Halloween band funding discussed

By Jackie Hampton

Staff Writer

Bands will play on South Grand Avenue during the Halloween festival Oct. 30-31. The Halloween Core Committee decided Wednesday. However, it is still grappling with who will sponsor the bands, who will be involved in presenting them and how much will be spent to pay them and rent a sound system.

Several proposals are before the committee.

One of the latest two proposals includes sponsorship by a St. Louis brewery. The American Marketing Association, a Registered Student Organization, has been negotiating with Anheuser-Busch Co. to sponsor two bands, prizes for a costume contest and prizes for a battle of the bands featuring four local groups.

Gary Gibullia, a reporter for WCIL-FM, radio, offered to provide one band and the WCIL recorded music show each night of the festival for $2,000. A sound system for the bands will be provided in the package, he said.

Both cases, security for the event would be provided by the city or University community.

Regardless of outside sponsorship, the Chamber of Commerce will provide $3,000 to pay for entertainment on South Grand Avenue to draw part of the crowd from the Strip downtown, Jim Frewell, See HALLOWEEN, Page 6

Abortion bill may change patients' rights

By Deedra Lawhead

Staff Writer

Do doctors have the right to withhold information from a pregnant woman to prevent her from having an abortion?

Celebrations, views and facts about Constitution

— Pages 4-5, 10-12

A bill that allows doctors to withhold information about diagnostic tests sits on Gov. James R. Thompson's desk.

Thompson has until Sept. 20 to sign or veto the bill that amends the 1977 Illinois Right of Conscience Act, which prevents patients from suing doctors who refuse to perform non-emergency treatment they are morally against.

The amendment extends the act to include the doctor's refusal to "perform, assist, counsel, suggest, recommend, refer or participate in diagnostic testing to detect fetal abnormalities which may lead to an abortion, regardless of whether such tests are considered routine or normal practice."

Amniocentesis and chorionic villus sampling are two of a wide range of diagnostic tests that can be performed on fetuses to detect Down's Syndrome, spina bifida, Tay-Sachs disease and other abnormalities.

Although questions have been raised about the constitutionality of the law, their right hands raised and recited the oath together. Then as the last words faded, those people who had once been citizens in countries such as India, Iran and the Philippines were united as the room filled with thundering applause. They had become Americans.

President John C. Guyon speaking to the new citizens said that it was "an auspicious day. He also spoke of the special meaning the ceremony held for him as his own life," said Sumitha's father, Bobby Joe Fisher of Pinckneyville.

The Fishers were in the School of Law auditorium Wednesday to let Sumitha, a native of India, participate in the naturalization ceremony as about 50 people from 18 different countries were sworn in as U.S. citizens.

The ceremony was the first of its kind to be held in Carbondale and was in honor of the Bicentennial of the signing of the U. S. Constitution.

Welch said that when parents were interested in the academics of the school.
**Israeli Defense Forces clash with Arab guerrillas**

HABAYA, Lebanon (UPI) -- Israeli troops on patrol in southern Lebanon clashed with Arab guerrillas in fierce battles that killed three Israeli soldiers and at least five guerrillas, military and police sources said Wednesday. The Israeli death toll in the Tuesday night clash was the highest in one incident since Israel withdrew the bulk of its forces from Lebanon in 1985. Israeli military sources said: State-run Israel Radio said the clash occurred when an Israeli patrol discovered a band of guerrillas and called in reinforcements.

**Philippine official resigns over disagreement**

MANILA, Philippines (UPI) -- Vice President Salvador Laurel left his Cabinet post as foreign secretary Wednesday in a dispute with President Corazon Aquino about handling of the 18-year communist insurgency, which he said had turned the Philippines into "a house on fire." Aquino, speaking on government television, announced she had accepted the resignations of Laurel, Finance Secretary Jaime Ongpin and the commissioners of customs and immigration.

**International ozone protocol agreed upon**

MONTREAL (UPI) -- Forty-six nations, including the United States, European Economic Community members and Japan, adopted the first international protocol Wednesday on conservation of ozone, the vital layer that filters ultraviolet radiation. The U.N.-sponsored agreement is the main measure taken so far to control worldwide production of chlorofluorocarbons (CFCs), an industrial chemical that destroys ozone.

**Moscow bus drivers on strike over wages**

MOSCOW (UPI) -- Bus drivers in an industrial town south of Moscow have staged an unprecedented strike to protest economic reforms that would have reduced their pay, a newspaper reported Wednesday. The walkout in Chekhov, 40 miles south of Moscow, was an apparent reaction against the type of measures Soviet leader Mikhail Gorbachev has been proposing to combat economic stagnation.

**Pope tells followers 'conform or be excluded'**

LISBON (UPI) -- Pope John Paul II, in one of the bluntest exchanges with his bishops ever made public, told U.S. Catholics Wednesday to conform their sex lives to church teaching or face exclusion from the sacraments. John Paul addressed his remarks to the nation's 300 Roman Catholic bishops at the San Fernando Mission. Only the prepared texts of the pope and the four bishops who made formal presentations were made available to reporters.

**Bork defends role in Watergate 'massacre'**

WASHINGTON (UPI) -- Supreme Court nominee Robert Bork defended his role Wednesday in Watergate's "Saturday Night Massacre," and denied he acted illegally in carrying out Richard Nixon's order to fire special prosecutor Archibald Cox. Bork, appearing for a second day at his confirmation hearing before the Senate Judiciary Committee, relived the traumatic events of Oct. 20, 1973, when, acting on orders from President Nixon, he dismissed Cox after his two superiors at the Justice Department resigned rather than fire him.

**U.S. to reduce naval force in Persian Gulf**

WASHINGTON (UPI) -- Navy Secretary James Webb said Wednesday the United States will reduce its naval force in the Persian Gulf when Iran recognizes the right of nations to operate in international waters and U.S. allies commit warships to the region. He could not predict when those conditions would be met. Webb held a news conference to give his assessment of the Gulf situation following a three-day visit to the region that included talks with senior Bahraini officials and stops aboard seven U.S. warships, which he inspected "from the bridge to the bilges" to witness U.S. policy being carried out.

**Legality of independent counsel law doubted**

WASHINGTON (UPI) -- A federal appeals court sound serious doubts about the independent counsel law Wednesday, and the target of one probe claimed he was the victim of a "dual system" of justice that violates the Constitution. Comparing the sweeping powers of a court-appointed independent prosecutor to those of a monarch, attorney Thomas Martin told the U.S. Circuit Court of Appeals for the District of Columbia that the ethics law violates the Constitution's separation of powers clause and should be struck down.

**Daily Egyptian**

Published daily in the Journalism and Egyptian Laboratory Monday through Friday during regular semesters and Tuesday through Friday during summer term by Southern Illinois University, Communications Building, Carbondale, Illinois. Second class postage paid at Carbondale, Illinois.

Editorial and business offices located in Communications Building, North Wing, Phone 536-3211; Walter B. Jahang, fiscal officer.

Subscription rates are $4 per year or $25 for six months within the United States and $11 per year or $75 for six months in all foreign countries.

Chicago Symphony thrills Shryock audience

By Curtis Winslow
Entertainment Editor

The stage was crammed with musicians and the house was almost at capacity Tuesday night in Shryock Auditorium when the Chicago Symphony Orchestra played for Southern Illinois music lovers.

Although the orchestra has appeared at Shryock three times in the past 15 years, the last time in 1985, it's still a rare treat to have a symphony of the magnitude, magnificence and sheer size of the Chicago Symphony.

While Shryock's stage can easily accommodate musical acts from big band to punk, the size of the orchestra made the stage seem awfully small.

All of the orchestra's violins could not be set on the stage, even with an extension, so the orchestra had to delete a couple of positions for the concert, Mark J. Wetstein, Shryock stage manager, said.

As the audience came in, the bulk of the stringed-instrument players were on stage busily warming up, leaving some audience members to wonder "Why do they play on those things like that?"

Appletime schedule for today

Constitution series: university freedom

THE CONSTITUTION COMES into its own at a university.

The ideals of the 200-year-old document, which translate into the rights of the individual, are put into practice every day in a university community, and are a vital part of the functioning of a university.

As an ultimate melting pot, in a melting pot nation, are a place where students and faculty of vastly different cultural backgrounds gather. A plethora of cultures, ideas and attitudes can be explored and exposed.

It adds a richness to education that cannot be obtained in classrooms alone.

The educational diversity draws its strength from the guarantees of freedom in the Constitution. Without these freedoms, college would be a one-dimensional experience.

Imagine a classroom filled with people who all share the same attitudes, opinions, beliefs and religion.

THE CONSTITUTION ESTABLISHED a framework that permits academic freedom to exist for both students and instructors. It allows instructors to choose their own curricula, subject matters and teaching styles and it allows students to choose and attend the schools and classes of their choice. This freedom is necessary for a university as we know it to function — for without academic freedom, there could be no forum for a "free exchange of ideas," which is really what the university is all about.

As a place where traditional and foreign ideas are gathered, discussed, researched and modified — not only expressed — universities are given free rein by the protection of the Constitution.

AS THE CONSTITUTION serves to protect the interests of the people with the least power, American universities have embodied that ideal. In the 1980s, politically active students proved that when organized, speakers can come to speak on any topic, other universities have their own free-speech areas.

Opinions from elsewhere

Los Angeles Herald Examiner

When Ronald Reagan appointed his 13-member Presidential Commission on the Human Immunodeficiency-Virus Epidemic in July, experts wondered what territory yet another AIDS panel — especially one so marginally qualified — could possibly discover. The panel's two-day opening session has done little to quell that curiosity.

It's somehow fitting that a presidential forum should underscore the inconsistencies and contradiction in the Reagan administration's AIDS policy. At the hearing, Secretary of Health and Human Services Ossie R. Brown roundly denounced criticism of federal AIDS efforts, then allowed that he would be willing to listen to suggestions for the future — as if such harsh attacks were likely to invite any.

Thanks to his compassionate and sensible report on AIDS issued last year, Surgeon General C. Everett Koop's credibility on the issue is solid. As the result, Ronald Reagan can trust his own surgeon general's demonstrated wisdom on this plague, we fail to see how the superbly second-guessing of this particular panel will prove any more illuminating.

Opinion & Commentary

Freedom of the press a necessary aspect of the democratic process

FOR ALMOST 200 years the First Amendment has been a free press, as foreseen by the First Continental Congress, to shame and intimidate "op­ preive officers ... into more honorable and just modes of conn acting affairs." 

F) "Thomas Jefferson to The [are Roosevelt and from Woodrow Wilson to Richard Nixon, presidents have at­ tempted to silence the press. The First Amendment protected press exposure and criticism of their conduct of public affairs.

The First Amendment says "Congress shall make no law ... abridging the freedom of speech, or of the press." The Supreme Court has interpreted the bar to apply to the executive and judicial branc­ hes and since 1925 to the states.

THREE CLOSELY related constitutional anchors support the First Amendment:

First is the notion, ex­ pressed particularly by Jefferson and James Madison, that a democracy works well only if citizens are well in­formed.

"People who mean to be their own governors must arm themselves with the power which knowledge gives," said Madison. "A popular govern­ ment without popular in­ formation or the means of acquiring it is but a pro­logue to a farce of a tragedy, or perhaps both.

Second is the concept that the best means of judging among competing ideas is to put them to the test of the intellectual market.

The First Amendment, asserted Justice Learned Hand, "presumes that... that kind of authoritative selection. To many this is, and always will be folly; but we have staked upon it our all."

THIRD is the idea that the press is a watchdog. It is rooted in the belief, as Lord Acton put it, that power corrupts, and absolute power corrupts absolutely. There is a particular duty to be a watch­ dog of government because

Views on We The People

Robert L. Spellman

Viewpoint

WE LIVE in an age when American history is not studied as widely or deeply as it was in other eras. There is a tendency to forget that the First Amendment as we know it today emerged only after fierce legal battles.

While in practice the press had wide freedom, it was not until 1931 that the Supreme Court held that for a narrow national security exception governments could not censor the press.

In 1971, in the Pentagon Papers case, Justice Potter Stewart wrote that censorship for national security was permissible only if publication would "surely result in direct, immediate and irreparable damage to our Nation or its people."

THE PROHIBITION against censorship was an affirmation of what de Tocqueville had written in the 19th century.

"In countries in which the sovereignty of the people ostensibly prevails," de Tocqueville said, "the censorship of the press is not only dangerous, but it is absurd."

"When the right of every citizen to publish the government of society is acknowledged," de Tocqueville continued, "every citizen must be presumed to possess the power of discriminating between the different opinions of his con­ temporaries, and of appreciating the different facts from which inferences may be drawn."

The American revolutionists had grown at the British practice of taxing newspapers to make them too expensive for all but an elite to read. Not until after Sen. Huey P. Long had the

Page 4, Daily Egyptian, September 27, 1987
The 1931 decision on censorship and the decision on judicial criticism in 1944, 1945, and 1946. Sometimes freedoms are won by fragile margins. During the 1960s and 1970s the southern states used their courts to chill reporting about public issues. Hypocritical judges could not place strong prohibitions on censorship and misuse of libel laws to chill reporting about public issues and the decisions of public officials. Only if a journalist knowingly publishes falsehoods about a public official or if he has serious doubts about the truthfulness of the statements in a newspaper he publishes can the press be punished.

LATER, THE court said the press had the right to print what the government told it to print. A Florida law providing censorship of materials in the possession of a newspaper refused to provide a right of reply if the government opposed his election.

A "NEWSPAPER is more than an instrument of commerce, recreation or pursuit of news, comment, and advertising," said Chief Justice Warren Burger. "The choice of material to go into a newspaper and the decision to make as to limitations on the size and content of the paper, and treatment of public issues and public officials — whether fair or unfair — constitutes the exercise of editorial control and decision-making."

"It has yet to be demonstrated," Burger said, "how government censorship of the press can be exercised consistent with First Amendment guarantees of a free press, if they have evolved to this time."

The decision was an affirmation of the notion that rulers rule in their own interest and any government regulation of the press would be carried out in the interest of rulers rather than ruled. The GROWTH OF electronic outlets provided the underpinning this year for the Federal Communications Commission to abolish the fairness doctrine. This misnamed censorship policy spawned lawsuits which played a primary role in the demise of television's proud tradition of tough investigative and advocacy journalism.

Battles for press freedom are never over, but the Supreme Court has put in place strong prohibitions against censorship and misuse of libel laws. The battleground of press freedom has shifted in the 1960s to the right of access to information. In 1980 the Supreme Court said the public — and thus, the press — had a First Amendment right to attend criminal trials. The decision had implications beyond trials. Where there is a tradition of openness, the court said, there is a First Amendment right of access.

"This is a watershed case," said Justice John Paul Stevens. "Until today the Court has accorded virtually absolute protection to the dissemination of information or ideas, but never before has it squarely held that the acquisition of newsworthy matter is entitled to any protection whatever." The decision was a vindication of Justice William J. Brennan Jr.'s view that the First Amendment guarantee of robust debate on public issues can be given full meaning only if the debate is informed. Informed debate is possible only if there is a First Amendment right to information held by government. Otherwise, rulers will release only that information which serves their interests.

TECHNOLOGY HAS placed the press on the threshold, "a new era of newsgathering," said Justice Stevens. Satellite imagery offers the prospect of near real-time transmission of events occurring in far parts of the globe. The technology is on the shelf to transmit images that would show the numbers on the backs of football players.

American television, newspapers, and magazines have used satellite images of silkworm missile sites in Iran and Soviet military, nuclear, and space facilities. Obfuscation and concealment long were the tools of black Americans. In 1964 the Supreme Court held that libel laws could not be used to stifle criticism by the press of the conduct of public officials. Only if a journalist knowingly publishes falsehoods about a public official or if he has serious doubts about the truthfulness of the statements in a newspaper he publishes can the press be punished.

In 1974 when the Supreme Court ruled that libel laws could not be used to stifle criticism by the press of the conduct of public officials. Only if a journalist knowingly publishes falsehoods about a public official or if he has serious doubts about the truthfulness of the statements in a newspaper he publishes can the press be punished.

In 1980 the Supreme Court said the public — and thus, the press — had a First Amendment right to attend criminal trials. The decision had implications beyond trials. Where there is a tradition of openness, the court said, there is a First Amendment right of access. In 1980 the Supreme Court said the public — and thus, the press — had a First Amendment right to attend criminal trials. The decision had implications beyond trials. Where there is a tradition of openness, the court said, there is a First Amendment right of access. Because of more than 40 amendments to the First Amendment assures freedom of speech or witty saying; it is a tradition of tough investigative and advocacy journalism.

"This is a watershed case," said Justice John Paul Stevens. "Until today the Court has accorded virtually absolute protection to the dissemination of information or ideas, but never before has it squarely held that the acquisition of newsworthy matter is entitled to any protection whatever." The decision was a vindication of Justice William J. Brennan Jr.'s view that the First Amendment guarantee of robust debate on public issues can be given full meaning only if the debate is informed. executive director of the Chamber and secretary of the core committee, said.

The Carbondale Convention and Tourism Bureau had earlier donated $4,000 to the safety campaign, but it was reported at the August meeting as a $3,000 donation. That additional money brings the committee's budget to $11,500, not counting the $3,000 for bands that will be allocated later, Provoll said.

One problem with having a brewery sponsor the event, would be its request to allow beer at a booth near the concert site, Ed Burge, associate director of University Relations, said.

"AMA is proposing to put a beer booth on University property," he said. "I'm not sure if it is something the University would entertain."

Burge agreed to meet with the marketing club to review the proposal.

One solution would be to guarantee Anheuser-Busch a spot at one of four booths where the city will allow alcohol sales, Glenn Wright, a representative of the club, said. Those booths are located on Grand Avenue which will be very busy traffic during the festival, and are not on University property.

The rights to those booths have been awarded to holders of local liquor licenses through a lottery system in the past.

"With a lot of problems to be worked out, we will have bands both Friday and Saturday night," Provoll said. "I ask that Ed meet with (Student Programming Council) and give us a list of things we need to do."

SPC also has several proposals to provide entertainment, but it has been waiting until funds were available before it made them, Sandra Moore, coordinator of University programming, said.

In the past, SPC has provided $6,000 through a sponsorship by Miller Brewing Co., but this year Miller pulled out of its music series. SPC also lost $28,000 in state funding through budget cuts imposed by Gov. James R. Thompson.

"We have been on Grand Avenue for some time and we haven't had any conversation about these new proposals," said.

Services set for sociology professor

A memorial service for Herman R. Lantz, professor emeritus of sociology at SIUC, will be held at 3:30 p.m. on Sept. 24 in the Student Center Auditorium. Lantz, died May 24, 1987, at his Carbondale home at the age of 67.

Mr. Lantz retired in 1965 after 34 years with the University. He was a driving force in developing the Department of Sociology, graduate programs, and organizing the University's first foreign exchange programs.

The Mayo Foundation is receiving special contributions in Mr. Lantz's memory. Gifts may be directed to the Development office, Mayo Foundation, Rochester, Minn. 55905.

Course to teach official etiquette

The Division of Continuing Education if offering a course titled, "Right Fork, Wrong Spoon: Etiquette For Those On Their Way Up."

The course attempts to pinpoint the distinguishing characteristics of men and women and how these characteristics affect their success in their corporate and social lives.

The course is for those who want to learn dining etiquette, restaurant do's and don'ts, and office conduct with peers and supervisors, entertaining business acquaintances, and how not to be the "ugly American" abroad.

The course will meet from 7 to 9 p.m. Thursdays in Quigley Hall from Sept. 17 to Oct. 8. Registration is $24.

To register, call Jane Evers at 536-7531.

Exactly what is 'cruel and unusual'? Court: Death penalty is not unconstitutional

By Deedra Lewhead
Staff Writer

A disobedient child could have been sentenced to death when the Constitution was written.

It probably never happened, but the possibility existed.

The framers did not outlaw the death penalty in the Constitution, and it was widely accepted and practiced in the states, Robert Clinton, assistant professor of political science at SIU-C, said.

People who believe the Supreme Court should outlaw it say its use is discriminatory, cruel, a form of vengeance for society and the framers never outlawed the death penalty.

Three-fourths of the states impose the death penalty. To be sentenced to death, a person must be convicted of premeditated murder.

Illinois, which has 106 men on death row, has one of the four most populous death rows.

SINCE JANUARY, 24 prison inmates have been executed under the death penalty in the United States, according to figures supplied by the Illinois Constitution Project.

The Death Penalty. Eighteen men were executed last year.

This past was a result of the Supreme Court's ruling this year in the McClesky v. Kemp, said Rebecca Tramell, assistant director for the coalition.

In the McClesky case, the Supreme Court was presented with statistics that showed blacks who killed whites were more likely to receive the death penalty than any other group, Tramell said.

The court ruled that although in practice the death penalty appears to be discriminatory, the death penalty is not unconstitutional. Discrimination has to be proven in individual cases.

Many inmates on death row around the country have challenged the decision, Tramell said.

One professor of criminal law at SIU-C, said many of those sentenced to death were white and not affected by the Supreme Court's decision.

The NUMBER of executions will continue to rise as more and more inmates who were sentenced to death exhaust the appeals process, Tramell said.

Many criminals on death row were convicted 10 to 11 years ago, and a backlog exists throughout the nation, Shroeder said.

Discrimination in imposing the death penalty has also been before the 1972 Furman v. Georgia case.

In that decision, the Supreme Court voiced its dislike for the death penalty in 39 of the states that imposed capital punishment because the system was arbitrary and imposing the death penalty.

In the case of Thompson v. Georgia, 1976, the Supreme Court reinstated the death penalty in 35 states after the states provided guidelines for juries in sentencing a criminal to death.

The guidelines specified for juries to impose the death penalty when committing more aggravating circumstances, such as a murder committed in the course of committing another felony including kidnapping or armed robbery, exist.

The state Supreme Courts must review all cases where the death penalty is sought to assure that two courts will come to the same decision.

THE WORDING of the Constitution lends itself to different interpretations.

In the Fifth amendment, the Constitution states that no person can be deprived of life, liberty or property without due process of law.

That means that a person cannot be fined, executed or jailed without a fair trial, Clinton said. However, after a fair trial, a person can be fined, executed or jailed.

The 14th amendment applies the due process clause to the states.

In the double jeopardy clause, the Fifth and Sixth amendments also state that no person shall be put in jeopardy of life or limb.

A person can be put in jeopardy of life just once for a particular crime, Clinton said.

The Eighth amendment, which prohibits cruel and unusual punishments, causes the most uproar between advocates for and foes of the death penalty.

If the Constitution is unclear on some points, the Supreme Court interprets it in the best way the framers intended, Clinton said. "It's fairly clear they didn't mean to outlaw capital punishment in the United States, until today.

The framers were against torture and ransom, pointing out people for special treatment, but they were not against the death penalty, Shroeder said.

Document has adopted through the years

By Eric Oestmann
Staff Writer

On Sept. 17 the U.S. Constitution is 200 years old, but it is still considered by two SIU-C professors as vital to our political system.

The U.S. Constitution is the framework of the government system and sets a principle for "all free men."

The document has grown over time and adapted to the needs of those times and is admired greatly by other governments and people, Meleone said.

Although it is a great document, Meleone argues its principles are not always upheld in the real world.

"One problem with the document is that too many people treat it like the Arc of the Covenant and block ideas of change, Meleone said.

The Constitution is being opposed to a new Constitutional convention because they think it is the only way we have a government that will work, Meleone added.

The Constitution should not be a time to look backward, but a time to look forward to a better world, Meleone said.

Some policies the Constitution could change are whether to abolish the electoral college, deciding how long presidents, senators and representatives serve and whether judges should be elected or appointed, he said.

"The Constitution was very weak when it was first instituted, but it naturally grew like a baby getting bigger, stronger and smarter," Robert Clinton, assistant professor of political science, said.

"The Constitution sets the tone for everything we do either directly or indirectly," Clinton said.

The document is flexible because it directly assigns certain powers to the federal government and while denying some states, it leaves other powers strictly up to these states to assign, Clinton said.

Two small provisions in the Constitution, which have had powerful effects on the political system and people in general, he said.

Part of the 14th amendment states "No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States, nor shall any State deprive any person of life, liberty, or property, without due process of law."

This part of the 14th Amendment, which was established after the Civil War, has been most influential in recent years with civil rights police and, such as racial balancing and busing, he said.

"The 14th Amendment promised economic growth in the national government because it allowed Congress to tax and spend only when it sources derived," Clinton said.

It would have been difficult for the government to grow if it was not for the income tax provision, he added.

With the elementary school districts, the Education Commission is planning a "We The People" Decennial, Clinton said, which will be held at Shroylock Auditorium.

The commission is planning events from Carbondale elementary school singing "The Star Spangled Banner," a woodwind quartet from the Chicago Symphony, and a fact about every state.

In November, the commission will hold a Jefferson Meeting. Discussion will center around problems and principles of the Constitution.

Any adult who wishes to be a delegate at the meeting, which will be held on Nov. 6, 7 and 8, can apply at the city clerk's office.

The Carbondale Park District will hold a 20th birthday party for the U.S. Constitution Sept. 20 rain or shine.

Apple Festival

The 36th Annual MurphyApple Apple Festival will help celebrate the bicentennial anniversary of the signing of the United States Constitution with a patriotic musical tribute.
Little known facts pulled from a stormy past...

By Mary Wfieniewski
Staff Writer

"What was the occasion of the confusion? Is it the federal constitution? Will people now be harmonized, at least, toward what the Great Convention's actuated?" - from the Massachusetts Gazette, Nov. 13, 1787.

The path from a post-revolutionary anarchy to the U.S. government was rocky at best. As the founding fathers bickered over trade laws in the hot and smelly Philadelphia State House, Anti-Federalists without howled that a document was being formed without the people's consent.

The following is a list of facts about the history of the U.S. Constitution.

1. "The We the People" mentioned in the Constitution's preamble referred to a very small sector of the country. Only white landowners who showed up to vote on the Constitution's ratification, and three-quarters of those favored few, did not vote due to a lack of interest.

2. One of the biggest incentives that led to the drafting of the Constitution was that the Supreme Court had declared the original post-revolutionary law of the land, the Articles of Confederation, as unconstitutional. Northerners and Southern delegates believed that such a "rude" word would "stun" the document.

3. The Constitutional Convention was so secret that not even state judges were allowed into the sessions, and all doors and windows were kept shut during the long, hot Philadelphia summer.

4. North Carolina and Maryland delayed ratification because they were involved with similar problems.

5. The Constitution helps rather than hinders the right of a person to a speedy and efficient trial.

6. The First Amendment, which protects the First, Fifth and 14th Amendments, encompasses the press, encompasses the right of a homeowner to keep his doors unsecured, and the Constitution does not guarantee that God and Christianity were not supported in the document. North Carolina in particular was known for its pro-Jewish, pro-heathen, and pro-pagan stance. The Constitution does not mention anything about our Madision's secular-minded attitude.

7. The Anti-Federalists, who believed the founding fathers held "aristocratic interests," considered the Constitution a "bargained-off" document from the convention delegates. Called "the price of compromise," on cheating their creditors, the Anti-Federalist campaign was perhaps most responsible for the addition of the Bill of Rights.

Constitution relevant to students

By Robert York
Staff Writer

Although the American Constitution applies mainly to federal powers, the University's faculty ombudsman finds several ways in which it pertains to the campus environment as well.

The Constitution is relevant in concrete ways, with the University serving as the State University of the State of Illinois, as well as an educational institution. The Constitution involves the First Amendment, the protection of the First, Fifth and 14th Amendments, the right of a person to a speedy and efficient trial, and the right of a person to be free from cruel and unusual punishment, among others.

By Tracy BartonI Staff Writer

"Go ahead. Make my day."

The box-office bonanza movies starring Clint Eastwood or Charles Bronson often portray police work as a dangerous and frustrating career.

Homicidal or psychotic criminals get off on technicalities. Directors and writers in these movies, leaving the moviegoer with the impression that police officers view the world as though students from the block to their investigations in pursuit of justice.

Three local police officers say this image of the police is not real and the Constitution helps rather than hinders their investigations.

Police protect an individual's rights and doing a more thorough job in investigations is the function of constitutional police officers, as best seen in the view of three local police officers.

By Catherine Simpson
Staff Writer

On a typical day in the Student Center, hundreds of students can be heard speeding a dozen foreign languages. True, many of these students are in a rush, as contrasts with that of the majority, the outfit of a typical Midwestern student. Faces in the crowd are those of people from the Orient, Europe and Arabia, as well.

Outward appearance is the only contrast among the diverse student population. Some come from cultures that the U.S. students consider barbaric. A student from the United States regard this country as the land of the free and the Constitution as its foundation, some from foreign countries don't agree.

Some never heard of the Constitution. They do not understand its concept, that of an individual's freedoms to be secured by the nation. Others see our freedoms as too broad. To some, there isn't much difference between their own country.

Adulthood, a graduate student, economics from Malaysia, thinks "maybe they're too much freedom. Humans need to be governed by some set of laws," he said.

"I like to be able to express my ideas," she said. "I think the government should do what I want to do." Norbert DeAllass, a graduate student in secondary education from Malaysia, says, "Here, because everyone has his or her own ideas, everything. In Malaysia, she said, it isn't published if it's embarrassing to government."

DeAllass also feels there may be too much freedom. "We have to have laws or the country will be in chaos," she said. "It's really difficult when everyone is given freedom. It brings you a lot of problems. It's a good and bad, sometimes it's just a problem and sometimes it's good."
ABORTION, from Page 1

stitutionality of the bill, it passed both the Senate and House.

State Sen. Ralph Dunn, R-Du Quoin, abstained from voting on the bill. "It was one of those bills you just can't win," he said.

Although he usually supports pro-life and is against abortion, Dunn said, "I thought that (the bill) went a little far beyond pro-life.

"It is right for a doctor to withhold information," he said.

"Doctors ought to tell patients the truth," Dunn said. "That's what doctors are for."

Rep. Bruce Richmond, D-Murphysboro, who voted for the amendment said he has no strong feelings about the issue, but feels the doctor has moral problems with a procedure, he should be relieved of that obligation.

The amendment should be done at the federal level, Richmond said, The Supreme Court has indicated that states should not deal with abortion laws.

Sheffield Boardman, a Carbondale internal medicine physician and director of the Christian Action Council, said although he is pro-life he believes the amendment is unconstitutional.

"It's unconstitutional to deprive them (patients) of information," Boardman said. "It's absolutely wrong. If they misuse or make a bad decision it's the doctor's responsibility.

"The bill is interfering with the doctor-patient relationship," he said. "It is encouraging a less than honest relationship.

"I'm all for legislation stopping abortion, but the end never justifies the means," Boardman said. "A doctor who is less than forthright with his patient is doing it immorally."

If the tests proved a baby was horribly deformed, the woman could prepare for a tragic situation by seeking counseling, he said. Hopefully, the mother would not abort the baby, he added.

"Doctors ought to tell patients they are being deceived by giving them false security," Boardman said. "Some people would rather not know, but most want to."

Rose Marie Nowacki, member of the Jackson County Right to Life, said she believes the bill is constitutional, and she approves of the amendment.

"Anything that would possibly curtail abortion is good," Nowacki said. "I believe in the right of conscience."

"Most of those tests (diagnostic tests) are used to give people a choice of whether to get an abortion," she said. "I'm sure there have been many instances where the baby that had been aborted didn't have abnormalities or not as severe abnormalities as was thought."

If problems or abnormalities can be corrected in the womb, diagnostic testing is good, Nowacki said. If a doctor was in his right conscience, he would perform those tests on the unborn fetus if the tests would save it's life, she added.

Linda Gannon, director of Women's Studies and a psychology professor at SIU-C, said the amendment is unconstitutional in the same sense as withholding any medical information from a patient is unconstitutional.

"(The bill) takes free choice away from the woman giving that responsibility and power to a doctor, which he should not have," Gannon said.

Gannon said she thinks there will be a lot of inequities because some doctors would inform their patients and some wouldn't.

Some doctor may decide not to tell the patient who is poor and on welfare about the tests to save the state money, she said.

Cathy Devera, sexuality counselor at the Wellness Center, said it is a physician's duty to medically inform patients, and patients can take that information and make their own choices.

She said her pro-choice views enable her to inform pregnant women to come to her for counseling with the alternatives so they can make a choice with which they will be comfortable.

"If a woman is in a high-risk category, it's very important for her to see the life of her child to get all the accurate information and make her own choices of what to do with it (the information)," Devera said.

SOCIETY FOR Creative Communication will hold a discussion featuring Pete A. Y. Gunter, executive director of the Foundation for the Philosophy of Creativity, from 3:35 to 4:50 p.m. today in Communications 1018.

ORGANIC JOURNAL Club will meet at 4 p.m. today in Neckers 218. SPC FINE Arts Committee will meet at 5 p.m. today in the Student Center Activity Room 21. New members are welcome.

ZOOTOLOGY DEPARTMENT will sponsor a lecture on "Functional Neuroanatomy: How Did It Become a Semantic Jungle?" at 4 p.m. today in Life Science II, Room 430.

AMERICAN MARKETING Association will meet at 6 p.m. today in Lawson 221.

STUDENTS IN the Illinois News Broadcasters Association will meet at 7 tonight in Communications 1046. Len Robbins, a photographer for KFVS-12 television, will be the guest speaker.

CAMPUS CRUSADE will meet at 7 tonight in the Cottage. New members are welcome.

RUSSIAN CLUB will have a picnic at 1 p.m. Sunday at the Campus Lake Boat Dock. New members are welcome.

SOUTHERN COUNTIES Action Movement needs donations for a yard sale to be held Friday. Donated items can be delivered to the SCAM office in the Herrin post office from 9 a.m. to 6 p.m.

PARENTS’ WEEKEND information for juniors and seniors is available at the SPC office. If you want a brochure mailed to your parents, call SPC at 538-2991.

FRIENDS OF Morris Library will hold a book sale from 9 a.m. to 3 p.m. today and Friday in the Morris Library Browsing Room.

HOPHEWELL BAPTIST Church, 490 E. Jackson, will celebrate its annual Women’s Day with a special program at 4 p.m. Sunday.

THE TI-74 offers BASIC programming with a 113 BASIC level text. There’s TI’s, Constant Memory and subroutines capability for advanced programming flexibility.

The TI-95 offers powerful 7220 and keystroke programmability and features our exclusive Power Window,” which provide easy access to the functions and fields the management needs.

TI programmable calculators have all the right functions and enough extra features to satisfy your thirst for power. To all you science and engineering majors unsatisfied with mere calculators, TI has good news. Your power tools are here. The TI-95 [R]OCALC” is keystroke programmable and the TI-74 [R]ACALC” is BASIC language programmable. Each has a full range of scientific, mathematical and statistical functions, and plenty of power extras.

Both have optional equipment such as Solid State Software modules, including math, statistics and chemical engineering, and a module with an additional 8K Constant Memory. Additional power accessories include a separate portable printer and cassette interface.

So, you’re into power; look for the display in your bookstore for a demonstration of our power tools. They build such a strong case for themselves, our competition doesn’t know what to make of them.

Both Salukis and Dorr need to win big in the worst way

Who would've expected the Salukis to be 0-2 after playing a Division II team and another team picked dead last in the Gateway Conference? Certainly not SIU-C coach Ray Dorr, who staked SIU-C's hopes for a win in the worst way.

"We're starting the season with goals of a national championship," Dorr said before the season started. "Before we just tried to win games. Now we're just starting out looking for a little bit more."

With Dorr's outspoken confidence, with his promises that this team would be better than the '96 version, fans overlooked looming question marks and began thinking that SIU-C had finally defeated the roller-coaster known as inconsistency. But now the Salukis sit at 0-2. Next week, they face Austin Peay, a team that downed Big Eight Kansas State. The following week, they'll play perennial I-AA power house Arkansas. Next following week, they'll play Michigan. The following two Big Eight games will be against Peay, a team the Salukis to win. That's a sobering thought when the first two games were supposed to be easy wins.

Being mentioned in the seven consecutive NCAA polls won't help the Salukis salvage a respectable season. They'll have to work hard, and they'll have to have a little luck. It would take wins in all five of the remaining conference games to keep any playoff hopes alive. Or at least: seven wins in the last nine games, which would put SIU-C's record at 7-4, a record not good enough to land SIU-C an at-large playoff berth in '86.

With the makings of a subpar season in progress, the value of Dorr's stock has tumbled considerably on the national market.

Since 1963, seven different coaches have led the Saluki football team. In 71 years of football, SIU-C, 13 different coaches have led the Salukis grid efforts. Take away William McAndrew, who coached for 23 years, and Glenn "Abe" Martin, who coached for 10 years, and the average tenure a head football coach spends at SIU-C is just 3.45 years.

In short, Dorr needs a good season for "measles" as much as he needs one for the SIU-C football program. Losing teams don't attract top-notch recruits, they don't go to the playoffs and their coaches don't get moved up into Division I-A ball.

And as both a Saluki and a Ray Dorr fan, I hope he can pull off a grand finale coach different than the first two weeks.

From the Press Box

Sale good thru Sunday, September 20, at all locations.
McKinnon looks for starting role via special teams & quality play

LAKE FOREST, Ill. (UPI) — Dennis McKinnon, who had resigned himself to the fact that "quality is more important!" than quantity for the rest of his career, McKinnon, who had to sit out last year after undergoing knee surgery for the third straight year, lost his Chicago Bears' starting receiving spot to rookie Ron Morris this year.

Instead of sulking, McKinnon volunteered to go back to the special teams. He responded on Monday night with a club record, 74-yard punt return for a TD against the defending Super Bowl champion New York Giants.

"I knew I had played in a lot of pain in 1984 and 1985, and after we won the Super Bowl in 1985, I decided it was time to get back to health back," McKinnon said. "I came back and I lost my job. But I knew that it was important to have quality rather than quantity. I wanted to help out where I thought I could."

McKinnon had played on special teams during his rookie season in 1983. That year he returned a punt for a TD against the Green Bay Packers.

In his runback of the punt in Monday night's game, he said faced pretty stiff opposition. "They had the rush on, so it was me against 10 men," McKinnon explained. "That doesn't happen too often where you can run one back. It wasn't like the one I had against Green Bay."

"It was the greatest runback of a punt I've ever seen and I've seen a lot," said Bears' coach Mike Ditka. "When a guy is away like Dennis was, you're forced to forget how much he can do and how much talent he has."

McKinnon said he still plays with pain, but he rated the knee at 95 percent healthy. He is confident he can be a starter with the club but is resigned to the fact that he'll have to play another role with Morris starting. "I can't be too depressed about it," McKinnon said. "I know a lot of guys didn't think I'd be able to come back at all. I think I've proven them wrong."

McKinnon had a disappointing minicamp last May in his first test of the knee. He saw limited action in the pre-season when Morris beat him out for the starting job. "I kinda shuffled around in the pre-season. There isn't much you can do playing one quarter a game," McKinnon said. "There really wasn't a major adjustment back. I know it's a matter of mind over matter." McKinnon has often been at odds with Bears' management concerning his playing time and his contract. He said by returning punts he may be able to get a higher visibility and convince management he deserves a better pact. "I guess the TD I can tell (Bears owner) Mike McCaskey some things when we talk money. Maybe I'll finally get it," McKinnon said.

McKinnon has remained cocky, both about his own abilities and those of the team. He isn't worried about the club having any leidown against Tampa Bay next Sunday after disposing of the Giants. "Tampa Bay hasn't beaten us in years. We're locking our chomp," he said. McKinnon. "We're going to get on them early and then they'll quit. They all do."

TELEVISION, from Page 20

consider moving some CFA telecasts to Sunday, but that could meet opposition from university administrators who don't want to move games and arrest ticket sales.

ABC ordered made-for-television movies earlier in the year when the network flirted with the possibility of getting out of its NFL contract. Any kind of entertainment programming, including movies, would not likely draw the same audience ABC receives for its Monday night package.

ABC was third in prime-time ratings last year and its Monday night games usually receive ratings 25 to 50 percent higher than some entertainment shows on ESPN, in its first year of NFL coverage, has the luxury of time and alternate programming.

"We don't start televising until the eighth week, so we're in a position to wait and see what develops until then. Of course, it would affect our NFL prime-time show, but that's a half hour," says ESPN's Mike Soltys.

In 1982, NBC showed Canadian Football League games and CBS televised small-college football. Golf and tennis were also shown. But ESPN has grown to the point where it not only was able to enter the NFL package but also secure other strong sports events.

"We've got the better events during the time a strike would take place," Soltys says. The owners have taken out a line of credit for insurance in case a prolonged strike reduces television revenues.

DANCE CONTEST
The All-New Thursday Night Dance Party
Featuring:
Jeff Gibbs of Mix Masters Inc.

FREE ADMISSION FOR LADIES
8:00pm-12:00am
Free Speedrolls and Crafts for Ladies from 8:00pm-12:00am

$50 Cash Weekly Prize
Semi Final & Grand Final worth the Largest Prize ever offered in Southern Illinois

Southern Illinois' Largest & Hottest Dance Contest Ever!
12-30 on 7 miles North of C'dole Strip on Hwy. 51
Open 8:00pm-4:00am

Intro to Weight Training
Session I: Thurs. 9/17 8-10:00pm
Session II: Sat. 9/19 11-1:00 pm
Both sessions meet in the Rec Multi-Purpose room.

No registration necessary.
For beginners.

Rambo’s of Southern Illinois like paint-shooting at survival games

By Todd Mounce
Staff Writer

Your heart pounds, sweat pours down your face and brush obstructs your vision as you crouch down and wait for the enemy to approach. Your mission is to protect the flag, while your enemies want to capture it.

This situation is common for newcomers to the game of survival.

Survival games are played with air guns that shoot plastic coated paint pellets. Goggles are worn throughout the game to avoid eye injuries. The object of the game is to protect the flag and hang it over your team’s flag.

A person is dead when a paint pellet hits them and breaks, leaving a blotch of red paint. The game is usually played during the day, but sometimes at night.

Fifth.il. .S.0. says a lot of people seem hesitant to play the game, but he points out that it is just a game. Houston is the captain of the Wild Geese, last year’s Illinois state champions of survival games.

“Anybody that thinks they want to try should give it a whirl at least once,” Houston said. “We’ve had women, doctors, lawyers and all kinds of people play,” he said.

Houston, a liquor store clerk, said people seldom get hurt. The most likely way to get injured is to play without the protective goggles, which is not allowed.

Other sportmen say the human factor involved in the game.

“As a sportman, it’s the only game that you’ll ever hunt that will shoot back,” Mike “Papa” Blankenship said. “Everybody gets killed, but everybody loves. It’s like a game of chess played with real men.”

The club was founded in 1961. Members from all over the Southern Illinois area participate.

The Southern Illinois-based club competed regularly the past few years, but many of the team members can’t afford to compete now. Houston said.

Club members have to pay travel expenses as well as entry fees. Houston hopes to travel to the Poconos (a mountain range in Pennsylvania) for the upcoming survival game Nationals. The Wild Geese won’t compete there, but a few team members may help the Peoria Warriors, another survival club, fill its ranks.

Tournaments typically have six teams competing, with each team playing four games over a two-day period. The Illinois teams are given three points for each surviving team member, three points for each rival team member killed, 30 points for the first team to capture an opponent’s flag and 30 points for the first team to hang the flag over its own.

Judges keep a point total and at the end of the tournament the two teams with the highest totals compete for the prize. The prize has typically been a trophy, but more recently cash prizes have been awarded. Houston cited a tournament held in New York State last year that gave $25,000 to the winning team.

The team plays at 10 a.m. almost every Sunday. Anyone interested can visit the club, located at 1101 S. Glenmore in Forsyth, Houston after 6 p.m. Thursdays at 851-3007.

“There’s a little ‘Rambo’ in all of us,” Houston said.
The other eight teams will play BYU freshman Freddie Gibson in a Monday night game through Saturday in Provo, Utah.

"Even though we are going in blind, not knowing much about the other teams, it's still a good time to learn about ourselves," Saluki coach Debbie Hunter said. "I want to leave September with a mature team.

For Hunter, maturity means the ability to win close contests. The Salukis are 2-3 in two-point games and 0-2 in five-game matches. "Winning a five-game match would be a milestone for a club such as ours. We want to prove we can be on the court with any of the teams there."

The Salukis are in one of four four-team pools. They take California-Riverside at 6 p.m. Thursday and then Utah State at noon Friday. The top two teams from each pool advance to the championship bracket, which begins Friday and ends Saturday.

The eight teams are split into a consolation bracket. Players are set based on being in the top eight. I'm going to push them towards the top of our bracket," Hunter said.

Eastern Washington is a No. 1 seed and would be a bye in the 16-team Cal State-Pullman tourney last weekend, the Salukis would have two wins over Utah State. They take on Weber State at 2 p.m. in both Texas A&M and Santa Clara.

Of Eastern Washington's losses, three are to Washington State and one to Cal State-Long Beach.

Sophomore middle-blocker Jolene Harwood has a .331 kill average and is averaging 1.015 blocks per game. Thursday's second match against Cal State-Pullman, which features All-American setter Melanie McLucas (5-9, Sr.) and middle blocker Katie Moser (6-6, Jr.), is Eastern Washington's biggest test of the season.

Buchanann, a member of the all-tournament team at last year's Saluki Invitational, leads the team with 25 kills for a 2.57杀 game average.
