DOROTHY DEBORAH MILLS IVES MEGUIRE WALLEY **New Role for Husbands**

Male Chefs Flourish in Summer With Burnt Hot Dogs, Raw Meat

By Larry Widrig

Hot summer days in Southern Illinois chase many SIU students outside for recreation--and meals.

As the family pushes through the door to get away from the heat of cooking in-

side, a new cook emerges,
Dressed in a white apron
and chef's cap, the American male assumes a new role
in his family. He is thus not
only the breadwinner but also the meal maker.

With the same self-confi-dence with which he meets everyday problems, this new chef will attempt to turn the bright red meat into a mouth-

watering meal. Equipped with only a barbecue grill, briquets and fire starter, the new outdoor chef will prove to his family and his wife he's as good a cook as Chef-

boy Ardee. The origin of barbecueing

is unknown. Since the begin-ning of man, outdoor cookhave consisted of killing animals and roasting them over large outdoor pits. The male was also considered the chef until the female found that meat, when cooked outside, was much better tast-

ing when it wasn't black. From this point the woman became the chef of the barbecue.

However, with the many ex-tra duties the wife has to perform, the male once again assumed the chef role.

A poll of some of the SIU student wives proves that the husband is a helping hand in preparing an evening meal during the hot summer days. Here are some of the student wives' opinions of their hus-band's cooking.

band's cooking.

Mrs. John Marek, a junior from Mattoon, Ill., says that anytime she gets out of doing the cooking, she's all for it.

"My husband is a good cook, that is, if you like raw hamburger and burnt hot dogs," Mrs. Marek says. "When he cooks outside, he's a better cook than I am. However, being Polish, he does have the tendency sometimes to add too much garlic, onions, green much garlic, onions, green peppers, black peppers, chili peppers and other peppers. His meals aren't followed by dessert, only a good case of heart burn," Mrs. Marek adds.

"We've only tried barbecue-ing outside once," says Mrs. Allen Rude, wife of another SIU student. "We haven't got

a barbecuer, my husband is a terrible cook and we've got a nervous landlady."
"The only time we cooked

had put the steaks on the fire. She was worried about us burning the house down," Mrs. Rude continued.

"I explained to her that my husband was in complete con trol of the situation on, but this only made her more ner-vous," Mrs. Rude said. "I explained to her we were 30 feet from the house and that we had a garden hose handy if a fire did start. But she still insisted that we were endangering her house, so we ended up having half-done steaks that night. Consequently, I know my husband can cook half-done steaks," Mye Rude stated Mrs. Rude stated.

"I like it when my husband cooks outside," says Mrs. Leonard Thies, another student wife. "It gives me a break

"He does a good job of cook-ing the meat," says Mrs. Thies. "Now if I could only figure out a way to get him to cook indoors also, I'd have it made," Mrs. Thies added.

Mrs. James Lemons says then her husband cooks outwhich her husband cooks out-side, it gives him a feeling of accomplishment. "While he has the meat going," Mrs. Lemons says, "I've got time to fix the other food for our meal. Now, if I could only come up with the magic word which would get him to help clean up after the meal was over, I'd have it made," Mrs.

Goldwater Gives Voters Long-Lost 'Clear Choice'

Campaign Will Put Basic Issues to Test

By James Marlow AP News Analyst

SAN FRANCISCO-The Republican party under conservative Sen. Barry Goldwater now begins a presidential campaign that is unique in the 20th century and will be re-membered for generations.

The four-day convention that made Goldwater the party's candidate a-gainst the Democrats' President Johnson was dull because his se-lection was a foregone conclusion. But the implications are profound.

This 1964 campaign will be vastly different from the kind the Republi-cans have waged for decades. Previous ones hardly did more than urge restraint on the expansion of federal power and programs.

But Goldwater wants to return to some aspects of the past. In his acceptance speech Thursday night be said "We must and we shall re-

DON'T BE A LITTERBUG!

turn to the proven ways-not only because they are old but because they are true."

For example: Although Democrats and Republicans agreed in the Employment Act of 1946 that the government has a responsibility for the general welfare, Goldwater has said it must withdraw from social welfare programs.

He did not necessarily budge from that position Thursday night when he said,"We must assure a society here which, while never abandoning the needy or forsaking the helpless, nurtures incentives and oppor-tunities for the creative and the productive."

And, as he has said before, he would diminish both the role and the power of the federal governnt. He said: 'We Republicans define govern-

ment's role, where needed, at many levels, preferably the one closest to the people involved. Our towns and cities, then our counties and states, and only then the national government.

"That is the ladder of liberty built by decentralized power. On it also we must have balance be-tween branches of government on every level."

Never once in his speech did he say a word about what he thinks should be done on civil rights for Negroes although, because of his vote last month against the Johnstonsponsored civil rights bill, this will

be a major and perhaps blazing issue of the campaign.

It is hard to believe this will not be one of the roughest campaigns in this century—perhaps the toughest.

Less than two weeks ago Goldwater said one of the main is-sues of the campaign would be the than "scandal hanging over the White

Thursday night he said "our

people have been given bread and circuses, spectacles and even scandals." And he talked of "corruption in our highest offices."

At this moment it is impossible to know how much appeal Goldwater will have to the masses of voters, or even to liberal Republicans, although it seems clear he will need all the Republican support be one out port he can get.

port he can get.

If he loses, particularly if he loses
badly, Republican power in this
country will probably be shattered
for years. If he wins, the country
will have to reverse its course and take a sharp turn to the right,

Then a whole new evaluation of the government's role at home and its foreign policies would begin. In the past, at least back to 1940,

the two parties have looked pretty much like twins, except for semantic hair-splitting on issues that looked more synthetic than real.

Thus for years voters have not been given a clear choice between liberal and highly conservative

parties.
They'll get that chance this year.

"The Good Lord raised up this mighty republic to be a home of the brave and to flourish as the land of the free--not to stagnate in the swampland of collectivism-not to cringe before the bullying of communism," he declared. Cheered throughout his speech

he got his biggest hand from delegates who had been warned about the threat of extremist elements to their party when he said: "Extremism in the defense of liberty is no vice. Moderation in the pursuit of justice is no virture."

Goldwater marched triumphantly to the podium after his unanimously elected running mate, Rep. William E. Miller of New York, had accepted the vice presidential nomination.

Strong Drive, Moderates' Failure Won for Goldwater

By Jack Harrison

How did Goldwater do it?

He won the 1964 Republican presidential nomination with an overwhelming show of delegate strength, And this was accomplished despite the apparent fact that a majority of the party's voters throughout the nation did not favor Goldwater for

nation did not havor congress so the nomination.

The success story is based on a strong and energetic organizational drive by the Goldwater camp, plus a lackluster performance by the moderates who had previously controlled the party.

Goldwater set out four years ago

The head of the reorganization campaign was F. Clifton White, a political scientist who has been "coordinator of field operations" for the Goldwater forces.

Goldwater himself has done yeo-

man service for his party during the past few years, and at the same time he was furthering the candidacy of Goldwater.

Sen Coldwater was chairman of the Republican Senatorial Campaign Committee for three terms, He thereby traveled throughout the country, made more than 800 speeches and raised \$6 million for the party.

Seemingly before the moderates realized it, the Goldwater forces had quietly built up an organization entirely capable of controlling the convention in San Francisco.

New York Gov. Nelson Rockefeller, the heavy favorite for the 1964 nomination back in 1961, divorced his wife and remarried, which essentially killed his chances to lead the parry this year.

pecause conditions were not right and they feared defeat. Perhaps Goldwater never took his candidacy too seriously in 1961 and 1962. But things began to break his way and it seemed that he had a good chance to gain control of the parry.

By the end of 1962, the Drait Goldwater Committee, directed by White, had operations underway in 37 states,

Many of the political newcomers

who joined the Goldwater movement have displayed an extraordinary enthusiasm for the cause. They have fought and worked long and hard to see their man win the nomination. The job ahead—defeating President Lyndon B. Johnson—is even more formidable than that which they have accomplished.

to mne-story glass and brick buildings that dot this complex college community.

First of all, the area of enrollment has changed greatly. In an address that President Parkinson made on April 8, 1908, he stated with pride that the enrollment of the college as of that day stood at 328. He had to add in a subdued voice, "including those in high school."

Carbondale's on-campus enrollment will soon be 40 times that number, "not including those in high school."

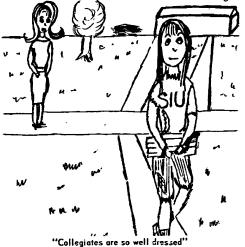

The campus itself has expanded in the last 50 years.

Part of the campus included a farm. The first ornithology class of four boys and four girls were warned not to tramp on the patches of rhubarb, strawberries, and asparagus.

One thing that changes con-stantly is women's fashions. Once upon a time, girls en-rolled in physical education at SIU came to class attired at 510 came to class attreu in voluminous blouses, baggy black bloomers, and long black stockings. The proper young ladies were completely enrobed in this costume. Who she thought she was out of the teacher's sight, one unabashed girl dared to raise her bloomers and lower her stock-ings just enough to show her attractive knees,

Held in one room was a class designated for "men only." It proved to be dis-appointing, however, because the president talked only about

Many changes are in progress today. Who knows what things will be like in the future? Instead of bloomers will all the girls wear topless bathing suits? Will someone invent a push-button farm to replace the old camfarm to replace the old cam-pus farm?

College Role Hard to Play

The role of the high school student spending several weeks on a college campus can be difficult. The ever-present temptation of the 17year-old boy or girl to throw himself into the lead role of Mr. Ivy League is one of the problems of workshoppers.
When this year's students first arrived, they were in-

However, the general trend seems to be that even though most students are only though most students are only high school seniors, they should "grow up" for the summer and follow the col-lege students' examples. High school students, how-

ever, do not all agree with this advice. Many feel that they are here to have a good time and cannot do so if they time and cannot do so if they must act in an unnatural manner. Others believe that the college students would resent seeing high schoolers in the role of "campus cats,"
