SIU tries flexible starting time for work

By Joan Pearlman
Daily Egyptian Staff Writer

The end of the 40-hour workweek may still be a dream, but SIU has begun a pilot program that will give some full-time employees a voice in arranging their work schedules.

Flexitime, a program designed to give employees a more flexible work schedule, allows all full-time employees not under collective bargaining constraints the option of staggering their starting schedules.

Employees on a schedule will still work an eight-hour day, but their starting times will range from 7 a.m. to 9 a.m., quitting times will range from 3:30 p.m. to 6 p.m., depending upon the employee.

Starting time.

Gentry designates a "core time" between 9 a.m. and 3:30 p.m. when all employees would be required to work.

Lunch hours would be taken between 11:30 a.m. and 1:30 p.m. The employees have a choice of taking either half-hour or an hour for lunch.

Robert Gentry, vice president for fiscal affairs, is optimistic that the program will be a success.

"It should improve morale, because people will have something to say about their own work schedule," Gentry said.

He said the program will not only extend the hours the University departments will be open, it will also relieve traffic problems, help working mothers who have domestic problems and help to integrate an employee's work schedule with his personal life.

The pilot program began in the Accounting Department on Sept. 7 and should be starting in the Purchasing Department within the next few weeks.

Employees will not be forced to adjust their work schedules to Flexitime. Gentry said. However, employees volunteering to work under Flextime will have to coordinate their work schedule with their department heads or supervisors.

Gentry said the departments participating in the pilot program are to submit a report on the programs progress to his office by Jan. 15.

If the pilot program is successful, Gentry said, it is the reason why it cannot be adopted by the University on a permanent basis by spring, 1977.

Bud Cross, management systems director, said the Flexitime program was "tailor made" for the University by a subcommittee of the Administrative and Professional Staff Council.

Cross said the program is widely used in industry, by the federal government and by the U.S. Forest Service on campus.

Lee Hester, chairperson of the Civil Service Employees Council, said Friday he will support the Flextime program unless "employees are forced to work times they do not want to."

$1 million apiece

Bond set for five in TWA skyjacking

By Arthur Everett
Associated Press Writer

NEW YORK (AP) — The leader of a small band of Croatian-born terrorists held on bail of $1 million each was caught flying a jet with 92 persons while trying to deactivate an explosive device.

Capt. Richard Carey, pilot of TWA Flight 555, told reporters the 30-hour weekend hijacking ordeal was "30 hours of hell.

Warns against "final solutions"

Kissinger takes peace proposals to Africa

By Joan Pearlman
Daily Egyptian Staff Writer

ZURICH, Switzerland (AP) — U.S. Secretary of State Henry Kissinger set out Monday on a mission to stop what he sees as a race war already under way in southern Africa. He was flying to Zurich for an overnight stop before proceeding Tuesday to Tanzania.

Though he cautioned before leaving Washington against expecting "dramatic final solutions," Kissinger is carrying proposals that he hopes will halt black-white conflict in Rhodesia, South Africa and Namibia, which is also called South-West Africa.

South Africa is confronted with violence and demonstrations in its black and mixed-race townships and with black guerrilla warfare against its borders.

Rhodesia's white minority regime is fighting a growing war against black nationalist guerrillas.

U.S. Embassy sources said Kissinger's stay of about 12 hours on Swiss soil would be "purely a rest stop," that he planned to meet no one while here and was not expected to venture outside his hotel.

The proposals Kissinger is expected to be pushing on his journey through Tanzania, Zambia, South Africa and possibly other points revolve around these short-term goals:

Rhodesia:

To set up an international forum in which Rhodesia's white rulers would arrive empowered to transfer power to the black majority within two years.

The United States and a consortium of other friendly nations would underwrite this process with a multibillion-dollar program to guarantee Rhodesia's $70,000 whites against loss of assets and to help the six million black Rhodesians with an investment program.

Namibia, or South-West Africa:

To organize a meeting to write a constitution leading to independence for the territory, a former German colony now held by South Africa. Kissinger's proposal envisages participation in the constitution talks by exiled black political groups such as the Southwest African People's Organization (SWAPO). South Africa has already agreed to give the territory independence by the end of 1978, but it has demanded hand over hand power to handpicked tribal chiefs.

South Africa:

To urge the government of Prime Minister John Vorster to recognize that "the process of apartheid, or separation of the races, is "incompatible with any concept of human dignity," Referring to the more than 300 deaths since June in South Africa's racial upheaval, Kissinger has said: "No system that leads to periodic upheavals can possibly be just — nor can it last."

Kissinger warned in a weekend news conference in Washington that the racial conflict in southern Africa could sink in foreign givers and result in "the radicalization of the whole of the continent of Africa."

Kissinger planned to spend a day or two in Tanzania talking to President Julius Nyerere, then go to Lusaka to confer with Zambian President Kenneth Kaunda, then to Pretoria to see Vorster.
CIPS refuses to send reps to rate hike meeting

By Jim Wauri
Daily Egyptian Staff Writer

TYPY WASHINGTON INTELLIGENCE—At the State of the Central Illinois Public Service Co. (CIPS) has refused to send company representatives to meet with members of the Sangamon County Action Movement (SCAM). So far, CIPS has not sent a letter to CIPS President K.E. Bowen on Sept. 2. SCAM is a coalition of James Grinnell, President of the Illinois Senate, and the members of the Illinois Commerce Commission (ICC) in Springfield beginning next Monday.

CIPS’s request for the rate increase was filed in response to the Illinois Commerce Commission’s (ICC) rate increase for insurance. Currently, CIPS is facing a rate increase of 11 percent for every cent of natural gas. Monday, SCAM received Bowen’s request.

SCAM will not appoint a representative to meet with CIPS on the Sept. 16 date the group has proposed.

CIPS’s request for the rate increase will be heard before the Illinois Commerce Commission (ICC) in Springfield beginning next Monday.

Bowen said in the letter to SCAM: “We believe these hearings provide the best possible forum for a full explanation to the public of the problem which the company faces.”

“We do not believe any purpose will be served by a brief meeting on Sept. 16.”

Three des conspiracy to assassinate Kennedy

By Martin J. Waters
Daily Egyptian Staff Writer

SPRINGFIELD, Mass. (AP)—Three persons pleaded innocent Monday to charges they conspired to murder Sen. Edward M. Kennedy. Investigators, meanwhile, tried to determine whether the trio actually intended to carry out the alleged plot.

The three, in a hearing Tuesday, were identified as White and King to report to the court Tuesday. The hearing was conducted by John A. Kerch, Assistant Sports Editor.

Kerch said the incident might be related to a fence behind Grinnell Hall scene after the hearing. Two of the examined White and King to report to the court Tuesday. The hearing was conducted by John A. Kerch, Assistant Sports Editor.

Man charged for tampering with police car

A man attempting to remove the license plates from an SIU Security Police car was arrested and charged with tampering with a motor vehicle.

Sutherland's left rear pocket, police reported the license plates from the plate.

SIU Police said he was removing the plates from squad car.

The license plate of Peggy Mace, former wife of George Mace, president for University Relations, turned up on a burglary committed at Lewis Park Apartments, 800 E. Grand Ave.

Sutherland was arrested.

Police said he was removing the license plates from another car's left rear pocket, police reported the license plates had been stolen from one of the MEG's undercover cars and had been replaced with stolen passenger car plates.

Pariser was notified about the presence of the stolen plates by an administrative member of the Carbondale Police.

Earlier this month the lost license plate of Peggy Mace, former wife of George Mace, president for University Relations, turned up on a burglary committed at Lewis Park Apartments, 800 E. Grand Ave.

Sutherland was arrested.

A call from Donna Soderquist at 3:50 a.m. Sunday said she had just flown from her apartment.

Soderquist said Monday that she was awakened by noises in her living room and caught sight of an intruder.

She ran to her bedroom window and saw the intruder running across the back yard, she said.

An SIU security officer, contacted by Carbondale police for assistance, observed a man on a bicycle who matched the description given to police by Soderquist. The security police said the man was stopped near the Saluki Cinema in Lewis Park Mall. The man was brought to the SIU Security Office for identification.

Soderquist identified the man as the intruder by his clothes, build and hair. The identification was confirmed at the SIU Security Office.

Sgt. Larry Hill of the Carbondale police said no weapon was found on Potts when he was apprehended.

Appearing before Judge Kunce, Potts, who lives at 511 S. Graham Ave., wore clothes provided by the Jackson County Jail—gray shirt, blue pants and soft-soled slippers. His arm was in a sling.

State's Attorney Howard Hooch asked that Pott's bond on earlier charges of deviated sexual assault and burglary be revoked or increased. Hooch cited a 1973 Illinois revised statute which grants a judge the authority to revoke bond in felony cases if there is "proof evident and presumptioin great" that the defendant has committed a felony while he is out on bond for another offense.

Attorney William South, who is representing Potts in the earlier case, was in court with Potts, but told Kunce in court that he has not been retained by Potts for the new charge.

In defense of Potts, South noted that there have been "no facts alleged, only conclusions which at the present time cannot be sustained." South asked that the bond not be revoked at least until the time of the preliminary hearing.

In ruling against the defendant, Kunce said the intent of the statute is to prevent recidivism while alleged felons are on bond for other charges. Hooch argued that it was "clear and convincing evidence" and that it is "a matter of discretion with the court."

Kunce noted that Potts was in court on charges of a "forceful felony" and that it was the "same type of serious and heinous crime" as he had charged with before. On those grounds, Kunce revoked Pott's bond.

The statute under which bond was revoked also required that anyone held without bond for a hearing within 10 days. Kunce set the preliminary hearing on the burglary charge for Sept. 21 at 1:30 at the Jackson County Courthouse.

Whether bond should be permanently revoked on the two earlier charges will also be decided at that time.

Bond for Potts' second charge of burglary was set at $10,000.

According to Judge Kunce, this is the first time his court has used the statute, which previously applied only to capital crimes.

Last week, Potts' trial on charges of deviate sexual assault and burglary, scheduled to begin Sept. 28, was continued until November.

South asked for the continuance, saying he had been unable to create a "strong and substantial" case against the defendant and that South's attorney are running for public office.

Man arrested on burglary charge

By Pete Retzbach and H.B. Koplowitz

Daily Egyptian Staff Writers

A Carbondale man charged in June with burglary and deviate sexual assault is facing another burglary charge.

Richard Scearce, 22, of Grand Central Station, was charged with another burglary crime.

Both cars had been parked in the rear of a relations vehicle, an unmarked station wagon.

The man was free on bond.

Appearing at a bail hearing before Judge Kunce, Scearce was in court with Potts, but told Kunce in court that he has not been retained by Potts for the new charge.

In defense of Potts, South noted that there have been "no facts alleged, only conclusions which at the present time cannot be sustained." South asked that the bond not be revoked at least until the time of the preliminary hearing.

Pilot says ordeal "30 hours of hell"

By Donald Westol

Associated Press Writer

DETROIT (AP) — Some 170,000 auto workers were on strike Tuesday, demanding an across-the-board pay raise to $2 an hour for strikers and $1.75 an hour for workers replaced by new hires.

The United Auto Workers failed to produce any sign of progress.

Monday's negotiations were delayed unexpectedly, Monday while James Seecore, director of the UAW's Canadian and Mexican Affairs, was in Washington meeting with union officials.

However, Ford, which made a second contract offer last Friday, has assured the union additional concessions could be forthcoming and has expressed continued confidence that there will not be a strike.

Woodcock and company Chairman Henry Ford II cancelled speaking engagements Monday to stay near the bargaining, aimed at averting the first strike against the nation's No. 2 auto maker since a 46-day walkout in 1967.

Bargainers are split on virtually every major issue, including wages, work force health and supplemental layoffs.

The union has not made a specific wage demand.

The Illinois Environmental Protection Agency (EPA) has recently revealed a disquieting attitude of bureaucratic stoicism concerning the issuance of permits to develop sanitary landfills throughout the state.

The EPA is the sole authority in determining where a landfill should be developed and no private agency or local citizen group can intervene or alter their decision.

The Illinois Supreme Court has given the EPA the prerogative to grant landfill development permits in any area they deem suitable. Local zoning ordinances have no effect on the EPA's criteria for selecting a site.

This omnipotent planning power was bestowed upon the EPA by the Illinois Environmental Protection Act which was designed to "exhibit any authority of local political entities which could interfere or frustrate the objectives of establishing a unified state wide system of environmental protection."

While it may be true that in some cases local governments could interfere or frustrate the objectives of the EPA (obviously no community wants a garbage dump smelly up their backyard), there are some instances when the protestations of communities trying to prevent the development of a landfill in the area may be valid and the EPA should listen to them. Unfortunately, this has not been their practice.

The Village of South Elgin, located in northern Kane County, recently attempted to prevent a landfill from being developed on a site that had been previously condemned and legally closed by the Illinois Pollution Control Board (IPCBD).

Two landfills had operated on this site earlier but in 1972, after two years of litigation, the IPCBD ordered the operations closed because "these operations have caused water pollution (the area in which the landfills were being operated were within 1000 feet of the Village's sole water supply) and constitute a threat of water pollution in the area and are a direct threat to the drinking water of the people of South Elgin."

Despite the findings of the previous litigation and the objections of the village and numerous other environmentally concerned agencies, which submitted geological evidence from Waste Management of Illinois Inc. to develop a 50-acre landfill on land adjacent to the two previous sites.

The permit was issued because the EPA said that they had received geological evidence from Waste Management that "indicates that the soil formation of the proposed site guarantees its integrity."

It seems curious that the EPA would accept the tests submitted by Waste Management but ignore the finding of the IPCBD and Simon Research Laboratory, an independent geological testing agency, who examined the site and found it not a suitable location for a landfill operation.

Perhaps the EPA is suffering from legislative arrogance because in the previous court proceedings they joined the village as plaintiffs in successfully condemning the earlier landfill operations.

While the need for sanitary landfills is obvious, the EPA, in choosing a site, should take into consideration that drinking water is too essential to life of a community than the acceptance of an entire area's garbage.

The recent Supreme Court decision regarding the death penalty appears to strengthen the laws concerning this form of punishment in Illinois. The ruling stated "the death penalty is not a form of punishment that can ever be imposed, regardless of the circumstances of the offense, regardless of the character of the offender, and regardless of the procedure followed in reaching the decision to impose it."

The ruling simply means that the decision of whether the accused will receive a death sentence of life imprisonment is up to the judge and jury. Illinois introduced jury discretion for the punishment of murder in 1874. The Supreme Court now feels that a mandatory and ultimate punishment is not a form of justice. The person is said to have become a "member of a faceless, indeterminate mass to be subjected to the blind infliction of the death penalty."

This movement toward a more individualistic attitude toward a criminal is not necessarily humanistic. It is, however, a more socialist movement in the sense of strengthening the bonds and rules of society. If a group of people are to live together, certain rules are made and must be followed out of necessity.

The enactment and enforcement of these rules must follow a logical course of action if they are to be valid. To make the death penalty mandatory for certain crimes is not logical. Illinois realized this over 100 years ago when the punishment for murder was given two options—death or life imprisonment. However, it failed to be used because the death penalty will deter people from committing certain crimes. A look at the past determines this is not an effective deterrent.

Then why does capital punishment exist? It is used as a final and ultimate punishment for those violators of society's rules who can be dealt with in no other way. After the Supreme Court ruled in 1972 that the death penalty was being arbitrarily and capriciously, 70 per cent of the states drafted new death penalty laws, which shows that a significant portion of the population is in favor of the death penalty.

Proper law must be enforced with proper authority. The Supreme Court ruling can be interpreted to mean that punishment must fit the crime and the accused person.

By Garry Trudeau
Women's Athletic Director

It is unfortunate that the article which appeared in Wednesday's Daily Egyptian was filled with inaccuracies. Some of which I would like to correct. Prior to the fall of 1974, when Ms. Paratore was hired, the program was not "mainly volleyball and basketball."

The program included fencing, badminton, softball, tennis and synchronized swimming, to name a few of the other activities.

The writer of the article indicated that usually only Physical Education majors participated in the program. At that time, there were only several hundred female Physical Education majors.

One can readily see that many SIU students other than Physical Education majors participated in the program.

I think it is important that the content of the articles which appear in the Daily Egyptian be researched carefully so that the readers know that the information is indeed factual.

Thank you for the opportunity to correct these particular errors.

Fees wasted?

Student activity funding questioned

By Cindy Yomantas
Student Writer

Student Governments' activity fee allocation budget proposals for recognized student groups are about to be proposed--to promote all-campus events. As the funding the derived from students, this is a logical stipulation.

The budgets, allocated from the total lump sum of activity fees paid by each undergraduate-$8,606.63 (proposed) to the governing body and three white sororities; Pan-Hellenic Council, governing black sororities and fraternities: and Inter-Greek Council, governing white sororities: Pan-Hellenic Council, governing black sororities and fraternities: and Inter-Greek Council, governing white sororities: Pan-Hellenic Council, governing black sororities and fraternities: and Inter-

Fraternity Council, governing white fraternities. It is interesting to note that both the past chairman of the Division of Late Night, Herman Brett Champion, feel that IGC lacks strength and needs re-evaluation of its programs. Yet, IGC fees to propose 5th highest budget of more than 10 groups applying for funds.

What all-campus events does IGC sponsor then to make it eligible for funding from student activity fees?

Welcome Fest, the back-to-school party for new students, is billed as one of IGC's biggest events. The purpose of the event is to recruit new members for Greek organizations. Is a membership drive like the ones each fraternal organization funds itself and calls rush, of interest to all students, or IGC?

Theta Xi, the annual variety show to raise money for local scholarships, is IGC's biggest expense. But do awards amounting to $500 each for the Service to Southern Award and the Leo Kaplan Memorial Award, warrant a budget of $4154? Too bad the money allotted for the show can't be used to students as scholarships.

Greek Week is supported with student activity funds. Although its sponsors insist the event is open to all students, last year there were no prior appointments to inform students of the event. Moreover, all activities included in Greek Week are aimed specifically at Greeks.

In light of these programs, do the activities sponsored justify the amount of money allocated?

This is a question not only for IGC to answer, but for all groups funded with student activity fees.

A similar example to IGC is the funding of Black Affairs Council. Because funds awarded more than double what IGC receives-$19,209.06—even more questions should be raised regarding the validity of BAC's all-campus events.

The allocation of student activity fees has taken some steps forward in the past year through the workings of the Fee Allocation Board, but the board must now begin to question just how funds are being used. Perhaps it's time for the students to take a closer look at the activities they're paying for to decide whether the expense is justified.

‘Final Days’ reveals ominous potential

By Jim Wisuri
Daily Egyptian Staff Writer

Nuclear warfare is one of those topics I'd just as soon not think about. Richard Nixon falls into the same category. Put them together and what have you got? The possibilities are more than frightening.

"The Final Days" by the Washington Post's old dynamic duo, Carl Bernstein and Bob Woodward, brings together nuclear warfare and Richard Nixon in a context straight out of the bizarre.

The book, although criticized by many of the principal characters as inaccurate, has caught the fancy of America's reading public, thereby showing someone's confidence in the veracity of the events described.

Nixon is portrayed as a man on the edge. As perhaps the most power-hungry individual to reside in the Oval Office, the book shows Nixon at the end to be drinking to excess, maintaining a staunch self-defense in spite of unsupportable odds, and in general, losing his mind.

Ed Cox, the President's son-in-law, called Michigan Sen. Robert Griffin to explain where the President's head was at. Woodward and Bernstein report: "The President was walking the halls last night, talking to pictures of former presidents—giving speeches and talking to pictures on the wall. One can almost hear Nixon inquiring, 'Where did I go wrong?'"

In a cabinet meeting on August 2, two days before Nixon resigned, Attorney General William Safire is quoted in the book as telling the President, "We ought to be sure you have the ability to govern." Woodward and Bernstein also paint a picture of a Nixon, obviously understaffed, and the present of his favorite intoxicant, sinking to his knees late at night with Secretary of State Henry Kissinger in the Oval Office.

All these events show Nixon as a man in the middle of a crumbling castle. The stone wall he had surrounded himself with (Haldeman, Ehrlichman, etc.) was gone.

Nixon's chief of staff at the end, Gen. Alexander Haig, is shown in the book to be the one official in the administration who saw most graphically the President's demise.

Haig said that "Nixon had become increasingly unstable, obsessed, exhausted," according to the authors. Haig also ordered that Nixon's sleeping pills and tranquilizers be taken away, lest the President decide to commit suicide, a fear Edward Cox also expressed to Sen. Griffin.

But Haig was so attuned to Nixon and the waves of power which roared through his system, that he look Nixon's desperation to a not-too-illogical conclusion.

Haig told the higher-ups at the Pentagon that any order to them from Nixon would have to be reaffirmed by Haig. This means, if Nixon, in one last ditch attempt to regain the rapidly fading powers of his Presidency, called for nuclear attack on Russia or Red China, Haig would have to give the final OK.

Put yourself in the shoes of the man on the other end of the White House hotline. The President, the man who could make you the highest general around, is on the line. He wants the bomb dropped on Moscow, now. He is, as the Constitution states, the commander-in-chief.

You don't know that he's more than likely drunk. Or talking to pictures of Presidents. You know that he's the main man, and your job is to do what he says. Gen. Haig or no Gen. Haig.

Well, that's how close we were to no more Northern Hemisphere. Once our missiles take off, so go the Russians. Once that happens, the party starts.

There are a lot of "ifs" involved. But stranger things have happened.

Daily Egyptian, September 14, 1976, Page 5
**Bowie film improves sf mode**

Keith Tuchman
Daily Egyptian Staff Writer

"The Man Who Fell to Earth," now playing at the Variety 1, is a step in the right direction for science-fiction films. It's the story of Thomas Newton, a visitor from another planet losing its water supply and hoping to transport some of Earth's supply back there, along with his ship. But his ship has crashed, so he struggles to find a way back, and in the process makes a name for himself by creating a camera that develops pictures instantly and is disposable.

Which is nice about the picture is that, along with the above action, it delves deeply into the personal lives of Newton and those close to him. Director Nicholas Roeg brings the viewer deeply into the loves and hates of Newton, his girl friend Mary Lou and his advisor Oliver Flanders, and does it with a finesse brought about by sophisticated technical know-how. That is, the two main stars were cut out for American theaters.

The series, "The Pythons' Flying Circus," will premiere on WSIU-TV, Channel 6, on Friday night, Sept. 17 at 10:30. The stars of the 26-week color series were formerly associated with the "Python" series.

**A Review**

Again noble because of briefness, coming quickly, yet telling all the details completely. Incidentally, if the storyline of the movie seems jerky, it's because about 30 minutes was cut out for American theaters. The segments dealt with government agents, and it's believed that pressure was put on Roeg to cut those parts out of the acting favor well, with David Bowie doing a very nice premiere job as Newton. His near-orange hair was turned red for the scenes in which he was Newton off as a bizarre sort of person. Candy Clark and Buck Henry both give very emotional and convincing performances.

S-F filmmakers in the future should do well to regard the direction this film takes. There need not be millions of dollars spent on sets and costumes to make a successful s-f story, because science-fiction is more than technology. Above all, the kind of all forms of literature, deals primarily with people, and the environment is in many ways secondary.

Also, s-f doesn't always have to be a moral—past previous filmmakers have often failed to realize that. S-f is looked on too often as prophecy rather than speculation.

Nicholas Roeg was wise enough to take both these things into consideration, and he has produced perhaps the best s-f film since "2001." Avoid stereotypes like "Logan's Run" and enjoy "The Man Who Fell to Earth."

---

**Chicago Symphony will perform**

Southern Illinoisans will have the opportunity to experience the best in classical music when the Chicago Symphony comes to Shryock Auditorium Tuesday night. The Office of Special Meetings and speakers, with additional support provided by the Illinois Arts Council, area legions and the Illinois Arts Council, is proud to present the world's finest orchestras. The Chicago Symphony, which is one of the world's great orchestras, will be led by maestro Sir Georg Solti. Among these are Berlin's "Symphonie Fantastique," which was three Grammy's in 1978, and a recording of all nine of Beethoven's symphonies, winner of the best album Grammy of 1976.

The first piece the Symphon will play on Monday night will be Hector Berlioz's "Roman Carnival, Op. 9." It is a musical sellout of Berlin's "Romantic Carnival, Op. 9." It is a musical jewel of the twentieth century. Berlioz was stumped. The object was to mumble and roar the story of the movie seems jerky, it's because about 30 minutes was cut out for American theaters. The segments dealt with government agents, and it's believed that pressure was put on Roeg to cut those parts out of the acting favor well, with David Bowie doing a very nice premiere job as Newton. His near-orange hair was turned red for the scenes in which he was Newton off as a bizarre sort of person. Candy Clark and Buck Henry both give very emotional and convincing performances.

S-F filmmakers in the future should do well to regard the direction this film takes. There need not be millions of dollars spent on sets and costumes to make a successful s-f story, because science-fiction is more than technology. Above all, the kind of all forms of literature, deals primarily with people, and the environment is in many ways secondary.

Also, s-f doesn't always have to be a moral—past previous filmmakers have often failed to realize that. S-f is looked on too often as prophecy rather than speculation.

Nicholas Roeg was wise enough to take both these things into consideration, and he has produced perhaps the best s-f film since "2001." Avoid stereotypes like "Logan's Run" and enjoy "The Man Who Fell to Earth."

---

**Big band performs well for small, eager crowd**

RICH GUBBE
Student Writer

Clark Terry and his Big Bad Band played with all of the enthusiasm as the big bands did in the Fifties Saturday night in Shryock Auditorium.

"There wasn't a packed house. I'll never know," Terry, and some other members of his band have more than forty years of experience behind them. Three years ago, Terry and other saxmen played together in the Great Lakes Naval Band. Saturday was their third reunion. The reunion has been in Carbondale, a central meeting place for the wartime musicians.

The crowd, which was there of one, welcomed the sidemen immediately. They only rehearsed two numbers, "The Great Lakes Experience Blues" being the finale.

---

But Terry, and a few others had only been warming up. The reunion was given, and the rest of Terry's band took the stage.

They began by playing tunes from the Duke Ellington era. Some members had previously played with Ellington's band. The numbers included "Take the A Train," "Take the 'e-Train," "Black and White," "Big Bad Blues," and "Flute Juice," featuring flutist Butch Willis, who were the band's own.

Terry finished with the most popular number of all. "Mumbles" was a song that he used to perform on the Tonight Show while playing "stump the band." He used it, of course, when he was stumped. The object was to mumble and roar the story of the movie seems jerky, it's because about 30 minutes was cut out for American theaters. The segments dealt with government agents, and it's believed that pressure was put on Roeg to cut those parts out of the acting favor well, with David Bowie doing a very nice premiere job as Newton. His near-orange hair was turned red for the scenes in which he was Newton off as a bizarre sort of person. Candy Clark and Buck Henry both give very emotional and convincing performances.

S-F filmmakers in the future should do well to regard the direction this film takes. There need not be millions of dollars spent on sets and costumes to make a successful s-f story, because science-fiction is more than technology. Above all, the kind of all forms of literature, deals primarily with people, and the environment is in many ways secondary.

Also, s-f doesn't always have to be a moral—past previous filmmakers have often failed to realize that. S-f is looked on too often as prophecy rather than speculation.

Nicholas Roeg was wise enough to take both these things into consideration, and he has produced perhaps the best s-f film since "2001." Avoid stereotypes like "Logan's Run" and enjoy "The Man Who Fell to Earth."

---

**After the concert, Terry said, "There could be a few more people"**

Besides playing concerts, Terry is still making albums. His new album will be released in October under the Vanguard label.

Terry also works with young musicians and contends that the new talent and interest is "just fantastic."

Terry's next engagement has him in California for the Monterey Jazz Festival, one of the greatest.
Job-hunters may find a guide in career workshop

By Chris de Salvo

Daily Egyptian Staff Writer

A one-week workshop called "Chancing Career Life Planning," being offered fall semester on Wednesdays in Room 218 of the New Life Center, 923 W. Illinois.

The workshop will be from 1 to 3 p.m. for five weeks, will concentrate on the process of choosing a job through the Career-Life Planning method adapted from the book, "What Color Is Your Parachute," by Richard Bolles.

The workshop started on Sept. 1 after five weeks of planning by Janie Kurtz Weiss and Sharon Moore-Johns, coordinators of the workshop. "Besides the Bolles book, we gathered research from SIU's Career Planning and Placement Center and the Free School," Weiss said.

Assertiveness in job hunting is emphasized in the workshop with focus placed on answering such questions as: what do I value most in a work situation? what are my rights in a job interview? and how can I stop being the victim and have power over my own job search?

The idea of a 14-week workshop resulted from Weiss' and Johns' participation in an SIU Career Planning Day and from complaints that one day is too short for career counseling, Weiss said.

The two coordinators attended a four-day, career life planning workshop in New Jersey headed by Bolles. One of the exercises at the workshop was to ask potential employers at random how they got their jobs, how they like their jobs and how many others do the same thing.

"At first I was scared to ask those questions, but it's not really that bad," Weiss said.

Bolles claims his exercises are 90 per cent effective. He says employees are excited and impressed by people who really know what they want. Bolles also says that self-awareness is something that can always be used because the average person has at least 10 jobs in a lifetime.

Last Wednesday's workshop had 10 members who plan to attend all of the sessions, but Weiss said, "We encourage anyone to come anytime during the 14 weeks since each workshop is an individual lesson and experience in itself."

The Career-Life Planning workshop is funded by the University Christian Ministries (UCM), the Career Planning and Placement Center and the Free New Life Center. The Career Workshop is one of eight programs offered by UCM.

Professor to lecture on foreign chemists

"The Education of Foreign Chemists in America" is the title of a lecture to be given at 4 p.m. Friday in Room 218 of C wing of Necksers Building. John W. Wotiz, professor of chemistry at the University of Wyoming, will present the lecture.

Wotiz said major topics of the lecture will be problems in establishing an accurate count of the number of foreign students in American universities, the quality of academic preparation of foreign students prior to coming to this country, the language problem, the kind of American education suitable for foreign students, and the reverse "brain drain."

SIU faculty and administrators will be on hand after the lecture to answer questions, but it's not really that bad," Weiss said.

Conference on cancer searches for new clues

By Alan Blakemere

COLD SPRING HARBOR, N.Y. (Agence Press)—What kind? Where in the body? When?

Clauses to just such puzzles were raised at an eight-day conference on Origins of Human Cancer that brought specialists from 13 countries to the Cold Spring Harbor Laboratory on Long Island, a center for basic research in biology. Scientists there continue to expect the unexpected. "Sir Richard Doll of the University of Oxford, a prominent cancer researcher, said of the search for cancer's cause:

"What people eat may play a larger role in causing cancer than has been thought," said Doll. And the fact, he said, is that diet is particularly significant in industrial countries are also common in developing countries "makes it difficult to believe industrial pollution is the major cause of cancer."

Cancers assumered was an inevitable consequence of age, Doll believed, but it is also true that "aging per se may be irrelevant," with smoking being a matter of little, long-term exposure, and not the only agents capable of causing cancer.

The conference organizers also said that a major part of cancers of the stomach and the esophagus were caused by smoking and alcohol consumption. The conference's organizers also said that they expect the results of the conference to be an aid to a complete understanding of human cancer.

The conference was sponsored by the National Cancer Institute and the National Institutes of Health.

If the guilty agents are identified, they can be contrd.

Viruses are among suspected causes, he said, and people themselves are now widely in susceptibility to disease, including cancer.

As a source of new clues, "we are now beginning to realize that several different factors may combine to produce cancers," Doll said.

In this vein, Dr. J.W. Berg of the University of Iowa said hot tea, coffee, or alcohol may play a role in cancer of the esophagus, although none of them contain any known cancer-causing chemicals.

What may happen is the hot liquid or the alcohol removes an outer layer of cells in the esophagus, exposing cells underneath which are not yet divided into secretion by cigarette smoke, Berg said.

Dr. James D. Watson, director of the laboratory here and Nobel Prize winner for his role in helping explain mechanisms of the genetic code of life, said the conference would determine all types of possible cancer causes. "We are trying to keep the human viewpoint," not just those of environmental virologists or other specialists, he said.

Watson and Dr. Howard H. Hitt, dean of the Harvard School of Public Health, organized the conference.

You can do it, too. So far over 550,000 other people have done it. People who have different jobs, different IQs, different interests, different educations have completed the course. Our graduates are people from all walks of life. These people have all taken a course developed by Evelyn Wood, a prominent educator. Practically all of them at least tripled their reading speed with equal or better comprehension. Most have increased it even more.

Think for a moment what that means. All of them—even the slowest—now read an average novel in less than two hours. They read an entire issue of Time or Newsweek in 35 minutes. They don’t skip or skim. They read every word. They use no machines. Instead, they let the material they’re reading determine how fast they read.

And mark this well: they actually understand more, remember more, and enjoy more than when they read slowly. That’s right! They understand more. They remember more. They enjoy more. You can do the same thing—the place to learn more about it is at a free speed reading lesson.

This is the same course President Kennedy had his Joint Chiefs of Staff take. The same one Senators and Congressmen have taken.

Come to a Mini-Lesson and find out. It is free to you and you will leave with a better understanding of why it works.

Plan to attend a free Mini-Lesson and learn that it is possible to read 3-4-5 times faster, with comparable comprehension.

**TRACKS**

A four part look at Carbondale through the history of the railroad...

---

**Carbondale: A child of the tracks**

Part one: 1850-1854  
By Steve Haha  
Daily Egyptian Staff Writer

If you've ever driven, walked or ridden your bicycle from the eastern "half" of Carbondale to the city's western "half," you've probably cursed the railroad... somehow traffic tie-ups, engine noise and fatal injuries make the romance of the "iron horse" a forgotten dream.

Ralph Waldo Emerson wrote, "The Americans take to this little contrivance, the railroad, as if it were the cradle in which they were born." If you were to write today, his tone might be a little more melancholy.

Eighteen trains, averaging 30 cars in length, pass through town each day according to Illinois Central Gulf figures. Railroad officials estimate the traffic will increase to 36-38 car trains each day by 1985.

Between 1972 and 1974 police figures (the latest compiled) show almost one traffic accident a week in the vicinity of the tracks. An SIU student was killed by a train between Grand Avenue and College Street in 1973.

But Carbondale residents haven't always been at odds with the railroad. For better or worse, this town is a child of the tracks.

Slightly less than 125 years ago, a Murphyboro man, possibly because of political rivalries, probably because of business possibilities and definitely because of the coming railroad, founded Carbondale.

Daniel Harmon Brush, noted by historians to have been a prosperous businessman at age 12, noticed several railroad survey markers running through a flat area east of Murphyboro and decided to persuade officials of the Illinois Central Railroad (IC) of the positive prospects of establishing a town.

"I had previously determined that as soon as the road (railroad) was established, I would remove to some point on it which offered a reasonable prospect of doing remunerative business." Brush wrote in his memoirs.

Around 1850 he learned of land purchases by the IC near De Soto and Makanda (at that time known as Markanda) and decided to build a town between the two.

Brush recalled the area as "a wilderness of forest and dense undergrowth of hazel bushes, wild grape, and running rose vines all over the surface of the ground."

In 1852 the only railroad in Jackson County was a "narrow gauge" built from the coal mines at Dorchester in a pocket on the Big Muddy. But just below the plains of Murphyboro.

So the H's venture, which was to build a line from Cairo to Danville in the state's northwest corner (near East Dubuque), a major step in Illinois land transportation.

The Cairo to Carbondale portion, one of 12 sections of separate construction, was completed on July 4, 1854. Final completion of the entire line, plus a branch from near Centralia to Chicago, was finished in September of 1854.

Brush, in his memoirs, wrote of the day the first locomotive, which started from Cairo, came into Carbondale:

"About noon the rumble of the train was heard, then came the shrill cry of the steam whistle, and soon the locomotive and cars slowed up and came to a stop opposite the freight house. The wonder-struck people shouted, some in terror and all in surprise.

"The horses catered and tried to break away, the dogs howled, and with tails tucked between their legs, stood not upon the order of their going, making hasty strides towards tall timber.

"The citizens of the town and neighborhood made a free dinner and extended a general invitation. About 2,000 men, women and children came in from the surrounding country to see, most of them for the first time in their lives, a railroad and a train of cars."

No written account has been published of what it was like to have ridden on that first train into Carbondale, but Brush, again in his rather prolific memoirs, describes a train ride he took in 1853 which was probably similar to the 1850s ride.

"The diminutive engine made a start with the poor car— I think there was but one, and an excuse for tender... Troubles soon presented themselves to obstruct progress. The ties were loosely put down and wobbled out of line.

"The flat half-inch bar-iron (the rail) laid to guide the wheels became loosened at the ends and continuously turned up, thrusting 'nigger heads' through the bottom of the car and juggling the unwary passenger by a murderous dig into his corporation."

But "corporation" comfort or not, that first train to pull into Carbondale carried on its coattails something of the future economic success and Brush, being the businessman he was, cashed in early.

Knowing that if Carbondale was to become anything of a trade center it would need a station house, he offered to build one at his own expense if the IC would construct a switch for loading and unloading.

Much to his surprise, not only did company officials agree to his proposal, but also decided to finance the station themselves, awarding Brush the construction contract. Later in 1854 the depot was completed and the town named for the nearly-coal reserves was put on the map.

Repeated vandalism, student misuse cause copier troubles

By Bob Morley
Daily Egyptian Staff Writer

If those temperamental, nickel-gobbling copying machines in Morris Library seem to always be broken, the reason, according to Sidney Matthews, assistant director of Morris Library, is student misuse.

“We’ve got a lot of immature kids around here,” Matthews said. “Until last semester (summer), we didn’t have any problem.”

Within the last week, two copying machines had their glass windows smashed, Matthews said. Before that someone glued down the rubber mats that cover the reproduction glass.

Late in the summer semester, with library workers on duty, someone broke into three machines with crowbars, and stole money from their coin boxes, Matthews said.

Earlier this semester, someone unplugged all the copying machines in the library and put “out of order” signs on them. When checked, all were found to be operating properly.

Many of the incidents resulted in the machines being out of use. Replacement parts had to be ordered from Vend-A-Copy in Oak Park, the company which has the maintenance contract for all the library’s coin-operated machines.

Matthews said that every morning a library employee makes a survey of the library’s 19 machines, but still has trouble keeping them all running.

Matthews said he spends most of his day, five days a week, working on the library’s 19 machines, and has trouble keeping them all running.

“Vandalism is a major problem around here,” Matthews said. “They help get the books back on the shelf faster,” Brewer said. Instead of a student taking home a book for a few days, they can just make a copy. This way the book can be back on the shelf within a day.

Brewer also feels the copying machines help prolong the life of the library’s books and magazines. If a student ripping pages out of a magazine or book, they can just make a copy. This way the book can be back on the shelf within a day.

Brewer also feels the copying machines help prolong the life of the library’s books and magazines. If a student ripping pages out of a magazine or book, they can just make a copy, Brewer said.

Library officials said they hope to keep the price of a copy at five cents. If the price were higher, students might begin ripping pages out again, rather than paying the higher copy charge.

The Program of the Year isn’t on TV. It’s in the Air Force ROTC.

Look into the Air Force ROTC. And there are 4-year, 3-year, or 2-year programs to choose from. Whichever you select, you’ll leave college with a commission as an Air Force officer. With opportunities for a position with responsibility...challenge...and, of course, financial rewards and security.

The courses themselves prepare you for leadership positions ahead. Positions as a member of an aircrew...or as a missile launch officer...positions using mathematics...sciences...engineering.

Look out for yourself. Look into the Air Force ROTC programs on campus.

Heidi on Ice show features glories of colorful Hollywood

Southern Illinoisans will have an opportunity to see the glories of Hollywood and Broadway when Holiday On Ice visits the SIU Arena from Oct. 14-17.

Performance times are: 8 p.m. on the 14th and 15th; 2 and 8 p.m. on the 16th; and 2 and 6:30 p.m. on the 17th.

Tickets, which go on sale Tuesday at the SIU Arena Special Events Ticket Office and The Student Center Ticket Office. Prices are $5.50, $4.50, and $3.50.

Tickets may also be ordered by Mail, Mail orders will be accepted at “Holiday On Ice” SIU Arena Manager’s Office, Carbondale, and should include the number and price of the tickets desired, and a check or money order made out to the SIU Arena in the correct amount, and a self-addressed envelope.

Vend-A-Copy employee Len Biedron performs “open slot” surgery on the coin slot of one of Morris Library’s broken photo-copiers. Biedron offers a word of advice to copy-conscious students: “Don’t put garbage in the coin slot.” (Staff photo by Chuck Fishman)
Congress spending lavishly, research organization says

By Louise Cook  
Associated Press Writer

NEW YORK (AP) - A new study shows that Congress spent nearly $1 billion on itself in the last fiscal year, almost triple what it spent in 1970. But the amount, the study notes, is less than the federal budget increased per appropriation, when the annual legislative payroll more than doubled in the period.

The study, developed by the Tax Foundation, Inc., a nonprofit research organization, in a report released recently by the拉开 said most of the spending increase was due to the substantial growth of legislative branch employment as well as significant increases in salaries and other costs.

The report said that appropriations for the Senate, the House, and their agencies totaled $428.3 million in fiscal 1978. The sum covers everything from stationery to salaries.

Appropriations for legislative agencies set up by Congress—such as the Government Printing Office and the U.S. Botanic Garden—were $48.3 million.

The total congressional expenditure of nearly $526 million works out to about $360,000 for every man, woman and child in the country.

The report said the spending level is in line to rise much further.

"The operating costs of the congressional agencies vary from one year to two or three in fiscal 1978 from $4 billion to $5 billion, or more," the group said.

It also noted that Congress "determines its own budget which, under law, must be included in the President's budget submission exactly as prepared." It makes its own rules, determines its own staff and salary levels, provides itself allowances and perquisites.

"Beyond this, each house makes these determinations for itself." When the annual legislative appropriation bill is acted upon, the House, it notes, "usually adds the whole budget or its entire and seldom, if ever, does either body challenge the other's other's.

The size of Congress' budget is small compared to some items. It is less than 1 per cent of the defense budget, for example, and only about 1 per cent of the total U.S. budget.

But the increase in Congress' spending on itself is bigger than ever. It increased in the over-all federal budget or the rise in the Congress' budget.

From 1960 to 1978, the budget for the liberal legislative branch increased 441 per cent, the overall federal budget grew 306 per cent and the Consumer Price Index went up 93 per cent.

From 1970 to 1978 alone, Congress increased its staff by 108 per cent; the total U.S. budget went up 98 per cent, and the CPI rose by 47 per cent.

A small part of the spending increase is due to the creation of new agencies since 1970. A more important factor is the growth in the congressional payroll. More than half of congressional operating costs in fiscal 1978 were for salaries and related expenses for members of Congress and their staffs and leadership offices.

The foundation said that the number of legislative branch employees has risen 22 per cent since 1975. The congressional staff alone has grown 44 per cent since 1970. The total civilian labor was grew 12 per cent in the same period and the number of people employed rose 8.8 per cent.

Members of Congress have gotten three pay boosts since 1960 and now earn $44,925 a year, plus allowances. The House and the Senate voted recently to exclude members of Congress from an automatic, cost of living pay raise due Oct. 1 to all federal Civil Service employees. The increase would have boosted salaries for representatives and senators to $66,750.

Congressional staff salaries vary, but the foundation says levels are "high by almost any standard." It said a report issued in July 1975 estimated the average income of Senate employees at about $13,000 and the average income of House employees at $14,000. That compared with a national per capita average income of just over $5,000.

A supplemental pay increase passed last October accounted for $4.7 million of the appropriations for operations of the Senate. $1 million of the appropriations for the House, $136,000 of the appropriations for past activities and $8.8 million for appropriations of legislative branch agencies.

Here is a rundown of the estimated 1976 and 1979 expenditures for Congressional agencies not counting the substantial increases:

- President's Capitol building and grounds and the operation of the Senate restaurant: $123.4 million in 1976, $24.4 million in 1979.
- U.S. Botanic Garden, collects and grows plants for display and congressional offices: $1.3 million in 1976, $900,000 in 1979.
- Congressional Budget Office, assists economic committees with respect to the budget and revenues.

Rubber checks accumulate, agencies can barely keep up

-By Steve Beaman
Daily Egyptian Staff Writer

"Carbondale must be one of the leaders in bad check writing," said detective Ralph Brandon of the city police.

A few figures support this point:
-Check Mate, Inc., a bad check listing service, has more than 880 names on its weekly list.
-For the first week of school, the University Bursar's Office had more than $9,000 in bad checks returned.

Brandon said he needs three fulltime assistants to keep pace with the volume of bad checks he deals with.

Brandon said the figures could be lowered if merchants would take more precautions and be more selective in accepting checks.

He said many merchants are hesitant about having strict check cashing policies because they are afraid of losing business.

About 50 businesses in Carbondale use the Check Mate service.

Check Mate lists all persons who write bad checks and is available by subscription. If a person's name is on the list he or she will not be allowed to cash a check at any of the other businesses using the service.

Scott Johnston, developer of Check Mate, said the list is updated weekly so a name can be dropped from the list as soon as the check is paid.

Brandon said most of the businesses using his list are in the Downtown Student Center area on South Illinois Avenue. He added, "If it weren't for students...anybody using the business.

Brandon estimated more than 50 per cent of the names on the list are students, and half of those are freshmen.

He said 30 percent of the Check Mate service, Johnston said, one store had a 60 percent reduction in bad checks over a six month period.

Johnston said the list was an informal system of collecting because people do not like to have their accounts listed and are denied check-cashing privileges at subsequent stores.

Also using the list are the city police and the Door to Door Collection Service.

Drug and alcohol counseling are the only local collection agency in Carbondale.

Field rep. says Greeks on move

"The Greek slump of the sixties and early seventies is over," according to Al Dabney, Field Representative for Alpha Epsilon Pi, one of the largest greek organizations on campus.

"The field report is that Greek life and greek societies are on the move!"

During a visit to the SIU chapter though some merchants use IC Systems, Inc., a national firm based in Minneapolis, Minnesota.

A spokesman for Door to Door said the firm recovers about 40 to 45 percent of the checks returned to the agency.

He said national firms collect only about three per cent of the bad checks turned over to them.

The agencies were formed in July with only one store using its services.

Robert Common, manager of Door to Door, said the firm is lenient with offenders and will work out payment plans if the person can't afford to cover the check in one payment.

He said most people will pay for the bad check as soon as they are confronted. He said the agency has a very strict policy against the use of any form of harassment.

"Most persons with bad checks would rather hire the knocking on their door than the police," said Brandon.

The University does not use a collection agency, but has the most effective deterrent against students writing bad checks—the withholding of grades and transcripts.

Even though more than $9,000 in bad checks were returned to the Bursar's Office in one day, the average annual loss due to bad checks is only between $1,000 and $1,500 a year, said Thomas Watson, director of the Bursar's Office.

The University charges $2 for the first bad check and $1 for each additional bad check written by the same person in a six month period. Persons with bad checks can pay in one large payment.

Brandon said he expects to see more bad checks on the list.

He said the list is updated weekly, so a person's name is on the list for one time offenders.

Brandon said checks returned because the account is closed are the easiest type to prosecute. Under Illinois law, a person writing checks on a closed account can be convicted of fraud.

The spokesman for Door to Door said, "Business for the bad check writer is good!"
The following programs are scheduled for Tuesday on WSIU-FM, Stereo II:

6:40 a.m.—Today's the Day; 9 a.m.—Take a Music Break; 11 a.m.—Opus Eleven; 12:30 p.m.—WSIU Afternoon News; 1 p.m.—Afternoon Concert; 2 p.m.—Peoria Symphony; 4 p.m.—All Things Considered; 5:30 p.m.—Music in the Air; 6:30 p.m.—WSIU Evening News; 7 p.m.—Civilization in Education; 8 p.m.—Music From Marlboro: Schumann's Trios; 10 p.m.—Arabesque; 10:30 p.m.—WSIU Late Night News; 11 p.m.—Boulevard of the Broken Horse; 1 a.m.—Nightwatch (Requests 452-4534)

Funeral service to be Tuesday for retired professor

Funeral services for retired political science professor Max M. Sappenfield, 67, have been scheduled for Tuesday in Bloomington, Ind. Mr. Sappenfield, a former director of personnel at SIUC under the presidency of Delwy W. Morris, died about noon Friday at Methodist Hospital in Indianapolis following surgery.

Services will be at 3 p.m. Tuesday at Day Mortuary in Bloomington. Burial will be in Rosehill Cemetery, also in Bloomington.

Mr. Sappenfield was late in the Illinois State University Retirement System. He was also a board member of Memorial Hospital in Carbondale, and Herrin Hospital, and was past president of the National College and University Personnel Association.

Mr. Sappenfield belonged to the Carbondale YMCA, and was a member of the Christian Church in Bloomington.

He was born Sept. 12, 1908, in Bicknell, Ind., and was married to Elizabeth King of Walla Walla, Wash., who survives.

Dissatisfied?

Don't judge the art of Ishihara by other works or programs accredited to Ishihara. Ishihara's Korare is different from any other program in Southern Illinois. The judge for yourself.

In the spring of 1976, a political scientist in California conducted a national poll to extract a political advantage from its return has come into the news.

This was apparently the case when $30.4 million worth of art treasures were stolen—but soon recovered—from Sir Alfred Beit in Ireland two years ago.

Kissane, retired head of the New York police department's larceny and burglary squad, said his new organization, the nonprofit International Association of Art Collectors, is reporting only 42 million worth of art thefts last year.

May be link between art theft, drug trafficking, group says

NEW YORK (AP) — Art thieves' ranks just behind illegal drug traffic, according to police in recent crime and the two may well be linked, says the head of one New York police organization.

"It's the ideal kind of organized crime to make money, to pay off for heroin or to help support a drug habit," Thomas Kissane said in an interview. "What custom officers are going to ask questions about a painting you've got under your arm?"

More and more, stealing art to extract a political advantage from its return has come into the news.

Faculty recitals begin Wednesday

The SIU School of Music presents Kent Werner in a faculty recital at 8 p.m. Wednesday, in Shryock Auditorium.

A native of Belleville, Werner is a professor of oral music at SIU. He will open this year’s faculty performance schedule with a two-part concert.

The first half of the recital will be devoted to Brahms, illustrating both late and early aspects of his style.

In the second half of the program, a group of pieces reflecting the reactions of three twentieth century composers including Stravinsky, Copland, and Gershwin, is featured.

The program will be part of a continuing series of faculty performances throughout the year.

School of Music recitals are free and open to the public.

Beg your pardon

An article in Friday’s Daily Egyptian incorrectly stated that the first auditions for “Theater 4” will be held Sept. 11. The first auditions will be held Wednesday, Sept. 15 at 7 p.m. in the Theater Lounge, Room 1032, Communications Building.

PIETA ON LOAN

DALLAS (AP) — Southern Methodist University’s Meadows Museum has borrowed a 16th-century painting of the Pieta done by Spanish artist Juan de Juanes.

This is a painless process, but Brian Rice appears to be grimacing as he presses his thumb on identical thumbprint paper, a check-verifying method employed by Brooks Fashion Store in the University Mall, Assistant Manager Jo Ann Hornaday oversees the process. (Staff photo by Linda Henson)

Businesses use variety of bad check detectors

By Steve Bauman
Daily Egyptian Staff Writer

Merchants love business, but they hate bad checks.

As a result, some area merchants will not accept checks from anyone. Others, afraid of losing the business, attach a thumb print of the check writer to each check, pay a special fee to insure each check for the amount for which it was written or take a picture of each check cashed.

These are the extremes. Most area businesses serving students demand student identification cards and current fee statements and perhaps some additional identification.

Brooks Fashion Store in the University Mall uses a non-invasive method of taking a thumb print and attaching it to each check.

The system, known as Identical, has been helpful in cutting down on the number of bad checks the store receives. JoAnn Hornaday, assistant manager, said.

Union Jack, also in the Mall, occasionally will have a check insured by a Los Angeles-based corporation known as Tele-Credit. Lee Spann, manager of the store, said that under this system, a clerk can call Tele-Credit to see if the company has a record of this person writing a bad check.

If the person is not on the computer’s list, the company will insure the check for the amount for which it is written. Tele-Credit charges a percentage of each check insured.

The Saluki Currency Exchange is among the businesses which take a picture of each person who writes a check. Some store managers feel this cuts down on the number of forgeries attempted.

All the merchants contacted who use Check Mate, a weekly listing of bad check writers, say the list has cut down on the number of bad checks their firms receive.

Many chain stores in the area require a person to have a check cashing card with their store.

To receive a card, the check writer must fill out an application. The information on the card is forwarded to the applicant’s bank for verification.

Most businesses will accept checks for the amount of purchase only. Boren’s IGA and National Stores will accept checks for $30 and $55 over the amount of purchase, respectively, after a good record has been established.

Republican hold dinner to promote Barkhausen

By Scott Singleton

Daily Egyptian Staff Writer

Republican gathered in Marion Saturday night to roast their opponents at a fund raising dinner for David Barkhausen, candidate for the Illinois Senate in the 50th District. James Thompson, candidate for governor, was the guest speaker.

Barkhausen, a 1974 graduate of the SIU Law School, announced at the dinner that he will debate incumbent George McFadden, D-Marion, Oct. 15 on WFSU-FM. Ed Brown, broadcasting director of WFSU-FM, said Monday that he had invited both candidates to debate. He said Johns offered the Sept. 3.

About 20 Barkhausen supporters got a chance to mingle with inusitement state representatives Bob Winchester, Roscarel, and Ralph Dunn, D-Marion. as well as congressional candidate Pete Prineas, Carbondale, state representative candidates Robert Butler, Marion, and Joe Dakin, Carbondale.

Prineas, an engineer running against U.S. Rep. Paul Simon, D-Carbondale, said he was awaiting word on a poll his organization had done. He said he wasn't very optimistic about the results, because most people wouldn't even complete the questionaire: "I didn't even engineered." Prineas said his top campaign priority would create medical care and other social programs. The Socialist Workers candidate would provide jobs, he said, for governor.

The Socialist Workers candidate would promote Barkhausen. Barkhausen said Johns had put his salary and accepted her support of presidential candidates Prineas, an engineer running on the Democratic or Republican right's platform, Haig said neither he said. Prineas said. In the Democratic party, the Democratic platform, Haig said neither he said. Prineas said.

Barkhausen, 26, launched his campaign for governor, Susan Haig, will speak at 8 p.m., Tuesday, at Activities Arena on the campus of the Student Center.

The Socialist Workers candidate for governor, Suzanne K. Miller, said, "I've got new news. Her platform, Haig said neither he said. Prineas said. In the Democratic party, the Democratic platform, Haig said neither he said. Prineas said.

Bears to pay Butkus in suit settlement

CHICAGO (AP) — The Chicago Bears agreed to pay former linebacker Dick Butkus $600,000 to settle a damage suit, Butkus’ attorney said.

Butkus, a top National Football League star for years, had charged the Bears with breach of a five-year contract.

He contended in the suit, filed more than two years ago in Circuit Court, that he was seriously injured in a game in November 1973. He said surgeons and the team physician examined him but said he was unable to perform the services required by the contract.

Butkus, 33, argued that extensive injuries from cortisone and other drugs caused irreparable damage to his knee and that he had not been advised that the long-term effects of the drugs might be.

His attorney, James Dooley, said they agreed to settle the $1.5 million suit for $600,000.

Butkus was the Bears’ No. 1 draft pick in 1965 and had played college football at the University of Illinois. He played nine seasons in the NFL and was one of the game’s all-time great middle linebackers.

Butkus said in filing the suit that doctors told him he “may well never again be in the necessary physical condition to play professional football.”

He argued that the Bears management did not provide him with medical and hospital care promised in his contract.

Butkus issued a statement in which he said, “I am very happy that this litigation between myself and the Chicago Bears has been terminated. I want it known that my respect and affection for George Halas Sr. has not been affected ... Professional football is still my first interest. While I played the game I gave it my all. My true regret is that I can no longer be a participant ...”

Dooley said, “Dick is satisfied and that’s what is important. They paid because they played him when they shouldn’t have.

“I don’t think there should be such a thing as a team physician. He can’t serve both the team and the players. There’s a distinct conflict of interest.

“As it is now, when a player is found physically qualified by a trainer or team physician, he must participate or be suspended and fined,” said Dooley.

“There’s no doubt in my mind this lawsuit will have an affect on the National Football League, particularly with some teams who use players differently than others.

“I believe they should make available to the players physicians whom the players have a right to consult. These physicians would be obligated to the players and not the clubs,” added Dooley.

Set to hit college Top 20; Michigan, Ohio St. on top

By Associated Press

Michigan and Ohio State, the big two of the Big Ten, took over the 1-2 positions in The Associated Press first regular-season college football poll Monday with just one point separating the two arch-rivals.

As a result of the weekend’s wave of upset, Nebraska surrendered its No. 3 spot to Arizona State and dropped to eight place while Arizona State slipped from second to third. Nebraska was held to a 6-4 tie by Louisiana State and Arizona State bowed to UCLA 18-10. Louisiana State was unranked, now in No. 11 and UCLA moved up from No. 15 to fifth place.

“Not one team I’ve seen is any indication of what’s coming up,” said 182. Marilyn Hollier, 183. Hunter, referring to the weekend’s wave of upset, Nebraska surrendered its No. 3 spot to Arizona State and dropped to eight place while Arizona State slipped from second to third. Nebraska was held to a 6-4 tie by Louisiana State and Arizona State bowed to UCLA 18-10. Louisiana State was unranked, now in No. 11 and UCLA moved up from No. 15 to fifth place.

The women’s golf team had a rough rode of it at the Big Ten meet, placing seventh in the eight team Missouri Invitational at Columbia.

One bright spot was the Saluki’s Sandy Lemon. The freshman from Virginia turned in a score of 157 to place her in the top 10. She was two strokes behind medalist Shelly Groe of Stephens College.

Stephens College won the meet with a score of 646, and the Salukis finished with a 694 total. The totals are taken from the top four players on each team, and the fifth score of the team is dropped.

Other Salukis and their scores were: Donna Hodes. 180, Judy Dohrman, 182, Marilyn Hollier, 183. and Lori Sackmann, whose score of 187 did not count.

Dohrman came back to shot a second round 79 after a disastrous first round of 192.

Indiana came in second with a 691 total, and Kansas took third place with a 670 score.

“I’m not terribly upset with our showing,” said Coach Sandy Blass. “It’s not that bad. I’m just a little baffled at what we were. I think we were a little much worse than that. I think we played as well as we are capable of playing. We had a better showing this year than we had last year. We have a lot of talent. We just didn’t play as well as we should have.”

Women golfers fall to seventh place

Missouri, Unranked in the preseason poll, the Tigers wallowed in the conference South Carolina 46-25 and ranked in the top 10 in the Associated Press’s top 25 poll for the first time in eight years.

Michigan’s Wolverines, runners-up to Nebraska in the preseason ratings, returned Wisconsin 40-27 and received first-place votes and 1,076 points in a possible 1,200 points in nation-wide poll of 61 sports writers and broadcasters. Ohio State, which unseated Michigan State 49-21, pulled down 18 first-place ballots and 1,076 points.

In third place was Pittsburgh with first-place votes and Missouri, Penn State, Arkansas, Kansas. Alabama. Florida. and Georgia

A&M,

Carolina. Arizona State.

The other two first-place ballots went to fifth-place UCLA. The Bruins totaled 731 points.

Roundout the Top Ten were: Missouri, Penn State, Nebraska, Georgia and Maryland. Penn State. No. 10 in the preseason voting, defeated Stanford 15-12. Georgia climbed from 16th to ninth by oustriping California 26-24 and Maryland jumped from 12th to 10th by a 31-17 romping of Richmond.

Field hockey team romps; Meyer nears scoring record

By Elizabeth BoKIa Daily Egyptian Staff Writer

The SIU Women's field hockey team scored its most goals ever in a game when it defeated Southeast Missouri State 8-0 in the season opener Saturday.

Sophomore Helen Meyer scored five goals for SIU in the game, and is two goals short of breaking the school career record of 35. Senior Lisa Millar also scored for SIU, her first goal in four years and a personal objective for the defensemen. Diane Bednarz contributed two goals.

SIU Coach Julie Illner said she was very pleased with the opening game play, and added that Miller's play was indicative of how much on the attack the entire team was.

SEMO had the ball inside SIU's 25 yard line less than one minute into the entire game, and took no shots on goal as opposed to SIU's 29.

Illner said there was excellent individual effort in the game, but that Pat Matreci played outstanding by setting up over half the shots in the game. Matreci suffered a back injury but is expected back this week.

"Although the opponent was not strong, the kids were really ready to go," Illner said. "But the real test of the team strength will show in next week's game against Eastern Illinois and Principia College."

Illner said those two teams represent the most difficult in-state competition SIU will face this season. The three team contest will be held at Eastern Illinois Charleston Saturday.

In junior varsity action, SIU lost to Meramec College 2-0. The JV team will travel to Charleston Saturday for games against Eastern Illinois and Principia College.

**Cowboys round-up Salukis in opener**

By Rick Korch
Daily Egyptian Sports Editor

LAKE CHARLES, La.—The Salukis went into the season opener looking like a new team with new players, a new coach and a new outlook.

But they came out of the game looking like a team.

And McNeese State started off their season like they ended last year as they defeated SIU 38-6.

The Salukis downfall came early in the game when their quarterback Keith Clark, who they realized the game had started.

On McNeese's sixth play from scrimmage, tailback Mike McArthur skirted through the SIU line and went in to the end zone, and it was McArthur, game from there on, even though SIU blocked the extra point.

McNeese had said in past week that the Salukis would have to start fast if they wanted to win, and it held up against the McNeese Cowboys.

And Jimmy McNeese was the first to say that the Salukis would be allowed to add up to the score fast. "That's when we needed to start," he said. "In the second half, we lost any composure that we may have had and we couldn't get back on track," Dempsey said.

He continued to say that after looking at the film, the defense should have let up only 13 points, but admitted that the Salukis would still have lost.

The Salukis only reached McNeese territory once the first half, but a penalty pushed them back. Late in the fourth quarter, SIU started a drive and went to the McNeese 12-yard line. They looked like they were going to avoid a shutout, but Kelly was sacked for an 11-yard loss, and on the following play, Andre Herrera (who gained 57 yards in the game), fumbled and the opportunity was thwarted.

McNeese Coach Jack Doland said after the game, "We had a great night—it was practically flawless. In fact we only made one bad error—the extra point that was blocked."

"But it takes nothing away from SIU," he said. "They're just trying to get it going."

But while Doland found good things about the Salukis, Dempsey didn't mention too many.

"We were lousy all over—we didn't do anything right," Dempsey said. "There were a tremendous amount of mechanical errors."

McNeese gained 387 yards in the game, 236 of them on the ground, while the Salukis netted only 64 yards of total offense, 27 passing, and 37 passing.

Terry McFarland of the Cowboys, who started off his first college game hit 6 of 10 passes for 122 yards, while his SIU counterparts, Bob Collins and Jerry Bly, completed 1 of 3 passes.

"We're not as bad as we were last year," he said. "It just shows how far we have to go."

**Salukis coralled**

McNeese 21
SIU 0

First downs 21
Passes 9
Passed 2
Punted 2
Penalized 7-56
Total yards 12-118
Total penalties 5-15

**Hartzing said it all**

The Salukis scored two touchdowns in the game for a total of 11 yards while the Salukis completed five of 13 passes by 31 yards.

Poor pass protection and a tough Cowboy secondary thwarted the passing game all night. (Staff photo by Rick Korch)

The Cowboys swarm wingback Vic Major after he receives pass from Jim Kelly. Major made two receptions in the game for a total of 11 yards while the Salukis completed five of 13 passes by 31 yards.

**Illini run past SIU cross country squad**

By Doug Dorris
Assistant Sports Editor

The University of Illinois placed eighth runners in the first 10 places to bury SIU 28-6 in a dual cross country meet held Saturday in Carbondale.

As expected the Illini's Craig Virgin, the 1976 NCAA individual champion, won the four-mile race in a time of 19:56. The two Salukis finishing in the top 10 were sophomore Paul Craig, who was second with a time of 20:18, and sophomore Paul Craig, who finished fourth with a time of 20:30. Actually, neither SIU cross country coach was impressed with the Salukis showing against the team that finished 10th in the NCAA Finals last year, and lost no runner of significance to graduation.

"We looked good," Don Merrick, SIU assistant cross country coach, said. "But Illinois is probably one of the top two cross country teams in the nation, along with Eastern Michigan. Team— that's what's strong about Illinois. They have so many good runners they could have get first or second to win a meet, but with Virgin, of course they always do," Merrick said.

Saluki Head Coach Lew Hartzing said, "I am more than pleased with what Sawyer and Craig did today. They beat the first 10 places to bury SIU 28-6 in a dual cross country meet held Saturday in Carbondale.

Against Southeast Missouri, Deems, Schuh and Sawyer beat Eastern Kentucky 5-7, 6-3. Sue Cipak beat Joan Schneider 6-3, 6-4; Breite beat Connie Joanes 6-4, 6-0; and Dorothy bố, who lost to Martha Lehman 6-4, 6-4. Lori Wright beat Rhonda Hibbits 6-3, 6-2; Rose Cittadino beat Cathy Laipple 6-5, 6-4.

In doubles, the only SIU winning team was Breite and Schuh over Vanguilder and Lothmann 6-7, 7-6, 6-2. The losers were Wright and Cittadino 4-6, 5-7 to Schneider and Joanes and Anna Hartin and Kim MacDonald 4-6, 6-7 to Hibbits and Laipple.

"We really looked good," Coach Judy Auld said. "But we still need to work on a sore knee."

SIU's next meet is Saturday, when they travel to Bloomington, Ind. for a triangular meet with Indiana University and Western Kentucky University.

**SIU netters sweep opening matches**

The SIU women's tennis team opened its season the right way by sweeping two Midwest foes.

The Salukis defeated Eastern Kentucky 7-2, Friday and won 6-3 Saturday over Southeast Missouri.

Leading the way for the Salukis in singles play were Sue Briggs, 6-2, 6-1 over Nancy Cappola; Marsha Blade 6-4, 6-1 over Leigh Grades; Carol Foss 6-1, 6-1 over Kathy McGahen; Kathy McGahen 6-1, 6-1 over Wendy Campbell; Shar Deem 6-1, 7-6 over Carol Hagans and Tbe Breite 6-2, 6-1 over Jon Adam. In doubles play, Briggs and Blade beat Cappola and Grades 6-1, 6-0; Foss and Kohler lost to Lisich and Campbell 1-6, 2-6; and Breite and Trina Schuh beat Hagens and Adam 7-4, 3-6.

Against Southeast Missouri, Deems and Ann Vanguilder 6-7, 6-3, Sue Cipak beat Joan Schneider 6-3, 6-4; Breite beat Connie Joanes 6-4, 6-0; and Dorothy bö, who lost to Martha Lehman 6-4, 6-4. Lori Wright beat Rhonda Hibbits 6-3, 6-2; Rose Cittadino beat Cathy Laipple 6-5, 6-4.

In doubles, the only SIU winning team was Breite and Schuh over Vanguilder and Lothmann 6-7, 7-6, 6-2. The losers were Wright and Cittadino 4-6, 5-7 to Schneider and Joanes and Anna Hartin and Kim MacDonald 4-6, 6-7 to Hibbits and Laipple.

"We really looked good," Coach Judy Auld said. "But we still need to work on a sore knee."

Some of the freshmen, especially Foss and Kohler, were very nervous, Auld said, "it's typical of their first college match with a top team system."

A good sized crowd showed for the matches, especially Friday, when Auld estimated over 200 came by at one time or another.

Three teams will be at SIU Friday and Saturday. The Salukis will host Memphis State at 3 p.m. Friday, and will play Missouri-Columbia at 9 a.m. and Indiana at 2 p.m. Saturday.
