Religion Week Set

The Role of the Student in Religion Today will be the theme of this year’s Religion in Life Week, Monday-Thursday sponsored by the SIU Interfaith Council.

Featured speaker during the week will be the Rt. Rev. Chandler W. Sterling, Episcopal Bishop of Montana. He will talk at 7:30 p.m. Tuesday in Morris Library Auditorium and at Freshman Convocations at 10 a.m. and 1 p.m. Thursday in Shroyer Auditorium. His appearance is being sponsored by the Canterbury Association.

Student programs during the week include:

Nathan Porter, associate secretary for missionary personnel of the Home Mission Board, Southwestern Baptist Convention, will give a lecture at 9 p.m. Sunday in the Baptist Student Center Chapel. The Inter-Varsity Christian Fellowship will feature Charles Hatfield, chairman of the Department of Mathematics at the University of Missouri at Rolla, SIU Newman club graduate students will discuss “Progress or Chaos, 25 American Negro, 1965,” at 8 p.m. Wednesday in Morris Library Auditorium.

Dedication of the Henry Horner Student Center of the Jewish Student Association will be held at 2 p.m. Thursday in Morris Library Auditorium.

Two films, “Story of Christian Science” and “How Christian Science Heals,” will be presented in Morris Library Auditorium at 7:30 p.m. Thursday. The program is sponsored by the Christian Science Organization.

Harmonizing To Start Tonight

Harmony Weekend, presented annually by the University Center Programming Board, will be held this weekend, Thursday and Friday. Tonight a variety show, Grand Night for Singing, will be presented in the Campus Center Auditorium.

The program includes folk singers Tom O’Hara, soloist David Beckett, jazz by the J. J. Chisholm group and selected numbers by the Southern Stage. The bill of dancers and singers. This year’s candidates for queen of the military ball will also be presented.

The University Men’s Glee Club will present its fourth annual concert at 8 p.m. Saturday in Shroyer Auditorium. Following the concert a reception will be held in the River Rooms of the University Center.

Senates Approves Fee Hike 10-7

The Campus Senate passed by a narrow margin Thursday night a proposal to increase the student activity fee by $4 per term for athletes.

The bill, which passed by a 10-7 majority, calls for the increase to take effect summer term, 1966.

Final action on the activity fee increase was taken by the Board of Trustees, which is expected to consider the fee increase at its February meeting, according to Board Chairman Kenneth Davis of Harrisburg.

The bill as passed Thursday day contained the following provisions:

Assessment of the fee increase to be subject to an annual Campus Senate review of the Athletic Department budget;

No admission charges to students and reservation of 5,000 seats in the Arena and McAndrew Stadium, subject to approval by the Senate each year;

Availability of seats not sold by game time to students;

Application of the fee increase and provisions of the bill to Carbondale campus students only.

The increase would go to provide about $30,000 to the athletic department.

Senators Bay Lenz, who introduced the bill, said he had consulted several university officials concerning the proposal.

President Delyte W. Morris

Trustees OK Development Plan, Seek Federal Aid in Expansion

Proposal Linked To City Renewal

An official plan of development for the SIU Carbondale campus was approved by the Board of Trustees Tuesday.

The plan will be sent to the Urban Renewal Administration as a condition for eligibility to receive federal funds for renewal projects.

The development plan is part of the master plan which had previously been approved by the Board.

The purpose is to determine the future size and needs of the city and schedule the orderly growth of the physical plan to meet expected requirements.

The plan divides the campus into areas of “primary use,” within which specific functions are assigned. The No. 1 zone is a central area of general academic uses, or an academic core.

The second zone includes professional and technical schools which are relatively self-contained. The location of each school in relation to the central core based on the degree that students are normally required to attend general classes.

The outer zone is devoted to University residence halls and administrative buildings.

The general academic uses areas will include the School of Education, liberal arts and sciences, life sciences, fine arts, general studies, and other general programs of the University.

The professional and technical use areas provide locations for special food schools near the general academic core but designed as separate entities for training in specific disciplines. Each school will be well balanced to have容易 access to the central core of other related areas.

Within the second zone, specific locations have been set aside for the Schools of (Continued on Page 13)

Gus Bode

Gus says he was watching the President’s State of the Union message on TV the other night for 10 minutes before he realized it wasn’t the Beverly Hillbillies.
Off-Campus Presidents Form Interim Council; Will Seek to Establish Student Association

An interim Off-Campus Presidents Council has been formed to represent the students living off-campus. Members of the council are all presidents of off-campus housing units.

The interim council will serve as a government for off-campus students. It will attempt to solve problems of mutual concern of all students living off-campus, such as communications and representation at the Student Council.

A committee has been formed by the group to look into the structure of a future off-campus student association, and other activities.

The group also plans to arrange the annual Off-Campus Dance, a heart dance which will be held next fall.

The interim council will meet again at 7:30 p.m. Tuesday, Dec. 3. All interested off-campus students are invited to attend.

SOUTHERN'S FILM SOCIETY PRESENTS

"VIRIDIANA"
SPANISH DIALOG WITH ENGLISH SUBTITLES
STARRING SILVIA PINAL & FRANCISCO RABAL

VIRIDIANA is a young novice who goes to visit her little sister in the year before taking her final vows. One evening, after persuading VIRIDIANA to wear his deceased wife's wedding gown, he does her and carries her to his room. He is unable to go through with the planned seduction, but tells the girl he has.

SUNDAY JANUARY 16
FURR AUDITORIUM, UNIVERSITY SCHOOL
ADULTS 60¢, STUDENTS 40¢ WITH ACTIVITY CARD 2 - SHOWS 6:30 and 8:30 P.M.

MOVIE HOUR
FRIDAY JANUARY 14
FURR AUDITORIUM, UNIVERSITY SCHOOL
ADULTS 60¢, STUDENTS 40¢ WITH ACTIVITY CARD 3 - SHOWS 6:00 - 8:00 - 10:00 P.M.

JACK LEMMON, CAROL LYNLEY
DEAN JONES & IMogene COCA
IN-
"UNDER THE YUM-YUM TREE"

Jack is the happy-go-lucky landlord who rents only to beautiful girls and then spends his time in search of romance. The haplessness, wildest, healthiest comedy to hit the screen in years.

SATURDAY JANUARY 15
FURR AUDITORIUM, UNIVERSITY SCHOOL
ADULTS 60¢, STUDENTS 40¢ WITH ACTIVITY CARD 2 - SHOWS 6:30 and 8:30 P.M.
Debbie Reynolds & Cliff Robertson
IN-
"MY SIX LOVES"

Arriving at her country home for a month needed rest, a beautiful social darl finds six abandoned children, plus dog, living on her property. With the help of John, a handsome young farmhand, temporary custody of the brood. She finally gives up her career to marry John and to adopt the children. Expert comic touches highlight an entertaining family film.

SCHOLARSHIP FORMS ARE NOW OFFERED FOR KAPLIN GRANT

Applications are now available for the Leon Kaplan Memorial Scholarship, which is awarded annually at the Theta Xi Variety Show, and may be picked up at the Student Work and Financial Assistance Office.

Candidates for this scholarship must have the following qualifications: A 3.75 minimum grade point average, demonstrated qualities for leadership and participation in activities, financial need, and sophomor or junior status.

Physical or biological science majors are preferred.

The presentation of the scholarship will take place during the March 4 performance of the show, and $300 will be given to the scholarship from the proceeds of the show.

Kaplan was the faculty advisor for Theta Xi social fraternity for 10 years. To encourage more students to apply, the members of Theta Xi would like to encourage students to apply for this scholarship.

Summer Job Lists Are Available Now

Thousands of summer jobs are open to Southern Illinois University students seeking employment in camps, resorts, hotels, motels, restaurants, and the Financial Assistance Office.

Job listings are available to students at the employment office Monday through Friday from 8 a.m. to noon and on Saturdays from 8:30 a.m. to noon.

Daily Egyptian

Published in the Department of Journalism Thursday mornings. Appears under the authority granted by the University. The Daily Egyptian is the official student newspaper of the University of Southern Illinois, Carbondale. Registered with U.S. Post Office at Carbondale, Ill. Second class postage paid at Carbondale, Ill. under act of March 3, 1879.

Policy of the Daily Egyptian is the responsibility of the editors. Statement of responsible ownership, management, and editorial policies on file with the office of the Attorney General of the State of Illinois.

Editorial and newsroom: Stephanie V. Settles, Managing Editor; Gloria A. Messersmith, Advertising Manager; John R. Messersmith, Edward A. Rapier, Advertising Coordinator; Frank E. Shaneszniaczek, Edward A. Rapier.

Subscription rates: Domestic, 1 year $7; 2 years $14; Dom. Can., 1 year $10; 2 years $20; Foreign, 1 year $15; 2 years $30.

VARSITY LATE SHOW

Tuesdays and Saturdays This Fall
The Orpheum Theater, 10:15 p.m.
All Seats $1.00

NEVER ON SUNDAY
John Chapin's modern take on the American folk song, "Never on Sunday," for those who missed the film. With full on stage production, "Never on Sunday" is enjoyed at the Orpheum Theater.

烂 gown by Lenora R. Goodnuch. Hair and Make-up by Robert E. Smith, and Lauren Worth.
Dance, Films, Sports, Meetings Slated Today

The Audio-visual program will begin at noon today in Morris Library Auditorium.

Moslem students will meet at 1 p.m. in Room E of the Agriculture Building.

The Women's Recreation Association varsity basketball will begin at 4 p.m. in the University School Pool.

Psychology Colloquium will be held at 4 p.m. in the Seminar Room of the Agriculture Building.

Harmony Weekend will be held at 8 p.m. in Shryock Auditorium.

The WSIU Program to Feature Discussions Held On Campus

"Voices on Campus" will feature portions of talks and discussions held on the SIU campus with persons from many parts of the world at 8 p.m. today on WSIU Radio. Other programs:

8 p.m. The Morning Show. The campus, the area, the nation, pop music, weather, news and sports are included in this show.

3:05 p.m. Concert Hall. Symphony No. 6 by Prokofiev, Horn Trio in E flat major by Brahms, and London Suite by Coates.

11 p.m. Moonlight Serenade.

Orange Jet Means Pizzazz?

By Jenk Lloyd Jones

General Features Corp.

A couple of weeks ago, I walked aboard a bright orange jet airliner and into the outstretched arms of a beautiful girl wearing a bright-colored dress and a chic hat. This bound to her head by a gay scarf, her outstretched arms, unfortunately, were only for my hat and coat. She was the stewardess.

Several days later, at a reception in his honor, I asked Bannister International's new president, Harding Lawrence, about his "why-take-a-pizza-plane" campaign to make over the image of his once-stodgy airline.

"After years of struggle," he said, "the airline business has finally achieved a high degree of safety and efficiency. You would have had to go into that epigonal thing called "taste," which some people seem to be born with, and some others never achieve. The result is this way:

"First, has Mrs. Meyer investigated the cultural opportunities at SIU? If she had, she may have discovered that it is conditioned to his state of unconsciousness, no breath of dissent. Just the image of his once-stodgy airline.

The Dec. 24 issue of Life magazine envisioned the city of the future as a double strip memorial to the deceased offices and factories. It is easy to understand the celebration young men from Siberia, who do not know the meaning of the word "dreamer," and dreamer, "will be born with a hell of a yell and well up with the Mother Superior.

The antenna of the great pizzazz is pizzazz. It is the determination of the individual to be born with a hell of a yell and well up with the Mother Superior. It is the determination of the individual to be born with a hell of a yell and well up with the Mother Superior.

"Long live the orange air-campus.

JONES

The highest form of art is to achieve beauty and utility together. Frank Lloyd Wright designed himself for "functionalism" as compared to mere decoration. But he himself could be more functional than a concrete block sliced between windows. What Mr. Wright did shamelessly expose his harm and supports, but at angles that made them soar. The flying business on a medieval cathedral is merely a gorgeous way of holding up a wall.

You can surely say that the hundreds of identical apartment blocks that characterize the great Russian cities are

A bowler of course. But it's a word born in Detroit to describe an automobile with style. It but means something more. It means a buoyant, light-hearted style. A stewardess in a plain toga who has discovered that it is merely a coat that characterized Southern Cathedral's architecture during the 1920s were purely grotesque.

But in Tulsa there was recently opened along an inter­state highway a nine-story luxury motel built like a castle. There is a moat and you drive across a drawbridge. In the courtyard there is a fountain that makes the "caliber" stuck in a rock. A hootsman, dressed like Maid Marian, greets you, and high above the battlements is a huge sign "CAMILLO—Total Electric." A bowler? Of course. But it's a word born in Detroit to describe a car with style. It means something more. It means an automobile with style. A stewardess on a medieval cathedral is merely a gorgeous way of holding up a wall.

OPEN SEASON

Atomic-Powered Rocket Seen
As Reality for Early 1980s

As a student of Carbondale Community High School, the writer would like to disagree with Mrs. Donald L. Meyer concerning the lack of culture and inadequacy of the school system in Carbondale.

Mrs. Meyer; but the writer also feels that the people living in this area are conditioned to his state of unconsciousness, no breath of dissent. Just the image of his once-stodgy airline.

While it is essentially a project to develop the peaceful uses of atomic energy, U.S. armed forces have a stake in the NERVA program, too, since it has overtones as a proliferation-resistant atomic space weapons system.

NERVA, acronym for nuclear rocket vehicle, is the application, is an outgrowth of earth-orbiter reector space programs.

Robert P. Helgeson, chief of the Space Nuclear Propulsion Office here, believes atomic rockets will entirely replace chemical fuels for U.S. rockets and missiles within a decade, giving the United States literally millions of times as much power for its space vehicles.

His contention that even first-stage boosters will be nuclear-powered by the atom has been argued by many space scientists.

They insist that the danger of "radioactivity is too great to develop first-stage nuclear-powered boosters with uranium-235 4.3% fuel and that the weight of lead shielding required for safety would cut sharply the payload capacity of such a space vehicle."

Helgeson disputes this claim. He says isolated launch sites, like this sprawling 1,360-square-mile nuclear test site in the Nevada desert, would eliminate any radioactive danger to the public.

He points out that nuclear power will speed space vehicles on their way at a speed of 30,000 feet-per-second, compared with the 430-feet-second that the most powerful chemical rockets can provide.

For example, Helgeson explains, the new NERVA is to fly for 25 days in a circular orbit of the moon. In a three-day trip to Mars, this would only 40 days would be needed in an atomic fueled rocket.
Red China's Industry Is Moving Again

After Fiasco, Peking Enters 'Adolescence'

By A. G. Miller
Copley News Service

HONG KONG—For all the policy blunders, official shortsightedness, dislocations caused by agricultural failures and the withdrawal of Soviet technical assistance, Communist China's industry has regained its footing and once again is moving forward.

The recovery since the Great Leap fiasco has been slow and painful. It has taken seven years and has been made at the expense of rapid rate of economic growth that has been made.

Today, as Peking winds up preparation for the start of its Third Five-Year Plan, China's industry is entering its period of adolescence—the time when China is able to design and build complete industrial facilities.

This dramatic recovery has been the direct result of a sane approach to economic development, and not—as Peking would have it—the result of "the immense superiority" of a Communist system or the wisdom of party boss Mao Tze-tung.

Beginning in 1961, when official policy switched emphasis and placed agriculture as the foundation industry as the leading factor, the prospects for improvement became clear.

In the three years that followed, agricultural productivity steadily improved. More raw materials became available for light industry, which in turn produced more goods for the domestic market and for export.

With increased exports, China earned more foreign exchange with which to purchase design equipment and know-how. The new machinery and technical knowledge improved the efficiency of China's industry.

Industry expended a good deal of energy in producing goods for improving agricultural production.

The improved agricultural, light and heavy industrial production also meant an improvement in domestic markets and an increase in national income that the state could tap.

Prospects for the years during which the national budget failed to increase significantly, more money became available for capital investment.

Although China's industry is now running in forward gear, the road ahead is long and filled with ominous twists and turns. The basis for progress has been laid, but it remains to be seen whether China is able to build on that foundation.

This foundation represents development of a solid—though admittedly limited—steel, petroleum, electronics and chemical industry. So far, for example, is China's annual production of carbon steel, at 10 million tons this year. That figure in itself is not terribly impressive. It is meaningful, however, in the sense that China now has the ability to produce nearly all the special steels and steel shapes required by her modern industries.

These, again according to Peking, include such things as high strength alloy steel plate for oil drilling equipment, a high silicon steel rail, low-alloy, high-strength axle plates, I-beams, channel plates and angled steels.

The Chinese say they are able to produce practically all the 1,100 kinds of rolled steel needed in the automotive and locomotive industries.

During the last year or two, emphasis in steel industry has been on improving quality and versatility. The emphasis appears to have paid off.

Peking claims, for example, that during the first half of this year 28 new chemical fertilizer enterprises went into operation.

Analysts in Hong Kong report that the development of the fertilizer industry remained small. Several new plants were opened, including one in Taiyuan in Shanxi Province and one in Shanghai.

More importantly, the Shanghai Plastic Materials Machine Factory, which specializes in making machines for molding plastics by injection and casting, now produces an adaptable equipment which can turn out a variety of plastic goods.

These items, which include polyethylene sheets, inflatoy toys, utility bags, belts and other consumer goods, are not seen in increasing numbers on the Hong Kong market.

In the field of electronics, China now claims the ability to produce high-grade precision instruments and power generating equipment.

In heavy industry, the Chinese say they are able to turn out complete 50,000-kilowatt thermal power generating units and complete 72,500-kilowatt hydraulic power generating units.

Western visitors to China have been impressed with the instruments and equipment they have seen. One Dutch electronics expert predicted that China could catch up with the West in electronics research in five to ten years, though this seems a bit optimistic.

It is in the area of China's machine-building industry, however, that special attention should be paid. For it is this industry that supplies the means for other industries to develop.

No figures, of course, are available about China's machine-building capacity since the Communists have issued no statistics on their economy since 1959.

But analysts here generally agree that the industry is making considerable headway, basing their judgment on the bits of information that occasionally do become available.

The Chinese have made much ado, for example, about the construction of a 12,000 ton hydraulic forging press. Although their claims have not been verified, the feat should not be dismissed since there are in fact few countries capable of producing such machines.

Peking says Chinese-made turbines with a combined capacity of 650,000 kilowatts now are installed in the country's largest power plant on the Hainan River.

While the Chinese earlier were only able to produce railway wheels of cast iron, they now have the machinery to turn out rolled steel wheels.

Among other achievements in recent years has been the ability to build oil refineries with a capacity of one million tons and fertilizer factories producing 100,000 tons per year.

A further indication of the expanding nature of China's machine-building industry is that the Peking authorities have within the last year pressed for greater specialization and cooperation.

Recently, Peking had insisted that industrial enterprises were to rely on their own resources and produce all the items needed for production.

The changed attitude, though late in coming, appears to be a wise one.

As the West learned, when industrial processes become more complex and capital-intensive, no one enterprise can keep up with the increasing degrees of skill and knowledge required. Specialization and cooperation among several factories becomes essential.

Prospects for China's industrial development are bright as a new year approaches. But where Peking opens to direct the country's industrial energies is a vital question.

If the Chinese leaders feel the country's security is threatened, a natural move would be to turn up production and capability in these areas. There already are indications, in fact, that such is the case. It is only necessary to recall China's two atomic explosions.

Heavy commitment of China's still limited industrial energy to military development would certainly retard the nation's economic growth. The achievements of recent years would vanish into the rubble of tanks, the whoosh of jets and crack of rifles.
SEATO Fellowships Are Available

SEATO Fellowships for 1966-67 are now available. The fellowships, covering a period of from four to ten months, are for professional people whose abilities would qualify them to carry out a project in a country located in the Southeast Asia Treaty Organization area. Fellowships are available for research, teaching or training. The projects should be concerned with social, economic, political, cultural, scientific and educational problems of Southeast Asia or the Southeast Pacific areas. The projects should have practical follow-up value, and be distinct from projects already undertaken by other organizations such as specialized agencies of the United Nations.

Applications must be national of SEATO member countries, Australia, France, New Zealand, Pakistan, the Philippines, Thailand, the United Kingdom and the United States.

Fellowships are intended for established scholars of high academic attainments, preferably at the doctorate level. Students working towards advanced degrees are not eligible.

The fellowships provide round trip economy-class airfare and an allowance of $400 (or the equivalent in other currency) a month.

American scholars may obtain application forms from The Committee on International Exchange of Persons, Conference Board of Associated Research Councils, 2101 Constitution Ave., Washington, D.C., 20418.

Chemistry Seminar Set

Donald W. Slocum, assistant and professor of chemistry, will conduct an organic-biochemistry seminar entitled "Aromatic Mutarotation Reactions" at 4 p.m. today in Parkinson 204.

This coupon, plus just $2.00, will thank Mom and Dad five days a week.

GREEK PARLIAMENT--The Greek Parliament building in Athens, with the Tomb of the Unknown Soldier in the wall behind it, is one of the places to be visited on the nine-nation European university tour this summer. (Copley News Service Photo)

European Tour Information Available at Daily Egyptian

Descriptive literature on the European university summer tour is available now at the Daily Egyptian office.

The tour will cover more than 30 cities in nine nations, ranging from London to Athens. It will depart from New York City July 7 by jet and return from Paris on Sept. 5.

One of the major features of this tour is that housing accommodations will be provided on university campuses in the cities visited, enabling students and faculty members on the tour to meet and visit with their European counterparts.

The tour is open to all SIU students and faculty members and their families as well as others regularly associated with the University. It is sponsored by the Daily Egyptian and KLM Royal Dutch Airlines.

The tour will cost $932 a person. The price includes jet transportation to and from Europe, deluxe motorcoach and first-class local steamer travel while on the continent, three meals a day and student-type housing accommodations.

An experienced tour guide will accompany the group on its journey through England, Holland, Belgium, Germany, Austria, Italy, Yugoslavia, Greece and France.

Persons interested in obtaining literature about the tour should fill out the following coupon and return it to the Daily Egyptian, T-48.

Please send me descriptive literature on the European University tour.

Arabic Course Offered at SIU

Two SIU students from Iran are offering an Arabic language course for teachers. The class meets at Room 115 in the Economics Building from 5 to 7 p.m. Monday and Thursday.

Wadi, graduate student in the Department of Government, is the instructor, with Nabil Habiby, an engineering major, as assistant.

Wadi has offered the course since he came to SIU in the fall of 1964. The course will be non-credit.

Campus beauty salon

The appointment service is located in room 1221, next to the Currency Exchange.
LONG-LOST BOMBER SHOWS EXOTIC LIFE

The rediscovery of "My Gal Sal," a B-17 airplane lodged for almost a quarter of a century in the ice on Greenland, has led to an unusual discovery by a young professor and two fellow scientists.

William D. Gray, professor of botany and consultant to the aerospace laboratories, and two other scientists were working on parts of the plane when they found several types of fungi which are native to warm areas such as Mexico, South Florida and Panama.

The fungi were growing on the metal, glass, wood, cloth, paper and rubber parts of a navigational sextant and its case.

"My Gal Sal" crashed-landed in Greenland June 37, 1942, while on its way to England. The crew of 10 and three passengers were rescued, but the airplane, its propellers heavily damaged was abandoned. The bomber sat on the Greenland ice, subjected to massive movements of snow and ice and winds of up to 180 miles per hour. Through the arctic winters it withstood temperatures plunging to more than 41 degrees below zero.

Not one person came near the abandoned craft until October 1964, when it was found by the U.S. Air Force. A month later, a national magazine printed the story, and interest mounted in the facts a study of "My Gal Sal" might reveal.

Last September the downded plane was reached by helicopter. Instruments, hydraulic fluids and other materials from the aircraft were flown to the Air Force Materials Laboratory at Wright-Patterson AFB, Ohio.

Biologists often had found the same kind of equipment returned from the tropics in World War II, and it is assumed "My Gal Sal" had picked up the microplants on flight to a tropical area prior to the Greenland crash.

Writing in the American Journal of Botany, Gray A. E. Prince of the aerospace laboratories and Elmo S. Dooley of the Tennessee Polytechnic Institute, a reserve official on duty in the laboratories at the time,

Gray, whose own research has been with fungi, has led to a process for producing a high-protein food supplement from waste plant materials, said the surfaces on which the fungi from "My Gal Sal" were growing were unlikely sites for such growth under the best of circumstances.

"But none of us would have believed that these tropical or semitropical organisms could have survived more than 20 years in the arctic," he said. Gray said the discovery did not suggest any particular properties of fungi which might affect his work.

"But it proved to me once again what a remarkable organism the fungus is," the SIU scientist said. "And, if anything, it whetted my appetite for more information about it."

Methodist Group Will Present Film

The Wesley Foundation of the Methodist Church at SIU will present the film "Parachute" at 6 p.m. Sunday in the Foundation.

The 22-minute color film featured in the Protestant and Orthodox Center at New York World's Fair was termed "eloquent" by Time magazine, and the "second best film at the New York World's Fair" by the New York Evening News.

It has been presented at hundreds of local churches in 38 states, University of Chicago, Cornell University, Boston University Student Union, and other institutions, according to the Rev. Bob Selbert, director of the foundation.

SOUTHERN POLITICAL

The Young Republicans are having their annual meeting on Sept. 22.

They have a strong membership and are an active group. They will be holding a meeting on this day at the City Hall, and the guest speaker will be Bob McFarland, who is running for Congress.

He will be discussing the important issues of the day and how they affect our lives. The meeting will begin at 7:30 p.m. and is open to the public. We look forward to seeing you there.
New York City Transit Strike Is Settled

NEW YORK (AP)—With a roar above ground and a rumble beneath, New York's 800-mile bus and subway system rolled back to normal Thursday, with settlement of a 12-day citywide transit strike, first in the city's history.

Losses of $500 million to $800 million during the municipal crisis were grievous, and strike settlement terms placed the 13-cent transit fare in jeopardy. But eight million footsore New Yorkers hailed with jubilation the end of the maiming tumult.

Peace terms were drawn up by a three-man team of nationally known mediators, although Republican Mayor John V. Lindsay hailed the agreement as a triumph for collective bargaining. The cost to the city was estimated at from $32 million to $70 million over two years.

The settlement package of wages and benefits to $3,400 transit strikers was set by Lindsay at $5 million over two years. The union claimed the figure was close to $70 million.

Lindsay pledged during his recent mayoral campaign to try to keep the transit fare at 13 cents, one of the lowest in the nation. With the strike's end, he said he still hoped it could be maintained "in the best interests of the people of the city."

South Viet Battalion Hit Hard by the Cong

SAIGON, South Viet Nam (AP)—The Viet Cong ambushed a South Vietnamese battalion Thursday north of Saigon, inflicting considerable losses.

The attack came as at least a three-day truce for the lunar new year next week was negotiated by the Viet Cong, promoting a brief respite from the bloodshed for U.S. and Vietnamese troops.

The Viet Cong overran part of the battalion causing what was described as moderate casualties, but U.S. advisers accompanying the Vietnamese troops were reported to have suffered heavily.

Five miles away, in an area about 25 miles northwest of Saigon, Americans and Australians were pressing Operation Crimp, a drive against the Viet Cong's iron fist. Apparently U.S. artillery was powerless to help the Vietnamese because of lack of radio contact.

Operation Crimp still was racking up the Viet Cong, reporting 31 additional guerrilla dead Thursday. This brings the total in the six-day drive to 191, he said he still hoped the mountains of supplies also have been hit hard.

In another action, an official Saigon press announced that a Viet Nam press agreed to go along with the official Viet Nam press

There was no word of when the cease-fire would start, however. The Viet Cong has said it will end hostilities for four days, beginning at 11 p.m. Saturday.

On the political front, Saigon announced the arrival of presidential envoy W. Averell Harriman, who had been scheduled to arrive earlier on the day his global peace mission.

He is in Bangkok, Thailand, and will meet there with Secretary of State Dean Rusk, who is flying from New Delhi, India, after talks with Soviet Premier Alexei Kosygin.

Congressional Opposition Reported Brewing

To Excise Tax Increase Sought by Johnson

WASHINGTON (AP)—A congressional storm brewed Thursday night over President Johnson's call for a quick billion-dollar boost in excise taxes to help offset the mounting costs of war in Viet Nam.

Secretary of the Treasury Henry H. Fowler formally sent to Congress a Hill that proposal and two other revenue measures Johnson recommended in his State of the Union message.

The Treasury said they would boost revenues by $5.8 billion next year.

The House Ways and Means Committee plans to begin hearings on the money-raising plan next Wednesday.

One committee member, Rep. A. Sidney Herlong Jr., D-Fla., summed up the outlook for Johnson's request this way: "He'll get the tax increases. There's no doubt about it. Of course, there will be opposition."

There is plenty of that. A check of the Senate Finance Committee showed a majority of its members initially inclined to oppose the excise tax boosts.

There is support for the plan, too. "I believe that this is the least objectionable and the most painless way of raising some needed revenues," said Sen. Paul H. Douglas, D-Ill., who serves on the Finance Committee.

If it heeds Johnson, Congress will repeal two excise tax reductions the President himself proposed nine months ago.

The cut, of 1 per cent in the automobile excise tax and 7 per cent in telephone levies, took effect with the new year.

When he proposed excise tax cuts on May 17, Johnson said he had "no present intention" that the spending would increase to an extent that would make the cuts insurable.

There is opposition to re-instatement from both Democrats and Republicans in the Senate.

Sen. Russell B. Long, D-La., the Finance Committee chairman, said he would prefer increases in liquor and cigarette taxes.

In Detroit, the president of General Motors Corp., said reinstatement of the automobile tax would be unfortunate. "I will be badly disappointed if it is restored," said James M. Roche.

But Henry Ford II, chairman of Ford Motor Co., said he does not think that his firm will oppose the revenue move. "I don't think it will have any effect over the long haul on automobile sales," he said.

Humphrey, Kosygin Talk in India

NEW DELHI, India (AP) - U.S. Vice President Hubert H. Humphrey and Secretary of State Dean Rusk met Thurs­
day in Moscow with Premier Alexei N. Kosygin. The
trip was the first time in hisrory. Robert

Johnson.

Following the meeting, Johnson's State of the Union
message means "the United States intends to continue war
by means of arms to impose its will on the Vietnamese
people."

-Moscow radio declared the Soviet Union in taking all
measures to ship modern
weapons to North Vietnam lead­ers,
presumably to try to
Weaver, 58, has been

Train Bombing Plan Investigated

WASHINGTON (AP) - Sug­
gestions to bomb the cam­
paign headquarters of the President's wife and establish a firing squad to kill officials were so

frightening for Ku Klux Klansmen, a House investi­
gation said Thursday.

Donald Appell told the House
Committee on Un-American Activities that Louise Di Salvo, a small-town barber and gun dealer, originated the idea of

blowing up the train carrying

Mrs. Lyndon B. Johnson.

Di Salvo, whose barber shop
is at Waveland, Miss., in­

voked the protection of the
Fifth Amendment against

purchases of guns and am­munitions.

Appell said the idea was so

frightening that members of the unit discussed breaking
away from the White Knights of the Ku Klux Klan and join­
ing a rival organization, the United Kingdom of America.

"They felt the firing squad
might be used not only against

established informers within the Klan, but also against
even those suspected as tatle­
tales," Appell asserted.

He said later it is the com­
mittee's belief the unit did
break away after the July 17,

1965, meeting, but that it has
since rejoined the White Knights.

Di Salvo, 38, aapper native
of New Orleans, La., refused
to answer questions about the
purchase of guns and am­munitions.

Lawyer Charges Entrapment

CHICAGO (AP) - A de­
fense attorney contended
Thursday that Food and Drug
Administration investigators used entrapment methods in
building a criminal case against four backers of Krebiozen.

Julius L. Sherwin, the lead­ing defense attorney, charged
apparently breaking the law in questioning witnesses from Mis­
sissippi. The questions were
not a large part about schemes for violence.

Mail Causes Problems

By Evelyn Augustin

Buch needed money, Buch needed help. But Buch probably didn't get either in time because he forgot to address the post card on which he had written, "Help! Money! Make it quick. (Signed) Buch." What does the post office do with such mail?

"There isn't much we can do," said Mrs. Katherine McCluckie, supervisor of mail at the University Post Office. "We put unaddressed post cards and letters on the bulletin board, hoping that someone will claim them, but hardly anyone does."

The biggest problem at the University Post Office involves students who fail to report changes of address or who do not inform their correspondents of their addresses.

"Consequently, we get mail addressed to a student simply at SIU, Carbondale," Mrs. McCluckie explained. "Locating the addressee is the most discouraging job here."

According to Royal Dillinger, superintendent of mails at the Carbondale Post Office, "Unfortunately, due to a lack of communication, we get a lot of dead letters sent to the University office. How to put the zip codes correctly is the biggest problem."

"If zip codes were used," Mrs. McCluckie explained, "the mail would be considerably speeded up." Dillinger said, however, since between one-third and one-half of the mail is advertising, perhaps some students don't want to receive their mail faster. Only about five or six packages of 1,000 are damaged, Dillinger estimated. "Sometimes they can be a problem when they split open and the contents include cookies, but we wrap them up and deliver them in the best condition possible," he continued.

Sometimes a student's graduation date depends on the mail service. Last spring a young man was waiting for a tape he needed for a final exam in a course required for graduation.

Due to a lack of communication, he didn't know when the package was at the post office until after the quarter ended. "Luckily, he was able to make arrangements with his professor so he could graduate," Dillinger said.

Both Mrs. McCluckie and Dillinger listed Valentine's Day, Easter and Mother's Day as big rush seasons other than Christmas.

Some of the Valentine cards sent are "large enough to cover a large portion of one of my office walls," Mrs. McCluckie said.

Mail causes problems

SIU Post Office Plays Detective
In Finding Homes for Letters

Both offices notice an increase in packages at the beginning of each quarter, indicating that many students leave necessary items at home after a vacation.

Dead letters are not a problem for either office. The University office receives very few during the year and the Carbondale office receives only two or three each day. All dead letters are sent to an office in Chicago where they are usually opened in an attempt to discover the return address.

The University Post Office employs mostly student workers, including approximately 24 mail carriers who service 341 acres, and that's a lot of territory.

Considering the many problems that can occur in the process of mail delivery, most students will probably agree that "playing post office" is more complicated than they ever imagined.

Sororities Expected to Attract 230 to Rush Week Events

Approximately 230 girls will be participating in sorority rush which will begin Sunday and continue throughout the week.

Parties will be held in each house all week to help these girls make their choice. Rosanna Sharp, rush chairman of the Panhellenic Council, is in charge of the week's activities.

Sunday night the girls will go to each house, but will only receive a bid by the sorority of her choice. From Monday to Friday, the girls will go to each house, but will only receive a bid by the sorority of her choice. Missouri Professor to Speak On Present-Day Christianity

Charles Hatfield of the University of Missouri at Rolla will present a lecture entitled, "God: The Dead End" at 7:30 p.m. Monday in Morris Library Auditorium.

Bishop John A. T. Robinson's book, "Honest to God," is the focal point of the discussion. Hatfield will attempt to answer some of the problems raised by the bishop's contention that present-day Christianity is logged down by outdated forms and concepts.

Hatfield proposes a new approach under the name of "Religiously Christian" in an effort to appeal to man in a time when he says society has come of age.

Hatfield is presently chairman of the Department of Mathematics at Rolla. He received his Ph.D. from Cornell University in 1944, and he has held positions at the Universities of Minnesota and the University of North Dakota.

Baptist Missions Conference Opens Tonight at Foundation

SIU Baptist students will hold their annual summer missionary conference tonight and Saturday at the Baptist Foundation. The conference will open a drive to raise $1,000 to sponsor missionaries who will work this coming summer.

Nathan Porter, associate secretary for missionary personnel of the Home Mission Board, Southern Baptist Convention, will be the guest speaker at the conference. He will speak to the group at 7 o'clock tonight.

Porter, who works primarily with pre-seminary age students interested in the foreign field, will speak during this evening's meeting. He will speak to the group at 7 o'clock tonight.

The Baptist Student Union is also responsible for a two-year program for college graduates, called US-2.

Two members of US-2 will be guests of the conference. They are Linda Linzy, who will speak during this evening's meeting, and Alva Fritsch, who will speak at 7:30 p.m. meeting Saturday. Reports will be made by students who served as missionaries during the summer of 1965. The students, and their mission fields, include: Shahan, Pittsburg, Pennsylvania; Janice L. Eady, of Jonesboro, to Louisiana; Mr. and Mrs. William T. Shaham, of Desoto, to Oklahoma; For­ zella Croslin, of Carthage, to Jamaica; and June Miller of Desoto, to Guyana.

The reports will be divided between the 7 p.m. meeting today and the 9:30 a.m. and 7:30 p.m. meetings Saturday.

Missions planned for this summer will include Kenya, Liberia, Jamaica, Washington-Oregon, Utah, New Mexico, Wyoming and Indiana.

Cochairmen of the planning committee are Georgina M. Phillips, of Desoto, to Jamaica; and Norma J. Meyer, of Centralia.

Prize Winning Film Set for Saturday

"The Beloved Enemy," starring Tony Mockus and Flo Price, will be presented at 7 p.m. Saturday in Morris Library Auditorium. It is sponsored by Kappa Epsilon.

The 90-minute film won an Oscar as the best evangelistic film of 1965.

The show combines danger, romance and intrigue in a plot which sweeps from the ski slopes of northern Michigan to the guerrilla infested jungles of the tropics.

CHARLES HATFIELD

He has given numerous lectures on religion at several universities, and he is a member of the board of directors of Inter-Varsity Fellowship. Hatfield's appearance is being sponsored by the Inter­Varsity Christian Fellowship.
Poetry Found More Popular

Poetry, said Stephen Spender, is not declining in popularity as some would think.

Rather, its popularity is increasing, he told two Freshman Convocations audiences in Shryock Auditorium Thursday.

The handsome, gray-haired British poet, author and editor allowed that America produces more poetry than anywhere else because there are so many universities and "most poetry comes out of the universities."

Spender charmed his audiences with readings from his own work, interspersed with comments on poetry and prose.

"In prose the words are secondary to the characters, scenes and ideas presented. In poetry the words and forms are more important," he explained.

To simplify this, one could say that the difference between prose and poetry is "what you say versus how you say it."

At a reception in the University Center, following the 10 a.m. Convocation, Spender met and talked with students and faculty members for more than an hour. He discussed his own work and answered questions about his poetry as well as that of his contemporaries.

The reception was such a success, officials said, that they will plan others following future Convocations to give students and faculty members an opportunity to meet the speakers.

University Looking to Future
In Long-Range Campus Plan
(Continued from Page 1)

Education, Home Economics, Agriculture and Technology.
Space reservations for schools of medicine and law are being considered.
The medical school complex might include classrooms, laboratories, offices, a hospital and a dormitory for students and nurses.

Two physical education areas are also in the plan: one for men to the south of the central area, and the other, for women, to the east of the academic core. The areas will include facilities for physical education activities, including gyms, classrooms, playgrounds and tennis courts.

The physical education areas and professional and technical areas are given equal status; however, a larger area is given physical education to provide space for physical activity.

Each zone of the campus will have its own administrative units, one located on the fringe of the general academic area and one to be set aside for specific administrative use.

Recreation areas will be located around the Lake-on-the-Campus. They will be near the central core, the on-campus housing and the professional and technical areas.

The third zone, which is reserved for housing, is located primarily in the southwestern, eastern and southeastern parts of the campus. The area to the southeast is reserved for dormitories and the professional core, another that surrounds the Lake-on-the-Campus and others with access to housing areas. Parking facilities to accommodate about 7,000 cars are planned by the university.

The traffic and circulation plan also envisions a smooth system of non-University traffic to flow around the University. An example is a street to be widened to a four-lane cross-town auxiliary.

Another example is the proposed vehicular underpasses for pedestrian overpasses crossing U.S. 51 and the Illinois Central Railroad. The planners hope both the railroad and the highway will be relocated.

Board of Trustees Approves
SIU-Carbondale Renewal Plan

An expenditure of $600,000 by SIU for a combined Carbondale-SIU urban renewal project was approved by the Board of Trustees Thursday.

The cooperative agreement between Carbondale and the University will pave the way for a $5.3 million urban renewal project on the northeast corner of the campus.

The University will acquire 10 acres of land and three acres of streets and alleys through the project. SIU will pay a portion of $1,618 a square foot for up to 357,424 square feet of property within the project area.

The difference between the $1,618 a square foot the University will pay and the actual cost of the property will be recovered by a grant from the Federal Urban Renewal Administration to the City of Carbondale.

Carbondale will buy the 1948, clear it, construct and reconstruct streets, make utility and site improvements and then sell the property to the University at the established price.

The General Assembly has appropriated $600,000 for the land acquisition on the Carbondale campus to be used for this project. This amount allows for the purchase of about eight acres at the set price. This is not enough for purchasing all 10 acres, but before the project is closed out in March, 1968, the University will seek additional funds from the state.

To be eligible for local credits for urban renewal projects, the University must submit a development plan for the campus. The trustees therefore endorsed and approved a master plan for campus expansion and future development.

ROTC Candidates
Must Apply Now

All applicants planning to enter the two-year AROTC program next fall must apply now.

The officer qualification test will be given at 7:40 p.m. Monday and Tuesday. The flying qualification test will be given at 7:40 p.m. Wednesday.

Both tests will be held in Room 303 of the Home Economics Building.

The academic requirements for the program are 18 hours of AROTC college-credit courses equally divided between junior and senior level courses.

The two-year program is offered to give the student an opportunity to obtain a second lieutenant's commission in the Air Force Reserve.

Slichter was on campus Thursday and discussed with the physics staff and graduate students here his research in magnetic resonance.

"Unraveling structures by Magnetic Resonance" will be the topic for Slichter's talk on Friday.

Charles P. Slichter, professor of physics at the University of Illinois, will speak at a colloquium at 10 a.m. Friday in Room 308 of Parkinsong Laboratory.

Slichter was a guest lecturer at the Laboratory in Peoria Jan. 21-22.
Women Gymnasts Will Meet Oklahoma Twisters Tonight

Southern's women gymnasts (left), with an able Irene Haworth, opens its dual-meet season this weekend with meets at Oklahoma City and Bartlesville, Okla., against the Oklahoma City Twisters. Miss Haworth is still recovering from a concussion she received last winter in speed ball class when she slipped on wet grass and fell. In the accident she also suffered a pinched blood vessel to the optic nerve of the left eye, which resulted in fuzzy vision and a loss of depth perception in that eye. She was unable to return to practice until last week, and her layout has dipped her from the team's second all-around performer to the No. 5 position.

Although Miss Haworth is still under care of a neurologist in St. Louis, Coach Herb Vogel believes it will just be a matter of time for her to make the proper adjustments and to regain her No. 2 position.

On the bright side, Vogel has been cheered by the gymnastics improvement in Janis Dunham, who has moved up into the No. 3 spot behind Gail Daley and Donna Schaezer.

Miss Dunham gave one of her greatest performances at the Sarasota National Gymnastics Championships in December where she finished fourth in balance beam, sixth in free exercise and seventh in uneven parallel bars against the top women gymnasts in the country.

Vogel also believes that Miss Schaezer is reaching a peak in her career as she has never been better, and her top performer, Miss Daley, is now working the best she has all season.

Vogel expects both meets to be enlivened by the battle for all-around honors between Miss Daley and the Twisters' Debbie Bailey. They both tied for the all-around in one meet last year, and in the second meet Miss Daley won by a point.

Other veteran back from last year's team are Judy Will, the world's tumbling and trampoline champion; Nancy Smith, who finished third in the world trampoline competition; Mary Ellen Toth, currently the fourth-ranked all-around performer on the team; and Judy Dunham, younger sister of Janis.

Newcomers to this year's squad include Sue Rogers, who works vaulting, balance beam, tumbling and trampoline; and Lisa Scott, who works balance beam, free exercise and uneven bars.

Southern will go into the meets an overall record of 20-0 since the team was formed in 1965. In Vogel's 10 years of coaching, his teams have compiled an impressive 81-2 record.

Rehab Court Reserved

The basketball court at the south end of the Arena will be reserved from 1 to 2:30 p.m. Saturdays and Sundays for rehabilitation students.
Salukis to Meet Arizona State, Arizona U.; Better Than Records Indicate, Hartman Says

Southern sent its basketball team, not sinuses, to Arizona Wednesday.

The Saluki meet Arizona State tonight at Tucson and follow up with another game Saturday night at Tucson with the University of Arizona.

"These clubs have met some real fine team this season," said Coach Jack Hartman before leaving. "And their records probably don't reflect their true strength. We're just hoping we can give them a good contest. I feel certain we can if we only play our normal game."

Neither of the Arizona teams would bowl anybody over with their records. Arizona has won 7 of 12 games, while tonight's opponent, Arizona State, is 6-7.

Arizona State has lost its last four games since upsetting Michigan 82-87 in the Far West Classic last month.

The Sun Devils have four of their starting five from last year, including Freddie Lewis, who leads the team in scoring. Mike King is averaging 12 points a game. The 5-11 guard will be joined in the backcourt by either Frank Bailey or Rich Coppola. Coppola, a 6-2 senior, was one of the starters last season, but he is being pressed for the starting role by Bailey.

At center, Arizona State has Mike Lane, a 6-6, 210-pound junior. Lange is averaging only 7-3 points a game, but is rated as a fine rebounder. He high jumped seven feet for the Sun Devils' track team last spring.

At the forwards, the Sun Devils will go with Dennis Hamilton and John Myers, who are both averaging in double figures. Hamilton, a 6-8 senior, is averaging 16.5 points a game while Myers, a 6-5 junior, is hitting at a 15.3 clip.

George McNeil is still the leading scorer with an average of 17 points a game. The 6-2 senior has a .310 percentage from the field. The other guard, Dave Lee, has a percentage of .421 and is averaging 11.4 points a game. His average jumped considerably after the last game when he made 8 of 10 field goal attempts and three of four free throws for 19 points.

Round out the starting five will be Bob O'Neal at center and Randy Goin at the other forward. O'Neal's 33-point performance last weekend boosted his average to over 10 a game and his shooting to 50 per cent. Goin is averaging 9.2 points a game.
Nebraska Waters Will Test
Saluki Swimmers Saturday

Southern's swimming team will seek its third dual meet victory in three tries when it travels to Nebraska for a meet Saturday with the Cornhuskers.

Southern is usually at its best against the Cornhuskers as evidenced by the Salukis' 68-27 victory here last year.

In that meet the Salukis were blanked in only the diving and the 400-yard freestyle relay. Thom McAneney paced the Saluki swimmers with victories in the 200 and 500-yard freestyle.

Gymnasts to Face
New Scoring Rule
In Saturday Meet

When the Saluki gymnasts open their dual meet season Saturday at Iowa State University, a new scoring system will be in effect.

Under the old system a team score of 97 was perfect, but under the new system a team will be able to score as many as 210 points.

Each team will be required to enter four men in each event, but only its three highest scores will count toward the team total.

For example, in the free exercise Frank Schmitz may earn a 9.0, Paul Mayer a 9.4, Larry Lindauer a 9.2 and Brent Williams a 9.0.

Williams' score would be thrown out but the top three scores would be added for a team total of 28.2 points.

Each event will be scored the same way until all the points are accumulated.

The scoring system is regarded as beneficial to Southern, because it increases the importance of a man's depth, Southern's strong point.

It will also allow Coach Bill Full to use four performers in each event instead of three.

Diamond League
May Add Teams

Joe Lutz, Southern's baseball coach and secretary of the Southern Collegiate Baseball League, believes that more schools will join the league this summer.

Lutz, who is attending the athletics officials meeting this week in Washington, D.C., said teams would have a 40-game schedule between June 17 and Aug. 21.

The league would be divided into north and south divisions with division winners meeting in a title playoff.

Fee Hike
Approved

(Continued from Page 1) would not "approve or disapprove" the proposal at this time, Lenzi said. He also said that John S. Rendleman, vice president for student affairs, told members of the student welfare committee investigating the proposal that he is in favor of the increase.

Lenzi noted that the question of the legality of the fee increase for the Carbondale campus had been brought up in a previous Senate discussion.

The Salukis have also left their mark at the Nebraska pool.

Saluki swimmers hold five of the 10 Colliseum Pool records, including McAneney who holds records in both freestyle events.

Nebraska is led by senior Tom Nickerson, who holds Nebraska records in the 200- and 500-yard freestyle; Dave Frank, who holds the Nebraska 200-yard individual medley record; and Mike Jackson, who holds Nebraska school records in the 100 and 200-yard butterfly.

Coach Ralph Casey is expected to go with much the same lineup that was victorious over the University of Oklahoma last week.

Kimo Miles, victorious over Oklahoma in the 200-yard butterfly, will swim that event and the 200-yard freestyle, and Gerald Pearson will swim in the 200-yard breaststroke.

Ed Mossett, another Saluki winner last week, will compete in the 100-yard freestyle.

WORK ON PRISON PAPER-Inmate Mark Van Lundingham, (right), checks with Herb Gardner printing superintendent at Menard State Prison as he prepares the next issue of the Menard Times, a monthly chosen by the SIU Department of Journalism as best prison newspaper in the nation. Howard R. Long, chairman of the department, will present a trophy to Van Lundingham on Jan. 28 at a luncheon in the prison. (AP Photo)
