Student shot in robbery attempt
Victim in stable condition at Memorial Hospital of Carbondale

A 19-year-old SIUC student was shot Monday in an apparent robbery attempt in the Bel-Aire Mobile Home Park in Carbondale.

Dontai Hubble, an undecided freshman from Mound City, was shot in the leg at his residence, 900 E. Park St. #11, when three men entered demanding money from the victim.

Another man, Joshua Holton, 19, an SIUC junior in music, was struck in the head with a small caliber gun by the assailant. Carbondale police said.

Hubble was admitted to Memorial Hospital of Carbondale where he is being held overnight for observation and is listed in stable condition.

The shooter is described as a black male between 13 and 14 years old, 5 feet 6 inches tall and 110 pounds. The second suspect is described as a black male between 20 and 25 years old, 6 feet 1 inch tall and 150 pounds. The third suspect is described as a black male between 17 and 20 years old, 5 feet 8 inches tall and between 200 and 240 pounds.

The victim surrendered a small amount of cash to the assailants before they fled on foot.

Carbondale police are currently investigating the incident and ask anyone with information to call 549-2677.

City council to consider danger of beer bottles

The40 lbs perched posed when bare feet meet glass beer bottles will no longer go ignored by city officials.

Tonight’s city council meeting will likely yield a decision to send cautionary letters to Boddy’s Sidetrack and Pinch Penny Liquors urging them to take preventive safety measures, which have not been specified.

Every spring, thousands of SIUC students and Carbondale residents flock to any of those three outdoor establishments to drink beer in the open night air. The proximity to the beer gardens has become as much a sign of the changing seasons as budding trees and leaping gardens has become as much a sign of the world.

It is not uncommon to see bottles tossed haphazardly on the ground, clinging carelessly and alarming close to feet protected only by flimsy open-toed sandals.

The 12-foot tall Delyte Morris statue at Old Main stands sheltered from Monday’s early-morning rain by a wooden crate erected by an unknown graduate student who was upset by the artistic value of the piece.

All boxed up and nowhere to go

Delyte Morris’s statue crated to make an art statement

Jennifer Wig

Former SIU President Delyte Morris’ bronze image, standing tall at Old Main Mall, was crated Monday by an unidentified art student to prove a point — the statue is missing a pair of feet.

The wooden crate, intended to hold large objects, featured large cardboard boxes that read, “Return to Sender” and “Incomplete Shipment.” In smaller print, it read, “Warning: contents may be harmful to the eyes. In case of eye contact, consult fine art manual.”

A graduate student in painting, who wished not to be identified, said she knows who did it, and he did it to mock the statue. She supported his actions, calling them “relemt.”

Another art student said the exclusion of feet makes the statue look “horrendous.”

The way it is presented is pretty much a disgrace to Morris,” said a graduate student in fine arts, who also asked to remain anonymous. “Someone with aesthetic views can see that it’s incomplete.”

The crate was removed by SIUC Physical Plant shortly after it was discovered on Monday morning.

The statue, about 12 feet tall with the base, was sculpted in 1970 by Freda Brilliant amid controversy. She began sculpting it unknowingly to the University. Morris’ detractors were angry that he would spend money on a statue of himself. Brilliant sent the statue to Berlin to be housed, but because of a lack of funding, the statue remained there for more than a decade.

The SIU Foundation raised more than $100,000 from private donations to bring the statue to SIUC in 1983. It was moved from the location at Morris Library to its present location in 1987.

In the statue’s depiction, Morris wears a graduation gown and a medall with a picture of an SIUC building. The statue, presented by the SIU Foundation, bears a plate explaining that Morris was the SIU president from 1948 to 1970.

Interim Chancellor John Jackson said the prank is just that and it is not the first time practical jokes have occurred on campus. The statue has also been seen holding beer cans during the summer Sunset Concerts.

Jackson added that an old saying that used to circulate among South Alton Bagdade was often the victim of prank and kidnapping. “I don’t take it too seriously,” Jackson said.

“I think this is a joke that needs to be taken seriously,” he said. “But as long as there’s no damage done to the statue it seems like something not to get too upset about.”

The miseducation of the black male

Carbondale community examines the problems in the education of black males

Jennifer Wig

Leon McWilliams is proud to be in college, but he remembers a time when some of his high school peers would look down on him for getting good grades.

He and others agree that there is no one simple issue that can be pointed to, but that it’s...

### OFFICE OF DISTANCE EDUCATION
Individualized Learning Program and On-Line Courses

All courses carry full SIUC residential credit applicable toward a degree. IILP students can register throughout the semester. On-line courses are registered on a semester basis. For IILP students, use a study guide, or text book, and a laptop. The staff in the continuing education office can help you select courses and create a study plan.  All courses are offered in the fall and spring semesters. IILP students need their own study space and a computer with an internet connection. They are expected to keep up with assignments and communicate with the instructor via email or phone. All courses are self-paced and can be completed online. IILP students need their own study space and a computer with an internet connection. They are expected to keep up with assignments and communicate with the instructor via email or phone. Alcohol awareness on wheels

Andrea Donaldson

Kimberly Wood drank a few shots and mixed drinks, pouring her blood alcohol content to .01 above the legal limit, and she didn’t feel a thing.

"I'm a native of English education from Joliet, wasn’t afforded by the alcohol because it wasn’t real. Wood was part of the Blood Alcohol Educator program at Trueblood Hall Monday. The program was brought to SIUC by the Wellness Center as part of Alcohol Awareness Week.

The program, sponsored by The Carbondale Art Council, took place at a computer in the Wellness Center featuring a computer simulation of the effects of alcohol on the body.

"I hope they have a designated driver!" said Greg Gaus, field director of the program, the simulated educational program around Texas for the first few months before taking the program national.

"It was so well received we decided to take it on a national tour," the speaker said.

The alcohol was being visited by the state fair, police officers and college faculty and staff.

Carol Sommers, director of Midwest as part of Alcohol Awareness on college campuses, is a resource to educate college students as well as everyone else," Gaus said.

To begin the program a person must enter their feet into the computer and choose among many alcohol drinks.

"The computer will tell the person how long it will take to get the alcohol out of his/her system and the physical effects of the drinks," Gaus said.

Kari Stimson, a graduate assistant with Student Health Programs for the Health Center, said the Blood Alcohol Educator is similar to the Alcohol 101 CD-ROM offered at the Wellness Center and the Health Assessment Center in the Student Center.

"It's a good way to get people involved and spread alcohol awareness," Stimson said.

Crystal Bishop travels with the program to show how it works. She said they get a good showing of people everywhere they go. They have given away more than 10,000 disks in the past year.

"The program was started last October and broken in half, set on a gold-bol for the process of healing." Mercedes Wyatt, a senior in art and design and construction of the masks.

"There's something about the masks that are used to reveal and conceal," Wyatt said. "sec no evil, hear no evil, speak no evil"

Historically, masks have been used in different cultures for many purposes. Sommers said the masks in the exhibit are used to reveal and conceal, allowing women to share their story with the world without revealing their name or face.

"They're tapping into a core of healing energy and regeneration," Sommers said. "The masks are a symbol for the process of healing."

Despite the similarities in many of the women's stories, each mask is crafted differently, exhibiting an image of the woman who created it.

One painted mask is painted gold and broken in half, set on a gold-colored mirror. Another is adorned in pastel-colored glass that covers the eyes, ears and mouth, representing the woman's story coming to life, hour after hour, speak to each other.

A mask has a story about a "party girl" whose mask sports a hat full of flowers and a colorful smile.

Meredith Wyant, a senior in art and design from Texas, said the masks "are a way to represent characters of spiritual or paranormal existence. The Dogon tribe in Africa is well known for its maskedused in funerary and agricultural rituals. Other West African tribes use masks for rites of passage, such as passing from a child to an adolescent."

The American Medical Association reports that sexual assault was the most rapidly growing violent crime in America. More than 700,000 women are sexually assaulted each year. It is estimated that more than 25 percent of college-aged women have been victims of sexual violence and attempted sexual assault. It is estimated that over 50 percent of sexual assaults are reported.

Jane Maxwell, group and outreach director for Women's Services, said the masks are powerful in their elegance, painful beauty.

"We're never talking anything like it. I founded the movement," Maxwell said. "It looked like an attractive image, but when I started reading the stories, I felt the silence and the pain of the stories become overwhelming.

"There's something about the silence."

Masking the many faces of pain

Display exhibits tales of sexual assault for Women's Safety Week

Jennifer Wog

Two masks sit in a glass window at University Museum, silently conveying tales of sexual assault.

The masks, on display with statements and poems telling each woman's story, are part of Women's Safety Week, sponsored by Women's Services and the Women's Center.

Carol Sommers, director of Women's Services, organized the display as part of the Women's Center's commitment to the theme of the safety week groups in the area and supplying materials for the masks.

"I'm especially proud of the professional quality of the masks," she said. "There's so much of the creative energy that is part of these women's healing process that I'm just pleased to be putting it together."

The exhibit will be on display at University Museum today from 1 to 3 p.m., to honor the women who have created the masks and to promote women's safety.

Sommers said the masks in the exhibit are used to reveal and conceal, allowing women to share their story from Greece, Japan and other countries.

Sarah Roberts

SIUC's proposed $40-million business research park took a step forward last week but completion could still be years away.

A $500,000 grant, which was obtained from Illinois Route Safety Funds and approved at last week's Board of Trustees meeting, will cover the first of four phases designed to improve the research park located on the Dunn-Richmond Economic and Regional Development Center on West Pleasant Hill Road.

Phase One will include the design and construction of infrastructure improvements. It will encompass four years and require 300 to 400 square feet of water, sewer, electric and telecommunications utilities, as well as road and parking lot construction.

Jim Chase, chancellor John Jackson was pleased with the funding approval and cited the research park as part of an initiative to promote research.

"This is just a start in the right direction," she said, "and at least it's a start," Jackson said.

The Phase One development will complement the existing GTE switching center, which was implemented in June and provides fiber-optic service to the park and to the south side of the city.

Ray Lentz, director of the Economic and Regional Development Center, said the first stages of improvement bode well for the future of the park and the University.

"The park will benefit faculty and students by allowing their research to be converted into businesses," Lentz said.

The remaining three phases of the development plan have not been discussed and completion is expected to take another six years. When completed, the park will house 121,000 square feet of land and could offer jobs for 800 to 1,200 people.

Carbondale

Tipper Gore to visit John A. Logan today

The wife of presidential candidate Al Gore will make campaign stop today at noon in the O'Neill Auditorium of John A. Logan High School.

Hundreds of Democratic supporters, activists, elected officials and other interested parties are expected to attend the rally, which is located at 200 Logan College Rd. in Carterville.

After the rally Gore will travel to Washington University in St. Louis for the final presidential debate.

Administrative offices temporarily relocate

Eight administrative offices will temporarily move to the Northwest Quadrant for the next several weeks while Anthony Hall undergoes renovations.

Most offices will have its voice mail activated in order to retrieve messages. All offices will provide normal services during the moving schedules.

The moving schedule is as follows: Budget Office - Oct. 16 and 17; Affirmative Action - Oct. 18; Student Financial Aid - Oct. 19 and 20; Office of the Chancellor - Oct. 23 and 24; Office of the Provost - Oct. 26 and 27; and Student Study, Personnel and Student Policy.

Office of the Provost - Nov. 6 through Nov. 10 (assoc vice chancellor for Academic Affairs and Research Support Staff).

Auditions open for "Inspecting Carol"

The Paradise Alley Players will host open auditions for "Inspecting Carol" at the Herrin Civic Center, 101 S. 16th St. today and Wednesday from 6 p.m. to 9 p.m.

For more information, call Delanna Seal at 549-5666.
Do you have something to say? Bring letters and guest columns to the DAILY EGYPTIAN, 630 N. University, Room 614. Communications Deadline: • Letters and columns must be signed. • Letters and columns must be double-spaced and addressed with return address and phone number. • All letters are limited to 300 words. • All letters are subject to editing. • Letters also are accepted by email (dailyeg@siu.edu) and fax (664-2074). • Please include a phone number for publication. • Students include your year and major. Faculty members include your degree and department. Non-students include your name and department. All other include author's hometown. • The DAILY EGYPTIAN reserves the right not to publish letters.

The Daily Egyptian, the student-owned newspaper of SIUC, is committed to being a trusted source of news, information, entertainment and public discourse. We encourage our readers to understand the issues affecting their lives.

The faculty association and the administration launch into another round of negotiations Wednesday and, if a contract is ever to be reached...

Clever advertising: a huge waste of money and time

One of my favorite classes in high school was advertising; I basically used it as a study hall, seeing how my teacher was clueless to the point where she had no idea how to teach her class. I did learn rudimentary lessons about advertising, however, and I wonder how a lot of ads get away with what they do.

Now, before I get started, I must stress one very important thing; my columns carry the disclaimer: "The opinions do not necessarily reflect that of the Daily Egyptian." In other words, if I upset Megacorporation, they can sue me. I don't have a freaking dime to my name. Besides, the ads in the Daily Egyptian tend to mostly promote local restaurants and bars, and goodness knows I have no problems with those.

My basic question to every major advertiser in America is this: Why do you enjoy wasting your money? I can name enough examples to keep you in columns for the rest of the year, but let's start with the obvious problem... the Super Bowl. Yes, 39 billion people watch the game, but there are plenty of factors to whittle that down. At least five billion go get refreshments during the commercials. Another ten billion mute the TV and talk amongst themselves.

Now, you're spending fifteen skillion is a great audience to have if you're selling something nothing/somewhere/anything and people don't know who the hell you are. But most of the ads are from guilty that can afford it without breaking a sweat: automobiles, soda, shoes, beer and the occasional movie coming out in six months. Guess what? People ALREADY KNOW WHO YOU ARE! The point of advertising is to sell the audience who you are and what you do.

If you ask the average person they think of a product and the audience it's trying to sell. Isn't it?

So, what if you have a product and it's trying to sell? Who's the audience? The audience you're trying to sell to is people that don't care about what you're trying to sell.

I hereby end this event at a punch line. I consider myself subjected to more advertising than most people, considering I just have a radio in my car and with the amount of TV I watch. Again, I'm not defining the product of the advertisement, the ads themselves. Here, I just don't see a logical conclusion.

For example, Ouzio Smith represents a law firm that specializes in divorced fathers. As a divorced father himself, Smith has credibility. But doesn't seem a little weird that somebody somewhere tells that it's not enough that we have experienced, bright lawyer that works for fathers' rights. We need a celebrity hook to make us stand out! I was a bit surprised that Smith didn't close with, "These lawyers will do backfiring for you!"

Finally, WHY BOB DOLE? Before a couple of years ago, when you thought of Bob Dole, you thought of a respected politician, a war hero, the portrait of dignity. Now, too much huck stand-up comedians from here to Albany think of him only as an easy punch line.

I mean, if Vargas really needed him as a spokesman, they should have gone for the campaign after his presidential campaign. Just think of the lines: "There's no way I could ever cheat on my wife. Like, literally, I can't even get it in with my wife. You can trust me!"

Anyway, always remember that if you're some sort of shocking and funny at times, I become a famous writer, and I wind up endorsing a product...
Engineering students explore career opportunities

**Ginny Slavick**
Daily Egyptian

John Zanker heads into the Student Center today in an effort to lead an on-campus event of several engineering companies, particularly The Boeing Company.

"If you pick up an internship, you can probably get a foot into the door," Zanker said. "It's a great place to start, with that company after you graduate," said Zanker, a senior in mechanical engineering from Humboldt.

Zanker is just one of many engineering students who will visit the Engineering Career Fair today in Student Center Ballrooms C and D.

In just five years the career fair has grown from hosting 16 companies to 35, said Jerry Eaton, career specialist for the College of Engineering.

"The more students attend, the more companies want to come," said Eaton who coordinated the event. "At one time only local companies were invited, then it got to the point where more companies wanted to come."

Zanker who attended the career fair last year, looks forward to visiting booths of different companies today to get an idea of different job opportunities available to them.

"I think beer and wine today will give an idea of different job opportunities," Eaton said.

In just five years, the fair has grown from hosting 16 companies to 35.

The event will also host Agricultural and Aviation Career Fairs this Saturday.

In organizing the fair, Eaton said the university has no difficulty finding companies that are interested in hiring SIUC students. Eaton said the College of Engineering is taken quite seriously by companies nationally.

"Our philosophy of engineering is very good," she said. "It's a very good score; a lot of companies don't have beer and wine today to get an idea of different job opportunities."
WHERE THE Buffalo NO LONGER Roam

STORY BY KELLY DAVENPORT
PHOTOS BY TED SCHULTZ

They gathered by a Shell station and there were no buffalo. And no ponies and just a few tippees. Their ancestors trod the Trail of Tears and survived reservations and white America. Today they drink Coca-Cola and drive pickup trucks and work nine to five.

But they still gather to powwow; to chant and drum and dance, and find their people. And to clutch the last whisper of a slightly faded past to which they remain fiercely devoted.

Wood smoke and the dry-leaf smell of autumn swirled around the grounds of the second-annual Honoring Mother Earth PowWow near John A. Logan Community College last weekend.

There, descendants of Cherokee, Apache, Lakota, Shawnee, Choctaw and other tribes slithered into buckskin and beads to dance and chat.

"Powwow is a way of meeting your people," James "Walks Tall" Shepherd said from beneath the awning of his motor home.

Shepherd, the 62-year-old Western Cherokee chief for the Illinois-Arkansas region, travels three or four weekends a month to powwow.
Brad Lovell of West Plains, Mo., prepares to pack up his belongings inside his tent before dancing in the powwow. Lovell is part Cherokee, Osage and Ute and attends six to eight events per year.

**PowWow**

*Contributed From Page 6*

"I've probably been in 27 newspapers already this year," he joked, shuffling black cards from a spaghetti cup. His face was mahogany colored and weathered like a good brother.

Shepherd estimates that almost half of Southern Illinoisans have some American-Indian blood, though they may not know it. Shepherd himself traces his lineage back 11 generations.

"My ancestors have lived in Franklin County for 200 years," he said in between the whines and yips of his blue-eyed husky dog, Bandit. "We've lived here since before there was a Franklin County!"

Shelton's friend, Charles Nelson, from Valier, came to keep his heritage alive as his grandchildren could learn to be proud too.

Helton is eleven-sixteenths Western Cherokee, but he said, "One-sixteenth makes a difference."

Powwow helps bridge the gap between the past and present, the American-Indian world and modern America. Gathering brings peace and acceptance and a chance to hand down the old traditions.

"We're Indians living in two worlds: the government world and our world," Jolene Hinkle of Dongola said. If there were no powwows, Hinkle said, in 15 years, no one would remember what it meant to be Cherokee.

But Hinkle couldn't imagine a life where she knew nothing of her past. Her grandparents lived on an Oklahoma reservation and were so poor they had - wait in long lines for the government commodity truck to bring supplies.

"They always get a number for our jobs, heritage docs..." Helton said, naming off some of the tribes attending the powwow. "This is unity.

"We're the 'other.'" Her parents taught her to navigate modern society - and to sew buckskin dresses like the 65-year-old sister she wears.

"It's my identity - the eyes that I see through." She's waiting for her job and college to open up, she said, the only time she dances and teaches.

Jury awards Duke female football place kicker $2 million

Durham, NC (U-Wire) - University's decision to cut female football team in 1996 was based on a fact that she was female, and the university must now pay Heather Sue McKeever and Jenna Meckler and the 200

That's not a record? - Youngstown State's Te'YiJon Foster set a league record with an 87-yard punt against Northern Iowa Saturday. At least he thought he did. The kick would have established a new league mark if not for Western Illinois' Mike Sizemore's punt in early in the day in Southwest Missouri State University. The two punters have No. 1 and No. 2 in league history.

Fast Eddie - Northern Iowa's Eddie Berlin broke a conference record by making a catch against Youngstown State Saturday, marking the 59th consecutive game the senior has caught a pass. Berlin leads the Gateway with 39 receptions for 586 yards this season.

Nothing to show for themselves - Illinois State's last punt attempt Saturday was the first since the 1998 season and the only one in league history. Fortunately for the Sycamores, four of those situations helped to tie the game. The Sycamores have also been shut out in five games this season.

No one under 18 will be admitted.

SALUKI SPORTS NOTES

Saluki women's golf places at bowling rights

Western Illinois' woman's golf team scored 589-3030 on Saturday, the best score of the season, and earned its second place finish.

On account of previous tournament and qualifying scores, Lisa Uhlen, Allison Hiller and Jennifer Sharri had spots. But with the win nearly on the horizon and the score came in.

Hiller gets her swing back

Saluki golfer defeats struggles and off the links

JAVIER SERRA
DAILY EDITION

It had been a while since the tiny Alison Hiller surprised onlookers with her powerful golf swing and dominated a tournament. But last week the skilled Saluki golfer reminded her teammates and coach of her freshman year accomplishments with a second-place finish in the Lady Indian Classic in Jonesboro, Ark.

Hiller recalls her freshman year well. That year, Hiller stunned many by winning three tournaments, including the Saluki Invitational at Hickory Ridge Golf Course in Carbondale.

“Jessica is definitely something that I’m going to remember forever,” said team captain Liz Ursoff.

Hiller is a true 5 feet 4 inches tall and weighs just over 100 pounds, but her size hasn’t stopped her from being a top player. She plays golf with a focus and determination that many by winning average, which weighs just over 100 pounds,

Hiller’s size hasn’t stopped her success on the golf course, and neither has her learning disability, which makes it hard for her to comprehend words at times.

“I have trouble hearing certain types of information or directions, and I’ve noticed much of a visual learner,” Hiller said. “So when reading or listening, it’s really difficult for me to point out the important topics.”

The Achieve Program has provided Hiller with a new tutor, which takes some of the pressure off. The SIU women’s team plays golf 25 days a week on the course, which leaves limited time for class and work involved.

“You’re the reason Alison is even here playing golf,” Daugherty said.

Hiller’s sophomore season was frustrating for her, as there was something missing from her swing that was the key to her earlier success.

“Last year she didn’t play as well as she could have,” said coach Rick Walker. “She had a link in her swing so she made an adjustment, but it immediately improved her game. It took away her confidence,” Daugherty said.

“The swing went from normal to very, very, mechanical and one thing led to another. It wasn’t like she had a horrible year, but it wasn’t as good as her freshman year. She works so hard, and she practices so much.”

And when Hiller’s hard work repaid its rewards last weekend, the taste of victory was a familiar one.

“My freshman year was weird exciting. … everything just worked together,” Hiller said. “I had a lot of confidence, so I’m very pleased with that.”

Hiller shares a laugh with SIU women’s golf coach Diane Daugherty.

Water Dawgs continue conference dominance

Men’s and women’s swimming teams return victorious from MVC shoot out

JENS DEU
DAILY EGYPTIAN

Another Missouri Valley Conference meet, another win for the SIU men’s and women’s swimming teams. And for the men’s team, it was personal.

The Salukis returned victorious from the MVC Shootout as the men edged Southwest Missouri State University by a 235-234 score, while the women won by a margin of 244-229 Saturday in Springfield, Mo.

The men took first in five of the 11 events and took either second or third in the remaining six.

“They did a great job. I’m most pleased with the way they came together as a group, as a team,” said SIU men’s head coach Rich Walker.

For the most part, had they not done what they did as a team, we wouldn’t have finished on top," Walker said.

The first-place finishers were Chyrlyzho Psychohristy in the 50-yard freestyle, Matt Martin in the 100 individual medley and the 100 breaststroke, Joe Tidwell in the 200 breaststroke and the 200 medley relay teams of Matters, Connie Provest, Jeremiah Cortez and David Parks.

This was the first season that the Salukis have had a five-year reign at the top of the MVC by winning both events.

It was nice. We got the hunger back,” Cortez said. “We get a taste of what we feel like to be second place, now we want to be back on top. It was nice to bring home the ‘W’ for SIU.”

Walker said Southwest Missouri State is the team to beat in the MVC until someone knocks them off in the MVC Tournament at the end of the season.

“I think it shows that we’ll be on Southwest’s back all year,” said freshman Derek Helvey. “We’ll take them down at the end, it’ll prove us to be able to get it done like we got it done this weekend.”

The women’s team, on the other hand, is the defending MVC champs and once again showed why it is on top with a dominant performance. SIU finished first in nine of the 11 events and second in the two it did not win.

“We’ve always known we’ve had good talent, it’s just a matter of putting up and performing. The Salukines have gotten stronger and stronger every year,” said SIU women’s head coach Jeff Goetz. “Talent-wise we’re as strong as we’ve ever been.”

Conference is stronger than before, but I think we’re stronger right along with it.”

The first-place finishers for the Salukins were Chyrlzho Psychohristy in the 100-yard breaststroke, Natalie Midura in the 100 and 500 freestyle, Dana Marrel in the 200 individual medley, Beth Ann Goelz in the 200 breaststroke.

Something to read while sitting in the office (bathroom)

Random questions to ponder while Saluki linemate Brett Scott and wideout Brian Hiller continue their scholarship. How can the hardwood Oilers find their rhythm with Jack Ruffino’s head three days after being formally introduced to Salukis strong safety Rod Gradude?

Likewise, have the new backcourt rims in Davies Gym restored from Robert Roberts? Where in the world is Monte Jenkins? Where in the world is Carmen San Diego? (I think he died on the Oregon Trail.)

Can a Penguin stop a Charles Tharp jump? Where in the world is Carmen San Diego? (Now that’s a brainsaver.)

Will the college president decide to donate a good portion of his paycheck to random bars throughout Carbondale? (That’s a brain teaser.)

Will I continue to jump to the professional ranks, has that home run Mike Piazza hit off of Mike James Sunday night landed yet?

Is the world ready for the Subway Series? (I’m not.)

How many Cardinal fans have second-guessed Tony La Russa lately? (My roommate is confident he could manage the Cardinals more efficiently.)

Does Rick Adair remember what a strike is?

How fast can a homegrown Cardinal fan jump to the wheels of the Rams? (Better he quick because the Rams’ bandwagon is more like a Ferrari.)

Is Pat Riley prepared to guide the Miami Heat to the NBA Championship with Dwyane Wade? (In my opinion, no.)

Is the NBA ready for East St. Louis product Darius Miles? (Contrary to what some say, he’s definitely ready for the NBA.)

However, is he ready to be a Clipper? Is happy is Troy Hudson to be out of Clipperville and in San Diego?

Who will be disqualified first come November, Mike Tyson or Andrew Golata? And which part of the human anatomy will be cause for the disqualification? How long will it be before former Illini basketball coach Lon Kruger wager his job back? (Ditto for former Miami Hurricane coach Leonard Hamilton.)

How long will it be before I totally grad?
