$2.6 million to be set aside for future SIU-C budget cuts

By Vicki Olgren
Staff Writer

Although it is not known yet if Gov. James R. Thompson will make another budget recall this year, faculty have been told that the University is now preparing for another reduction of 2 percent by setting aside about $2.6 million of its budget.

The possibility that a further recall would be 2 percent is "purely speculative," according to Jim Prescott, a spokesman for Thompson. But "any option that would help keep the state affluent will not be overlooked," he said Thursday.

Though the University does not know yet if another recall will be made, "there is ample reason to make such preparations," Chancellor Kenneth Shaw said Thursday.

GSC candidate declines to debate

By Philip Friel
Staff Writer

Graduate Student Council presidential candidate Ann Katsinas Thursday said that she would decline the challenge from opponent Steve Katsana to debate Feb. 2.

Katsinas, who had been contacted by Katsana about the debate, said that she wouldn't have enough time to prepare for a debate.

Katsana said he was unable to reach Greeley to personally challenge her to a debate and that he had attempted to contact her Thursday evening.

"I don't think it is proper to bring up something like this at this point in time," Greeley said. "I don't think it's appropriate to set up something like this four or five days prior to the election, and there is enough time to consider a debate.

"He knows that I'm leaving town this weekend and knows I wouldn't have enough time to prepare for a debate," she said.

Katsana was also asked about making president of the council, announced at the GSC meeting Wednesday night that she and other members of the council were leaving this weekend for Springfield "to meet with people regarding our budget for future election.

"They survey was only done at night, only in the library and wasn't a sample of all undergraduates," Peterson said. "It's simply a matter of different interpretations of the students.

"Cook, on the other hand, said the USO only polled those individuals that were users of the library because those were the guidelines agreed to by the ESO, SIC, president Albert Soeart and Vice President for Academic Affairs John Gonyer.

"But Peterson said that students were asked what they would like to see a copy of their forms study.

"Peterson also disagrees with USO allegations that he has a deal with the student body.

"I have been listening to them, but I have been listening to other voices as well," Peterson said. "But the long-term advantages to the student body are more important than a short-term handicap to some students.

Dean says Morris hours won't change

By James Derk
Staff Writer

Dean Kenneth Peterson of Morris Library Thursday denied, "Based on the operating hours of Morris Library would be further reduced by the recall to reduce personnel cuts," he said.

However, Undergraduate Student Organization President Jerry Cook stood by statements he made Wednesday to the Daily Egyptian and to the ISU Student Senate."Cook addressed the Senate at its first meeting of the semester and said he would like to see the phone number increase to about 600,000 and that the library hours would not be cut.

"This would be taken from travel expenses, contractual services, automobile use and telecommunications.

"These cuts will not affect student wages or graduate assistantships at all," Peterson said. "If the hours were to be back cut, these would be the areas affected.

"Peterson said the library had been asked to run a month's worth of unannounced hours and that the b1ack copies were not available should the library cancel and then restart a subscription to the "USO proposal to keep one floor of the library, drawing opposition because the first floor has no rest rooms.

"This proposal is still under consideration," Peterson said. "If a journal is canceled and restarted later, it leaves gaps in the collection which can hurt research," Peterson said.

"Peterson said the library administration had considered the alternatives proposed by the USO and had found a feasible proposal. The USO proposal to keep one floor of the library, drawing opposition because the first floor has no rest rooms.

"The effects on the collection are of real concern to the faculty," said Peterson. Many periodicals and journals are continuously run, and back copies are not often available should the library cancel and then restart a subscription according to Peterson.

"If a journal is canceled and restarted later, it leaves gaps in the collection which can hurt research," Peterson said.

"Peterson said the library administration had considered the alternatives proposed by the USO and had found a feasible proposal. The USO proposal to keep one floor of the library, drawing opposition because the first floor has no rest rooms.

"This proposal is still under consideration," Peterson said. "If a journal is canceled and restarted later, it leaves gaps in the collection which can hurt research," Peterson said.

Special election to be arranged to fill student trustee position

By Vicki Olgevity
Staff Writer

A special election will be held to select a replacement for student trustee, the Undergraduate Student Organization and the Graduate Student Council have decided. Student Trustee Stan Irvin, who has accepted a position as Jackson County assistant state's attorney, intends to resign his position on the Board of Trustees because of a legal conflict of interest.

The Student Trustee Reference Laws state, "If the student trustee resigns from office a special election shall be held within four weeks from the date of resignation."

It had been thought that the SIUC campus had no provision for replacing a trustee who resigned in midterm.

The USO Student Senate passed a bill Wednesday night directing the Committee on Internal Affairs to initiate proceedings, through the Election Commission and in cooperation with the GSC, for holding a special election in accordance with the student trustee election laws.

The student elected would serve until June 30, when Irvin's term expires. "At our regular election in April, we'll elect a student trustee to serve next year," USO Vice President Fred Levenhagen told the Senate.

According to John Strem, USO election in April, we're electing a student trustee to serve next year, USO Vice President Fred Levenhagen said. Thursday that he would prefer to have a replacement elected by the next Board of Trustees meeting Feb. 10, when possible tuition increases are likely to be considered.

"If I was assured they would be able to complete an election by then, I would resign as soon as possible," he said.

GSC nominates three for VP post

By Phillip Florida
Staff Writer

The Graduate Student Council nominated three vice-presidential candidates for its election Feb. 3 at a meeting Wednesday night in the Student Center.

Dan Venuti, Nicholas Roun and David Williams were nominated for positions, while Ann Greedy and Steve Kastenas were nominated for president.

The council also decided that voting for president and vice-president would be done separately in the upcoming GSC election.

After the votes for president are tabulated, the vice-presidential election will be held, President Paul Mataloni said. "The loser in the presidential election could conceivably be elected vice president then."
Only one race to appear on city ballot

By John Schrag
Staff Writer

In an effort to save time and money in the Feb. 22 Carbondale City Council primary election, election officials have decided that only the contest for the single two-year council term will appear on the ballot.

Because there are only two candidates in the mayoral race and four candidates for the four-year council terms, the only real contest in the primary is for the single two-year council term, for which three candidates have filed. Originally, all nine candidates were to have their names on the ballot. Jackson County Clerk Robert Harrell said the referendum considering the consolidation of the Carbondale High School system would remain on the ballot as planned.

According to a memorandum released by the Carbondale city clerk's office Thursday, the change in the primary is "a result of a cooperative effort between the Jackson County clerk's office, the State Board of Elections and the Carbondale City clerk's office."

The memorandum states that "it was agreed that eliminating those unnecessary elections on the primary ballot would be a cost-cutting measure and lend expediency to the tabulations of results on election night."

Only the names of the three candidates running for the two-year council term will appear on the ballot. Those candidates are Ellen Bevis, 205 S. Poplar St., Keith Tushorn, 810 N. James St. and Matthew D. Creeden, E. College St.

Harrell, whose office is in charge of the election, said there is an ambiguity in the state election laws regarding the necessity of holding primaries where no candidate will be eliminated before running for election officials. Harrell determined that the unnecessary city elections did not need to appear on the ballot.

Harrell said there is a similar situation in Murphysboro, which is also preparing for another primary on Feb. 22 in Murphysboro, which uses an aldermanic system of representation. None of the five wards had more than one Republican candidate and only two wards had more than one Democrat candidate, he said. Therefore, in that primary ballot will be printed only for the two wards where the candidates were competing. Harrell said.

In addition to monetary benefits in printing costs, he said, a considerable amount of time is saved in counting the ballots and processing the election returns because of the change.

USO approves results; seats senators

By James Derk
Staff Writer

The Undergraduate Student Organization Senate approved the results of the fall election and seated 21 new senators at its meeting Wednesday night in the Student Center.

The Senate also elected Karen Wolf as pro tem of the Senate and elected Judy Vandenbroucke to the Special Academic Activity Panel. The panel awards the funds in the Academic Excellence Fund, which is used to provide funding for students who attend professional seminars and functions, but may not belong to a recognized student organization and are therefore ineligible for funding.

Five appointees to Cook's cabinet were also approved by the Senate.

Cook said the USO Book Co-op was a "great success" and has become a vital student service. "The co-op earned over $1,000 and will be repeated next fall."

The student directory will be out before Feb. 15, Cook said. He cited "University bureaucracy" as the reason for the delay. The directory will be paid for by the Student Affairs Committee and the Academic Affairs Committee of the USO.

The projected drop in SUI-C enrollment next fall will lead to a $6,000 drop in the student activities fee for the USO — a situation that Cook said might be "tough to work with."

"We could even rescind funds for this semester, but that isn't very likely," he said.

Cook and USO Vice President Fritz Leverhausen presented certificates of honor and appreciation to members of USO that have provided "exceptional service to USO."
Jobs bill can work

Americans rightly wonder how Congress can talk about reducing the atrocious federal deficit in the same breath with jobs bills likely to cost billions of dollars. The reason is that many jobs bill mandate so sense that it is in the people off welfare and give them jobs allowing the federal government to raise further revenues by taxing those workers. A key contribution to the recession has been a decline in taxes collected from Americans no longer working.

In normal times, it would not be an acceptable idea. It would make sense to reduce a projected billion deficit and provide the private sector with incentives to increase productivity and spur hiring.

These aren't normal times. 1983 is not going to be looked back upon by the millions who lost their jobs, and 1983 is going to be more of the same.

The country is so deeply mired in a recession with 12 million Americans out of work, many now dependent on food stamps, that business can hardly be expected to lead a quick recovery. There are serious problems in this country namely the homeless worker and farmer facing foreclosure.

That is tragedy that needs special attention. So far, the White House seems content with expressing sympathy for the unemployed who are facing a far more serious dilemma than finding a job. That is staying alive.

How to foolish a jobs bill may sound economically, it makes sense to every worker looking for work and losing hope because of a long-term unemployment.

Those who lived through the Depression and believed the Works Project Administration threw federal funds away by putting men to work, today's jobless or learning about the depression may believe that this is another instance of an improvement.

Simon does want to waste any doubts about dollars thrown away by putting men to work. Every budget, whether a. "Vested" or objective article" becomes problematic. So, let's be polite. Let's stop the behind-the-scenes maneuvering and the spreading of faulty logic. Let's get down to issues.

An article by Steve Kattas is required to GSC president. The last election was won by a candidate and some doubt this one will also be close. The GSC will have to work with whomever wins and have the winner represent them in the student government and the people. The president, therefore, I believe there are certain qualifications all of us should look for in a candidate. When I look for these qualifications in the candidates, I find only one possible choice.

FIRST, THE GSC PRESIDENT should be experienced in student government. Ann Greeley has served on the GSC for two years, and in that time has been vice-president and has served on the Executive Committees and Fee Board. She knows the workings of the council inside out. She has worked for increased student and student group access to GSC funds. She knows the council works and works to change what doesn't.

Second, the GSC president should understand the issues facing graduate students. Many issues come before the council each year. These issues can be divided into two groups, each one operating along a different axis of concern for graduate students.

First are those issues that directly concern students, from national issues like tuition hikes and lease cutbacks to SIU-C-related issues like the present Undergraduate Student Organization. I'll leave the research to graduate students for Student Programming Council events.

Second are those social issues that affect graduate students indirectly. I'm thinking of professional and academic issues, such as draft registration to national issues like tax laws.

To KEEP SIGHT of all these issues is difficult, but for Ann Greeley, I believe important perhaps even more so than for a candidate for the GSC president to be able to prioritize them and prepare agendas for their solution. It is fine to come up with grandiose schemes for revolutionizing student government, bartering SIU-C administrators or parading to the Illinois General Assembly, but these ideas should be pursued once the day-to-day needs of graduate students are met.

So, here are the questions: How do I get money to go to a conference? Where can I file an academic grievance? What can my departmental club do aboutSIU-C administrators or parading to the Illinois General Assembly, but these ideas should be pursued once the day-to-day needs of graduate students are met.

So, here are the questions: How do I get money to go to a conference? Where can I file an academic grievance? What can my departmental club do about? How can Ann Greeley be helped by GSC president.

This isn'T TO SAY that we shouldn't use the power that the GSC has. I don't believe that. But we need to face facts: No matter how hard we try to have our voices heard by the government, the GSC is very easy to ignore. No amount of railing and raging is going to change that. We can, however, improve our standing within that basic structure through responsible, effective leadership. We're right to retain SIU-C's commitment to parity for women's athletics, to reduce SIU-C's warped budgeting priorities that favor operations and hurt academics, to rebuid Morris Library rather than destroy it, Ann Greeley has provided effective, responsible, effective leadership. WSIL manager dreams of No. 1 rank if $4.5 million boost comes through

By William Jason Yang
Staff Writer

The one-block, square-shaped building in downtown Harrisburg from which WSIL-TV operates looks more like an old warehouse than the home of a television station.

But in three to five years' time, it will no longer be so. With "provisional approval" granted by the Federal Communications Commission, WSIL-TV is set to begin a major expansion of its station.

The expansion will set the pace for the 30-year-old station to become "the Number One TV station in the market," said WSIL-TV General Manager Rick Lippa.

The region which receives the WSIL-TV signals includes five states: Illinois, Missouri, Kentucky, Tennessee and Arkansas. WSIL's market includes Mount Vernon in the north, Cairo in the south, Paducah, Ky. in the east and Cape Girardeau, Mo. in the west. Once completed, the station will be "a state of the art station," Lippa said.

In its resolution, the FCC said the expanded signals will provide "a significant improvement" to the signal near the heart of the WSIL TV area.

In its resolution, the FCC said the FCC TV station which presently broadcasts in the area will not be able to continue in the area. However, Lippa, who became general manager in November 1962, said the project is still in its infancy stage.

"None of the buildings, structures, lands, machinery and equipment, and facilities whatsoever of WSIL-TV has been sold yet. Our bonds are still in step one," said the 25-year-old Lippa.

"We still have a long way to go," he said.

The Southeastern Illinois Regional Planning and Development Commission structured the project for WSIL-TV and brought it to the council. The project will also be supported by a $500,000 Small Business Administration loan and a $250,000 city loan from the Urban Development Action Grant funds. WSIL-TV will come up with $200,000 of its own.

The grant from the Department of Housing and Urban Development is to be loaned to WSIL-TV on terms and interest rates to the city acting as a sponsor.

Interest on the SBA and SBA loan have not been determined yet. The deal may be worked out "as early as May this year or as late as May next year," Lippa said. The bond issuance is contingent on grant approval. None of the bonds have been sold yet.

All financial statements, bids and other details have to be completed before WSIL-TV representatives meet with officials from the Federal Aviation Administration and the Federal Communications Commission in Chicago in the next few months. The FAA must approve changes in the location and height of WSIL's transmitter tower, while the FCC must approve increases in transmitter power.

The 24-employee station plans to expand its staff to between 50 and 75 within the next three years, Lippa said. "Our business is running well, so we want to expand," he said. Last year, the station's gross earnings totalled nearly $2 million. Half of that came from national advertising, Lippa said. In three years' time, after expansion, he predicts that the station's revenue would come up to $10 million. Staff salaries now average $12,000 a year.

WSIL-TV, which started broadcasting in 1953, has a "slave satellite" station, KPOB-TV in Poplar Bluff, Mo. that picks up and retransmits signals from the Harrisburg station. The relay of this microwave signal is boosted by an 80-foot steel tower at Harrisburg.

Lippa said a new tower, antennas and transmitter, costing a total of about $1.5 million, will be constructed.

"Although the overall project was estimated to total $4.5 million, eventually it will come to $6 million. We still can expand the way we plan, but it will take a longer time," Lippa said.

The station plans to allocate $3 million for its building, $1 million for equipment, $151,000 for an automated cart machine, $510,000 for updating the studio and $500,000 for two-way radio for the news staff, $6,000 for the insurance, $2,500 for improvement of other facilities such as the WSIL satellite TV in Poplar Bluff.

WSIL-TV now operates 16 hours daily and will extend the schedule to 24 hours a day on Saturday and Sunday in the near future, Lippa said. Eventually, the station will operate 24 hours a day, seven days a week. But Lippa said this is long-term plans.

Also, Lippa said WSIL plans to expand news coverage with the opening of a Carbondale bureau, and to increase coverage of SIU News and Sports.

"Part of our long-term plan is to broaden our coverage of SIU sports," Lippa said. "We want not only to cover SIU sports, but to send a reporter to find out what is going on in Carbondale.

WSIL-TV is planning ambitiously to match the other stations in the highly competitive three-station market. Lippa, a native of Cape Girardeau's-based KFVS-TV admitted that his people and WFSD-TV at Paducah, Ky. have about 70 employees.

"To be the Number One station in the market, we will be in as many people as necessary in order to be competitive," Lippa said. "This will mean an increase in staff of 25 to 30, SIU.

Lippa said he had worked in on-camera jobs as a switcher, in field producing and in sales. He has worked at WTBY-TV in Alabama, WTVY-TV in Evansville, KLBK-TV in Lubbock, KLLR-TV in Dallas, Texas. He graduated from Florida State University with a bachelor's degree in biology.

Bernice Sensmeier, WTVY Evansville personnel director, described Lippa as a "progressing young star. He progressed from one job to the next by hard work and the determination to succeed." Sensmeier said his last position before he left in March, 1982 was as program director. He came to this station and he did a good job programming it, but he wanted to move around." Lippa decided to come to WSIL-TV because he felt it was "going to turn around" and strike it big.

Loans mean learning at SIU-C

By Robert Green
Student Writer

The Student Work and Financial Assistance office in Woody Hall should be the first stop for students in search of financial aid, but possibilities for aid are available through other channels as well. Several types of federal and state loan programs are available to students through participating lending institutions.

The Guaranteed Student Loan Program has been a mainstay of financial support for many students over the years, but there have been some recent changes in the program. In the past, all students were eligible to receive a guaranteed student loan. Now the program is need-based, and students whose parents have an income exceeding $30,000 are no longer eligible.

To apply for a guaranteed student loan, a student must obtain a loan application from a lending institution in the student's hometown. Eligible undergraduates can receive $2,500 per year, and graduate and professional students can get $5,000 per year. The rate of interest is 9 percent.

Dan McCarthy, assistant director of financial aid, said in fiscal year 1982, 7,743 $174,000 students received over $1.1 million through the GSL.

Two new loan programs, Auxiliary Loans to Assist Students and Parental Loans for Undergraduate Students, are also available through some lending institutions, and are not need-based.

Academic scholarships from various departments, the Office of Admissions and Records and private sources also play a part in the financial aid picture at SIU-C, and Mann said 993 students received academic scholarships totaling $676,500 last year.

Tom McGinnis, director for school and college relations, said about 100 academic scholarships were awarded to incoming freshmen, and about 50 went to transfer students from Illinois community colleges last year. The scholarships are available through the admissions office.

To be eligible, freshmen must have a minimum ACT composite score of 26, and transfer students must have a minimum grade point average of 3.5. McGinnis said freshmen who were awarded the scholarships last year had a minimum ACT score of 29, and transfer students had an average GPA of 3.8.

A host of other SIU-C scholarships are available through each department, and it's this form of financial aid that is most often neglected by students.

McGinnis said, "Students are often unaware of these scholarships, but a lot of times they are aware and don't apply figuring that someone else will get it anyway. As a result, scholarships sometimes go unused and it's a shame."

A typical example of the departmental scholarships are those currently offered by the College of Communications and Fine Arts. Eight tuition waiver scholarships are available for continuing full-time students. The deadline is April 1 and the awards will be based upon academic achievement and also creativity.

Almost all of the departments at SIU-C offer some type of scholarship, and students should consult their academic advisors to find out what is available.

Much of the scholarship and loan funds available are provided from private donations made to the SIU Foundation. J.C. Garavalia, acting SIU Foundation executive director, said 13,327 donations were made to the foundation last year, and through the financial aid office the foundation provided more than $411,000 in scholarship and loan money to students.

Garavalia said many of the foundation scholarships and endowment funds have very specific requirements for eligibility. The financial aid office has a listing of the awards and their requirements and notifies students who are eligible.

Much of the financial aid is also available specifically for graduate students, including graduate assistant appointments, graduate fellowships and traineeships, graduate dean fellowships and tuition scholarships.
Shaw calls for fund infusions

By Rod Scorse
Su\ Writer

Chancellor Kenneth Shaw reiterated his belief that the biggest challenge facing higher education today is to help Illinois develop economically.

At a decision-making seminar in Trueblood Hall Wednesday night, Shaw said he doesn’t think the state’s universities will play a leadership role in economic development “unless large infusions of money are given across the board.” Specifically, he said, the money should be given to areas like engineering, faculty and staff salaries and computer science.

He said new high technology industries are going to need good universities doing basic and applied research and educated people or “human capital.”

Germany and Japan, he said, are turning out more engineers and putting more money into research and development than the United States.

“If we’re not in a position to do the job, somebody else will,” he said.

On decision-making, Shaw said the most important aspect was defining goals, which often gets lost in large bureaucracies.

“If you’re serving students and you forget that, then regardless of what decision you make it probably will be a bad one,” he said.

Shaw said that, looking back, he has made good and bad decisions.

“I’ve made terrible decisions, but the only way to avoid that is to not make any decisions.”

---

Shaw was the first speaker in the series of seminars on decision-making, sponsored by the Residence Life Office to give students and staff an opportunity to meet and have discussions with decision-makers. Also speaking were Paul Leininger, assistant director of Life, and James Rinear, director of residence hall. Remaining speakers scheduled are President Albert Salin, Feb. 5; Bruce Twigg, vice president for student affairs, Feb. 9; Sam Rell, director of construction, Feb. 16; and Jerry Cook, USO president, Feb. 22.
Rape study says victims need more emotional support

CHICAGO (AP)—An estimated one in six women in the United States will be raped at some time during her life, and physicians should make themselves more aware of victims' psychological needs and more sensitive to them, doctors say.

How victims are treated by doctors and hospital personnel, police, family and friends can greatly influence their recovery, noted the doctors in the Jan. 27 issue of the Journal of the American Medical Association.

Rape victims commonly suffer a stress disorder called rape trauma syndrome, according to the authors—two doctors and a rape crisis worker in Lexington, Ky. Symptoms of the syndrome may include re-experiencing the trauma, having dreams about it, losing interest in the world, having trouble concentrating, experiencing guilt and a variety of other things.

Today's puzzle

Puzzle answers are on Page 13

Fusion group to debut at Great Escape

On the bar scene of Carbondale, it is very difficult to find a band performing the complex sounds of jazz-fusion. Occasionally, SPC Consorts will present such entertainment, but the midnight downtown rarely exhibit jazz-fusion. Notable exceptions are Les Vaill and John Moulder. Mercy and Gus Pappello.

Friday and Saturday this will change. Bob Sterning of The Great Escape has decided to reach out and grab some new sounds for Carbondale. Straight from Chicago, the Ashby-Otterman Alliance will bring their hot jazz-fusion to town.

Combining the sounds of Weather Report and the wizardry of Return to Forever, the group performs a complete spectrum of their own material.

Many of their compositions from their self-titled debut album, are receiving quite a bit of airplay these days on more progressive radio stations.

Fundamentals of Tai Chi Chuan - This five-week class, sponsored by the Wellness Center, will be a continuation of the single session Tai Chi workshop. Formal movements of Tai Chi, as well as breathing, meditation, self-defense and related disciplines will be covered. Participants must have attended a prior Tai Chi workshop or a class taught by Greg Mucci. It will meet from 5:30 to 6:30 p.m. on Mondays, beginning Feb. 7. Registration will be accepted after the Tai Chi Workshop.

Tai Chi as a Yoga - The physical, mental and spiritual benefits of yoga will be introduced in this five-week class which uses a holistic approach and integrates exercise, music and meditation. Participants should come with a pad or blanket and wear loose-fitting clothing. The class will be held from 6 to 7 p.m. Wednesdays, beginning Wednesday. Persons may pre-register by contacting the Wellness Center.

Stop Smoking Now - Aimed at the smoker who is serious about quitting, this five-week class offers motivation, a structured program to follow and group support. It meets from 4 to 6 p.m. on Mondays, beginning this Monday. Persons may pre-register by calling the Wellness Center.

Stress Management Group - Practical information, easy-to-learn relaxation techniques and rational ways of managing daily stress and improving well-being will be covered. It will be held from 7 to 9 p.m. Thursdays for three weeks beginning Thursday. Pre-registration may be completed by contacting the Wellness Center.

- A five-day workshop, 10-week program to teach women the prevention of dangerous situations, to avoid physical confrontation and to defend themselves. It is taught by certified instructors of the National Women's Self-Defense Council. A required orientation and registration meeting will be held at 6 p.m. Tuesday or at 9 a.m. Saturday, Feb. 5, in Room 158 of the Student Recreation Center. It is co-sponsored by Women's Services and Recreational Sports, 536-5531.

NUTRITION

"Time-Out" - An alternative happy hour at the Recreation Center. Drinks, snacks, live music and dancing available from 4 to 6 p.m. Thursday in the first floor lounge of the Recreation Center.

Don't blow around!

Think seriously about the D.I. Classified

MIND BODY SPIRIT

Introduction to Tai Chi Chuan and Tai Chi is a Chinese dance movement which is prerequisite for a five-week Tai Chi class. This introduction will be held from 6 to 8 p.m. Monday, in Room 158 of the Recreation Center. No registration is required. It is co-sponsored by Recreational Sports and the Wellness Center.

Family addition needed for the Man of the Year

By Patrick Williams
Staff Writer

Time magazine's Man of the Year - the computer - has a lot of relatives at SIU-C. Some are kinin' cousins. Some are just distant kin.

But they're all part of the computer family.

At SIU-C, relatives of the Man Of The Year can be found doing research in the College of Engineering and Technology as well as checking for valid identification at the Recreation Center.

Although there are several different individual computing systems here at SIU-C, the main Man Of The Year makes his home in the basement of the Wham Halling. Behind a security system of combination-locked doors and security cameras lives the large "main frame"-computer that does the bulk of the school's administrative and academic activities.

Several large, bright red and blue pieces of equipment filling this basement underscore Assistant Director of Operations Barry Blonde's statement that the machine is "a lot more than a hand calculator." "These machines put off a lot of heat," Blonde said. The three new processors at Wham are kept running constantly in a room that is air-conditioned summer and winter. In a corner of the computer room is a fireproof, earthquake-proof, everything-proof storage vault storing the racks of tape that hold the administrative records of SIU (C). Next to the vault are 36 disc drives, each one capable of storing 300 million bits of information, according to Blonde.

Three processors and 36 times 300 million bits of information may seem like quite a bit of computing power - but it's not enough, fact. Harold Richard, acting director of computing affairs, said SIU-C has only about one-half the computing resources it needs.

"The problem is that Southern Illinois University is relatively understaffed in the area of computer services," Richard said. "The approximately $3 million spent on computing here could be doubled and still just meet present demands for services." Richard said. And demand for services from the academic and administration sides is increasing at a rate between 20 and 30 percent per year.

"We're on the verge of being buried," Richard said, by a loss of research that requires computers. "It's one of those situations where you need to invest a dollar to make a dollar" by attracting research grants and students, he said.

The money just isn't there. Finding additional money to meet computing demands can require some skillful juggling on the part of Richard's staff. A new low-maintenance, cost processor was recently purchased, using the maintenance budget of an older model which required expensive upkeep. The older model will now be cannibalized for parts to the newer model. The new processor requires no additional equipment about doubled computing resources but it will run under such a load that it needs to be replaced already, Richard said.

"We're living in a hand-to-mouth existence," Richard said. And the problems do not end with purchasing hardware. Finding qualified people to run the machines. Richard said, is difficult because SIU-C doesn't have the money to lure people away from lucrative jobs.

"We can't keep the people," Richard said. See ADDITION, Page 11.

One Graduate Position
On the Student Center Board

Get involved in the formulation of Student Center Programs & Policies

Board applications can be picked up at the Student Center Administrative Office on the second floor of the Student Center. Applications will be screened and interviews scheduled on February 7th and 8th, 1983.
we've got and we can't hire in the marketplace. We keep a constant stream of people running through on their way to other jobs," Richard said.

Although the situation has reached a point of computing gridlock, Richard is careful to point out that "we're doing the best we can."

But William Wright, associate professor in computer science, doesn't believe the job is getting done in providing access to the system for his students.

"We're not even teaching some courses because we can't get access to terminals," he said. A recent study showed that students in all departments have an average ninety minutes of access to terminals per week.

"We know students who have left because of inadequate computing facilities," Wright said. He said a 4 a.m. work session is not unusual for students at the end of the semester.

SIUC has been ranked in the bottom 20 percent of colleges nationwide in computing services, Wright said.

Although Wright recognizes that this is "not a good time to need money," he disagrees with some of the decisions on how to spend the money there. For instance, Wright wants the card key-punches to be replaced.

"They should have been removed at least five years ago," he said.

According to Richard, replacing the key-punches could save enough money to build a 32-terminal display lab every two years, but key-punches are still being used by some faculty and departments although Wright said they are in use few places outside the university.

"We have some systems that are dinosaurs and some that are state of the art," Richard said.

Kenneth Danhof, chairman of computer science, said his department has lost at least 25 majors because of "disagreement with the situation."

But a strained budget in computing has not kept the Agricultural Education and Mechanic Department from entering the computer age. AGEM began offering a new course in computing last year as an "experiment," said Chairman James Leacy. They expected 10 students to sign up. Forty did. The course was offered this fall for an expected forty students. Nobody signed up.

AGEM was able to enter the computer field at a time of tight budgets thanks to the use of micro-computers small, inexpensive computers not hooked in to the main frame at Wham.

Although micros may have given AGEM passage into the computer age, they're not ready to replace the computing center yet. Richard points out, "Maybe in 10 years," he said.

Between five and 10 years is just about how far SIUC is behind in meeting its computing demand, said Wright. "There is new items for your shopping pleasure:

*Chesm and Maltese coffee makers
*New imported chocolates
*Shortbreads *Mustards *Preserves

ADDICTION from Page 10
Former model trains girls for ‘dazzling’ fashion shows

By Sheila Washington
Staff Writer

Leslie Papineau may not make Southern Illinois the fashion capital of the world but she and five models who performed at Gazette’s Tuesday evening might be competing to suit the ultimate entertainment needs of the fashionable, always-smile crowd.

Papineau, a former Chicago model and grade school teacher, decided last September to metamorphose interesting girls into dazzling and entertaining models after she attended an “uninteresting” area fashion show.

With previous modeling experience and a business-like mentality, she decided last September to organize a fashion show in Southern Illinois.

She found girls between the ages of 19 and 22 and started to train them for professional and entertaining fashion shows: “I knew there were fashion shows in the area, but they didn’t seem entertaining, though, I decided that the girls here needed training,” she said.

This training has led them to cross paths with clothing store owners who allow the group to model the latest fashions. As an added attraction to the shows, the models sometimes give away gift certificates and fashionable, smocks or blouses.

Brook’s in the University Mall, Kay’s on Main Street, and the Fashion Bug in Harrisburg are a few of the clothing stores that have sponsored The Modeling Conspiracy.

The fashion shows usually last two hours. They deviate from the typical scrub-and-custom routines to popular rock, jazz, or western music, in addition to dancing, they leave the show area to share information about themselves and the clothes to the audience.

This aspect of the business requires the models to have a bit more than the stereotypical ”just a pretty face” between their ears. Because they strive for maximum appeal with the audience, their prime attributes include intelligence, friendliness, and assertiveness. “All the models have to project professionalism, motivation and enthusiasm to the audience,” Papineau said. “Looking pretty” may also land Modeling Conspiracy members jobs with advertising firms in Southern Illinois because of the demand for experienced models, she said.

Peggy Alongi, a Ferris resident who has been with The Modeling Conspiracy since September, finds her part-time job an interesting challenge. “It’s fun, but it’s also hard. You meet a lot of people who might help further your career.”

The Modeling Conspiracy group may also disprove some people’s misconception that models are not intelligent because many are not college educated. Fact, Beth Szatkowsky, psychology major, and Ronde Baker, computer major, attended SIUC when they were not modeling.

Membership: From left to right: Peggy Alongi, from Ferris, Leslie Papineau, director, Kenda Baker, freshman in computer science, and Dutzie Malcom, from Benton.

Fat pigs could mean higher profits

By Robert Lee Zimmer
Associated Press Writer
Urbana, Ill.

Chinese pigs that look like belly-bound donkeys could mean higher profits for U.S. farmers and lower pork prices for consumers.

These peculiar hogs may give U.S. pork producers the dramatic boost in litter size they've been seeking for 40 years, says Dan Gianola, a University of Illinois animal scientist. He hopes to import Chinese hogs and cross them with U.S. pigs.

"The most efficient way to reduce production costs is to increase reproductive rates," said Gianola. "The main problem is that we have made virtually no progress in the number of pigs born alive since 1960 or so."

The solution may be in the People's Republic of China, a nation with 300 million pigs—five times as many as the U.S.

Gianola began studying Chinese swine data in 1978.

"I found that some breeds had exceptionally large litters by U.S. standards. Working with the Illinois Pork Producers Association, he visited China last November."

"At least three breeds offer a great deal of potential in terms of litter size and age at puberty," said Gianola. "While American pigs have great pork chops, these Chinese pigs make early and have big litters. Gianola said some females have 14 to 18 more little pigs each year than U.S. sows."

But, these peculiar creatures have wrinkled faces, long floppy ears, flabby stomachs. They do not convert feed to meat as efficiently as U.S. hogs and they are not as lean at slaughter. And Gianola added, they have poorly developed hams.

"But, these things are easy to take care of," Gianola noted.
Wind Ensemble shines

Music portrayed many moods

By Phillip Milano
Student Writer

The University Wind Ensemble, in a rare, all-student performance Wednesday night in Shryock Auditorium, created a variety of moods and treated the audience in a unique way.

The finale, George Gershwin's "Rhapsody in Blue," epitomized the ensemble's ability to create moods and featured a wonderful piano solo by Clair Sellars.

Although the piece was originally written in 1924 for Paul Whiteman's 24-piece band, it is almost always performed by a full symphony. Hearing the piece in a fresh, seemingly effortless and unplanned way, because of this fresh sound, solos and accompaniments went hand in hand, as though the ensemble were on a stage. The ensemble itself emphasized with each piece, seemingly sad when it played a somber piece, and yet happy during more vibrant pieces.

The next on-campus performance by this vibrant group will be at 8 p.m. April 27.
Emotion revealed in art exhibit

By Jeff Wilkins
Staff Writer

A probing, emotional exhibition of drawings, sculpture and oil paintings, portraying some of the great men in history, is now on display at the University Museum at the north end of Palmer Hall. They represent a range of human emotion achieved through powerful brushstrokes and broad color.

The 14 works of Umberto Romano are recent gifts to the University from collector Henry Berne and the artist. Romano is regarded by many as one of the most exciting artists of the 20th Century. His works explore the intensity of life with a rare balance between intellect and emotion.

In his portrait of Lincoln in "The Great Emancipator," Romano employs heavy expressionism to cast the American president as a tragic hero. The powerful facial features created by thick, almost compulsive brushstrokes are masked by earlike droops of violent red pigment showing tragedy juxtaposed against idealism in Lincoln's era.

For his rendition of Galileo, Romano switched to a different tactic. He partially hides the inventors image in a blue confusion of abstract expressionism. The images float on the back of Galileo like wings, suggesting movement, creativity and exhilaration.

Romano's sculpting, like his painting, depends on emotional impact as well as baroque human portrayal for their success. Like Rodin, Romano represents man. He reveals an aura of mystery and human quality from the perfection of nature. The busts of Moses and Beethoven present forceful stout images extracted from chunks of lava rock without destroying the original medium. This creates a blending of natural and human qualities that heightens the impact of Romano's humanist statement.

Romano's works are displayed in the museum along with the other 14 pieces. They are shown for the exhibit, "Emotion revealed in art," until February 18, after which they will be removed to make room for other exhibits.

Romano was born in Italy in 1929 and immigrated to the U.S. at the age of nine. As a teenager, he saw many awards and honors while pursuing his studies. He was appointed head of the Romeo Art Museum for a while but his talent and focus remained in the studio. Since his first exhibition in 1938, he has presented over 64 one-man shows in the U.S., Canada and Europe and received many major awards including the Pulitzer Prize, Peabody Prize, Carnegie Award and Tiffany Foundation Medal.

Romano died at the age of 77 this past fall shortly after presenting the works to the University Museum. The exhibit will run until February 18. Museum hours are weekdays 9 a.m. to 7 p.m. and Sundays from 1:30 p.m. to 4:30 p.m.

CCHS considers program cuts in summer school curriculum

By John Schrag

Staff Writer

In an effort to cut costs, the Carbondale Community High School board is considering eliminating summer classes this year.

The board voted to hold off until after the first week of school to determine whether a student survey and input from teachers, parents and spring-semester instructors will be interested in taking part in summer school. The survey will be considered by the board at its next meeting on Feb. 17.

The District 165 administration had hoped to expand the summer school program this year but the board balked at the projected cost.

Assistant Superintendent Margaret Hollis told the board that in addition to last summer's class offerings of typing and American government, the administration was requesting that a data processing class and a repeat American history class be added. No class would be offered in summer unless 50 or more students registered for it, she said.

Although students would pay $75 for a full-credit summer course and $30 for a semester course, Hollis said the summer program, if all the suggested courses were offered, would still cost the district about $8,000.

At the board meeting, Hollis noted that District 165 teachers are paid more for teaching summer classes than teachers in some nearby districts, who are paid a flat rate or an hourly wage. As agreed in their contract, District 165 teachers receive one-sixth of their normal salary for teaching a full-credit summer school class.

Hollis said that by offering summer courses in government and history, which students are required to take before graduating, students who fail the course their senior year could graduate at the end of the summer instead of having to return to high school for an extra semester or take correspondence courses. She said that data processing was recommended because of heavy enrollment for that class during the spring and fall semesters.

Board Chairman Robert Brewer, who along with board member Arthur Black voted down the motion to approve the recommended summer curriculum, said it was his understanding that the district had decided during the last round of teacher contract negotiations to drop the summer program. Board members Barbara Bennett and Larry Young supported the motion.

Brewer said the meeting that students will be unregistered to register for next year's classes under the assumption that there will be no summer school. If a summer curriculum is approved by the board at its next meeting, he said.

The board did approve the offering of several classes and after-school in-

January Jazz is to play at CCHS

The Carbondale Community High School Jazz Band and Swing Choir will present January Jazz at 7:30 p.m. Saturday in the CCHS auditorium at 200 N. Spring St.

The Jazz Band is under the direction of CHS Band instructor William Carson. Guest performers for the evening will be the SIU-C Jazz Band which includes many alumni of CCHS

There is no admission charge.
AN OPEN HOUSE for the University Honors Program will be from 9 a.m. to 5 p.m. Friday at 512 Oakland Hall. Students, faculty and staff are invited to attend.

THE SOUTHERN Illinois Audubon Society annual dinner meeting will be at 4:30 p.m. Friday at the Carbondale Savings and Loan Building, 200 W. Elm St. Main W.D. Klimstra will give an illustration talk on "Water: A Valuable By Product of Mining." Persons interested may call 67-4043.

THE SOUTHERN Illinois Audubon Society annual eagle release to Union County refuge will be at 8 a.m. Saturday. The group will meet at 8 a.m. at the Kinsdale Shopping Center and go from there to the roadside table on Highway 46 east of Warren. Persons interested may call 67-4043.

HAPPY HOUR Prayer will be at 4:30 every Friday night in the Missouri Room. The meeting is sponsored by the Chi-Alpha Ministries.

CHI-ALPHA Ministries welcomes Gary Gregan, director of the Illinois Youth of the Assembly of God, as guest speaker at 5:30 p.m. Friday in the Missouri Room.

THE AFRICAN Student Association will meet at 6 p.m. Saturday in the Community Room. Student orientation and information will be discussed.

THE PAKISTAN Student Association will meet at 7 p.m. Friday in Room B in the Student Center. Everyone is welcome to attend.

THE BLACK Graduate Student Association will host its Spring Formal at 7:30 p.m. Saturday in the Old Main Room.

THE BLACK Affairs Council will sponsor a open house from 9 p.m. to 1 a.m. Saturday in Ballroom D of the Student Center.

THE COALITION for Change will present "Dr. StrangeLove," starring Peter Sellers at 7:30 p.m. Friday in Browne Auditorium. A $1 donation is requested.

INTER-VARSITY Christian Fellowship will meet at 7 p.m. Friday in the Mackinaw Room of the Student Center for an evening of singing, fellowship and Bible teaching. The public is invited.

TELPRO, a radio and television production club, will meet at 8 p.m. Friday in Communications 103. Elections and training sessions will be held Friday is also the last day for membership.

A PROGRAM entitled "Men's Lives" will be presented at 7 p.m. Wednesday in Davis Auditorium. A documentary film examining the pressures, competition, and loneliness of being a male will be followed by a panel of men and women sharing their reactions to the film and small discussion groups for the audience. Participation of the program noted it is not for men only.

THE DEADLINE for submitting Spring Club applications is Feb. 7. The club is a honorary society which recognizes persons for outstanding service to SUIC and the community. Freshmen and sophomores are also honored for outstanding contributions. Letters of recommendation will be accepted after the deadline.

A KIDS Only Valentine and Think Spring Workshop will be held from 9 to 11 a.m. Feb. 5 at the Carbondale Park District Community Center. 200 E. Elm. A $4 pre-registration fee for residents and a $6 registration fee for non-residents will be taken at the Park District Offices, Hickory Lodge, 515 W. Jackson. A program detailing additional information may contact the Park District at 529-417.

THE DEPARTMENT previously named Academic Computing has formally changed its title to User Services. Correspondence should now be addressed to User Services.

BRIEFS POLICY — The deadline for Campus Briefs is one week before publication. The briefs must be typewritten and must include date, time and sponsor of the event and the name and telephone number of the person submitting the item.

Deadline 12:00 noon Thurs., Feb. 10th for publication on Valentine's Day, Feb. 14th.

Volunteers earn undergrad credit

By Mary Knapfel
Student Writer

Undergraduate and graduate students can earn academic credit for volunteering their services in selected health, service, and community agencies.

Credit for Structured Volunteer Service (CSVs) is a program that enables a student to earn one or two academic credits by doing volunteer work for agencies such as the Women’s Center, Synergy, the Big Brother-Big Sister program and the Anna Mental Health Center.

Volunteers are assigned a variety of duties depending on where they choose to work. For example, a student working at the Anna Mental Health Center could visit and share activities with the mentally ill and the mentally handicapped, while working for Synergy might receive crisis calls, make referrals and do some counseling.

Students interested in participating in the CSVs must register for Social Work Community Development 256 or 416 by Friday, according to Anita Rose, director of social work.

A student registered in either of these classes will sign a contract with a local volunteer agency and submit a log once a month to the academic faculty.

The volunteer agency is required to set goals with the students, provide supervision and submit mid-term and final evaluations of the student’s work.

Tracksters ready for state foes
By George Pappas
Student Writer
With their track shoes dangling from their shoulders, the members of the women’s indoor track team are off to Normal Friday for their first meet of the season. The Salukis will face Illinois State, Eastern Illinois, Bradley and SIU Edwardsville.

Vogel said the development problems the team is experiencing are perhaps due to judgments errors in coaching.

"From the very beginning, the girls never had to be pushed," he said. "They are self-directed and push themselves. After a while, though, the coach and team became too close. A coach and team can like each other too much."

"It gets to the point where I tend not to ask for extra from them," he went on. "I need to let them off the hook. When they get hurt or sore, I start to relate to that and worry about it, and it just can’t be that way."

Vogel said he is now asking the girls to face themselves on day by day basis, which is hard for them to accept.

"No one wants to face their faults," he said. "But I think they can accept that my attitude toward them in practices has to be different. Their past on the track are going to have to come from scores in meets, not from the coach in practice."

"When athletes work this hard, there has to be a system factor," he said. "Success.

"But we need to be able to accept," Pulliam said, "I think we’re going to have a better indication of what kind of a season we’re going to have."

"The meet will offer 13 individual track and field events and two relays. Blackman feels the Salukis’ stronger events will be the sprint and the stopwatch where the newly acquired freshmen are entered. She is also looking forward to the performance of the middle-distance group, who are sophomores.

"Last year," Blackman said, "our middle-distance group was good considering they were freshmen, but new with improvement and maturity, it will make all the difference in the world."

Blackman does not expect a big show from her runners. They are young and will take a little practice, she said.

Blackman feels she has a good chance and great prospects for the next four years. "The evidence of good the team really is will be seen Friday in Normal."

Baseball, softball clinic Saturday

Coach Richard Itchh Jones and Assistant Coach Jerry Green will join forces with head softball Coach Ray Brechtleinsauer and Assistant Coaches Denise Gerlach in presenting a coaching clinic for those who work with youth baseball and softball programs. The day-long clinic will begin Saturday morning at 7:30 a.m. in Davies Gymnasium.

Instruction will be given in hitting and bat control, correcting hitting faults, developing pitchers for softball and baseball competition, and will include five demonstration games from both the Saluki baseball and softball squads.

The $15 dollar advance registration fee ($25 at the door) includes lunch and a complimentary ticket to the Saluki baseball game scheduled for March 20 with MVC rival Wichita State.

For more information or advanced registration, contact Assistant Liberal Arts Athletics Director of Continuing Education at SIU-C, at 536-7751.

carr-paced WSU to drive into Arena

By Dave Devine
Staff Writer

Think of Memphis State's Keith Lee or North Carolina's Sam Perkins or Georgetown's Pat Ewing.

Now consider Wichita State power forward Antoine Carr.

A lot of people put Carr in a class by himself, ahead of those players, and a notch below the incomparable Patrick Ewing.

Drake coach Gary Garner is one.

"Once you get by Ralph Sampson, if I had to take a second player in the country it would be Antoine Carr."

Wichita State's Gene Smithson is more known for his caution than for his sweeping statements. The professor worries about SIU-C, but even he has said that Carr will probably be the second player drafted by the National Basketball Association this year.

So it doesn't seem fair that Carr, who can outplay anybody, will be at the SIU-C Arena Saturday night. The Salukis host the Shockers at 7:35.

Saluki coach Allen Van Willie has given his stock answer when asked about Carr and the Shockers.

"All of them are tough in the Valley," said Van Willie. "If you stand around and worry about it you'll get buried."

Smithson agrees. "There are 10 clear cut favorites. This whole league is tough."

Programmed answers aside, the Salukis, 5-2 overall and 1-4 in Missouri Valley Conference play, will have their hands full trying to contain Carr and company. And Carr does have company. He missed the first six games of the season with a split fracture of his leg, but Wichita State had already jumped off to a 5-1 record.

Since he came aboard, the Shockers have continued to win. They are 13-2, and their only conference loss was a last-second 14-3 loss at league-leading Illinois State.

Carr, 6-6 and 225, has fully recovered from his injury, and has settled comfortably into the Shockers' starting five. In the nine games he has played, he has averaged 14 points and 11 rebounds per game, blocked an average of 2.6 shots to lead the MVC and taken down 5.9 rebounds a game. He is shooting 61 percent from the floor and his defensive prowess comes close to his contributions on the offensive end.

"He's a very strong person, he weights 227, and he's very mobile for that size," said Smithson. "He's a force both offensively and defensively."

"He has the ability to go outside and hit the 15-16 foot jumper," said Wichita State sports information director Kevin Weirong, adding that Carr's only weakness is that "he's not a tremendous rebounder. He's just a good one."

But anyway, the Shockers already have Xavier McDaniel, only 6-7, but the top rebounder in the MVC and the second-best in the entire conference. McDaniel is averaging 13.9 rebounds, and despite a recent shooting slump, he still scores 18.3 per game.

The Shockers pivotman is Zarco Durase, a 6-10 post center, who is averaging 6.9 rebounds, and who rounds out a side, 1-4 already have Xavier McDaniel, only 6-7, but the top rebounder in the MVC and the second-best in the entire conference. McDaniel is averaging 13.9 rebounds, and despite a recent shooting slump, he still scores 18.3 per game.

The Shockers are also the best shooting team in the Valley, hitting almost 53 percent from the floor. They have limited opponents to less than 64 percent shooting for the season.

On the back line, Wichita State has pivot guard James Gibbs, and scorer Aubrey Sherrer (14.1), a freshman All-American last year.

The MVC race is starting to get hectic. Including last night's game against Illinois State, the Shockers will play six games in 12 days. It might be make or break time for SIU-C, still reeling from a bunch of close losses.

"I think the overtime loss to New Mexico hurt us a bit psychologically," said Van Willie, "and we're trying to bounce back from that. We've played some pretty good basketball and we haven't always come out on the winning end."
Tracksters to face Nebraska

By Ken Perkins
Staff Writer

Frank Sevign doesn't believe in good track and field teams at Nebraska. Only great ones.

Lew Hartsoog hasn't had too many good years at Nebraska and field teams at SU-C. But many great ones.

The Salukis are potent. They'll run you in the wind with a star-studded lineup.

The Cornhuskers are potent. They'll run you in the wind with depth.

Hartsoog: "It's going to be tough."

Sevign: "It's going to be a battle."

Let's get this show on the road.

Snow won't decide this one, as it did last year when the Salukis were grounded at the airport.

"The Cornhuskers have been inside and out since last Jan 3 and are we, balanced. They may have lost All-Americans Randy Brooks and Joe Staub, but return track and field stars who have grown up last year. They have loads of quality people in each event and according to Sevign, that may be just enough.

"We don't have any names in the foreground, but we've got depth and balance," said Sevign. "And that's the name of the game."

The Salukis know. They've played it before. Hartsoog said they are still behind in sharpness, but will best the Big Eight contender if the "names" — as well as the non-names — have outstanding performances.

"There's no doubt about it," Hartsoog said. "They're going to be mighty tough to beat."

Sevign is going to need good things from everyone making the trip.

Neither Hartsoog or Sevign will admit the other team as the favorite. Both do agree, however, that the mile relay may decide the meet. Nebraska has run 3:33.5, well ahead of SU-C's 3:36.17.

Led by Charles Lawrence, the Cornhuskers are tough in the sprints. He has been timed at 6.47 in the 60-yard dash and 47.5 in the mile relay. He's joined by Dennis Wallace, who also runs the 1400 fast, but more importantly, has circled his split of the mile relay somewhere in the 45-second zone.

Nebraska is also strong in the middle distances with Mark Gwosdy, a 1:52 half miler and Mike Cieocha, a 1:49 comptetor in the 800-yard dash. In the field events, melodyics include Mike Erickson, a 16-6 pole vaulter; Jon McDonald a 24-0 long jumper and Wade Harrington, a 5-11 triple jumper.

"I've competed against Hartsoog before," said Sevign. "He always has a good team, one of the better ones in the country. But we're not weak in any position, I think we'll give them a run."

The Salukis will go with the "die relativies" in each event.

Mile Run Saturday

The first Big Muddy Mile, sponsored by the Big Muddy Film Festival, will be held at 10 a.m. Saturday down Illinois Ave. Advance registration is being taken at the Department of Cinema and Photography in the Communications Building until 5 p.m. Friday. The fee is $5.

Registration will also be taken Saturday from 8:30 and 9:30 a.m. The entry fee the day of the race is $5.

The mile will begin at the east end of McAndrew Stadium and proceed north along Route 51 Illinois Ave. It will end at the old Carbondale train station.

Women gymnasts look to gain victories and confidence

By Sherry Chote/All Staff Writer

Coming off their best meet performance of the season last weekend, the women gymnasts will return to Tempe, Arizona this weekend to tangle with Memphis State and Texas Woman's University Thursday and Sunday to take on the University of Illinois in a joint meet with the men's gymnastics team.

Coach Herb Vogel has rearranged his team's goals to differ considerably from those set last season.

"Before, I was concerned with getting the scores," Vogel said. "This weekend I'm concerned with winning the meets."

"We've got seven to go and I'd like to get the girls more confidence, which comes with winning. If we get through our routines, the scores will come with.

A major factor Vogel will have to contend with is the loss of freshman all-arounder Maggi Nidiffer from the starting lineup. Vogel had counted on Nidiffer to add the fifth score to his rotation, but will now have to look elsewhere for the needed depth.

"I've also been thinking about Margaret Callcott," said Vogel. "She's always been quite fast, but more importantly, has circled her split of the mile relay somewhere in the 45-second zone.

"Her instinct is a crucial factor in his team's success in the remainder of the season."

Last weekend we operated at a 50 percent efficiency level," Vogel said. "We'll do better this weekend."

Good scores on the balance beam should be no surprise for the girls. Instead, it's a surprise when they stay on the floor."

"This team is not capable of winning a national championship," Vogel said. "But the girls are good enough to quality as a team and compete at that level."

Mile Run Saturday

The first Big Muddy Mile, sponsored by the Big Muddy Film Festival, will be held at 10 a.m. Saturday down Illinois Ave. Advance registration is being taken at the Department of Cinema and Photography in the Communications Building until 5 p.m. Friday. The fee is $5.

YOUR MONEY

DON'T LET MONEY DICTATE YOUR FUTURE

Neither one of us can go to college any longer than we can bear to how much money we can earn during the summer.

Air Force ROTC offers a four years of two-year scholarships. By pay 1980 is month and all books, tuition and fees are covered. With money problems reduced, the decision to go to college is your own.

The Air Force needs dedicated citizens in a variety of service skills, and one of these skills is bound to be your particular area of service.

After graduation and commissioning, you'll find challenges waiting for you in the Air Force and you'll still be paid for your education.

Find out about the Air Force ROTC scholarship program to see if it's something you'd enjoy because you'll enjoy it, not just because you have to.

Gateway to a great way of life.
Drake ends Salukis' winning streak

By Brian Higgins
Staff Writer

With 11 seconds remaining in Thursday's Gateway Collegiate Affiliates game between Drake and SIU-C, the Bulldogs' Kay Riek stood at the foul line with the weight of the partisan arena crowd on her shoulders. But Riek had ball. Riek was all too aware that a miss would give the Salukis a rebound and a chance to win the game, not to mention stealing Drake's No. 1 seeding in the NCAA post-season tournament, with a last-second shot. She set the shot.

But there was no fairy-tale ending for the Salukis this time. Reality hit them squarely in the face as Riek could sink both shots to give the Bulldogs an 82-79 victory and end SIU-C's 11-game winning streak.

Coach Cindy Scott summarized the loss.

"We were horrendous on the boards," she said. "We were giving them three and four shots. Against a good team like Drake, that can kill you.

"If indeed there was one reason for the Salukis' downfall, it was the Bulldogs who easily won the inside battle, outrebounding Scott's squad 35-26. Drake's Wanda Ford, who was supposed to be guarding a point, grabbed a phenomenal 13 rebounds to earn game-high honors.

After posting an early 6-0 lead, the Salukis kept a slight edge over the Bulldogs until Drake's All-American candidate Lori Bauman hit a turn-around jumper to knot the score at 12. From that point it was a tug-of-war all the way to halftime, with neither team able to mount more than a three-point margin. When the teams returned for intermission, Korean was clinging to a 38-37 lead.

The second half was quite another story.

Coach Carole Baumgartner decided to see how fast her Bulldogs could run. And much to the surprise of the Salukis, Bulldogs could indeed run. Before the 12:00 mark, Drake had opened up what seemed an insurmountable 15-point lead. At that point Baumgartner's crew had pulled down 13 second-half rebounds, Scott's team only 3.

But then Connie Price, en-cumbered with four fouls, returned to the game.

If her presence didn't do much for the Salukis' rebounding, it sure did help Price's shooting. In the first 13 of her game-high 24 points down the stretch, while Peeples seemed to hit everything she fired, garnering half her career-high 16 points during the comeback.

When Char Warrington hit a bank shot and was fouled with 1:46 left, SIU-C had a chance to tie the game. But Warrington, who hit only 1-of-7 free throws, on par with her season average, missed the shot. Riek took over. Riek hit a 14-footer. Warrington answered with an inside shot to trim the lead to 79-77. Riek hit again, from the top of the key, and Connie Price's ensuing basket set up the dramatic finish. Peeples fouled Riek with 11 seconds remaining.

"I think our team feels pretty good," said Scott. "We've been strengthened by Drake in recent years. I think the outcome will be different next time we play them."

Bauman, who fouled out with 3:37 remaining, paced Drake, 11-4, with 23 points. All the Bulldogs scored in double figures, as Ford and Dawn Wumkes each converted for 14, while Riek and Karin Hayes added 12.

Warrington continued to impress her scoring of the season, hitting 17 points in the losing cause.

This is the best team we've played all year," noted Scott. whose club stands at 12-4 on the season. "I'm upset that we lost, but I'm proud of the way we fought over.

Drake's Kay Riek loses the ball to D.D. Plab, who converted a layup on route to 24 points.
