Student Workers Receive 5-Cent-An-Hour Pay Hike

Retroactive To July 1

August 15 paychecks to student workers will reflect a blanket pay scale raise of five cents. This will bring beginning pay to 85 cents an hour.

The increase, retroactive to July 1, brings the top-scale pay to \$1.30, according to Frank Adams, Director of the Student Work Office.

Adams said the increase, which is designed to go along with increased cost of education, will cost approximately \$50,000 a year. About 3,000 students are expected to be on the work program payroll next fall.

Although this is the first blanket raise since 1957, Adams said the students who work and go to school have not been without other increases in that time.

In 1960, students drawing top of the scale pay, got a

Summer Graduates!! The Deadline Nears

The Office of the Registrar announced today July 19 is the deadline to apply for graduation in the August 9 exercises.

The procedure for candidates starts with picking up a form at the office of the Registrar. The form must be returned to the same office and a fee of \$17 paid.

Candidates then go to the University Bookstore where they are fitted for caps and gowns.

Required Tests Listed By Center

The office of testing and counseling has announced a series of testing for the remainder of July.

On July 19, the undergraduate English qualifying test will be given from 9-12 at Muckelroy Auditorium. The theme portion of the test will only be given at this time.

On Saturday, July 20, the test for the Ph. D. in Education will be given from 8 a.m. till 3 p.m. in Morris Library.

The ACT Test will be offered on July 27 at Furr Auditorium. Testing will be from 8-12. The ACT Test is designed primarily for entering students. Applications for this test may be secured at the Testing Center.

10 cent an hour increase from \$1.15 to \$1.25. Also at that time, five cent an hour raises were automatically given to students after the first and third terms.

Previously, the automatic nicker increase had come at the end of each academic year.

Whatever merit raises students may get from their supervisors will be in addition to the new blanket raise, Adams said.

In a brief resume of the philosophy of the student work program at Southern, Adams said the jobs with pay are available to students who must work part time to keep themselves in school.

He said the scale offered is designed to make it possible to complete a higher education even for students with no outside assistance at all.

Southern is one of the leading universities of the nation in making maximum use of student workers in both educational and financial aid programs.

Former IAA Head To Speak Here

O.D. Brissenden, retired assistant to the president of the Illinois Agriculture Association, will be the featured speaker for the annual information meeting of Prairie Farms creamery at Carbondale, said dairy farmers from the southern 15 counties served by the statewide dairy cooperative are expected for the meeting.

The sessions will begin at 11:30 a.m. with a free lunch for patrons in Muckelroy Auditorium. The afternoon program will feature Brissenden's address on "As I Saw Russia," F.A. Gourley, Springfield, manager of the statewide cooperative, and Rushing will report on activities of the dairy plants.

Two nominees for the board of directors will be selected for election at the cooperative's annual statewide meeting in Springfield next month.

Car Rules Set For Fall

Students who attempt to register cars when the fall term opens in September will be confronted with a new--and more stringent--set of regulations.

The student must have his student identification, vehicle registration, housing authorization card (approval of student housing from the housing office), fee statement card, and proof that the car is covered by liability insurance.

The car must be owned by the student or a member of his immediate family is another rule which will go into effect. This means that automobile dealer plates will not be accepted.

There is also a new section in the rules and regulations concerning motor bikes.

A student is allowed to have a motor vehicle as long as it has less than 5 taxable horsepower.

This means that anything over the limit is subject to the same rules and regulations that allow a student to have a car. This allows motor bikes and scooters.

They still have to be registered, however, at the parking section and decals will be issued for them but any student can have one.

Decals are to be changed again for next year. They are to be lettered again with the initial on each telling its use. The same colors apply again next year.

The colors are blue, red, silver and yellow, with yellow indicating a car is to be parked in a specific location when not in use.

QUEEN - Nancy Seibert, senior in speech correction from Belleville, gets acquainted with a reluctant porker at the SIU Swine Center, following her selection as St. Clair County Pork Queen. She'll make public appearances to promote the use of pork.

Wednesday At 7:

Extrasensory Perception Discussed By Plan A

Dr. William Simmons, a research associate at Anna State Hospital, will lead a discussion at Plan "A" on Wednesday July 17, at 7 p.m. Extrasensory Perception will be the topic of discussion.

"Simmons, who has a wide interest in ESP, will be joining the SIU psychology department this fall," commented Claude Coleman, director of Plan "A".

Simmons comes from the University of Nevada and will join the psychology department at SIU as a lecturer.

Wednesday's discussion of ESP is open to the public at the Plan "A" house.

Plan "A" students are reminded that this week's discussion is being held on Wednesday instead of the regular meeting day, Tuesday.

Texas Editor Named Winner Of 1963 Lovejoy Journalism Award

GRAFTON, ILL.,--A Texas editor who suffered repeated physical and verbal attacks and had his newspaper office burned because of his stand to maintain the right of free discussion in his community was awarded the Elijah Parish Lovejoy Award for courage in journalism Sunday.

W. Penn Jones, editor of the weekly Midlothian Mirror, received the award at the opening session of the International Conference of Weekly Newspaper Editors at Pere Marquette State Park. The award is given annually at the Conference to an editor who has displayed outstanding courage in public service.

Weekly editors from throughout the nation are attending the week-long Confer-

ence which will conclude Friday.

Howard R. Long, secretary of the International Conference and chairman of the Southern Illinois University Department of Journalism, in presenting the award, cited Jones "for his example of civic responsibility and community leadership through the columns of his newspaper."

Jones' conflict with a group of persons in Midlothian began about a year ago as he protested when a John Birch Society organizer was asked to talk to a high school assembly in his community. Jones claimed this was a captive audience and political controversies should not be discussed if only one side is presented.

When Jones went to the high school and asked that someone also be allowed to present the liberal point of view to the high school students, he was physically assaulted and beaten by the high school principal.

An irate citizen then came to Jones' office to assault him. A few days later, a bomb was thrown into the newspaper office at night, causing a fire and \$7,000 damage.

Local critics challenged the Americanism of Jones, who ironically is a retired colonel in the Texas National Guard and who had a fine record as a combat officer during the war.

Jones has a long record of

Science Foundation Team To Visit Pine Hill Station

A National Science Foundation team will visit SIU's Pine Hills Field Station July 23-24.

Headed by M. Dale Arvey, special assistant in the NSF Biological and Medical Sciences Division, the three-man study group is visiting selected field stations throughout the nation.

Arvey said their tour includes visits to representative stations of various types, including desert stations, lake and stream stations and those concerned with high altitude biology.

John Parsons, Pine Hills chief, said the SIU station

apparently was chosen because it has no equivalent in the entire mid-Mississippi valley. Station landform ranges from wet swamp through hill prairie to dry ridges, with a great variety of animal and plant life.

Two major projects with NSF backing are underway at Pine Hills. Monte Lloyd, a zoologist from the University of California, Los Angeles, and Henry S. Dybas of the Chicago Natural History Museum are engaged in a three-year study of 13-year and 17-year cicadas. Their work is supported by a \$47,400 NSF grant.

A two-year study of the effects of moisture conditions on plant life is headed by SIU Botanist William C. Ashby and financed by an \$18,900 NSF grant.

Arvey said Parsons and directors of other field stations visited will be invited to a later meeting in Washington, D.C., to discuss results of the survey.

TEAM EFFORT - Spring Valley sent its entire debate team to the communications workshop this summer. Shown here at a reception are (front, left to right) Sandra Guerrini, Mary Nauyalis and Tony Mautino. And (back, left to right)

Jack Bussa, Bill Elmendorf, coach of the debate team from Spring Valley, Marlan Nelson, workshops coordinator for SIU, director of the speech workshop, Bill Estrin, Gary Strell, David Dockus and Raymond Dey, Dean of the Summer School.

From Spring Valley:

Impressive Block In Workshop Formed By Eight Debaters

Spring Valley students don't hold a voting majority in the speech section of the high school communications workshop now underway on campus—but they do form an impressive block.

The eight, all members of Hall High School's debate team, make up one-fourth of all the students in the section.

It is the first time that a school has sent its entire debate squad to the workshop.

Bill Elmendorf, the school's debate coach, explained it this way:

"Being a rural area we have little time for practice. We're limited to a small amount of time after school and on Sat-

urdays when we can get our group together.

"Furthermore, we have little practical experience to draw upon as debating was established at Hall High School only three years ago."

"We are sure, however, that the workshop can give them the help that they need," he said, "help that will enable Hall to have an effective, winning debate team."

Elmendorf went on to tell about his team:

"I've got quite a variety here. Several of the debaters are valuable athletes and all eight of them are student organization officers. In fact, one of them, Tony Mautino, was class president for three years and has just been elected to a fourth term. I certainly feel that I have reason to be proud of these students."

Hall High School decided to send the students to the workshop after one of the debaters, Sue Cattani, returned home from last year's workshop with highly-favorable

reports.

Miss Cattani persuaded the others to give it a try. She was aided by Elmendorf and Principal Virgil Bingman, an SIU graduate.

Franklin To Help Train Staff To Aid Unemployed

Richard Franklin, director of the Community Development Institute, will serve as consultant to train a staff that will tackle the unemployment problem among young people in the Chicago area.

The Chicago Boys Clubs, the Chicago Young Centers and the Y.M.C.A. of Chicago, concerned particularly with high school dropouts, is sponsoring a program called "Job Opportunities Through Better Skills". They will attempt to alleviate the situation by enrolling approximately 1,000 young people in a basic education, on-the-job training program.

Franklin will be at Williams Bay, Wis., Sept. 2-7 and Sept. 16-21, at which 35 teachers and 50 counselors will be trained for the program.

There is a need for counselors, at least 21 years old, with a degree or college training. Persons interested can contact the SIU Placement Service, Franklin said.

Industrial Ed Research Course Starts Today

An intensive two-week course on research will begin in the Industrial Education Department Tuesday, the third in a series of "New Developments" courses offered this summer.

Instructor will be Rupert N. Evans, associate dean of administration of the University of Illinois College of Education. Area teachers and others interested in attending should contact the SIU Industrial Education Department for further information.

The fourth and final course in the series, "Power Mechanics," will begin July 30. Scheduled to teach is Pat Atteberry, chairman of industrial arts at Washington State College.

Rosmersholm To Open, St. Louis Trip Saturday

The Southern Players are making final preparations for their fourth production of the summer, "Rosmersholm," which opens at 8 p.m. Wednesday at the Playhouse.

Written by Ibsen, the play will continue each night through Sunday.

Shakespeare's "Henry V" is the feature of Summer Playhouse at 8:30 tonight on WSIU-TV.

Other activities this week include Wednesday Korner at 10 a.m. Wednesday at Bowyer Hall Classroom, Thompson Point—a tour of the University Museum; an outdoor movie at McAndrew Stadium at 9 p.m. Wednesday; and the weekly square dance at the Boat Dock at 7:30 p.m. Thursday.

This Saturday's St. Louis excursion is a visit to the Muni Opera and the production of "The Unsinkable Molly Brown." Tickets are \$4, which includes transportation and opera fare. The bus leaves at 4 p.m. from University Center.

Sunday's Saluki Safari will feature a trip to Cave-in-

Rock State Park. The bus leaves at 1:30 p.m. Sunday from University Center.

Students must sign up at the Activities Development Center by noon Friday for both trips.

WSIU-FM's Day Features Dvorak

Dvorak will be the featured composer on WSIU-FM radio today. Dvorak's "Serenade in D Minor, Op. 44" will be played on Concert Hall. His "Symphony No. 4 in G Major, Op. 88" will be aired on Starlight Concert.

Other highlights of the day include:

9:15 a.m. Morning Melodies

10:30 a.m. Pop Concert

1 p.m. Keyboard Rhapsody

2 p.m. Concert Hall

4:30 p.m. In the Spotlight

July 23:

Opera Students Will Present Recital In Hot Springs

A program of selections will be presented at the sixth annual Summer Opera Workshop at Hot Springs, Ark., at 8 p.m. July 23.

The workshop is under the direction of Marjorie Lawrence, former Metropolitan Opera star who is professor of music at SIU.

She conducts the workshop at Harmony Hills Ranch at Hot Springs, and the program Tuesday will be presented in the Crystal Ballroom of the Arlington Hotel. Participants in the workshop include students from Southern Illinois University as well as other colleges and universities in the United States.

The program will feature selections from "Samson and Delilah," "The Marriage of Figaro," "Cosi Fan Tutti," "Tosca," "Gianni Schicchi," "Madame Butterfly," "La Boheme," "La Favorita," "La Fille du Regiment," "Die Fledermaus," "Cavalleria Rusticana," "Macbeth," "Romeo et Juliette," "Faust," "I Vespri Si-

ciliani," "Otello," and "Tannhauser."

Ruth Adele Batts is assistant director; Daniel McEvilly, accompanist; and Joe McHaney, stage manager.

Performers will include Zella Falcone, Steve Nichols, Marilyn Walker, Philip Falcone, Judy Sablotny, Ann Fischer, Joe McHaney, Janet Proctor, Sharon Huebner, Ruth Adele Batts, Deanna Stevenson, Gary Varnadore, Douglas Horner, Victor Dorris, Aviva Halaban, Kay Gnau, Bambi Mosley, Kay Bracken, Dora Jane Ledgerwood, Fred James and Angela Confer.

200-Bushel Corn

Is July Speech Topic

Joseph Vavra, professor of plant industries, will speak to agronomists and managers from Illinois and Iowa July 23-24 at a meeting of Farm Services, Inc. which will be held in Bloomington.

His topic will be "How to Produce 200-bushel Corn: Why and When."

Associated Press News Roundup:

Khrushchev Is Enthusiastic As Test Ban Talks Begin

MOSCOW

Go Now — Pay Later

Joking and bubbling with enthusiasm, Soviet Premier Khrushchev launched the Kremlin talks on a nuclear test ban agreement in a 3 1/2-hour conference Monday with special U.S. and British envoys. He jovially suggested signing the agreement right away.

Red China, whose feud with Khrushchev has reached the point of a split, took angry note of the talks. A Peking broadcast charged that the negotiations were based on what it called the "utter hypocrisy" of President Kennedy's "strategy for peace."

By entering the talks with U.S. Undersecretary of State W. Averell Harriman and Britain's Lord Hailsham, the Kremlin ignored Peking's latest claims that Communists cannot negotiate with "U.S. imperialism."

The Kremlin's negotiations with the Western Allies are centered on a limited agreement banning tests in the air, space and under water. Both the Communist and Western sides expressed optimism.

Harriman has said he expected the conference to last about 10 days.

At the Kremlin's request, the United States and Britain have agreed that the conference should be carried on

Bruce Shanks In Buffalo Evening News

in secret.

The mood of optimism in which the talks began was in sharp contrast to the Kremlin's troubles with the

Chinese, who accused the Russians of buttering up to the West at the expense of the revolutionary Communist movement throughout the world.

WASHINGTON

The House passed and sent to the Senate Monday a bill to authorize Army engineers to credit local interests against their required payments for water supply for work done by them on the Rend Lake, Ill. water project.

The House Public Works Committee, in a report on the bill, said it believes the provision for credit for work done leading to accomplishment of the project prior to entry of the federal government into the actual construction phase is reasonable.

Rep. Kenneth J. Gray, D-Ill., sponsor of the bill, said it would speed up completion of the project by at least two years.

TOYKO

Red China Monday declared President Kennedy has launched an intensive arms drive and that his calls for a nuclear test ban treaty are "utter hypocrisy."

Nuclear test ban negotia-

tions in Moscow are part of Kennedy's "strategy of peace" that he wages while feverishly continuing to stockpile atomic weapons, Chinese broadcast said.

JACKSON, Miss.

Circuit Judge Leon Hendrick agreed to hear a motion for a mental examination for Byron de la Beckwith Thursday.

Beckwith is under indictment for the ambush murder of Negro leader Medgar Evers last month.

Beckwith, 42, a Greenwood fertilizer salesman, was indicted by the Hinds County grand jury.

WEATHER

Today's weather forecast for Southern Illinois calls for variable cloudiness and a slow warming trend. Scattered showers or thundershowers are expected late tonight. High today is expected to be from 88 to 94 degrees.

Federal Grand Jury Indicts 4 Arrested As Spies For Reds

WASHINGTON

A federal grand jury indicted four persons Monday on charges of conspiring to

spy on the United States by giving Russia information on U.S. rocket launching sites, atomic weapons, shipments and other military secrets.

The indictment also charges that Soviet military intelligence officials, involved in the 6-year conspiracy, tried to get military personnel and employes to work as agents for the Russians, Atty. Gen. Robert F. Kennedy said.

Conviction on the espionage charge could carry a death penalty.

The two couples named as defendants in the indictment returned this afternoon by a grand jury in Brooklyn, N.Y., were arrested by the FBI July 2 in dramatic raids on apartments on Long Island and in Washington, D.C.

They are Ivan Dmitrievich Igorov, 41, a U.N. secretariat personnel officer and his wife, Aleksandra Ivanona Egorova, 39, and another couple whose real names have not been divulged, if known, but who have been passing as Robert K. Baltch and Joy Ann Baltch. Those names really belong to a priest in Amsterdam, N.Y., and a housewife in Norwalk, Conn., who were unaware of the defendants using their names, the FBI said.

Picnickers Victims Of Food Poisoning

ST. LOUIS, Mo.

Several hundred persons suffered from food poisoning Sunday after a church supper in suburban Creve Coeur and four of those felled remained hospitalized Monday.

Physicians warned that more poisonings could occur Monday when parishioners ate the food they bought to take home from the St. Monica Roman Catholic Church dinner.

About 1,950 persons attended the chicken dinner.

The Rev. John Maguire, assistant pastor, said initial investigation showed that the potato salad was the cause.

The Dull Clang Of Bars Closing:

First SIU Class Visits Marion Federal Prison

That dull and final clang of steel bars closing—the sound of maximum security—was heard for the first time by SIU classes.

They were on the first tour by classes of the new federal prison south of Marion. The new, highly specialized institution is designed to hold 700 federal prisoners.

Warden John T. Willingham said it will probably be "well into 1964" before the institution is ready for the population for which it is designed.

Excavation work has been started for the security fencing that will surround the penitentiary buildings; the double fence will be 12 feet high with a six-foot cross member, and the two fences will be 20 feet apart and equipped with alarm devices to the communications room and control room.

Mercury-vapor lights will illuminate the entire fence area, which constitutes the last of a final series of barriers and control devices complete with listening devices, closed-circuit television, and other electronic and mechanical devices designed to handle maximum-security inmates.

The SIU students on the tour were members of the corrections courses offered by the Crime and Corrections Center.

The classes are taught by Myrl E. Alexander, director of the center, and Benjamin Frank, assistant director.

Prior to coming to SIU in 1961 to set up the center, Alexander was assistant director of the Federal Bureau of Prisons, and Frank was chief of research and statistics of the bureau. For a number of years, Frank headed the vocational and academic program in the bureau.

The tour for the two classes lasted about four hours and included dinner and discussions with Warden Willingham and members of his staff.

The warden explained the bureau's function which includes custody, rehabilitation and finally, research into the causes of delinquent behavior.

"That's where SIU comes in," the warden said.

Alexander said a location near a university was one specification in determining the location of the new federal institution. He explained that current practice in corrections work is based on present knowledge, but behavioral sciences are behind physical sciences.

Alexander drew this comparison: 'We know better how to put a man into space, than how to handle a youngster who steals a car. "We need more research and information; this is why Marion (penitentiary) is located close to SIU," he said.

He stressed the "team" philosophy of a correctional institute, "an extremely complex type of organization".

Alexander said the correctional officers (guards) are basic in the organization, and psychological, psychiatric, socialworkers, and other persons are, in effect, "resource people" of the institution. In addition, there are the services such as food, laundry, shoe repair, and others vital to the operation.

Within the institution are facilities for an educational program. The design is based on an estimate that about 30 per cent of the institution's population will be taking formal educational training. These will range from illiterates, through the high school level, and into correspondence courses.

Frank said there are no details yet on any college program at the Marion institution; this will depend upon the type of population transferred to it, and an analysis of needs.

Warden Willingham expects few first-time prisoners at

Marion. Some of the factors involved in classifying an inmate as "maximum security", he said, include the potential risk, danger, and assaultive or escape tendencies. An institution such as Marion can provide closer custody than other institutions, he explained.

In addition to the physical features of the institution, the control system involves procedures such as more frequent counts, a visiting-room facility in which physical contact is impossible and conversation is carried by microphone, and around the perimeter, six guard towers where anyone approaching the double fence from either inside or outside can be observed and challenged electronically.

Maximum security is not now in effect at Marion. The inmates there at present are transfers from minimum-security facilities and they are working on completion of the new institution.

Warden Willingham said the completed cost of Marion will be about \$11,000,000, and staff at the outset will be over 200, and the operational budget will be about 2 1/4 million dollars annually.

The entire facility is located on a 941-acre reservation; when the fence is completed, only the administration building, utility building and warehouse, and water tower will be outside the fence.

The bars start where the administration building is

BARLESS BARS - This is the new horizontal look in prison bars; they also serve as jalousie windows at the new Marion prison.

joined by corridor to the main part of the institution; the fence will go over the roof of this corridor near this point.

The absence of traditional vertical bars on the windows is deceptive; the bars are there, but they are horizontal and have the appearance of jalousie windows, which they are.

Members of Warden Willingham's staff who conducted the tour and participated in the discussion were:

Michael Kolinchak, associate warden for business management, in charge of all business and fiscal functions as well as food service operations. Robert T. Garey, associate warden for custody, who is in charge of the correc-

tional force, custodial operations, construction and mechanical divisions and routine institutional operations.

Melvin Tennon, chief of classification and parole, who is in charge of developing institutional programs for the inmates, family and community contacts, developing release programs, maintaining liaison with probation officers and the courts, and also handles all record office functions.

Capt. Howard K. Welch, head of the correctional service.

Captain Welch is in charge of all custodial and security aspects of the institution and is responsible for development and making the most efficient use of all correctional personnel.

SIGNING IN - SIU students visiting Marion penitentiary sign in, and later sign out at the same line for comparison of signatures. In the center background are Warden J.T. Willingham and Myrl E. Alexander, director of the SIU Crime and Correction Center.

CELL BLOCKS - SIU students touring the new federal penitentiary at Marion are shown here seeing one of the cell-blocks. A number of remote control and electronic devices were shown.

Federal Aid: To Be Or Not To Be

In a recent report, twenty-six universities and colleges, comprising a national cross-section, have concluded that federal aid to their institutions has been highly beneficial on the whole, despite problems it created.

In the study, released last week, they suggested that the Government expand the scope of its support beyond the limited, science-based programs whose educational merits are officially almost incidental to the research.

Many institutions asked if it would not be wiser for the Government to recognize that "the strengthening of higher education is itself a pressing, perhaps, the pressing, national need that justifies the government-campus relationship."

The study was financed by the Carnegie Foundation for the Advancement of Teaching.

The institutions said they were aware of danger to their academic freedom from the federal funds, which now total 1.76 billion dollars a year.

But the consensus was that the advantages far outweigh the disadvantages.

The study reported that 28 federal agencies supplied funds to the 26 institutions in the 1959-60 period covered by the three-year study. Today 42 agencies support education programs.

The study made some criticisms. It pointed out that "alongside research support, other federal programs in higher education appear as drops in the bucket."

The government has justified its aid to higher education as support of narrow fields that are of immediate national interest, such as research in health, basic science and defense.

In schools of public health, for example, federal support goes to 60 per cent of graduate students and 25 per cent of the undergraduates. In medical schools, the Government funds account for 41 per cent of the basic operations and research efforts.

The pattern of science sup-

port has created serious imbalances within the national university community.

For example, the top 100 institutions in the country, only five per cent of the total number, receive roughly 90 per cent of federal funds for port has created serious im-research, fellowships, construction of facilities, education and training. The remaining 1900 schools are virtually untouched.

Taking part in the study were Harvard, Notre Dame, Michigan, Stanford, Chicago, Texas, Cornell, Princeton, Penn State, Indiana, Syracuse, Tulane, Iowa State, Union, Wyoming and Louisville Universities; the University of California campuses at Los Angeles, Berkeley, San Diego and Davis; California and Massachusetts Institutes of Technology, Newark College of Engineering, Arkansas State Tech College and Lawrence and Catawba colleges.

Brazilian Businessmen Faced With Inflationary Problems

Eighth in a Series of Articles by Dr. A. W. Bork, Director of Southern's Latin American Institute who presently is in Brazil on the Latin American Cooperative Acquisitions Project of the International Seminars on Latin American Research Library Materials.

promise to pay. By 1960, the cruzeiro was worth 60 to the U.S. dollar, if memory doesn't fail, and by 1961 in August, 250 to the dollar. Presently the official exchange rate maintained by the government is 600 to the dollar, but a man in the street with a dollar bill can get 25 per cent more, or 800 cruzeiros.

Salvador, Bahia, Brazil

What happens in a situation where inflation of the monetary unit takes place as it has in Brazil? The universal thermometer for registering the drop in the value of a currency is through foreign exchange. The cruzeiro was set up as equivalent to five cents U.S. currency, and there were thus twenty to the dollar. The Brazilian government was not able, however, to get enough foreign exchange (dollars, pounds, etc.) to pay for industrialization (heavy machinery, wholly or partially manufactured goods, and the like), because most of the country's exports, especially coffee, brought much lower prices on world markets after the Korean War than previous to it.

Then too, came the determination of Juscelino Kubitschek to move the national capital inland, an unrealized dream dating back to the 1820's. The capital, Brasilia, costs money, and more money, much more than could be collected through taxes. To pay the contractors, the transportation companies and the government employees, the only alternative was to print more currency; in other words, the government's

THE WORLD of JACK JUVENAL

Radio bin

A few days ago, in Times Square, New York, a litter bin spoke to a woman. The bin angrily exclaimed: "Madam!" just as the woman threw a chewing gum wrapper on the pavement. Guiltily she stopped, blushed, and stared at the metal container.

"I'm lively Louie," it said chattily. "I'd like to be of use."

Passers by clustered around the talking bin. "Is there a midget inside?" one asked. He lifted the lid to look for himself.

Inside was a two-way radio device. At the other end of the wires, two floors above the street, and keeping his eye on litterbugs, was an employee of the city's Department of Sanitation.

This event could only have happened in New York, of course, or, at least, it would have ended differently had it happened in Dublin.

The guy with the microphone would have used it only once, which would have been often enough to have him stoned to death, or at least bodily dumped in his own litter bin.

People in glass bathrooms . . .

I learn from the Daily Telegraph that a £178,000 house in Dallas, which has door chimes that play "When the Saints Go Marching In," and a six-car garage in the grounds has become "Exhibit No. 1" in an involved tax case.

Martin Mayrath, who built the house, is trying to convince the Internal Revenue Service that a quarter of the cost should be considered as a tax deduction.

Mr. Mayrath, who owns a construction firm, asserted in a tax court at Fort Worth, Texas, that he built the house as a research project and to demonstrate his ideas about the use of concrete, glass and plastics in home construction.

The bathrooms in the house have glass walls and there are many other novel features. Unimpressed by the architectural innovations the Internal Revenue Service is insisting that Mr. Mayrath and his former wife pay about £29,000 in back taxes.

This just goes to show people how silly the Revenue Service really is. Who could imagine a person building a bathroom with glass walls unless the whole thing was an experiment!

Green grass and bad teeth

BRITAIN, as seen by the correspondent of an American newspaper recently: "The grass is greener here than at home . . . Tweedy old ladies ride bicycles. London has the best air-traffic control system in the world, but once you check-out into the airport no one knows how to get you out. Juvenile delinquents are called Fiddy boys. They wear long hair and watch chains down to the knees. Little English boys are handsome, but most adults have bad teeth . . ."

Theology a la mode

MR. KHRUSCHEV in a recent speech complained that capitalist newspapers were saying he was nearly finished. But he was not and he still had much to achieve on earth which is important, he observed, "because we Communists do not believe in a eternal life." He hoped "with the help of God" to confound the dismal prophecies of the capitalists!

Penny fares?

A converted bus is to be used at Belfast to overcome a

problem at a central point in the city where Orange Lodge processions assemble.

The corporation had estimated that it would cost £50,000 to build new lavatories in the area. Then city surveyor, Mr. J. E. F. Anderson suggested the idea of converting one of the disused corporation buses. The cost now is £830.

Mr. Anderson said yesterday: "In the past we have used waste ground to erect temporary facilities, but most of these sites are disappearing as city redevelopment takes place."

The bus, being completely mobile, can be driven to any spot such as race meetings or sporting events."

That's all very well, too, but if the Orangemen see the enemy coming, many of them won't be able to wait for a bus!

A pleasure!

LETTER from a reader quoted in the Telegraph: "We enclose an obituary of Mr. — as we feel sure that your readers would like to hear of his recent sudden death."

Letter To The Editor:

Library Needs More Holdings

I would like to thank Mr. Welge for his letter in the July 9th Egyptian. As a grad. student I and my friends have felt the inconvenience of short library hours.

But I have been embarrassed by our library over more important things. Several visiting professors and alumni from other schools are shocked by the lack of books,

periodicals, and archives at SIU. A typical comment is—"it's beautiful, but woefully inadequate for a school of this size."

Students, and professors—let's use the "needle" to keep this sad situation before the administration's eyes until remedied.

John L. Orr

SIU's Cornell Runs The Mile In 4.00.8

Places Fourth In Toronto Track Meet

Bill Cornell finished fourth in the mile race at Toronto, Canada, Saturday night. Jim Dupree, former SIU athlete, also competed at Toronto and placed second in the half-mile event.

Cornell once again came close to breaking the four-minute mile with a 4:00.8 time. It was the first time in several weeks that he had competed. The time is considered excellent for an athlete who has spent most of his time the past year on the half-mile race.

Last spring he ran the half-mile event for Lew Hartzog's SIU Salukis in dual meets in order to pick up necessary points to win.

In 1962, however, Cornell specialized in the mile and finished second in the NCAA with a 4:00.5 clocking. Dyrrol Burleson won the race that year.

Cary Weisiger won the mile race at Toronto with a 3:58.8 time. He is a Marine and has been competing in the various meets this spring. It was his first victory in the mile against such competitors as

Jim Beatty, Jim Grelle and Tom O'Hara.

Barry Sugden, sophomore at Ohio University of the Mid-American Conference, upset Dupree in the half-mile race.

Dupree's loss was completely unexpected. He will be representing the U.S. later this month in the half-mile race against Russia and also against several other European countries.

Dupree's trip to Europe this summer marks the second time in as many years. Last year he went abroad and competed in New Zealand, England, France, Denmark and several others. He returned with the title of U.S. "top half-miler."

He did not represent SIU last spring because an activities committee ruled him ineligible. He would have been eligible for competition in any Midwestern states conference but not at SIU.

Cornell has one more year of eligibility left at SIU. He came to SIU in the spring of 1961 and has been running for the Salukis ever since. He is one of two British

BILL CORNELL

JIM DUPREE

millers who represent the Salukis. Brian Turner is the other Britisher who runs track and cross-country for SIU.

Both athletes are running this summer to prepare for the cross-country season which will open in September.

Beazley Leaves For Tanganyika

Ronald Beazley, professor of forestry, left Sunday for Rome, Italy and Tanganyika, Africa, to continue work as a team leader in a research program on economic development of forests in Tanganyika.

The forest economics study is being made jointly for the government of Tanganyika and the United Nations Food and Agriculture Organization.

Beazley expects to return to Carbondale about mid-September.

Pete Winton Will Wind Up Football Career This Fall

Pete Winton will be winding up his SIU football career this fall when he figures to be a member of the Salukis defensive secondary which will try and break the pass interception record it set last year.

"I am looking forward to playing in the defensive secondary again this fall because we have taken pride in it," Winton said.

Last fall Winton teamed with Harry Bobbitt and the defensive linebackers to set the record. The same group returns and should cause opponents plenty of trouble if they put the ball in the air.

Winton came to SIU in 1959 from Williamstown, Mass. where he was a standout athlete.

He played freshman football here that year under Herb Fairfield, who since has moved to Miami University of Ohio. Winton played quarterback and halfback that year.

Intensive English Course Draws 32

Thirty-two students from foreign lands are taking an intensive summer course in English language.

Most plan to enroll in American universities this fall and must have sufficient facility in English to keep up with their fellow students.

Modern teaching aids are employed in the experimental, non-credit course which sees the students work four hours a day, five days a week for eight weeks to improve their English comprehension. It's a crash program, and Robert Jacobs, coordinator of international programs at Southern, says it is working.

Students enrolled are from Mexico, El Salvador, Panama, Venezuela, Iraq, Syria, Nyasaland, Spain, Vietnam, Thailand, Laos, Formosa, Korea and Japan. Each must be able to take lecture notes, read texts and write examinations, all in the English language, if they are to benefit from an American education.

He was red-shirted two years ago by Carmen Piccone in order to gain more experience. Then last year he moved into SIU's defensive unit which kept the Salukis in many games.

He believes this fall's SIU football team will be better than what some people think.

"We will have as good a chance to win as the other team when we step on the field," he said. "We should be able to hold our own in most games and will win our share of the games."

"We have some fine sophomores who should help us this year," he continued, "but you never know how they will react under the game pressure."

"Our line will not be as heavy next fall as in recent years but it will be much quicker than in previous years," he added.

Last fall Winton carried the ball only eight times for the Salukis and gained 28 yards for a 3.5 per carry average. He also caught two passes for 20 yards and also scored three touchdowns.

This fall he hopes to play

PETE WINTON

more offense than any previous year.

"Even though I would like to play a little more offense," he said. "The defense is something which we can take pride in and I like to be a part of it."

Winton is a physical education major and an English minor. He plans to enter law school after graduation from SIU in June of 1964.

He hopes to enter law school at Columbia University.

But at the present time he is a resident fellow at Abbott Hall and is preparing for next fall's football season.

Whol Workshop

Be Annual

At SIU

may assume an increas-
 e in the field of alcohol
 ion as a result of a
 g here by the advisory
 of the division of alco-
 l, Illinois Department of
 l Health.

A. Renzaglia, director
 SIU Rehabilitation Insti-
 and a member of
 ard, said other members
 "very favorably im-
 ed" with a workshop in
 l education underway at
 ern.

ie opinion was expressed
 uch a workshop should
 e an annual event,"
 glia said, "and that SIU
 l increase its work in
 ld of alcohol education."

workshop, conducted by
 Richardson of the health
 ion department, was de-
 l primarily to acquaint
 rs and school ad-
 rators with problems of
 olism. The state division
 oholism cooperated with
 niversity in sponsoring

ing except through the courts.
 This editorial was written
 while Lovejoy was editing a
 newspaper in St. Louis before
 moving to Alton.

Long asked that the editors
 "carry on in the tradition of
 Lovejoy, standing up to the
 fact that the constitution gives
 you the right to publish with-
 out interference."

"The time of the greatest
 popularity of the American
 press was during the Ameri-
 can Revolution," Long said,
 "and those editors were in
 conflict with authority and
 vested interests." This should
 be a lesson to today's editors,
 he said, that they should be
 "more concerned with the
 needs of people and identify
 with issues that affect the
 everyday lives of their
 readers."

Other nominees for the
 Lovejoy Award this year were
 E. A. Donnelly of the Central
 Oregonian, Prineville; Roy
 Lee Lucas of the Canton (N.C.)
 Enterprise; Rod Arkell of the
 Alachua County Free Press,
 High Springs, Fla.; and Lind-
 sey Williams of the Rittman
 (Ohio) Press.

Donnelly, who was deceased
 at the time of his nomination,
 received a posthumous cita-
 tion from the SIU Department
 of Journalism.

Editors attending the Con-
 ference throughout the week
 will hear lectures and dis-
 cussions relating to problems
 in publishing weekly news-
 papers. They will also take an
 outing on the Mississippi Belle
 riverboat and attend the Muni-
 cipal Opera in St. Louis on
 Tuesday.

Liam Bergin, editor of The
 Nationalist at Carlow, Ireland,
 will deliver the annual Sigma
 Delta Chi lecture at a special
 session Thursday night. At
 that time, the winner of the
 "Golden Quill" editorial
 writing award will also be
 announced.

Economics Education

Workshop Scheduled

An Economic Education
 Workshop will be taught here
 from August 12 to 23.

The tentative theme will be
 government in our economy,
 and the place and function
 of government in our econ-
 omic system.

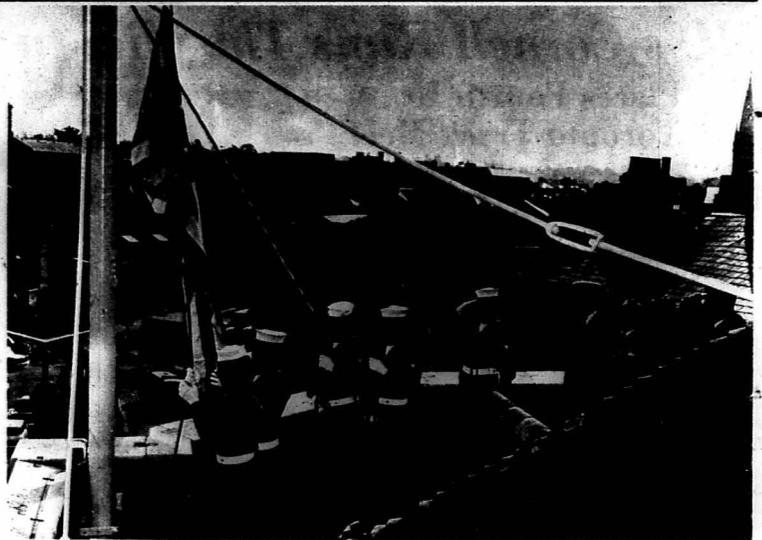

Thomas Martinsek of the
 Department of Economics and
 Thomas Curtis will serve as
 coordinators.

Graduate or undergraduate
 credit will be given for this
 Workshop. Students may reg-
 ister for either Secondary Edu-
 cation 490-4 or Economics
 490-4.

OLD GLORY OVER ENGLAND - For the third year in a row, a U.S. Navy color guard raised an American flag over the townhall in Maidstone, England. H.R. Pratt Booman, publisher of the

Kent Messenger, Maidstone, England, started the 'tradition' after visiting SIU. He flew here last month for a similar ceremony when the British Union Jack was raised on the Old Main flag pole in honor of the Queen's birthday.
