City resisting efforts to close job center

By John Schrag
Staff Writer

City officials are resisting state efforts to close a Carbondale-based employment office, which has helped hundreds of SICU students and local residents in the past decade.

The Carbondale City Council voted Monday night to "actively oppose the proposed closing of the Employment Service office, and authorized Mayor Hacker to approach the governor and government officials in an attempt to keep the office open.""The Vatican gave it the definitive title of "Human Work."

The Rev. John Schansching, dean of social science at the Pontifical Gregorian University, said the encyclical reflects John Paul's vision of "a universal society based on an ideal of justice" but added that "we should not allow ourselves to be deluded by their families."

"Having to abandon these tasks in order to take up paid work outside the home is wrong from the point of view of the good of society and of the family when it contradicts and hinders these occupations, the attack on the mission of the mother," he said.

Radical and urgent changes are necessary to rescue the farmers from the big landowners and "to restore to agriculture the just and necessary role in the life of the nation and in society," he said.

"We must emphasize and give primacy to the primacy of man in the production process, the primacy of man over things," the pope said.

"We must first of all recall a principle that has always been taught by the church—the principle of the priority of labor and property," he said.

The encyclical, a former intelligence officer who is a skilled linguist, called for a "human work," where the pope's native tongue, and carried the Latin title of "Lumen Gentium." There are also new fo­mulations for the "just" and "rigid" measures which had been used to control the free market.

According to John Dunning, president of the project, the theme of the clean-up day will be to increase interaction between students and community members. The new project will also be a "building block" for a larger, more comprehensive project in the future.

"This is the first year that the project has been funded by the students' union," Dunning said.

"We're working with students at the University of Illinois and Carbondale to help clean up the area and make it more accessible to the public," Dunning said.

"The goal is to make the area more attractive and to encourage people to visit it," he said.

"We hope that people will see the area as a place where they can relax and enjoy the outdoors," Dunning said.

"This year's project is just a start," he said.

"We're planning to expand the project next year and include more students and community members," Dunning said.

"We're also hoping to get more funding from the university," he said.

"The University of Illinois is planning to contribute $3,000 to the project next year," Dunning said.

"We're also looking for other sources of funding," he said.

Dunning said that the project is important because it helps to clean up the area and make it more accessible to the public.

"This is a great opportunity for the community to get involved and help make the area more attractive," he said.

"We're hoping that the community will continue to support the project in the future," Dunning said.

"We're very excited about the project and we're looking forward to seeing what happens next year," he said.

"We're also hoping to get more students involved," Dunning said.

"We're looking for students who are willing to give up their time to help clean up the area," he said.

"We're also looking for other sources of funding," he said.

"The University of Illinois is planning to contribute $3,000 to the project next year," Dunning said.

Cuts in Social Security to be postponed, spokesman says

WASHINGTON (AP) — President Reagan will not propose a major cut in Social Security this year, but he will consider the advice of several Republican senators that he try to trim other open-ended benefit programs, a spokesman said Tuesday.

The statement by White House spokesman David R. Gergen did not rule out the possibility that Reagan will propose again — as he did earlier this year — a reduction in Social Security benefits as part of a larger strategy to trim Social Security for the financially troubled pension plan.

But Gergen speculated that Reagan might support a move to trim Social Security as he searches for new ways to hold the burgeoning deficit to the $40 billion or so envisioned by the administration projected earlier this year.

Gergen's announcement followed a meeting between Reagan and Republican congressional leaders at which a group of moderate Republicans, led by Majority Leader Howard H. Baker Jr., urged him to take another look at cutting the so-called entitlement programs.

"The president announced that he has no plans to propose additional cuts in Social Security programs beyond those he has already submitted to the Congress. This announcement is intended to dampen and end any speculation that the president is examining further cuts in Social Security... as a means of balancing the budget.

"The president said Reagan 'looked under advisement' the senators' proposal that he try to cut other entitlement programs, which weren't named specifically but which include food stamps, welfare, unemployment, veterans' pensions, Medicaid and Medicare.

"The president himself gave reporters a rare "no comment" when they asked him at the start of the morning meeting whether he would rule out a proposal to provide additional living increases for Social Security recipients to reduce costs.

"Social Security is the largest of the many so-called entitlement programs that are financially difficult to control because they pay benefits not on the basis of annual congressional appropriations but on the basis of the number of people who meet their eligibility criteria.

"Entitlement programs also include food stamps, welfare, unemployment, veterans' pensions, Medicaid and Medicare.

"Various White House spokesmen said last week as the administration sought ways to make new budget cuts that Reagan would not seek further reductions in entitlement programs this year, but that when Congress takes up the fiscal 1983 budget early next year.

That line appeared to change late Monday when Chief of Staff James A. Baker III returned from a meeting with GOP leaders on Capitol Hill and hectored with the president on the White House premise where Reagan had been watching an exhibition match.

They said we couldn't do it, but we did," the skipper of one of the boats yelled jubilantly to the newsmen after putting the landing party ashore in rubber rafts.

About 25 of half were arrested, but a dozen remained on the beach, most not easily accessible to arresting officers.

Blake was not among those arrested. He and two companions were given permission by officers to hike back to Avila Beach.

"What brought them in was the noise," said a passerby.

About 40 police and sheriff's deputies who had been stationed just inside the main gate since early Monday went into the back of the rafts about an hour before the protesters arrived, so demonstrators ran into no resistance when they began stepping over the chain link fence.

About 450 police and sheriff's deputies who had been stationed just inside the main gate since early Monday went into the back of the rafts about an hour before the protesters arrived, so demonstrators ran into no resistance when they began stepping over the chain link fence.

Residents: Sewers may be too costly

By Bob Bondurant
Staff Writer

Leland Hubbell and his seven neighbors on New Era road north of Carbondale are finding that incorporation into the city would solve the sewage treatment problems that have bothered them for years.

It may provide a needed sewer line, but at a cost Hubbell and his neighbors were not expecting, he said.

The Carbondale City Council Monday approved an ordinance which establishes a special assessment for the homeowners to help pay for the construction of a sewer line which would eliminate their problems.

The line, estimated to cost $46,646, will be paid for partly by a $30,365 investment by the city, and $16,186 on the part of the homeowners. Hubbell told the council that he feared the cost of the assessment would be too much for the homeowners to bear.

"I asked the council if they could delay the decision on going ahead with the funding and the council gave us the impression they would consider it," he said.

"When they came back the next week they came back with an answer saying the community would pay the whole amount. I think they don't understand the concept. They are just being told to pay what they have to pay without thinking out who will really have to pay for it."

He said that the city is taking up the part of those homeowners in the area who have already annexed themselves to the city, and thus cannot be assessed. Those people will pay when they hook up their lines to the sewer. The price to those homeowners will rise $10 per year for as long as they refuse to connect a line to the new sewer.

"It seems to me that it's a fairly legitimate approach," Hubbell said.

The City Manager told the developers at the council meeting that he would try to bring a more thorough answer to the council if they don't have to pay for their hookups. He asked if they would not have to pay for their hookups. He asked if they would have to pay for their hookups. He asked if they would have to pay for their hookups. He asked if they would have to pay for their hookups.

City Manager Fry told the homeowners at the council meeting that he would try to bring a more thorough answer to the council if they don't have to pay for their hookups. He asked if they would not have to pay for their hookups. He asked if they would not have to pay for their hookups. He asked if they would not have to pay for their hookups. He asked if they would not have to pay for their hookups.

"I don't think this looks us into anything but paying for the drawings," he said.

"But it is not doing anything else until they hear from us. Mayor Ham Fisher said.

Murdale to protest hookups

By Bob Bondurant
Staff Writer

Five more hookups in the past two days have been made by Carbondale and Murdale City Water District customers living on Tower Road, and the attorney representing Murdale has said that "appropriate action" will be taken as soon as possible.

Carbondale Director of Water and Sewer Treatment Jack Foster said that the negotiations, which he said were in 21 weeks since Stymest Nursing Home was hooked up, would continue.

William Ridgeway, attorney for Murdale said last week that he would file an injunction in Jackson County Circuit Court on behalf of Murdale to prevent further hookups.

No injunction to restrain Carbondale from hooking up more Tower Road buildings would be filed, as long as no more hookups were made, Ridgeway said.

THE EDITORIAL ARTICLE in the Southern Illinoisan of September 18, 1981, "Press Must Watch Saudi Plane Deal," was not only contradictory but far from logical.

In his article, the editor admitted that U.S. Middle East policy had been one-sided for too long. He added that "the main block in hindering the U.S.-Arab relations has been the U.S. commitment to opposing Israeli aggression and the mild threats of the U.S. that would be made if Israel is moving toward war." This statement alone indicates that the editor believes in what he wrote, he would not have added that AWACS should not be sold to Saudi Arabia because, as he claimed, "intruding more weapons in the Middle East only increases the risk of war.

If selling weapons to any Middle East country increases the risk of war, then how about the unlimited military equipment sold to Israel in the last 5 years?" This question is made even more relevant when one considers the fact that Israel is using the AWACS to protect and support its occupation of the West Bank and Gaza. The editor's argument is therefore contradictory.

UNDER THE BLANKET of "Israeli security," Israel was and is capitalizing on the Arabs' hostility to promote its own expansionist policy in the area. And now Israel is using the AWACS sale in order to strengthen her own ties with the United States and request more military assistance.

The AWACS sale to Saudi Arabia is intended for U.S. defense in the region. If the U.S. has to listen to Israel and its Zionist supporters every time it wants to secure its interests in the Middle East, it might as well let Jerusalem rather than Washington conduct your policies in the area.

The Southern Illinoisan's editorial opinion reveals the pro-Israeli obsession which is blinding many Americans in this country.

HOW CAN YOU EVER reconcile your own interests in the Middle East vis-a-vis the Soviet Union if you keep harping on the Arab-Israeli conflict? Israel's security every time the U.S. decides to sell military equipment to an Arab state? "In what way is Israel an asset to the U.S.? Should the U.S. jeopardize its relations with the rest of the Arab world in order to continue pleasing Israel?"

The very existence of Israel as a result of political circumstances after the 1948 British Mandate in Palestine, exists today at the expense of millions of Palestinian refugees. Israel, which has been an existence question now for almost 35 years, is now demanding the U.S. to consider Israel the main strategic country opposing the Soviet Union. How could Israel export peace to the rest of the Arab world from the Soviet Union when it is itself in conflict with them?

THERE M'S MEDIA, including the Southern Illinoisan, would be doing the U.S. citizen's job if it would sell military equipment to an Arab state.

In my opinion, the editor would be more objective in dealing with the Arab-Israeli conflict. After all, we have been witnessing an existence question now for almost 35 years, is now demanding the U.S. to consider Israel the main strategic country opposing the Soviet Union. How could Israel export peace to the rest of the Arab world from the Soviet Union when it is itself in conflict with them?

There are other things we can do with military equipment. We can think about the Middle East and the relationship of both to U.S. interests in the area, before any biased opinion is printed that misleads the average reader.

It is highly surprising that the Congress would give priority to Israeli's security at the expense of U.S. interests and security in the Middle East. In what way would Congress be stronger if it would stop selling military equipment to Saudi Arabia? Denying AWACS to Saudi Arabia serves only Israeli's expansionist policy, while strengthening the U.S.'s strategic interests in the Middle East.

I would like to suggest that the Southern Illinoisan use media to stop being an agent of Israel and when they will consider United States interests for a change.

**Nixon archives site endangered by ‘academic yahoos’ at Duke**

For the time being, at least, the rush to subdivide the proposed Nixon Library at Yalta has already given the nature of professors and the hysteria provoked by the very name of Richard Nixon as we may believe that the pigeons will keep on flapping in this academic grave.

What happened, or brief is that representatives of the former president recently in talks with Terry Sanford, president of Duke, about establishing a library at the university. Like other presidential libraries at Abilene, Independence and Austin, the proposed Nixon library would house not only presidential papers but also presidential memorabilia.

President Sanford, no dummy, leaped at the prospect, but he was perhaps overeager. He neglected to engage in the rain dance with tenured faculty members that ritual prescribes for such occasions. One thing led to another and the apprehensive administration of the University of South Carolina, where the library is supposed to be, became alarmed. The following day Duke's trustees showed themselves. The executive committee voted 9-3 against the proposition.

Theirs is a visceral reaction, but in the gut. The passion, the hysteria, is Israel an asset to the U.S.? Should the U.S. jeopardize its relations with the rest of the Arab world in order to continue pleasing Israel?" The passion persists with particular intensity among the literati who reflect our institutions of higher learning. The most dedicated old professor, his juices drained and his bones cracking, leaps to rejuvenated life when an opportunity arises to belabor the ailing foreign policy. The Nixon haters begin to salivate like Pavlov's dogs. There is a visceral reaction, based not in the cerebellum but in the gut. The passion persists with particular intensity among the literati who reflect our institutions of higher learning. The most dedicated old professor, his juices drained and his bones cracking, leaps to rejuvenated life when an opportunity arises to belabor the ailing foreign policy.
Justice for all means legal services are needed

By Diane Schembert
Student Writer

Poor people are entitled to their rights in court just like the rest of society. Therefore, if Congress approves President Reagan's request for the $26 million federal program for free legal services to the poor, Carbondale's Land of Lincoln Legal Office, 205 West Main, has an estimated 3,000 or more than 200 cases on file. The office serves four counties.

National, there are about 30 million people in America below the poverty line—an increase of 12 million for the year. Each year some 14 million cases for the poor are handled by legal aid.

Poor people need legal assistance with problems involving property, children, employment, housing, and health care, among other things. Without a well-trained legal service lawyer, people would probably not have anyone to defend their rights.

In legal terms, every court is a forum for the people. But, how many private lawyers are willing to defend someone with a legal case, in which most private lawyers are not trained to handle poor people's problems? Several lawyers are specifically trained to deal with the needs of the poor.

In rural areas such as Carbondale, legal service is greatly needed. A local program would give various individuals a blank check to do what the poor want.

For example, legal service offices police public housing authorities to ensure tenants' rights. When private landlords are not following the rule of law, poor people are dispossessed. Southern Illinois would suffer from cuts in the program because the region has a high percentage of poor people. Many poor people do not know the law and usually are not aware of what it could do for them. Therefore, it would be feasible for the region.

Of course, abolishing legal programs for the poor is something that will directly affect everyone. Nonetheless, providing that poor people are not being mistreated, it is not possible to say that in America everyone is equal before the law.

Letters

WSIU cuts are unprofessional

It is with considerable displeasure that I have learned of the decision to cancel all folk and traditional broadcasting through the WSIU-FM facility. I write to oppose the decision to shorten the broadcast day, however, I refrain myself from vitriolizing that displeasure based on the belief that this is a sure way one of budgetary considerations rather than a true consideration of programming prejudices of the new management.

In every situation with per­­son­­al­­ly­­employed and active in the organization, I have learned that the decision to cut all folk and traditional broadcasting was an upper-level determin­­ation to cut costs. In no way, without input or suggestion from broadcast staff.

I feel that allowing the program director of her mandated obligation to present programming which is relevant to the population and to educate the listeners, and provide that type of programming which is unavoidable via commercial broadcast channels. This means to provide programming which is not heard by the listeners, regardless of the speaking involvement of personal preference. Should the management believe that "Plain Folk," "Just Plain Folk," and "Backwoods Folk" were not relevant to the community, I request that they spend some time talking to me.

The Kinks 4, Turley 1½

In regard to the Bill Turley review in the September 13th issue, the album, "Give The People What They Want": Bill, you really got us now, you got us all here. I'm sure you know what you're hearing. Bill, you really got us now, you got us so that we're not saying you're thinking. Bill, you got us, hundreds of people who enjoy the type of music that is being arrogant of cutting an entire type of program which is being withdrawn under the guise of offering a service at a time so as to judge the public response, is an example of the most un­­professional attitude of utter rejection of any leadership. I suggest, that if the program director is attempting to increase the listenership, her actions of cutting broadcast time and folk programming would reward her with a noticeable reduction in domestic listenership.

I have requested a number of my friends who have subscribed for past years and we have decided to write letter, however, legal and discontinue future financial giving. I have written to the Southern Illinois an in the program directors to speak their displeasure to Jane Fisher. She may rest assured that we are not going to rest until we motivate subscribers to take some action. I know that the influence the equal distribution of programming time or with­­out the support of management station management unwilling to do so. Again, that decision is not which is not favored. WSIU Radio's program changes ignore interests of black audience

By Ken Perkins
Novelist Writer

The recent programming changes at WSIU TV have angered many music enthusiasts and listeners have literally been ignored.

But no music enthusiast was more frustrated by the announcement than the black listener, whose only programming has been cut to a bare minimum.

While the black programming on WSIU radio was a 10-hour show, "Black Impression," which featured soul, jazz, gospel and informational newsprogramming, was cut to the blacks on campus and in the community.

The program was hit the hardest by the cuts, despite opposition from several black groups on campus. The objective was to save money by shutting off the station after 12 a.m. A cut of 2.5 hours a day was decided upon.

Of course, abolishing legal programs for the poor is something that will directly affect everyone. Nonetheless, providing that poor people are not being mistreated, it is not possible to say that in America everyone is equal before the law.

Lewis Park parties should be policed

By Bob Bondurant
Staff Writer

Lewis Park on a Sunday morning is no place for outlandish parties. Broken glass is scattered over the streets and coolers filled with cases of beer are piled up beside them. Litter of one type or anotherAlmost at the same time, another party not too far away was not the least bit concerned about the party. As the morning breeze rolled through the campus, about 250 people were enjoying the morning dance at the party, which was in full swing.

By Jeff Feltman

The next day, Hogan announced the Carbondale "party policy," which is identical to last year's. The reason that Hogan will settle down to the situation at Lewis Park, Hogan's actions were proceeding very smoothly.

The situation will only get better if Lewis Park tenants decide that it has to get better. About one hour after Hogan's announcement, a party was held at Lewis Park during the May semester break to find out if this was only a result of outside influences.

The tenants don't need to worry about the wandering vagabonds from the East Campus dormitories. Those on party will find that there is little chance of anyone coming to Lewis Park.

It is possible to get into Lewis Park, residents must not hesitate to use the legitimate means for control available to them. The safest way to police the situation is by local police—but do not wait until the crowd is too large.

The police are entrusted with the responsibility for the protection and enforcement of the property. If the tenants don't want the headaches that come with police, police should be hired. The police have been hired.

...or beer bottles should be banned

The tenants don't need to worry about the wandering vagabonds from the East Campus dormitories. Those on party will find that there is little chance of anyone coming to Lewis Park.

It is possible to get into Lewis Park, residents must not hesitate to use the legitimate means for control available to them. The safest way to police the situation is by local police—but do not wait until the crowd is too large.

The police are entrusted with the responsibility for the protection and enforcement of the property. If the tenants don't want the headaches that come with police, police should be hired. The police have been hired.
Has Iggy mellowed?
He has on new album

By Joe Wals
tertainment Editor

After listening to Iggy Pop's latest release from Arista, "Party," an Iggy fan will definitely draw the conclusion that Pop has definitely mellowed. The fans, who have seen Pop in concert years ago, would now notice a more mature approach to his performances. There is a conspicuous absence of Pop running full speed into the audience, rolling around in broken glass or mauling on stage. Iggy now seems to be almost taking himself seriously.

He is also taking his music seriously, almost, with rhythm and blues guitar playing by Ivan Kral, formerly of the War, Smith Group, and the brass section played by the Uptown Horns.

In his past albums with the Stooges, like "Funhouse," most of the songs sacrificed melody for noisy rhythm and Pop's nasal voice screaming like a banshee. His early Stooges tunes like "TV Eye" and "I Wanna Be Your Dog," are contrasted by some to be vintage punk classics, very simple and technically not that good.

However, after Iggy met David Bowie in the mid-seventies and collaborated with him on his album, "The Idiot," and "Last of Life," his lyrics and vocal style became much more sophisticated and even witty. Even though at times it seems as if Pop sounds too much like Bowie, Pop's wit is very evident on the "Party" track, and his collaboration with Kral gives this album a completely different sound than his last "Soldier."

The tune "Pumpin' For Jill" contains very ironic lyrics done to a new wave beat, but Pop sings them as if the tune were a love song. "At the gas station, where I work, everyone treats me just like dirt, And I never get no tip, I'd rather stay here pumping for Jill."

However, the best cut on this disk has got to be "Bang Bang." The tune has a great beat and the banjo lyrics are very catchy. "Bang. Bang. Bang. Bang. I got mine."

But the factor that makes this album most unique, at least unique from Iggy's perspective, is the inclusion of two classic pop tunes, "Time Won't Let Me, and the old Clyde McPhatter tune, "Sea of Love," both of which are sung capably by Pop.

Another unique feature is that those tunes as well as the Pop and Kral tune "Bang Bang" were produced by Tommy Boyce formerly of the sixties light-rock duo Boyce and Hart. The rest of the cuts were produced by Thom Panunzio. The content of the other tunes such as "Sincerity," the raggedy "Happy Man," and the semitropical Jukebox Hit Tonight, show that Iggy's erratic mind is able to assimilate itself to a variety of musical styles.

But old fans may be dismayed by "Party." It is nowhere near as punkish as his last "Soldier," which was a throwback to sixties punk. But it is undoubtedly more listenable for the average ear, and the music is definitely much more slick. This may be probably the most commercial album that Pop has ever put out.

Album courtesy of Plaza Records.

NEW YORK AP: Author Truman Capote was taken to a hospital Tuesday after collapsing in the lobby of a Manhattan building, officials said.

The Emergency Medical Service took the author of such works as "In Cold Blood" and "Breakfast at Tiffany's, " was rushed to New York Hospital. A hospital spokesman said Capote was being treated in the emergency room and his condition was not immediately known.

Capote, 57, collapsed in the lobby of the United Nations Plaza, said Jared Lewin, a spokesman for the Emergency Medical Service. Lewin said Capote was in stable condition.

Party, Iggy Pop, Arista Records, Reviewer's Rating: 3 stars (4 stars tops).

NEW HORIZONS?

NEW HORIZONS is one of the most innovative committees that programs activities for the Student Programming Council. This committee employees the skill and knowledge of many interesting people to provide the SIU campus with non-credit alternative to scholastics offered on campus. In the past, NEW HORIZONS has offered such mini-courses as: photography, aerobic dancing, karate, cooking and many others. If you'd like to broaden your horizons, pick up an application for NEW HORIZONS CHAIRPERSON at the SPC Office on the 3rd floor of the Student Center or call 536-3393.

The Saluki Spirit Council will host a pre-game spirit party Sat., September 19, in the free forum area, north of the Faner Parking Garage. Festivities begin at 12 noon.

Creators of the best banner will be awarded a $50 cash prize. Album and t-shirt giveaways also. Tickets for Saturday’s football games against Tennessee State as well as tickets for the 8pm Women’s Volleyball game against the defending World Champion Korean National Team will be available.

If you're in search of a career? Search no more! Attend the INTRODUCTION TO THE CAREER INFORMATION CENTER being held TODAY from noon to 2:00 at Woody Hall room 830. This introductory session will explain resources available to you concerning job requirements, salary info and more!

Feel good about yourself! This positive workshop will help you identify thoughts, feelings and behaviors that affect your self-esteem. The workshop is BUILDING YOUR SELF ESTEEM and will be held in the OHIO Room of the Student Center from 3-5:00 TODAY!

Theatrics by the Happenings makes them unique, gains fans

By Joe Walter
Entertainment Editor

When the band first started out in January 1980, David and the Happenings was considered by some to be an entertaining act that would have been much better if the members only knew how to play their instruments. How times have changed. Since that time, David and the Happenings have become one of the most popular and perhaps the most unique musical attractions in Carbondale. Their brand of old funk, rhythm and blues and soul done to a punkish beat and their imaginative theatrics have attracted a huge, enthusiastic following of SIUC students and local folk.

They also have returned from a Midwest tour about a month ago. On tour, they have opened for Nine-Nine and Leggy Puck and played with the famous blues duo Sam and Dave in Champaign Sept. 26. They are also scheduled to open for the group headed by the brother of Happenings' vocalist David Tremor, James Chance and the Contortions—Sept. 26 in Student Center Ballroom D.

Tremor said that when the group started out, its main repertoire was sixties Motown, old fifties rock and new wave music. But now, he said, the group's dalliance with more rhythm and blues has brought in many more fans.

However, Tremor did admit that the band's style is a challenge. "We think if we can do it, they can do it," he said.

Tremor said that the band, also comprised of Dave Schultz on guitar, Scott Nelson on bass, Frankie Axwell on sax and Buzzy James on drums, is more serious about the music it plays. "I see us as going into more of a straight-edged sound," he said.

James Chance to open tour with show at Student Center

New York Rocker magazine calls his style a "blackwater, punkfunk twisting of rhythms and sensibilities." Beyond that, James Chance is difficult to safely categorize in today's musical circuits.

But on the New York scene for over two years, and having just returned from a European tour, Chance will open his first Midwest tour at 8 p.m. Friday, at the Student Center Ballroom D. SIUC is the only college campus show scheduled for the tour. Admission is $4.

The show will be opened by David and the Happenings, the Happenings is Chance's brother, so this will be a family reunion of sorts.

Chance's Midwest tour is long overdue, and SIUC is honored to be the chosen premiere site.

Farmer's Market announces MID-WEEK MARKET GRAND OPENING

Taiwanese's death shrouded in mystery

By Bob Dvorchak Associated Press Writer

PITTSBURGH, PA (AP) - The crumpled body of Chen Wen-chen will be buried Wednesday in Taiwan, but the funeral ceremony can lay to rest the suspicions and mysteries concerning the circumstances of his death in a five-story fall.

Chen, a 31-year-old native of Taipei, taught statistics at Carnegie-Mellon University in Pittsburgh. He was also a supporter of a Taiwanese independence movement.

Because of that activity, his death in Taipei on July 2, while officially ruled an accident or a suicide—thought by some to be a political assassination. And that belief has sent a chill through many Taiwanese in the United States.

Students who attended a July memorial service for Chen at Carnegie-Mellon wore masks or covered their heads with paper bags. The mourners said they feared that other students were spies for the Taiwanese government.

'Professor Chen's death has left every Taiwanese who believes in democracy and freedom terrified,' said CMU President Richard Cyert, an outspoken critic of Taiwan's handling of the death.

"If a professor from a prestigious American university can meet a mysterious death without the cause of death being made clear, the future of the Republic of China is safe. Each one who has spoken against the Taiwanese government may become a 'suicide' or the 'victim of an accidental death.'"

My own opinion is that he was murdered by the secret police," Cyert said.

In the United States, Chen's death has prompted an FBI investigation and congressional hearings in Washington.

Chen's future seemed bright. May 29 when he returned to his homeland for the first time in six years. He had just been appointed to a new three-year term at CMU, and he and his wife, Su-jen, had planned their vacation to show off their year-old son to eager relatives.

But Chen ran into trouble on Taiwan. Questioned June 30 by government officials, he was denied an exit visa on July 1. Two days later, he was dead.

Chen was known by the Taiwan government as a Taiwanese anti-Communist. And his death has sent a chill through many Taiwanese in the United States.

"I was a sensitive, outspoken critic of Taiwan's government," said Chen. "If I can be killed by the Taiwan government—" But Chen was not allowed to continue.

Instead, he was driven to his home at 8:30 a.m. July 2. Officers feared he might be following the death of the Taiwanese president. So they released him after questioning him for 13 hours. He never made it home.

Instead, he went to the home of Teng Wei-hsiang, who had studied with Chen in the United States. Teng said Chen told him he feared he was being followed by government agents. Chen left at 12:30 a.m., Teng said.

About 4 a.m., Chen's body thudded to the lawn of the National Taiwan University. The autopsy report listed a broken rib, three broken bones in his back, a cracked hip and extensive internal injuries.

Henry Wang, chief of the Garrison Command, said Chen "probably committed suicide.

**Music of Mr. Cairo’s friends bounces along, most of the time**

By Julie Guadagnoli
Staff Writer

At its best, the music of Jon and Vangelis is lively and interesting. At its worst, it sounds like a movie soundtrack. "The Friends of Mr. Cairo," their most recent album together, shows both sides of their music.

Jon Anderson’s singing is as pure and heavenly as ever. But after so many years of associating that celestial voice with Yes, listeners may have trouble breaking with tradition. Since Anderson sings every song on the album, the two needs something else to help them stand on their own.

Fortunately, many songs are marked by a unique musical style. These are the best songs, because they bounce along and involve the listener. The title song is a long, sometimes mawkish tribute to "early-80s gangster movies" and the movie stars of that time.

And the song sound like a gangster movie. A steady, throbbing beat creates a mock tense mood. Gun shots and breaking glass can be heard. Bits of dialog are interspersed throughout the song.

"State of Independence" is driven along by a lively, marching band feel. The music is an interesting contrast to the song’s calm, spiritual lyrics that deal with a "meditative state." Anderson comes back to earth on "back to school." His lyrics are much more straightforward than usual and not nearly so lofty. "You might think I’m a crazy fool. I wanna go back to school. Man its safer in there. The world outside is so uncivilized." A bouncy organ also adds to the light-heartedness.

In some songs, Carol Kenyon and Clair Hamill complement Anderson’s vocals with harmonies and backing vocals that help keep the songs from sounding too long.

But songs without those backing vocals and without unusual music have nothing to distinguish them from Anderson’s earlier music with Yes. They are not bad songs, but they are not great songs, either.

Anderson’s voice has the ability to stir listeners profoundly, as it did in songs like "Heart of the Sunrise" and "Close to the Edge." However, he does not always use this ability on "The Friends of Mr. Cairo." His singing is still very smooth, but sometimes it is so refined that it seems empty and emotionless.

Because of the distinctiveness of Anderson’s voice, Jon and Vangelis’ albums will inevitably sound a bit like Yes. But if they continue breaking away from that particular style of music with albums like "The Friends of Mr. Cairo," they will soon be in a "State of Independence."

---

**Five students elected to posts**

Five SIUC students have been elected to posts in the recently re-formed College Republicans. Tom Wood, senior in accounting, was elected president. Gordon Wayman, senior in political science, Eric Beinken, senior in biological sciences, Connie Mehrentz, junior in accounting, and Mike Higgins, senior in accounting, were each elected Thursday as internal and external vice presidents, secretary, and treasurer, respectively, at the organization’s meeting.

WASHINGTON (AP) - The chairman of the Congressional Black Caucus said Tuesday the Reagan Administration may have broken the law by canceling a federal grant to an education program headed by Chicago civil rights leader Jesse Jackson.

Walter Fauntroy, the District of Columbia's delegate to Congress, said at a news conference that the cutoff of an $825,000 grant last week to Jackson's PUSH for Excellence Inc., "may well" amount to "a back door route to impounding funds in violation of the law."

Impoundment - a refusal by the president to spend appropriated money - was outlawed in 1974. Republicans have spoken recently of restoring the practice in a limited way. The PUSH for Excellence grant was not specifically earmarked in an appropriation bill but was recommended in a report approved by Congress.

Fauntroy asked Comptroller General Designate Charles A. Bowsher and the Appropriations subcommittee that drew up the report to investigate whether the cutoff amounts to impoundment. The comptroller general heads the General Accounting Office, an investigative arm of Congress.

The Reagan Administration has insisted it has ample legal power to shut off the grant. In a letter to Jackson, Vincent E. Reed, an assistant secretary of education, said Monday that going ahead with the grant would amount to "a dereliction of our duty to ensure that federal funds are properly used for their intended purposes."

Reed cited what he called a refusal by PUSH-Excel, as it is called, to permit an Education Department audit of previous federal grants and a preliminary audit by the Commerce Department that said some expenditures lacked justification and the program lacked safeguards to assure proper accounting.

Since 1978, the Education, Commerce and Labor Departments have granted a total of $8.6 million to PUSH-Excel.

because he feared being arrested for his crimes.

But in a 7,000-word final report issued July 30, the district attorney's office in Taipai cleared Chen of any alleged crimes. It concluded he "could have committed suicide or died in an accidental fall."

On July 31, the parliament released results of its investigation, concluding he died in an accident caused by "slippage or "mental disturbance" after the interrogation. The report doubted Chen killed himself.

In a news conference held in Pittsburgh last Friday, Mrs. Chen said she doesn't accept either official ruling.

"My husband's death was not a suicide or an accident. It was a murder," she said.

"Suicide was not his way. He had a future full of potential. Not was his death an accident," she continued, saying that certain cuts and bruises were unexplained in the Taiwanese government's autopsy report.

"From the minute that I saw his body... I knew it was not an accident. There were just too many unexplainable external wounds," she said.

Suspicion of Taiwnese spies have infiltrated U.S. campaigns prompted hearings by the U.S. House Subcommittee on Asian and Pacific Affairs.

"It would appear that massive violations of U.S. law have been made by Taiwanese officials in this country," said U.S. Rep. Jim Leach, R-Iowa, who called for FBI investigation. "It would also appear that information gathered in Pittsburgh is directly responsible for a death in Taiwan."

The Garrison Command said Chen was confronted with five photocopies of letters he wrote from Pittsburgh to Shih Ming-teh, an independence activist who has been jailed for life after a sedition conviction.

CMU officials expressed shock that the Kuomintang had such photocopies, along with tape recordings of speeches and phone calls Chen made in Pittsburgh. The congressional hearing alleged the material came from students who reported on Chen for handing out pro-independence literature.

First shop National, buy 1 each of at least 25 different items, totaling $20.00 or more. Then compare prices on the same items at any other supermarket. If their total is lower, bring your itemized National receipt and the other market's prices to National's store manager and we'll pay you triple the difference, in cash!

National, low prices you can believe in.
State parole agent found stabbed

QUINCY (AP) — An Illinois state parole agent was fatally stabbed early Tuesday and his body dumped alongside a rural road in a northern area of Quincy in western Illinois, authorities said.

The Department of Corrections in Springfield said Robert C. Shepherd, 53, of Quincy, was the first Illinois parolee officer ever killed while on active duty.

Deputy Bill Marker in the Pike County sheriff's office said the circumstances of Shepherd's death were not immediately known.

"He was found along a gravel road just north of town. I don't know if they have any suspects," Marker said.

Shepherd had been hired by the corrections department in 1980, after 27 years in the U.S. Air Force, according to spokesman Nick Howell.

State parolc agent found stabbed

The Career Counseling Center is sponsoring a workshop, "Introduction to the Career Information Center," which will explain things as how to use resources and how to find job requirements, salary information, and job outlooks. The workshop will be from noon to 2 p.m. Wednesday in room B-204, Woody Hall.

A workshop on building self-esteem is being sponsored by the Career Counseling Center to help people identify their thoughts, feelings, and behavior. The workshop will be from 3 to 5 p.m. Wednesday in the Ohio Room.

University Christian Ministries will sponsor a discussion on the topic, "Why the Moral Majority Is Wrong," from 1 to 5 p.m. Wednesday at the New Life Center, 915 S. Illinois Ave.

IT'S A FUNNY STORY

Save 20% with Stiles Back to school special on SCM's best portable

The SIU-C Trap and Skeet Club will meet at 6 p.m. Wednesday in room 130 of the Recreation Center. All club members and interested students are invited to attend.

The Student Environmental Center will hold its organizational meeting from 6 to 7:15 p.m. Wednesday in Activity Room C. Goals and activities planned for the fall semester will be discussed.

A canoe workshop is scheduled from 3 to 5 p.m. Wednesday at the Campus Lake Dock. The workshop is sponsored by the Student Programming Council, Students for Outdoor Recreation, and the Recreation Center.

The Health Service will hold its monthly meeting from noon to 1:30 p.m. Wednesday. During this time no appointments will be made and no walk-in patients, except emergency cases, will be seen.

The Health Service will resume its normal schedule at 1:30 p.m. Wednesday.

The SIU-C student chapter of the Wildlife Society will be having a wildlife trophy sale from 9 a.m. to 1:30 p.m. Thursday and Friday, on the first floor of the Student Center across from the cafeteria.

The Professional Law Enforcement Association will hold an organizational meeting at 7 p.m. Wednesday in room 208. All past members and interested persons are invited to attend.

The Illinois Vocational Home Economics Teachers Association will hold an organizational meeting at 6:30 p.m. Wednesday in Puslhall Hall, room 226.

The Center for Basic Skills is offering a workshop on textbook reading and note-taking. The one-hour workshop will be 2 p.m. Wednesday in the Wham Building, room 317. All students are welcome to attend.

Registration is open at the SPC office on the third floor of the Student Center for a six-week cosmetology class, scheduled to begin on 7 p.m. Thursday. Pam Datta, professional cosmetologist, will conduct the class. A $20 fee is required.

Dr. Regina Runderer of the Center for Basic Skills will offer a workshop, "Writing a Master's Thesis: Strategies for Success," from 7 to 9:30 p.m. Wednesday in the Wham Building, room 326. All master's-level students are welcome to attend.

Apple grower likes ripe climate

By Pam Petrov

You can slice, dice, mash or even liquefy them. But in any form, apples are still a favorite among fruit lovers. And with this season's bumper crop, the red and golden fruit is also popular among farmers.

An abundance of summer rain and cooler weather during the fall has produced a large and healthy apple crop, according to Dan McGuire, owner of McGuire Orchards in Makanda.

"The good weather has put a nice color on the red apples," he said. "The sugar content in the apples is also very high."

McGuire grows six different varieties of apples on his 200 acres. Spring and summer's first apples, the Lodi and Paula Red varieties, have already been picked, he said.

His fall varieties, such as Jonathon, Red Delicious, Golden Delicious and Winesap, are usually picked from late August until mid-October.

On the whole, the state apple yield is expected to be about 2,4 million bushels this year. This figure is close to the average apple yield over the past five years.

McGuire's and several other orchards have packing lines at their facilities, in which machines wash the fruit, size it according to weight and package it in containers. Workers separate bad apples as the fruit goes down the line. Apples that don't make it to the grocery store counters are typically cheaper than retail prices, McGuire said.

Peaches, which are picked from June until August, were also bountiful this year, McGuire said. He harvested about 100 bushels of the fruit, which is selling at about $20 per bushel, he said.

Illinois produced an estimated 458,000 bushels of peaches, about 50,000 fewer bushels than in 1980. But the decline was not felt in Southern Illinois, which had a full crop.

Cold weather in the northern part of the state damaged several Illinois crops, McGuire said.
Conference to aid grad personnel

A conference for graduate advisers, academic deans and department heads will be held Wednesday and Thursday from 3 to 4:30 p.m. at Morris Library Auditorium.

The conference is oriented toward answering questions about policies of the Graduate School from people who are new to graduate positions, according to Dennis Leitner, associate dean of the Graduate School.

Leitner said often-asked questions concern continuing registration, courses and changes in registration for graduate students.

Leitner said he also will discuss processing of assistantship in time to get credit for tuition entered into the Billing Receivable System before a graduate student is billed for spring tuition.

Conference to kick off United Way drive

By Pam Petrow
Staff Writer

The Carbondale United Way will kick off its fundraising campaign with a 7 a.m. breakfast at the Student Center followed by a ceremony at McAndrew Stadium, according to Mark Davis, SIU's coordinator for the United Way.

The Carbondale United Way's goal this year is $40,000, about $3,000 more than last year's total, she said.

The organization raises several thousand dollars each year in a Carbondale campaign and allocates the money to agencies that demonstrate a need for the funds.

Davis and other committee chairs will kick off the breakfast. A local beer distributor, a公益性银行, have volunteered to sponsor the breakfast in Ballroom B of the Student Center.

"Several area businesses and organizations have helped us by donating money, supplies or other services," she said. "We'd like to keep our operational costs low. We can give about 80 to 90 cents of every dollar directly to the agencies.

"Hans Fischer, mayor of Carbondale, Albert Sotim, SIU Provost, president of the Chamber of Commerce, Don Yeat, Carbondale United Way chairman, and Don Strom, Carbondale community relations officer for the United Way, are scheduled to speak at the McAndrew Stadium ceremony. Each will say a few words before he holds a football and then will hand it down to the next person.

"Ray Dempsey, Saluki football coach, will then hold the ball." and Marty Briggs, a senior member of Carbondale High School's football team, will kick the football—and the campaign—off, Davis said.

After receiving petitions for funding from 22 agencies, the Carbondale United Way's board of directors voted to allocate $2,000 to each of the organizations, Davis said.

"Each organization was reviewed carefully," she said. "The process took about two months."

The largest allocation, $6,000, go to the Senior Citizens Council. Allocated from $7,000 and $9,300 in funds are the Carbondale Junior Sports, Egyptian Council, Boy Scouts of America, Jackson County Red Cross, Jackson County YWCA, Shagbark Girl Scout Council, the Women's Center and the United Services Bureau.

In addition, the Carbondale United Way's board of directors will allocate $2,500 to Community Education, Lutheran Social Services, Aeon Alternatives and the Humane Society of Southern Illinois.

Aeon Alternatives and the Humane Society of Southern Illinois will receive between $4,500 and $5,300. The Coordinated Youth Program, Egyptian Association for the Mentally Retarded, Hill House, and the Humane Society of Southern Illinois will be allocated between $600 to $2,900. Allocations of $526-$590 will go to Carbondale Community Education, Lutheran Child and Family Services, Southern Illinois Special Olympics and the United Services Bureau.

"It's always good to start with some money at the beginning," Davis said. "It's an incentive to raise more."

About 300 people work in the Carbondale division of the United Way. Approximately 500 people are involved in the city campaign, Davis said.

NOTICE TO ALL NDSL RECIPIENTS

All students expecting a National Direct Student Loan for the 1981 Fall Semester must pick up their checks at the Bursar by 3:30 on Wednesday, Sept. 30, 1981.

Names of students whose checks are available are posted on the bulletin board in the SWFA reception area.

Checks not picked up by that date will be cancelled.

Students who want their check to be reissued will have to pay the increased interest rate of 5%. Paid for by the Office of Student Work and Financial Assistance
Apples get the spotlight in 4-day festival

By Pam Petrow
Staff Writer

The 30th annual Murphyboro Apple Festival packed with parades, arts and crafts displays, music programs, apple bobbing and other contests, beauty pageants and a special "App-lympics" will begin at 7 p.m. Wednesday, according to Murphyboro Chamber of Commerce officials.

The four-day festival, held in downtown Murphyboro, will begin with a gospel music performance by the Murphyboro Ministerial Alliance.

FAA reindents former drug user as air controller

CHICAGO (AP) - The government reinstated an air traffic controller three days into the controllers' strike, unaware that he had once been convicted a heroin dealer and former drug user, officials said Tuesday.

The Federal Aviation Administration was unaware that Clyde Campbell, 39, had been sentenced in Atlanta last year for selling heroin and spent time in a federal prison.

Campbell was not working as a controller at the time of his arrest, his lawyer, John Goger, said Tuesday.

Campbell pleaded guilty to selling heroin and was sentenced last year. Goger said for cocaine he used to relieve the pain from hip injuries received in a 1976 car accident.

Campbell was reinstated Aug. 4, three days after the Professional Air Traffic Controllers Organization initiated an illegal nationwide strike.

The strike was called in protest of the two-step remedy's inability to improve the controllers' working conditions.

Holtsberg, when asked if he had ever used drugs, said "that's something we're looking into now."

Beg your pardon

In Tuesday's Page 5 Daily Egyptian article on the alcohol fuel conversion process devised by three SIU-C professors, it was stated that Don McClary is an associate professor in microbiology. McClary is a professor in that field.

High rates can help outpace inflation...

By Owen Ullman Associated Press Writer

WASHINGTON -- Amid all the eviscerated blame on high interest rates and the resulting blessing for millions of Americans who are saving, the nation's savers now are earning far more by other means, such as money-market funds.

So while President Reagan, business groups and would-be homebuyers lamented the high cost of credit, the nation's savers can still take pride in their good fortune and hope that little interest rates stay high.

"Millions of Americans, particularly in the older age categories, are enjoying--perhaps for the first time in their lives--a high market rate of return on their savings," said President Reagan's chief economic adviser, Murray L. Weidenbaum, said Monday, "There are winners and losers from high interest rates," observes Alan Green- span, a New York investment consultant who was the Ford administration's chief economic adviser. "However, there are many more losers than winners.

The biggest losers include homeowners, retailers, home- sellers and home-buyers--all of whom are suffering because of record mortgage interest rates approaching 18 percent.

Savings and loans are another group of major losers because they are stuck holding so many low-interest mortgages which forced to pay top rates for new funds.

The Reagan administration also is a loser because high interest rates are doing to the president's plan for balancing the budget by '84.

High rates drive up government debt while driving down government revenues because of a slowdown in economic expansion that seems sure to result.

... Interest rate drop trend predicted

NEW YORK (AP)--Interest rates edged lower Tuesday for the fifth straight day, highlighted by a move throughout the banking industry to match a modest cut in the prime lending rate.

Rates in the bond and money markets prompted some economists to suggest rates may have already turned with little change for substantial reductions in record-high borrowing costs.

Economists believe the trend was aided by signs that the Federal Reserve Board is ready to relax credit reins. The Fed has sought to keep tight control to curb inflation.

Marketers said the Fed on Monday indirectly in- dicated it will continue tightening the money supply, a move that generally produces lower interest rates.

For example, the rate on federal funds--which strongly influences other short-term rates--traded in the range of 13 percent to 16 percent Tuesday. The rate averaged nearly 20 percent in early July.

Financial institutions were the overnight loans of uncommitted reserves costing high rates an important source of funds for financial institutions.

A large percentage of the lower rate, major banks reduced prime rates by one percentage point to 20 percent. The prevailing prime rate has been in the 20-to-20 percent range early May.

The prime rate is the quote banks use to calculate interest charges on short-term loans to top-rated corporations, but perhaps 1% percent--many savers now are earning far more by other means, such as money-market funds.

When the economy was in recession, the prime fell to 4% percent from a year earlier, according to the business information firm Dun and 17 percent to 38 percent.

Bond prices edged higher on Tuesday with some corporate issues up 1/8 point, or $7.56 for each $1,000 in face value. Bond prices usually move inversely to inter- est rates.

Some economists suggested the Federal Reserve was making credit slightly more available in reaction to congressional lobbying for lower interest rates and Republican concern about the impact that pay rates based on Treasury bills. Some of those yields are running above 18 percent.

Interest rates also are buying treasury bills directly or buying bank certificates of deposit that pay rates based on Treasury bills. Some of those yields are running above 18 percent.

Savers are also buying treasury bills directly or buying bank certificates of deposit that pay rates based on Treasury bills. Some of those yields are running above 18 percent.

Among the most visible winners are the nearly 10 million in- dividuals in money-market funds and the fund managers. Virtu- tally unheard of seven years ago, the funds have become the fastest-growing investment vehicles of the 1980s, with assets of $91.5 billion--more than double what they held at the start of this year.

The funds pool investor savings to purchase Treasury bills and other short-term securities unavailable to small savers. The average fund is currently paying more than 17 percent annual interest.

Students in search of job information may be able to find it at the Career Day in the Student Center Ballrooms from 9 a.m. to 4 p.m. Tuesday.

The event, sponsored by the Career Planning and Placement Center, will provide an opportunity for students from all majors to talk with representatives from government agencies, business and industry, according to Valerie Brew, professional placement consultant. About 70 organizations have signed up to date and more are signing up every day, she said.

Students can talk informally about job trends and opportunities with company representatives stationed at tables in the ballrooms, Brew said.

Students from all classes can benefit by attending, Brew said. Freshmen and sophomores can find out what fields have expanding job markets, while juniors and seniors may be able to make job contacts.

Although most of the representatives will be there primarily to provide information about their fields and companies, students' attendance at Career Day has led to jobs in the past, Brew said. Some companies bring applications with them, she said.

The staff of the Career Planning and Placement Center will also offer workshops in resume and letter writing at 8:30 a.m. and 2:30 p.m. in the Missions Room. Interviewing skills will be the subject of workshops at 9:30 a.m. and 3:30 p.m. in the same room.

Saluki Spirit Council reborn with new funding, joins SPC

By Vicki Olgraty
Staff Writer

The development of a new Student Programming Council organization, the Saluki Spirit Council, has been reinstated after a one-year absence from the budget rolls.

The new Spirit Council and the old SPC are responsible for coordinating and building student and community spirit.

The cheerleaders, pom-pom girls, pep band and Saluki musicians form the Spirit Council, and now fund-raising in a variety of athletic fee funds, according to Bruce Sweeney, president for student affairs.

Also included in the council's budget is $2,995 provided by the state for the care of the Saluki dogs, and in the office of the chairman of the council.

The cheerleaders were removed from the basketball budget last year before the council was reinstated. The cheerleaders and the Shakers, the pom-pom squad, had to "call whenever they could think of it to ask for funding," said Mindy Duggan, assistant coordinator of the University programming office. They also relied on fund-raising activities.

The cost of uniforms, advertising and travel are the major expenses of the council. Duggan said the sale of shakers at games will also supplement the budget. Duggan said.

The Spirit Committee was born out of the Spirit Council. said Calvan Barnes, chairman of the committee and council. The council, together with the Marching Salukis and representatives from student affairs, athletics and University programming, provide advisory input to the committee.

"The committee is geared toward the SIU student," Duggan said. Its activities are planned to give students an outlet to express and build their spirit.

The committee is split into two groups that are not mutually exclusive, Barnes said. A very small group of students is involved in planning spirit activities, and participants make up a much larger group. Duggan said anyone is welcome to join the committee and that a student doesn't have to be on it to get involved.

It is the responsibility of the committee to coordinate and plan pregame and halftime activities for men's and women's athletics with the Spirit Council members and the other representatives, Barnes said.

The committee is run by students in a similar way that the other SPI committees are managed, said Bruce Zimmerman, director of University programming coordinator. "The students make the decisions and move with them," he said.

Barnes said the cooperation from both athletics departments has made the committee's job easier. "It's not a matter of a need for it, but always there," he said. "It's a need for programming," Barnes said.

The "fleet," according to Guthman, includes any Fluyt Juniors, which are 14-foot sailboats with two sails, and added that the club will be getting another of these boats next week.

Swinburne said that the committee should have a synergistic effect through its interaction with the other SPI committees. It will see double places to encourage spirit than just ball games, he said.

The committee will not open lines of communication and in its plans with other campus and town organizations. Zimmerman said. "The more you see the cheerleaders, the more you incorporate spirit in students," he said.

It's virtually impossible for the 12 members of the volunteer squad to cheer at all games. Zimmerman said. There is no financial compensation for their time, he said, and it usually costs them money in the long run.

The committee is planning activities such as spirit rallies, banner contests and various sports, and games.

Sailing Club to meet Thursday

The Southern Illinois Collegiate Sailing Club will meet Thursday to orient new members to activities and privileges offered. Also, persons interested in joining may sign up at the meeting, which will be at 8 p.m. in Lawson Hall, room 211.

Club treasurer Greg Guthman said the orientation will be for any students who signed up Saturday during the "Free Sail Day" at Crab Orchard Lake.

"We weren't that successful in getting many new members Saturday because our current members were busy sailing with people who came out. Because of this, we thought we'd invite people to come Thursday who might have been interested in joining the club Saturday but couldn't," Guthman said.

Guthman said the membership fee is $15 per semester. He said a membership entitles a person to free sailing instruction, use of the club's "fleet," and use of the organization's clubhouse, located at the end of old route 13.

EARN OVER $800 A MONTH.
AND OPEN THE DOOR TO A TOP ENGINEERING FUTURE.

How many corporations would be willing to pay you over $800 a month during your junior and senior years just so you'll join the company after graduation? Under a special Navy program we're doing just that. It's called the Nuclear Propulsion Officer Candidate-College Program. And under it, you'll not only get great pay during your junior and senior years, but after graduation you'll receive a year of valuable graduate level training that is not available from any other employer.

If you are a junior or senior majoring in math, engineering or physical sciences, find out more today. And let your career pay off while still in college.

For more information, sign up at your placement office. Interviews will be held on 23 Sep 1981.

Festival to feature three cycling races

By Bob Marand
Student Writer

The Murphysboro Apple Festival opens Wednesday and will have bicycle races for the first time in the festival's 20-year history.

The races, sponsored by the SIU-C Phoenix Cycling Club and Phoenix Cycles of Carbondale, will begin at 5:30 p.m. Saturday. Two novices races and an United States Cycling Federation race will begin between 5:30 and 6 p.m., according to USCF member and SIU-C senior Dan Casebeer.

The one mile course, Casebeer said, runs through downtown Murphysboro, with the first novice group, 18-year-olds and younger, racing a four-mile heat at 5:30. At 5:45, a six-mile novice race, for those over 18 years old, will begin. The USCF members compete in a 25-mile race.

Casebeer, eight-time Illinois State Cycling champion and fourth place finisher in the USCF nationals in New York this past August, said racers from St. Louis and Champaign will also compete.

"Hopefully, at least 50 USCF racers will race Saturday," Casebeer said. "However, since this is the race's first year, we're not too worried about the number who compete."

Casebeer said 10 to 15 members from the SIU-C Phoenix Club will compete, although most are not USCF accredited.

Fielders lose two matches

The SIU-C field hockey team opened its season with a 5-3 loss to Indiana University and a 4-0 loss to Purdue in two overtime.

The Salukis outshot the Hoosiers 39-18, but were stymied by the goalkeeping of freshman Cindy Songer, who batted away 14 Salukis shots Saturday. Freshman Lisa Conzel and sophomores Pam O'Laughlin shared goalkeeping duties and made five saves.

Junior midfielder Barb Smith scored twice and forward Ellen Massey once for the Salukis.

The Salukis and Hoosiers were tied 1-1 at the end of regulation time Sunday, forcing an overtime period, which ended in a 2-2 tie. Purdue scored twice in the second overtime period to win 4-2.

Conzel played the whole game for the Salukis, saving six Purdue shots in regulation and two more in overtime. The Salukis had 12 shots.

Smith scored another goal, putting her one goal shy of Debbie Falk, the No. 3 all-time scorer in SIU-C history. Forward Cindy Davis also scored.

"Many of our members are not race enthusiast," he said. "Some are strictly tour cyclists, who enjoy the challenge of competitive racing from time to time."

According to festival chairman Marion Nash, activities throughout the four day festival range from an apple core throwing contest to a fiddle and banjo playing contest. The Apple Festival culminates Saturday night with the crowning of Miss Apple Festival.

"We expect about 30,000 to attend this year," Nash said, adding that people who do attend should be prepared to eat a lot of apple pie. As for the cyclists, they hope to make the races an annual event, Casebeer said.

"We are hoping that many take part or at least watch the races," he said.

Hometown gridder rips apart offenses

By Rod Farlow Staff Writer

"Coaching staff looks forward to the upcoming Mic instead of season. Loves to play the game and enjoys contact. Should see much action this year." That's what the 1981 Saluki football coaches had to say about senior linebacker Tony Blyer of Carbondale. Press guides are often ridiculously optimistic, but Blyer's performances in the past two seasons have made understatements of the Saluki gridiron a thing of the past.

While he was 10th in tackles for the Illini last season, this year he returns with his enthusiasm and athletic ability. Blyer, a two-year starter, led all Big Ten conference stops in this one category. He lists as his catalyst for returning to the team this year the camaraderie and team spirit which take place in the defense when they are all together on the field. Blyer said, "The defense will be together. Against the Salukis, McNeese State's 'D' was broken down to its worst in nearly 1,000 yard and McJunkins gained 292. It's hard to believe the Aggies are playing the Aggies next year. There are very few teams the players are more familiar with than our team."

Locke prefers to keep "The Saluki defense is part of a team. Locke said. "The team and me and the rest of us try to make our own defense. We try to make the mistakes, so you don't hit the ball out." Locke said. "I do not hit the ball out of the game. It's faster than the hardest sports to play because of the technical know-how. You have to learn to do it. Locke said. "The ball, be able to see two blockers across the net at the same time and know what you body so you don't hit the ball out. Locke said. "I've been given really important duties along with my hitting duties but doesn't mind the added responsibilities." Locke said. "I prefer hitting but setting takes a lot more effort." Locke said. "I could be a four-year player playing with some things. I will work at it, knowing we could use our 6-0 defense at anytime." Saturday's match against the world junior champion Korean team is a challenge Locke thinks the Salukis can meet despite the fact it follows two days of tournament play. Locke said, "When we're playing we'll be doing better than last year. I know we could give them hell if we had a lot of rest."
