Rainfall equals two-month average

By Dean Weaver

Flooding roads and buildings dumped residents' spirits Sunday when Carbondale received two months' average rainfall in 14 hours.

WSIL meteorologist Jim Razor said the Carterville station measured 1 inch of rainfall between midnight and early Sunday afternoon, which is what two months of average rainfall would be for this area.

Deputy Donna White of the Jackson County Sheriff's Department said at 10 Sunday morning all major roads in the county were closed, but by 2 p.m. only U.S. Route 51 at De Soto and Old Town Creek Road south of Murphysboro still were impassable.

"A lot of cars were stalled but we had no report of injuries," White said.

Corporal Donna Kinca of the SIUC Police said three cars were reported stalled from the flooding on campus streets, but the department had received no reports of buildings being flooded, accidents or injuries.

Tina Beaulieu, assistant director of the SIU Arena, said every locker room in the building was flooded Sunday.

"This is the worst I have seen it in several years — there is a half inch to an inch of water in the football locker room," Driver said.

Driver said hallways and weight rooms also were flooded, but no equipment was damaged.

Power outages occurred throughout the city as a result of lightning, and a Carbondale City Schools' dispatcher said.

The power outages started at about 10 a.m. and lasted until about 5 p.m., with the majority occurring on the west side of the city of Carbondale," the dispatcher said.

Lt. Jerry Renno, watch commander for the Carbondale Police Department, said the city only closed off one street, the 2600 block at Sunset, which was flooded by backwater from Little Power Street.

Professor says protectionist attitude detrimental

The North American Free Trade Agreement would benefit Illinois by creating more jobs with a positive effect on agricultural exports, an SIUC professor says.

SIUC associate agribusiness professor Jeff Beaulieu spoke to a small crowd Friday afternoon about the agreement's effects on agriculture and the lessons to be learned from it.

"The United States should not become protectionists," Beaulieu said. "But at the same time, we should be careful about the specifics of the agreement and the effects on people involved."

The agreement, drafted in 1991, would eliminate trade barriers between the United States, Canada and Mexico gradually during a 10-year period, Beaulieu said.

The controversial agreement has sparked concerns about the effects on employment, the environment, illegal immigration and politics, Beaulieu said.

The agreement currently is being debated in the U.S. House of Representatives and will come to a vote Wednesday.

Beaulieu said the agreement would have a positive effect on U.S. agricultural exports.

"Comparing to 1992 reports the USDA estimates to Mexico, the agreement would significantly benefit the agriculture industry in the U.S.," Beaulieu said.

Beaulieu cited figures from the United States Department of Agriculture estimates on the agricultural effects of the agreement:

\- In 1992, U.S. exports of beef were $2.6 billion.
\- In 1992, U.S. exports of feed grains were $1.8 billion.

Student-run transit system on agenda for SIUC future

By Tina Davis

Two student leaders will meet with an SIUC administrator today to discuss alternatives for a Carbondale mass transit system.

Undergraduate Student Government President Mike Spowak and Sesan Hall, Graduate and Professional Student Council president, will discuss a student-run mass transit system with James Tweedy, vice president for administration.

Spowak said Tweedy called him to react and discuss a proposal to start a student-run mass transit system instead of a city system.

"The idea is to start a transit system through the University for the University," Spowak said. "Maybe expand the transit service or something."

Hall said USG has been trying to get a bus system since 1987.

Fans unfamiliar with team's bench

By Karyn Viverito

Saluki basketball fans will have to play the role of super-sleuth this season to figure out who will step off the bench for the men's team.

Saluki basketball fans will have to play the role of super-sleuth this season to figure out who will step off the bench for the men's team.

Scott Bierzymski, Ian Stewart, Tim Pace, Patrick Greathouse, the list of players grows larger but the names do not click in the heads of most Saluki fans.

The unfamiliarity can be attributed to the fact that the most player averaged less than two minutes per game last season. Their combined total minutes of playing time is 40 out of 3,600 minutes on the season.

Head coach Rick Herris said he is concerned that this year's team has little depth.

"We have to get play out of some guys who have probably never even heard of Joe Stewart and Bierzymski," he said. "These guys have to come through for us, and you have never even heard of them."

The lack of depth is providing some concern among players that include returning starter, forward Mitko Pavlovic, who said players see PLAYERS, page 5

The wet conditions of Saturday's District V Regional Championships caused SIUC's cross-country title hopes to slide away. Iowa State proved why they're No. 2 in the country in the men's side by out-running Big Eight rival Oklahoma State who placed second. However, both squads will advance to the national championships on Nov. 22 in Birmingham, Penn.

Nebraska came on strong and captured third, while SIUC was the top Missouri Valley team and finished fourth. A men's head coach Bill Cornell wasn't able to speak with his athletics after they're run, but said he'll have a meeting on Monday to express his gratification with their performance.

"I'm looking forward to Monday, to praise them for what they did," he said. "They have nothing to be ashamed of because we're the conference champions.

Team captain Garth Arkal was SIUC's top runner, capturing 12th place overall in the 112-runner stampede. His performance marks the first time this fall that the South Africa native placed first for the Salukis.

Neil Emerton also stood out for the Dawgs, breaking the tape 33:51 to secure the 16th spot, Martin Fydh and Dan Mallon continued their late season surge by coming 34th and 35th, while Mark Russell, Josh Daly and Saxton Mostely placed 53rd, 60th and 85th respectively for SIUC.

"I've been proud of everyone on this team, but Garth Arkal came through in an exceptionally good race," Cornell said. "Neil Emerton had the best season of all and can be considered most valuable."

The surprise of the season though, came from sophomore Dan Mallon. A product of Longwood High School in Middle Island, New York, he will be providing a bright spot for SIUC in the future.

"Dan Mallon is a real scholar-man, but he'll get one next year," Cornell said. "He was my top finisher at the conference championships because without his performance, we wouldn't have won it."

The women's conference on Saturday turned out to become soft and footing was unsure. Before the race, Cornell helped spread 50 to 60 bags of wood chips on the tracks hill in order for the runners to be able to climb up the type of running conditions worked against SIUC's team. Since most of their athletes are 1500-meter runners and perform better when the ground is solid, see RUN, page 14.

The women runners are off and running after the start is sounded at the NCAA Regional competition, while the SIUC men's team placed fourth in their competition.

**Women hoopsters set to prove they deserve ranking**

By Kevin Bergquist

Women's basketball

Wanted: Fourth-place team to fill void in Missouri Valley Conference preseason poll.

Experience. Very little needed.

The SIUC women's basketball team got the job, as the Salukis were tabbed to finish fourth in the MVC preseason women's basketball poll announced Wednesday.

The Salukis got the nod despite returning no starters from last year's 19-10 squad which finished second in the league (12-4) and came within a basket of making the NCAA Tournament.

SIUC head coach Cindy Scott said it is too easy to tell if her youthful squad is deserving of its fourth-place billing.

"I really don't put much stock in preseason polls; I never have," Scott said. "We have been picked first a million times and made it. I don't know if we can be fourth; I don't know what we can be."

Southwest Missouri State head coach Cheryl Burnett said SIUC has managed to stay high in the conference by strong recruiting.

"SIU has some great young players. They do a great job recruiting new players into the program every year," Burnett said.

Drake coach Lisa Bledsoe added: "Everyone knows Southern recruits great athletes. We respect coach Scott and her talents."

To earn one's surprise Southwest Missouri State was picked to defend its 1992 title. The Lady Bears advanced to the Sweet Sixteen last year after defeating SIUC in the championship game of the MVC tournament.

SMSU (14-2 in the MVC) returns three starters from last year's 25-7 squad. The Salukis were the only team of preseason all-conference selections in senior goalie Melody Howard and Tina Robbins.

Creighton (20-8, 12-4) garnered three first-place votes to come in just behind SMSU in second place. CU has four starters returning, including preseason all-conference performer senior forward Shannon Struby and Becky Flynn, an honorable mention pick.

Bluejay coach Connie Yori said she was happy with the ranking, but warned it is only that one that appears on paper.

"We are honored to be considered one of the conference favorites, but the games need to be played," Yori said. "I think we will have great depth and balance in the league. Five or six teams are capable of winning it."

Drake (15-13) finished fourth last year with an 8-8 league mark.

---

**Northern Iowa too much for SIUC in second half, slash Dawgs 49-17**

By Dan Losty

Sports Writer

For half of Saturday's game, the Salukis went toe-to-toe with the best, but one half of good football added up to a 49-17 loss to Northern Iowa.

The Dawgs are now 2-8 overall and 4-1 in the Gateway with one game remaining against Eastern Illinois.

The Salukis went 2-0 in their first three games of the season, finishing in the Lady Lakes Invitational, where Salukis won 2-1 deficit to claim the third place trophy and in the Saluki Quadrangular at Davies Gym.

The Salukis went 2-1 in their final three games of the season, finishing in the Lady Lakes Invitational, where Salukis won 2-1 (

The Salukis ended 1993 with a 14-13 mark after going 15-15 in MVC head coach's Sonya Leslie said she was happy the team achieved one of its season goals.

"I told the girls that we didn't qualify the (MVC) tournament, but produced that was kind of overshadowed by the fact that we had a season victory for the first time in history, so this is a huge step." said Leslie.

A winning season and another step up the ladder for SIUC as Leslie said she was happy the team achieved one of its season goals.

"I told the girls that we didn't qualify the (MVC) tournament, but produced that was kind of overshadowed by the fact that we had a season victory for the first time in history, so this is a huge step." said Leslie.

MILOSAV TICHTENING ON SERBIA - To ensure that he retains absolute power over the former Eastern European nation that was once the heart of Greater Serbia, Serbian President Slobodan Milosevic has rounded up theunningg supporters of his rival Vojislav Sejic and positioned itself to form a new government. If it succeeds, the Serbs' current president will become a "health catastrophe," a U.N. agency has concluded. The World Health Organization, in an annual report on the disease to be released Monday, says that "most people in Europe and North America have been watching other crises" - including AIDS - while tuberculosis has become "the world's most neglected health crisis."

ISRAELIS CRITICIZED FOR ARTIFACT SEARCH - Sixteen teams of Israeli archaeologists launched a sweeping search through caves near the Dead Sea on Sunday in what Palestinians complained was a last-minute hunt for artifacts before Israel withdraws from the area. The controversy provided a useful test of past practices when archaeologists search for ancient artifacts in occupied territories. Among expected disputes are Palestinian claims to other Israeli finds in the occupied territories, including the famous Dead Sea Scrolls now housed in Jerusalem's Shrine of the Book museum.

BOSNIA MAY RAIN ON 'FAIR-WEATHER' HOPES - A Jan. 10-11 summit was conceived as a showcase for the Clinton presidency to project an image that the United States remains wedded to NATO defense commitments and that the alliance has adapted to a new European security mission in the post-Cold War era. "The Americans badly want this to work, a fair-weather summit," a senior European diplomat said. "But the way that realities on the ground are shaping up, I'll be very surprised if they get their wish."

GERMAN RECESSON HINTS AT PROBLEMS - Unemployment is proving certain to climb above 4 million next year in a country of more than 30 million eligible workers. German Chancellor Helmut Kohl was told by his Council of Economic Advisors on Tuesday to expect by next year a jobless figure of 17.5 percent in eastern Germany and 11 percent in the western part. Hopes have faded that the new government of the German economy will tug the rest of Western Europe from the economic doldrums; unemployment among the dozen European Community members excluding Britain, Sweden, and Denmark is now at record levels and hard times will breed social unrest. Fringe political parties here hope to profit in next year's elections from the discontent in Germany.

TUBERCULOSIS THREATENS WORLD HEALTH - Public complacency and the ease of international travel have led to a resurgence of tuberculosis in the industrialized world that is threatening to become "a health catastrophe," a U.N. agency has concluded. The World Health Organization, in an annual report on the disease to be released Monday, says that "most people in Europe and North America have been watching other crises" - including AIDS - while tuberculosis has become "the world's most neglected health crisis."

CUOMO MAY RUN FOR FOURTH REELECTION - Welcome back. It's deja vu all over again. With the conclusion of the New York City mayoral race, Cuomo must now decide whether, after three defeats in the past ten years, he wants to run for a fourth (which, if he finishes it would make him the longest-serving governor in state history). And once again, he is not looking good. While theories are spun, rumors keep coming. He will become the new commissioner of baseball. History will show he is a man of little accomplishment. There is a growing feeling that he needs to go. His party really doesn't want him to be. He is seeking a national syndicated show to make him a radio talk radio show host. What crazy idea is that? It has to be a joke, right? No, it isn't. The fact is that Cuomo has never had a career and probably hasn't even heard this one yet. Numerous Democrats - including former Rep. Geraldine Ferraro to current Rep. Charles Schumer of Brooklyn are - believed eager to run if Cuomo steps aside.

Designs win student scholarship

By Kellie Huttes

Special Assignment Writer

When SIUC student Grit Vece sewed her first pair of shorts in high school, she was unaware she would be stitching up a way to finance her way through school.

Vece, a senior in apparel design from Frankfurt, Germany, won a scholarship Nov. 6 from the Fashion Group of Kansas in Kansas City for an all-linen, hand-dyed outfit she designed.

After high school Vece attended tailoring school for three years in Germany before meeting her American husband, Tom, and moved to the United States. 

Vince Quevedo, a SIUC clothing and textiles lecturer in the Department of Appare Design, said Vece was the first to SIUC in the spring of ’92 and has excelled in everything he has undertaken.

"Grit has an incredible dedication to school, she has a real interest in fashion, her classes, her design projects and her involvement in the Clothing and Textiles Organization," Quevedo said.

"A lot of students say they are dedicated, but few excel the way Grit does," he added.

Vece has shown her dedication to her program through her design and workmanship, Quevedo said.

"I wish I had a class full of Grit Veces," he said. "She makes teaching a good profession to be in."

Vece also has competed in the Fashion Group of Dallas apparel competition, in which she became a finalist with her all-linen design that week and returned Dec. 1.

The Dallas competition hosted more than 1,000 students and 100 designs were chosen to compete in the final show. In the past three years, SIUC has had the most fashion choices for competition, Quevedo said.

"Kendal Clothing and Textiles Program coordinator, said Vece is very talented and excels in detailed work."

"I can spot a Grit Vece design 25 yards away," Quevedo said. "In one word, her designs are regal."

Vece describes her designs as dressy and sophisticated. Designers can become stressful when they feel the pressure of their deadlines, she said.

"I have 11 more designs to make this semester," Vece said. "It's stressful, but I enjoy doing it."

"Kendal" is a clothing and textiles lecturer, said she is a very open-minded student and does the best possible work.

"She is a very creative student, and the quality of her construction is incredible," she added.

"We are very proud to have her as a representative of our department."

The amount of Vece’s scholarship is underwritten at this point in time.

**Cultural shock: changing habits**

Foreign students find homecoming an uneasy task

By Sean L. N. Hao

International Writer

Many international students studying in the United States express that cultural adjustment upon arrival, buy many fail to realize the return home also may be unsettling.

Mythil Rundblad, coordinator of the SIUC International Programs and Services, said international students who have studied in the United States generally do not expect feeling will be different when they return home.

"People don’t think or expect that when they go home there will be a process of cultural readjustment," she said.

Most of them think they haven’t changed their habits.

Studies show overseas students who have occurred at home during a student’s stay in the states can conclude that they have changed.

"There can be a change in government, or maybe the economy is booming or depressed compared to when they left home," she said. "And maybe their families have changed, somebody has had a child or somebody has gotten married or maybe they find that they themselves have changed."

Paul Gibson, assistant professor plant and soil science, who has spent an extensive amount of time living abroad in locations in China, Costa Rica and Zambia, said students returning home need to anticipate difficulties.

"These students become composite of cultures compared with those people at home who sometimes can’t understand why they are different," Gibson said.

He said coworkers may feel the student’s changed because by international students who have higher levels of social life and are more experienced in their field.

Gibson and his wife Pauline touch on areas of concern to pry a students.

"They may become frustrated because they can’t apply what they have learned either because those above them don’t see the merits of their ideas or because of a lack of resources," he said.

"These students need to be patient and not take things too personal," he added.

"The visa status of all our international students allows them to get one year of training in the U.S.," said Gibson.

Rundblad said the seminar emphasizes the processes and rules of F-1 and J-1 visa practical work after graduation.

"The regulations for the two categories of visa differ slightly and many students do not realize how many overlaps the different categories," he said.

"The Job Search and Practical Training Seminar will be from 2:30 p.m. to 4 p.m. in the Ohio Room of the Student Center."

"The Predeparture Seminar will be from 10 a.m. to 2 p.m. in the Ohio Room on Thursday."

"Students interested in registering for the free seminars can call Mythil or Albert Liu at 453-5774."

Health officials suggest wise use of break may cut stress

By Katie Morrison

Health Writer

With final projects and exams looming ahead, Thanksgiving Break offers students a chance to recover from school stress, a Wellness Center official says.

For more senior students usually push themselves, even on the weekends, they need to relax. Jennifer Eliason, a health promotion specialist at the center said.

"Students can actually start their job search before they return back home during their last semester here," she said.

International students also can seek help through the service to find job and get settled in the United States, Rundblad said.

Rundblad said the service, for any SIUC student, can help students to write resumes.

"Who’s in the house?"

McKen Troutt (left), a Lincoln eighth grader, and his friend Teak Campbell, a seventh grader from Covenant Christian, spend part of their day off painting graffiti near the Recreation Center. The two were enjoying the nice weather last week.

"SIUC worker awarded top honor"

By Melissa Edwards

Minorities Writer

The demands of career, community and family can be a strain on many working women, but the Carbondale Business and Entrepreneurship Women’s Network has found a way to support and balance it all.

Illinois State, an accountant at SIUC, received the award at a dinner in October.

"The women’s group gives the award to a member who is active in the organization and the community, and promotes the concerns of women in the workplace," Quevedo said.

"It’s about being able to exceed in your profession and give just as much at home," she said. "Women have many roles."

In addition to organizational activities, Speith has been a softball coach in the Carbondale junior sports league, a Girl Scout leader and a Sunday school teacher.

"I don’t think, because I’m working, that I have any extra responsibilities."

However, professional organizations need to target young women to ensure they realise the many opportunities they have to do so.

Death tells the truth, cashes in on habit

CIGARETTE ADVERTISERS have resorted to many different techniques over the years to sell their carcinogenic product to the American public. In the 1950s, they sold themselves in commercials with doctors' testimonials. In the age of women's liberation, Virginia Slims marketed itself to accomplished females telling them, "You've come a long way, baby!" For a number of decades, the Marlboro man was marketed as the epitome of rugged masculinity and the frontier spirit. Since most brands offer essentially the same tobacco product, advertisers have catered to the psyche of American smokers to win over brand loyalty.

Death Cigarettes has taken a perplexing counter approach to traditional tobacco marketing with some surprising results. Death cigarettes, in black packaging with skull and crossbones logo, make no bets about what they are offering consumers. With the logo stenciled on each filter, the cigarettes embody the biological extremes of truth in advertising. The warning label on the side of the pack reads, "MANUFACTURER'S ADVICE: CIGARETTES ARE A DEADLY PRODUCT. A WARNING LABEL ON THE SIDE OF THE PACK READS, 'DON'T MAKE SMOKE, DON'T START. IF YOU DO SMOKE,QUIT.'"

DEATH IS SPREADING ON CIGARETTE RACKS across the nation right next to regular cigarette brands. Its ads have included: "an x-ray of a cancerous lung and the slogan "Don't smoke death cigarettes." The American Heart Association has noted that Death does a service in making fun of the tobacco industry's marketing of a lethal product that is the leading cause of death and disease in America.

In as much as Death's blunt realism calls into question the absurdity of sexually provocative cigarette ads that have little to do with cigarettes, they are a potential Goddess. They do not try, as many do, to sell attractive people in absurdly active settings smoking hazardous cancer sticks to entice others to smoke. Death's no frills approach could have a potential impact on truth in advertising. But there is also the possible danger of making truth a trendy, almost satirical gimmick.

WHILE DEATH'S SUBVERSIVE CAPITALIST approach may draw attention to the insanity of traditional cigarette ads, it also presents a new and unique danger. In a society where young people are bombarded daily with media images of death and violence, Death cigarettes may very well become the trendy, chic anti-youthful caricature.

The Guns N Roses rebel-rocking crowd already have flocked like lemmings to Black Death vodka, a similarly marketed product that even came in a cofin. With Slash as rebel posterboy, the product was more successful than most would have expected considering its high cost.

If teens choose to rebel and smoke, Death's skull and crossbones label offers a clear anti-authoritarian alternative to the tobacco marketing with some surprising results. Death's skull and crossbones label offers a clear anti-authoritarian alternative to the tobacco marketing with some surprising results. The Guns N Roses rebel-rocking crowd already have flocked like lemmings to Black Death vodka, a similarly marketed product that even came in a coffin.

DEATH'S SUCCESS IS HARMFUL TO THE public health, its marketing approach brings into light the need to question cigarette advertising and even the possible effectiveness of Surgeon General warning labels. As cigarettes continue to be a leading killer and main cause of much of our nation's health bills, anything which even cynically mocks tobacco's stupidity, even while cashing in on it, deserves the right to be heard and potentially enlightened. But Death all too cheaply ignores that while it informs, it also kills. Their cutsey, joking honesty is hardly consolation for the serious addiction and the destruction they further by their very existence. Just ask a teen or parent.

Student claims entertainment options unused

In a D.E. article entitled "USG sells troops of 300 to Sante bar entry age," a freshman was quoted as saying, "There is nothing else in this town to do, except go to Sante bar." Such an unimaginative statement frightens me, not because I'm against a student's right to drink alcohol or go to the bars. It is an example of the shallow vision students have toward the meaning of college experience.

Students feel oppressed, and indeed they are. Their fervent concern about this ludicrous issue is a symptom of their oppression. For it serves as a relative distraction from other, more vital student issues.

"You think you won a great political victory, but in reality you have just been thrown a bone on which you can punctually gnaw! While you're being whipped out of your educational investment. If you truly feel your actives can make a difference, I suggest you spend a little time and effort rallying to improve the quality of education. You will find this a much more difficult struggle. For you will find a system that is only interested in your money. If so, are truly concerned about education, write yourself a note stating the depth of your political concerns is limited to the bottom of a Bandit hourglass.

—Matt Sconolinski, graduate student, philosophy.

Student grateful to passerby for saving fiancée from death

My fiancée was attacked by three guys on Halloween. She received the D.E. and the general attitude that this University and the D.E. displays towards Greeks in general.

Firstly, while the presence of a photographer at Safe Halloween was greatly appreciated the coverage in the D.E. or lack thereof was disappointing.

Dear Greek Council Risk Management Chair Mack Scwhab, you worked very hard to promote and organize this event and with the cooperation from the sororities and fraternities at SIUC, we managed to show the parents and children of Carbondale an enjoyable time.

I do not live in the student housing, but I am constantly hearing of flyers being put on bulletin boards depicting Greeks as rapists, alcoholics and social degenerates. As a decorated Desert Storm veteran and someone who is essentially loyal to my organization, it is a personal attack on me when I hear and see these things.

The Greek system at SIUC does more for kids and the underprivileged of the Carbondale area than any other organization on campus.

We also perform many hours of volunteer work at local nursing homes and are involved with charity programs such as, Easter Seals, Red Cross and Cystic Fibrosis Foundation.

I ask you and the student population at large, is this the conduct of moral republicates?

With so many demands for equality and social sensitivity existing in our world today is it really worth the time to attack an organization whose main philosophy is that of promoting a bond of brotherhood and setting standards of scholarship and character high enough so that we might benefit our society, not drag it down?

Thank you for your time.

—Erik Bush, freshman, physical education

Such an unimaginative statement frightens me, not because I'm against a student's right to drink alcohol or go to the bars. It is an example of the shallow vision students have toward the meaning of college experience.

Students feel oppressed, and indeed they are. Their fervent concern about this ludicrous issue is a symptom of their oppression. For it serves as a relative distraction from other, more vital student issues.

"You think you won a great political victory, but in reality you have just been thrown a bone on which you can punctually gnaw! While you're being whipped out of your educational investment. If you truly feel your actives can make a difference, I suggest you spend a little time and effort rallying to improve the quality of education. You will find this a much more difficult struggle. For you will find a system that is only interested in your money. If so, are truly concerned about education, write yourself a note stating the depth of your political concerns is limited to the bottom of a Bandit hourglass.

—Matt Sconolinski, graduate student, philosophy.

Student claims entertainment options unused

In a D.E. article entitled "USG sells troops of 300 to Sante bar entry age," a freshman was quoted as saying, "There is nothing else in this town to do, except go to Sante bar." Such an unimaginative statement frightens me, not because I'm against a student's right to drink alcohol or go to the bars. It is an example of the shallow vision students have toward the meaning of college experience.

FLOOD, from page 1

Crab Orchard Creek.

Reno said the signal lights on Main Street and Walnut Street were not operating for 30 minutes because of a power outage.

Doe Horansky, an American Meteorological Society certified meteorologist, said the flooding resulted as a combination of two factors.

"The flooding resulted from the heavy rain but was compounded because in October we had seven inches of rain which was twice the average," he said.

Horansky said this area of Souther Illinois is only one to two inches above the yearly average rainfall.

NAFTA, from page 1

totalled $222 million, but with the agreement it would rise to $606 million.

• pork exports totalled $79 million, which would jump to $180 million with the agreement.

"A minimum exporter of $450 would increase to $1,035 under the agreement," Beaulieu said.

Illinois farms, which account for 19 percent of the nation's soybeans, would benefit through the agreement. Farming equipment and machinery exports, which is compounded in the state, would benefit from the lower tariffs at the border, Beaulieu said.

"We believe it will benefit the U.S. and the Mexican farmers. Mexico is a reliable trading partner as it has a stable economic structure and is not burdened with high currency rates," Beaulieu said.

Without the agreement, the U.S. is growing, but would grow more with such an agreement," Beaulieu said.

The agreement would create more jobs instead of destroying them, Beaulieu said.

"Recently, even though our unemployment figures have stagnated around 6 to 7 percent, we are still losing jobs. The losses in the U.S. that were not there before at the rate of 100,000 to 105,000 a month," Beaulieu said. "The Labor Department figured out what is going to happen by stating for every billion dollars export increased we create 19,600 jobs."

"The number of rice jobs will increase as more rice is being made by the tree trade agreement, Beaulieu said.

"Over the last five years, U.S. exports to Mexico have increased by $5.2 billion per year," he said. "The numbers of jobs lost are not that large when put in perspective."

"Mexico is plagued with infrastructure and distribution problems," Beaulieu said. "The U.S. is 80 percent of the Mexican market, while Canada is 2 percent of the Mexican market or a 30 percent along in this agreement."

"This agreement is not really trade without further amendments to the plan, he said.

"Even if you break unilateral changes from just the U.S. opening up their borders or including a few other partners, Beaulieu said. "You are not really going to make a definite movement toward trade until an something is negotiated with the General Agreement on Tariffs and Trade."

Beaulieu's lecture was sponsored by the International Agricultural Student Association.

"I'm a gainst the lecture, I wondered why the politicians have not talked to the farmers, they know the ins and outs," said Hauser. "We should look at the short term and long term effects before we talk about trade and it's too important because it is an agreement."

PLAYERS, from page 1

coming off the bench are going to have to step up their play."

"I think, we have a shot at a winning season, but we have a little problem with our depth," he said.

"Take Chris Lowery, he might have to play 40 minutes a game, and that's a scary situation that he might not get a break.

Lowery, returning to his starting role as one of the best point guards in the league, and he is prepared to play as long as he has to in games this season."

"You might see me playing a few 40 minute games this season, and as far as physically prepared I have worked all summer on getting stronger and I'm ready," he said.

Injuries and departures have plagued the Salukis who are without JoJo Johnson and Brian Piper who left the team after last season, and newly recruited fresh man guard Marcus Patterson.

Paterson, fresh out of Chicago's LaSalle high school, has not fully recovered from a gunshot wound to his lower leg.

He received the injury from a drive-by shooting last season before he came to school this summer.

Patterson said he is off crutches and is slowly making his way back, but his recovery is uncertain.

Accepting the challenge to step into a productive role off the bench is a former Illini, Stewart.

Stewart, who is versatile in his play, may get his chance as he will be ready to play when given the chance.

"I just want to play this year, I don't care where it is," he said. "I can't score anything stringing on the bench, I just need to get in there and get the opportunity."

On the mark when he shoots from three-point land, Stewart said he doesn't mind the thought of being a spot-up man, but would like to get tougher as well.

"I don't really like to shoot three-pointers, I could stand 4 or 5 all day," he said. Sometimes he shoots 20 to 30 free throws in a game while not realizing where I am at, thinking I've just come down the floor and am close to the arc," he said. "I'm meaner than that, I like to get in there and mix it up."

Forward Scott Burzynski is another bench prospect who is expected to come in and make a difference.

"One of the keys in my game is that I suppose a lot of people with my offensive ability," he said. "I think I might be like Chris Carr last year, he came in and wasn't expected to do anything, and he ended up being a great player."

"I think I might be in that situation this year."

Patrick Greenhouse, nicknamed by teammates as 'Rudy' after succeeding as a walk-on, also has other memories mentioned along with Tim Pac as being ones to step off the bench.

Both received limited playing time last season as Greenhouse averaged 0.8 minutes while Pac picked up an average of 1.1 minutes.

Pavlicic said Pace and Greenhouse could very well help out at guard positions.

"We have 'Rudy' who plays well and can play the one and two spot," he said.

"Wait and see" seem to be the words of wisdom, and hopefully Greenhouse can solve the mystery before super-sleuth fans do.

—By Phil Lowery
Persistence pays off for battle winners

By Stephanie Molett
Entertainment Writer

Crucis came out on top Thursday afternoon in the final round of the 10th annual Battle of the Bands at Beach Bums. The final round of the competition had Mass Face Funk, a rhythm and blues funk band, Crucis and Soul Dog, bands with all-original music and Dark Regime, a band with original music and a more alternative, heavy-metal sound. Mass Face Funk played more cover songs than any other band that made it to the finals, said Joseph Castrojoven, president of Sound Core and the backing band of Mass Face Funk. He said this probably is why the band did not win.

The bands are judged on originality, audience response, stage presence and music/tech- nical content. Mass Face Funk lacked originality, he said.

Crucis, a six-member band, found a team of youth over the past three years. Its persistence has paid off. Camarades said.

The band won a practice PA and has released new music with the opportunity to play and get exposure, said Castrojoven. That was the best of it, we had a lot of good bands and a good crowd.

The Battle of the Bands is a yearly competition to showcase the area’s best musical talent. All bands receive recognition and even if they did not win. Although this year’s battle is over, Beach Bums will continue to have a three-band showcase at 10 p.m. every Thursday, Castrojoven said.

The winning bands from the battle will play during those showcases and will get paid for their entertainment.

‘Carlito’s Way’ awes audience

Pacino, Depalma reunite for last shot at gangster success

By Thomas Gibson
Entertainment Writer

Hollywood legend Al Pacino excellently portrays reformed Puerto Rican gangster Carlito Brigante in director Brian Depalma’s newest masterpiece.

Pacino, the great actor who has played an old-assorted array of characters in his career from mafia boss Michael Corleone in “The Godfather,” to Cuban drug dealer Tony Montana in “Scarface” also directed by Depalma, pulls off another stunning performance in “Carlito’s Way.”

Pacino, typically as a gangster, has for years tried to break away from the genre, which has made him a millionaire many times over. However, Pacino appears out of place or artifacts as anything else on the screen.

Carlito and Pacino have the same vision, which is to get out of the gangster business as soon as he can.

“Carlito says, “If I’m not the one doing it, I’m in.””

The smart moviegoer will take that line and figure Pacino means this is his last gangster movie and he is out.

YOUTH, from page 7

freshman guard Kasia McClendon, McClendon, an all-state selection from West 5’s High School in Indiana, led her team to the state semifinals last year.

Gillespie and McClendon will be the catalysts for a team Scott said will run and press to take advantage of its quickness.

“One of our strengths is our ability to run the basketball,” Scott said. “We are going to press big time and we are going to play a lot of people. We might lose, but we won’t be soft.”

Solutions will be the center tandem of 6-3 junior Kelly Geisler and 6-3 senior Jennifer Williams in Indiana, led her team to the state semifinals last year.

Geisler averaged 1.3 rebounds per game last year in 6.7 minutes of court time, while Williams paced 1.6 points and 1.1 rebounds per game in 7.3 minutes.

“I think between Jennifer and Kelly, we are going to find ourselves in great shape inside the paint,” Scott said.

Another player who should help SJC along the front line is junior college transfer Angelene Sumrall. A teammate of Ransome’s in high school, the 5-10 Sumrall opted to play at Southwest Missouri State before moving to John A. Logan College last season, whose she was an honorable mention All-American.

He will be a major player for us this season," Cott said. "She has tremendous work ethic, the best in our program, and I hope it rubs off on the rest of the players.”

The film is rated R, with a running time of two hours and 14 minutes and is playing at the Varsity theater.

Sports Writer

The SIUC hoops team will enter the 1993-94 season with a trio of returning starters and a couple of key role players from last year's MVC Tournament Championship squad. The returning starters are led by senior point guard Chris Lowery, a 12-point per-game performer last year.

Lowery averaged has started 63 games in a row for the Dawgs, and will provide the team with stability at the point position. But his coaches and teammates will look for more than just stability, they will look for leadership. Lowery said he is ready to handle the assignment.

“Without question I plan on being a leader out there,” Lowery said. “Sometimes my teammates tell me I’m too vocal, but I’m just competing as hard as I can.”

Lowery dramatically improved his three-point shooting last year, hitting 37 percent of his three attempts.

Lowery said last year’s successful run to the NCAA has given him incentive to make a return appearance.

“Last year was a little inconsistent,” Lowery said. “This year I’m geared, I’m ready to play. People are going to see some big things from me.”

Another key returnee, 6-foot junior forward Matt Timmons has the most to prove by returning to the lineup. The former MVC leading scorer has 37 points and 5.3 rebounds per game.

“Last year was a little inconsistent,” Lowery said. “This year I’m geared, I’m ready to play. People are going to see some big things from me.”

Despite uncertain road to conference crown, Herrin excited about new team

By Grant Deady
Sports Writer

Putting all the teams in the hat and drawing one out may be the most efficient way of predicting a Missouri Valley Conference champion this season.

Parity has struck the MVC, and the road to a conference crown doesn’t lead in any particular direction. However, you can count on Peoria, Normal and Carbondale being among the stops along the way.

This year’s Saluki hoops squad will be forced to fill the vacancy left by Afrisa Amusi and Tyrolee Bell in order to make their way back to the NCAA tournament. The task may sound impossible, but sophomores Chris Carr and senior Chris Lowery could have Saluki basketball guru’s asking Afrisa and Tyrolee when.

Paul Lask, Mike Pavlovic and the versatile Marcel Timmons will all have to be role players, in order for SIUC to succeed again. Ian Stewart and Scott Brzyinski have to provide bench help, with seven-foot Marcelo da Silva adding beef to the front line.

The pieces to the puzzle are here, and head coach Rich Herrin is excited to unleash his new arsenal.

Our veterans are guys who love to watch play and they have developed into solid leaders for our program,” he said.

“I think we will be a better shooting team than we have been the past few seasons, and also feel we will do a good job on the backboards.

Several MVC teams plan on stepping up to challenge Herrin’s troops this season with Bradley being one of the more serious contenders.

The Braves were as good as anyone at the end of last year, beating DePaul and succeeding SIUC to etime in the first round of the MVC tournament.

Younger women’s team faces fall season with no returning starters, pushes for title

By Kevin Bergquist
Sports Writer

Young, run and gun.

Those three characteristics describe the 1993-94 version of the SIU women’s basketball team, which opens court play Wednesday night with an exhibition game against the UW-Parkside Lady Islanders.

The Salukis return no starters from last year’s 10-10 team, which lost a heartbreaker to Southwest Missouri State in the Missouri Valley Conference Tournament finals.

Lowery said it would be starting one of last year’s 1-4 MVC squad, but senior Smith’s game came to a premature end, he blew over and fell in a pressure situation.

The loss of Smith and seniors Angie Rodgers, Kelly Firth and Boldets, leaves coach Cindy Steinager without a conference slate and an MVC charter teams against teams which return no starting players.

“It is unbelievable to think you can win for 17 years, and you can return a team that has no starters back,” Scott said. “This was a devastating loss for us, but certainly it gives an opportunity for some of the younger kids to step up and find some minutes.”

Those minutes were few last season for the Salukis’ eight returnees. Only three returning letterwinners logged more than 10 minutes per contest last season.

Junior forward Raquel Ransom returns with the most experience, after coming off the bench last season as the sixth player to average 7.6 points and 5.3 rebounds per game in 22 minutes of action.

The 6-foot-1 Ransom said she is looking forward to assuming some of the leadership duties for the team.

“I think I feel a lot more comfortable,” Ransom said. “I really feel a lot more comfortable. I really feel like I feel a lot more comfortable.

Ransom said she is looking forward to assuming some of the leadership duties for the team.

“We are looking forward to the rematch with DePaul, that was such a great game,” Pavlovic said. “We like big games like that if we win we might be able to do some things.”

Last year Missouri lost the
Charting the future of information technology at SIUC

This entire issue is devoted to a new approach to the role of information technology (voice, video and data communications) on campus.

The University has developed a comprehensive strategic plan that seeks to change the way decisions are made about investing in information technology on campus. Inspired by a request from the provost and other investing in information technology on campus. This new approach will help SIUC meet the challenge of providing students with a complete education in an era of tight budgets.

More than ever, it is essential that decisions to bring such cutting-edge technology as kiosks and voice response to campus align with the goals of the University as a whole—to instruct, conduct research and serve the regional community.

This reality prompts some intriguing questions: Does modern technology have a role in making SIU more competitive in attracting funding, students and faculty? How well does the Office of Information Technology understand SIUC’s needs, and how can we make it more customer oriented?

The answers to these questions came from you, the folks who use campus information technology on a daily basis. Interviews, surveys and workshops were conducted with top-level administrators, deans, students, faculty and staff to determine how information technology can better serve your needs.

Some common themes and issues emerged in the process (see articles this page). These guided the development of a preliminary strategic plan that was further revised after more input from you. Now, after two months of hard work, SIUC has a user-driven information technology strategic plan that addresses campus-wide critical issues. Db

What we learned...

A significant number of students, faculty and staff responded to about 5,000 questionnaire returns distributed on campus. Ninety-seven percent of the 814 students who were polled responded, and about 54% of the 4,400 forms given to faculty and staff came back completed.

Some of the most startling feedback came from the students. Respondents fell into three categories—students with less than one year at SIUC; those with one to four years; those with more than four years at SIUC.

The survey revealed that:

- More than 50 percent of students who have been here more than four years are only vaguely aware of SIUC’s computing services and capabilities for students. Another 15 percent said they were not aware of them at all.
- Almost 30 percent of those who have been here more than a year believed SIUC was providing only minimal training for their future computing needs.
- Another 20 percent with more than four years on campus said their future computer needs were not met by existing courses.
- More than 40 percent of students in all three categories identified inadequate software and limited access to training as top obstacles to their work.
- More than 40 percent indicated spreadsheet and database applications would be important in future jobs, but only half use these applications today.

Faculty and staff were equally candid about their concerns. Highlights of their responses:

- Inadequate software is the largest obstacle to integrating technology into teaching and research.
- Improved connectivity to network works on and off campus is needed.
- For example, about 25 percent of those surveyed said they used local and external computing networks, but another 25 percent wanted to use them but lacked training, equipment or expertise.
- Training, support, user friendliness and technology upgrades are critically inadequate to meeting faculty and staff needs. Db

"Your on-campus connection to Information Technology."
What we're doing: The new information technology strategic plan

We've already moved ahead on these points of our 18-point strategic plan:

1. Managing the information infrastructure (the alignment of information technology resources to achieve SIUC's overall objectives)—To improve our system of identifying and addressing campus information technology needs, we're forming strategic and planning committees and project-oriented teams with clear missions, roles and accountabilities.

2. Connecting the university (enhancing the information highway linking university members internally and externally)—We're viewing the campus area network (CAN) as a university utility like heat or telephones and defining a basic service level to provide all users. We also plan to accelerate efforts to connect everyone to the CAN.

3. Information processing and content (offering applications that have more functions and are easier to use)—We're doing cost-benefit analyses of new computer applications in such areas as alumni/gift-giving, finances and human resources. And we hope to improve the process of acquiring and maintaining current versions of popular PC software.

4. Applying information technology to instruction, research and service—We're creating a plan to use information technology more aggressively to carry out SIUC's core missions. It will include training faculty to use information technology to teach and research and getting greater commitment to distance learning (off-campus classes offered through computers) from local institutions.

5. Building campus teamwork—We want to enhance communication and cooperation among University units.

6. Training and support—To improve technical education and user support, we're defining the roles and responsibilities of both Information Technology and computer users. (For example: How do we best handle PC and local area network questions?).

Creating user-friendly Information Technology

One of the most exciting aspects of our new strategic plan is the effort to change the way the office of Information Technology works with you. We're adopting a customer-oriented approach focusing on satisfying your needs rather than making you fit ours. It's based on a successful model of management called Total Quality Management (TQM).

At the heart of TQM is a fact-based decision-making tool called Quality Function Deployment (QFD) that has helped us quickly gather valuable information about your perceptions of our service. QFD is a logical way of listening to customers. It uses focus groups and other exercises to get quantitative and qualitative assessments of your concerns and our solutions.

A nine-member team of staffers from Information Technology and other departments recently went through an intensive QFD session. It revealed that:

1. We need to improve how we communicate with you and translate your needs into easy-to-understand technical requirements.

2. You want someone you can call or meet with to discuss your problem.

3. We should eliminate the ADR form. Instead, you'd like a memo of understanding outlining your needs and serving as a contract for your service request.

In response, we're:

• Training our staff. We'll hold a training session to improve our listening and consulting skills.

• Devising a system of feedback. We will begin to use a feedback form as a standard post-job procedure to monitor your satisfaction.

• Exploring a customer representative role in Information Technology.

This is just the beginning of our plan to create a new customer-oriented Information Technology.

We welcome your comments on what we've done so far. Call Mike Schwartz at 453-6229. Db
Show goes on without Black

Concert Review

By Charlotte Rivers
Entertainment Writer

The SIU Arena was a sea of cowboy hats Saturday night when a near-capacity crowd turned out to hear Clint Black and Wynonna Judd. Unfortunately, Black was unable to perform because of a respiratory infection, and concert-goers were offered a full refund if they did not enter the Arena. Apparently, most fans opted to stay for the Blackless concert, judging from the crowd of families, coupies and young girls.

Jason Lee Williams was the opening act, introduced as a rockabilly performer from Memphis, and he brought along drums, a saxophone and a guitar. Williams charmed the crowd for 45 minutes with his Jerry Lee Lewis-style antics on the piano.

In between kicking away and retrieving his piano bench, Williams had most of the crowd on its feet with renditions of “Great Balls of Fire” and “Whole Lotta Shuffling.”

After a 30-minute break, Wynonna, who has dropped her last name, took the stage with her band and three back-up singers and they treated fans to “Tell Me Why,” the title song from her second solo album.

Speaking to the audience, Wynonna, clad in black and garnished with headwear, said, “I hope I can meet your expectations without Clint.”

During “Mama He’s Crazy,” Wynonna crooned a fun on stage who presented her with a T-shirt and, at Wynonna’s invitation, joined in on the chorus. She had the crowd on its feet again with renditions of “Girls With Guitars,” and the gospel-like “Let’s Make a Baby King.”

All dreamers do to three things, she said, before launching into “Why Not Me?”

“You have to be a little crazy, you have to believe in SPEITH, from page 3

“We need to work as getting to women as a younger age to say ‘You can do whatever you want,’” she said.

The group also awards scholarships to high school seniors and to women 25 and older who are returning to school. Membership in the group is open to women and men. Individual’s must be employed at least part time, or be a student. The organization meets the third Tuesday of each month. For membership information, call 549-2014.

NUCLEAR POLLUTION IN RUSSIA

Southern Illinois University at Carbondale

Open to the public
Deon Jackson is a force down low for head coach Jim Molinari while Marcus Pollard is the team's top rebounder. Jerry Layne is last year's most outstanding freshman and newcomer Anthony Parker plans on acquiring the guard spot after an All-State season at Nappanaug Central High School.

Head coach will be the Valley's most talented team and they could be the only thing that stops them from bringing a championship to Peoria.

Tradition rec: Illinois State will take on a new look this season with the departure of coach Bob Bender. Kevin Stallings takes over the Redbird post and will feel the heat from fans and alumni that demand winning.

Stallings will make a commitment to an up-tempo offensive game and a very pressurized defensive game," Stallings said. "My concern is to make Illinois State the best that Illinois State can be."

The Redbirds main offensive threats will be center Mike VandeGraaf, the man that MVC fans love to hate. Senior Scott Taylor and the much improved Michael Thompson give ISU one of the conferences strongest front lines.

November 15, 1993

The MVC is the most valuable player in Illinois State, and we will feel it all year. Smith was the go-to-man for the Bulldogs and will take someone pretty special a fill in cap the game any time soon.

Head coach Rudi Washington is as colorful as they come, but his Coach of the Year honors in 1993 won't be enough to get Drake back to the MVC tournament semi-finals. The Tosa Golden Hurricane should be blowing hard this season and may try to reap the rewards of third year coach Orlando. "Toby," Smith’s. His way as an assistant at Kentucky are beginning to pay off as Tasia is one of the Valley's best coached teams.

Dewayne Bonner is 6-5 and promises to be an MVC standout this year. Gary Collier is a factor on the glass and averaged 15 points a contest in '93. IF CU can get some production from their guards to complement strong inside game, they're likely to be met with.

Northern Iowa, Creighton and Indiana State are still struggling, but will all put up a fight on their home floors. The UND-Done at Northern Iowa gives opposing teams fits with the quickness of Panther fans and the strong wind current that throws off visitors shoes that aren't used to playing crads.

Creighton is waiting for the second-coming of Chad Gallagher while Indiana State is wondering if they can ever return to the "Larry years."

If the Salukis are able to hammer their way to the bonuses of another MVC Tournament title, let's just hope there aren't any Blue Devils waiting to greet them when they win.

The last of the returning big three is 6-5 center/forward Mark Pavlovic.

Pavlovic is in the senior year of his eligibility and just started coming into his own last season.

"I am finally comfortable and think I can have my best season yet," Pavlovic said.

Pavlovic joins Lowery as the team’s other senior, and he looks to be a leader on the team.

"Last year the team leader was Chris and I think this year will be the same," Pavlovic said. "I think I can help give us some leadership too."

Pavlovic was instrumental in the Dawgs’ late season run, scoring in double figures in six of SIUC’s last eight games.

It also gives the team a solid three-point shooter, as he hits at a 38 percent clip from the arc.

But with standout forward Adasht Amaya gone, the Salukis will need Pavlov’s help to be a bigger presence on the boards. Pavlovic averaged just 3.2 rebounds a game last season.

"I expect to be a more all-around player this year," and coach Herrin has mentioned how he could play a lot of positions," Pavlovic said.

"Two players who will make the adjustment from role players to starters are 6-3 guard Paul Lusk, and 6-4 forward Chris Carr.

Lusk will be playing his first full season since the 1999-00 season, but he saw a decent amount of action last year. Lusk came off the bench in 26 games last year as his 40 percent of his attemps and average 7 points a game. Lusk gave a glimpse of his scoring ability during last year’s MVC Tournamens Championship game, pulling up on fast breaks to nail 3 of 9 shots from the field on his way to a 13-point performance.

Carre, a freshman sensation last year, quickly becoming a fan favorite with his aggressive style of play. Carr showed he can play with anyone by racking up a ten-point, ten-rebound performance in the Salukis’ NCAA tourney to Drake. Carr gave Saluki fans the biggest highlight of the game with a thunderous dunk at the end of the first half.

Head coach Rich Herrin said the returning talent makes for a solid first five. "Lowery and Lusk are a nice pair of guards," he said. "And Timmonos, Carr and Pavlovic are a nice front line. Herrin said jokingly, "I think we'll be a good football team."
POLL, from page 16

conference pick Julie Ritters.
"We are excited about being third, but I have a hard time believing it," DJ coach Binder said. "We only have two seniors and we have a lot of question marks."

Wichita State (15-12), the No. 5 pick, returns five starters from last year's fourth-place (8-8) team. WSU coach Linda Hargrove said she hopes fewer injuries plague the conference last season.

"I think the MVC will be a great league to play in," Hargrove, the 1993 MVC Rawlings coach of the year, said. "Hopefully, everyone will be injury-free and not have the problems like last year."

Bradley (7-20), No. 6, also returns five starters from last year's 4-12 MVC team. The Lady Braves were hurt by injuries late last year, but return honorable mention selection Carrie Coffman.

BU coach Lisa Boyer said the ranking is nice, considering her squad played parts of its season last year with only seven healthy players.

"I am just happy to be in the poll the way we ended last year with injuries," Boyer said.

Illinois State (11-16), the seventh pick, was a team rocked by injuries all year long. The Redbirds lost point guard Tami Baalke early on and spattered to a 6-10 finish in the MVC.

"Seventh is by far the worst rank we have had in a long time," ISU head coach Jill Hutchinson said. "It encourages our players to prove themselves. We have to walk on the floor and get it done."

Indiana State (8-18, 4-12) and Northern Iowa (10-17, 4-12) nabbed the eighth and ninth slots.

The Sycamores return five starters, including preseason honorable mention pick Amy Walker.

Northern Iowa has four starters back, but lost all-conference performer Ann Miller.

SEASON, from page 7

Dawgs, winning 82-76 in double overtime at the Heroes Center.

Evans returns five starters from another game on the schedule, as the Purple Aces will become a part of the MVC in July of 1994.

Mississippi, out of the powerful Southeastern Conference, comes to town for the third game of the season. The Illinois State Redbirds come to the Arena on Dec. 22nd. The game features two of the league's best teams, with perhaps the best player in the conference, NU's Mike Vandegar.

Last year the Dawgs pointed EU in the MVC title game.

Vandegar said he enjoys the rivalry with SIUC.

"Southern will be a great team to play against this year," Vandegar said. "SIUC has great fans and is one of my favorite places to play."

Vandegar said last year's loss to the Salukis will motivate him.

"I think anytime a team does something or has something you want then there is some motivation," he said. "But what motivates me is getting to my goals."

DAWGS, from page 16

- Polls carry for just 65 yards.
- Peterson hung in the pocket long enough to have a respectable day, completing 11 of 23 passes for 154 yards and one touchdown.
- The Dawgs return home next week for the season finale against Eastern Illinois.
