Outdated material off the library shelf

Braille reference materials are no longer available at Morris Library because of lack of space, use

Andrea Donaldson
Daily Egyptian

When Jim Skinner needs to do research, he will no longer be able to rely on Morris Library’s Braille collection of the World Book Encyclopedia.

When library officials began renovations this fall, they had to remove everything occupying the Special Services room, on the first floor in Room 103J, in order to excavate built-up asbestos.

When considering space constraints and how little the encyclopedias were used, Mark Watson, undergraduate librarian, said they decided to do away with the Braille reference selection which covered an entire wall of the room.

Watson said the 1968 encyclopedia collection was too outdated and has since been replaced with technology-based systems like computers that read to the person and scanners that scan in books to be read.

Craig Brown, 21, a junior in animal husbandry from Springfield, pilots a simulator at the Army’s Armor Experience Adventure Van, while Sgt. 1st Class Jeffery Compton from Fort Knox Kentucky watches and instructs him.

Army virtual van gives real life feel

A look of confusion, and awe spread across the face of former Air Force and Korean war veteran Leon Bunch as he looked at the simulators inside the U.S. Army's Armor Experience Adventure Van.

"I never had anything like this when I went in," said Bunch, "I've never seen nothing like this." The simulators were located inside a semi-truck trailer parked on the north end of the Faxon breezeway Thursday afternoon and gave passing students virtual reality tours of a M1A2 Abrams tank and a M3A2 Bradley fighting vehicle.

The vehicles can negotiate all types of terrain with quickness, agility and dead accuracy according to the virtual tours. Participants put on headbands and learn what duties each member of the tank’s crew performs.

The purpose of the reality tour is to drum up civilian interest in the Army for local recruiters.

Even though some of the local recruiters refer to the simulators as “video games,” Sgt. Jeffery Compton wants people to realize they are serious pieces of equipment.

"These are actual training simulators," Compton said. "This vehicle cost in the area of $1.5 million and gives hands-on training for some of the toughest jobs in the Army." Those who visited the Armor Experience Adventure Van Thursday were allowed to see and touch the tank and Bradley.

"Me and my dad used to do a lot of computing," he said. "It's always interested me. It's also something I can work on with my dad. We can actually do something together on the computer."

"We get a lot of interest from local people," Compton said. "This year we have had a lot of interest from high school students. We have had interest from all schools within the area."
CROSSING THE LINES CONTINUED FROM PAGE 1

the people who I'm surrounded by make me happy."

Katie Brown, a freshman in cinema and photography from Dalton, has been with her boyfriend, Lane Nemes, a freshman in creative writing from Paw Paw, for seven months.

"Sometimes when we go to a pool hall we get, funny looks," Brownie said. She is black and Steven is white.

"I don't really care as long as you're in love," Brownie said, "but there are people who say there's plenty of single people within the same race." Warden and Canada's families have been favorable of their relationship.

"My mom adores her," Warden said. "He's the person I'm with because he's the person I'm with."

the likes me," he added, laughing.

Canada's mother has approved of Warden as well, though she expects him to be respectful of cultural practices.

My mother is very traditional. He has to be polite," Canada said. Being "polite" includes not expressing affection in her mother's presence.

Warden said that interracial dating has made great advances since the 1960s but that there's no reason to think it doesn't exist.

"The first thing people think is of black and white relationships, and they don't think of the other races. It depends on what race you're speaking of," Warden said. "My dad would have something to say if the woman black, but she's Filipina."

Race is not an issue to Canada.

"For me, it's really just matters," she said. "He's the person I'm with because he's the person I'm with."

Archer attempts leap from USG to council

USG president hopes to bring experience with him, promises to hear students

Christian Hale Daily Egyptian

Coming out of the difficult leadership student government, Bill Archer knows the importance of simply listening to people. Archer is running his City Council campaign with the hope a council seat could help pressure diverse views by opening communication between Carbondale and SIUC students.

"If I bring a whole different perspective," Archer said, "Yes, I am young, but that's what Carbondale City Council needs. Carbondale needs some change.

At 27 years old, Archer admits while he's not older, he can relate to other cultures of people. He's a former president of SIUC and founder of the Carbondale Boat Regatta, provided him with an opportunity to understand diversity in the community.

"I am related to a different number of different people within the community based on my experience," Archer said. "I can relate to people of differ-ent backgrounds who feel they aren't being heard. I have no problems communicating with any race, creed or class.

Archer said he looks not twisted on the color of their skin, but on what they can do. He's watched the council during the last couple of years, he said he's doesn't agree with everything they have decided.

Despite differences that need to exist between the executive and legislative bodies in USG, Archer has earned the respect of some members of the white body.

Hess said that some negative press stemming from past troubles caused many in the community to pay too much attention to Archer's social life and not enough attention to what Archer's doing as a USG president.

"It's really been struggling to help the students and fix some problems with different groups," Hess said. "He's on an all around good guy in my opinion, I think he's cool as hell."

BORN IN CARBONDALE

Born in Carbondale in 1977 at Memorial Hospital of Carbondale, Archer grew up in the city and was given his character perspective that relates to the council, as well as the students.

"It's what it's like to be young in Carbondale, from child to adult," Archer said. "I know what it's like trying to find a job, be a student and a businessman. That's what makes me different than anybody else."

Archer said some of his goals dealt with problems he felt could be cur-rying up in Carbondale's future — specifically government and communication related areas.

See Archer, page 14

Taylor ‘hardcore’ on student issues

Former USG senator wants equal representation, positive change for SIUC and city

Christian Hale Daily Egyptian

Rob Taylor has been wrangled up with the average student since arriving in Carbondale in August 1994.

A Carbondale City Council candidate and self-proclaimed "hard-core student-activist," Taylor willingly admits he is not a very good politician.

A former USG director, Taylor now manages the Carbondale Steak N Shake Wednesday. In addition to being an SIUC student and an overnight manager, Taylor is hoping to be elected a Carbondale City Councilman.

"Today’s politician has to be pragmatic," Taylor said. "But I’ll stick to an issue, even if it costs me an election. That kind of shows people for a leap.

Taylor said he’s in tune with a lot of issues that have been surrounding Carbondale and the students for the last decade. He said he sees himself as a unique link between the student body and the city because he’s 37 years old.

"The No. 1 issue to me right now is the restructuring of the coun-cil," Taylor said. "Every issue that I’m involved with or observe could really be affected in a positive way with equal representation on the council."

Taylor said the proposed ward-system referendum is more important than any one candidate winning the election, reiterating his belief that standing for issues is more important than winning elections.

It stands now, Carbondale elects its council utilizing an at-large elections system. The ward system would break the city into four wards, or districts, and each district would vote upon its representative to the council.

"Taylor said the ability understanding broad social dynamics," said Ed Ford, SIUC graduate student and supporter of Taylor’s campaign and discussed referendum.

"Rob really has this ability understanding broad social dynamics," said Ed Ford, SIUC graduate student and supporter of Taylor’s campaign.

Taylor said those about the consequences of actions and how that affects those groups involved.

See Taylor, page 14

Some minority students seek diversity among faculty

A lack of minority faculty could adversely affect education

Andrew Parker Daily Egyptian

It is possible for a minority student to go through the years at SIUC and never encounter a minority professor or teaching assistant, according to Seymour Byrnon, associate chancellor of Diversity.

Minority groups include blacks, Hispanics, Asians and Native Americans, make up 10 percent of SIUC’s faculty, including teachers and administrators.

Minority students account for 17 percent of the University population: 13 percent blacks, 2.7 percent Hispanics, 1.6 percent Aslans and 0.38 percent Native Americans.

Anjaniele White, a black junior in English education from East St. Louis, has had one black teaching assistant and one black profes-sor since her freshman year. She said she enjoys the education because the white students have extensive experience with her class and know more about her field of a minority perspective.

"It’s kind of discouraging for students to have one row of people of the same race, sitting in the classroom, when most classes have a majority of white students," White said.

The population of black students declined from about 3,200 to 2,900 in the past two years.

Bryson said the lack of minority-faculty is not just low at SIUC, but is a statewide issue. To correct the problem at SIUC, the administration has recently decided to put about $500,000 into minority faculty recruitment.

"The presence of minority faculty does affect recruitment and retention," Bryson said.

"Students, sometimes want professors who look like them." Whites, who came from a predominantly black high school, said she expected to have more whites in her classroom, but only having 3.9 percent of black faculty was unrealistic.

Sandra Soha, a Hispanic student in aviation management from Chicago, agrees that having few minority faculty affects minority education.

"For her, having more minorities teaching would not only increase the quality of the edu-cation, but the cost level in the classroom. Soho has had two Hispanic professors in Spanish, and one is her section when the section felt a more comfortable because

The presence of minority faculty does affect recruitment and retention. Students sometimes want professors who look like them.

DAILY EGYPTIAN
Blanchett is ‘the gift’ that keeps on giving

KELLY DAVENPORT
DAILY EGYPTIAN MOVIE CRITIC

Keep your eyes on luminous Cate Blanchett. She is “The Gift.” Watch her slender frame whip through utterly believable explo­sions of the psyche. Then see earthy, understated emotions flash across her face like lightning through silver clouds. But don’t take your peepers off Cate. ‘Cause the rest of “The Gift” is best left unopened.

In Director Sam Raimi’s latest, Blanchett is Annie Wilson – a Georgia woman who reads visions from a deck of cards. In her tiny backwater home – all alligator swamps and wispy Spanish moss – most of the towns­folk have haunted pasts only Annie can decipher.

The ghosts she dredges up come in the form of Valerie Barkhied (an un­spectacular Hilary Swank), a young wife abused by her boorish hubby (a shaggy and cartoonish Keanu Reeves). Or Buddy Cole (Giovanni Ribisi), a slightly slow­ but sweet car mechanic whose babyface is creased by repressed horrors.

But these “booze-fueled rock ‘n’ roll” boys got their start in a strange place – Carbondale. The seven-year-old band spent its Carbondale days jamming in the punk-rock basement-party house, the Lost Cross. Now located in Chicago, the band is returning for the release party for their third disc, “Adult Time” at the Copper Dragon Saturday. The DAILY EGYPTIAN chatted with Crash Bottletone aka Brady Campbell, the guitar player for the band, about the homecoming.

What do you think about starting out in Carbondale?

What do you think about starting out in Carbondale?
Luna plunges Shryock into realm of light

Living under the stars in a Hawaiian community he co-founded, Marlin regularly witnessed Pele’s dazzling lava flows. While watching an eruption, Marlin had the epiphany that would lead to the creation of Luna: Theatre of Light—"All life is pulled to light."

"I observed other onlookers becoming completely hypnotized and entranced by the light of the lava," Marlin said. "They were of that awe, that magic..." Marlin narrates the piece with enlightenment. Light bulbs appear and rotten phrases like "Get ready for the ride—over your heads..." when we have an idea. Light intrigues us."

"Luma plunges Shryock into darkness Sunday, thrilling the audience with existing light metaphors that rely on persistence of vision, the trails left on the back of the eyes, and one turns and says..."

Annie knows. And soon she’s discovering just how much of a curse her "gift" really is. Too bad Billy Bob bodies on MTV’s Degrassi. "Gift" artsy and fresh. All for the sake of an overstuffed trial..."And it doesn’t help that the police force dredge the swamp for Jessica’s body..."

"Gift"承接，因为拖延，菲律宾的cliffside不会兑现承诺。但I wanted my contact lenses to receive guaranteed lowest prices on glasses.

The death knell comes when the sun, moths to a flame.” "Metaphysical Light—unpredictable..."

Heat relief – no end in sight

Despite complaints, buildings will provide heat until April

Kate McGann

Students and faculty sweating their way through classes better learn the art of endurance — because spring is just around the corner.

Temperatures inside SIUC campus buildings soared this week as it climbed into the mid-80 degree range outside. From the bowsels of Palliam Hall to the fourth floor of Foster, students and staff have been battling the heat with makeshift fans and frequent water-laden mats.

In Morris Library, climate conditions are particularly severe.

"If you extreme heat is ever been," said student worker Tracy Clever. "You have to come to work, your face is sweaty... It’s bad!" But according to Scott Pike, superintendent of maintenance, nothing can be done to ease the pain.

"This comes up every year," Pike said. "It’s not like at your house where you can turn down your thermostat."

That is, unless, the University is prepared to shell out between $10,000 to $15,000, which is about what it costs twice a year to change from heating to cooling. The majority of the dollar amount goes to the labor costs for the workers who must make manual adjustments in every individual campus building.

Also, turning on the air conditioning prematurely when cold weather is still a night-time factor could cause a water leak from the pipes to malfunc-

"Nervous system" is the Baptist Student Center. "Now we have to have sources to teach," said Lestadius. "It’s what’s happening."

The studio is double walled for soundproofing and includes a video projector, a voiceover room and a control room. The studio will be complete by the middle of next year, Lestadius said. "With the Internet and the way digital audio is going, it’s the wave of the future," Lestadius said. "It’s what’s happening."

The studio will be double walled for soundproofing and includes a video projector, a voiceover room and a control room. The studio will be complete by the middle of next year, Lestadius said. "It’s what’s happening."

Although the ProTools software is new, the company refused updated software this week that allows users to apply digital surround sound to their work.

"It’s not really finished because of all the renovations," Lestadius said.

But Hodgson said the department plans to enclose the lab, meaning they will not have to invest in new recording experts.

Philip Johnson, audio coordinator for the program and professor in radio-televison, has kept the dream of creating a better radio laboratory since 1992, when students struggled to work on new software and computers in the future.

"We have to have sources to teach," said Lestadius. "We physically couldn’t get the students in rooms."
Know your black history

BAC challenges students to share knowledge and learn about African-American history

**Stacey Robinson**

**Daily Egyptian**

What is Sojourner Truth's real name? Give up? Keep studying history and you'll find out.

After a long week of sponsored events for Black History Month, Black Affairs Council is now preparing to test the knowledge of students to find out just how much black history they know.

The council will sponsor a Black History Bowl trivia show that encourages students to cooperate and display their knowledge of black history.

The trivia show will feature two opposing teams, the fraternities against the sororities. The teams will have six members on each side competing for a trophy signifying their knowledge, participation and contribution to the trivia.

Shanna Harris, sophomore in marketing from Chicago and President of Alpha Kappa Alpha, said her organization looks forward to participating. She said it is important for students to know their history regardless of race.

"Alpha Kappa Alpha has also sponsored events for Black History Month this semester, including a performance by Mavis Staples in honor of Mahalia Jackson," Harris said. "BAC also has done a good job promoting Black History Month."

"I think they've done an excellent program," Harris said. "They had a lot of positive programs targeting students."

BAC expects students to come and try to participate, but so far they have not determined which organizations will participate.

Mario Burton, a junior in management information systems from Chicago and president of BAC, said other students will have the opportunity to participate by purchasing a trivia ticket. The tickets will be drawn during the show and the trivia winners who answers questions correctly receive a prize.

"We hope to make it an annual event," Burton said.

"BAC hopes students will enjoy the show, become involved and learn about black history."

"We wanted to do something new and different that you can learn and have fun doing," Burton said.

Michael Graves shares his knowledge of architecture

**STACEY ROBINSON**

**Daily Egyptian**

American Institute of Architecture's 2001 Gold Medal winner speaks Monday

LIZ GUARD

**Daily Egyptian**

After Michael Graves receives his gold medal in Washington, D.C., Saturday night, he will be on his way to Carbondale.

Graves, the American Institute of Architects' 2001 Gold Medal winner, will be speaking to SIUC students Monday afternoon.

Because of Graves' popularity, School of Architecture and the School of Art and Design officials have planned an entire day of events around the lecture.

"Michael Graves Day" will bring in numerous architecture firms, SIUC alumni and the Southern Illinois American Institute of Architecture.

Activities will include a career day, which will allow students to meet with and be interviewed by representatives of various firms. There will also be seminars on composition in building walls and façade architecture by the Ruhl, Ball and Johnson Inc. architecture firm.

Norman Lach, an assistant professor in applied sciences and arts, has helped plan Graves' appearance at SIUC and is pleased to have someone of Graves' stature share his knowledge of architecture with students. Although the architecture program at SIUC has a 100 percent placement rate, Lach said he still believes students need to be active in their future profession.

"We need to support the profession to keep it going," Lach said.

Terry Owens, chairperson and associate professor in applied sciences and arts, has also helped with the planning of Michael Graves Day. Owens said he believes Graves' visit will be a success and encourages students to attend.

"We want to expose students to a broad array of different building styles," Owens said.

Attendence at the Graves lecture is expected to leave a standing room only audience in the Brown Auditorium in Parkinson.

Graves, 65, was given the AIA's highest honor for his outstanding lifetime contribution to architecture. Graves has designed numerous buildings in his career including Disney's corporate headquarters in Burbank, Calif, the scaffolding used on the Washington Monument for restoration and The Netherlands Ministry of Health, Welfare and Sport in The Hague.

"We want to expose students to a broad array of different building styles," Owens said.

"We want to expose students to a broad array of different building styles," Owens said.

**SWEET NOVEMBER**

SHE'S GOT SOUL: "When you sing a song, you sing from your heart, and be beautiful," Mavis Staples, of the famous Staples Singers, said when speaking to students from the Introduction to Black America class Thursday night. Father Joseph Brown, director of Black American Studies, and some of his students were privileged to get a preview of Thursday night’s performance at Shryock Auditorium and meet with the legendary gospel singer. Staples has dedicated her life to uplifting those around her with pop, gospel and soul singing.
Bottlenecks

CONTINUED FROM PAGE 4

you were 15 — travel around and play in your rock 'n' roll band and go to the store and get your CD and play with all your heroes and record with cool people at cool studios. The first book here is "here" is pretty good.

I always loved you, guys. I would sneak into Tim Holcomb and jam there. That's where it all started, Tim Holcomb. We didn't always play rock and roll, and sometimes whatever you want to call it. We had to learn and at Tim it was like growing up real fast.

Our first show we only knew 15 songs but we had to play for three hours. We played a lot of unsung songs.

You're popular enough where you that you wouldn't have to come down to Carbondale...

No, not necessarily. Carbondale is our hometown but we don't play in every place we do, in Carbondale the方式 we do Car. Sudan coming up to Carbondale one of the few parts of it all is because just it's coming home. You take your show off the road on the couch, plug in, turn on the TV — you just feel comfortable.

How do you think the Carbondale music scene...

Mysteriously, Carbondale's cool because it is an old little town. It's far away from everything, yet it's isolated. It's not really connected to any big city. With the university and being such a small town, all the music scene is connected together, which makes for kind of creative, melting pot. I like a lot of the bands.

Motorcycle

This is my favorite.

You have a steady diet of music, a steady diet of rock and roll music, like Dick Dale type-stuff you'd hear on the Pulp Fiction soundtrack.

We call ourselves psychobilly, but a lot of people have no idea what that means.

Musically, Carbondale's cool because it is an old little town. It's far away from everything, yet it's isolated. It's not really connected to any big city. **Saluki Sports Notes**

**One in the books**

On a day when six Missouri Valley Conference Championship records fell, both the SIU mens and womens swimming and diving teams went home with a lead.

The winner at 293 points which was 44 points higher than the previous MVC Championship records was the SIU mens and womens swimming team.

The winners on the first day were SIU freshman Louise Partlow (500 freestyle), Evansville freshman Emily Thomas (200 individual medley), sophomore Kim Dodson (50 freestyle), Southwest Missouri State junior Vanessa Novins (1-meter diving event), SIU 200 freestyle relay team and Evansville's 400 medley relay team.

**MVC Championship records fell, both the SIU mens and women's swimming and diving teams went home with a lead.**

**Drake:**

Then there was the incident, as a frustrated Williams tried to stand his ground.

**Archer:**

Just recently, I found out about the problems with tele- phone service, Internet service and utilities, Archer said. "A lot of people may find this hard to believe, maybe because I'm so young, but I think there is an energy crisis in Carbondale and I don't see an energy plus going into effect anytime soon anywhere."

Along with these problems, Archer also said there are problems with mental health and a feeling of ways being maybe being tied for first in the conference if they get the win, who's still at the bottom of the conference. Don't worry about any of that and don't worry about the outcome.

"There shouldn't be any pressure on them right now. They just have to go out and play as hard as they can possibly play. Let's not worry about the outcome, let's not worry about who wins and who loses, let's just worry about the ways we're maybe trying to be first in the conference if they get the win, who's still at the bottom of the conference. Don't worry about any of that and don't worry about the outcome."

"There are numerous problems," Archer said. "But along with that, there are a whole lot of opportunities that will be becoming available.

Archer said one of these opportunities will be the amount of space created by consolidation of the schools in Carbondale. With design, engineering implementing the latest facilities and technologies in a new building, he said he hasn't forgotten the vacated buildings.

"Let's see a new school placed in the Lincoln School building," Archer said. "We'll now have this opportunity with these empty buildings."

Archer said the schools have a number of opportunities, with special emphasis on the students who do not have the desire to attend college, would be a missed opportunity if not looked into.

"I love God, I love people, live it truthfully. (3/21/12)"

**Continued from page 16**

"Weber and Williams had an heated argument about the incident, as a frustrated Williams tried to stand his ground.

**Taylor:**

"Rob just has a broader societal perspective on things, which I think is a good attribute."

"I love his competitiveness, but at the same time, he's gotten an image with the fans of stopping — things that are not needed to be stopped," Weber said. "He has a heart, and he's also very intelligent, and if he's going to grow as a player, he's got to leave those things alone."

"There are numerous problems," Archer said. "But along with that, there are a whole lot of opportunities that will be becoming available."

A towering, lanky man wearing glasses, a green dress shirt, blue jeans and k-hi brown shoes sets up to do the high jump. Sunday afternoon during the SIU track and field practice at the Recreation Center.

This is Cameron Wright, who's more than just the first-year track and field head coach, it's a former Olympic, All-American, a traditional leader, an intense competitor. He's also a great big kid.

Wright provides assistance to the women's team as well as his men's team, which competes at the 2001 Mike Williams USA Track and Field Open at the Recreation Center today and Saturday.

"He taught me a lot. He does examples for us," said women's high jumper Janice Gray. "I made a huge step Tuesday. I made a huge step during the SIU track and field meet.

"I didn't have a passion for what I'm doing again," said women's high jumper Latrice Williams. "He's good as far as motivational types of things."

"If you want to be successful in life, you have to be motivated," said Cameron Wright, assistant track and field.

Wright's athletes also believe his sometimes brash behavior is a significant part of his personality.

"He acts like he's young," Gray said. "He's kind of like a big kid."

"Wright might act like a big kid, but he's actually not that old, as far as age of head coach," Mike Williams.

"It's partly because I'm 28 years old that I relate to them," Wright said. "I'm just trying to be real with them. I definitely don't try to be hip. I don't try to be their friends, but I think it needs to be fun sometimes, too. I'm always trying to be a little different.

Wright clearly believes in the motto, "There's a time for fun.

"I'm glad that they like my personality, but my main goal is for them to achieve their goals, because their goals are my goals," Wright said. "We're in this thing together. I'm just trying to be real with them. I definitely don't try to be hip. I don't try to be their friends, but I think it needs to be fun sometimes, too. I'm always trying, always working.

Wright believes there is nothing more important than motivation.

"If you want to be successful in life, you have to be motivated. If kids aren't motivated to compete, they're not going to do well," said Wright. "That adrenaline, that fire, that little unknown quality that makes the difference is what makes the difference. It's something I believe in as a coach."

"There's a certain thing that gets into everybody and I think that it's part of my job to make sure that I hit every one of them and that I make sure they're fired up to compete."

While he may not want it on his job title, Wright is just as much a motivator as he is a coach.

"He always tries to cheer for everybody," Gray said.

Wright credits his parents for his signature motivational attitude.

"It's partly because I'm 28 years old that I relate to them," Wright said. "I'm just trying to be real with them. I definitely don't try to be hip. I don't try to be their friends, but I think it needs to be fun sometimes, too. I'm always trying to be a little different.

Wright believes there is nothing more important than motivation.

"If you want to be successful in life, you have to be motivated. If kids aren't motivated to compete, they're not going to do well," said Wright. "That adrenaline, that fire, that little unknown quality that makes the difference is what makes the difference. It's something I believe in as a coach."

Drake sneakers by the Salukis, 68-66

It didn't matter that the second-place Drake University women's basketball team had won nine straight. Nor did it matter that their second-to-last-place SIU counterpart had lost each of their last three games.

And it didn't matter that the Salukis outrebounded, created more turnovers, and scored more points than the Bulldogs because despite those advantages, Drake pulled off a 68-66 win Thursday night at SIU Arena.

It was a battle to the finish though.

With 10 seconds left and the Salukis down by two, SIU's Terica Hathaway and Drake's Kristin Santa got tied-up on the Saluki end of the court. The jump ball went to SIU.

The Salukis utilized a time-out. Kristine Abramo, a jumper in the paint with four seconds left. She rebounded her own shot and put it back up in traffic and missed again. Tiffany Crotchett grabbed the rebound and missed a reverse lay-up in time expired.

"It just wasn't meant to be," said SIU head coach Lori Callahan.

Opp. "We never gave up." 

The incentive was there for both teams. Drake (17-4, 2-0), with the win, moved into a tie for first-place with Southwest Missouri State University SIU (15-1, 2-2), while not mathematically eliminated from post-season possibilities, has now moved into last place in the conference and will have to pull off some unlikely heroics to make the MVC Tournament.

"We're very, very fortunate to win the game," said Drake head coach Lisa Stone. "Take nothing away from Southern Illinois—they played very, very hard." 

At halftime, the Salukis led 26-25.

One main factor for the Salukis hanging the in game, Abramo's performance, despite the loss in that game, was Abramo, who scored to play in the entire game. She took two spills in the first half that had her returning to the training room with Assistant Athletic Trainer Brenda McVittie. But Abramo returned both times and led the Salukis with 21 points, grabbing eight rebounds. She was followed by Hathaway's 15 points, six rebounds and two assists.

When the SIU baseball team plays at Jerry D. Young Field in Birmingham, Ala., starting today at 2 p.m. for a three-game series versus the University of Alabama-Birmingham, don't expect either team to knock one out of center field.

That's because Young Field's center-field wall was moved back to 400-feet and is now 30-feet high. Blazer Sports Information Director Grant Shingleton said. And with the left-field wall at 330 and the rightfield wall at 360, home runs won't come easy at any angle.

Scoring the Blazers (1-0) was something that SIU head coach Dan Callahan had little luck doing—the Blazers have only played one game, a 19-3 taslim of Alabama State University Tuesday.

And none of their 19 runs came off home runs. Fifteen Blazer hits are responsible for the high score and Shingleton said that the bigger field is better suited for Blazer-style offenses. While the Blazers lack power, they are offensively aggressive, manufacturing runs with a hit-and-run style offense, Shingleton said.

The Blazers are a mix of new players after losing five of last year's position starters. In Tuesday's game, starter Ross Dobbins allowed two hits and one run with nine strikeouts in five innings. With an early lead, the starting Enepre that consisted of five new fielders, all junior-college transfers, allowed Blazer coach Larry Gangmoss to give playing time to 17 players in all.

As of press time, the Blazer pitching lineup was unknown. For the Salukis, senior Billy Hardin, who transferred from SIU (-2) last year from the University of Nebraska and was drafted by the Chicago White Sox, will start the challenge for most of last season.

"He had an odd season," Callahan said. "After starting out 0-3 last year, he lost focus and lost his pitch. I think after three successive losses, he lost his confidence. Catchers who warmed up with him prior to those poor showings said he had great stuff before those games."

Except for right fielder Jason Rainey, who sprained his ankle and could miss the entire weekend, the rest of the starting Enepre will remain the same. Junior Justin Maurath will fill-in for Rainey until at least Sunday, Callahan said.

"The Salukis will be looking for their first win of the season and realize that's at stake. Unfortunately, we can figure out a way to win two of three," Callahan said. "At the least, we didn't play well. We didn't have anything here we want to start the season 0-6."

Illinois State University forced SIU to play catch-up the entire night. And in the end, neither team could overcome a second Redbird run.

SIU dropped a Missouri Valley Conference West Division game 69-60 Thursday night in Normal, slipping to 13-12 overall and an even 7-7 mark in the MVC.

Illinois State started out on a 17-0 run after SIU scored the first four points of the ballgame, but the Salukis moved back up with a 16-3 run of its own to close the half and take a 31-25 advantage into the lockerroom.

Despite struggling offensively in the first half, shooting 32 percent from the field and connecting on just one three-point field goal, SIU stayed in the game because of 13 Redbird turnovers.

"You go into the lockerroom, you've got to feel good about yourself, you've got to be ready to play and we came out very causal [in the second half] and turn it over and now [Illinois State] doesn't have to run and SIU shot the ball well," said Saluki head coach Bruce Weber on his post-game radio show.

Lose their opening in the half, SIU committed 10 second-half turnovers, including four early ones to swing the momentum back to Illinois State's favor.

And led by All-MVC senior guard Tavion Bryan, the Redbirds (15-5, 10-0) came out on top and went on a 13-2 flurry to entice the lead.

Once again, the Salukis tried to play catch-up, but didn't have the same luck in the second half, as the three-point shooting struggles continued. SIU shot just 2-11 from beyond the arc from beyond the three.

Meanwhile, Bryan and fellow Saluki nemesis junior Redbird guard Shawn Jeppson, continued to light up the scoreboard. Bryan, the league's most prolific scorer and leading candidate for the conference's Player-of-the-Year honors, scored 22 points, while Jeppson was good for 17 before finding out of the ballgame.

SIU had just one player with more than 10 2-pointers, but could never find its shooting touch, as the second Redbird run was too much to overcome.

"We fought and fought and fought to come back, but they just got out to an early jump in the second half and they got up again and we just couldn't catch them," said sophomore forward Jerrone DeJean, who finished with 12 points and seven rebounds.

SIU shot 29 percent for the game, while Illinois State connected at a 51 percent clip. Senior Alan Scharf and senior Kent Maitland struggled from the field, as Scharf scored just four points, while Williams put in a team-high 14, although he had four turnovers and five fouls.

"We couldn't buy a bucket, Weber said. "Kent has carried us, and tonight he just couldn't get that thing to go down and it's a shame because it would have been nice to have a good time, but just couldn't do it."

With the win, Illinois State earned sole possession of second place in the Valley, following Indiana State's 83-71 loss at Drake University Thursday night.

The Redbirds, Central Illinois University by one win, SIU is now in a tie with Southwest Missouri State University for fifth place and returns to action Saturday against the University of Northern Iowa in Cedar Falls, Iowa.

The Salukis, Redbird forward Rich Burks erupted moments later on the Saluki sideline between Weber and his star guard.
