Board to sue county for withheld tax

By Debbie Drew
Student Writer

The Board of Education of Carbondale Elementary School District 95 has decided to file suit against the Jackson County Board of Supervisors to recover $11,872. The sum was withheld from the district’s 1973 taxes to pay for the county’s tax collection costs. The board voted Thursday to hire the law firm Twomey and Hines to represent District 95 in its suit against the county board and to assure that the Jackson County treasurer gives the district its tax payments at the beginning of each month as Illinois law directs.

At the Feb. 19 board meeting Lawrence Martin, superintendent of District 95, told the school board that the county board had withheld $11,872 from the district’s taxes of the revenue year 1973, payable in 1974. He urged the school board to file suit.

According to the Illinois Constitution, counties are prohibited from withholding tax revenues from tax-supported agencies to pay county tax collection costs.

The board delayed action on a proposal to create a sick leave bank for certified teachers. According to business manager Artie Smith, each teacher would give two days of his allotted 15 sick leave days to the bank, which would only be used for emergency sick leave days. The board sent the proposal back to committee for revision.

Smith told the board that he disregarded the proposal as it was not in its present form. “The sick leave bank is a rip-off for taxpayers,” he said. “The way it’s set up now, teachers could stay out every Friday and still get full pay.”

Currently, the Board of Education is under a rule that prohibits use of district school gymnasiums on Sundays, voting to allow Carbondale Park District to use the school gymnasiums on March 27 and April 3 to conduct a basketball tournament.

Wallace: Farming is bright spot in economy

By Bob Springer
Daily Egyptian Staff Writer

Alabama Gov. George Wallace called farming the “brightest spot” in the economy in an appeal to middle class voters at Williamson County Airport near Marion Friday.

In a 15-minute talk to about 125 persons in the airport lobby, Wallace emphatically defended his physical ability to be president and quipped, “Some of the people running the government today are paralyzed in the head.”

Wallace again blamed his district’s depressed condition on the tie Tuesday’s Florida primary on media claims that his paralysis, a result of a 1972 assassination attempt, has left him physically unable to withstand the rigors of the presidency. That claim is not true, Wallace charged.

At the airport, Wallace took potshots at the size of the growing federal bureaucracy, Congress’s inability to solve the nation’s problems, and the weak Ford administrative defense posture and foreign oil cartel.

“I’m taking up were I left off in 1972,” Wallace said, referring to the assassination attempt.

Wallace said that one out of five Florida voters polled did not vote for him because they wanted to but feared news claims that he was not physically up to it.

Claiming middle class Americans have suffered the most from the recession and spiralling inflation, Wallace said government, especially Congress, created the current economic plight. He criticized the embargo on wheat sales to Russia — regressive income tax riddled with loopholes and programs designed to make the middle class pay for everything.

Wallace said he supported “close to 100 percent” price parity to farmers and added, “Food is a good bargaining agent with foreign nations as long as the farmer is not hurt in the domestic negotiations.”

Discarding the Ford’s propaganda of the embargo on grain sales to the Soviet Union, Wallace said farmers and the middle class have not sought to “do away to countries that spital in our face.”

Cornelia, the Alabama governor’s wife, is traveling with Wallace as he searches for Illinois votes before Tuesday’s primary.

As what news persons traveling with Wallace called a less hectic schedule than the other candidates, Wallace has been averaging four stops per day in his effort to capture delegates for the Democratic Nomination Convention in New York City this summer.

Walls flew into Marion at 4:40 p.m. and left by 5:20 p.m. for the Marion Holiday Inn, where he will spend the night. He was scheduled to speak at a 7:30 p.m. rally at John A. Logan College. College in Carterville, where, Wallace said he may give an address in the auditorium.

The University has “less than a 50-50 chance” of winning the case, Huffman said, because the hearing examiner is basing his ruling on a Supreme Court decision “without interpretation.”

However, Huffman said the House of Representatives has passed and sent to the Senate committee legislation that would give university catalogs second class mailing rights. About a dozen universities nationwide have been forced to reclassify catalogs and similar publications because of the action of the Postal Service.

Huffman of Representatives has recognized the problem the universities face as a result of the Postal Service’s new and present position,” Huffman said.

SIU mail service decision expected soon

By Ray Urchel
Daily Egyptian Staff Writer

SIU expects to receive a hearing officer’s decision within a month on whether the U.S. Postal Service can reclassify University catalogs as first class mail. John W. Huffman, SIU legal counsel, said Thursday.

Mailing costs could increase $15,000 annually if the reclassification is approved, Huffman said. A hearing was held in St. Louis three weeks ago on the Postal Service’s proposed classification change. Last November the Postal Service sent SIU a notification of intent to reclassify University catalogs from second class to first class.

The Postal Service contends that a 1904 U.S. Supreme Court ruling defined periodicals as “scholarly” publications, Huffman said. He contends that the law “will fit with a reasonable interpretation” of a periodical. Huffman said that a periodical is a publication that is published on a regular basis.

A government witness admitted during the hearing, in response to questions filed by SIU, that the University has had second class mailing privileges since 1907, Huffman said. He also noted that the Postal Service has extended SIU’s second class mailing rights since the reclassification notice was filed with the University.

The University has “less than a 50-50 chance” of winning the case, Huffman said, because the hearing examiner is basing his ruling on the Supreme Court decision “without interpretation.”

However, Huffman said the House of Representatives has passed and sent to a Senate committee legislation that would give university catalogs second class mailing rights. About a dozen universities nationwide have been forced to reclassify catalogs and similar publications because of the action of the Postal Service.

Huffman of Representatives has recognized the problem the universities face as a result of the Postal Service’s new and present position,” Huffman said.
City sidewalks may be renovated for wheelchair users

By Curt Womack

Student Writer

"Well-bodied people often develop negative attitudes about wheelchair passengers as they pass the streets to get around," says Jane Taylor, social planner with Carbondale's Department of Public Welfare.

Some said the handicapped travelers often have no alternatives with the present sidewalk situation," she said. Taylor said there has been some discussion of other city departments and civic groups in a way to use sidewalk improvements. Some suggested the the development would be a major step toward development of a

Council to view revised jail contract with county

By Tom Chesser

Daily Egyptian Staff Writer

A revised contract between Carbondale and the City Council awaits the approval of the jail contract with county. The jail contract with county in the City Council Council meets in formal session every week. The county contract ballot for the project or the City Council.

In other business the council is scheduled to consider action on the University of Illinois Community Hospital's parking lot. The City Council will meet at 7 p.m. at the council chambers in the University City Municipal Complex.

Carbondale Cable TV awaits approval of new station

The Southern Video Corporation, operator of Carbondale's cable television system, is awaiting Federal Communications Commission approval to add KETC-TV, Channel 9 from St. Louis, to its selection of stations.

KETC, an educational station, will replace WDXR of Paducah which recently stopped broadcasting, according to Bill Zeh, program director for Cablevision.

Zeh isn't sure when the FCC will approve the new channel, which has been known to take some time, he said.

Charles Lynch, chairman of the SIU radio-television department, said: "I don't believe it (KETC) will have an advers effect on the WSUI experience."

Lebanese president refuses to resign

BEIRUT, Lebanon (AP)—The Lebanese armed forces command, unable to muscle a defiant Christian president out of power by ultimatum, demanded Friday that parliament unseat him legally. President Bisharat Franjieh, barred by a constitutional order and fought a "war" with the coup leader, Brigadier Adib, a Moslem, refused.

Abdel, commander of the Beirut garrison, took over the state radio Thursday and demanded Franjieh's resignation within 24 hours as a solution to the Lebanon-Moslem civil war that has killed 12,000 dead. Franjieh refused. His supporters took over a small radio station in the Christian heartland and called for Franjieh to reject the coup. Security in Beirut deteriorated as the presidential standoff developed and a seven-week cease-fire was endangered.

Gunmen from a dozen private armies took over the streets, setting up hundreds of roadblocks in areas they control. Fighting broke out in the downtown business district and the presidential palace asFranjieh spoke to his supporters.

More than 50 medical personnel and journalists jammed into an operating room at the Moslem Institute of Transplantation of Organs and Tissues for the demonstration on the six-week-old calf. The animal was anesthetized and tightly bound to an ordinary operating table. The calf was to be unhooked from the heart and permitted to die later in the day, as was the case with another calf the Soviets used Thursday to show the Americans how they implant Soviet-made artificial hearts.

U.S. Soviets unite for heart transplant

WASHINGTON (AP)—The controversial Concorde super sonic passenger plane will be sold by federal authorities to the Kennedy Airport if it shows up next week as announced, the head of the Federal Aviation Administration said Friday. The statement by Administrator John L. McLucas put the federal agency, which operates the nation's air traffic control system, in a possible direct confrontation with the operators of Kennedy Airport.

Those operators, the Port Authority of New York-New Jersey, announced Thursday that they were barring the Concorde from landing at Kennedy for six months while it is made over at the plane's operators' expense.

In New York City, meanwhile, Gov. Hugh Carey said he felt the Port Authority decision was "an omission of a state agency that was created and sanctioned by the Congress."
**New explosion leaves 11 more dead in mine**

**By Ray Urchel**

Daily Egyptian Staff Writer

The SIU Board of Trustees is not considering filing a law suit against the Illinois Board of Higher Education (IBHE) in order to keep tuition retention allowances at present levels, said Iran A. Elliott Jr., chairman of the board.

Several SIU-C administrators had raised questions about the legality of IBHE's proposed $791,000 reduction in the amount of tuition retention monies, which are used to repay bond agreements made in the construction of University dormitories and the Student Center.

Sam Renjel, director of University Housing, has said housing rates would have to be increased by $20 per year if the IBHE recommendations are accepted.

**Tight security**

Secret Service agents surround Alabama Gov. George Wallace at Williamson County Airport as he leaves for the Holiday Inn in Marion, where he spent the night. Wallace spoke at John A. Logan Community College Friday night. (Staff photo by Bob Ringham)

**Elliot says trustees will not sue IBHE**

By Ray Urchel

Daily Egyptian Staff Writer

Brown said that SIU has "to assess the consequences" of the fall semester upon them. He is concerned about students and design the appropriation bill "so we won't lose money, we think we can." He said frequently appropriation bills are put in at one end and it comes out at a different way at the other end.

Brown said that SIU would probably recommend that the $791,000 for the tuition retention allowances in the Illinois Higher Education Revenue Funds, but no definite decision has been made.

"The BHE knows that money is going to be tight," Elliott said, adding that he believes the SIU would have to be made to force decisions to be made.

Elliott, said he was not surprised although he said he was unhappy about the higher education proposals made to Gov. Daniel Walker to the legislature several weeks ago.

**Plans under way for open-air market**

By Tom Chesser

Daily Egyptian Staff Writer

Plans are under way for an open-air market in Carbondale to allow area fruit and vegetable growers to sell their produce directly to consumers.

The Illinois South Project (ISP), a non-profit organization created to help solve economic problems in Central and Southern Illinois, is helping to organize the proposed market. The group helped start a similar farmers' market in Herrin.

Representatives from ISP submitted their plan to the Carbondale City Council Monday requesting the use of a metered parking lot free of charge on the day the market will be held.

Speaking for the council, Mayor Neal Eckert told Rosamond Z. Ostendorf of ISP that she could let the growers know the council supports the proposed market so that the growers can plan what and how much to plant.

Ostendorf said a meeting of growers interested in the market is planned for next week. The council must decide on a location, methods for collecting garbage and sales tax and answer liability questions before approving the plan.

ISP suggested that either the metered city parking lot east of the train station on Washington Street or the unmetered private lot on Illinois Avenue be used at the market site.

Councilman Hans Fischer said he favors the use of the private lot because the city would not lose meter money, and there would be more space for customers to park. Ostendorf said the First National Bank and Trust Co., owner of the private lot, did not look favorably on the idea.

Ostendorf proposed having each grower pay a small amount every market day to pay for refuse collection and suggested each seller record his sales to pay a five cent sales tax at closing. She said the market would be scheduled on Saturdays and would be open from 7 a.m. to 3 p.m. in the summer months.

Brown said that SIU has "to assess the consequences" of the fall semester upon them. He is concerned about students and design the appropriation bill "so we won't lose money, we think we can." He said frequently appropriation bills are put in at one end and it comes out at a different way at the other end.

Brown said that SIU would probably recommend that the $791,000 for the tuition retention allowances in the Illinois Higher Education Revenue Funds, but no definite decision has been made.

"The BHE knows that money is going to be tight," Elliott said, adding that he believes the SIU would have to be made to force decisions to be made.

Elliott, said he was not surprised although he said he was unhappy about the higher education proposals made to Gov. Daniel Walker to the legislature several weeks ago.

**Beg your pardon**

It was incorrectly reported in Friday's Daily Egyptian that the SIU Board of Trustees was "floating" civil service holidays at its Thursday meeting in Edwardsville. James Williams, chief of board of trustees, said Friday the matter is being reviewed by the Carbondale and Edwardsville campuses before action is taken by the board.

He said the board would have to act on the issue by its June meeting because the law takes effect July 1.
Spare the rod

By Barry Hanson
Associated Press Writer

Periods of deep depression and frightening nightmares marked Abraham Lincoln's tenure in the White House, and by today's standards he probably would not be considered emotionally fit to be President, a medical historian says.

"There is no doubt that he was unstable," said Dr. Emmet P. Pearson, professor of the history of Medicine at Southern Illinois University's School of Medicine in Lincoln's home town, Springfield.

The 16th President's depression and other physical and mental disorders may have affected his direction of the Civil War and the length of his Gettysburg Address, Pearson said.

Widely regarded as one of the greatest U.S. Presidents, Lincoln has been linked to suicidal tendencies and to have complained of bad eyesight, sore feet, fever and constipation, according to Pearson, who for years has collected information about Lincoln's health.

"He was at least the depressive type," said Pearson in a recent interview. "And he often went into those very deep depressions every time some sort of crisis or tragedy came along."

Pearson said a tragedy occurred after Lincoln was elected President and his brilliant Lincoln's health.

"There don't seem to be any written documents that tell who he was afraid or who he was afraid he might hurt himself," said Pearson admitted to being something of a hypochondriac, said Pearson. He has a copy of an 1865 account of the Springfield drug store showing regular purchases of castor oil, camphor, sarsaparilla and bran by an abbot's aliments.

Teach high school drop-outs how to survive

By Joanne Hollister
Daily Egyptian Staff Writer

A proposal for an 18-hour course in "Survival" by Dr. John Mahan, director of pupil personnel at Carbondale Community High School. It is, he suggested the law which makes it mandatory for students to remain in school until completion of the semester of their 16th birthday to be changed to allow students to drop out on their 16th birthday or completion of the ninth grade, whichever comes first. In most cases, this will allow students to drop out even earlier than before.

To some, this may seem shocking. Educating the masses has always been important in this country. Why should 16-year-olds, who aren't legally responsible for themselves yet, be allowed to make such an important decision which will probably affect the rest of their lives?

Students that really don't want to be in school will not work. Often, they won't even show up. When they do show up, Mahan said, there is often a problem of discipline. Teachers face the student, distraction and providing an undesirable role model for other students.

Schools need to face facts: not everyone is cut out to go to school, Mahan said. He has taught to read and write, of course. And, usually, the longer one stays in school, the better chances they have said. The frustrations of being somewhere one does not want to be can often do more harm than good.

Educators and administrators in our schools rarely are aware of the true student population. There are complete four year of high school. These students should be accepted, along with the honor students, for the goals they have in mind.

Students that make it clear that they won't be sticking around for a full four years in high school, much less college, ought to be put into a special program. They should be taught basic things they will need to know when they get out, how to deal with contracts, charge accounts, bank accounts, buying appliances or a car with time payments, etc. They should be taught how to survive. Even the basic economics course currently offered today doesn't teach students the basic facts on economics, consumerism or finance. Learning good grammar, history and science is fine, but knowing how to pronounce won't help someone purchase a house or rent an apartment in place of one.

The availability of vocational programs in our schools should be made known to all students. Schools that don't have such programs might consider taking some of the money from extracurricular activities (such as sports) and channeling it into more vocational.

The first job of our schools is to educate, not to supply a community football team.
Praise alone won't keep MEG alive

By Debbie Anderer
Daily Egyptian Staff Writer

Area law enforcement agencies have nothing but praise for the Southern Illinois Metropolitan Enforcement Group (MEG) and claim they wouldn't be able to combat the drug problem without it. Yet MEG, like other multi-agency task forces, serves unless it can find another source of funding. The three-year funding given MEG in 1973 by the Illinois Law Enforcement Commission (ILEC) ran out June 1, and although MEG director Richard Pariser says an application may receive additional funding from the commission, it will eventually have to be supplemented by other means if it is to remain in Jackson, Perry and Williamson Counties.

When the Southern Illinois MEG unit was formed, the ILEC gave the bulk of the funds to it then to Pariser and Perry. The three-year funding, he said, was formed as a regional approach to dangerous drug and narcotic control in a multi-jurisdiction area. Law enforcement agencies in Jackson Perry and Williamson Counties are now forced to find the resources to achieve greater efficiency in controlling the drug problem. Union County, impressed with MEG's record, has asked that the unit expand into that area.

MEG concentrates on controlling drug trafficking of harder drugs. "We're concerned about large quantities of marijuana but the nickels and dimes we're not that interested in," White said. "We've turned our efforts toward harder drugs because we haven't seen the prosecution we'd like on smaller amounts. The penalties aren't very great and it seems the courts are getting more lenient." MEG doesn't ignore smaller amounts of hard drugs or marijuana, though, Pariser says.

Our primary concern is with the controlled substances available," he said. "What we're talking about here is really not large enough to warrant complete eradication, but it is a real problem." Don White, chief of the Civil War in the South, black children were educated in separate public schools after 1865 established separate public schools in the area and the drug problem can't be too careful in this business. You won't less because the initial expenses of equipment and penalties aren't very great and it seems the courts are dictiments man. And he hung up.

The ILEC says that the MEG has the potential to become more self-sufficient. The ILEC says that the MEG has the potential to become more self-sufficient.

Busing issue continues to roll

By John Ackert-Richards
Graduate Student Writer

Busing is anything but an ideal solution to the problem of ensuring equal educational opportunity for all. Growing numbers are complaining that it's no solution at all. But until a better alternative is found or a constitutional amendment-inacted to prohibit it, busing for desegregation is likely to remain in use.

Busing opponents say, destroys neighborhoods, forces children to travel long distances to hostile environments and places...them in uncomfortable and dangerous situations where learning is virtually impossible. Critics also say that busing removes parental control over their children's education and discriminates against the urban.

Outright advocacy of busing for desegregation is not a popular stand to take. Public opinion polls indicate that the majority of Americans strongly oppose such busing. In a recent national survey, the Gallup organization found that only 18 per cent of those interviewed favored busing.

How did busing as a means to desegregate school children develop?

Until the early 19th century in the North and after the Civil War in the South, black children were generally denied public education at public expense. The South after 1865 established separate public schools for blacks and initially refused to provide them transportation. When buses were made available, black children were forced to travel far beyond white schools to receive an education. The courts routinely upheld separation of the races in schools and other public facilities. The "separate but equal" doctrine prevailed until the U.S. Supreme Court's unanimous ruling on May 17, 1954, in Brown v. Board of Education. The Court held: 'We conclude that in the field of public education, the doctrine of 'separate but equal' has no place. Separate educational facilities are inherently unequal.'

Busing as a method of overcoming school segregation was first upheld by the U.S. Supreme Court in 1971. In Swann v. Charlotte-Mecklenburg Board of Education, the Court ruled unanimously: 'All things being equal, with no history of discrimination, it might well be desirable to assable pupils to schools nearest their homes. But all things are not equal in a society which has been historically constructed and maintained to enforce racial segregation. Desegregation plans cannot be limited to the walk-in school.' It is clear that the ordering of busing to desegregate is with little ability to carry out the decision and the district court judges.

When did busing exist to remedy school segregation?

The voluntary transfer of students to better schools in the cities or suburbs has been proposed by President Ford, Democratic presidential candidate Jimmy Carter and William Raspberry, a black columnist for the Washington Post. This proposal is but a partial solution at best. Without vast improvement of inner-city schools, they are unlikely to attract children from the suburbs. If few suburban students leave their own schools, there will be little room to admit inner-city transfers.

Busing is a means to desegregate school children. However, it is not the only solution to the problem of ensuring equal educational opportunity for all. But until a better alternative is found or a constitutional amendment-inacted to prohibit it, busing for desegregation is likely to continue.
Dance troupe show provides modern quality performance

By Rita Grabhard

Student Writer

The performance by the Don Redlich Dance Company at Thursday night's convocation provided a strong and fresh glimpse of a versatile and dynamic modern dance company.

The five dancers carried the program with considerable dramatic and dynamic control, making the most difficult phrases look simple. Redlich's technique is descended from the Mary Wigman-Hanya Holm German school of dance.

Redlich combines lyricism and tension in interpreting this form of modern dance.

“Patina,” the opening work, used a very subtle silhouette lighting scheme. The spellbound dancers entered in a haze, and wandered around. Only with dance could they reveal their inner selves, when they took their shoes off. They then reverted back to their original “Patina” when the spell wore off.

“Three Bagatelles” was a delightful piece containing three contrasting solos by Billy Siegenfeld who joined the company in 1971. Irene Feigenheimer and Barbara Roan. The solo's merged into one piece, the strength in the work was clarified and the contrast in the very different qualities of the dancers, were shown at their best.

The audience laughed when Siegenfeld portrayed a “be-man” overshadowed by his own strength, changing into a mountain of muscle. barely able to move. Feigenheimer, a Redlich Company member since 1971, displayed an exciting technique. Her body lines were most defined, and her quality was the most graceful of the three dancers. “Rota,” a new work by Hanya Holm, was especially existing, in that this generation has had such little opportunity to see her work. As the most abstract work of the evening, “Rota’s” dramatic tension was employed to its fullest.

The highly trained and charismatic performers had a great sense of design in space and excellent control. There was a great use of tension which was restrained and internalized. The movement was simple and full of gestures to传 to an elegance that the future movement would have made impossible.

Redlich's choreography had a directness with that has built him an ever-increasing reputation. Redlich and his dancers are involved in teaching, as well as performing, Jennifer Davis. is on the dance faculty of Sarah Lawrence College in New York.

Four dancers from the five member Don Redlich Dance Company swirled through their steps. The troupe performed in Shyrock Auditorium.

SiegendiId, who has performed with SIU dance instructor Lonny Gordon, is presently teaching modern dance at the Progressive School of Dance and the Elizabeth Rockwell School of Dance. Feigenheirner is teaching in her own studio and dancing with a company directed by Roan, The Blue Mountai'on Paper Parade.

To provide a more personalized approach to performance, the company stayed in Carbondale Friday to work with master classes in the dance department.

The Redlich Co., established in 1963, has made extensive national tours, performing in over 100 major college and civic theaters.

A Review

The audience laughed with appreciation when Thursday night’s Don Redlich Dance Company performance, held in the convocation, provided a modern and strong glimpse of a versatile and dynamic dance company.

The five dancers, including Billy Siegenfeld, Irene Feigenheimer and Barbara Roan, presented their work with great dramatic and dynamic control, and their contrasting solos were shown exceptionally. The audience was especially entertained by Irene Feigenheimer’s “Rota,” a new work which employed dramatic tension to its fullest.

The performance had a great sense of design in space and excellent control, and showcased the dancers’ ability to create and perform under tension. The company’s future movement has the potential to make a significant impact in the field of dance.

The performance concluded with the troupe’s appearance in Shyrock Auditorium, where they continued to impress with their versatility and dynamic control.

The SIU-Edwardsville Symphony Orchestra and Prelude Civic Ballet will perform at the Marion Cultural & Civic Center on March 13 at 8:00 p.m., with aGen. Adm. $2.00. For more details, see Dr. Strange love on March 15, 16, 17 at 7:30, with Adm. $1.50.

For details of other dance and performance events, check the University Calendar.

Cable TV possible on campus

Carbondale's Cable TV Commission is scheduled to meet Wednesday to discuss the possibilities of installing cable TV lines on the SIU campus.

Chairman Hans Fischer said Friday the commission has looked favorably on the idea for some time. He said the commission has been concerned about making cable available to Evergreen Terrace and many other pockets within the city.

Cable Commissioner Charles Shiple said the commission will discuss several items, including the costs and the need for more Thompson Point weight room OKed

The proposal for an exercise and weight room to be located in the recreation room of Lenz Hall has been approved by University Housing, said Cindy Elliot, Thompson Point Executive Council (TPEC) president.

University Housing will provide a universal gym, exercise mats, flooring and curtains for the exercise and weight room.

Other equipment for the room will be purchased and jumps added, which will be purchased by TPEC, said Elliot, who said the building department is working to have the space up and ready for use in the near future.

The exercise and weight room, which was one of TPEC's goals for the five-year improvement plan for Thompson Point, was completed by the end of the semester.

Elliot said a lot of Thompson Point residents interested in gymnastics and weight lifting have expressed a desire for an exercise and weight room.

Thompson Point
weight room OKed

The proposal for an exercise and weight room to be located in the recreation room of Lenz Hall has been approved by University Housing, said Cindy Elliot, Thompson Point Executive Council (TPEC) president.

University Housing will provide a universal gym, exercise mats, flooring and curtains for the exercise and weight room.

Other equipment for the room will be purchased and jumps added, which will be purchased by TPEC, said Elliot, who said the building department is working to have the space up and ready for use in the near future.

The exercise and weight room, which was one of TPEC's goals for the five-year improvement plan for Thompson Point, was completed by the end of the semester.

Elliot said a lot of Thompson Point residents interested in gymnastics and weight lifting have expressed a desire for an exercise and weight room.
Carbondale Briefs

Dale Montague and Larry Hartfield, graduate students in the English Department, recently published book reviews in major newspapers. Hartfield received "The Fiction Writer's Handbook" and Montague reviewed "Cities of the Interior" and "Paupertied in Paris."

Bruce Swinburne, SIU vice president for student affairs, will be the special guest of the Franklin County SIU Alumni Club dinner April 2 at 7 p.m. at the Benton Country Club.

David A. Bencini, SIU President's Scholar from Murphysboro, received a $100 scholarship from the Southern Illinois Poultry and Livestock Conference as SIU's outstanding student in plant and soil science.

Sam "Hank" Patchett, chief flight instructor for the School of Technical Careers, has been named "1975 Illinois Flight Instructor of the Year" by the Federal Aviation Administration.

Agricultural judging teams to compete in Texas contest

SIU agricultural judging teams will compete at West Texas State in Carlsbad, N.M., March 21.

The judging contests are part of a week-long trip to Oklahoma and Texas. Along with the judging events, SIU and community college agricultural students will tour the state. About half of the 70 students and 5 of the 35 students who will be from five Illinois community colleges.

Students going on the tour will receive two hours of college credit. The trip will cost approximately $35. Student activity fees will cover most of the bus expense.

Facility managers on the tour are James Mace, the livestock judging team; Emily McCoy, dairy herdsman; Stan Henderson, dairy judge; and Harold Hodson, trip coordinator and animal industries department chairman.

The judging trip will include visits to Oklahoma State University and Texas A&M University. The students will also tour two days of dairy and beef farms and beef cattle ranches.

Research project takes 160 hours of free time

By Sue Green
Student writer

Not many people would willingly work 160 hours without being paid, but that is what some second year Electronic Processing (EDP) majors are doing this semester.

The students are working on a required field research project. Usually a project is run for a private firm or company and exposes the student to an actual work experience before graduation.

Field supervisors require the students to apply two years of classroom instruction. You recall and apply everything you have learned in the past few years," said Karen Wyn, sophomore in EDP.

Several of the procedures and terms must be learned to complete the project.

"Many times the projects require learning new material or covering an area more in depth," said Byron Johnson, a faculty advisor for the field projects.

Training a program from one computer language to another in order to speed computation time, updating an old program, or writing a new program are some examples of tasks involved in the field project.

EDP majors are responsible for finding their own projects. Ideally, the student contacts firms that they are interested in working for in the future.

After finding a project, students are independently responsible for completing it. Faculty advisors are assigned to the students, and a project conference is scheduled every week to check on progress.

The company contact helps the students with the basics needed to complete the project and often general information about the form of the project.

SIU's Student activity fees will cover most of the bus expense.

Faculty members going on the tour are James Mace, the livestock judging team; Emily McCoy, dairy herdsman; Stan Henderson, dairy judge; and Harold Hodson, trip coordinator and animal industries department chairman.

The judging trip will include visits to Oklahoma State University and Texas A&M University. The students will also tour two days of dairy and beef farms and beef cattle ranches.

"Some firms are more helpful than others in supplying information and guidelines for projects," said Mike Monopace, a faculty advisor for the projects.

When the project is completed it is sent to the company and runs on their computers. The client is then required to correspond with the EDP program in regard to the finished product, satisfactions and general comments about the project.

This evaluation and other general criteria are used in determining the student's grade.

Currently there are seven students working on field projects, said Andrew Kressner, supervisor of Electronic Data Processing. This is a normal number of students than usual.

Golfers open year at 'Bama
By Mark Kuzewski
Daily Egyptian Sports Editor

Nothing could be finer than to be in Carolina with a possible exception of being in Birmingham, Ala., for the Southern at the optimal time during spring break.

The IU team will get a taste of Southern hospitality when it opens its spring season at the University of Alabama Invitational Golf Tournament Wednesday.

The 94-hole affair will be held at the Clover Country Club in Carbondale.

Jim Brown, a junior from Pahokee, Fla., and Jerry-Tucker, a senior from Carbondale, will lead the direct hitters to the meet. Brown and Tucker were the top two players for the fall schedule. Brown averaged 73.2 strokes while Tucker averaged 78.2.

The 6-foot-7 May provided consistent firepower up front for Indiana, helping the Hoosiers to the No. 1 ranking and an unbeaten regular season with a 23-0 point average.

May also headed the AP’s All-America team announced Thursday.

In addition to May and Danley, the Indiana team consisted of John Lucas of Maryland, Phil Sellers of Rutgers and Indiana’s Scott Benson.

On the second team were UCLA’s Richard Washington, Mitch Kupchak of North Carolina, Robert Parish of Centenary, Phil Ford of North Carolina State and Lee Roy Jordan of Oregon.

May 11 of 100 entered at the Division B title for 34 points in a 96-7 victory over the Salukis. Indiana’s new No. 1 player made 15 of 24 for 33 points in an 84-62 coup over Illinois. The Salukis finished at 10 points higher.

May, 24 points higher.

The six men in the three-day tournament had 14 victories, 12 losses and 10 ties.

Salukis swim in 'drag' to prepare for NCAA's

By Mark Kasowski
Daily Egyptian-Sports Editor

Pantyhose has been proclaimed by women, and men alike to be one of fashion's great inventions. Some rank it right behind the zipper.^

Leaving aside their practical use, pantyhose have become very popular recently-literally. And those four aren't members of the women's team. They are four members of the men's team who have qualified for the NCAA championships March 25-27.

"Before anyone begins to question their masculinity, it should be noted that they are only doing so in practice at the direction of their coach, Bob Steele.

"Neither of the two seniors who stood tall long enough to answer questions, while blushing much for the addition to their swimming apparel: Both, breaststroke paul Schultz and freestyle swimmer Dennis Roberts complained the hose decreased their movement in the water.

The garment's purpose is to slow the swimmers during practice laps. The pantyhose offers a drag effect.

Schultz, Roberts, Rick Fox and Greg Porter are the only swimmers who are using pantyhose in practice. They shaved their legs to prepare for the National Independent Swim Meet April 3 to 4.

Shaving provides a psychological and supposedly a physiological boost to the swimmer who needs to have his best time in the water.

Removing hair decreases the resistance between the swimmer and the water.

Johnson, a Chicago White Sox non-roster invitee had to prepare for his first game of the season and Johnson's basket with 25 points in the second half, trying to make up the 19-18 lead by the end of the quarter.

The Blues started forcing shots and were cold from the floor. Meanwhile, the Saugus golf team was cruising to a 34-35 lead. Central held a 44-43 lead with 3:30 to play, when Johnson scored a basket and added two free throws to give ROVA a 4-point lead.

"When you come back from a hard loss and training, you want some additional resistance to make it feel like it was before," said Johnson.

Steele said the pantyhose slows the swimmers a little more than hair.

"They work very well."

Schultz and Roberts put out a plea for coeds to donate unwanted pantyhose to the swimming team.

ROVA ousts Bloomington from Class A tournament

CHAMPAIGN, ILL. -AP—Dave Johnson's basket with 25 seconds to play, scored by a pair of free throws, as ROVA defeated Bloomington Central 46-41 at half time. The other big game was Bloomington's 49-48 victory over taller Marmion Military.

"We couldn't throw a three, but we were 8-2 in the first half, trying to make up the 19-18 lead by the end of the quarter."

The Blues started forcing shots and were cold from the floor. Meanwhile, the Saugus golf team was cruising to a 34-35 lead. Central held a 44-43 lead with 3:30 to play, when Johnson scored a basket and added two free throws to give ROVA a 4-point lead.

Steele said the pantyhose slows the swimmers a little more than hair.

Defence blinds Blues

Sun's crowned 1A cage champs

By Rick Korch
Student Writer

The Chicago White Sox sex non-roster players beat the SIU baseball team 3-2 in the second game of a three-game series in Sarasota, Fla.

It was the first game of the season for the Blue and it was played on the field 4-2 and led by halftime. The Blues big man, Bryant Wright, with a game average of about 20 points per game was held in check by the Blue's tough defense. Wright could only score five points in the first half, and finished with 14. The game started with both teams playing tight under the baskets, forcing their opponent to shoot from outside.

Midway in the first quarter, the Sun's grabbed its first lead of the game of 16-15 early in the second quarter.

Johnson wiped out this with a 17-18 lead, and then ROVA held on for 22-22 halftime lead. With Johnson still cooling off, Steve Holmes took charge for the Tigers and scored eight of his total 16 points in the third quarter, which ended with a score of 39-36. By Jeff Legner and Andy Benefiint into the Saints 40-39 lead. Central held a 44-43 lead with 3:30 to play, when Johnson scored a basket and added two free throws to give ROVA a 4-point lead.

Legner then gave the Saints their final lead with a basket, giving him a tie going into the final quarter. Steele commented, "They don't want to put out money for the pantyhose."

The condition of the hose doesn't make any difference to them. They aren't the hose."

Johnson &-8, is a senior, drove to the basket for the Saints their final lead, 25 points with three minutes left in the third period.

"The Blues had a chance to catch up, but were missing many shots from underneath. The biggest Sun's lead was 51-23 with six minutes left in the game. At that point, they put in substitutes who finished the game.

"Out board strength and defense won it for us," said Scroeder. "We had a balanced attack. Four starters were in double figures.

"The Blues tried a man-to-man and gave defense in an attempt to stop the Sun's, but both failed.

"Scurlock explained, "When they played us man-to-man, we just beat 'em to death." Scroeder, who finished with 15 points, is a starter for the SIU junior varsity team.

Martin Coleman blamed the referees for part of their loss, but conceded that they didn't cause the 25-point difference in the score."

"We just didn't play our game and we were cold," he said. "The Sun's have a good team and they beat us. It was a nice tournament though."

Swimmers Paul Schultz (left) and Dennis Roberts apparently discuss the new style they will wear when they lounge by the Pullman Pool at practice Thursday. This current "leg show" is an effort by the swimmers to help condition themselves before the NCAA nationals March 25. (Staff photo by Bob Ringham)

Lawrenceville notches win over Marmion in state cage

CHAMPAIGN, I L L. - AP — All-State Jay Shidler scored 21 points to lead second-ranked Lawrenceville to a 66-61 victory over taller Marion Military.

The other victory was claimed by the defending champion Lawrenceville a 56-57 lead which the Indians never relinquished.

Two Saluki grapplers advance to quarterfinal

Led by Senior Joe Goldsmith Saluki wrestlers dropped two of four first-round decisions at the NCAA nationals Friday in Tuscar, Ark.

Goldsmith, the number 8 seeded wrestler in the 125-pound class, beat Alex Gonzales of San Francisco State, 11-9.

The other victory was claimed by Idaho's Jim Horvath. He defeated Utah State's Mark Harris, 5-1.

Clyde Ruffin lost 4-1 to Yale's Jim Bennett in the 152-pound division. Another loss was suffered by Mark Weisen against defending champion Mike Lieberman of Lehigh. Weisen lost 7-0.

The wins put Goldsmith and Horvath in the quarterfinals, while Ruffin will be in the wrestle back competition.
