No new taxes found in Bush's '91 budget
Proposal may cut up to 20 domestic programs

WASHINGTON (UPI) — Administration budget director Richard Darman confirmed Sunday that the $1.3 trillion fiscal year 1991 budget President Bush will unveil Monday will contain no new taxes.

While the administration's spending plan will propose new user fees and other revenue raising measures, it will not break Bush's 1988 "read my lips — no new taxes" campaign pledge, Darman told NBC's "Meet the Press."

"The president has made it absolutely clear that he does not want to solve this (deficit) problem with new taxes and our budget is consistent with that," Darman said.

"We have no new taxes for a second year," he added.

Bush also added that a federal government agency in every state will be responsible for any consequence that aren't already on the books.

The budget also contains more Pentagon spending than many congressional Democrats are likely to support plus more money for education, drug and environmental programs.

Modernizing SIU-C research goal of Pettit's strategic plan

By Brian Gross
Staff writer
The strategic plan for guiding the SIU system into the 21st century would make SIU-C the third university in Illinois to obtain Carnegie Research I status.

SIU-C is a Research II university. The University of Illinois campuses at Chicago and Champaign-Urbana are the only institutions in the state with Research I status.

Both Research I and II levels, according to the Carnegie classification system, award at least 50 Ph.D. degrees each year, but Research I universities receive annually at least $33.5 million in federal support. Research II facilities receive between $11.25 million and $33.5 million in federal support.

"We probably don't have the resources to become another Champaign-Urbana," Chancellor Lawrence K. Pettit, who has coordinated the strategic plan, said.

As outlined in the plan, obtaining Research I status will be the third in a three-year plan. Pettit wants to make SIU-C a Research II university in the first year and a Research I university in the third year.

Low blood stocks cause surgery delay

By Ilario Millikin
Staff Writer
SIU-C students will have a chance to help replenish the local American Red Cross supply after a shortage in January that caused multiple surgeries in Southern Illinois to be postponed.

Vivian Ugent, regional blood drive coordinator, said a two-day campus blood drive will be 2/14 Tuesday and Wednesday.

Bush to address education in State of the Union speech

WASHINGTON (SHNS)— President Bush plans to set a decade-long challenge to make American schools the best in the world as his State of the Union message Wednesday night.

He has reached agreements with the leaders of the National Governors' Association on six broad goals and plans to discuss some of them in his speech, according to White House sources.

By the year 2000, Bush and the governors want:

• All children will start school "ready to learn."
• All school will be free of drugs and violence and offer a disciplined learning environment.
• All students will leave grades four, eight and 12 having shown the "competency over a challenging curriculum," as measured by a national test.
• U.S. students will be first in the world in science and mathematics achievement. (Now they usually rank in the bottom in comparative tests among industrialized nations.)
• The high school graduation rate will be 90 percent (compared to about 75 percent now).
• Every adult American will be literate and have the "skills necessary to succeed and adapt in a competitive global economy." (It's now estimated that more than 20 million Americans are functionally illiterate.)
• The goals are outlined in memos between Roger Porter, the White House assistant for economic and domestic policy.

Student donations vital to resupply effort

Those people donating for the first time are required to schedule a brief screening appointment. Ugent said appointments can be made in advance by phone or arranged on a walk-in basis.

Blood is drawn by registered nurses and the process takes five to seven minutes to complete, Ugent said.

Information tables will be set up in Rehn Hall, the Communication Center.
NEW ORLEANS (UPI) — Joe Montana, establishing himself as the best big-game quarterback in the history of football, ramsmacked Denver for five touchdown passes Sunday and brought the San Francisco 49ers a record-tying fourth Super Bowl trophy with a 55-10 humiliation of the Broncos.

The 55 points were the most scored by the 49ers in their 40-year NFL history. The Broncos had not allowed nine points in a game this season.

Montana’s five touchdown passes — three going to favorite target Jerry Rice — set a Super Bowl record in the most one-sided contest since the season-ending spectacu-
lar began in 1967.

Montana was named Most Valuable Player for the third time in the Super Bowl, yet another feat unmatched by any player.

San Francisco became the fourth franchise to repeat as Super Bowl champions and its fourth win equaled the mark set by the Pittsburgh dynasty of the 1970s.

The downtrodden Broncos lost in the Super Bowl for the third time in the fourth quarter overall — matching the Minnesota Vikings’ record for futility in Super Bowls.

San Francisco’s Super Bowl record point total, which eclipsed the 46 points by Chicago four years ago, came against a defense that had allowed 14.1 points per regular season.

The 49ers defense, meanwhile, gave Drewzar quarterback John Elway the longest day of his career, intercepting him twice and recovering an Elway fumble — all of which set up second-half scores.

Montana led the 49ers to touchdowns on four of their six first-half possessions to open a 27-3 lead after two periods, then took advan-

tage of Denver’s collapse to pro-
duce four more scores in the sec-

ond half.

Montana completed 22 of 29 passes for 297 yards and five touchdowns, completing the three-
game playoff series with 11 touch-
down passes and no interceptions.

He hit Rice with a 20-yard throw to start the scoring five minutes deep in the game and threw a 2-
yard touchdown pass with three seconds left in the opening period to make 14-3.

Tom Rathman ended a 69-yard march with a 1-yard touchdown run midway through the second quarter and with 34 seconds remaining in the half, Montana hit Rice with a 39-yard scoring strike.

Montana threw third-period touchdowns of 28 yards to Rice and 35 yards to John Taylor.

**Gamendia, divers lead swimmers past 11th-ranked Nebraska squad**

By Eric Busger

Staff Writer

All the hype over the Super Bowl didn’t distract from the excitement of the 63-58 victory the Saluki’s men’s swimming team scored convincingly against the Huskers.

Thirteen-ranked SIU-C needed every bit of the home pool advan-
tage to overcome the 11th-ranked Cornhuskers.

“If feels real good to go against that kind of talent and come out ahead,” swimming and diving coach Doug Ingram said. “It’s an athletic season. In every competition different people rising to the occasion to get it done. That was very encour-

agings.”

The Salukis received an out-
standing performance from senior Harri Gamendia. He conquered victories in the 200-yard butterfly (1:50.36), 200 breaststroke (2:05.37), and 200 individual med-

i le (1:51.83).

“Harri Gamendia was one heck of an athlete in sport,” Ingram said. “He swam amazing times for this point in the season.”

SIU-C also got first-place finish-

es from junior Eric Brandt in the 500 freestyle (4:36.48) and 1000 freestyle (9:30.52), and from junior Chris Gally in the 200 freestyle (1:40.71).

Brandt swam his usual double. He is solid as a rock,” Ingram said.

Gally not only won the 200 freestyle, but he placed second in the 200 backstroke splitting up first and third-place finishes of Nebraska.

The Salukis also dominated on the diving boards. Freshman Greg Tessa and senior Dave Sampson finished first and second on the 1-

meter and 3-meter diving events.

Tessa won the 1-meter and Sampson won the 3-meter.

Before the meet Ingram was cer-
tain that his swimmers would have to win at least one of the two relay events, but they prevailed even after being defeated in both.

**Women swimmers fall 78-62**

By Eric Busger

Staff Writer

Tiny mistakes cost the SIU-C women’s swimming and diving team a victory Saturday against 11th-ranked Nebraska, as the Cornhuskers took the meet 78-62.

“I was a little disappointed with some of the mistakes we made,” swimming and diving coach Doug Ingram said. “It’s our pool and we’re finding mistakes around the turns or any-

thing like that.”

The Cornhuskers, with a record of 10-3, were heavily favored to beat the 1-8 Salukis, even though SIU was in its own pool.

The advantage of being in the Recreation Center could not help the Saluki women overcome the dominance of Nebraska, as they suffered their ninth loss of the sea-

son.

While SIU lost the meet, it did get fine performances from fresh-

man Kristin Harvey, sophomores Tonia Schmidlkofer, Melissa Steinbach, and Mahari. Mahari took firsts in the 200 freestyle, Nebraska a time of 1:52.21, and 500 freestyle, with a time of 5:02.79. Mahari contributed in the success of the 400 freestyle relay team scoring a time of 3:35.74.

Tessa, a junior and diving qualifier, was a winner in 1-meter and 3-

meter diving. The win was a big accomplishment for Tessa, as she

upset two-time all-American Cornhusker Amy Aarons.

“Laine (Owen) was very consis-
tent today,” diving coach Dave Ardy said. “In order to beat big-time competitors, you have to be consistent, and Laine did a good job of that.”

A pleasant surprise for the SIU

See WOMEN, Page 15

Sophomore diver Laine Owen executes a dive at the women’s meet against Nebraska Saturday at the Recreation Center. Owen won the 1-meter and 3-meter diving events.
Romanian demonstrators, urge ouster of interim ruler

BUCHAREST, Romania (UPI) — Thousands of anti- and pro-government demonstrators faced off Sunday at National Salvation Front headquarters, where those demanding the ouster of interim President Ion Iliescu clashed with backers of the ruling transitional government. "Our Iliescu," charged demonstrators among the estimated 30,000 gathered in what was believed to be the biggest protest since the revolution that ousted dictator Nicolae Ceausescu and Dec. 22 led to his execution Dec. 25.

Terry Waite, other hostages alive, paper says

LONDON (UPI) — Seventeen Western hostages in Lebanon are alive and well, sources in the pro-Italian Hezbollah group told a British newspaper at a February 2 meeting. The story in the Sunday Storybook said six prisoners were being held in the headquarters of the British envoy Terry Waite, who disappeared three years ago last week also is alive, the newspaper said, citing Hezbollah sources.

Pope urges dialogue with Islam, other religions

BAMAKO, Mali (UPI) — Pope John Paul II, arriving for a brief visit to predominantly Muslim Mali, called Sunday for greater dialogue with both Islam and the African religions, even though it is "not always easy." The priest was greeted by about 5,000 people as he flew into Bamako-Senou International Airport from Guinea-Bissau, where he told residents of a leper colony that the centuries-old scourge of leprosy is an international stain.

Report: Soviet economic reforms 'dismal'

MOSCOW (UPI) — tic Soviet economy, battered by labor and ethnic strikes, failed to meet planned targets last year and disappointed consumer hopes, the official news agency Tass said Sunday in a dismal report card on Mikhail Gorbachev's economic reforms. Tass said inflation rose to record levels, while industrial output rose by a mere 1.7 percent, far short of the 3.5 percent target.

Quayle inspects Panamanian security squad

PANAMA CITY, Panama — Vice President Dan Quayle, on a fence-mending trip to Latin America, met Sunday with Panama's new leadership and was told a new security squad is not quite ready to keep order in the country. But Panamanian Vice President Ricardo Arias Calderon promised Quayle that the security squad would be ready to replace U.S. troops — sent to Panama in December by President Bush — in a "relatively short" time.

Priest resigns; says he was 'token gay'

MAHWAH, N.J. (UPI) — Pope's homossexual Episcopal priest who resigned his post in the Diocese of Newark this weekend said Sunday he was forced out because the bishop who ordained him wanted only a "token gay." The Rev. J. Robert Williams, who was ordained by Bishop John Spong in December, stepped down after a religion-oriented news service published his comments that "monogamy is as unnatural as celibacy."

Bandit chomps again; bites, robs 12th victim

HOMESTEAD, Fla. (UPI) — The Biting Bandit has chomped his way through robbery No. 12, baffling police who thought they had already caught their man. Since Dec. 23, the bandit has nabbed 12 young men, almost all of them Spanish-speaking migrant farm workers. Nearly all the attacks occurred within blocks of the police station in Homestead, about 20 miles southwest of Miami.

Joliet ammo plant clean-up costs termed 'a bargain'

WILMINGTON (UPI) — Ground contamination at the Joliet Army Ammunition Plant may take five years and $30 million to clean up, state Rep. Jerry Weller, R-Morris, said Sunday. "Red water," a by-product of World War II production of TNT, has polluted about 36 acres,
Comedy Cellar opens spring season with promising Southern comedian

Comedian Henley kept audience involved throughout act, joked of life in Carbondale

By Jeanne Dickler
Entertainment Editor

Comedian Vic Henley, the self-proclaimed "Opie from Hell," entertained an enthusiastic crowd with his Southern humor Friday night at the Student Center.

And if Henley's appearance is any indication of the comedians that will grace the Comedy Cellar stage this semester, SIU can look forward to a great season of laughs.

As Henley introduced himself, he informed his audience that the black eye he sported was courtesy of "Biff, Tal and Skyler," three preppy guys who beat him up in a bar last week.

"I don't like getting my a-- kicked by guys with names like that," he said.

To start off the show, Henley integrated himself with his audience by provoking his keen perception of life in Carbondale.

He is always impressed with the drive from St. Louis to Carbondale. "It's such a beautiful drive," Henley said. "Silos, barns, silos, silo, barn."

He made the observation that Carbondale is the hub of civilization.

"It was difficult to believe this was only his second trip to town. Alabama-born Henley now lives in New York City, but he hasn't shed his Southern ideas of justice.

"If there's justice in the world, it's watching a woman in a $5,000 for coat picking up dogs — on 5th Avenue," he said. "Maybe she shouldn't have gotten that Great Dane."

He hasn't shed his Southern vocabulary.

"Where I come from, the only crack we know has an adder attached to it," Henley said.

To his credit, Henley kept the audience involved throughout the one-hour act. At one point, he led the crowd in singing the educationalal songs from Saturday morning's Schoolhouse Rock.

Of course, he wasn't hurting for participants. Apparently, SIU-C students and the general audience at the show are all great fans of the Schoolhouse Rock song, "Conjunction Junction."

Although he was raised in the South, Henley has no reservations about poking fun at his fellow Southerners, especially those from Tennessee. He has a hard time doing shows in Tennessee because he can't make fun of Elvis.

"Elvis jokes in Tennessee are like Jesus jokes in Bethlehem," he said.

Henley, a graduate of Auburn (Ala.) University, has never seen the utility of mathematics.

When last seen, Henley was speeding out of town toward St. Louis in a rented Toyota. Obviously, a man who is going places — quickly.

Debaters to compete in moot court

By Eric Reyes
Staff Writer

A team of SIU's third-year law students will begin its preliminary rounds today in the National Moot Court Competition in New York City.

Third-year law students Tim Donahoe, Steve Ferlmann and team captain John Kamin will go against the country's top 27 teams. SIU's team won the regional competition in Indianapolis in November against schools from Wisconsin, Indiana, and Illinois.

They defeated a Valparaiso university team in the final round, and Ferlmann took top honors for best oral argument.

"It's a real shot in the arm to beat teams like Northwestern and Wisconsin. It reflects the college's level of education," Ferlmann said.

This was the first time SIU won the regional competition. A team of second-year students, Deanne Forina, Dan Nessler and Charles Pierce, lost in the regional's quarter-final rounds, but they won the region's best brief award.

Each year three students are selected to be on the team, Rebrose said. The team will be arguing the same case received in September.

Deadline To Apply For Student Medical Benefit Fee Refund

FRIDAY, February 2

To apply for a refund, a student must present his/her Insurance policy booklet or the schedule of benefits along with the insurance wallet I.D. card to the Student Health Program, Insurance Office, Keener Hall, Room 118. All students, including those who have applied for a Cancellation Waiver and whose fees are not yet paid, must apply for the refund before the deadline. Students 17 and under need a parent's signature.
Bush veto conveys contradictory terms

CONGRESS struck a serious blow to the cause of justice and democracy when it shot-down an effort to override a veto by President Bush of a bill that would guarantee against deportation of Chinese students.

The bill would have sheltered Chinese students in the United States while political conditions in their homeland make it difficult or dangerous for them to return. It also would have waived the two-year foreign residency requirement for the estimated 40,000 Chinese students holding student exchange visas.

CONGRESS INITIALLY had passed the legislation in the wake of the Chinese government’s crackdown on pro-democracy demonstrators last June. Bush vetoed that congressional action on Nov. 30 of last year, but the measure was returned to Congress for reconsideration. The House of Representatives passed the act, but it faltered on the Senate floor, which was largely because of last-minute, frenzied lobbying from the Bush camp.

BUSH’S RATIONALITY behind the veto, which he has labelled a “foreign policy victory,” pivots around the concern that Chinese officials would have met the expectations of bill with a cutoff of exchange programs with the United States.

Bush further maintains that the protections of the act already are covered by an executive order. He personally has promised that the students would be fully protected “irrevocably” by this executive order.

“YOU CAN rest assured that I will never allow any action that would force the return of Chinese students whose lives or liberty are at risk,” Bush said in a letter sent to senators before the vote.

This is quite a magnanimous statement from our President, to be sure, but it avoids the main issue of this ethical quandary.

BY ALLO WING Bush to veto this measure, our Congress has sent the world a message louder than the rock music aimed at Manuel Noriega ever was. We are willing to support the principles of democracy and freedom of expression which this country was founded upon—but only to a point.

We can be shocked and outraged at the treatment of those struggling to throw off the chains of tyranny and oppression in other parts of the globe, much as our forefathers were a generation ago, but unless it is advantageous to our foreign policies, we ultimately are not going to condemn it.

SEN. PAUL SIMON, D-Makanda, criticized the rejection of the bill, saying the action has “just sent the worst possible signal to the young patriots of democracy in China. It puts diplomacy above principle.” We have to agree.

Legislation would have given Chinese students studying in the United States a sense of stability and would have reassured them that their human rights, rights which should be granted to everyone, would not have been sacrificed to serve as the gears to keep the cogs of the world’s political wheel running smoothly.

CHINESE STUDENTS at SIU-C have said they believe the safety provided for them under the executive order is not to be relied upon.

“We don’t have much confidence in Bush’s order,” Xiaojing Zhang, a doctoral student in philosophy at the University said. “His credibility does not exist anymore, with the Chinese students because of the secret delegation just after the Tiananmen Square incident.”

Now if they have is the word of a leader who promises to support their cause simultaneously with conducting secret meetings with the very government which seeks to oppress them. George Bush can, at any time, and if he so chooses, revoke these students’ rights with the stroke of a pen. Wouldn’t it have been a better move to guarantee their rights in law?

Democracy doesn’t apply to Chinese

By Brian Dickinson

President Bush was rebuked and very nearly defeated by Congress last week. The House of Representatives passed the act, but it faltered on the Senate floor, which was largely because of last-minute, frenzied lobbying from the Bush camp.

The president has argued that the United States and China have to "keep in touch" to try to get along. This is true enough, but at what cost?

Last June, in sending its tanks to crush the pro-democracy demonstrators in Tiananmen Square, the hard-line Chinese leadership showed an utterly cynical contempt for the lives of their own people. As democracy was coming into bloom across socialist Europe, China's aged chieftains ruthlessly trampled on democracy in their own land. This was barbarous conduct for any government to take, and it warranted a far sternier stand than the White House chose to adopt.

On the bill that drew so much fuss last week (a measure to permit 30,000 Chinese students to stay in the United States), Congress had an additional reason to be angry with President Bush. That bill, representing a strong show of support for the students, had passed Congress in November without a single dissenting vote. In light of this unanimous support, the Bush veto seemed extraordinarily stubborn, or worse (or perhaps both).

The president survived this close call only after some tough arm-twisting on Senate Republicans. But many other Republicans, as well as every Democrat member of Congress, understood that the Bush veto was sending a deeply discouraging message to all Chinese whose sympathies had been with the students in Tiananmen Square last June.

Rep. William Brockfield of Michigan, the ranking Republican on the House Foreign Affairs Committee, pleaded the key issue as well as anyone. Of course, America should deal with the Chinese government, he said, but on our terms. "America should be returned the veto, for providing a launching pad for Chinese leadership of the future," he added, "and not for providing crutches for its tyrants of the past."

Freedom of press is power to inform, change, educate readers

Mark Barnett

Staff Writer

Every Thursday we will publish enough investigative reports, find film, book, theater or art reviews. We also will publish features on art, comedians and other entertainment newsmakers. This page will be labeled "Entertainment."

Every Friday readers may find investigative stories, features on other informative news in our "Focus" page. On this Friday we will feature a full page of photographs that tell an interesting story. We also will include a short article with this "Perspective" page.

In our task to provide readers with the news of the day, we will occasionally make errors. We cannot promise to be error-free. That is the goal to which we strive. Though an unattainable goal, it is a goal we pledge not to forget, but to keep in sight every day.

Keeping in mind our role to serve the readers, the Daily Egyptian staff will strive to report informative, interesting and thought-provoking news for our readers. Our readers are the most important aspect of our task. If we are not serving our readers well, we are not fulfilling our duty.
Congressional sources familiar with the budget — the first to reveal the budget numerically — say it also proposes eliminating about $20 billion of domestic programs. The budget includes $660 million in federal subsidies for Amtrak, the nation's passenger rail system, and the federal farm crop insurance — programs with substantial political support.

The five-pound, 1,194-page budget book also includes a colorfully worded White House memo that urges Congress to get "serious" about budget and deficit issues.

And, referring to a popular video game, Darmar warned that the count is "a Flash game that we are starting to progress on to a final arcade," and that "We're not limiting (our focus) to science and technology. That's not our intention. We want to maintain comprehensiveness at the undergraduate level. The graduate level is where we start narrowing our focus a bit."

"For funding the improvements needed to move the University up to Research Status I status may be the most difficult part of the process," Pettil said.

"It's going to be an enormous expansion," and technology is "critical," he said, "and we need to anticipate that. Pettil is making decisions on resources. It may involve reallocating money from one program to another."

Graduate students make up about 17 percent of SIU- C's current student population, but a goal of increasing the ratio to 25 percent has also been suggested as part of the plan.

"Increasing the graduate population and moving the University's research status up are not changes in degree," Pettil intends to enforce upon SIU-C, he said, but are changes already occurring on our own. "This is a natural evolution," Pettil said. "The question is how we are going to guide it."

"The strategic plan is still in the development stage," and Pettil is inviting comments and criticisms of the plan from the University community, he said. The plan will be presented to the Board of Trustees in September. "The plan should follow from what we come up with in this role," Pettil said. "The process itself is one of continual modifications. We're trying to set up a framework within which we can make our priorities."  

Pettil's plan was developed to direct SIU at a system-wide level, he said, and the plan can not be specific about goals until all colleges and constituents have had "a proper input."

"The agenda for the world in the 1990s is how we can relate politically, economically and scientifically," Pettil said. "We're going to have to decide how to position SIU best to address those questions."

Chancellor Lawrence Mullineau, board of trustees member and education professor, said the plan is a natural evolution of where we were to start narrowing our focus a bit. William Eaton, chairperson of the Educational Administration and Higher Education Department, sees no merit in proposing restrictions to objective testing in public schools.

Multiple-choice tests provide an efficient and truly objective method of assessing a student's grasp of subject matter, Eaton said. However, the tests should be supplemented with written and oral assignments to measure skills that need to be developed such as writing, comprehension and analytical ability, Eaton said. "Multiple-choice tests have not raised educational standards. We will multipurpose tests improve education," president of the College of Education, said.  

"I was taught how to write a basic paragraph and a basic theme and I have earned a living with that skill for over 30 years," Dyer, a former editor for McGraw Hill Inc. publishers in New York, said.

BUSH, from Page 1

and Arkansas Gov. Bill Clinton, who has been negotiating for Democratic governors.

Meanwhile, governors, Clinton said he had discussed with White House officials that it was "up to them to convince the 115 set of goals without specific objectives or actions in advance of the President's State of the Union Address."

Clinton has discussed to relax the memos but did say he is "optimistic that the president will have something to say in the State of the Union message about the work that will have the support of the governors."

But a White House official, who spoke on condition he be not identified, said the six broad goals have been agreed upon by the governor's council and that they are "the sub-goals" or objectives, which will be ironed out before the National Governors Association meets formally Feb. 26 to accept the national goals.

"If in 10 years we were to accomplish these goals, there would be a net change in education in America," said the official.

Still, White House officials expect criticism that the goals are not realistic or do not reflect the opinions of the governors about who's going to pay for the improvements.

"I remember this morning in the morning meeting that President Bush was discussing the need to move our schools forward," said Malory Buntin, spokeswoman for the National Governors Association.  

The administration's budget for the fiscal year beginning Oct. 1 also projects a decline in the budget deficit from $100.3 billion in 1990 to $63.1 billion next year, sources said.  

Bush's $63.1 billion deficit figure for fiscal 1991 is just below the $64 billion target required by the Gramm-Rudman balanced budget law.

Congressional sources and reports in The Washington Post and The New York Times say the deficit will be cut to $63.1 billion next year using a net increase of $7 billion in new revenues and large domestic program spending cuts.

Sources said Bush also will propose big cuts in entitlements, such as Medicare and Medicaid, and eliminating annual increases for federal and military retirement programs. But Social Security benefits will be unaffected.

The budget proposal includes more money for anti-drug, education, space, research and development and environmental programs, a big increase for Head Start, a successful pre-school program for poor children.

Bush will propose a large capital gains tax cut and continued high levels of funding for the expensive Strategic Defense Initiative and the Sealed bomber likely to be integrated into future clashes with Democrats who control Congress.

Most top Democrats oppose those programs or favor lower funding.

Bush also will propose $292 billion in Pentagon spending the next year — an increase of $33.3 billion, or about 2 percent, over 1990 levels. But Bush 292 billion figure actually represents a cut in real defense spending since it falls $6 billion short of the need to keep pace with inflation.

"The budget promulgates for a capital gains tax cut and continued high levels of funding for the expensive Strategic Defense Initiative and the Sealed bomber likely to be integrated into future clashes with Democrats who control Congress."

Most top Democrats oppose those programs or favor lower funding.

In a memo to Congress, Bush said he concurred in both the budget deficit $63.1 billion next year and in the Gramm-Rudman balanced budget law.

"It's going to be an enormous expansion," and technology is "critical," he said, "and we need to anticipate that. Pettil is making decisions on resources. It may involve reallocating money from one program to another."
As several major U.S. cities recorded their bloodiest year ever in 1989, criminologists predict a "baby boomerang effect" will drive up the national rate for violent crimes — including murder — in the 1990s.

Experts also cited drug turf wars, the increasing availability of more powerful weapons, and wider social acceptance as at least some reasons for the expected increase in homicides and all other violent crimes.

"I foresee in the 1990s a steady increase in the rate of violent crime — including homicide," said Prof. James Alan Fox, a criminologist at Northeastern University in Boston whose National Crime Analysis Program tracks homicide data around the country.

Fox believes that population changes pushing up the gains all will also aggravate other social problems by private coping death and despair to inner cities, such as teen pregnancy and drug abuse.

"All the things that got better in the 1980s because of the shrinking young population will get worse in the 90s," Fox said.

In what he labeled the "baby boomerang effect," Fox said that during the 1990s, the children of baby boomers will be reaching their teens and early 20s, swelling what criminologists say is the most violent age group.

Moreover, he said, the group will be growing up in an atmosphere saturated for its tacit acceptance of violence and murder.

"Our inhibition against taking human life erodes as we view it more frequently on television," Fox said. "It can desensitize us to homicide as a cultural taboo. It becomes less horrific to us as such as we continue viewing it."

Prof. James Fyle, a criminologist at American University in Washington, D.C., who worked as a police officer in New York City for 17 years, cited the despair of inner city youth as the engine that drives up the crime rate.

"I think you have a situation where large parts of American metropolitan areas have become crime factories," Fyle said, pointing to the "enormous number of people in crime-prone age groups living in those areas.

"Until we change the conditions that make those inner city areas crime factories, we'll continue to suffer this," he said.

The grim predictions came as several major U.S. cities marked their deadliest year ever.

In 1989, more than half a dozen cities — including Washington; Philadelphia; New Orleans; Kansas City, Mo.; Milwaukee; Charlotte, N.C.; and New Haven, Conn. — set records for the most murders in a year.

Several others, including New York, appeared likely to break records, although final figures were not yet available. The homicide rate in several other large cities, including Los Angeles, Chicago and Baltimore, were lower than the 1988 levels, but did not approach their all-time high.

Experts also said those who commit crimes were getting younger and more violent.

"The juveniles today who get into trouble with the law are three times more violent than they were 20 years ago, committing many more crimes and beginning at an earlier age," said Marvin Wolfgang, a professor of crime and law at the University of Pennsylvania's Wharton School.

Fox believes the increase in violent crime in the 1990s will be smaller than the explosion of street crime in the 1960s, when the crime rate doubled in five years and nearly tripled over a decade.

But Fox noted that guns — particularly handguns — are much more readily available, especially to youngsters, than they were 30 years ago.
School of Journalism accreditation attempt looks promising: Jaehning

Jeriann Kimmel
Staff writer

The School of Journalism at SIUC has taken the first step to fulfill its goal of gaining national accreditation, a recognition of its national status granted in 1988 by the Accrediting Council on Education in Journalism and Mass Communication (ACEJMC).

Terry Hydes, chairperson of the Site Visit Team, said the School was in a very fragile state with respect to accreditation when the team visited in November, 1988. The team judged the School not to be in compliance with four ACEJMC standards: Budget, Student Records/Advising, Internships/Work Experience and Public Service, according to Hydes' report.

"The November '88 team rec-ommended at that point for accreditation on the basis that they found certain deficiencies but deficiencies they felt could be rectified in one year," Walter Jaehning, School of Journalism director, said.

The situation has turned around since 1988. The School's progress in addressing problems has been very impressive, according to Hydes.

"Their [Jaehning and the School of Journalism faculty] work and the renewed support from higher levels of administration have resulted in the School's marginal status to a respectable accreditation program," Hydes said.

The Site Visit Team's report was reduced by the addition of two new faculty members. The School has 13 full-time faculty, the largest number the School has had in recent years.

To improve career counseling and placement, the School produced three issues of a newsletter during the Fall, 1989 semester, according to Hydes. This effort, coupled with the renewed effectiveness of the advising process, kept students informed about advising schedules, internship and scholarship opportunities, and programs for minority students, Hydes said.

Students met with 16 professionals in two sessions who visited campus during the past two semesters. Hydes said the record of student contact with professionals during the past year is impressive.

"The review noted the School's installation of a new Macintosh computing lab,

Poor coal, costly improvements cited as reasons for mine closing

By Phil Pearson
Staff Writer

More than 300 Franklin County coal miners could be out of a job in late March when Old Ben Coal Company announced last week.

Jim Spiller, spokesman for the company in Benton, said the closing of Old Ben Mine 21 near Sesser will probably spell the end of all mining operations there.

"The closing is expected to be permanent," Spiller said.

Aug. 6, the announcement vice-president of Old Ben, Bill Hake, said the mine had to be closed because of the inability to market the coal. He also said capital improvements, such as coal cleaning equipment and equipment to mine the coal, were not cost effective.

Gary Bartolotti, president of local 1124 of the United Mine Workers of America at the mine, said he believes the mine could still be productive if the company would invest in new equipment.

He said most of the machinery in the mine is four or eight years old and needs work. Closing the mine, is the company's right and Spiller said the 300 miners soon to be out of work had job understanding that, he said.

"I think we're a little disappointed that anything," Bartolotti said.

"We're sad to see the mine go down."

Bartolotti said a letter union employees received from the management said the closing would happen between March 24 and April 1.

Spiller said that though the mine once produced quality coal, the coal available is of lower quality.

Southern Illinois coal has a high sulfur content and has been affected by clean air legislation, past and pending.

Spiller said the 288 union employees and the 49 company employees were given their notice on Jan. 22. He said the time before closure of the mine was set to comply with federal law requiring a 60-day notice.

He said the company employees may be transferred to other mines if slots are available. Union employees will be laid-off, Spiller said. He said they may petition for a job at another Old Ben Mine but chances of getting one are slim due to the layoff at the other mines.

Mine Superintendent Les Grogan had no comment on the closing.

Briefs

ALPHA KAPPA PSI will have its homecoming dance at 6 tonight in the Student Center Ohio Room. For details, call Joe at 684-6043 or 566-1182.

APPLICATIONS MUST be received by the Educa. ca' Testing Service for the March 10 Test of English as a Foreign Language (TOEFL) and the Test of Spoken English (TSE) on Feb. 5. For details and registration materials, call Testing Services, Woyo Hall 8220, 536-3303.

THE MOVIE "Lifetime Contract" will be shown at 7:30 tonight and tomorrow night in the Student Center movie auditorium. Sponsored by International Communications Association.

THE SHU Science Fiction and Fantasy Society will have a FilmFest from 6-11:30 tonight in the Student Center Great Room. Admission is free. Films include: "Day of the Triffids," "Return of the Lizards," "Tomatoes," and "Swamp Thing II."

THE CANOE and Kayak club will meet at 7:30 tonight at Pallium pool. New members welcome. Be prepared to swim.

BLACK GRADUATE Student Association will meet at 5 p.m. Thursday in the Student Center Missouri Room. For details, call Kim at 457-4825.

THE WORKSHOP "American Culture and Custom" presented by International Programs and Services will be 3:30-4:30 p.m. today in the Student Center Illinois Room. This workshop will help students to learn more about the United States.

FRESMEN IN the College of Liberal Arts may now make advisement appointments for Summer and Fall 1990, in Forser Hall, room 1129.

THE BLACK Fire Dancers will have a mini-show and interest meeting from 7 to 8 p.m. Monday in Student Center Ballroom A. For details, call Donna at 539-4442.

BRIEFS POLICY -- The deadline for Campus Briefs is noon two days before publication. The brief should be typed or handwritten, must include time, date, place and sponsor of the event and the name and number of the person submitting the item. Briefs should be delivered or mailed to the Daily Egyptian Newsroom, Communications Building, Room 1247. A brief will be published once and only as space allows.
Entertainers to be convenience-sellers in '90s

St. Louis Post-Dispatch

Pat Steuer is a St. Louis merchant who likes his phone calls.
When people don't have time to leave the office, they phone Steuer.
Steuer brings the garage to them.
For $29.95, Steuer and his pals will show up at your office, clean
cilters and wrenches ready to
give your car a maintenance check and tune-up.
He'll even drive to your work-
place and service your car in the parking lot.
Steuer's company, Home Auto Service Inc., maintains cars. But
his main product is time.
"Other places can probably be
cheaper, but no one is more conve-
nient," he says.
If business forecasters are cor-
correct, convenience-sellers like
Steuer would be the wave of the
1990s.
One in three Americans is a buy-
ner, hoarder, and the average is
sliding into their 40s and 50s.
They'll be reaching their peak
earning years.

At the same time, the Leave-it-
to-Beaver family, will continue its
dowm fade into cultural history.
Moe Jane Cleavers will be joining
With him at the office. The Beaver,
Meanwhile, is headed for the
neighborhood after-school care
center while Wally will line his
pockets with a part-time job
flipping hamburgers.
What does all this mean for peo-
ple in business? They'll have more
and more middle-class families with
more money and less time.
"There will be demand for any-
body who can take some hassle out
of your life," said Julie Niemann, a
financial analyst for Saltd Niculau
brokerage in St. Louis.
Enter Home Auto Service, posi-
tively joined by day-care centers,
convenience restaurants and maid
services on the list of growth
benefts for the 1990s. Forecasters
see these other growth opportuni-
ties for small entrepreneurs on the
horizon:
- Computers, especially in soft-
ware. There will be room for

designers of small software with
a knack for filling corporate needs
in niches left untouched by the big
boys of the computer business.
- Small manufacturing. Big
companies are more and more
"sourcing out" supplies, creating
opportunities for more flexible
firms that can quickly shift their
production to meet the big-
companies' needs and provide just-in-
time delivery of inventory.
- Business services. After the
1987 recession, American compa-
ies have more money. That may
mean more opportunities in the
1990s for accounting firms, public
relations consultants and the like.
- Health care. The population
will get sicker as it gets older.
There will be more demand for
medical supplies and technology
and home health care services.
- Environmental services.
Cleaning up the environment and
handling waste will become
growth businesses as government
officials tighten controls on indus-
try.

Specialization in department stores predicted

Scipps Howard News Service

The era of the retail department store is dying, say some industry
observers, and the future belongs to the Wal-
MarKs and K-marts — and special-
ity shop chains, like The Limited.
But the bankruptcy woes of
Federated Stores Inc. are unrelated to the generally health-
perform-
ance of that company's depart-
ment stores, but they symbolize the state of the retailing
industry today.
Can the traditional department store survive in an increasingly
segmented consumer market?
"There is no big yes," said George Roseman, an industry
analyst for Leo Shapiro & Associates, a retail industry
research firm.
But Roseman sees department
stores surviving:
"They will no longer be a cata-
logue of everything," he said.
"They will be designed for quicker
shopping and increasingly they will
be landlords of specialty retail-
cers they bring within the depart-
ment store walls.
Department stores are doing sev-
eral things to make themselves
more valuable and competitive,
Roseman said:
- They are attempting to rein-
roduce service in a superior way,
he said, citing the Seattle-based
Nordstrom chain, famed for ca-
tering to the customers.
- They are attempting to make it
easier and faster for their cus-
tomers to shop, dividing them-
sehles into specialty shops.
- They are trading diversity and
comprehensiveness for deeper
selection in certain departments.
Roseman cites the example of
Sears separating its furniture
departments from the main stores
and developing its specialty:
Brand Central appliance and elec-
tronic areas more fully.
"In 1990 you can be a depart-
ment store without having every
department," he said.
"One of the trends of the '90s
will be department stores justifying
each square foot of space they use
and taking the position, "If we're
not getting an adequate return,
there are tenants we can bring in
who can bring us a better return.
There will be more business for
entrepreneurs and technology
and home health care services.
- Environmental services.
Cleaning up the environment and
handling waste will become
growth businesses as government
officials tighten controls on indus-
try.
- Financial services. People with
gray hair make financial planners
smile. People in their 40s switch
from saving to spending. And
despite today's dismal scene on
Wall Street, say brokers are bet-
ing that they'll turn to the stock
and bond markets to build their
retirement funds.
- Leisure activity. The two-
income couple can pay for their
play. That could mean more busi-
ness for hotels and resort industries.
The would-be entrepreneur
with big dreams and only a moder-
ate hoard of cash can still find ways
to participate. "It doesn't cost much
to start a travel agency," notes
Leyton Broughton, director of
entrepreneurial services at the
Entrepreneur Young accounting firm.

Forecasters also note a few busi-
nesses to stay out of:
The next few years won't be a
time to break into the home build-
ing market. The nation will pro-
duce fewer new households as it
ages, and that trend could well
mean a declining market for new

houses. About 1.09 million house-
holds are expected to be formed
every year in the next decade, down
from 1.22 million in the 1980s.
At the same time, demographic
trends portend lean times for dis-
cos, ski resorts and businesses that
cater to the little and youthful.

Robert Brockhaus, director of
trepreneurial studies at St. Louis
University, has three words of
advice for small businessmen
in the 1990s: Head for Europe.

Fruit harvest
no answer to
saving forest

St. Louis Post-Dispatch

A new discovery by researchers
at the Missouri Botanical Garden
casts doubt on a commonly held
notion about how tropical forests
might be saved.
Researchers, Alwyn H. Gentry
and Rodolfo Vasquez, found that
fruit harvesting may be the key to
forest development. In a study of fruit
market trends in Peru, they found that
workers in the area were cutting trees to
get the fruit when it is in demand.
"It's easier to cut the trees down
than it is to climb them," a country
said in an interview in St. Louis.
"When they get that harvest
nestled, it's hard for them to
want another crop.

Gentry is in Brazil at a confer-
ence on the fate of tropical forests.
He said new emphasis must be put
on helping farmers to develop
fruit harvest, a practice that probably
is occurring throughout the tropics.
Such destructive harvesting is "a
serious and previously overlooked
problem that must be overcome if
markets for new fruit species are to
be developed," the scientists wrote
in their report for the conference.

Ostrich burgers wave of the future for health conscious Americans

Minneapolis-St. Paul Star Tribune

BREEZY POINT, Minn. (SINS) — Joe Doty was looking hard a couple of years ago for a way to diversify the fur business near Popout Lakes, Minn. He looked down and the prospect of getting into hogs and cattle only conjured images for him of a lot of money and work for very little gain.

The answer finally hit on surprise, in the shape of a bird. Doty had become such a bird he did not want to see. Doty and his wife, Sheri, had scheduled a seminar to tell at least 60 other interested farmers how to raise ostriches. The newest livestock on Doty's Edgeward Farm produces tender, low-calorie red meat that reportedly tastes like beef but has less fat and less cholesterol than chicken or turkey.

If the Dotys and at least 60 other farmers can have their way, Americans eventually may dine on ostrich burgers, or perhaps order a Big Bird and file at the drive-up window. The Dotys took delivery of 14 ostriches last spring to become one of the four farms in the world producing birds for human consumption. Although the Minnesota farmers to raise, 8-foot, 400-pound birds from Africa. Since then they've acquired two more, one, from an egg. Joe Doty, 47, also runs a con- tracting and real estate business. He said he got the idea for ostrich farming from a magazine ad. He visited some ostrich ranches and eventually concluded that raising the birds would be simple and surprisingly lucrative.

Flame, a three-year-old mustang, poses in his corral with his owner Donna Mann. Mann said Flame curls his lip as a way to claim his territory.

Flame by tying him where he couldn't get free and putting the saddle on him. Sand bags were added to get him used to weights. She said. Eventually, she was able to get in and out of the saddle, she said.

Roger Stanczak, a carpenter, said he got interested in the program when he was looking for a topic for a class- assigned persuasive speech. He said the inspiration to speak about the adoption program came when he saw a "blur" about it in Horse Illustrated magazine.

Stanczak said in researching his topic, he called many people across the country who were concerned about overpopulation of the grazing areas.

"In seven weeks, I was on his back," she said. "I think that's kind of quick.

Mann said she saddle-trained the hill stands Mann's Indian tepee, which she calls "a symbol of freedom." Mann, a part-time employee at the Marion Veterans Administration Hospital, said the first phase of the adoption program several years ago while living in Cleveland, Ohio. About 12 years ago she moved to Southern Illinois because her grandmother was from Cireavia and her parents had retired to Marion. She then had her chance to adopt, she said.

Mann said she and her husband Paul chose Flame out of the 100 or so available for adoption at the Goreville, Illinois, building because he was the tamest of the bunch.

She attributes the calm nature of Flame to the fact he had spent a year in a holding facility.

"He was just a baby when he was captured," Mann said.

"That's the first person to attempt to halter break Flame, he had been around people's feet before.

"He was just a baby when he was captured," Mann said. "That's the first person to attempt to halter break Flame, he had been around people before.

Many of the holding facilities, Andrews said, are in the west and many of the horses are handled by prisoners before adoption.

Andrews said people interested in adopting a mustang must meet requirements, such as having no history of animal cruelty and having the facilities to care for a horse.

"He's not available to adoption at this point since he has not been tamed and put up for adoption at the facility. She said.

"He's not available to adoption at this point since he has not been tamed and put up for adoption at the facility.

Women's basketball escapes pesky Wheat Shockers in OT

By Greg Scott
Staff Writer

The Salukis women barely escaped the Shockers in Wichita State Saturday. Allison Smith converted a 19-foot shot with 0.2 seconds remaining in overtime to give the Salukis a 68-67 victory Saturday at Levitt Arena.

"I think we're finding out something about us," Saluki coach Cindy Scott said. "She's a clutch performer. She plays much better when the game is on the line."

The victory improved the Saluki mark to 6-3 in the Gateway Conference and 11-8 overall. Wichita State fell to 2-7 in conference play.

Arena Dec. 15 to face the 6-0 Salukis and walked away with a 75-72 victory. The Salukis were up by four points with less than two minutes to play before handing the game to the Billikens.

The Salukis, 16-4, take a game off of the conference schedule to play the Billikens (12-5 overall, 7-2 at home) as they prepare for what head coach Rich Herrin described as the toughest 10 games of the year.

"We're just taking them one at a time," Herrin said. "St. Louis University is a very good basketball team. It is important that we win every battlegame. This is the toughest 10 we get coming up."

Senior guard Freddie McSwain said his team is looking to win every game to compensate for the conference battle, although this game has a sentimental value to him.

"We're going in there and we're going to play hard," McSwain said. "We really need the victory."

Salukis travel to St. Louis to avenge Billikens' 75-72 last-minute victory

By Kevin Simpson
Staff Writer

The Salukis will get a chance to avenge their final loss of the 1988-89 season and their first loss of this season when they face St. Louis University tonight at the Kemper Auditorium. The Salukis put an end to the Salukis' campaign last year by downing them 87-54 in the first round of the National Invitation Tournament. St. Louis came to the

Minnesota routs No. 15 Hoosiers

MINNEAPOLIS (AP) - Willie Burton fired in 22 points and five other Gophers had double figures, lifting Minnesota to a 108-89 upset of No. 15 Indiana in the Big Ten action Sunday. It was Minnesota's first victory over the Hoosiers since a 1982 win in Bloomington, Ind. Indiana had beaten the Gophers 15 straight times since then.

The Gophers, 5-3 in the conference and 14-4 overall, also got 17 points from Walter Bond and 16 from Jim Shinkenski. The Gophers are unbeaten in 11 home games this season.

Cardinal ace to appear at True Value

St. Louis Cardinals star relief pitcher Todd Worrell will attend an autograph session from 1-3 p.m. Saturday, Feb. 13 at True Value Hardware in the Mundale Shopping Center.

Worrell is entering his fifth year as a Cardinal. His record last year was three wins and five losses with 20 saves. His earned run average was 2.96.

Worrell appeared in the 1988 All-Star Game and received the Rookie of the Year Award in 1987. All St. Louis Cardinal baseball fans are encouraged to attend the autograph session.

Join us for an informative discussion on date rape Tuesday, January 30, 7:00 p.m. - 9:00 p.m. Illinois Rm. Student Center
Sophomore swimmer Jeff Williams swims butterfly at a time of 2:00.09 in the 200 yard event, which was the first-place finish of the team in the 100 breaststroke.

Harvey freshman Leanne Mann won with a time of 1:09.38, a mere .08 of a second ahead of freshman Leanne Mann of Nebraska. "The performance of Kristin Harvey in the 100 breaststroke was probably the biggest surprise of the meet," Ingram said. "She had mono in the fall and has been coming around slowly but surely, and all of a sudden she's a great athlete today."

"All in all we have a lot of work to do for the conference meet, but I think having to face teams like this can't do anything but make us get better and force us to a higher level," the Salukis will compete Feb. 24 at the Recreation Center in the Saluki Invitational. "This meet will give us an opportunity to see our personnel across the board in the events and make some evaluations," Ingram said.

SURGE, from Page 16

scoring on its next seven possessions while outscoring the Sycamores 12-0.

Junior forward Rick Shipley put the Dawgs back in front 48-47 with an offensive rebound and stickback with 6:41 remaining.

The Dawgs' guard Jimmy Jones made the Dawgs back in front 48-47 with a 100-foot bomb with 6:41 left.

The Dawgs' defense was tough in the second half, (28 percent in the second half) turned the stretch before Mahan's layup as time expired concluded the scoring.

The Sycamores tallied the ball and was intentionally fouled by Indiana State's Ron Cheatham, Mahan converted one of two to give the Dawgs a two point lead. Mahan drew the Sycamores' defense to him and kicked the ball back out to a wide open McSwain. McSwain buried a three-pointer and the Dawgs were on a roll. McSwain made a steal on Indiana State's next possession and was fouled on a drive to the basket. McSwain made both free throws to close the run and it was all over but the shouting.

McSwain finished with a game-high 23 points — 12-14 from the line — and six rebounds, Mahan finished with 11 points and three steals. The Salukis forced 13 turnovers as compared to committing eight of their own in the contest.

Sycamore head coach Tates Locke said the defensive pressure was too much to handle. "I thought they really played well defensively," Locke said. "That's the worst we've handled any pressure so far this year. The actual press didn't bother us as much as their good man-to-man defense.

Although the Salukis couldn't find their shooting touch against the zone for the second half, (38 percent in the second half) they made up for scoring 11 straight points from the line — 11 of 13 — down the stretch before Mahan's layup 

The Salukis connected on 22 of 56 shots (39 percent) for the game and 20 of 29 free throws (69 percent). Indiana State hit 19 of 45 shots (42 percent) and 8 of 13 charity tosses (61 percent).

The Salukis pulled down 39 rebounds — 18 offensive — in decisively controlling the boards. Indiana State managed only 29.

Senior center Jerry Jones pulled down 12 rebounds for the Salukis to go with his 10 points. Locke said the Salukis' dominance on the boards (Jones in particular) turned the game in their favor.

"When he (Jones) came back in the game, the board play just turned around," Locke said. "They just killed us on the boards. That's where the game was won. You can talk about all those other things we want but they won the game on the boards."
