**Parr: Restrict farm imports, set minimum commodity prices**

By John Race

P.L. Parr, Democratic candidate for the 58th District State Senate seat, said Monday that a "consumer-financed" recovery is an important first step in the nation's economic recovery.

Referring to agriculture as "the cornerstone of the foundation of our nation's economy," Parr explained why they have been called ineffective legislation for the state of the United States farm economy.

Parr spoke at a press conference at Southern Illini Airport.

Parr, a Union County farmer, criticized federal agricultural policies, saying he had hurt farmers. He proposed agricultural policies that would be changed, that legislation be passed to stop purchases of farm land by non-farm corporations and non-resident aliens, and that minimum prices for farm commodities be established.

State legislation setting minimum price levels for various farm commodities could be structured in a statement, "the world market is not a free market," Parr said.

"The United States sets the price for farm commodities," Parr said. "Much of what we import is low quality and we have to protect our farm economies. Almost all our imported farm products come from countries with lower costs of production than we have."

Parr said that input of imports have put a lid on farm commodity prices. Parr said, "in the past we have not had a tax policy," indicating that the price of producing grain products is not the same as the price of imported grain products.

"Good management or bad, the United States is without a profit," Parr said. "Nobody can pay off a $1 debt with 90 cents."

"As long as we keep trying, to keep the status quo, we may continue to pay the penalty," Parr said. "The United States has been hurt by this government's economic policies and it has hurt our nation's farm economy."

Parr released figures for the 1983-84 year that showed $336,663,645 in total farm cash receipts for 1981. The figures also show that if commodity prices had been at parity levels, it would allow a

**It's a two-way street,** Bush says

WASHINGTON (AP) — President Reagan's spokesman called yesterday for an end to Soviet officialdom after Chernenko's death and said the new leader is certain to have a more pro-American and constructive relationship with the United States.

"It's my expectation that the new leader of the Soviet Union will have a constructive relationship and that it will be a two-way street," said White House spokesman Bernard {Shus."

"This is an important first step in a new era for the United States and the Soviet Union," added the spokesman. "The United States and the Soviet Union have been working together for some time on a number of issues."

"We are committed to working with the new leader of the Soviet Union to advance our mutual interests."

**Soviets invited to seek peace**

CHICAGO (AP) — "Democratic U.S. Senate candidate for Illinois, P.J. Simon, on Monday he was endorsed by the Sierra Club as they support of legislation restricting strip mining, acid rain and hazardous waste dumping.

Simon's tour of a South Side toxic waste dump, following news conference was part of a busy day of campaigning in the Democratic race. He was in the lead in the nomination to take on the winning Republican candidate for the seat, incumbent Sen. Charles E. Percy or his GOP challenger, Democrat Tom Corcoran.

At hour before lawyer Alex Steil told a news briefing that his Senate primary foes should explain why they were, "supporters of a law indexed income tax rates to the rate of inflation.

Steil said the law, to take effect in 1985, would help elderly and disabled people, and amounted to the "best tax protection plan the middle class ever got."

Meanwhile state Sen. President Philip Rock stood for the nomination by dropping in on a home for abused children in a nearby neighborhood where "we could see women with crying children and men and women and ask for their help," and the Chicago Food Depository, which serves the poor.

Simon-Makahn, was accompanied by representatives of the National Carnation Movement Against Toxic Hazards, an environmental and labor group, the Illinois Public Action Council, Greenpeace and the Committee to End Poverty.

Simon said his news conference was one of 36 events being held Monday in 24 states and Washington D.C. in support of legislation to control the "federal 'Superfund' for cleanup of toxic waste. Participants are expected to convey more than 15 million signatures to Congress in districts, the congressman said.

A Sierra club official said Simon's record on environmental issues prompted the endorsement. The official said Simon had backed cause to reduce acid rain believed caused by sulfur dioxide emissions, was creating a law limiting nuclear plant liability, re-named the clean-air act, carry on strip mining, and more federal funding for toxic dump cleanup.

Steil appearing before reporters in a wheelchair in which he has been confined to a hospital for a duration earlier this month, charged that Simon, Rock and Ronald Burris, the Democratic Senate aspirant, all backed repeal of the law indexing tax brackets to inflation.

Steil said the indexing idea, which he proposed in similar form during his 1978 U.S. Senate campaign, was "the only real break workers getting paid."

"The bulk of the Reagan tax cuts went to the rich and to corporations," Steil said. "As a result, we are seeing the biggest increase in the deficit in the history of the country, which is exactly what we're doing."
Reagan seeks Lebanon plan; Israeli withdrawal up in air

By R. Gregory Nokes
Associated Press Writer

WASHINGTON (AP) - President Reagan met with Jordan's King Hussein Monday, seeking new strategies to deal with Lebanon, and an official said the administration was no longer fighting to save the Israeli-Lebanese troop withdrawal agreement.

Reagan was asked by a reporter at a meeting with the White House Oval Office if he favored scrapping the May 17 accord negotiated with U.S. help.

"We haven't started our talks yet," Reagan said. Hussein also declined comment.

Also attending the meeting were Secretary of State George P. Shultz and Robert C. McFarlane, Reagan's national security adviser.

Reagan's meeting with Hussein will be followed on Tuesday by a meeting with Egyptian President Hosni Mubarak. The president will meet jointly Tuesday with Mubarak and Israel's Prime Minister Menachem Begin.

Third of state unprotected from fire

CHAMPAIGN (AP) - Part of central Illinois territory outside fire protection districts in Illinois are known to be "men's land" and pose a dilemma for firefighters.

Peter Heffley, who added that the landlords are the property owner.

Reagan said he thought the United States supports the May 17 agreement. But if the two nations agree they want to abrogate it, the decision is theirs, he said.

Speakes said the administration might explore replacing the American troops with a U.N. force, although Undersecretary of State Lawrence Eagleburger said he didn't think troops from other nations should "go into that mainstream to get shot at."

Eagleburger said he didn't think a U.N. force could be arranged until the situation in Lebanon is stabilized.

Hussein and Mubarak, both leaders of moderate Arab nations friendly to the United States, are meeting Tuesday and Mitterrand in Paris for the funerary arrangements for former Egyptian President Anwar el-Sadat.

The meeting has been described as "critical." The United States is trying to reach an agreement under which Israeli and Syrian troops would be removed from Lebanon if Syrian troops also depart, such a step would be satisfactory to the United States.

SUIC has received an IBM computer, valued at $250,000 from the City National Bank of Murphysboro through the School of Technical Career.

The computer, which was the center of the bank's data system, will be utilized to provide hands-on computer experience for students in data processing, electronics technology and fiscal management courses.

According to Paul Harre, coordinator of STC's electronics technology program, "Equipment like this helps us tremendously in terms of giving our students a chance to get hands-on experience with a large computing system."

Raymond Burroughs, president of the City National Bank, said that the bank made the donation to show its appreciation to SIUC for the contributions it has made to the SIUC's computer programs.

"Gifts like the one City National Bank has made meet a critical need by enabling SIUC to maintain top-flight academic programs with equipment the University couldn't afford to purchase for lack of state funds," he said.

Ray Kiss, president of the Illinois National Farmers Organization, said that Parr's interest in issues concerning farmers is the reason his organization has come out in support of the Democrat.

Harold Doid, president of the Illinois Farmers Union, was not present but said in a prepared statement that, while his organization does not openly endorse candidates, Parr would "represent the agricultural community well."

The American Association of University Professors will sponsor a panel discussion on faculty and administration salaries at 4 p.m. Wednesday in the University Auditorium.

John Jackson, a professor of political science, will moderate discussion between panel members John Mow, a professor of guidance and educational psychology, John Baker, executive director of planning and budgeting, and Joel Thier, an associate professor of physical education.

Mow said a comprehensive statistical analysis of faculty salaries, which he presented to the Faculty Senate Dec. 13, Mow's report said professors' 1983 salary increases averaged 4.9 percent, while associate professors' rose 5.8 percent and assistant professors rose 5.1 percent.

Topics for the panel discussion will include SIUC merit pay guidelines, salary distribution plans and problems, equity adjustments and salary differences between male and female professors.

An article in the Jan. 26 issue of the Chronicle of Higher Education reported that, nationwide, female professors make 12 percent less than their male counterparts, while associate professors make 9 percent less and assistant professors and instructors 5 and 10 percent less, respectively.

Raymond Burroughs said that the bank handsome large computing equipment to SIUC, will be used to provide hands-on computer experience for students in data processing, electronics technology and fiscal management courses.
Herd of dark horses lightens up campaign

WHILE ERNEST Hollings and Bobbi Askew may complain that the national media is giving them too little attention, the presidential campaign, they say, is doing better than many candidates.

About 138 people have registered their candidacy for the U.S. presidency with the Federal Election Commission. These obscure presidential hopefuls range from porn king Larry Flynt toacademic. Here at last we see the democracy.

Most of our exposure to the USSR comes via the Film Festival for bringing us films, immeasurably for decades.

One such candidate is Richard Grayson, a 32-year-old unemployed college English teacher from Florida, who has seemingly ignored the constitutional requirement that a U.S. president must be 35 years old. In an interview with Common Cause Magazine, Grayson said he is running because "the presidency is a demagogic position, employed by House is a move house, even if the neighborhood's not great."

There is a tongue-in-cheek campaign running under the auspices of the "democratic" professor of "Mountains Tremble."

Not all the dark horses, however, agree. A few years ago, a group of outdoorsmen in northern Minnesota organized the "Fishingman's Party." One candidate ran on a peace platform, and because they said, a nuclear war would be noisy and keep the fish from biting.

THREE YEARS, fifth and sixth party candidates should not be so comfortably laughed off. They have battered the red-tape and bureaucratic forms and have proven that anyone can run for presidency. The United States. And come election day they, like John Anderson in 1980, will show that not just any one can win.

Although they are assured, these obscure candidates are not unlucky. After twenty or so years of presidential campaign, they add some much-needed diversion from the campaign's daily routine, the nation's poor and the explosive dangers of the nuclear world in which we live.

Letters:

Films showed horrible tragedy of Central American struggle

Three cheers for the organizers of the Big Muddy Film Festival for bringing two excellent documentaries on war and revolution in Central America. We have seen "Nicaragua: Report From the Front," and "Mountains Tremble," together with a talk by co-producer Pamela Yates, provided a rare view of social upheaval in Nicaragua and Guatemala.

Despite the conflicts in Central America, this is their love, ones who were slain with American high-tech weapons and all of our tax dollars. "When the Mountains Tremble" shows that the treaty of the largely Indian peasant population is flat contradictory and inhumane, that the peasants only hope for some genuine rebellion is overthrowing their dictator. The only practical way to try to rebellion would be to kill all the peasants — but there would be no one to do it, so they owned banana and coffee haciendas. They have precious little control. Current U.S. policy is effectively supporting the systematic murder of "trouble-makers" among the peasants.

The real struggle in Central America is not communist versus capitalistic, but rich versus poor. The Central American argument in the name of the working class is compassionate and those who only see the protection of their financial interests.

The restoration of the De La Salle regime — neckties, the nuclear family and all that — was under way by Christmas, 1982, when Charlie, the thoroughly modern woman who is the protagonist in Revlon commercials, seriously considered marriage. She did not take the plunge, but probably will if Reagan is re-elected and "traditional values" get another four-year dose of his attention.

Three years of Reagan has routed T-shirt chic

George W. Syndicated Columnist

Let's face it, a lot of laughs. True, Washington and Lee may not be a fair sample on which to base a continental conclusion. But if people start taking outside campaign commercials, seriously what will happen to pandemonium? Besides, I remember report a second instance of cultural renaissance. A friend of mine who reads book on the Wireman, once said: "I think you probably think that my necktie is demoted, but not dishonest, so I hope he is. I am eager to do so because in 1979, when I fled in horror from academic life, young ladies seemed to take as their model a singer, Jana Joplin, whose hair looked as though she had paid no attention to him."

"The restore of the De La Salle regime — neckties, the nuclear family and all that — was under way by Christmas, 1982, when Charlie, the thoroughly modern woman who is the protagonist in Revlon commercials, seriously considered marriage. She did not take the plunge, but probably will if Reagan is re-elected and "traditional values" get another four-year dose of his attention."

In the current issue of Public Opinion magazine, December 1982, there is an article on this. The article says that there was a rebellion against "the 1950's" pattern of obligations, rigid roles, and duties.

In the '60s, the man in the gray flannel suit slipped his leash and slipped into a T-shirt bearing a rude comment about something. Not the dollar nor NATO but the family farm — has been up to snuff since then. In the 1960s, there was Yankelevich's, "a desire to break out of the 1950s."

Today, correct thinkers are trying to break back into the black suit and the "self-fulfillment" was all the rage, but "self-fulfillment" has become a heap of wear and tear and has bred a desire for tranquility and social bonds, not to mention neckties.

A spokesman for the necktie folks says their industry is back and standing tall — "The necktie is a winding road.

But recession also works for the necktie industry. There is, the spokesman says, a "correlation between hard times and the wearing of neckties. Furthermore, in the 1980s, when unemployment was low, men could dress like lunatics (remember the plumber's crossed dress shirt) and still get hired.

The spokesman says that history has taken us down a long way from Washington and Lee, but I wonder how I'd buckle up because society is a winding road.
Counselors say employment outlook better than last year

By Dave Saelee
Staff Writer

EDITORS NOTE: This is the first in a series of seven articles to appear in the Daily Egyptian during the job market, career opportunities and job hunting season.

Many students who are getting ready to graduate and look for a job may think their prospects are minimal because of the state of the economy. But counselors in the Career Planning and Placement Office, as well as many employers and companies, have a different outlook.

Mike Murray, counselor in the Career Planning and Placement Office, said he thinks the number of jobs available to graduating college students is better than last year.

He said that although fewer companies are sending recruiters to SIU-C this spring than last fall, the recruiters are offering more positions for employment than before.

Murray said one such company, Norfolk Western Southern Railway Company, sent a recruiter who offered 150 positions for graduating students.

Companies recruiting at SIU-C this year include May Co., McDonnell-Douglas, Texas Instruments, G.T.E. and Commonwealth Edison.

Dick Gray, director of the Career Planning and Placement Office, said the number of jobs in the job market is increasing, and he expects that by next year there will be even more improvement.

According to the Northwestern Edictor, a report based on the responses of 262 companies which shows trends in the employment of university graduates in business and industry, 71 percent of the companies surveyed predicted a better year for business in 1984. The report states that 27.791 inexperienced college graduates from a variety of fields including engineering, accounting and liberal arts were hired after graduation last year, and predicts that 28,615 graduates from those fields will be hired this year.

Gray said that many of the recruiters return to SIU-C each year because they say the students they interview are prepared to enter the job market.

Professional secretaries group to meet

The Southern Lakes Chapter of Professional Secretaries International will meet at 7 p.m. Monday, Feb. 20 in the Granada Banquet Room of the Carbondale Holiday Inn.

The guest speaker will be Darlene Dunnng, professor in the Department of Management at Southeast Missouri State University.

Health Service to offer poison ivy shots

Poison ivy immunization shots will be available through the end of April at the Student Health Service.

Ken Carr, patient service specialist at the Health Service, said a series of four shots will be given for an $11.50 fee, and a booster shot will be offered for those who have been immunized in the past.

The shots must begin by the first week of April because only one shot can be given per week. For further information call 536-2391.

Shuttle called 'cleanest yet,' expected to go again April 4

CAPE CANAVERAL, Fla. (AP) — Space shuttle Challenger came back to Earth in such good shape that there should be no trouble sending it back into orbit in a record 53 days, despite a failed brake, damaged tires, hazy windows and scraped tires, NASA says.

The space plane completed its eight-day Florida-to-Florida mission Saturday with the first landing at its launch site, and the space agency said it returned as the cleanest shuttle yet.

"The orbiter is very clean, in better shape than any of the others," Ken Coffey, shuttle mechanical systems officer, told reporters. "All major systems are in fine condition," he added.

The ship's next launch date is April 4, the 11th shuttle flight and fifth for Challenger. That means it would be back in space 53 days after landing—a nine-day turnaround.

Landing the shuttle in Florida cut six-to-eight days off the launch preparation time, eliminating the need to ferry the space plane across country on the back of a Boeing 747 jetliner as would have been the case after touchdown at Edwards Air Force Base in California.

Most shuttle flights in the future will land in Florida, except for special cases, such as the first flight of the third shuttle, Discovery, in June and tests of the orbiter's automatic landing systems. NASA wants the added safety margin of the wide open dry lakes at Edwards for these flights.

Astronauts Bruce McCandless and Robert Stewart proved that the gas-powered jet-pack works during the just completed mission when they became the first humans to work in space without a safety line to the mother ship.

They and the other three crewmembers, commander Vance Brand, pilot Robert Gibson and mission specialist Ronald McNair, Monday started five days of debriefing on the flight at their training base in Houston.

"The orbiter is very clean, in better shape than any of the others," Ken Coffey, shuttle mechanical systems officer, told reporters. "All major systems are in fine condition," he added.

The ship's next launch date is April 4, the 11th shuttle flight and fifth for Challenger. That means it would be back in space 53 days after landing—a nine-day turnaround.

Landing the shuttle in Florida cut six-to-eight days off the launch preparation time, eliminating the need to ferry the space plane across country on the back of a Boeing 747 jetliner as would have been the case after touchdown at Edwards Air Force Base in California.

Most shuttle flights in the future will land in Florida, except for special cases, such as the first flight of the third shuttle, Discovery, in June and tests of the orbiter's automatic landing systems. NASA wants the added safety margin of the wide open dry lakes at Edwards for these flights.

Astronauts Bruce McCandless and Robert Stewart proved that the gas-powered jet-pack works during the just completed mission when they became the first humans to work in space without a safety line to the mother ship.

They and the other three crewmembers, commander Vance Brand, pilot Robert Gibson and mission specialist Ronald McNair, Monday started five days of debriefing on the flight at their training base in Houston.
Chief justice says legal system losing respect, needs reforms

LAS VEGAS, Nev. — America's legal system, mesmerized by the thrill of courtroom battles, has grown "too costly, too painful, too destructive, too inefficient for a truly civilized people," Chief Justice Warren E. Burger told the American Bar Association.

"Trials by the adversarial contest must in time go the way of the ancient trial by battle and blood," Burger said in a speech prepared for a meeting Sunday of the American Bar Association. He urged the nation's lawyers to lead a search for reforms and attacked some forms of lawyer advertising and frivolous lawsuits.

He said the legal profession has lost the public's confidence by sticking to its adversarial tradition.

"The entire legal profession—lawyers, judges, law teachers—have become so mesmerized with the stimulation of the courtroom contest that we tend to forget that we ought to be healers of conflict," he said.

"When we see costs of justice rising, when we see our standing in public confidence falling, something is wrong," he said.

He proposed an ABA-sponsored study, with nonlawyers participating, to recommend major changes in the nation's legal system.

"Doctors, in spite of astronomical medical costs, still retain a high degree of public confidence because they are perceived as healers," he said. "Should lawyers not be healers? Healers, not procurers? Healers, not hired guns?"

In his annual address to the ABA's winter convention, he repeated themes of lawyer competence and conduct that have marked his 13 years as chief justice. He touched off a furor in 1977 by saying half the nation's lawyers may not be qualified to represent clients in court.

Last summer he said in a London speech that the United States desperately needs lawyers and law professors "who understand that access to justice does not invariably mean access to courtrooms."

On Sunday, Burger at times was conciliatory, telling lawyers they have made big contributions to America and improved law practice.

But, he said, the profession has a long way to go. He named the decline in public trust in lawyers on the increase in their numbers, the willingness of some to advertise like used-car dealers and the absence of consistent disciplining of unethical attorneys.

He also ripped "aboard lawsuits" that only promote fat legal fees.

Author says racism rife in Africa

By Carys Edwards
Student Writer

Picture the racism of slavery in the United States in the 19th century, and multiply it 100 times. That's what apartheid is, said Margaret Goss-Burroughs.

Goss-Burroughs, an author-illustrator of children's books and a member of the National Commission on Black History and Culture, led a discussion and lecture Thursday on "What Shall I Tell My Children About Apartheid and African Liberation?" The presentation was part of the Black History Month program.

By reciting her "teaching poems," Goss-Burroughs gave a vivid portrayal of her views of injustice and racism in South Africa and life as a black American.

She denounced an "evil racist system," and "racist white minority" and said that blacks are treated as animals in South Africa. Many of Goss-Burroughs' poems reflect anger toward white people in Africa. She said that until the black Africans are liberated, racial problems will remain in the United States.

"The core of the apartheid cancer lies in South Africa," she said. "If the cancer there can be eradicated, then things will be more harmonious (in Capital)."

She said that the question of racism will never be solved under a capitalist system.

Goss-Burroughs stressed the importance of Afro-Americans visiting their native Africa. She has visited the continent 14 times, she said, and "when you return (to the United States), you don't look down anymore."

She said she is proud of her native continent, and her poems speak of Africa's beauty, its abundant natural resources, fertile valleys and fresh air. She said it's easy to see why white people never wanted to leave and why they overstayed their welcome.

But she said that Africa, the "sleeping giant," is awakening and blacks are speaking out. "Africa for the Africans, and all its riches," she said. Goss-Burroughs said that blacks should not give up hope for African liberation. American slavery once seemed impossible to abolish, she said. Goss-Burroughs ended her presentation with a poem giving hope for liberation: "We will destroy the ulcers of colonial suppression. Victory is certain for our comrades. We will win."

Bachelor No. 3:
"You and I are shipwrecked on a desert island and you know a way to be rescued. How long would you wait to tell me?"
Being a Marine Corps Officer can open the door to opportunities you may have thought were beyond your reach. It helped Marine Officer Charles Bolden become a NASA astronaut. And if you're willing to make the commitment, it could help you also. You can get started while you're in college with our undergraduate officer commission program. You could take advantage of getting:

- Free civilian flying lessons
- A starting salary of more than $17,000

Immediately upon graduation you could become a Marine Officer. It's your choice. Maybe you're the kind we're looking for.

We want you to go as far as you can.

Maybe you can be one of us.

COME IN NOW

Up for the West Park Concert.

Sgt. Rock

Sgt. Rock Pop. Happy Valentines Day. Love, Marie

To Klosa Christian from your friend P.

Joe, Roses are red. Violets are blue. You really are the best of all when in the bed. Love, Don.

Jeans, You’re the only one who make me feel special. I’ll always care about you. Love, Mary.

Jen, Roses are red. Violets are blue. I love you always. Mrs. Squret.

To my lil’ Monkey ears bring joy to my life. Love always and forever. Jim.

Ty, I love you for it. Love, Banana

Jerome Berry: To my Sexy Hunny, I’m glad we finally got it... together Happy V.D. Day. Love

Debbie and Steve, Happy Valentines Day. We say we are the only ones that this world has known.

Steve, I know how it’s been. It’s a lot of work. But, I love you. Happy V.D. Day. The girl wisp end

Tina, You gave me my life back. I’ll never ever let you down. Grandma.

Vicki, What more can I say other than I love you, my beautiful eyes. Teddy.

Thanks for listening. Have a happy Love in Christ, Jan

Kev, hold on too your ears. It’s Happy Valentines Day! I love you forever R. G.

Helen, Love you always. Love B. P.

Ahmed.

Antlerhead, Happy V.D. and 8 months. My heart bleeds for you and Morgan does too. Love, Melvin.

Tschmoochable. March 4th is St. Patrick’s Day, so... Have a good one. Love, Tim.

Mike, I love you, is all I can say. Love, Tim.

Dear Tschmoochable, How are the kids? Love, Tim.

Carolyn, You’re the one I love. I promise to love you forever. Love, Tim.

Dear Auntie. Happy Valentines Day I love you Baby Steve.

Baby Banana... You have helped me so much. I’ll always love you for it. Love, Banana Balento.

Gregory, Thanks for making the best cookies at such a great price. One all love. Oppie & George.

Cakes, I’ll always love you! Baby Cake.

Teeter, I’m loving our past and craziness in our future. Here’s to all the Snuggles! Love ya’

Eve
day

To my deary Muffy. M.M.M.M. Happy Heart Day Cutie Love U always. Bones.

Yanara, you’re the most beautiful. Love God has given me. Love Williams.

Leah, Happy Valentines Day from your Secret Sweetie, Love Tschmoochable.

To Joe, the ‘frisky’ man in your life. You make every day special! Happy Valentines Day. Love, Marcy.

To Love. You’re a wonderful, and understanding person. Love always. Hot Dog.

To L.Y.A. Lisa. Smiley.

Dear Skin, I need you in my life. Apart we are left to our own devices. Get together we love, Bone.

It’s Time You Know... What’s Available To You.

Group to hold essay contest

Phi Beta Kappa will hold its second annual essay contest on the topic, "The University and the Marketplace: To what extent should the good of a college education be a job?"

The competition is open to SIUC undergraduate students enrolled for at least six semester hours.

The paper should be submitted to the English Department office, Fair Hall Room 3370 by March 16.

Freedom From Smoking clinic to be held

The Jackson County Health Department on Monday, March 5 will sponsor a Freedom From Smoking clinic at the Public Health Office in Murphysboro for people who want to quit smoking.

Registration for the seven sessions in the class series will be from 7 to 9 p.m. on Monday, Feb. 27, in the Public Health Office. A $15 fee will be charged, with $5 refundable if all classes are attended.

For information contact the Jackson County Health Department at 687-4527.

KILLING US SOFTLY: ADVERTISING'S IMAGES OF WOMEN

A film presentation and discussion on how women (and men) are stereotyped, objectified and exploited by the media.

Wednesday, Feb. 15, 7:00-9:00 p.m.

 Merge OK'ed for Texaco, Getty Oil

WASHINGTON (AP) — The Federal Trade Commission tentatively approved the nation's third-largest oil company to merge with another company, Wednesday, voting to allow Texaco to buy Getty Oil.

The commission voted 4-1 to allow the merger, a deal worth about $11 billion. Although it will require Texaco to sell some of its assets to satisfy antitrust concerns.

Monday was the deadline for the commission to act to block the merger, if it wanted to do so, under antitrust laws.

An agreement between the commission staff and Texaco representatives was reached, subject to two possible changes of Getty refinery, one on the East Coast, the other in the Midwest, along with the sale of a Getty-owned pipeline in California, still be discussed.

There are still possible changes in the agreement, however, in the form of fines that brought by the Penzoil Co. and others opposing the merger.

Services held for faculty member

Funeral services were held Monday for D. Kathleen Eads, who died last month, at the Nursing Home in Carbondale. Miss Eads began teaching at SIU-C in 1961, and was a past president of the SIU Faculty Senate, the oldest degree in English and a master's degree in library science.

She taught at the University of Illinois, and the Universities of Missouri, Oregon and Nebraska.

Pregnancy blamed for teens' expulsion

PITTSBURGH (AP) — Two teen-agers who claim they were expelled from their high school as punishment for being pregnant are waging legal fights to satisfy the rights of others.

"If I had to fight this for another five years, I wouldn't be here," said Mamie Smith of Mount Sterling, Ill., who was dismissed from the honors society in her senior year, a few months after she gave birth to her daughter Lacey Anne in April of 1982.

The main reason I'm keeping this going to is to teach other people," said Smith, who went on, "Don't follow through with this," said Mrs. Wort, who is now a writer for the federal court in Springfield next month.

MAPP to meet

The Mid-America Peace Project will meet at 7 p.m., Thursday, March 10, at the Mississippi Room. Plans for this spring's Nuclear War simulation are being discussed.
Men netters downed by Illinois

By George Vappas
Staff Writer

The Saluki men's tennis team stumbled to an 0-3 season start after losing to Illinois 8-1 in Sunday's match in Danville.

The only Saluki victory was in No. 2 doubles from Gabriel Coch and Chris Visconti. The pair beat the Illini's John Louis and Mike Meyer 6-4, 2-6, 6-4. This was the second straight week Coch and Visconti have won. Last week they beat Bill Koch and Frank Guengerich of Indiana 7-5, 7-6.

"They've done a good job trying to hold this team together," Saluki Coach Dick LeFevre said. "Both Chris and Gabe have turned into great tennis players."

The Salukis haven't won a match this season in No. 1, 2, 3 singles and No. 1 and 3 doubles. The only match victory they've had were by Visconti in No. 4 singles and Coch in No. 3 singles, both against Indiana last week. But, according to LeFevre, the players are still battling.

"The players are not discouraged," LeFevre said. "They know they've been up against some tough players, and with the limited practice we've had, they're doing a pretty good job."

"I feel the team is improving every week. They know they're shooting for the MVC tournament and that's what right now.

The Missouri Valley Conference is beginning to shape up. Wichita State's way. The Shockers beat highly ranked SIU-E Friday 5-4.

But, other than No. 2 doubles, the Salukis didn't win a set in the rest of the matches against the 5-3 Illini. In No. 1 singles, John Lociola ran into a tough battle to turn aside Saluki Per Wadmark 7-4, 6-4. Illini David Goodman, who was beaten by Saluki Reille Oliquino last season, turned around this year and beat Saluki Lars Nilsson 6-2, 6-4 in No. 2 singles.

Neil Adams beat Coch 6-3, 6-2 at No. 3 and Mike Meyer edged Visconti 7-6, 6-1 at No. 3.

Saluki Paul Rasch put up a good fight with Scott Greenberg at No. 5 but Greenberg prevailed 7-5, 7-5. Roeland ekort had his first start of the season and lost to Tom Frei 6-7, 6-7 at No. 8.

In No. 1 doubles, Wadmark and Nilsson were thumped by Goodman and Adams 4-6, 1-6. And at No. 3 doubles, Rasch and Steve Quanor beat Dave Bowden and Frei 6-2, 4-4.

The Salukis are still hampered with injuries. Wadmark had influenza all last week and was still a little sick on Sunday. Quanor caught the flu and is in bed. Oliquino is still out with a knee problem and Scott Krueger is still out with back problems.

The Salukis' next test will be against Wisconsin and Nebraska Feb. 18-19 at Madison, Wis.

She slipped early in her second run—and the steadier Armstrong in the run. A mistake cost her precious time, a shocking 10th in Seattle, Wash.

Faidherbe and in Alpine gold medal in 12 years dueled Cooper on the second event to give the United States its first gold medal of the 1984 Winter Games Monday as she out-dueled teammate Christin Cooper in the women's giant slalom.

Armstrong and Cooper added gold and silver medals to the lone silver placing that Kitty and Peter Carruthers scored in pairs figure skating on Sunday and ended the U.S. medal drought.

Armstrong, 30, who had never finished higher than third place in any World Cup race, out-dueled Cooper on the second run to give the United States its first Alpine gold medal in 12 years and its first in the giant slalom in 30 years.

"Those were the two runs of my life," said Armstrong, of Seattle, Wash.

Cooper, 24, of Sun Valley, Idaho, led the first run, with Armstrong second and only one-tenth of a second behind. Cooper slipped early in her second run. She didn't go down, but the mistake cost her precious time, and the steadier Armstrong finished half a second faster in the run.

GATEWAY

Swimmer Ratcliffe receives GCAC player of Week honor

By Steve Kouts

Ratcliffe was named the Gateway Collegiate Athletic Conference Player of the Week for women's swimming.

Ratcliffe won three events in the GCAC Swimming and Diving Championships last weekend at the Recreation Center pool. She won the 200 freestyle, the 500 free, and the 200 breaststroke to help the Salukis claim the GCAC championship for the second consecutive year. SIU-C won 19 of 20 events and easily out-distanced second place Illinois State, 809-537.

She claimed third in the 100 back with a time of 1:01.93. Paula Jansen finished third for the Salukis at 1:03.42. Royalty was fourth at 1:03.42.

Jansen claimed third in the 100 back with a time of 1:04.17. Carlton was second at 1:05.08. Coontz finished fourth in the event with a time of 1:11.09.

Wittry was the winner of the 200 breaststroke with a time of 2:11.50. Jansen claimed third.

Hill said his team would have to continue to improve in order to win their second National Independent crown.

"The girls will really have to rise to the occasion to win the NCAAs," said Hill. "We'll need some good performances from our people that aren't shaving for the meet (Ratcliffe, Coontz and Wittry) if we want to win."

Saluki diver Angie Faidherbe won both springboard diving events. On the one-meter board Faidherbe took first with 386.5 points. While on the three-meter board Faidherbe won the three-meter event with 390.15 points, while teammate Cheryl Olszewski was fifth with 337.70 points.

"I expected Angie to win on both boards," diving Coach Dennis Goldie said. "I saw a few problems in her dives but overall she dove very steady."

GATEWAY from Page 20

Ratcliffe, a senior from Carbondale who made her final home appearance, won the 200 free in 1:43.89, the 500 free in 4:58.34, and the 200 breast in 2:27.89.

"I was really pleased with Pam's performance," Coach Tim Hill said. "I am pleased Pam has kept herself in the proper perspective. She's trained well, and has set her sights on the NCAAs. She continues to have confidence and I believe she'll be keyed up for the National Independent Championship and the NCAA's."

Ratcliffe, a three-time All-American and a member of Hill's initial recruiting class, has been a key performer for the Salukis throughout her career.

Skiier gives U.S. first gold medal

SARAJEVO — Unheralded Debbie Armstrong, relatively new to international competition, gave the United States Team its first gold medal of the 1984 Winter Games Monday as she out-dueled teammate Christin Cooper in the women's giant slalom.

Armstrong and Cooper added gold and silver medals to the lone silver placing that Kitty and Peter Carruthers scored in pairs figure skating on Sunday and ended the U.S. medal drought.

Armstrong, 30, who had never finished higher than third place in any World Cup race, out-dueled Cooper on the second run to give the United States its first Alpine gold medal in 12 years and its first in the giant slalom in 30 years.

"Those were the two runs of my life," said Armstrong, of Seattle, Wash.

Cooper, 24, of Sun Valley, Idaho, led the first run, with Armstrong second and only one-tenth of a second behind. Cooper slipped early in her second run. She didn't go down, but the mistake cost her precious time, and the steadier Armstrong finished half a second faster in the run.
Saluki-Tulsa game is one stop in Midwest for pro cage scout

By Jim Lexa
Sports Editor

Among the 6,375 fans who watched No. 12-ranked Tulsa knock off No. 3-ranked Kansas City, Mo. at Community College of the Ozarks Arena Saturday was Dick Helm, men's basketball coach at Illinois Wesleyan. Helm came to Napererville Saturday not to scout his Division III squad. Helm's role that day was to watch Ricky Ross, one of Tulsa's two star guards, and see how else whom Helm thought could be a future fixture with the Southeast SuperSonics. Ross is averaging 17 points per game on 50 percent shooting from the floor and 62 percent from the free-throw line. The 6-7 senior guard, who plays outside the system, is the type of player the SuperSonics use when they don't have any kind words for each other. Helm, in his first year as a Midwest regional scout for the SuperSonics, said he got the job after inquiring about it to Seattle's general manager, Don Newald.

Helm's job is to find the strongest, the steadiest and most consistent point guard Kenny Smith. Helm said: "Sometimes, when a fairly good player like Smith goes out with an injury, the others will rally around and actually play better for a while. Then the team begins to take the pressure off and actually play better than they could have been." Helm added: "DePaul is young, but quick." Helm said: "I've had to see that Illinois rates as the greatest surprise. Lurking in the back of people's minds is 'Can they stay up there.'" Helm said.

Illinois State Coach Bob Donewald was an assistant coach to Knight from 1973-78. During that time span, Illinois won 123 of 146 games and the 1979 NCAA title. The belief that a team will win is a "big ingredient" in its success - or failure, Helm said, which is what makes North Carolina as good as it is. "They believe that they should win," Helm said. The Tar Heels, who probably will lose their No. 1 ranking after being beaten by Arkansas Sunday, are the top squad in basketball, in Helm's opinion, even with the loss of freshman point guard Kenney Smith. "They have been playing the steadfast and most consistent half of any squad this season." Helm said. Sometimes, when a fairly good player like Smith goes out with an injury, the others will rally around and actually play better for a while. Then the team begins to take the pressure off and actually play better than they could have been. DePaul is young, but quick. Helm said: "I've had to see that Illinois rates as the greatest surprise. Lurking in the back of people's minds is 'Can they stay up there.'" Helm said.

Hubbard Street DANCE CO. presents--
"Your Sweetheart Jul and Have dinner With Us.
100 S. Illinois
Lamoure of Mac & Illinois
CARBONDALE 529-1566
Hours Sun Thru Fri 1-10 p.m.
Fr Sat & 1-10 p.m.
Closed Mon.

This exuberant company of 10 superbly fluid, technically accomplished dancers synthesizes the discipline of classical ballet with the pizzaz of show dance!

Carbondale will clinch at least a ground "great title outright this season. The Terriers have seen Harrisburg town, but I'm also a fan. Glenn Woolard said. "He's a smart player and is a major part of a team having a great year."

"I may be a coach in this town, but I'm also a fan," Woolard said his Terriers have to keep their feet on the ground" for the rest of the season. The Terriers have clinched at least a tie for the South Seven Conference title with an 11-0 conference mark, Carbondale will try to clinch the title outright this weekend when the Terriers host Centralia Friday night before hosting Harrisburg Saturday night.

George earns starting role with defense

By Daryl Van Schoonhoven

Staff Writer

Chris George is SIU-C's resident intern of dunk. You'll often find him diagnosing a Saluki's weaknesses from the sidelines, circling the ball on the defensive end, and terminating the rush with a thunderous slam dunk.

"Yeah, I do look for it," said George, a 6-4 junior forward. "I like to explode around the hoop untouched, switching the ball from hand to hand at the last moment before rimming it home."

"George," said his coach Allen Van Winkle, "he's heard his way into the lineup using his speed and team play to the fullest extent.

With the team's high-powered offensive attack, Van Winkle considered having him on the floor as a weapon. But a hard knocks, speedy 5-9 guard with a great go-to move.

Van Winkle discarded that idea, and put George on 6-10 Herbert Johnson, who scored six points. George made seven first-half shots, taking them with confidence and dished out four assists.

"He had his me theory, and it was easy to tell," Winkle said. "You just had to move your feet to hit him."

George's first start was in the Salukis' overtime win over Bradley Jan. 5. Since then, he has scored 21 points and 4.1 rebounds per game.

"I didn't care if I started or not," George said. "I just went out and played defense as long as I could."

At 190 pounds, George said he wants to lift weights in the off-season in order to add some bulk to his frame.

"I'd like to put on 10 pounds," he said.

He said he feels he can improve his shooting touch and will work on that, too. He enjoys playing with his brother, Laban, in the summer in the Rucker League in Chicago.

"I'd like to dunk it," George said. "It gets the crowd into the game, and then the men's swimming team are..." he said. "I'm going to work on it, and my height will help me do it."

"I think we'll definitely take fourth place there," he said.

Next year, I feel that we'll definitely contend.

The Terriers made a second-half comeback against Benton Friday night to pull out a 67-65 victory over the Carbondale Terriers on the road Saturday.

The Terriers scored 16 first-place votes and tallied 202 points. No. 2 Peoria Manual received the next six votes, totaling 188 points.

"It is a great milestone for any team, any year," Woolard said.

Benton had almost postponed the milestone win for Carbondale. The Rangers had led for most of the game.

Men post big win in Saluki meet

By Scott Rich

Staff Writer

Fresh off a big win in the 16th annual Saluki Invitational, the SIU-C swim team and the men's swimming team are looking to continue their streak of improvement during the independent championships.

The Salukis have announced for the NCAAs by winning the 500 freestyle with a time of 4:31.84, 11 seconds ahead of the last place.

In the free race, Raiti led the pack at 1:25.93, a second and Stacy Westfall was third in the event. Westfall was also the top finisher in the 200 breaststroke, clocking in at 2:07.00.

Laura Brown won the second event.

The Salukis also solidified their hold on the No. 4 ranking in the boys' basketball class AA poll with a pair of weekend wins.

Carbondale received three of the first-place votes and tallied 202 points. No. 2 Peoria Manual received the next four votes, totaling 188 points.

"It is a great milestone for any team, any year," Woolard said.

Benton had almost postponed the milestone win for Carbondale. The Rangers had led for most of the game.
