IDs not always picture perfect

By Emily Priddy
Daily Egyptian reporter

Becky, an SIUC student, is carrying a state identification card with her own photo on it. But the name, address, birthdate and Social Security number on her card belong to her sister.

Becky, who was 19 when she got the ID card, said she needed it to get into bars in Carbondale.

Getting the card was difficult, Becky said.

"My sister was 21, and she's like a year and a half older than me. So I just took her information to the DMV (Department of Motor Vehicles)," she said. "I just took her Social Security card, her credit card and her drivers license." Becky said no one in the facility hassled her about the information she presented.

She said she told the woman behind the counter that she lost her wallet at Mardi Gras and that the hotel she was staying in called to tell her they had it. She told the woman she needed identification card is the meantime to be able to board a plane so she could go on spring break.

"I used to be so interested in finding out that I did at Mardi Gras that she wasn't even paying attention," Becky said. "I mean, it was really easy.

Becky said she got a state ID rather than a driver's license because she did not want to make her sister's license invalid.

Becky's next drink could be an expensive one if she is caught using the fictitious ID. Cathy Watson, a spokeswoman for Secretary of State George Ryan, said.

"People who are using a fraudulent driver's license or identification card faces two possible types of charges.

Because anyone presenting information in the process of obtaining a state ID or driver's license is required to sign an affidavit affirming that the information is true, that person can be charged with perjury — a Class 4 felony, if she or he is caught. Ritter said.

The penalty for a Class 4 felony is one to three years in prison and a fine of up to $25,000.

The other way they can be charged is with possession of a credit card cut off wrong consumers

By Emily Priddy
Daily Egyptian reporter

Christy Davis came back from spring break to find a series of ominous messages from a credit-card company representative on her answering machine.

"The company kept calling me because I was, like, delinquent, but it wasn't me," Davis, a senior in marketing from Oak Forest, said. "The phone calls were scary. They were threatening me."

At first, Davis said she thought it was a mistake. When Davis found out her sister's account was not the one in question, she was embarrassed and concerned.

"I thought someone else had opened a credit card under my name."

"I was really worried," Davis said.

What had actually happened was that another student named Davis, whose middle name was Christine, had opened an account and had given the company Christy Davis' phone number.

While Davis' credit rating was safe, not all students were so lucky, according to a representative from First USA Bank, a Delaware-based credit card company that often opens SIUC student credit accounts without the students knowing.

"Categories will not change for you to learn about them," Vergara agreed with Tiwari and Davis.

"People have to make steps towards that direction. That's why we have a retreat like this — to teach each other about different cultures and increase awareness," Vergara said. They are even more multicultural than bimical. I think it's a good change.

"Categorize will not change until people start to change."

"I don't know why I did that. I grew up with Puerto Ricans and they push me away because I did not look like them."

"Categories will not change for you to learn about them."

Education group gathers books for children

By La'Keisha R. Gray
Daily Egyptian Reporter

As SIUC health education honorary society has taken the opportunity to serve the community by making a donation that will help children learn the importance of reading, a student says.

Susan Hill, a graduate student in health education from Oregen and the chairman of service for Eta Sigma Gamma, said one of the group's goals is to make sure everybody is able to understand health literature, but she said that good has an obstacle because there are a lot of people who cannot read at all.

Hill said literacy starts with children learning the importance of reading.

Hill said Eta Sigma Gamma donated 59 children's books to the "Books to Every Home" book drive Monday. The book drive spans all five SIUC campuses, and the proceeds go to the 17 Headstart programs in this region affiliated with SIUC.

"With books in homes, children will read, and their parents will read to them," Hill said. "Literacy is higher when homes have books."

The book drive was started last year by Beverly Sanders, the wife of SIUC President Ted Sanders. She said she started the drive because she wanted the students to take books home.

Headstart programs are funded by the government, and the books given in the program cannot be taken from the schools.

Sanders said she cannot believe the success of the book drive, and she is both grateful and overwhelmed by how many books have been collected.

Although last year's goal was 2,000 children's books, Sanders said there were 4,000 books donated. This year's goal is 2,500 children's books.

"The outcome is wonderful, and people have been so generous," Sanders said.

Sanders said each student will be presented a book that will have the child's name written on the inside and will state "Presented to [child's name] for your future and ours, from your SIUC family" to take home.

"Arica books will be used for lending libraries at each school," Sanders said. "This excites them because it adds a personal touch by putting their names in the book."

Nancy Konzett, a graduate in health education from Kentucky State University, said that allowed us to help both the University and the community," Konzett said.

"Books still are being collected for the book drive. Plans for the books are at various places on campus, including Morris Library.

USG should make stipends function like tuition waivers

IT IS EASY TO CRITICIZE ANY LEGISLATIVE body when it votes to give itself a raise — but it is not always justified. Such is the case with the Undergraduate Student Government's upcoming vote on pay raises for a few of its members.

This Wednesday, USG will decide if the president, vice president and chief-of-staff deserve $300 raises. Such a raise would bump the president's pre-semester stipend to $1,800 while the vice president and chief-of-staff would make $1,600. USG members also have proposed increasing the executive assistant's stipend from $320 to $800.

USG MEMBERS SAY THE OFFICERS' STIPENDS are designed to pay for tuition and fees — like a tuition waiver. Fair enough. Holding the positions in USG takes time, research, patience and more time. Holding a job in addition to these positions is expected to bring in a bit too much from USG officials.

BUT THERE IS A BETTER SOLUTION THAN periodically passing these stipend increases: a resolution that specifies the stipends for the president, vice president and chief-of-staff to exactly cover their tuition and fees. Under such a resolution, officers and those considering running for one of the positions would know what their financial compensation would cover in advance. It also would ensure that student fee money would be used in a fair manner.

USG members say the stipends are supposed to function like a tuition waiver. They are right. That is why a resolution making the stipends equal to the cost of tuition and fees should be passed. Whether the executive assistant stipend should be quadrupled is another question.

SUPPORTERS OF THE INCREASE SAY THAT THE woman currently holding the position has revamped the position to include a lot more work. Unlike the other increases that take effect next fall, this increase would be retroactive to this semester.

The one senator against the raises has said the current executive assistant's unprecedented efforts in the position should be passed. Whether the executive assistant stipend should be quadrupled is another question.

FIGURING THAT THIS SEMESTER'S EXECUTIVE assistant worked about 15 hours a week translates into an hourly wage of about $3.33 per hour — still more than $1 under the minimum wage.

That's not a bad deal for students or the executive assistant. The wage may seem low, but the person holding the position is gaining experience and knowledge in return for his or her low pay.

IT SHOULD BE NOTED THAT NOT ALL Universities even pay their student government officers. This system would exclude too many quality candidates who would choose to run for office because they could not afford to hold an officer's position. Refusing reasonable financial compensation would result in having a student government that only the financially secure could be a part of. That would not be representative of the student body.

I find in incredible that Mr. Hicks watched an unmarked tow truck take a car with a tow diversity to his company. This week, Mr. Hicks did the equivalent of watching a moving company clean out the neighbor's house even when you know they are not moving. Hello? If you see a situation like that, call the police.

If a towing company takes advantage of you, it is because you do not know your rights. Ignorance is not bliss. If we all parked legally and knew our rights, the towing company would not be in a position of power.

As much as we hate towing companies, these are the same people who are personally grateful when the tow truck drivers winch cars out of a snowy ditch or tow them off the interstate when they break down.

It would have been much cheaper and less of a hassle for the guy who shot the tow truck driver to just let the driver do his job.

Now he is "on the hook" for shooting the driver, not to mention a police officer. He and will be paying for the damage to the wrecker.

The fact is, tow truck drivers make a living off of our stupidity. They are not going to quit because someone has threatened violence.

They will just raise the cost of getting shot at to the next person who gets towed.

Leslie Wood
Second-year law student

Halloween policy unfair to some

I am sick of all of the attention the media gives to the stupidity that goes on here in Carbondale. For weeks, local television news stations and newspapers have given their front page to the riots on the Strip.

I cannot believe that the University has to let students go home so some fools can legally destroy a whole community. I read in a past article that the city and the University have been dealing with this problem for the past 10 years. The years are a long time to let this problem go unsolved.

I was wondering if the city and University were willing to let other racials get away with weekend to get off school. I think that it is unfair that I have to pay $60 for a round trip ticket to allow someone to drive a car that is already in a bad condition.

Every city has tow problems

Mr. Hicks is absolutely wrong in condemning Carbondale for the towing industry. "Towing is especially successful in college towns such as Carbondale, Charleston, Bloomington-Normal and Champaign-Urbana."

Every city has a "bad apple" towing company. Carbondale itself is guilty of letting a certain company go too far.

In any industry in which a company is given a monopoly, there will be antipathetic behavior. The city incurs losses without which a towing company cannot legally operate. If a towing company is abusing its authority, Carbondale needs to correct the problem.

I think Carbondale and the University should damage some of your property, embarrass you and make you and your gang of friends to all the necessary upkeep for the University.

Happy people wear fuzzy hats

I never realized how uncool I was until I read James Lyon's two cents in the Nov. 13 issue of the Daily Egyptian. Yes, I am one of those guys who wears big, baggy jeans. Now that it has been pointed out to me that I look ridiculous, my happiness has diminished to utter despair. I think I will go out and buy all black clothes so I can be accepted by Mr. Lyon and anyone else who is laughing as I walk across campus.

Some people are wearing black or "grunge" clothing — whatever that is — an acceptable sentiment, but what about all those blackboards are not? Not everyone's lives are full of depression and anguish. Some of us are relatively happy.

Thank God. I do not care that your inner mood requires you to wear all black, but that is your choice. Just like it is everyone else's choice to wear whatever they choose. Maybe your inner mood has blinded you. Wearing a jester hat is funny. That is the point. When I see someone wearing one, I see somebody who is happy. I do not believe that they say "nothing."

I dress the way I do because it is comfortable and reflects my lifestyle. I am happy and carefree.

Fuzzy hats, baggy pants not laughable

1. In fact, am also not an expert on fashion in America, Mr. Lyon, but people of the '90s dress in very different ways.

2. You say in your article that people with fuzzy hats and baggy pants are "sell-outs." Yes, I do wear fuzzy hats, but not baggy pants. The reason I wear the hat — and pay attention here — is because I note the word like it, I do not do what others think. And a lot them do not, in fact, laugh like you do.

Why don't they laugh? Because they are not insecure like you apparently are. They have their own personalities and dress the way they want and respect how others do. These people do not act like they are in kindergarten, and they do not start giggling like fools. I am surprised that you laugh at those people just for their differences. Are you also a racist or sexist? I don't know, but I figure there are better issues to complain about other than how people dress. I suggest you grow up and look past the clothes and write about issues instead of whining about fuzzy hats and baggy pants.

Oh, I do not laugh at people that dress like you do, who wear dark, plain shirts and blue pants, because you lack creativity and imagination.

Goodbye and good luck with your career, Mr. Lyon.

David J. Rechcn
freshman, administration of Justice

Wendtlyk Would Dr. King be proud?

apparently, any black person who tries to make a better life for themselves without being a rap singer is a sell-out.

"I dress the way I do because it is comfortable and reflects my lifestyle. I am happy and carefree."

Happy people wear fuzzy hats

I never realized how uncool I was until I read James Lyon's two cents in the Nov. 13 issue of the Daily Egyptian. Yes, I am one of those guys who wears big, baggy jeans. I dress the way I do because it is comfortable and reflects my lifestyle. I am carefree and happy. It also reflects the style of music I listen to and play. I am sorry you think this is not a worthwhile stance. Would it be better for me to wear nice fitted jeans and tucked-in flannels? While there is the point. When I see someone people laughing. People have better things to do. Why do you care, however they choose. Maybe your because I do not really care. Actually though, I think it is because there are not that many people laughing. People have better things to do. Why do you care, or even notice, when people do not comb their hair? It has no effect on your life. Maybe it is more important for these people to...
HELP CARBONDALE DECIDE DEVELOPMENT POLICIES FOR THE CITY'S NEW COMPREHENSIVE PLAN

The City is pleased to invite residents to a community meeting where they can review and comment on draft land use plans and development policies for the comprehensive plan.

Meeting Locations
November 20th 4:30 to 6:30pm at Thomas School - 1025 N. Wall Street
November 20th 7:00 to 9:00pm at Senior Adult Services - 409 W. Springer
November 21st 4:30 to 6:30pm at Lewis School - 801 S. Lewis Lane
November 21st 7:00 to 9:00pm at Winkler School - 1218 W. Freeman

- All meetings will have the same information, attend which ever is most convenient.
- City staff and the planning consultant will be available for questions or comments.
- A brief presentation about the plan will be made 1/2 hour after each meeting begins.

For more information call Tom Redmond, Development Services Director, or Scott Haney, Planner at 519-5302 or reach us at our internet address: www.ci.carbondale.il.us

Love Feast feeds underprivileged

By Mikal J. Harris  Daily Egyptian Reporter

The children of the Carbondale community were first in line for meals at Sigma Gamma Rho's "Love Feast" because they are the priority for the sorority's annual dinner, a sorority member said.

"Some families just don't have the food," Robin Davis, a senior in early childhood education from Chicago, said.

"Sometimes parents can find the food, they can go out and get jobs, but it's the kids who are suffering. At least tonight the food is here."

Sigma Gamma Rho Sorority had its fifth annual "Love Feast" Friday at the Eunna Hayes Center, 441 E. Willow St. The sorority served hot plates of traditional holiday fare and desserts to the Carbondale community.

Davis said events like Sigma Gamma Rho's "Love Feast" are necessary for other members of the SIUC community to help underprivileged Carbondale families.

"It's really important to have events like this for the community," she said. "If we don't reach out and help, then nobody will probably take the initiative to do it."

The dinner is the sorority's biggest project of the fall semester, Sigma Gamma Rho President Tyree Thomas said.

Thomas, a senior in psychology from Chicago, said food prepared for the event included ham, about 500 chicken wings and a host of vegetables and side offerings, most of which were donated by fellow National Pan-Hellenic fraternities and sororities.

Thomas said the name of the dinner was chosen to represent what the sorority hoped to demonstrate to the Carbondale community.

"Basically, we needed a name to fit exactly what it was," she said. ""Feast" represents the food, and "love" is the love we have for the kids and the community."" Davis and Thomas said the event is planned during the week of the sorority's Founder's Day, Nov. 12, as a homage to the founding members of the service sorority. The founding members left the sorority the motto of "Greater Service, Greater Progress."

Davis said approximately 100 people enjoyed the dinner.

"I think everyone enjoyed themselves," she said. "They came up for seconds and desserts, and I think it went very smoothly. It was a nice occasion."

Sigma Gamma Rho members prepared food from out of town to some of the community members, including 1991 SIUC alumnus and Carbondale resident Thomas Bell.

Bell said Friday's "Love Feast" was the second he had attended.

"The food was fantastic, and the young ladies serving really seemed to enjoy themselves," he said. However, Bell said there was one aspect of the event that was even better than the food.

"It was good to see people from the University come into the community and get involved," he said. "I think one aspect of this event is better.""}

Vegans buck turkey trend

The Hartford Courant

Sara Kovarovics won't be spending Thanksgiving with her family this year. The 23-year-old Connecticut State University student, a member of the Hartford Vegetarian Society, will be spending the holiday with her friends instead of with her family.

"I don't believe in eating meat, so it's really offensive for me to be sitting at the table and having people celebrating by eating this bird," Kovarovics, who is 23 and lives in Ashford, Conn., said.

Instead of a roasted turkey, Kovarovics and her vegan friends will be serving a feast of squash, rice and other vegetables. "Good stuff," Thomas Bell, Sigma Gamma Rho President Tyree Thomas said.

Thomas, a senior in psychology from Chicago, said food prepared for the event included ham, about 500 chicken wings and a host of vegetables and side offerings, most of which were donated by fellow National Pan-Hellenic fraternities and sororities.

Thomas said the name of the dinner was chosen to represent what the sorority hoped to demonstrate to the Carbondale community.

"I don't believe in eating meat, so it's really offensive for me to be sitting at the table and having people celebrating by eating this bird," Kovarovics, who is 23 and lives in Ashford, Conn., said.

Instead of a roasted turkey, Kovarovics and her vegan friends will be serving a feast of squash, rice and other vegetables. "Good stuff," Thomas Bell, Sigma Gamma Rho President Tyree Thomas said.

Thomas, a senior in psychology from Chicago, said food prepared for the event included ham, about 500 chicken wings and a host of vegetables and side offerings, most of which were donated by fellow National Pan-Hellenic fraternities and sororities.

Thomas said the name of the dinner was chosen to represent what the sorority hoped to demonstrate to the Carbondale community.

"Basically, we needed a name to fit exactly what it was," she said. ""Feast" represents the food, and "love" is the love we have for the kids and the community."" Davis and Thomas said the event is planned during the week of the sorority's Founder's Day, Nov. 12, as a homage to the founding members of the service sorority. The founding members left the sorority the motto of "Greater Service, Greater Progress."

Davis said approximately 100 people enjoyed the dinner.

"I think everyone enjoyed themselves," she said. "They came up for seconds and desserts, and I think it went very smoothly. It was a nice occasion."

Sigma Gamma Rho members prepared food from out of town to some of the community members, including 1991 SIUC alumnus and Carbondale resident Thomas Bell.

Bell said Friday's "Love Feast" was the second he had attended.

"The food was fantastic, and the young ladies serving really seemed to enjoy themselves," he said. However, Bell said there was one aspect of the event that was even better than the food.

"It was good to see people from the University come into the community and get involved," he said. "I think one aspect of this event is better.""}

Vegans buck turkey trend

The Hartford Courant

Sara Kovarovics won't be spending Thanksgiving with her family this year. The 23-year-old Connecticut State University student, a member of the Hartford Vegetarian Society, will be spending the holiday with her friends instead of with her family.

"I don't believe in eating meat, so it's really offensive for me to be sitting at the table and having people celebrating by eating this bird," Kovarovics, who is 23 and lives in Ashford, Conn., said.

Instead of a roasted turkey, Kovarovics and her vegan friends will be serving a feast of squash, rice and other vegetables. "Good stuff," Thomas Bell, Sigma Gamma Rho President Tyree Thomas said.

Thomas, a senior in psychology from Chicago, said food prepared for the event included ham, about 500 chicken wings and a host of vegetables and side offerings, most of which were donated by fellow National Pan-Hellenic fraternities and sororities.

Thomas said the name of the dinner was chosen to represent what the sorority hoped to demonstrate to the Carbondale community.

"Basically, we needed a name to fit exactly what it was," she said. ""Feast" represents the food, and "love" is the love we have for the kids and the community."" to fraudulently get applications through," Wilson said. "Once that happens and we realize it is fraudulent, we have our investigators find out what it is."

The Daily Egyptian reported in January that 22 cases of credit-card fraud on campus were reported to police in 1995.

"There are an array of symbols of that goes into food, and if you're not part of the tribe, so to speak, then there's a problem," says Jim Pettman, owner of Better Ways Marketplace, a health-food credit-card fraud.

There are two ways people can find out if someone is using the identity for credit-card fraud, Wilson said. The best way is to contact a credit reporting agency periodically check their credit rating, he said. If there are items on a person's report that he or she did not charge, they can be disputed.

The other way people learn of credit-card fraud is by applying for a loan being denied because of bad credit, Wilson said.

If an individual does not keep tabs on his or her credit reports, Wilson said the fraud can go on indefinitely.
Men aim to recoup last season’s losing record

By Michael DeFord

IL Sports Editor

James Watts’ inaugural season at SIUC was far from positive, and the sophomore guard feels he can contribute to the basketball Salukis repeat it. Last season’s 18-14 struggle was something new for Watts, who says he hopes the Dawgs will fare better this season than last. "I’ve never really been on a losing team," Watts said. "Last year was my first year of losing, but I don’t want to repeat last year again." Watts is one of eight returning let­termen on this season’s roster who will try to pick up the pieces left over from last season. The team will try to put the Salukis back on top of the Missouri Valley Conference after a 4-14 finish in their last season. SIUC is ranked seventh in this year’s conference preseason poll. But this year’s poll doesn’t mean all that much considering the fact that all 10 teams have talent and the traditional eight, automatically will make the trip to the Kiel Center in St. Louis regardless of league records. Yet a respectable finish in the Valley gives another different story for the Salukis.

SIUC Coach Rich Herrin, now in his 12th year at SIUC, said the talent at SIUC was far from positive, "I’ve never really been on a losing team," Watts said. "Last year was my first year of losing, but I don’t want to repeat last year again." Good things come in small package

By Kevin DeFries
Daily Egyptian Reporter

They are only 5 feet 5 inches tall, but as co-captains of the Saluki women's basketball team, the twin-spired tandem of Kasia McElendon and Beth Haskell is 1 foot taller. The Salukis are the shortest players on the team. Haskell is 5 feet 5 inches tall and McElendon is 5 feet 10 inches tall. They are the shortest players on the team and are key to the team's success.

McElendon has averaged 11.5 points per game throughout her career and is perhaps one of the best defensive players in the country, finishing last season ranked 14th in the nation with 2.5 steals per game.

For her defensive efforts, McElendon was named the Defensive Player of the Year twice in her career — so far she has been named to all-MVC first team.

"She had a tremendous year last year," Scott said. "The most impressive thing about Kasia McElendon is how well she plays in her role. She plans to maintain that status and show the freshmen how to get the job done on the court.

"I think it would be a let down if I don't do well for the team," McElendon said.

Scott said the team looks up to McClendon for her work ethic on the court.

"We gave the team questionnaires for the media guide, and one of the questions was, 'Who do you admire the most on the team?'" Scott said. "And the only player who received any mention was Kasia.

Scott said McClendon is looked up to by the team because of her hard work and determination.

"It’s a thing that runs true through all the kids in our program, that Kasia McClendon is about as hard a working player that you can have as a teammate," Scott said. "She's a hardworking player that I have ever coached."

Hasheider, who will be playing the one and two guard positions this season, has seen her share of problems in her first two years at SlUC. Shes played with a torn anterior cruciate ligament her senior year at Okawville High School, but led her team to a Class A state championship. That injury has haunted her at SlUC as well.

"Last year it bothered me a little bit, and I was tentative," she said. "Physically, I was probably fine. But in my mind, I was always scared to step on someone’s foot."

Hasheider has been working on rehabilitating her knee and said the program has worked exceptionally well for her.

"I haven’t had any problems with it in over a year," Hasheider said.

McClendon will try to continue her defensive prowess on the court, and Hasheider will put her knee to the test against the Lady Racers of Murray State University in the Saluki season opener Nov. 23 at SIUC Arena.

Herrin philosophy: have fun, enjoy it

By Michael DeFord
DE Sports Editor

Unlike fun, goals never have been a part of Saluki basketball Coach Rich Herrin's coaching philosophy.

In fact, Herrin, who enters his 12th year at SIUC this season, says fun is more his style.

"I've never been a goal setter," Herrin said. "We want to have fun mainly — enjoy it and try to get better. We hope the kids can have some success. And that's the kind of thing you are looking for."

Yet without establishing a framework of goals during his six seasons at the helm of Saluki basketball, Herrin has managed to set some career marks at SIUC and within the Missouri Valley Conference.

With a composite record of 198-141, Herrin ranks second among SIUC's all-time coaches. In the Valley, the 67-year-old coach ranks fourth in all-time wins with 97, which puts him among legendary names such as Henry P. Iha, Eddie Hickey and Dr. F.C. Allen. Then there is his most cherished award, an induction into the Saluki Hall of Fame in 1990. Herrin was selected as the MVC Coach of the Year, which he considers perhaps the most prestigious award in his 41 seasons as a coach.

"The Valley is one of the oldest conferences in the country," Herrin said. "It's had some of the all-time greatest coaches. Being selected Coach of the Year in the Valley is one of the nicest honors I've ever received."

But unfortunately, the bad has accompanied the good in Herrin's 11 seasons with the Salukis.

Take last year, for instance, when the Salukis failed to get a berth in the conference tournament after seven consecutive appearances. What disappointed Herrin the most, however, was his seniors missing the opportunity to participate in the tournament.

"I think a player should have the opportunity to participate in the tournament," he said.

This season, Herrin gets his wish as all Valley teams will make the trip to St. Louis for the annual post-season tournament. Like his philosophy in previous seasons, winning the tournament is not a goal of Herrin's this season, but having fun is.

"We just want to have fun, enjoy the season and make young men better people."

Scott attempts 20/20 record

By Donna Colter
Daily Egyptian Reporter

In 1983, Scott took her squad to the Missouri Valley Conference championships, appeared at the NCAA tournament four times since 1986 and posted eight 20-win seasons.

The Salukis had to replace five seniors from last year's 18-10 squad, which was runner-up in the MVC behind Southwest Missouri State University. But Scott said this will not be any less successful than any other year for SIUC.

"The future of this program is very bright," she said. "We don't have down years where we rebuild here at SIUC."

Scott opposes 20/20 record

"This year we just want to win," she said. "This year we just want to win. Anything less than that is not acceptable in our profession that I'm not coaching anywhere else but SIU."

In the previous 19 winning seasons at SIUC, Scott and her teams have compiled a 364-183 record. The record places her at No. 31 on the list of winningest coaches in NCAA Division I play.

Scott began her career at SIUC in 1977, and in her second year as a coach, she took the team to the Illinois AAIAW State Tournament and finished with a 23-6 season.

Scott also was the winningest coach in the existence of the Gateway Conference, posting a 149-35 record. She was named Gateway Conference Coach of the Year in 1986 and 1987. Her teams combined for a 38-0 conference mark, the first and last team in the history of the conference to go unbeaten in conference play.

Watts continued from page 7

...ourselves."

Yet SIUC's schedule will not make for easy time. With Baylor and a possible matchup with Texas Tech at the Cowboy Invitation, Herrin said this season's schedule is perhaps the toughest yet.

"No question about it: it's the toughest ever at SIUC," Herrin said.

"We definitely will have the opportunity of attracting national attention — if we can win."
"Until they can find alternative forms of entertainment, I'm going to be at the bars."

Becky, SIUC student

"The only way that I would have gotten caught was if I was caught in the process of getting (the cards)," she said.

While state-issued identification cards are harder to detect than those manufactured by outside sources, Ritter said, the only way students can get an identification card without showing a photo ID is if they come in with their parents. Becky said, "If a student loses his or her wallet and needs a new ID, Boisen said the student can go in campus security to get a copy of the social security number. That is a Class A misdemeanor.

Students who had cards made recently do not need to go through this process because all information, including the student's photograph, is logged into a computer in the ID office and is saved so the information can be retrieved on the spot, Boisen said.

Students would gain little by having a falsified student identification card even if they could get one, Boisen said, because the only information on the card is the student's name, Social Security number, photo, signature and status as a graduate or undergraduate.

"People come in and go, 'Can I put a different age on my ID?' and I'm just like, 'Yes, you can, right, that's not even on it,'" she said. "The only difference between undergrad and graduate is you get more privileges at the library (with a graduate ID)."

Six runners make MVC Academic Team

The Saluki men's and women's cross country teams placed three members each on the MVC Academic All-League Academic Scholars list.

Senior Steven Simons, a four-year varsity student-athlete and his roommate senior Andreas Kocis, are both academic all-conference honorees.

FALCONS ODOMES SICKEN

Atlanta Falcons' cornerback Nate Odomes who was released from a suburban Atlanta hospital Monday afternoon after receiving minor injuries in a car accident that occurred over the weekend in Atlanta, and an Italian promoter said he will not participate in the scheduled Dec. 4 fight.

The 26-year-old Odomes had been involved in a car accident last week in Atlanta before the Falcons' game against the Jets Saturday.

The Falcons have not released any details about Odomes' injuries.

Under 300 and injuries is not exactly how Saluki senior running back Coe Bonner wanted his SIUC football career to end. Bonner rushed 66 yards in the first half of SIUC's 34-17 season-closing win over Southeast Missouri State University Saturday before being forced to sit out the second half with a fractured shoulder.

The win ended SIUC's five-game skid and sealed their season's worth of 6-6 record.

"I think this will be a good offensive season," he said.

Led by Bonner, SIUC's offensive was among the top three in the Gateway All-conference. Unfortunately, in the second half of the season, the Salukis went over 400 yards in total offense.

The Gateway is a very good football league," he said. "What I've learned is that it is a defensive league. Offenses that play in this league have to be patient.

Unfortunately, Watson's rushing is losing Bonner, as well as several other big contributors to SIUC's offensive success.

In 1997, the Salukis will be without senior tight end Darion Jones and Dave Smith, who combined for a total of 27 receptions this season.

Jones, who is destined for the NFL, said Saturday's win gives next year's squad a solid foundation to build upon.

Jones, who will also make an appearance in the annual Senior Bowl, said he is confident leaving SIUC.

"I think this will be a good offensive season," he said.

"They have got a lot of good returning, and I'll be watching for them in the newspapers."

Watson also will be without offensive lineman Steve Jones in 1997, who Watson considers "one of the best in the league" and a school record selection.

Defensively, SIUC is losing productive defensive setter in defensive back C.J. McCord, who led the Salukis in tackles this season with 116, which was also good enough for the No. 1 spot in the Gateway Conference.

"If I ended the way I wanted it to," McCord said. "We ended on a good note, and I think that will carry over to next year. We really needed that win to carry us into the future."
