Amtrak to require reserved seating

ALL ABOARD:
Officials say new policy will eliminate standing room only situations.

JASON FREUND
DAILY EGYPTIAN REPORTER

Travelers in the habit of purchasing Amtrak tickets on the spot could find themselves in line with other passengers to purchase their tickets, after Amtrak officials Tuesday stated the Illini Route will become all-reserved seating beginning Feb. 26.

Marc Magliari, Amtrak media relations director, said Amtrak has been considering the change for several months, as part of semi-annual schedule changes.

"This will serve to eliminate the standard condition that exists on these trains," he said. "It will ensure the trains are sized properly to ensure they aren't running short or have surplus cars." Magliari said the change will allow for better prediction of ridership.

"This is a real-time way to predict ridership," he said. Carbonade City Manager Jeff Dobhey said he thinks the change is a good idea.

"It will allow them to operate better and especially if they see there is a large number of reservations, they can add a car to accommodate," he said. Dobhey said the unreserved seats can deter riders.

"(Unreserved seating) leads to standing-room only, with people standing in the aisles, which turns people off," he said. "There are certain times when people avoid Amtrak, such as northbound on Friday afternoon and southbound on Sunday afternoon, because you can't be assured a seat.

"This will ensure people a seat and allow Amtrak to serve people better. I think it will help their overall performance."

Amtrak also had been considering changing the leave time of the route. On Oct. 6, Amtrak announced the 4:45 p.m. departure time would be retained on the Illini Route, which runs, from Carbonade to Chicago. The departure time will be examined at a later date.

Six routes, servicing Chicago, St. Louis, Carbonade and Quincy, along with many stops along those routes, will be affected by the change in the reservation policy.

Magliari said people still will be able to purchase tickets on the train if there is space available.

Steve Dunker, Undergraduate Student Government city affairs vice-president, said the change will benefit people throughout the route, not just in Carbonade.

"It will be very beneficial because it will guarantee enough room for everybody," he said. "Sometimes when they get full, they have to blow by stops in order to get people standing there on the platform plowed off." Dunker said the change will allow Amtrak to become more efficient and end peak ridership periods.

"Basically, they will find out what they've got to work with and learn to work with that, because if they don't get any capital funding, they will have to become self-supporting," he said. "Hopefully, through this they will learn to be self-supportive and make them more efficient."

Deadline for new policy

HAZARDOUS ROAD:
State plans no changes at sight of recent fatal accident.

KELLY SMITH
DAILY EGYPTIAN REPORTER

The regularity of near collisions at the intersection of U.S. Route 51 and Presley Tour Road prompts Major L. Erdd to avoid the intersection altogether.

The Oct. 7 deaths of Amanda Dalton, 17, of Makanda, and Jennifer Rieger, 16, of Carbonade, have provided ammunition for some residents to voice their concerns about the hazardous nature of the intersection.

Dolton and Rieger died when the vehicle of Joseph Higgin, 17, of Makanda, who survived the accident, was broadsided as it crossed the path of a northbound Amtrak trailer truck traveling north on U.S. 51.

"I have stopped using 51 because of that intersection," Erdd said. "I use old 51 instead. Even though there are more curves, there is less speeding."

The change of the intersection is not a result of low visibility, but rather from careless driving, area residents say. It's said it is also an unconnected to see cars passing each other in the middle of the intersection or in the path of drivers approaching from another close call.

The Illinois Department of Transportation has no plans at this time to make any changes to the intersection.

"If it's a high-accident location then we would look into it," said Bill Stout, district operations engineer for IDOT. "This intersection is not one of the state's worst intersections.

So far this year, there have been three accidents at the intersection in 1997, causing two fatalities. In 1996, no accidents were recorded; in 1995, one accident resulted in minor injuries; and in 1994, one accident caused incapacitating injuries.

A comparison is made by IDOT at the end of each year to determine which intersections in the district have the most collisions; Those with the highest number are focused on for possible improvements. Stout said, "Even though there have been

IN MEMORY:
A cross rests on an electric pole near the corner of U.S. Route 51 and Presley Tour Road (Makanda Road) in memory of the Oct. 7 death of Amanda Dalton, 17, of Makanda, Dolton and Jennifer Rieger, 16, of Carbonade, died as a result of a car accident at the intersection.

Steve Dunker, Undergraduate Student Government city affairs vice-president, said the change will benefit people throughout the route, not just in Carbonade.

"It will be very beneficial because it will guarantee enough room for everyone," he said. "Sometimes when they get full, they have to blow by stops in order to get people standing there on the platform plowed off." Dunker said the change will allow Amtrak to become more efficient and end peak ridership periods.

"Basically, they will find out what they've got to work with and learn to work with that, because if they don't get any capital funding, they will have to become self-supporting," he said. "Hopefully, through this they will learn to be self-supportive and make them more efficient."

Enrollment subject to public whimsy

FOLLOWING TRENDS:
Enrollment can rise or fall due to popularity of degree programs.

TRAVIS DENNEAL
DAILY EGYPTIAN REPORTER

(Edigner's note: This is part of a four-part series analyzing recruitment and retention policies of the eight SIUC colleges in light of the University's overall increase in enrollment. Previous stories can be found online at www.dailyEgyptian.com.)

The SIUC dean says recruitment and retention efforts in their colleges will not be changed drastically because enrollment in their schools reflects student interest rather than current recruitment and retention initiatives.

The College of Science and College of Business and Administration both had moderate enrollment increases over the semester.

College of Business and Administration enrollment dropped from 1,174 to 1,154, a decrease of 2%. College of Science and Administration enrollment increased from 2,246 to 2,482, an increase of 11%.

Jack Parker, dean of the College of Science, said that although his college is facing an enrollment decline, sometimes there is low student interest in particular careers.

"We're really nothing you can do if kids out there aren't interested," Parker said. "Some years there is a huge interest in certain careers, and some years there is no interest."

MARRIED TO NEWS: Josephine Cabri and Jackie Koszczuk returned to SIUC this week for the School of Journalism’s 50th anniversary. Both were former editors of the Daily Egyptian. Cabri is the night metro editor for the Washington Post, and Koszczuk is the editor for the Congressional Quarterly.

ROMANCE: Washington journalists, SIUC alumni find passion for work, each other.

TRACY TAYLOR
DAILY EAGLEN BNPIRER REPORTER

Jackie Koszczuk and Joseph Sobczyk, who were married, were also professors. They both have been associated with the Daily Egyptian throughout thier careers. Their work on the newspaper was instrumental in thier success m their careers. They both have been editors at the newspaper and have held various positions, including those of managing editor and publisher.

The Daily Egyptian is a student-run newspaper at Southern Illinois University at Carbondale. It is published weekly and covers news, sports, and events on campus. The newspaper is known for its investigative reporting and its dedication to providing a platform for student voices.

USG SEeks SIUC Support for next Pig Out

JASON FREUND
DAILY EAGLENN REPORTER

Undergraduate Student Government representatives are currently discussing the possibility of a joint event between the two universities. The goal is to increase student engagement and foster a sense of community. The event could involve a variety of activities, such as a food competition, a live band, or a guest speaker.
Individual deserves choice of alternatives

Bret Simon
Guest Column

Choice of alternatives is a personal responsibility to be knowledgeable about what services are available. As a health consumer, it is the latest politically correct bandwagon on which all of us should jump. Gay History Month gives our society the chance to take off our collective blinders and recognize the history that we have neglected. Gay History Month lets society acknowledge the gay community on an everyday basis so as not to repeat the mistakes that history shamefully has set before us.

Standards, however noble, also serve to reduce the diversity of practice. Unlike genuine public health issues (e.g., water quality, sanitation), massage therapy can hardly be construed as an issue that affects the public good. The notion of "public health" has a relatively high degree of intrusiveness or potential exposure. There is nothing insensitive about massage therapy — whether or not you want it is a matter of personal choice. Likewise, who you choose — and what qualifications you consider important — also should be a matter of personal choice. We have all been to doctors who had the right credentials but were poor practitioners.

Implicit in the argument that government regulations are needed to regulate alternative medical practices is the message that we as citizens are not knowledgeable enough to make those decisions ourselves (aside from the obvious argument that those seeking massage therapy are probably more educated and health conscious than the average health consumer). As a health consumer, it is a personal responsibility to be knowledgeable about what services we seek and pay for. If massage therapists differ in their qualities, then these should be regarded as reasons for determining which therapy is best for you. It is the responsibility of the consumer to make that determination, and then make a treatment decision based on criteria that we deem important.

Government regulation of alternative medicine practices is not without precedent. Nearly always, as it was in this case, the decision to rewrite the law was in response to the concern of a therapist for the safety of clients — other therapist's clients. The unintended result of this ordinance is that competition is reduced and power is consolidated. This pattern has been repeated throughout medical history. Medical doctors opposed the practice of osteopathy early in its history — as soon as the profession became strong enough to represent a threat to the doctors' status. Currently, one of the chief obstacles to the increased utilization of nurse-midwives is the medical profession's concern for loss of patients and income. The institution of standards of practice may be presented as a way of assuring quality, but rarely are the motives purely altruistic.

Standards, however noble, also serve to reduce the diversity of practice. But health and healing are very individual processes. Given the same circumstances and exposure to the same pathogens, some of us may get sick and others may not. And among those who get sick, the course of illness will not be the same. Likewise, a specific treatment may be beneficial to one person and make no difference to another. That is simply the nature of health and healing. As such, the greater the variety of treatment options available, the more likely one is to find a practitioner that reflects the values and beliefs of an individual client.

In a desire to protect, the City Council may be legislating out of existence treatment options and practices that have genuine healing potential. Of the spectrum of alternative health practices that have blossomed in the last decade, massage therapy is probably the most well-known and accepted. I am skeptical of the value of many of the others. However, the individuals who have the full range of alternatives is a principle that should be supported.

So, women should learn techniques for fighting breast cancer.

On guard

Women should learn techniques for fighting breast cancer

NATIONAL BREAST CANCER AWARENESS Month is an excellent time to remind women of the need to be on guard against a killer estimated to end the lives of 43,900 women this year. The disease is the second leading cause of death for women aged 40 to 55, but they are not the only ones who need to take precautions.

College-aged women also are at risk for developing breast cancer. According to the National Alliance of Breast Cancer, one out of every nine women will develop breast cancer in her lifetime. It is important for women, especially those in college, to understand the need for check-ups and self-examination. By learning the proper techniques, women can detect cancer early enough to fight it successfully. Alliance studies show that the five-year survival rate for early-stage cancer treatment is more than 97 percent.

Although it is at the forefront of attention this month, women must be conscious of the dangers year-round, because cancer does not appear only once a month.

Women on campus should take advantage of the display in the Student Health Center in the Student Center this month to learn more. Students can go to the Student Health Services with questions and concerns, and the Memorial Hospital of Carbondale is a mammography center for women who discover lumps.

Every 12 minutes, four women will find out they have breast cancer, and one woman will die from it. Perhaps with increased knowledge and awareness, these numbers can be diminished in the future.

Acknowledgment

Gay History Month lets society recognize what history ignored

ACKNOWLEDGING GAY HISTORY MONTH is not just the latest politically correct bandwagon on which all of us should jump. Gay History Month gives our society the chance to take off our collective blinders and rightfully acknowledge that these were too ignorant to live with and learn from before.

Many in our society may question the use of October as Gay History Month to celebrate sexual diversity. The glaring omission of gay communities throughout history means that this recent embrace of alternative living rightfully has earned a niche in our free-thinking society. But in society's rush to "officially" sanction the gay community's lifestyle in the same manner as it has tried to right the wrongs done to other minorities (Black History Month, Women's History Month, etc.), we need to use caution.

Recognizing the colorful history of the gay community is not relegated only to unearthing the sexual orientations of past celebrities, authors, artists or politicians. Celebrating Gay History Month also means celebrating the spirit and the lives of the gays, lesbians and bisexuals with whom we commonly interact. It means helping to protect their civil rights as if they were our own. It means helping them to "come out of the closet" in a real and unforced manner.

HISTORY HAS NEGLECTED TO DO THESE things. Now we have the chance to set things right. Our society needs to do more than gift gays, lesbians and bisexuals with a designated month on the calendar. We need to acknowledge the gay community on an everyday basis so as not to repeat the mistakes that history shamefully has set before us.

Our Word

The Daily Egyptian, the student-run newspaper of SIUC, is committed to bringing a mixed source of news, information, commentary and public discourse, while helping readers understand the issues affecting their lives.

"Our Word" represents the consensus of the Daily Egyptian Editorial Board.
GUATEMALA: Prudence M. Rice, professor of anthropology and chairwoman of the Anthropology Department, explains about her research in northern Guatemala, which in part led to her receiving the 1997 Outstanding Scholar of the Year Award.

Professor receives award

CULTURE:
Anthropologist studied Mayans for 26 years.

STUDYING the culture of an ancient Mayan civilization in Northern Guatemala for 26 years contributed to Prudence M. Rice receiving the 1997 Outstanding Scholar of the Year Award.

When Rice arrived at SIUC in 1971 from the University of Florida, she was dabbling in archaeological investigations in Peru and Guatemala. Rice's significant findings in the North Guatemalan area of Peten gained some international recognition.

"I have been studying the Itzan Mayans," she said. "They were the Mayans who resisted Spanish subjugation (around the 15th century) by holding out in the dense jungles around Lake Peten Itza."

John Muller, associate dean of personnel budget and research of the College of Liberal Arts, was integral in the hiring of Rice in 1991. Muller said Rice is a clear example of someone who deserves the award.

Rice's work in ceramic pottery has become a point of reference for many anthropologists who work with ceramics. She became fascinated with pottery when she was working on her master's degree and discovered some pottery and did not know how to analyze it.

Muller said Rice's 559-page book titled "Pottery Analysis, A Sourcebook," is on every good anthropologist's shelf. Rice's involvement in academics includes involvement in numerous archaeological areas. Rice was president of the Society for American Archaeology for three years and was appointed by President Bill Clinton to the Citizenship Advisory Committee.

"I find myself overwhelmed with everything," Rice said. "My teaching duties are enormous, I have research obligations as well as chairing the department."

Richard Lanigan Jr., professor of speech communication, was a member of the committee that selected Rice for the award. Lanigan received the award in 1995.

"Her involvement at SIU and her status as a role model for graduate students was considered when she was selected," Lanigan said.

Rice's work at SIU and her status as a role model for graduate students was considered when she was selected. Rice's involvement in academics includes involvement in numerous archaeological areas. Rice has been nominated and possibly selected before but this year she declined the nomination so others could be recognized at the time.

"She is already visible," he said. "People outside of the University don't know who she is." Muller said Rice should continue her work in Peru and Guatemala as well as chairing the department and spending time with her students.

"I owe a lot of where I'm today to the people who helped me down the road," she said. "I will continue to do what I have been doing."
ROAD
continued from page 1
relatively few accidents in the past five years at the intersections of U.S. 51 and Presley Voris Road, stories of near collisions at this intersection are abundant.

“...if you poll people who travel 51 regularly, they’ll insist in the fact that there’s a lot of near misses,” Robert Spelzman, SIUC associate professor in journalism said...

“There are enough near crashes to suggest that some people exercise poor judgment.”

Stop signs also are frequently ignored by those traveling on Presley Towers Road, which is also referred to as Makanda Road, Tracy Dwyer said.

“It’s hard for some to judge the distance of oncoming traffic and some just don’t stop at all,” Dwyer, a Doppler resident, said.

“...I just can’t believe that someone would take a chance like that...”

PANEL
continued from page 3
said, “We have become a bar of soap, and we have to determine how to make us appealing.”

“It’s become a matter of what is it we put around our advertising.”

Mike Lawrence, assistant director of the Public Policy Institute and a panel member, said he was uncertain of the future of newspapers.

“I don’t know what form newspapers will end up in,” he said. “But what I really care about most is that good newspaper journalism survives.”

Jackie Koscruck, assigning editor for the Congressional Quarterly, said the Internet could play a dramatically increased role in the newspaper business.

“Unlike the competition that has developed with television,” Koscruck said, “we have to open our arms to the online world and make it our own.

“We have to start doing old-fashioned reporting online and real-time rather than delayed time.”

Lorraine Kee, a reporter for the St. Louis Post Dispatch, said regardless of the form newspapers take, reporters and editors should strive to know their audience.

Kee also said there are not enough minorities in the newsroom.

“Our newspapers do not look like the people we cover,” she said.

“We don’t know what relevant to that audience and we lose credibility with them.”

“...we just are not very in touch with those people...”

FESTIVAL
continued from page 3
contest, live music, children’s events and a beer tent.

Cahli, a sophomore in administration of justice from Lake Bluff and USG senator from Brush Towers, said although the University did not sponsor the event, it should consider future involvement.

“I understand why they didn’t want to (get involved), because if something bad happened they would get a bad reputation,” she said. “But since nothing bad happened, they have no reason not to help out next year.”

Cahli said the positive student involvement at this year’s festival should show that students and the city can work together.

So Much Better Than Soap, You’ll Be Hooked.

Introducing
Gillette Series
Body Wash for Men

There’s a brand new feeling of clean that’s in town. Gillette’s new Body Wash. Hang it up. Squeeze some out. No matter how many times you shower, your skin won’t get all dried out. So why reach for a bar when you can get hooked on something so refreshing. New Gillette Series Body Wash.

Winter brings more than cold weather; flu season almost here

PREVENTION: Ways to avoid virus include getting flu shot, keeping hands washed.

J. Mccomis, Reporter

Fever, muscle aches, chills, sore throat and coughs many times means the flu, so local health agencies are scheduling flu shots for SIUC students whose immune systems are not strong enough to fight the virus.

Chris Labyk, coordinator for wellness programing at Student Health Services, said flu season can begin as early as late November and is at its worst between mid-January and mid-February.

Flu shots can be obtained at the Student Health Services, the Jackson County Health Department on Route 13 near Murphysboro and Quality of Life Services in Marion.

"Unless you're elderly or you have a weak immune system you shouldn't need a flu shot," Labyk said. "If you have a strong respiratory system, your body can easily fight it off.

The flu shot contains a modified version of the flu. The flu virus is placed in the shot to build up the immune system, which develops antibodies to fight the virus if and when it comes, Labyk said.

The reason the flu season is during winter months is because more people are inside closed quarters, which allows the virus to pass more easily.

Gail Barton, registered nurse and clinical preceptor for Quality of Life Services in Marion, said the flu virus can be passed as easy as handling the same objects with someone who has the virus. "The flu is a virus passed in air and on objects," Barton said. "If you chew on your pen that was handled by someone who has the flu, you can get the flu.

Labyk urges students to get the shot and to build up their immune system before the virus hits this area. "If you've been exposed to the virus already, it's too late," Labyk said.

After a person is infected with the flu virus, he should get a lot of bed rest and fluids and stay at home. Labyk said preventative measure exist if students wish to fight the virus. "The best thing is a good nutrition and a well-balanced diet," Labyk said. "Stay away from second-hand smoke as well because it lowers your resistance of fighting off viruses.

Barton said taking the proper precautions can help people prevent the flu virus from attacking their systems. "Most important, the best line of defense is hand washing," Barton said. "After going to the bathroom and before eating."

Flu shots

The Jackson County Health Department
415 Health Department Road, Murphysboro
• Flu shots from 9 a.m. to 3 p.m. on Tuesdays and 9 a.m. to 5 p.m. on Thursdays through October, Flu shot from noon to 3:30 p.m. on Mondays and Wednesdays and noon to 5 p.m. on Thursdays through November.

Parents voice concerns

NON-TRADITIONAL: Students with children find out their problems not unique, find help.

Karen Butler
DAILY EGYPTIAN REPORTER

Daren Cooner is trying to perfect his juggling act of keeping his grades high, paying bills and most importantly, spending time and curating for Branton, his 3-year-old son. Cooner is one of the many non-traditional students with children attending SIUC who are searching for ways to manage time and make financial ends meet.

On Wednesday, in honor of Non-Traditional Student Week, the Non-Traditional Student Services and Student Development sponsored a brown bag lunch with a meeting topic titled "Single-Parents: Balancing Multiple Roles." The one-hour meeting allowed non-traditional students with children an opportunity to voice their collective concerns.

S hints DeAngelo, assistant program director of Non-Traditional Student Services, said the goals of Non-traditional Student week and the brown bag lunches are to find out what non-traditional students are going through.

"We are trying to let non-traditional students know that they are not alone," she said, "We are here to help them achieve their goals in continuing their education."

The small group met to discuss the different roles that parents have to play to be successful.

Mary Stokar Weissbe, group leader for Women's Services, helped to motivate the discussion and gave out suggestions to help those parents who are struggling.

Cooner openly expressed his concerns about getting to know people who are experiencing the same problems that he has.

"Everyone finds it hard to get support at times," Weissbe said, to reassure the group. "There are groups who provide support for all these situations."

The group commented on not having enough time to be by themselves.

Mary Vieten, a group and outreach assistant for Women's Services, made a suggestion about making personal time.

"Put your kids to bed earlier," she said. "Then for those few hours you will have complete bliss; and it makes a really good studying time."

Weissbe said the best time management tool is a planner.

"You need to take time and look at what you are doing," she said. "It can be very helpful to put it down in black and white."

The group also shared information on financial aid that is available - that is not openly talked about, places to get a job that will have flexible hours, flexible class schedules and more affordable places to live.

"Everyone could save so much more money if they knew what you needed to ask for," Vieten said.

This year's Non-Traditional Student Week is one of the ways Student Development tries to add to the programs that are already available to non-traditional students.

"Everyone's story is different," DeAngelo said. "We need them moments (moments) to tell us what they need so we can provide more service."

MVC. Sitting in 5-4 for fourth place, SIUC's hopes of winning the school's first MVC title are starting to fade. The Panthers were led by a balanced offensive attack, which included four players with double-digit kills. Senior outside hitter Lindsey Celba's 12 kills paced EUU.

But the Salukis' problem tonight went beyond their offensive side of the net. To go along with 31 hitting errors, SIUC committed a .125 hitting percentage, compared to EUU's .331 average.

Junior outside hitter Marla Mooreland said there was no explanation for the team's play. "We led the Panthers second seven of the next eight points to take a 13-9 advantage. EUU took that momentum into game two as the Panthers jumped to a 7-1 lead before a Lauren Flie killer ended the run. But SIUC committed a service error on the next possession, and the Panthers took advantage, making the score 15-10 in their favor. EUU fought to get back into the match, but the Panthers scored four of the next five points to take a 3-9 lead in game three. Junior outside hitter Marla Mooreland said there was no explanation for the team's play. "We have to figure out our strategy on the court and be more aggressive. If we don't play better, we won't be a contender in the MVC," Mooreland said.

Volleyball
The addition of Messier's grit, leadership and talent should be a huge boost for the Canucks' hopes of improving their non-conference, non-playoff conference play of a year ago. But their 1-2-1 start, which includes a 6-3 loss to Messier's former team, the previously winless Rangers, underscore the fact that there is no quick fix in professional hockey. The Canucks, as a team, are scrambling to find an identity, even after spending all of those millions to sign Messier. "We've talked about (the chemistry) all year," coach Mike Keenan said. "But the action is going to be different once the season opens." The Canucks are looking to improve their non-conference, non-playoff percentage, compared to EUU's .331 average.

Junior outside hitter Marla Mooreland said there was no explanation for the team's play. "We have to figure out our strategy on the court and be more aggressive. If we don't play better, we won't be a contender in the MVC," Mooreland said.

Canucks need time to adjust to new center Messier

Valley Conference tournament in St. Louis, losing two-straight set matches. Junior Jennifer Robison and Maria Villarreal also were 0-2. until the past weekend, Auld said. The SIUC women’s tennis coach Judy Auld said the players cannot

playing the best tennis I have ever played.”

Auld said she and Crane need to take charge early in the matches. “Instead of playing long games...”

Judy Auld said her main concern is the team’s improvement, not wins and losses. She said the area that

needs the most improvement is the doubles teams. “They need to play more aggressively,” Auld said. “You need to go for shots in certain situations and get the doubles game going. In doubles you have to play up to the net.”

Johnson and junior Mardee Crane both played well last week and finishing in the semifinals, but Johnson and I, you have to put that behind you.”

Headded the No. 3 spot, Johnson said. “But I am and adjustments to the No. 3 spot. Berksoy were 3-1 in the Saluki

“Instead of playing long games, I think we need to close out the game,” Johnson said. “We need to win the game instead of giving the other team the opportunity to win.”

Teams are allowed to protect 15 players off their 40-man roster for the first three rounds. Players with three years or less professional experience are exempt, so the Yankees don’t have to worry about losing prospects such as pitchers Eric Milton and Luis DeLoSantos and shortstop Christian Gourmon. Pitcher David Cone, (no-trade clause); first baseman Tino Martinez, (limited no-trade clause) and right fielder Paul O’Neill, must be protected. O’Neill has veto power as a 10-and-5 player (10 or more years in the majors, the past five or more with one team). Also certain to be protected: pitchers Andy Pettitte, Mariano Rivera, David Wells, Ramiro Mendoza and Hideki Irabu.

Spikers lose starter to knee injury

DISABLED LIST: Galvin falls during match against Eastern.

The SIUC volleyball team's inability to cope with the loss of one of its starters resulted in one of the poorest performances of the season for the Salukis on Tuesday night.

Junior middle blocker Manische Galvin went down with a knee injury during the first set of SIUC's match against Eastern Illinois University at Davies Gymnasium.

Galvin missed the entire match, and the Panthers improved their record to 12-10 overall by defeating the Salukis in four games, 15-9, 15-14, 11-15, 15-9. Galvin's condition was scheduled to be re-evaluated Wednesday.

SIUC coach Sonya Locke said Galvin's injury was no excuse for the poor showing.

"I'm not saying that (Galvin) was not a big loss; but we seemed out of sync all around," Locke said. "Obviously, we missed her hitting, but if we were doing our job in practices, it wouldn't have been a panic situation."

Without Galvin, the Michigan Valley Conference's block leader with 1.38 per game, the Salukis were outbacked by the Panthers 10-5.

After winning four straight, the Salukis have lost eight of the last 10 matches, dropping their record to 8-9 overall and 5-3 in the

Netters ready for rematch in Louisville

INVITATIONAL: Women's tennis team facing nine schools at this weekend's tournament.

TRAVIS AHN
DAILY EDITION REPORTER

The Louisville Invitational this weekend in Louisville, Ky., will be the second in the season-long prize fight for one of the SIUC women's top tennis players.

For senior Ashley Card, the meet will be a chance to play University of Illinois' Manisha Patel, who beat Card at the Saluki Open last weekend.

Card has a good friend who plays on the Louisville team, and she has a good idea of the team's strategy.

"But the University of Louisville is the only team in the tournament field the Salukis have never faced," Card said.

The Salukis, who have a big rivalry with that team," Card said. "I just don't look at that," Card said. "I just look at my opponents and concentrate on improving week to week.

Card will again be at the No. 1 spot for the Salukis. Card said she is adjusting to the spot but does not focus on the fact that she challenges the top player at every school SIUC plays.

"I don't look at that," Card said. "I just look at my opponents and concentrate on improving week to week.

Card struggled at last weekend's Missouri Valley Conference's block leader with 1.38 per game, the Salukis were outbacked by the Panthers 10-5.

After winning four straight, the Salukis have lost eight of the last 10 matches, dropping their record to 8-9 overall and 5-3 in the

Bad final rounds hurting men's golfers

SLOW FINISH: Salukis take 14th out of 18 teams at Bradley University Fall Classic.

JIM KORTH
DE SPORTS EDITOR

The Salukis finished 14th out of 18 teams at Bradley University Fall Classic.

The SIUC men's golf coach Larry Newton left Pekin Tuesday morning in the first of four flights of SIUC golfers.

The Salukis finished 14th out of 18 teams at Bradley University Fall Classic. The finish marked the second week in a row that a poor final round prevented SIUC from a stronger finish.

Newton noted that poor weather conditions played a role in the disappointing finish, but he does not want his team to use the conditions as an excuse for its play.

"We could have done better," Newton said. "We didn't get a chance to play in practice round at Hickory Grove Golf Course. It was windy, rainy and cold, but all of the other teams had to play in those conditions as well.

"SIUC opened the tournament with rounds of 318 and 313 Monday at the par-71 Mt. Hawley Country Club. But Tuesday's round was not as good; the team finished at 327, 5 over par, for the tournament.

SIUC lost 15-11 to Bradley Wednesday, but Newton said the team has met its goals for the tournament.

"The team's best finish was 14th out of 18 teams," Newton said. "The team's best finish was 14th out of 18 teams," Newton said. "I'm pleased with the progress we've made this season."
