment of unwanted newborns.

Another 3-2 vote on the committee regulation bill came about an hour later and was just before the prediction of the committee’s chairman, Sen. Jeanne Malconch, who said it is “highly unlikely” that the panel would pass any of the four bills on its agenda.

“None of these bills, as they are written right now, are acceptable,” Malconch said. “Each time we hear the Defense bills the committee is considering.

The committee’s actions continued the trend that was established Tuesday on the first day of the special session and left anti-abortionists searching in vain for good news.

The Senate Health and Rehabilitation Services Committee rebuffed Martinez Tuesday by overwhelmingly rejecting four proposals to make it harder to get an abortion.

The vote to expand opportunities for the poor is a major victory for the pro-choice movement.

The margin of Boxer’s victory was short of the two-thirds needed to override a veto.

The separate District of Columbia spending bill bars the use of federal funds for abortion except for life of the mother, rape or incest, and — in a reversal from last year — does not include any provision for Medicaid money for abortions. The state, the Senate and the House were unhappy that permitted local governments to divert Medicaid money to pay for abortions.

Some 6.1 billion of the bill is for AIDS research at a variety of centers. And $4 billion is devoted to job training programs.

The legislation also contains $1.4 billion for the President’s Helping America’s Children Act, or 1984-1985. $30.1 billion for the mandatory federal share of the Medicaid program and $722 million for agricultural programs.

The bill’s provisions include $4.9 billion for the Pell educational grant program, and $4.8 billion for grants to school districts. This also has a $365 million for drug-free schools.

Florida House broadens guidelines for federally funded abortion

WASHINGTON (UPI) — The House narrowly voted Wednesday to add cause of rape and incest to the federal family planning program that poor women can have government-funded abortions, approving a compromise that President Bush has vowed to veto.

The emotional debate over the abortion issue came during action on spending bills for the Labor and Health and Human Services departments, and the District of Columbia, both of which have been threatened with vetoes over abortion questions.

Before Bush’s threats are put to the test, the Senate must act on the compromise bill, which is set to highlight the differences between House and Senate versions of the legislation.

The House approved the Labor—Health and Human Services—Education and Welfare bill, which would provide $538 million in funds over five years for health care, education, science and other programs. But that measure, which was passed by the Senate, adjourned But that measure, which was passed by the Senate, adjourned Tuesday.

The complete defeat for regulation bill came about an hour later and was just before the prediction of the committee’s chairman, Sen. Jeanne Malconch, who said it is “highly unlikely” that the panel would pass any of the four bills on its agenda.

Oil slick spotted as search for mystery ship continues

PENSACOLA, Fla. (UPI) — An oil slick was spotted Wednesday in an area in the Gulf of Mexico where the captain of an unidentified vessel carrying 18 people said he was sinking Tuesday night, Coast Guard officials said.

A Coast Guard jet, participating in the search in fair weather and choppy waters, detected the oil sheen near the area where the boat last reported its position about 23 miles south of Pensacola, Coast Guard officials said.

The captain of another fishing vessel, the Miss Sheila III, also reported to the Coast Guard that he saw two flares Tuesday night in the vicinity of the search area.

"It’s further reason to keep the search going," said Chief Joseph Gibson of the Coast Guard station in New Orleans. He said the flare sighting and the oil slick are "more indication that something may have happened."

Rescuers have been scouring a 670 square-mile area in the northern Gulf of Mexico since Tuesday evening looking for the mysterious vessel that called in a distress signal around 6:25 p.m.

There have been no reports of missing or overdue vessels from ports along the search area.

Critical jet engine part found by Iowa farmer

ALTA, Iowa (UPI) — Finding a jet engine part considered critical to learning why a United Airlines DC-10 crashed in July may prove to be better than playing the lottery, the farmer who found it believes in her cornfield said Wednesday.

Janice Sorenson found the fan blade disk Tuesday on the farm she operates with her husband, Dale, about 7 miles north of Alta in northwest Iowa.

Several other parts have been found in the same area in the past three months but the titanium disk that held the outer edge of the blades from the jet’s tail engine remained the most prized and most elusive piece to find.

The disk is considered the missing link in the investigation of why United Flight 232 had to make a crash-landing in Sioux City July 18. The accident killed 112 people, but 184 survived.

Investigators theorize a metal flaw caused the disk to disintegrate in flight, cutting hydraulic lines that control the DC-10.

General Electric, the maker of the model CFP-6 jet engine, had offered a $50,000 reward for the disk.

GE investigator Jerry Clark said the newly-found piece is the key part to finding the cause of the accident.

"We’re certain it contains some evidence that will help us understand what caused the failure," Clark said. "Whether it has something to do with the disk or some other part we can’t say until later." General Electric has already paid farmers thousands of dollars in reward money for other jet engine parts, but the $300-pound disk itself remained buried eight inches in the ground until Sorenson ran over it with her combine.

"I met with some resistance and I backed up and there I saw the fan blades," Sorenson said. "I knew immediately what it was. The GE people had shown us pictures and we’d had meetings about the missing parts. We were so excited, my daughter took a videotape of the piece." From three-quarters to two-thirds of the disk was found in Sorenson's field. On General Electric’s pro-rated reward scale that means the family will receive around $30,000.

"This is just as easy as playing the lottery," Sorenson said Wednesday. "I guess I won’t have to play anymore now."

She said Clark did not immediately tell her about the reward because officials were busy preparing the part for a special jet flight to GE’s aircraft engine plants in Evendale, Ohio.

"I’m sure the company will treat us right," she said. "But if they don’t I don’t think they care too because it’s more important to think about all those poor passengers who were killed or hurt."
SBU-C Japan campus ready to teach students from U.S.

By Marie Louise Marks

The University of Missouri-Carbondale has opened a branch campus in Niigata, Japan, for students interested in Japanese language and culture. The program is designed to teach students about the Japanese language, culture, and society.

The university is offering a $4,000 scholarship for one student to attend the program. The scholarship is available to students who are entering their sophomore year and have a minimum GPA of 3.0.

The program offers courses in Japanese language, literature, history, and sociology. Students will have the opportunity to live with Japanese families and participate in cultural activities.

Applications are due by February 15, 2024. For more information, please contact the Office of International Programs at 618-457-2403.
BRIEFS

SAILING CLUB will meet at 9 tonight in the Student Center, Activity Room A. Anyone interested in learning to sail is welcome to attend. A mandatory safety meeting will follow at the Island Pub. For more information contact Jim at 457-9555.

GRASSROOTS LITERARY magazine is now taking poetry and fiction submissions for the spring semester issue. Submissions should be sent to the editors of Grassroots at the English Department in Finzer Hall. The deadline for submissions is November 17.

PSYCHOLOGY CLUB will meet at 7 tonight in Life Science II Room 450.

BIRTH CONTROL Update, a class for all first time users of birth control will meet from 12 noon to 1:30 p.m. in the Koenig Hall classrooms. For more information call 536-4411.

LEARNING RESOURCES Service Workshop, "Planning and Delivering Lectures" at 1 p.m. today in the LRS Conference Room 15 at Morris Library. For more information call 435-2258.

FINANCIAL MANAGEMENT Association will be holding the ATT&CO Collegiate Investment Game from 11 a.m. to 2 p.m. today in the east entrance of Rohn Hall. The game will be sold throughout the entire month.

CLASSIFIED ADVERTISING POLICY

Please Be Sure To Check Your Classified Advertisement For Errors Of The Day Of Publication. The Daily Egyptian cannot be responsible for more than one day's incorrect insertion. Advertisements are responsible for checking their advertisements for errors on the first day only. Errors not noticed by the first day's advertisement will not be corrected. All classified advertising must be presented before 12:00 Noon to appear in the next day's publication. Any advertisement processed after 12:00 Noon will not go in the following day's publication. Classified advertising must be paid in advance except for those accounts with established credit. A $1 change will be added to all classified advertising. Service charge of $1.50 will be added to the advertiser's account for every insertion received to the Daily Egyptian's advertising deadline. Early cancellations of a classified advertisement will be charged a $2.00 service fee. Any insertion under $2.00 will be refused due to the early cancellation charge. All advertising submitted to the Daily Egyptian is subject to rejection and may be removed, again, at the discretion of the newspaper. The Daily Egyptian assumes no liability for any reason it becomes necessary to cancel an advertisement. A couple of all mail-order ads must be submitted and approved prior to deadlines for publication. No ads will be run classified.

R-R-R-RING

Hello! I'm Tim Arenz, your AT&T Student Campus Manager here at Southern Illinois University. I would like to tell you how you can help lower your long distance bills. I can also answer any of your distance questions. The best time to reach me is:

Monday through Thursday: 5-7 p.m.
Tuesday and Wednesday: 3-5 p.m.

You can call me anytime at 549-5583.

SWEETEST DAY

October 21

Appears October 20

We have extended the deadline for our Sweetest Day Love Lines. Your message will appear on Friday, October 20 in the Daily Egyptian. To send your special someone how you really feel in 20 words or less for $5.40, add a piece of sugar for just $1.00. Mail or bring your message to the Daily Egyptian by 2:00 pm, Tuesday, October 17. Contact Dave 536-3311.

COWBOY, CONNIE

Congrats on the Baby Girl.
I Love You

Maribo Man

HAPPY 20th BIRTHDAY

KIOI J

LOVE ALWAYS,
Bo Bo

HAPPY 21st SHEILA

FAIR IS FALIR

Love,
Your Loveshack Roomies

Douglas, SMILE!!

Thanks for a WONDERFUL Weekend!!!

I Can't Wait to See You!

I LOVE YOU!!
Erin

**KGB official says U.S. still watching Spying via satellite, aircraft said to continue**

**MOSCOW (UPI) — A KGB official Wednesday accused the United States of a high-tech espionage assault on the Soviet Union from space, from under the ground and from the ocean, to cold-war warming relations between the two countries.

"We are being listened to and watched — secretly, constantly and rather actively," Maj. Gen. Igor Ustinov, a KGB department head, told Otdel Zhurnalizma, the official newspaper of the country's state news agencies.

Ustinov's account may have had more to do with domestic politics than foreign policy.

"Over the past decade, allocations for the maintenance of U.S. technical intelligence personnel have increased at 3 1/2 times and totaled $18 million," Ustinov said.

"Intelligence information is being collected with the aid of artificial Earth satellites, aircraft, ground-based facilities in neighboring countries and from buildings of some embassies in the Soviet Union," he said.

Ustinov's account may be more tied to domestic politics than foreign relations, coming as it did under increasing scrutiny in Soviet leader Mikhail Gorbachev's 'glasnost' campaign of openness.

Soviet lawmakers are also debating the 1990 budget, which allocates the government's $192 billion deficit in half by reducing defense spending on innumerable bland ministries and other agencies.

In a period of similar budgetary pressure and military cutbacks in Washington, Defense Secretary Dick Cheney warned the need to keep American forces strong against Soviet aggression.

Ustinov cautioned that he was "not trying to intimidate or frighten the masters," and even expressed admiration for his American counterparts.

"This work is done by true professionals who know what they are doing, and for the optimum ways of achieving their goal," Ustinov said.

"They rely on the scientific, technical and intellectual potential of the West's leading country."
GRiffin, from Page 20

Griffin ran into another setback in December. Griffin was still running in some discomfort. Griffin underwent surgery on her right leg in December. She was unable to attend school during the 1988 season. "I've learned to accept it and learned lessons from it," Griffin said. "I have to admit I've been in a bad mood the last couple of years."

After a frustrating sophomore year, things are starting to break Griffin's way this season. She earned a spot on the Gateway Conference this season. Griffin, a junior, finished 10th overall in the conference. She can't help thinking about what could have been.

"It's coming and I'm happy with that," Griffin said. "I try to be satisfied but I can't be doing what I did before. I'd like to see some faster times out of me this season."

Griffin, from Fort Worth, Texas, was highly touted after high school cross country success. Mississippi, Arkansas and several of the Southern schools were interested in Griffin. Griffin's father reasons for choosing SIUC.

"It was the best from home," Griffin said. "I wanted to be in a new and different area." DeNee said Griffin was comfortable in Nevada when she first arrived on campus. Griffin is a freshman this season and is already ranked seventh on the SIUC women's all-time cross country list and second in the Gateway Conference. She has named the Gateway Conference Cross Country Athlete of the Week.

"Donna was what Locane is now," DeNee said. "But after the accident, she is just as materialized."

Griffin also sees some comparison in herself and Conway. "I was more excited about running more than I was about soccer," Griffin said. "But then the accident just devastated me. Athletics were my biggest passion coming in."

Vivian Simon, who is No. 1 on the women's all-time list, was a senior when Griffin entered. SIUC's Vivian's mark of 16:32 in 1986 is still the top mark on the all-time list.

"Donna was running right with Vivian when she came here," DeNee said. "It's nice to see her beat the odds and running well again."

Griffin, a junior, is definitely on the road back now. Griffin's time has come down over a minute since her sophomore season. But she still isn't satisfied. Griffin said, "I'm taking a long time to come back. I've been back a year after missing two years."

Although athletics were foremost on Griffin's mind entering SIUC, she did receive an academic scholarship as well. The accident cost Griffin her scholarship in the classroom, DeNee said. Athletics was her first priority but it was taken away from her, DeNee said. "When something as important is taken away, other parts of your life may not matter as much. Donna never became a poor student, but she received a high off of athletics and it carries over into other areas of her life," DeNee said.

The success of the cross country team this fall pleases Griffin.

"We have some good recruits that like to run," Griffin said. "I am happy for them because they are all good people."

CORPS, from Page 20

the receivers acted primarily as blockers in the option attack. Venato said when Smith not with the team upon arriving at the University of Illinois, the players he would eliminate the option offense, except for a few plays.

Success and spectators like Yates and Derrico are expected to be successful. The coaches don't jump up and down when they make a catch," he said.

"We can catch the football, they can't play in the offenses we are running," Venato said.

Venato said the Salukis receiving corps does possess great speed but it is capable of catching the ball. But the receivers' success of late is only par of the offensive improvement.

The line has to protect, Venato said. "The quarterback has to make the right decisions and the receiver has to be in position to make the catch. A lot of things have to click."

Venato said the Salukis will continue passing the ball with some regularity.

"We look at the (opposing team's) film as a staff and decide how we can best move the football," Venato said. "We do whatever it takes to move downfield and into the endzone."

WORKS, from Page 20

"They finished with an outstanding fall season of 18-3. They have to know that they have a shot at some success this season with a conference championship. They have a great deal of pride in themselves. It's not just OK to be OK, they want to be their best."

"I feel great about the game. I don't think there is any substitute for winning to make a player feel good about themselves. That's where we are right now. The team has a tough job to do, a tough job to do. That is one of the strengths of the team," Brechtlbuehler said. Brechtlbuehler said, but the Salukis are ready to play together as a team and support each other, Brechtlbuehler said. Stewart said an orientated back is hard to teach.

"Many of the girls come from basketball schools where they were probably the standout, maybe the only one in the program for four years. Everyone probably looked up to them to carry the team," Brechtlbuehler said. "Here, they don't need to carry the team. To say, we're going to be successful, we start working together is one of the fun things about coaching. The result is winning."

Several individuals seem to shine above other players, Brechtlbuehler said the whole team is deriving of credit for the successful season. "We do have some outstanding players, though. I have had many coaches come up to me and tell me that Shelly (Gibbs) is the strongest one (to get out). Mary Jo (Pilchuk) is a tough one, Billie (Ramsey) is becoming a tough out. There are so many," she said.

In the spring Brechtlbuehler said the team is going to have to go out and expect every game they fall, only better. "It's going to be tough this spring. We are going to see some better competition."

The 18 wins this fall doesn't guarantee us a great season.

"If you've got to work hard, all the way, it is very hard to win very hard and fall a little short. I think the team is reaching out a little bit more than last year. As a result, they are finding success," Brechtlbuehler said.

Brechtlbuehler said just because they had a successful fall doesn't mean spring is going to be a piece of cake. "There are some teams in the conference that we haven't seen at all. Illinois State has a great ball club. We didn't see to face Western. We are not the team that's necessarily on top right now. There are going to be some teams that are going to be every bit as good as we are," she said.

"We are looking forward to spring. We know we have some work to do, but we are ready to go," she said.

KAT, from Page 20

setback. It will take a strong character for her to accept this. I hope she can make it back."

Sophomores Deborah Minter and Gina Goulette finished with the lowest scores during qualifying round and will make the trip to Lexington.

The Salukis once again will face some of the best golf teams in the Big Page 18, Daily Egyptian, October 12, 1989
NFL owners make progress, but no new commissioner

GRAVEVINE, Texas (UPI) — NFL owners met almost non-stop Wednesday to try to move their differences in the search for a new commissioner.

One of the 28 owners suggested some progress was made, but two others backed home as did the two leading candidates to succeed Pete Rozelle.

"I think we are seeing some progress, but that's all I'll say about it," Dallas Cowboys owner Jerry Jones, who left the meeting room only long enough to get a large slice of his team's efforts to trade running back Herschel Walker.

Other than that remark, there was no word from the meeting room, where the owners gathered at 8:15 a.m. CDT and remained after having lunch delivered.

Houston Oilers President Bud Adams left the Dallas-Fort Worth airport hotel meeting place shortly after Wednesday's session began and San Diego Chargers President Alex Spanos did likewise three hours later.

Those who remained were trying for the second day to choose a commissioner from a list of four nominees — New Orleans Saints President Jim Finks, attorney Paul Tagliabue, who heads the Hall of Fame department; and Willis Davis and New York Republican Party Chairman J. Patrick Barrett.

The owners apparently were deadlocked between Finks, supported by the more veteran owners, and Tagliabue, backed by the so-called Chicago 11, a group of newer franchise owners who rejected Finks at a similar meeting two months ago.

At that time Finks was the only candidate proposed by the NFL's search committee. Now that other potential successors to Rozelle have been introduced, Finks' support appears to have waned.

The owners took four votes Tuesday night and Rozelle said none of the candidates came close to the 19 votes needed to elect.

Finks and Tagliabue, left town Wednesday as planned, indicating no decision was near. A league spokesman said it was his understanding no ballots were taken during the first several hours of Wednesday's session.

There was speculation the owners were discussing a change in the structure of the NFL's hierarchy with the possibility of having the commissioner's job divided into two — one dealing with football, the other with marketing.

Finks said during Tuesday's interview with the owner, he was asked how well he thought the structure of major league baseball worked. Among his many jobs in professional sports, Finks was an executive with the Chicago Cubs.

Finks said he did not know if the question meant the owners were thinking of establishing an setup for different phases of NFL operations.

Jackson with Raiders, might play against K.C.

LOS ANGELES (UPI) — Bo Jackson's unique rites of fall - exchanging baseball hat for football pads — were repeated Wednesday when the Kansas City Royals slugger reported to the Los Angeles Raiders.

Jackson, whose baseball season ended only 10 days earlier, took a physical and spent the day in meetings and at practice. The team sheltered the running back from reporters, saying he would not be available for interviews until Thursday.

"The Raiders play the Kansas City Chiefs Sunday and Jackson might be shooed into action because Marcus Allen is slugged with a slight knee tear. Allen, injured Monday night, may be out a month."

"Don't know how much Bo will play," Coach Art Shell said. "We have to be careful of not pushing him. He hasn't been to camp. We'll watch him in practice. He'll help us make the decision of what he can do and when he can do it. It's too early to make any decisions."

The 1985 Heisman Trophy winner was much more effective in his rookie season than he was last year. He gained 554 yards on 81 rushing for a 6.8 average in 1987.

Bay Area mayors cool Series feud

(UP) — The mayors of Oakland and San Francisco are trying to leave the battle between their baseball teams in the World Series.

The feuding city chiefs talked plans at separate conferences on their separate sides of the bay over whether San Francisco's owner, Mal Whitaker, and Oakland's Jerry Rieger have insulted each other.

"There is nothing in Oakland I want," Rieger said.

He later explained he was joking. Wilson was quite anyway.

But at a new conference Tuesday in Oakland, Wilson, wearing A's cap and jacket, said he was no longer angry at Rieger.

Hard work continues after season

By Tracy Sargents Staff Writer

Although the Saluki softball team finished its exhibition season with two impressive victories in 3, the hard work is far from over.

Players on the team have already started working on their own at home and will be getting prepared for spring, physically and mentally.

"Right now we are getting in condition in terms of strengthening ourselves," said coach Venuto. "We weren't in condition but we really didn't have a strong conditioning program for the season," Brechtleibauer said.

Mental skills are just as important to the team as softball fundamentals, Brechtleibauer said.

"We are preparing for a whole new situation. You're beginning to learn to play smart softball. They are learning more about the game and how to play from the inside out as far as their execution," the coach said.

Brechtleibauer said keeping the team motivated in the off season isn't a factor she has to deal with.

"I can't say tiring them out as a coach, but the basic motivation comes from the fact that the whole team is excited about our expectations. We are 18-3 is a great motivator. If they aren't excited now, I'm not sure what they'll be when we start money as possible. Additional fans will be picked until all the money is gathered. The first $500 first through the door will receive a bottle of Pepper. The second $1,000 first through the door will receive a coupon for a free taco and bean burrito from Taco Bell. Before taking the floor, players from the women's basketball team will go to the public to present the crowd. The doors will open at 11:15 p.m. for fan activities and a three-point shooting contest between members of the women's basketball team. A trophy will be awarded to the team that scores the most points in the contest.

Contests, giveaways slated for 1st practice

By Greg Scott Staff Writer

Dona Griffin entered SIU-C during the fall of 1986 as an excelling, young and promising cross country runner with a talent that looked a lot to look forward to in college athletics. But injuries forced her to play a terrible role in one's life.

On just the third day of the '86 fall season, Griffin was hit by a dump truck on University Avenue. Griffin suffered a broken pelvis, a separated sacroiliac— the joint between the top part of the hipbone and the fused bottom vertebrae — and a split sacrum, which Page 20, Daily Egyptian, October 20, 1989

Cross country runner Dona Griffin defeats more than just opponents
