The SIU System has "violated state guidelines" by retaining $1.5 million in excess funds that are supposed to be deposited into the University Income Fund, according to Robert Cronson, Illinois Auditor General.

Cronson's findings were issued in a recent report that covered the fiscal year ending June 30, 1981.

But R.D. Isebell, SIU System capital affairs officer, said Monday that the auditor general and the SIU System have different interpretations of the method used to calculate excess funds and "our formula doesn't come up with $1.5 million in excess funds."

Isebell said the $1.5 million in question is a composite of various fees and the biggest part of it is parking fees.

According to the State Police, the existing University Guidelines approved by the Legislative Audit Commission, the SIU System is required to deposit the $1.5 million in excess funds into the University Income Fund.

Cronson said, "These excess funds retained are a result of the University's acting in accordance with their own interpretation of certain extraneous guidelines, which were never approved by the guidelines," Cronson said.

Even though a subcommittee of the Legislative Audit Commission upheld the existing guidelines, "apparently SIU knows something I don't know because they feel they have the guidelines, and the guidelines were not revised," Cronson said.

But Isebell said, "The guidelines themselves are quite ambiguous and throughout the state there is not a common understanding of what they say."

Cronson's report stated that the SIU System "believes that its interpretation of the guidelines is the correct method for calculating excess funds, but parallels the interpretation used by other universities in the state."

"They are saying we didn't follow the guidelines, but neither are the other universities, in my opinion, that's not true," Cronson said.

Cronson did say that other state universities "were not in 100 percent compliance with the guidelines, but they're all supposed to comply."

Isebell said, "We feel we are in 100 percent compliance with the guidelines and the auditor general is not following our interpretation. We anticipate that the LAC will be hearing about this in the near future."

Cronson's report states that the SIU System "should deposit such excesses into the University Income Fund and not "the University's response to this finding does not state that the SIU System's fund will be deposited into the University Income Fund."

**Police still searching for clues in Joan Wetherall murder case**

By Rod Furlow
Staff Writer

The nude body of Joan Wetherall was found in an Elkville Strip-mine three months ago, and her sister, Pat, said the killer will be found in a week.

"I'm confident in the police, but what I know, I'm not too confident that the guy will be caught," Cindy, one of Joan's four sisters, said in a telephone interview Thursday. Cindy, like her sister Phyllis, moved away from Carbondale after Joan's death and now lives in Lom- bard.

"The police call us when they need to ask questions, and they call us when they have something but I don't think they haven't caught anything yet. There's not that much evidence."

Identification cards belonging to Joan were found at Crab Orchard Lake in November. A suspected female employee of the unit of the Jackson County sheriff's department, which is in charge of the investigation, declined to say if any new evidence had been found, or if there were any suspects in the case.

The spokesman said the Williamson County sheriff's department had been asked to join the investigation because of the involvement of the Jackson County detectives obtained, but declined to say if the information was the identification cards. Police have declined to disclose any information about the identification cards.

A spokesman for the Williamson County sheriff said that its participation in the investigation has been limited, and that nobody from the department was formally assigned to the case.

"We're getting to the point now where we don't bring it up," she said. "We play dumb about it."

**BASH gives help to binge-purge eaters**

By Randy Rendfeld
Staff Writer

Imagine eating a whole loaf of bread, a jar of jelly, three pounds of chips, two bags of English muffins, a jar of peanut butter, a few slices of bread, a few slices of ham, a few slices of cheese, and a few slices of pineapple, in some candy bars, a box of macaroni with cheese and a stick of butter. Add a bag of frozen french-fried potatoes, a whole pizza, a few bottles of pop, a few cakes, and eat and eat and eat and vomit... This behavior might sound funny and not bad for some, it is a serious disease, often called the "binge-purge" syndrome. It's similar to anorexia, but some people are reluctant to seek treatment for it. They feel they are "losing weight" when they vomit.

Anorexia nervosa is also an eating disorder. Those afflicted by it won't eat, and eventually they can't eat. This results in a decrease of eating habits, and a decrease in body weight. People with anorexia nervosa are thin and often have body images of how they think they should look. The body image is thin and slender, which is why they have trouble eating.

Anorexia nervosa is an eating disorder that usually begins in childhood. Those afflicted by it won't eat, and eventually they can't eat. The body weight may decrease to the point of being underweight, and this can lead to an eating disorder. People with anorexia nervosa are often thin and have a distorted body image. The body image is thin and slender, which is why they have trouble eating.

UAW must convince members to go along on Ford contract

DEARBORN, Mich. (AP) — Ford motor Co. and the United Auto Workers have agreed on a tentative contract granting limited job security and pact starting in exchange for employee concessions, some union officials said Sunday.

The agreement reached by negotiators for the United Auto Workers and Ford Motor Co. was described as "a close" vote.

The tentative 21-month agreement, announced late Saturday after 12 straight days of negotiating, includes guaranteed income for laid-off workers, higher seniority and an experimental program at two plants where workers will have "an equivalent of lifetime employment.

In exchange, Ford's 177,000 autoworkers would give up wage hikes and eight paid personal holidays during the life of the contract and foreign control of the Co. and its United.

It ratified by Ford's UAW members including union members who are laid off, the current three-year pact that is set to expire Sept. 14 and would last until Sept. 14, 1984. The vote will be conducted in two phases.

Neither the union nor the company will estimate the savings to the No. 2 U.S. automaker, which says it lost more than $1 billion last year.

**Contract highlights**

- Guaranteed income for laid-off workers
- Increased health insurance
- Increased union participation in company decision making
- Deferred cost-of-living allowances
- Frozen wages for all workers
- Reduced wages and benefits for new workers
- Elimination of eight paid personal holidays
- Elimination of December bonus Sunday

Analysis estimated Sunday a savings of $2 to $3 per man-hour for Ford. Ford says its workers average hourly pay rate was $21.80 last year.

"If we didn't think it was good for the Ford workers, we wouldn't have reached an agreement," said UAW Vice President John Elyshis.

The UAW reported negotiations with both Ford and General Motors Corp. on Jan. 11 as both automakers sought to lower labor costs in order to better compete with foreign automakers.

The talks at GM collapsed Jan. 31 without agreement. Union officials said they feared they could not sell the package to the rank and file in light of a narrow vote of the union's GM council in favor of concessions.

GM reported a $34 million profit last year.

Ford Chairman Philip Caldwell said the agreement "should be the catalyst for restoring the company's competitiveness." He did not estimate the impact on car prices.

Robinson said he was not satisfied with the proposal because "there was no fact-finding of Ford's books" to prove the claim of heavy losses.

The agreement was to be presented to the UAW's executive board Sunday and voted on by the Ford council on Wednesday in Chicago.

194 Polish demonstrators arrested

VIENNA, Austria (AP) — Polish martial law authorities arrested 194 people in the western industrial city of Pukowa after a crowd shouted anti-government slogans and refused to disperse Saturday, Poland's official FAI news agency said.

A broadcast monitored in Vienna said 163 of these arrested were "punished" by misdemeanor courts following the disturbance. The broadcast did not elaborate on the disturbance or punishments and did not report any injuries.

American missionary shot and killed

WASHINGTON (AP) — An American Catholic missionary from Indiana, Minn., was shot and killed Saturday outside a radio broadcasting facility for poor, rural students in Guatemala, the State Department said Sunday.

James Alfred Miller, a member of the La Salle Order headquartered in St. Paul, Minn., was shot about 4:30 p.m. local time in Huehuetenango, about 100 miles northwest of Guatemala City, State Department spokeswoman Anita Stockman said.

The Guatemalan national police in Huehuetenango were investigating, Ms. Stockman said.

Cougars mauled boy, trainer arrested

PITTSBURGH (AP) — A 9-year-old boy mauled by a cougar advertising Lincoln-Mercury cars was in stable condition yesterday while a animal trainer faced charges of assaulting the officer who killed the cat.

The cougar attacked the youth Saturday during a car show at the David Lawrence Convention Center.

Arthur Bane, an off-duty police officer in the crowd, shot and killed the 300-pound cat as its owner, Bob Steele, struggled to get the animal to release its grip on the boy.

Allegheny General Hospital spokesman John Sacuta said Sunday the younger's condition had stabilized.

$4.6 million is price for Cairo rail line

By Kirk Shelton
Staff Writer

Consolidated Rail Corp. and Southern Railway System, federal rail corporations, have concluded negotiations for sale of Southern Illinois' Cairo Branch.

The two rail systems have agreed to buy the line between Cairo and Mount Carmel from Southern for $4.6 million.

According to a press release issued by U.S. Rep. Saul Simon, D-24th District, the purchase agreement is subject to certification by the Interstate Commerce Commission.

Southern Railway will purchase the line between Mount Carmel and just outside of Cairo, about a 120-mile stretch, except for mile 20 in the vicinity of Cairo toward Mound City, David Carle, Simon's aide, said.

Complying with a directive issued in January by the ICC to all potential buyers, Southern will operate all of the Cairo Branch which it purchased instead of "rail banking" some sections as feared by some Southern coal shippers of coal and other goods.

Hail banking is purchasing rail lines on speculation and holding them out of service.

It is expected that some 90 percent of present Cairo Branch shippers, mostly from Southern Illinois coal companies and Scott Lad Foods in Eldorado, will continue to have rail service.

Differences with financial underwriting of the Southern Illinois Railway Investors Corp. (the Cairo Branch employees' consortium) plan prevented in-depth negotiations between Conrail and the employees package because of "the expedited procedure for abandoning Conrail," which SIHICO is using, Carle said.

A second bid to purchase the 143-mile Cairo Branch was offered in December by the consortium, but it didn't go through due to a lack of federal funding.

The Conrail property, valued by Conrail at $9 million, would have been abandoned and broken up for scrap if there had been no sale.

The abandonment of the 143-mile stretch of rail in Southern Illinois was the subject of hearings by the ICC last July. Conrail wanted to abandon the stretch because it hadn't been profitable.

Conrail officials said the Cairo-Lawrenceville line lost approximately $190,000 a month because of maintenance problems and competition from other shipping.

According to Simon's news release, traffic on the Cairo Branch declined from Conrail management in part because of a general decline in Illinois coal production during the 1970s, and in part because of damage to some track around Cairo, and in part because of deferred maintenance, which Carle said was due to competition from other traffic routes (interstates and in-and-out waterways).

Carle said some damage to the Cairo Branch was done by flooding of a bridge around Cairo.

He said that another reason for decline in traffic across the Cairo Branch was deferred maintenance, which he said has been a pattern in the railroad industry for the past few decades.

CIPS rate increase request to be considered by Council

The Carbondale City Council will consider a resolution opposing a $100 million rate increase proposed by the Central Illinois Public Service Co., at its regular meeting Monday night in City Council Chambers, 897 E. College St.

The resolution was requested by the Southern Oxnties Action Movement, which has the support of the communities of Benton, Sesser, Johnston City, Murphysboro, Herrin and Tuscalo in opposing the increase.

SCAM has charged that the increase will be used to pay for an unnecessary power plant and will produce "more shutoffs, human miseries, personal trauma and life-threatening exposure to adverse weather conditions" for CIPS customers.

CIPS has said the 5.7 percent proposed rate increase is used to pay for the $328 million Newton II plant, located in Jasper County, but AM has said the plant will not be needed until 1985.

Looking to a SCAM fact sheet, "Although Newton II will be completed at the time of the rate decision, CIPS has enough power plants now to more than meet customer demand," but "the ICC grants this increase. CIPS customers will pay $18.8 million every year for the plant, regardless of its usage."

The Illinois Commerce Commission will begin rate approval hearings in about six weeks and is expected to take action on the CIPS request in December.

The City Council tentatively supported a resolution opposing the rate hike at its informal meeting Feb. 8.

The council will also consider approval of preliminary design drawings for the proposed downtown parking garage. If approved, the council will authorize the engineering firm of Carl Walker and Associates to prepare final plans and bid documents for the construction of the facility.

---

Man discovered shot; death called homicide

The Jackson County sheriff's office is investigating the apparent homicide of a Murphysboro man.

The body of William L. Livingston II was found by his wife at about 3:30 a.m. Friday in the couple's apartment, which is behind Mr. B's Tavern on RR 4. Livingston owned the tavern, which is west of Murphysboro.

County Coroner Don Ragland said Livingston died of multiple gunshot wounds to the head from a small-caliber weapon.

The Jackson County Sheriff's office released a statement saying the death is being treated as a homicide and that they are being assisted in its investigation by the state's Division of Criminal Investigation.

Livingston bought Mr. B's in January, 1979, and had managed the Jackson County Club clubhouse before taking over the tavern.

Livingston's funeral is scheduled for 11 a.m. Tuesday at the Petetti Funeral Home, 1418 South Street, Murphysboro. Friends may call from 5 to 9 p.m. on Monday and before the service on Tuesday.

Livingston will be buried in the Murdale Gardens of Memory.

A well-managed life—of 119 years

George F. Will

A DOCTOR says that Reuben, who was considered long-lived by 1900, died recently at the age of 119. It is not unusual for a person to live to be 120 years old these days, according to law students who have studied the law of age. In fact, many law students have studied over 120 years ago, one example being the LL.C. law graduate of 1900. The same law students have studied until the age of 119.

Aging, like a lot of other common things, is a mystery. The memory, the existence of the universe, the infelicitous fly, remains a mystery. And many genealogists believe that, absent the intervention of a genealogist, living an individual is not an easy task. Aging is the most logical control "clock." A scientist says that, ideally, we should live fairly healthily and then go "poof" rather than go into slow or normal. A. C. Lloyd, the doctor, who was one of nature's better clocks, went "poof" the day after he was born. His death is not yet a mystery, but it may be, depending on how you define "mystery." He was born under the presidency of Jefferson Davis. Actually, he was a proper baby constituent of Abraham Lincoln. The federal did not really succeed in Richmond at the time, but Virginia never succeeded in being an independent state.

War lived during the administrations of 24 Presidents and an estimated 1 million people. He said that he was born in the administration of President Tyler, and who was America's oldest citizen when he died in 1979 at age 117.

A SMARTY-PANTS once said that no one who lives to be 118 or more has been remarkable for anything else. But anyone who doesn't live through 119 or more years, without having supposedly been driven into a corner by nuclear or michelangelo, remains remarkable—foolish, perhaps, but unquestionably remarkable.

A longevity is a triumph not just of physiology but of the spirit. Ward was married and he was a North American record for understatement when, recalling his youth, he said: "Things were different back then for the impression." He was born on Christmas, 1862, in Richmond, Va., and in slavery. Persons with unsound views of the Civil War may say that he was born under the presidency of Jefferson Davis. Actually, he was a perfect baby constituent of Abraham Lincoln. The federal did not really succeed in Richmond at the time, but Virginia never succeeded in being a state.

You say you want to buy a calculator?

By Dean Kirk
Student Writer

A person thinking of buying a car has to decide from a myriad of models. As intelligent choice will involve much help in the car's decision-making ability, efficiency, and available options, as well as the price. The same sort of situation faces a person wishing to make the right purchase of an electronic calculator among the many available models. One of the considerations is what the use of calculator will be determined for, said Echol C. Cook, assistant professor of Engineering and Technology. He noted, for example, that a calculator used for trend-related ship between feature Troutt said a calculator values dollars to the business student, however, with an example, Cook said. He said that the linear demands of a function could be determined for different features. Linear and exponential functions could be used to model different situations. Examples, Cook recommended Texas Instruments TI 30 or TI 36 as the best calculator for a student.

One of the students, however, with a different feature, said that the linear and exponential functions could be used to model different situations. Examples, Cook recommended Texas Instruments TI 30 or TI 36 as the best calculator for a student.

The REMAINING 5 percent of a student's needs may call for trigonometric, factorial, and summing functions. A business student, however, may need a different calculator with features suited to business needs of a business curriculum. One of these features, linear regression, is a useful feature for business calculators. Troutt, a faculty member in administrative sciences, Troutt also said that the linear regression feature would be useful in trend analysis or forecasting.

The multiplication function, used to measure the relationship between two different variables or constants, is another feature Troutt said a business student should have. He also said that a business calculator ought to include the sum of many values and compound interest calculations. The sum of many values function could be used to determine how much money a person would need to accumulate a certain number of dollars over a certain number of years, he said, and the compound interest function could be used to figure the monthly payments on a mortgage.

TROUTT ALSO suggested that a calculator's display, the calculator's keyboard where the lighted digits appear, should be at least one quarter-inch high. Cook said that the two types of displays, liquid crystal and light-emitting diode, have different features. Light-emitting diode type shows up in a field of liquid crystal displays and is good for the more lighted digits. He noted, however, that liquid crystal displays are hard to read in bright sunlight. Cook said that at least eight digits comprise the display. The calculator's keyboard, located in front of the display, ought to be arranged so you can easily get to the buttons, Cook said. When you press the buttons, you ought to feel a click. He said this click indicates to the user that a digit has been entered into the calculator.

Another item a calculator should have is a memory function that stores data to be stored in the calculator for future use if needed. George Parker, a faculty member in mathematics, said "I think a memory feature is worth paying for," he said. A power supply based on a nickel cadmium battery is another feature that Parker recommended. A calculator with this kind of power supply can be charged with an A.C. adapter when that runs your household current. Once charged, the calculator can be used for about three hours before it needs recharging, Parker said. Nickel cadmium batteries are also best for use with LED display calculators, he said, because an LED "really uses power," Parker said. He said that the brand name of a calculator is important when buying a calculator. Even though "lots of batteries, you are there with the same well-known brand man, Texas Instruments, Parker said.

TROWEVER, PARKER said, "I wouldn't recommend a Hewlett Packard calculator if you aren't comfortable with math. Hewlett-Packard calculator, he said, has a "reverse Polish Notation" which results in their working differently form most other kinds. Packard calculator, the user would add three plus four and press the "enter" key, then the "add" key and finally the "plus" key which would result in the answer seven appearing on the display with which it appears on paper," Parker said.

On Texas Instruments calculators this is made possible by the Algebraic Operating System (OS). For students in sciences such as engineering, physics and chemistry, Cook recommended either Texas Instruments TI 30 or TI 36 as the best calculator buy. "B tight money.

The TI 30 is powered by a nine-volt battery, he said, although a battery pack can be purchased for $10 which allows you to run the calculator's battery-powered calculators. The TI 30 is similar to the TI 36 except that it is only half as thick and runs on a set of watch batteries that last for two years, Cook said. He also said, though the batteries should be changed annually, since the user doesn't know when the calculator will go out. Depending on where you buy, the TI 30 costs between $17 and $25 while the TI 36 can be purchased for as low as $22.

Cook didn't recommend the purchase of Hewlett Packard calculators because they are too expensive and more difficult to use.

For a business student, Troutt recommended Texas Instruments TI 30. It is a model that is used in a business curriculum, said Troutt. He said it costs between $60 and $80.

TROWEVER also said that a calculator's number of keys and the type of calculator useful when there is a need for doing repetitive calculations, could be used for coursework in the College of Business but that they are more suitable for career purposes once a student graduates from college. Two possible choices he suggested were Texas Instruments 114 or TI 59.

Cook said that by the time a person reaches his second semester of junior year in an engineering curriculum, enough experience will have been acquired so that he will know what a good compact type would be better. Cook assumed the same thing could be said for students in other sciences such as chemistry and physics. Cook recommended the TI 30 as a good programmable model. It retails for $25.

The type of calculator Cook didn't recommend for students in the sciences is the so-called "calculator king" calculator which is about the size of a credit card. These calculators, he said, don't have the necessary functions needed for scientific applications.

Troutt said the calculator is not suitable for business applications because they also don't have the necessary functions.
Joviality flourishes at the Dating Game

By Joe Walter
Staff Writer

An air of joviality accented by a few dollops of sarcasm was the Student Programming Council-sponsored Dating Game Thursday evening at the Student Center, a little racier than the television show on which it was modeled.

Former WTVO disc jockey "Live Earl Jive" emceed the show, in which groups of three "eligible bachelors" or "bachelorettes," competed unseen by their prospective date, for a date package in- cluding a meal at a local restaurant and two tickets to Marcel, Batman or Bon temps.

Even before the event started, the crowd in Student Center Ballroom D was restless, its members shouting things like "Let's get it started!" and "Where's 'Live Earl Jive,' my hero?"

Into the sarcasm entered "Live Earl Jive" and his wife Beverly Hills, both of whom returned to Southern Illinois from Toronto. Jive said he was actually glad to be back. Later, he joked about her most embarrassing moment on a date. "Going out with you, a man in the crowd shouted.

Jive then said that some of Canada had rubbed off on him when he responded, "You dirty hoser."

He introduced the first round of bachelors as the chooser, saying, "Some hearts may be broken and some may be over-maintained."

The chooser was Steve Patterson, a junior student in industrial technology. He ended up selecting Bachelorette Number One Gayle Shapiro, at outspoken senior in recreation who kept repeating into the microphone: "Pick me, Steve."

When Patterson asked the three candidates how much money it would take to get them in a wet T-shirt contest, Shapiro said, "Free."

Bachelorette Number Two, Araina Short, said she would not do it, and Bachelorette Number Three, Susan Courtney, said it would take $60.

In game two, the interrogator was Margaret Porter, a sophomore in elementary and special education, whose choice was Dave Price, a junior in radio-television.

When Porter asked the bachelors what would they do if they could, Bachelor Number One, Craig Cooper, said he would be bachelors and lockers a screen which separated them. Bachelor Number Two, Bob Olderman, said he would take her to a party. Price answered, "I would be with the audience laughing at the people up here."

Gayle Shapiro, senior in industrial technology, celebrates being chosen by Steve Patterson, a 1973 graduate in industrial technology, at the Dating Game Thursday night in the Student Center. The two participants meet afterward, after playing rig, and share a kiss.

When asked if her feelings had anything to do with the fact that she won a date, Shapiro shrugged and said, "It's possible."

George's locket up for sale

LOS ANGELES (AP) — A Seattle man hopes to found an insurance business on a waist of $3 million from a distant relative — President George Washington.

The lock, purportedly cut from the presidential head for a gift, is preserved in a gold locket surrounded by 13 tiny gold stars and pearls.

Jim Washington is asking $1 million for the locket, which is being offered for sale by Investment Matchmakers Inc. of Los Angeles.

"He won't get a million dollars. But... I think he could get between a half-million and three-quarters of a million dollars," said Mike Greenwald, vice president of Investment Matchmakers, which specializes in unique investment opportunities.

The locket was passed down through the family to Jim Washington, who says he is a fifth cousin of the president's.
"Waiting for Godot," Samuel Beckett's tragicomic play, will be presented at 8 p.m. Feb. 23 at Shryock Auditorium.

Waiting for Godot has been described as one of the most important works of the 20th century, as "something of Aristotle's philosophy performed by the Marx Brothers" and as "a philosophic quiz show."

When Beckett (who later won the Nobel Prize for literature) wrote "Godot" in 1952, he abandoned traditional dramatic structure and plot development. Instead, he wove his theme into a kind of rough poetry that tumbles forth, sometimes in conventional dialogue and sometimes more in the manner of choral readings. The play is set on a desolate plain, somewhere between here and there. Two tramps, Vladimir and Estragon, are waiting for a certain Mr. Godot, who will presumably give a sense of purpose and direction to their lives. The tramps have only the dimmest recollection of the past and vague speculation about the future — they dwell in a void called "meanwhile."

There have been many explanations offered for the meaning of the play. Some critics have said it is a metaphor for life, and the unseen Mr. Godot is a metaphor for God, fate, salvation or simply meaning in life — the choices of interpretation are both multiple and individual.

A critic for the Miami Herald described it as "an unfinished canvas with brushes and paint set beside it. If you are intrigued or stimulated by it, you pick up the brushes and add your own strokes — your own thoughts and meaning — to it."

Admission is $5, and all seats are reserved. Shryock Auditorium Box Office is open weekdays 11:30 a.m. to 6 p.m., and mail and credit card phone orders are accepted daily from 8 a.m. to 6 p.m.

Giraffe becomes living memorial for boy

LOS ANGELES (AP) — Michael and Marsha Fuerst are hoping future generations of children will be delighted by a legacy of a 6-foot-tall Masai giraffe named Mattie was donated to the Los Angeles Zoo by the Covina couple.

Zoo officials are hoping Mattie will mate with Hattie, a female at the zoo, and produce an offspring. She said she hopes the gift will call attention to the work of the National Sudden Infant Death Syndrome Foundation.

Add your choice of custom options to the design you select and you'll have a ring you'll want to wear for years to come.

But don't delay. Visit the ArtCarved Ring Table and get your ring at a price that's too good to last!
Book on Lincoln does him justice

By Abigail Kimmel
Staff Writer

Both Herbert Mitgang and the SIU Press have done justice to "Mr. Lincoln" and his birthday.

Friday the SIU Press published Mitgang's book, "Mr. Lincoln," a one-man play which exudes the Lincoln character and philosophy better than any textbook or biography I have read. The book traces Lincoln's rise to Illinois politics, his election to and loss of a United States Congressional seat, his run for the Senate against Stephen Douglas, his nomination for president and his presidential terms trying to preserve a Union that would not preserve himself.

Throughout the reading, I was constantly amazed to find quotations commonly heard but never before attributed to Lincoln. The monologue is comprised of self-effacing humor, frankly recollections of his counting of Mary Todd, audacity at the death of his son and eloquent observations about war, politics, family, slavery and neighborhood gossip.

Mitgang is a qualified spokesman for Lincoln and his ideas. He has written two biographies about Lincoln and edited "The Letters of Carl Sandburg," who was another Lincoln biographer.

Mitgang wrote in his author's notes that everything is not in perfect chronological order, and that certain pieces of the dialogue are fictitious. But it is evident that his research, whether through historical records or personal discovery, is accurate, honest and thoughtful.

Organ recital set for Friday

University organist Marianne Webb will present a concert featuring organ with instruments at 8 p.m. Friday in the Shroyer Auditorium. The event is free and open to the public.

The first time organ has been combined with a wide variety of other musical instruments in a recital at SIUC, according to Webb, who will be assisted by various faculty members in the School of Music.

Michael Hansen, director of the Marching Salukis, will team up with Webb to perform early 18th-century trumpeter Andre Campra's "Polacca," which Hansen and Webb arranged for organ and tympani.

Robert Weiss and Webb will perform Dutch composer Jan Koetsier's "Partita on 'Wachet Auf'" for trombone and organ.

This will be the first time organ performance at the Campra and Koetsier compositions.

Georg Philipp Telemann's "Sinfonia In D Flat Major" for oboe, bassoon and continuo will feature George Henry on oboe and Charles Fligel on bassoon.

Contemporary Dutch composer Martin Munnik's "Concerto" for organ and brass will be performed by Webb with faculty members Phillip Glisson and music student Patrick Ivory on trumpet, and students John Hentschel and Naomi Mulverhill on trombone. The Weiss will serve as conductor.

"As conductor, I was one of the first concert organists in the country. Webb has toured everywhere. She has appeared as featured recitalist at the National Convention of the American Guild of Organists.

She has been a member of the SIUC faculty since 1965.

Marcel Marceau set for Shroyer

Some peace and quiet will come to Southern Illinois in the form of the world's foremost living mime, Marcel Marceau. Marceau will bring his artistry to Carbondale for one performance at 8 p.m. Feb. 26 at Shroyer Auditorium.

Tickets for the performance are $12, $7 and $3. The Shroyer Auditorium Box Office is open weekdays from 11 a.m. to 6 p.m. Mail and credit-card phone orders are accepted weekdays from 8 a.m. to 6 p.m.

During his career Marceau has brought laughter and tears to people around globe. Marceau said, "I performed in many countries before audiences of many nationalities: emotion or hilarity rises, expand and fade away in an identity pattern. Since I became a mime I have not found it possible to identify laughter of that reader-specifically French or German, English or American or Russian. "Pantomime is, therefore, a universal art and a means of communication between all the people in the world's too grave for love and beauty."

Marceau first toured the United States in 1950 and '51. After opening at the Phoenix Theatre in New York City with rave reviews, Marceau went on to play to standing-room-only crowds in all major cities, ending with a record-breaking run at New York's City Center.

It is through television, however, that Marceau has become familiar to millions of Americans. He won an Emmy during his first U.S. tour after appearing on Max Loman's "Show of Shows."

From every indication received, the first-ever Undergraduate Student Organization Book Co-op appears to be a total success, with sales in excess of $10,000.

Because of this initial response, we are certain that future Book Co-ops will take place at SIUC.

Many students played important roles in the planning and implementation stages of the project. Also, several college administrators were extremely helpful in overcoming the obstacles a project of this nature confronts.

Special thanks goes to the Sigma Kappa Sorority, who co-sponsored the Co-op and worked during the collection and sale of books; Donna Riede, who acted as Assistant Director and coordinated the Sigma Kappa responsibilities; to the COBA organizations, which co-sponsored the project and handled the bookkeeping; and John Kelly, who coordinated the COBA activities.

If we have neglected anyone we apologize for the oversight.

Thanks for helping the USO help the students of SIUC.

The Branko Krsmanovich Chorus of Yugoslavia performed at Shryock Auditorium last Thursday.

Chorus' technique provides for a memorable concert

By Roger Traylor
Staff Writer

A varied selection of rarely heard pieces combined with exceptional technique and musicianship created a truly memorable concert Thursday when the Branko Krsmanovich Chorus of Yugoslavia performed in Shryock Auditorium.

The chorus is a 50-voice ensemble of extremely talented vocalists and instrumentalists. Darinka Match-Marovich, chorus director and conductor, as well as faculty dean of Belgrade University — from which most of the performers are recruited — was a dynamic presence on stage, elegant and energetic in her conducting, eliciting exactness and precision from the group.

The chorus produced a wide range of sonorities and effects according to the varying demands of each piece, contrasting the agile and lean sounds of folk song settings with the dense, voluptuous sounds of ecclesiastical pieces.

The first half of the program, devoted mostly to music of a religious nature, demonstrated what would surely be considered definitive performances of Slavic church music. In Stevan Djenanjac's setting of the St. John Liturgy, the chorus sang responsorially with the priests' solo lines, performed by tenor Grujica Pavlovic and bass Aleksandar Macevski. Pavlovic's clear and intense tenor made a wonderful contrast to Macevski's dark, rich bass. Excerpts from Carl Orff's "Carmina Burana" were also included.

The last three pieces of the evening were John Williams' "The Lord's Prayer" in Russian, colleague to "The Lord's Prayer" in English, and "Psalm 150," from which the audience sang as a choir, under the direction of the Branko Krsmanovich Chorus of Yugoslavia, conducted by Shryock Auditorium's own Roger Traylor.

The concert concluded with "Humble and Grateful," an exquisite piece arranged for the Branko Krsmanovich Chorus of Yugoslavia, conducted by Shryock Auditorium's own Roger Traylor.

Shuttle nearly set for Tuesday launch

CAPE CANAVERAL, Fla. (AP) - Technicians preparing the space shuttle Columbia for its third trip into space finished installing explosive devices in its solid rocket boosters Sunday, officials said.

"And that's about the last major thing they have to do before we roll it out onto the launch pad," said Kennedy Space Center spokesman Dick Young.

Technicians begin clearing up last-minute details Monday so the Columbia can be moved to its launch site at 4 a.m. CST Tuesday, Young said. The planned launch date is March 2.

Astronauts Jack Lousma and Gordon Fullerton went to Houston Space Center on Saturday for further training after two test missions Friday, Young said.

Battle over midwives goes to federal court.

By Leanne Wadman
Associated Press Writer

SPRINGFIELD — Victor Piontkowski doesn’t consider himself a crusader, but he’s the only person in Illinois to hold a state license to attend the birth of a baby. The 78-year-old chiropractor is the only licensed midwife in Illinois who doesn’t practice in the Chicago area.

The state’s Midwifery Act, enacted in 1977, required that all midwives be licensed by the State Board of Midwifery and Homeotherapists. But Piontkowski’s application to do just that was rejected in 1981.

"Midwifery has a perfect track record in the state of Illinois," he says.

Midwifery supporters blame the established medical community — especially the American College of Obstetricians and Gynecologists of Chicago — for the lack of widespread acceptance.

David Stewart, head of a national organization that promotes birth alternatives, says the medical community fears independent midwives because they threaten to cut into the fees collected by doctors and hospital maternity wards.

Up to 21 states allow some form of midwifery independent of hospitals and doctors, although some permit it by "being along about it," he says. But Warren Pearse, spokesman for the obstetrician-gynecologist, maintains the percentage of babies born by midwives access to their practice poses virtually no economic threat.

"Without certification a midwife is almost an unsanctioned person," he says. "Patients can sue their doctors, but they can’t sue a midwife for medical negligence." But since Illinois licensing was unconstitutional, "a bill that would reintroduce midwifery licensing," the bill would require certain levels of education and experience for both nurse and lay midwives.

Stewart said the bill in committee last March because it lacked support.

In addition to the question of whether opponents claim a widespread lack of interest in midwifery makes legal sanctions unnecessary.

He says the practice of midwifery began to decline shortly after the Civil War and was banned in 1863 because hospital technology became more advanced.

"The Illinois’ provision was probably adopted in 1933 as an administrative convenience; now the licenses are useless.

"Without it, a midwife is a nurse," he says. "If he’s not a nurse, he’s not in the health care system. And the bill died in committee last March because it lacked support."

Expert: West dominates news flow

By Charles Victor Staff Writer.

Many issues arebrew in the field of journalism and communication today. One of these issues that occupy top place at many conferences and hearings is what has come to be called the New International Information Order. Interest in the New Information Order and international communication in general has reached SIU-C. A new course, International Communication (Journalism 41), is a recent addition to SIU-C's journalism curriculum. Another sign of this interest is new research, like a recent study by SIU-C Journalism Professor Edwin Amsden and Stuart Bullion on the way media influences our view of the world.

To underline this interest and give it a scholarly tone, the Journalism Department invited Kaari Nordenstreng, world-renowned expert on international communication from Finland, to spend two weeks at SIU-C. Since Feb. 1, Nordenstreng, 41, has been lecturing in various Journalism classes. In two discussions with the international communication class, Nordenstreng explained what the NIO debate was all about. "World news flow has been dominated by the west to the rest of the world. The four major news agencies, AP, UPI, Reuters and Agence France, all come from the west and totally dominate world news activity.

The consequence of this dominance is that a country in Asia would hear news about her nearest neighbor from some country in the west rather than from her neighbor. He said, "This also means that news is often strongly biased towards the west. Too often news is couched in western terminology, western values, western judgments and western perspectives. Asian perspective of Asian news, for instance, is lost. This must change," Nordenstreng said. "Individual countries need to have more control over their own news. In the field of international relations, the NIO is an area of grey debate. The United States and the west seek to define the status quo and present mode of news flow, he said. Socialist and Third World countries, on the other hand, are strong proponents of the NIO. "The west believes that news is news and there must be no control over news content," Nordenstreng said. "But, regarding this, it is essential that the west believes that news is news and there must be control over news content," Nordenstreng said. "Therefore, there must be a shift in control in news flow."

In a vein of light sarcasm can be added, "Because of present domination of western values in news, Elizabeth Taylor's latest divorce might receive greater coverage than the success of the Fifth Five Year Plan in India." Commenting on the United States press situation in general, Nordenstreng said, "They are still fighting over news control. They are more concerned with war and conflicts than peace and development.

The illustration of this western viewpoint domination of news, Nordenstreng took the example of the recent Polish crisis. "The government presented the crisis from an ideological perspective. The Solidarity movement was disapproved. The works of freedom, while the Polish government, the Soviet Union were villans. "But the Polish crisis is both camps.

Kaari Nordenstreng, an international communications expert, says Western values are emphasized in world news.

AP, UPI, Reuters and Agence France, all come from the west and totally dominate world news activity.

Huffstater issued a gag order prohibiting authorities from discussing the case. Earlier, however, authorities said Henderson described shooting to death three in-laws in Ohio, a woman in South Carolina, a woman in Mississippi, a man in Louisiana and five people in Florida. Last Wednesday, Henderson authorities to a field about 40 miles north of St. Petersburg where they found the decomposed bodies of Vernon Odum, 27, of Clerksdale, Miss., and a unidentified man. According to officials, Henderson said he picked up Odum, Ms. Dickey and an unidentified man south of Tallahassee on Feb. 3 and rented a motel room for a "sex party." Afterward, officials say, Henderson said he killed the three because he feared they would kill him. At a high school dropout who enlisted in the Army at age 17, Henderson began a life of petty crime after receiving an undesirere discharge for assault as an officer, the Miami Herald reported.

After a jail term, he drifted to Wyoming in 1977, where Henry Eike dispatched Henderson in his pickup to do some chores. He never came back.

Craig Kirkwood, then a reporter in Laramie, Wyo., said Henderson was involved that night in a dispute with his brother "when that got out of hand." "He was in bondage," Kirkwood said. "He was burning her, a little harder than normal. She was yelling. He got out of his car, grabbed her, pulled her hair, grabbed her, hit her, a lot of common work." Henderson was hit by a car, beaten, left for dead, he said. Henderson returned lifeless.

Drifter claims he is a mass murderer...

Vogel recruits prep standouts

Women’s gymnastics coach Herb Vogel will be busy Monday trying to recruit three “outstanding high school seniors for next season’s team.

The addition of all three all-arounders have consistently scored 36 points or better this year. Vogel said that the women’s high school and club coaches deserve a lot of credit for the gymnasts’ fine individual showings this year.

Saluki grappler Don Caudle, wearing white headgear, strains to break the hold of Southwest Missouri's Jim Kattelman in a 128-pound battle.

Matmen snap string, tie Bears

By Steve Merloch
Sports Editor

The wrestling team finally snapped its season-long losing streak. But the Salukis have yet to win a dual meet.

The Salukis battled Southwest Missouri State at 2:31 in a dual meet at the Arena Thursday. The grapplers' dual record stands at 0-11, while SWMO dropped to 4-3.

SIU-C led 21-18 entering the final match, but heavyweight Don Caudle dropped a three-point decision. Despite losing the victory, Saluki Coach Lana Long was all smiles after his team's best performance of the season. "We wrestled pretty well tonight," he said.

Long was especially pleased with the performance of Saluki Jeff Snyder, competing in just his third bout of the year. Snyder won the 158-pound weight class with a pin.

The freshman was in complete control of the Bear's Bert Griss in the second period, scoring seven straight points to take an 8-4 lead. Griss came back with a reversal and near fall to tie the bout with 15 seconds left in the period, but Snyder fought Griss off and pounded on the Bear, pinning him and winning six points for SIU-C.

I caught him on his back," Snyder said. "I had a more positive attitude than any other two buttons. The high team spirit really helped." For other Salukis — Tim Dillick, Jerry Richards, Ted Bennett and Mark Hedstrom — won their bouts. Dillick, 142 pounds, won a four-point decision to stretch his unbeaten string to 16 and improve his season record to 22-4.

The St. Louis native admitted that "revenge" was a motive in his second meeting with Bear grappler Tim LePage. Dillick lost a three-point decision to LePage in SIU-C's first dual meet of the season. The Bears won that meet, 27-1.

Richards opened his bout by scoring five takedowns against John Shumate to win a four-point decision in the 183-pound weight class. In 177-pound competition, Bassette demolished Gary Messenger, 10-2, to win a four-point decision. Messenger managed just two escapes against the Saluki grappler.

Ted Ball was able to concentrate more in a meet," Long said.

Hedstrom and Steve DeGraeve squared off in a grueling battle in the 197-pound division. Neither wrestler scored in the first period.

Hedstrom scored a point with an escape with 14 seconds left in the second period. DeGraeve tied the bout with an escape of his own midway through the final period.

Just when it seemed that the bout would end in a draw, Hedstrom scored the only takedown with just two seconds left to capture a three-point decision.

Another close match took place in the 197-pound division. Saluki Don Caudle dropped a three-point decision to Jim Kattelman. The only point in the bout was awarded to the Bear grappler when he escaped Caudle's grasp with 24 seconds left in the third period. Long and Colter said "it really was a great job against a tough guy."

Jeff Duda scored five near falls against Saluki Keith Abey to win a five-point superior decision in the 167-pound weight class. Abey tied Duda with a reversal early in the first period, but the rest of the bout belonged to the SWMO representative.

Tim Krewa lost a four-point decision to Steve Cridge in the 158-pound competition. SWMO's John Howard pinned Dave Shea at the 2:34 mark to win the 167-pound crown.
Netters' singles play well, but team falls to Vanderbilt

By Fred Perdue
Staff Writer

The men's tennis team evened its record at 1-1 after dropping a 4-3 decision to a tough Vanderbilt Saturday in Nashville, Tenn. The Leopards played well at the number three, four, five and sixth positions, but couldn't quite impose the Commodores after they went into the doubles competition with an assured victory.

"They were closer than we thought. We had a good chance to win it," said coach Dick LeFevre after the Salukis finished the second set of matches almost tied, with the same "taught schedule of any team is mid-America."

"There were factors involved that made the outcome change," continued. "I'm not trying to make any excuses. We lost to an excellent tennis team."

One of those factors was the court. Dick LeFevre said the court has an extremely fast and small bounce which took the Salukis by surprise and added that it was tough for his players, who had never played on that kind of surface, to get used to the speed at which the balls were bouncing.

"We just weren't used to it," LeFevre said. That and some "guys from Vanderbilt were used to the court. We just weren't ready for it."

The only Saluki to capture a match was freshman David Desilets, who defeated Steve Elliott 6-2, 6-2, at the number three position. LeFevre was impressed by the Johanneney, Sout African native and added that he defeated a "very good player."

No. 1 singles player, David Filer, also played a good match, besting John Elliott, brother of former great Chris Elliott-Joyd, the first set 7-4. But Elliot, one of the best players in the Southeastern Conference, according to LeFevre, rallied in the two remaining sets to defeat Filer 6-3, 6-1.

"We really thought Filer was going to beat Elliott," LeFevre said. "If we could have won that and won one more, we would have went into the doubles competition all tied up. It could have made a difference."

But it was not to be for the Salukis John Grief also lost early in the match, taking the first two sets, 6-4, 7-5, to Allen Benacche, Earlier, number one in singles and doubles, Brian Stanley and Lito Sapon, both lost in straight sets.

Stanley fell to Vanderbilt's third seed Huffman 6-3, 6-1, and Ampon, a senior from Manilla, Philippine islands, lost to Robert Loundrep 6-4, 6-4. LeFevre said Ampon was not playing at full strength because of a stern muscle injury suffered in last week's match at Illinois State. LeFevre added that Ampon's hard time serving and anisel may sit out of practice for a while.

Number six player Gabriel Koch, of Bogota, Columbia, isn't far well either. He lost to John Sheppard 6-1, 7-4.

In doubles, Grief and Filer lost to Huff and Elliott 6-4, 63; Ampon and Desilets were defeated by Evert and Loundrep 6-4, 6-2; and Coch and Stanley fell to Shepard and Benacche 6-2, 6-1.

The netters will have this weekend off, and resume their schedule at Indiana and at Illions on the 27th.

Plab stars in lady cagers' win

By Keith Masdell
Sports Writer

Oared D. Plab scored 18 points and led the women's basketball team to a 80-69 win over Madison in Thursday's home game for the first time in five years. Plab, a 5-foot-11 center, was named the star of the game by Coach Fred Macostah. The Salukis ended the 16-game losing streak which included a 15-game losing streak against Big Ten teams.

In the second half, the Salukis opened the game up by using their height advantage - SIU-U's starting five were 6-3, 6-4, 5-8, 5-10, and capitalized on their rebounding and play of the smaller St. Cloud guard. Sandy Martin hit her second consecutive layup at 15:36 off a pass from Plab, the Salukis' 5-9-9-11-12-11 and never led by less than 11 points from there on.

Although SIU-U dominated the offensive game, Coach Cindy Scott wasn't happy with the way the smaller players played. The team scored inside.

"We played a pathetic defense tonight," Scott said. "They passed us all night and we just stood there."

Although Scott wasn't ecstatic about the Salukis defense, she was happy with the play of freshman center Terri Schmittgens. Schmittgens came off the bench to score 10 points, 4 rebounds, 4 blocks and steal the ball twice in just 10 minutes of play.

But the Faber was held to two points and put up 12 assists, 4 rebounds and a couple of steals in just 15 minutes of play. She scored 49 percent from the floor but turned the ball over 27 times compared to the St. Cloud's 39.

The win upped the Salukis record to 6-3, and dropped St. Louis to 12-15. The Salukis are idle until Friday and Scott said she would give the team Sunday off and then practice Monday through Thursday to prepare for a game against Illinois.

 Spartan Stake sets two school records

By Paul Lareca
Associate Sports Editor

Distance runner Patty Pymire-Houseworth set two school records for the women's track team at the Illinois Invitational Friday and Saturday. Thrusday's Saluki indoor season opener wasn't scored on a track, but on the women's track. Coach Claudia Blackmon felt the team performed well overall. She noted the performance of Pymire-Houseworth, who set the record.

The senior distance specialist took second in the three-mile relay, setting a new school mark of 17:26.6. Blackmon said that the girls' distance team, not originally scheduled, was added to the lineup of SIU-U.

Pymire-Houseworth's other school record came in the two-mile race, giving the Salukis another against a field in which the top three were from the Big Ten. Blackmon said the two-mile was an "incredible race", especially for the nation at different times over the weekend.

Blackman called "outstanding" the work of freshman Vesta Ross. Ross, by a yard, had nine and a half seconds of the 200 medley. In the 200 medley, the last 50 medley, the last 200 medley and the 200 medley, the Salukis' best KIU in the 200 medley, 1:50.28, and in the 200 medley in the 200 freestyle: 1:53.07, and in the 200 medley in the 200 medley.

Other Salukis performances of interest in the Invitational were Brown's fourth place finish in the 500 freestyle; Jessica Schweiger's first in the 200 medley; and diver Leslie Miller's fifth in the three-meter and sixth in the one-meter competition.

LEAD from Page 20

Kittman took third with 306.15 points. Pam Ratcliffe and Amanda Amaud tied for fourth with a collection of individual wins over the event. Over the cliffed won the 100 breaststroke, while Martin, with a 30.53, added Ratcliffe, with a 30.64, in the 100 breaststroke.

Amaud won three of the first four 777.5, winning the 100 and 400 medley and the free-style. The Salukis beat KIU in the 200 medley, 1:50.28 and 1:53.37, and KIU in the 800 freestyle, 7:29.42.

Other Salukis performances of interest in the Invitational were Brown's fourth place finish in the 500 freestyle; Jessica Schweiger's first in the 200 medley; and diver Leslie Miller's fifth in the three-meter and sixth in the one-meter competition.

The win upped the Salukis record to 6-3, and dropped St. Louis to 12-15. The Salukis are idle until Friday and Scott said she would give the team Sunday off and then practice Monday through Thursday to prepare for a game against Illinois.
Lady tankers lead state foes

By Paul Lorenz

The women's swim team had won four of the five meet this season and were five meet field going into the final day of the Illinois State Championships Sunday.

SU-C took the lead in the final freestyle relay and set the team on the right path.

In the 100 butterfly, Larsen swam a 54.72, seventh best in the nation as Illinois State's Jamie Rohloff.

In 50 freestyle and the 100 butterfly, Larsen took the lead in the 100 butterfly and won in 59.70.

In 200 freestyle, the team took in a 7:35.80 lead over second place Eastern Illinois.

Barb Larsen led the Saluki women's swimming and diving team to victory against the Missouri State Bears.
