## Shaw in race for chancellorship

The anticipated announcement concerning the future of SIU-E's President Kenneth Shaw came Wednesday when he made public his intention to become an active candidate for chancellor of the SIU System.

In a press release to the Edwardsville campus community, Shaw outlined three reasons for his decision, which he said was the result of "long and careful consideration."

"The search process allows me as a candidate to determine if the position fits my abilities, needs and interests. My interest in the position simply provides an opportunity for both parties to determine if there is an aptness of fit.

"I want to ensure that the pool of candidates includes those of the highest quality. I feel my candidacy will further this end. Of course, all other candidates will have the same feeling. The stakes for me and for the University at Edwardsville are significant enough for me not to ignore them.

"My candidacy affords me my chance to state my views to the board, thus exerting some influence over this very important area. I have conviction and views as to how the SIU System can ensure a proper balance between campus autonomy and centralized function. SIU-E and its president will be directly affected by the type of person chosen and by the board's view of what the person will be doing."

In February, the Board of Trustees changed the SIU governance structure by creating the position of chancellor, now the system's chief executive officer. The two campus presidents report directly to the chancellor. Former General Secretary of the SIU System James Brown is serving as acting chancellor until the Board of Trustees receives and acts on a nomination from the Chancellor Search Assistance Council.

According to Keith Sanders, chairman of the search committee, there are now 64 active candidates among 153 persons who have been nominated or who have applied for the job.

An active candidate is one who has either applied and meets the qualifications set for chancellor or one who has been nominated and has expressed interest in the position.

Shaw further stated that his interest in the chancellorship "in no way implies a commitment from myself or those involved in the search process or the board."

"I'm certain the board will have many outstanding candidates from which to choose, my candidacy simply offers them one further option. A more apt candidate may emerge, but in either case I will be delighted at Edwardsville. My position has given me a great amount of satisfaction," Shaw added.

When contacted Wednesday, Shaw said he had no further comment.

## Gary Brown elected GSC president

By **Bill Crowe**  
Student Writer

Gary Brown, history department representative, is the new president of the Graduate Student Council. Brown won by 23 to 22 votes over Stan Irvin, Law School representative in the election Wednesday night.

"I think the vote reflects a desire on the part of the GSC to continue in the excellent fashion that it has," Brown said of the election.

Brown has been on the GSC for two years and has been a representative to the Graduate Council—a constituency group made up of Graduate School

faculty members—for the past year.

Pat Melia, who ran unopposed, was the vice presidential winner. Melia is the higher education representative.

Brown said he thought he could work well with Melia. Brown and Melia have been working on various pieces of GSC legislation for six months, Brown said.

The GSC will have three issues of great importance to deal with in the next year, according to the new president.

The first is the possibility of further tuition and fees increases. Brown said the GSC will also try to get the university to make the maximum use of the

resources available to it. The third issue which the GSC will have to deal with is keeping the cost of an education low for students and the rewards to students high.

Five GSC members were elected to the Graduate Council in the election. Pat Ostenburg, chemistry and biochemistry representative; Taco Homburg, linguistics representative; Burt Hancock, curriculum, instruction and media representative; Ted Kalthoff, higher education representative; and Mike Higbee, communication development representative, were the only students who ran in the election.

## Alexander elected student president

By **Susan Fernandez**  
Staff Writer

The new student president for 1979-80 is Pete Alexander, a senior in political science and health education.

See photos of students voting at polls, Page 6.

Alexander, who is currently a student senator and has been involved in Student Government for several years, received a total of 606 votes in Wednesday's election.

Election commissioner Jon Katovich said 2,435 students voted for one of the nine presidential candidates—two of whom ran as write-in candidates. About

2,100 students voted in last spring's Student Government elections.

"Persistence pays off," Alexander said when he heard of his victory. "Losing last year to Garrick-Clinton Matthews made me work harder this year. Chris (Blankenship) and I intend to continue working hard during our term."

Blankenship, a sophomore in public relations, was Alexander's running mate and is the new student vice president. Blankenship is the coordinator of Mobilization of Volunteer Effort.

The runner up in the presidential race was Mark Rouleau, student vice president, who received a total of 492 votes. However, Katovich disqualified Rouleau Wednesday night for allegedly violating election regulations concerning the proper size and location of campaign posters. Rouleau, who said all the posters in question were removed by Wednesday morning, says he is planning to protest his disqualification to the Campus Judicial Board for Governance.

The presidential candidate who received the least number of votes was

Greg Burton, a student senator. Burton, who received 79 votes, is also planning to challenge the election results. Burton filed one of the complaints against Rouleau because he said he saw Duane Bumpers, Rouleau's running mate, tear down his posters in Mae Smith.

As of press time Wednesday, the 16 winning Student Senate candidates had not been determined. There were about 40 candidates for student representative. Katovich said those votes, as well as those for student trustee will be counted by Thursday morning.

## Rouleau disqualified in presidential bid

By **Jim McCarty**  
Staff Writer

Presidential candidate Mark Rouleau and his running mate Duane Bumpers were disqualified from the Student Government election Wednesday because they violated campaign regulations concerning the size and locations of their campaign posters and because Bumpers was seen tearing down the posters of another candidate, according to election commissioner Jon Katovich.

Greg Burton, a presidential candidate, filed a complaint Wednesday night

charging that Bumpers "tore down and defaced" one of Burton's posters in Mae Smith.

Bumpers refused to comment on the charge.

Charles Beck, an independent candidate for president, filed a formal complaint Wednesday afternoon charging that Rouleau's posters were larger than regulations permit.

Election regulations require that campaign posters be no larger than 11 inches by 14 inches, Katovich said.

Katovich said Rouleau repeatedly ignored warnings about the size and

locations of his posters.

"I never had to speak to any of the other candidates about the rules more than once," Katovich said. "But Rouleau ignored my warnings over and over again."

Katovich said he ordered Rouleau not to put his posters anywhere on campus two weeks ago because they were much larger than regulations permit.

"He assured me that they wouldn't be put up anymore," Katovich said. "But I kept seeing them cropping up on campus

Gus says Student Government elections are a lot like Russian roulette—except that when you pick wrong you have to live with it.

# House eyeing collective bargaining bills

By Ray Robinson  
Staff Writer

Almost two years after the SIU Board of Trustees effectively crushed a move by faculty members to establish collective bargaining at SIU-C, the issue is once again showing signs of life.

In July of 1977, for the third time in less than a year, the board rejected a motion to hold a collective bargaining referendum for Carbondale faculty

right to organize and bargain collectively.

The bill, according to lobbyist Kenneth Bruce of the Illinois Education Association, is "Rep. Hanahan's pet bill... He's introduced it about 10 times."

Herbert Donow, president of the Carbondale Federation of University Teachers, said he gives the bill a good chance of passing the House this time because of the change in Chicago area legislators' attitudes toward collective bargaining.

Donow said the change in attitude had been brought about by the rise to power of Jane Byrne, the new mayor of Chicago and a staunch supporter of collective bargaining.

But Bruce pointed out that the bill seemed to be off to a "shaky start," having only passed the House Commerce Committee by a slim margin.

Bruce said that while the IEA supports all collective bargaining bills, it was most actively supporting House Bill 808, which is sponsored by Rep. Larry Stuffle of Charleston. Bruce said the bill was similar to the 800 bill but would only extend collective bargaining rights to teachers.

"I think it has a much better chance of passing," said Bruce. "It passed the committee with relative ease."

But Bruce was not optimistic about either bill's chance of being passed by the Senate.

"The Senate has been the burying ground for many bargaining bills in the past," Bruce said.

If either bill becomes law, the SIU Board of Trustees would be forced to allow faculty members to hold a referendum on collective bargaining.

Such a referendum was recently held at the University of Illinois at Champaign. By a vote of 1,183 to 1,365, the U of I faculty and academic employees endorsed collective bargaining. The votes were counted and the results announced Tuesday by the Illinois Department of Labor.

Because there is no collective bargaining law for public employees, the U. of I. Board of Trustees is not legally bound to bargain collectively with the employees.

Gary Adelman, president of the Union of Professional Employees in Champaign, said he doubted that the U of I

board would go along with the faculty's wishes.

"The board is dominated by the strong personalities of the president and the chancellor (John Corbally and William Gerberding)," said Adelman. "Both of them have spoken in opposition to collective bargaining."

For that reason, Donow said he saw little significance in the events in Champaign for collective bargaining hopefuls in Carbondale.

"The important place to be looking is Springfield," said Donow. "They (the Board of Trustees) have to grant us the election if the bill passes..."

Donow also expressed his hope that CFUT could increase its membership (currently about 200), saying, "We need a show of power."

Donow said he hoped SIU's new chancellor would encourage the Board of Trustees to approve collective bargaining.

"I hope the new chancellor will recognize that it's inevitable," said Donow. "Collective bargaining is going to take place in Illinois as it has in other places."

## News Analysis

members. Only Margaret Blackshere, who has since left the board, voted in favor of the motion. As its reason, the board cited the fact that there was no legislation in Illinois allowing public employees to organize and bargain collectively.

But two bills that would give Illinois public employees the right to bargain collectively are being considered by the state legislature.

House Bill 800, sponsored by Rep. Thomas Hanahan of McHenry, would give all public employees in Illinois, including university professors, the

## F-Senate seeking seat on SIU board

By Kathy Best  
Staff Writer

The Faculty Senate is considering a two-pronged approach to secure a faculty representative on the SIU Board of Trustees.

The first step, on which the senate took action Tuesday, is a resolution asking the board to appoint a temporary faculty representative with the same rights as a student trustee. The student trustee has only an advisory vote on the board.

In the meantime, the senate is considering asking the legislature to create a faculty board position with full voting rights.

Senate member David Bateman, associate professor of administrative science strongly opposed the senate's action, saying it was the result of faculty frustration.

"The Board of Trustees was appointed by the governor to represent all the people of Illinois," Bateman said, "not just the 1,400 faculty members at SIU."

Bateman said he did not think there should be a student representative on the board, and that adding a faculty representative would open the door for civil service and other constituency group representation.

"A faculty representative on the board will weaken the faculty's position," Bateman concluded.

David Derge, professor of political science and chairman of the executive council which sponsored the resolution, responded, "Our approach was not that of an adversary. We don't want an inside man at the skunk works constantly picking at the board."

The senate also approved a motion to print a new faculty handbook. The book, which will contain such information as the University's promotion and tenure policies, should be ready for distribution by the beginning of the fall semester, says Marvin Kleinau, senate president.

In other action, the senate tabled a motion after a lengthy discussion on the proposed name change of the Department of Physical Education.

The motion called for a program title change from "Physical Education-Women" to "Physical Education-Men" to "Physical Education." The change would not have precluded future changes in departmental organization.

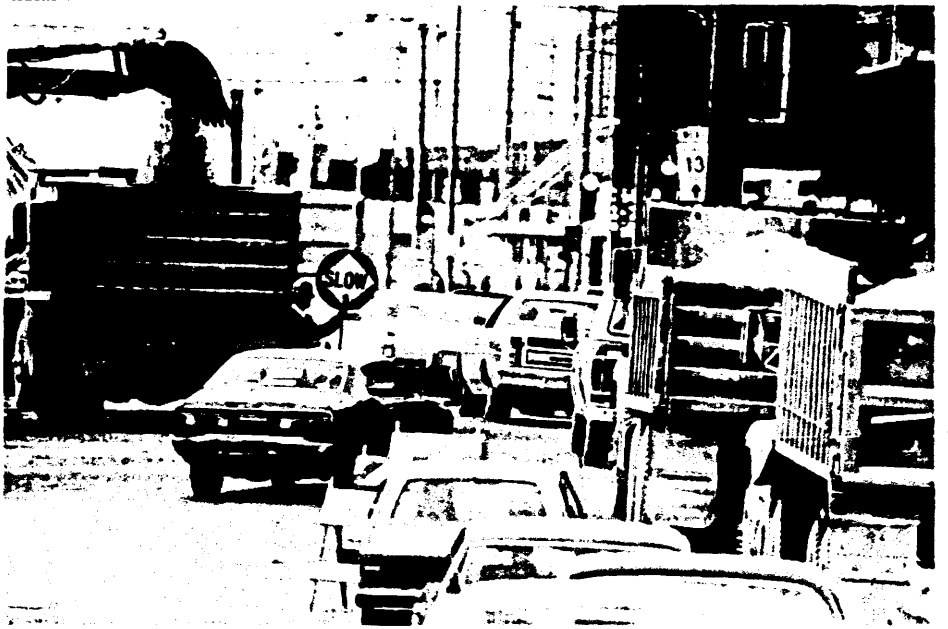

After the motion was tabled, Kleinau chided the senate for failing to take action on the issue, saying that delaying a decision would not make the problem go away.

## Television sets stolen

Nadine DeJohnette of 504 N. Wall St. reported to police at 7:52 a.m. Wednesday that her home had been burglarized sometime during the night.

Police said two television sets—one black and white and one color—valued at \$560 were taken.

According to police, entrance was gained through a kitchen window. When police arrived, the window was found open. Police said the investigation is continuing.

Squeeze play

Work on a new water line causes headaches for motorists caught in a bottleneck near the 300 block of South Illinois Avenue. The new water line is being installed to provide

more water for the north side of the city including the Industrial Park. Illinois Avenue is scheduled to be repaved sometime this summer. (Staff photo by Mike Roylek)

## Civil service council election slated

By Donna Kunkel  
Staff Writer

Twelve representatives to SIU's Civil Service Employees' Council will be elected May 16.

Statements of candidacy were mailed last week to all status civil service employees by the council's election committee. To be considered for election to the council, employees must submit a written statement declaring their candidacy to the committee by April 25.

Joann Marks, a member of the election committee, said all civil service employees, excluding temporary and part-time workers, are eligible to be elected to the council. There are 1,717 civil service workers eligible for candidacy, Marks said.

The advisory council represents all University civil service employees and is recognized by the SIU president and the Board of Trustees.

Lee Hester, president of the council, says he will not be a candidate in the election. Hester has been on the council since 1968 and was president for six of the 11 years he served.

Marks said that after the election there will be about one representative for every 100 civil service workers.

There are currently only 14 members on the council. Seven representatives have another year remaining on their terms.

Four representatives will be elected from civil service employees working in campus services; three from academic affairs; two from student affairs; two from university relations and the presidential administration (including computer services and the School of Medicine); and one from financial affairs.

The representatives, elected by employees from their same job concentration, will serve two-year terms with the exception of two representatives from campus services and one from university relations. Those three representatives will serve only one-year terms.

Employees can vote only for representatives in their job concentration, Marks said. Ballots will be mailed to all employees May 9. Marks said the ballots must be returned to the election committee by May 16.

Newly-elected representatives will assume their position in June and council officers will be elected by the new council at its meeting June 6. Officers are elected for one-year terms.

Marks, who has another year left in

her term, said the group could accomplish more and improve its image if the new representatives would be active.

"I feel we contribute a lot to the University but some people here look at us like we are just pieces of equipment."

Marks said she did not know what kind of impact a new president would have on the council. She said it will depend on the person who is named President Warren Brandt's successor.

"President Brandt was very fair to us," Marks said. "He didn't always do what we wanted, but he did listen. I hope the new president, whomever it is, will be sympathetic to the needs of the council."

## Beg your pardon

Some faculty members names were inadvertently omitted from the faculty promotions listing in a story on Page 18 of Wednesday's Daily Egyptian.

Promoted from instructor to assistant professor were: David V. Koch, library affairs; Wilma Lampman, library affairs; Janice Schoen, secretarial and office specialties; George H. Poston, mortuary science; and Mindy P. White, secretarial and office specialties.

## Masked gunmen invade, rob home of 3 SIU students

By Bill Theobald  
Staff Writer

Carbondale police are searching for two masked gunmen who kicked in a door, entered the home of three SIU students and demanded money from the residents early Wednesday morning.

According to police, the two gunmen entered the home of Iraj Vokaxhoori, graduate in environmental design, and his wife Rebekah, senior in sociology, at 501 S. Oakland Ave., at about 2:35 a.m.

Andrew Vanderstoep, a freshman in biological sciences, who shares the residence with the Vokaxhooris, was also there during the break-in, which is a Class X crime in Illinois.

Police said the gunmen ordered the Vokaxhooris to lie down on the floor. Vanderstoep escaped through a window and ran to the fire station at 300 S. Oakland Ave. and called police, according to police records.

Although shots were fired, police said that there were no injuries.

The gunmen fled on foot with some of the Vokaxhooris' money and a television valued at \$830.

The victims described the gunmen as being two black males. One of the gunmen is believed to be between 18 and 20 years old, 6 feet tall and about 175 pounds. The other gunman was described as between 22 and 25 years old, 6 feet tall and about 190 pounds.

Police said an "intensive investigation is continuing at this time."

According to Lt. Terry Murphy of the Carbondale police, there are two patrol officers and two detectives as well as one crime-scene detective working on the case.

"We consider this a hideous crime," Murphy said. "Therefore we are giving this case a higher priority than other cases at this time."

Murphy said anyone having information about the home invasion should phone the Carbondale police at 549-2121 and give the information to a detective.

Although police are not certain who the suspects are, they are not ruling out the possibility that the same men may be involved in the "three-man crime wave" that occurred April 9, when police arrested Charles King Young, 27, of Elkhartville for the armed robbery of two SIU students and the armed robbery, kidnapping, rape and deviate sexual assault of an SIU woman.

Young's two accomplices were still at large Wednesday evening and police believe the duo is hiding somewhere in Carbondale. Police are investigating the possibility that the gunmen involved in the home invasion Wednesday morning are the same men suspected of being Young's accomplices in the April 9 "three-man crime wave."

"We are not ruling out anything right now," Murphy said. "The same two involved in the crime wave last Tuesday may or may not be the suspects in the home invasion."

## Weather

Thursday's weather forecast is calling for sunny and mild conditions with highs in the upper 60s. There is a 30 percent chance of showers Thursday night with lows around 50.

Friday should be cloudy and mild with a chance of showers and thunderstorms. Highs should be around 70.

The extended forecast for Saturday through Monday is calling for showers Saturday, but becoming fair Sunday and Monday.

## Dumped truck

While smoothing out the road which runs between the Towers and the Design Department, a Carbondale road grader became stuck when it slipped off the road into a ditch. The driver, "embarrassed by the accident, left the

scene to avoid being photographed. The grader was pulled out a half-hour later by city employees, ready to resume its grading operations. (Staff photo by George Burns)

## Fischer surprised by winning margin

By Ed Lempinen  
Staff Writer

Carbondale mayor Hans Fischer, tired but happy after his victory over Rose S. Vieth in Carbondale's city elections Tuesday, expressed surprise at his margin of victory and credited his campaign staff for his success.

"Yes, I really was surprised," Fischer said in a phone interview from his home shortly after the last precinct was tallied at 10:50 p.m. "We really expected it to be much closer."

Fischer received 60 percent of the votes cast, while Vieth received 40 percent. Write-in candidate Bob Phillips attracted a total of five votes.

"That I led the ticket in total votes was also surprising," Fischer said.

Fischer, who was appointed mayor last August after the resignation of Neil Eckert, received a total of 1,770 votes, compared with 1,164 votes garnered by Vieth.

In-cumbent council member Helen Wesberg, who received 1,714 votes, was closest to Fischer in the total number of votes collected. Both Wesberg and Susan Mitchell, who collected 1,482 votes, were victorious in the City Council race. Former mayor and city commissioner D. Blaney Miller placed third in the council race with 1,157 votes, while Margaret Nesbitt received 917 votes.

The candidates in both races finished in the same order as in the Feb. 27 primary election.

In achieving his victory, Fischer won 16 of the city's 19 precincts, and tied Vieth in another. Vieth was the victor by slim margins in the northeast side's Precinct 5 and in Precinct 25, which for the most part includes SIU student housing areas.

An unofficial total of 3,142 voters—or 24 percent of all voters registered in the city for the November 1978 elections—turned out for Tuesday's election. All results from the election will remain unofficial until the votes are canvassed

by the city clerk's office sometime next week.

Vieth, contacted at her home Wednesday afternoon, said she had spent the day "relaxing and answering the telephone."

"From the beginning, I knew it was going to be hard to unseat the incumbent, the big money," Vieth said. "With my nickle-and-dime campaign, it was hard to beat the incumbent."

Despite her loss, she said she was pleased with the way things turned out, and that she was in good spirits. "I feel no depression that others might feel," she said.

What she did feel, she said, was that she had been successful in generating a good campaign dialogue.

"I feel there was a moral victory," Vieth explained. "I think the dialogue was beneficial to the community, and that's what I was trying to do."

"I think I've made my mark on the community with the issues I addressed," she added.

Vieth said she expects to "remain active and independent" in Carbondale politics, but she said she did not know if she would affiliate herself with any particular organizations.

Throughout the last month of the campaign, federally subsidized low- and moderate-income family housing dominated the campaign debate. From the onset of that debate, Fischer stood behind the city staff's figures on the city's housing needs, but argued that the matter should be discussed and studied before a final course of action was set for the city.

Vieth, on the other hand, was openly and aggressively critical of the proposals for three apartment complexes throughout the campaign. She argued that the city should seek low-income housing for single family homes

After the results were in, Fischer said the vote in his favor represented approval of the way the city is handling the controversial issue.

"Apparently, the way I read the results, the large majority of people in the city have confidence that the city is taking care of the matter properly," he said.

Despite the housing controversy, and despite the increasing intensity of the campaign between Fischer and Vieth in the last month of the campaign, Fischer's margin of victory was nearly identical to his margin in the primary election.

Fischer also credited his success to "an awfully good campaign organization," and to a "broad spectrum of support" in all areas of the community.

Much of that support came from west side residential precincts 10, 12, 13 and 14, each of which Fischer won easily.

Those four precincts also reported the highest voter turnout. Turnout in student precincts was, however, much lower than in any other precinct.

In Precinct 2, the location of Lewis Park and Georgetown Apartments, turnout was 9 percent. In Precinct 23, which bounds the Brush Towers area, turnout was just short of 9 percent. In precinct 22, located just north of SIU's east campus, turnout was less than 5 percent, while in Precinct 25, the location of Evergreen Park and Thompson Point, turnout was slightly more than 5 percent.

Carbondale voters also approved three referendum questions by substantial margins Tuesday, but City Clerk Leilani Weiss and others reported that many voters were confused by the questions.

Two of the questions concern the City Council's manner of filling vacancies left by resignations on the council. The council is now authorized to fill any vacancy by an appointment that lasts until the end of the unexpired term or until the next general election, whichever comes first, or by special election.

The council was also authorized to consolidate four adjoining election precincts for any municipal election.

## Rouleau, Bumpers disqualified

(Continued from Page 1)

so I took them down and warned him again."

Katovich said he wrote Rouleau a formal letter Tuesday telling him that if the posters were not removed before the polls opened at 8 a.m. Wednesday, he would be disqualified.

"I took down two posters in front of McDonald's last night and they were

back up today," Katovich said.

Rouleau wasn't available for comment after being disqualified, but when asked about the charge Wednesday afternoon, he said he suspected he was being framed by someone who put his posters in illegal places to have him disqualified.

"I'd be pretty dumb to do something if I knew it would get me knocked off the ballot, wouldn't I?" Rouleau said.

## Student Government must look ahead

The impeachment trial of Student President Garrick-Clinton Matthews has finally occurred, and he has been acquitted of all charges against him. Everyone can breathe a sigh of relief.

The fact that Matthews' trial was delayed for so long, hanging over Student Government like a threatening cloud, probably did almost as much damage to the credibility of Student Government as the actual questions about Matthews' performance in office.

With a new president coming into office, and the questions about Matthews answered once and for all, students can try to repair any damage done to the foundation of their government and turn their eyes toward what is hoped to be a brighter future.

That is not to say Matthews' acquittal by the Campus Judicial Board for Governance should be praised as words from a prophet. Both parties of the impeachment proceedings, the petitioners for the Student Senate and Matthews, were able to present their side of the story. The J-Board held a relatively open hearing, or so it appeared. The decision was made and announced swiftly. Unfortunately, those are about the only good things that can be said about the proceedings.

Without questioning the verdict reached, the J-Board made some mistakes in considering the case and explaining its final decision. The board was inconsistent in some of its reasoning and procedures, and will certainly cast doubt upon its decision in some quarters.

For example, the board said it would not consider any charges of misuse of state funds against Matthews because they were not specifically listed in the charges and approved by the senate. One problem, according to the board members, was that they would have to rule on questions of state law, which they weren't qualified to do.

The board then turned around and ruled on federal law—the Buckley Amendment—in justifying its decision. The board would not rule on charges that

Matthews wasn't enrolled as a full-time student and that his grade point average was too low because such information is protected by the Buckley Amendment. Whether or not that is a correct line of reasoning is uncertain, but it is certainly inconsistent.

The board also said the strongest case against Matthews was his failure to make student appointments to various boards and committees—about 87 vacancies in all. However, this alone didn't justify removal from office, the ruling said. In other words, it's all right to be derelict, but one has to be really derelict to merit removal from office.

Along this line, it seemed as if the board continually forgot who was on trial. Matthews was on trial, not the Student Senate or Mark Rouleau. Board members continually asked Rouleau why he didn't act in light of Matthews' inaction. Unfortunately, it was Matthews' behavior which was in question, not Rouleau's.

The board also said in its ruling that Matthews was not guilty of some charges because the senate was negligent. That's like saying Matthews can't be punished for shooting someone because the senate or Rouleau didn't step in front of the bullet.

Another disturbing board action was the decision to disqualify five members who had been appointed by the senate. The members were appointed with an amendment to the Student Government constitution which allows the senate to make appointments if the president fails to do so. Matthews questioned the constitutionality of such an amendment, and the board disqualified five members of the 11-member board to avoid controversy.

In disqualifying the five members, the J-Board made no ruling whatsoever on the constitutionality of the amendment. The disqualifications seem to have been an almost arbitrary decision to avoid making waves.

But the J-Board is not the only group to be faulted. At times, the senators presenting the case against Matthews were lacking. Of course, they were limited to calling witnesses by board procedure, along with

making opening and closing statements. And much of their case was shot down when the J-Board ruled that no evidence of misuse of funds could be introduced. However, at times the three senators, Mary Haynes, Pat Heneghan and Kellie Watts, sat back and let their case get trampled under. For instance, Ricardo Caballero-Aquino, president of the Graduate Student Council and Matthews' only witness in the hearing, spoke of the difficulties of being a student constituency leader.

When cross-examined by the senators, he merely expanded on this theme, going beyond the answer required by the question and making statements not germane to the case. The senators didn't even object to Caballero's answers, failing to ask the board to instruct him to answer just the question. The object of cross-examination is to help one's own case, not the case of the person who called the witness in the first place.

Regardless of these questions about the decision, the decision was made. Like it or not, it will have to be accepted. It is now up to students both in and out of Student Government to start taking positive steps to resolve problems which appeared during the past year.

What is definitely not needed is for student senators and others to go off in a corner to cry about the unfairness of it all. Student Government can make a fresh start if it chooses to do so, and that choice is up to those who are involved.

As for Matthews, he can be justifiably relieved that he was acquitted. He had a very difficult year in office. He shouldn't become cocky over the decision, though, and feel he was completely vindicated. The best thing he can do now is to work closely with his successor for the remainder of the semester, ensuring as smooth a transition as possible and helping the new president avoid some of the problems Matthews ran into.

It won't be easy to turn Student Government around. But most things worth doing rarely are easy.

## Letters

### Brandt too lacking in spectacle and mediocrity

I would like to endorse your editorial concerning the "unspectacular presidency" of Warren Brandt. I think it is time for thick-skinned political hucksterism on this campus. A university devoted to excellence in teaching, research, and service cannot long survive without spectacle and titillation.

While such things as improving the stability of the University, raising the level of academic standards and the quality of education are noteworthy in the average college president, we need one with more sex appeal. The improvement in the facilities and faculty of this University, while admirable to some, will do little to prepare the student body for their role in Society. Dedication to excellence only promotes idealism, and everyone knows that this will lead to frustration in the future. As soon as students get the idea that things "can be better," they try and do something about it.

What is needed is a better appreciation of the ethics of the past. I would like to call for a return to the concept of "political expediency." This has been a tragic flaw in President Brandt. He has made enemies of those groups dedicated to the promotion of the University over their own constituencies: the local unions. This man even had the audacity to suggest that single females not "hitch rides around town" nor walk alone on campus after dark. As anyone can plainly see, the man was endorsing rape.

I would like to commend you for bringing out this man's defective personal characteristics. I think this is the height of good journalism. When discussions become too "issue oriented," people tend to lose sight of the real problem. Arrogance cannot be tolerated in administrators. Success makes us all feel inferior. Why try to "do it better" when we can all have such a good time getting by. President Brandt has definitely not given us the security that is needed in this area. I have worked with the physically handicapped, and there is nothing worse than seeing someone overcome his or her problems. If the handicapped start to excel in sports and the like, what will it mean for us with healthy bodies? The simple fact of the matter is that I resent the man.

Finally, thank you for informing us that President Brandt has been fired, and not resigned. I do not think he had any intention of resigning. This canard of his concerning the future of SIU-C under the new governance system is just a smoke screen. We should not be distracted by this issue.

I would suggest the President Brandt be banished, as you suggested, to a place where he can do little harm. Instructor Hugh Morgan's class in journalism would be a good place. He seems to be fond of him. I do not want the man snooping in one of my classes. At the

end of the semester, out with the tar and feathers, and good riddance!

Let spectacle be our watchword, mediocrity be our guide. Power to the people.

Stephen E. Blache,  
Associate Professor, Speech Pathology and Audiology

### Article unfair to faculty

In reference to the article by Ms. Lynn Emmerman, "Burned Out in Carbondale," we would like to present one of the author's statements in a more appropriate context. In search of a "clue to the quality of education at Southern" the author suggests considering the Psychology Department. According to Ms. Emmerman, "SIU likes to boast that its psychology department is one of its best..." Reference is made to an article in the American Psychologist (1977) which rated psychology departments in terms of faculty productivity, i.e., scientific publications in 13 of the journals published by the American Psychological Association. Ms. Emmerman correctly notes that SIU-C's psychology department rated "...only 32nd in faculty productivity."

"Only 32nd," when more closely examined, reveals that SIU-C's psychology department rated better than did well-known departments at Duke, Colorado, Michigan, Chicago, Harvard, and Princeton to name a few. In fact there are over 500 programs offering graduate training in psychology, over 150 of which offer doctoral degrees. A closer look at the article to which Ms. Emmerman refers reveals that in two of the 13 journals, our faculty ranks fifth in the nation in publication rate. Only nine other universities in this country can make the same claim.

### DOONESBURY

The article published in the American Psychologist clearly places SIU-C's psychology program among the most productive programs in the country. It is unfortunate that Ms. Emmerman's treatment of the article conveys a different impression. The author's treatment unfairly reflects on the activities of our faculty and the quality of education received by both undergraduate and graduate students. It is particularly annoying to us because the productivity of our faculty ranks them among the nation's leaders while the level of salary support for SIU-C faculty is mediocre at best. For our faculty, Ms. Emmerman's article truly adds insult to injury.

### More gripes with films

This letter is to express my opinion, and those of many others, about the SGAC film program.

I have not been pleased with the films shown in the last year. I am not one to judge a film by its title. I regularly attend the SGAC films, so my opinion is that of a valid spectator. Such films as "Eraserhead," "girlfriends," and "Welcome to L.A." were either boring, in bad taste, or just plain poor films.

As for Alan Thatcher, his film committee, and the cinema majors who seem to support him, their idea of how a film program should be run is nothing but elitist.

SGAC is my program as much as anybody else's. Why should I pay \$3 at one of the local theatres to see a recent film, when I could see them for \$1 at SGAC if they would schedule them?

## Defects of Asian communism slowly come to light

For several decades, since the Soviet Union lost its allure, many "progressives" have admired Asian communism—from a safe distance, of course. For such people, 1979 is becoming tiresome.

In January, Vietnam attacked Cambodia: War really is hell for a "progressive" when neither side can be called fascist. Cambodia's slaughtering Communists were an embarrassment, but so, too, was Vietnam's attack. It refuted the myth of "peaceloving" Hanoi, a myth concocted to serve the supreme myth that Hanoi's war of aggression against South Vietnam was merely a welling-up of nationalist ardor.

Then China, which "progressives" have said "has so much to teach us," attacked Vietnam, destroying villages to "teach them a lesson." And in Paris, Jean Lacouture, a prolific journalist revered by Hanoi's Western friends, denounced himself and others for having been "vehicles and intermediaries for a lying and criminal propaganda...spokesmen for tyranny in the name of liberty."

Lacouture confessed "shame for having contributed...to the installation of one of the most oppressive regimes (Cambodia's) history has known." And "with regard to Vietnam, my behavior was sometimes more that of a militant than of a journalist. I dissimulated certain defects of (North) Vietnam at war against the Americans....I believed it was not opportune to expose the Stalinist nature of the (North) Vietnamese regime."

Micheal Ledeen, writing in Commentary, says Lacouture's recantation is part of "the debate among French intellectuals over the nature of communism—a debate which has now reached historic propor-

tions." In France, philosophy, like wine, matures slowly, and some French philosophers, having read Solzhenitsyn, have concluded (better late than never) that the Gulag is the essence, not an accident, of communism.

It is quite French, this lighting upon the obvious with a proud sense of original discovery, but it is nonetheless welcome, especially because the debate is spilling into Italy. The debate there is helped along by an irony: As an Italian commentator has noted, Rome has a Communist mayor who knows nothing about real communism, and a pope who knows everything about it.

And now comes another affront to "progressive" sensibilities—the movie "The Deer Hunter," winner of the Academy Award as best picture of the year. It is, primarily, a sympathetic treatment of the working-class, young Americans who fought the Vietnam war. Although it deals admirably with some martial virtues (such as bravery, loyalty, and disciplined ferocity), it is in no way a celebration of war or of America's Vietnam involvement.

Nevertheless, it has been denounced by those among Hanoi's friends who cling to the old cause as if clinging to life. They detest the movie's stirring love of country, and even more its portrayal of Vietnamese Communists as brutal, especially in the treatment of prisoners. That their many brutalities did not include one shown in the movie—forcing prisoners to play Russian roulette—is not the principal point of controversy. Those who denounce the movie as "reactionary" reveal how much their opposition to American policy was rooted in anti-Americanism and

a romantic assessment of Asian communism.

Capt. John McCain of the U.S. Navy has not seen the movie. He saw too much of the reality. He was a POW for nearly six years, and experienced some of the "defects" of the North Vietnamese that the likes of Lacouture thought it would be "inopportune" to expose.

One day his captors told him he would be taken to meet someone identified only as "an American actress who is for peace." He refused to see the actress, in part, because he did not expect her to be the sort of person who would go home and tell the truth.

He also refused because of the experience of a POW who had agreed to meet with some other Americans in the "peace" movement. The "peace" people commanded the POW to confess war crimes. When he refused, repeatedly and adamantly, he heard a "peace" person suggest to his captors that "this young man needs to be straightened out in his thinking." He was hung by his wrists until an arm pulled from its shoulder socket.

For refusing to see the actress, McCain was confined for four summer months in an unventilated cubicle five feet long and two feet wide, and he was beaten and starved. Other prisoners suffering similar abuse also were made to suffer Jane Fonda's voice: The North Vietnamese piped into the cells recordings in which she urged prisoners to actively oppose U.S. policy, and told the world how well the prisoners were being treated.

McCain recounts this without passion. He is a professional who understands that he must know the enemy, but not take things personally.—Copyright, 1979, The Washington Post Company.

## Coors brewing up controversy in Virginia farmland

ELKTON, Va.—Springtime is settling its luster on the rich farmlands of the Shenandoah Valley as lightly as pollen dust on the wings of angels.

But the dust of controversy also fills the air. Reverential feelings for the land that have long been second nature to a local farming community that includes hundreds of Mennonite families are being challenged by the Coors brewing company.

The Colorado beer-makers, known as much for their light brew as for their heavy right-wing politics, are seeking an East Coast market. They are in the process of buying some 2,100 acres of Rockingham County earth on which to locate a brewery.

A citizens group of family farmers and others, led by a Mennonite pastor, is opposing the Coors plan by arguing that this overbearing industrialization can only disrupt the valley's agricultural economy. In this peaceable kingdom created by non-drinking Mennonite pacifists 200 years ago, the Coors attitude about its plans is even less appreciated than the plans themselves. One of the Coors brothers, in a comment as subtle as a beer belly, told the Wall Street Journal recently: "We're saying to the world, 'We've decided to become big time, and we're gonna run over some people on the way.'"

This is a local battle, but the issues here mirror many of the economic, ecological, agricultural and moral trade-offs that arise in all parts of the country

when family farmers come up against the might of agribusiness conglomerates or industrial giants.

Corporate takeovers, as well as real-estate developments, highways and other pressures of the times, are quickly reducing family farmers to one of the nation's least visible minorities. In 1940, America had nearly seven million farms. The number is now 2.3 million. A decline of 40,000 farms occurred in 1978.

Foreigners also are in on the grab. The General Accounting Office reports that foreign investors bought 826,000 acres of farmland in a recent 18-month period, a size equal to Rhode Island. Instead of putting money into a Swiss bank, put it into American loam.

A loss of 800 farms a week goes all but unnoticed in the nation's largest cities, where a generation has grown up thinking that potatoes come out of a box of flakes, or that sickly pink is the natural color of the tomato.

Because we were once a farming people—in 1945 one in five Americans lived on a farm, against one in 27 today—the government has been protective of the family farm. Subsidies, tax benefits and assistance in storing or shipping grain have been part of the political commitment given by Congress to the hearty citizens who fed the country.

But with conglomerates dominating the landscape, the politics of protecting the family farm are changing. Congress is currently debating revisions in the Reclamation Act of 1902, a political fight that will

make it either easier or harder for small farmers to keep their place in the sun.

The original law put a 160-acre limitation on farms that would qualify for subsidized federal irrigation. The debate now is over the proper acreage today—320 irrigated acres per family, as suggested by Sen. Gaylor Nelson who is an ally of the small man, or up to no limits at all, which is the idea of Sen. Barry Goldwater, the ever faithful chum of agribusiness. The larger the holdings allowed, the less chance the family farmer can stay in the game.

In Elkton, an example of heroic staying power has been provided by a farmer who was offered \$3,000 an acre by a Coors agent. No deal, he said. He has teenaged sons who want to work the land. If he took the Coors money, his profit would come at the expense of selling the farm out from under his children.

Coors, which didn't figure on so organized a protest, may still change its plans and go elsewhere. But the beer-makers are owed one debt. Seldom has the "squeeze 'em out" ethic of an industrial power been expressed more brazenly: "We're gonna run over some people."

If only other giants around the country would charge in with such beery arrogance, small farmers everywhere might fight the take-overs with the holy wrath of the Shenandoah Mennonites.—Copyright, 1979, The Washington Post Co.

Election worker Cathy Armandroff, junior in radio-television, drops a student's ballot into the box at Morris Library.

## At the polls

**WE WANT YOU...**

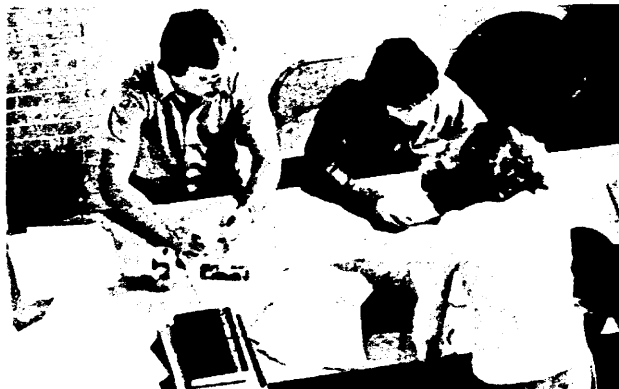

As they were last semester, voters' feelings about the computer-read ballots used in Wednesday's Student Government elections were mixed, according to several pollworkers.

"There hasn't been any problems; the instruction sheets are self-explanatory. There's been a good turnout," said Steve Wykle, a junior in administrative sciences, and a pollworker at Thompson Point.

However, Morris Library pollworker Tom Kirkhart, a junior in radio and television and advertising, felt the ballot instructions were confusing for pollworkers and voters alike.

"People didn't know how to vote or who to vote for. The instructions were confusing for the pollworkers and the voters," Kirkhart said Wednesday.

Nancy Pellet works on her ballot beside election workers Lindy Eggeneyer and Doug Cummins in the lobby of the Communications Building. Tim Padgett (right) fills his ballot out more privately.

### Free opera to play Sunday

The Marjorie Lawrence Opera Theater will present "The Consul" by Gian-Carlo Menotti at 3 p.m. Sunday in Shryock Auditorium. The opera will be sung in English and is open to the public without admission charge, thanks to special assistance by the Graduate Student Council. "The Consul," a Pulitzer Prize-winning opera, deals with the desperation of innocent people caught up in the bureaucratic web of international power politics. Set in Czechoslovakia just prior to the Nazi takeover, the opera relates the story of the Sorel family and their attempts to escape the terror of the secret police and gain passage into Hungary. They ultimately find themselves trapped between the

relentless advance of the Gestapo forces and the indifferent attitude of the Hungarian Consulate. The opera has been designed and staged by Michael Blum, a graduating Opera-Music Theater major. Margaret Simmons has prepared the cast of singers which includes Ann Solley as Magda Sorel, Kraig Kerger as John Sorel, Carol Reich as the Mother, Susan Gilkes as the secretary, John Pape as Mr. Kofner, Jeanine Wagner as the foreign woman, Deborah Schwab as Anna Gomez, Dorothy Hendrick as Vera Boronel, David Sae'tman as the secret police agent, Earl Maulding and Denis Elliott as the plainclothesmen, Jack Dare as Assan.

Carol Reich (left) sings a haunting lullaby to her hungry grandchild in "The Consul," to be presented at 3 p.m. Sunday in Shryock Auditorium. Ann Solley (above), in her desperation over the "redtape" needed to get a visa, hurls Susan Gilkes' papers into the air.

# Fire Dancers to perform

By Laci Williams  
Student Writer

The SIU Black Fire Dancers, a black student dance troupe composed of twelve females and one male, will present their first public two-hour concert.

The concert will be held 7 p.m. Saturday and Sunday in Furr Auditorium. The theme of the show is "Never in Our Wildest Dreams," which will display BFD's love of black art through dance form, according to Tarrza Sykes, coordinator of BFD.

An assortment of dance forms ranging from interpretive to the fancy footwork of tap will all be part of the extravaganza.

BFD was started in 1971, according to Sykes, as a result of the Black Togetherness Organization's annual cultural festival. Dance was not included in the first, so BFD

evolved out of that need.

Since that time BFD has flourished into a dance troupe that practices professionalism and studies Dunham Technique, which is composed of techniques from Brazil, Haiti and Spain designed by Katherine Dunham of Joliet, a nationally known professional dancer. BFD is instructed by Jacqueline Thompson, former professional dancer who now lives in Carbondale.

Sykes said she is devoted to BFD in order to encourage an expression of black art by developing professional attitudes and techniques towards the performing arts.

Thompson said "Giving knowledge to my black race passed on to me by Katherine Dunham and helping to develop this knowledge is one of my main goals in life."

## Thesis exhibits to be shown

The Master's Thesis Exhibits of Victoria Eve Dark and Philip Woolley will be on display at the Mitchell Gallery, Quigley Hall. An opening reception will be held April 25 from 7 p.m. to 9 p.m. The exhibits will continue through May 11.

Dark's work evolves from the process of slip casting. Her pieces are sculpturally and painterly oriented. The work is visual and abstract, in the sense that the forms do not refer to previously recognizable objects.

Woolley's paintings are in oil and

consist mainly of compositions that are non-representational, but are based on observations of representational objects and life.

Dark and Woolley both received degrees in Fine Art from Bath Academy of Art in England. While working for their master's degrees, Woolley has held graduate research assistantships in Africa; art and 14th Century Italian Painting.

## Comedy group set

"Brooklyn Bob's Traveling Medicine Show," Carbondale's improvisational comedy troupe, will give two performances on April 29. At 1:15 p.m. and 3:30 p.m., the troupe will entertain at the Museum Auditorium of Fanner North entrances 12 and 13.

One of the skits will be "The Trouble with Tribbles," a take-off of the original Star Trek Tribbles episode. Tribbles are small, round and furry alien beings and were the subject of one of the series' first programs. In the skit, Tribbles look like trouble, but end up heroes and spy catchers.

Both shows are free.

## Statler Brothers to play in Du Quoin

The Statler Brothers and Barbara Mandrell have been signed to appear June 30 at the DuQuoin State Fair's second annual Farm and Folk Festival.

The Statler Brothers really need no introduction to anyone who has followed country music. First introduced in 1965, the singers became an instant success with their offbeat hit "Flowers in the Wall," and they have maintained their popularity through the late 1970's by winning three Grammy Awards and being named Country's Top Vocal Group

six consecutive years.

The Statler Brothers are neither Statlers nor brothers. The group consists of Harold and Don Reid, Lew DeWitt and Phil Balsley.

Appearing with the Statler Brothers will be Barbara Mandrell, whose hit single "Sleepin' Single in a Double Bed" has recently climbed to the top of the country chart and landed Mandrell on several national television shows.

The shows will be at 6 p.m. and 9 p.m. Tickets are \$9.98 and \$7.

**ROUND-TRIP ST. LOUIS - MEXICO CITY**

Beginning May 14, Mexicana Airlines will offer substantial discounts for students and faculty traveling to Mexico. This program can save you up to \$140.00 off the normal round-trip fare. You can remain in Mexico for as long as you want (one day to six months).

We have prepared a colorful brochure to fully describe this fare and how you can qualify.

Travel Coordinators and Mexicana are also offering Summer Study Programs at Mexico's finest colleges and universities. There are a wide variety of courses offered. A few examples are: Anthropology, Architecture, Arts and Crafts, Botany, Ceramics, Folk Dances, History of Mexico, International Business, Journalism, Latin American Politics and Economics, Mexican Educational System, Psychology, Sociology, Spanish Language and Literature, and Theatre.

We will also be happy to send you information on these schools.

Please send me your brochure describing this fantastic \$153.00 fare to Mexico and/or information on the Student Study Programs.

Harvey Korman (left) and Mel Brooks star in Brooks' "High Anxiety" to be shown at 7 p.m., and 9 p.m. Friday and Saturday in the Student

Center Auditorium. The film is sponsored by the Student Government Activities Council's Films Committee. Admission to the show is \$1.

## Civil rights drama to be performed

The University Theater will present James Baldwin's dramatic play, "Blues for Mister Charlie," at 8 p.m. April 26, 27 and 28.

The play deals with the lynching-murder of a young Black man in a small Southern town by a white store owner during the turbulent civil rights days of the 1960s. In his introduction to the play, Baldwin explains that he has loosely based his story on the case of Emmett Till, a Black youth who was murdered in Mississippi in 1955. The murderer in

this case was acquitted and, afterwards, recounts the details of the murder.

"The play, then, for me," says Baldwin, "takes place in Plague-town, USA, now. The plague is race, the plague is our concept of Christianity; and this raging plague has the power to destroy every human relationship."

Tickets are on sale now at the Communications Building Box Office.

Tickets are \$2 for students and \$3 for the general public. A discount rate is available for groups of 10 or more attending the same performance. Arrangements for group rates may be made by calling the Box Office 9 a.m. to noon or from 1 p.m. to 5 p.m. weekdays at 453-5741.

"Blues for Mister Charlie" will be directed by John O'Neal of the Free Southern Theater. John is a graduate of SIU's Department of Theater and has directed in several areas of the country since his graduation. His parents are residents of Carbondale. John will be an artist-in-residence with the theater department through the end of April.

## Math genius to give address

Paul Erdos, a Hungarian-born mathematician, will be speaking at 7 p.m. Monday night at a banquet sponsored by Pi Mu Epsilon, SIU's math society. The talk will be held at Sironi Stockade, 101 S. Wall, and everyone is invited.

An accomplished number theorist Erdos will speak on some of his research findings. He has been employed by SIU this semester as an adjunct professor and has been working with Melynn Nathanson, associate professor of mathematics.

Nathanson said the 66-year-old Erdos is "one of the most distinguished mathematicians ever."

"He would be mathematic's equivalent to a Nobel Laureate," Nathanson said. "He received his doctoral degree at an age when most are just starting college."

Erdos has published many research papers and has traveled all over the world to speak to educators. He has been given a special status by Hungary to travel if other countries. Nathanson said.

Also scheduled for the banquet is the announcement of the results of the William Loewell Putnam math competition, held last December. Tom Moran, Jo Ann Fiene, Nersi

Nazari, Nick Sortal, Ali Sabzgar and Dennis Frazier represented SIU in the competition. The SIU student with the highest score will receive a \$50 prize.

Frazier also will be honored as the outstanding senior in mathematics for 1979-80.

Speakers at last December's Pi Mu Epsilon regional meeting in St. Louis will be honored. Fiene, Sortal and Joe Boor, a graduate in math, were participants.

About 20 new members will be initiated at the banquet.

All persons wanting to attend the banquet should contact Carl Townsend, associate professor of mathematics at 453-5302. There is no cost to attend the banquet. Each person will pay for his own meal.

**IRRIGATION PLANNED**  
BUENOS AIRES, Argentina (AP) — Argentina has announced plans to spend \$580 million during the next four years to irrigate nearly 1.75 million acres of arid land.

The project involves reclaiming land in 17 provinces in the lower valley of the River Colorado to develop the food-growing potential of the subtropical areas of Santa Fe and Chaco.

# Soviet-U.S. defense resources compared by space professor

By Dean Athans  
Student Writer

The Soviets perceive a war with the United States as fightable and winnable while we perceive it as unthinkable," said Samuel A. Crow, now an assistant professor of aerospace studies and former inter-continental ballistic missile combat crew commander.

In speaking of U.S.-U.S.S.R. defense differences Crow said that the Soviets surpass the United States in some areas.

"According to most sources the Soviets have perfected a particle-beam weapon," he said. The particle-beam is unlike a laser or light ray in that it can't be reflected. Instead, its ray disintegrates matter by ionization.

"The Russians also have different objectives than we do," he said. They went for sheer size. We went toward miniaturization toward technology that is reflected in calculators, integrated circuits and the like. Supposedly, the Soviets have a 25-megaton nuclear bomb that is mind-boggling.

The United States has 1054 nuclear warheads, each with an average size of about 200 kilotons, according to Crow. There are 100 kilotons in one megaton. The Soviets then would equal the blasting power of our 1054 missiles with only eight of their 25 megaton missiles. A mere 14-kiloton bomb was used to destroy Hiroshima in World War II. Therefore, the Soviet Union could destroy 1785 times that with one of their large warheads.

"But it doesn't make much difference if you can destroy the world twice instead of once. It's the technological advances that make a difference," he said. "We're deadly accurate. Our missile guidance allows us to blow up a mailbox on a corner somewhere in the Soviet Union. Our satellite photographs have such fine resolution that we can see people on the street from hundreds of miles in space.

"What makes the big difference, though, is civil defense. Carter's wise in stressing that more now. The Soviet civil defense system is lead by a four-star general. We've recently found that more and more of Russia is forming underground. They've expanded their subway system. It runs for miles and miles. They literally have enough food, water and underground space for an estimated 70 percent of the population to survive nuclear war," he said.

Crow said part of the reason the

Soviets prepare so vigorously for apparent war is because they have been oppressed for hundreds of years.

"They lost 10 million people in one war. Their ideology sees conflict between socialists and capitalists as inevitable. They see us as their natural adversary," he said.

"The U.S. military, on the other hand, serves only as a deterrent. We don't want to start a war or fight one (our entire defense budget is based on keeping wars from taking place. We just have to prove our strength and be ready. But we don't want to use it."

Crow said people see the billions of dollars budgeted to defense as wasteful because no "real" product comes from it.

"All the military does is consume money. You may see a new plane or a new missile, but that's all. It's hard to accept. But it's necessary. We get money and use it only to keep things from not happening—not to make them happen. We don't use our money like other federal agencies or branches. We really can't. The defense budget is not wasted though. Not by any means. It's just that the outcome of its use is less tangible."

He stressed that when he speaks he can only agree with the president, public officials and the military community because of his oath of service. He said military officers are really instruments of American society.

"Carter, his cabinet and Congress all have access to the real facts. All I can do is try to express their sentiments. I work for the president. I'm part of the executive branch. They're the only ones with the final picture. John Q. Public has opinions, but they aren't as relevant as official opinion backed by real, possibly classified, facts," said Crow.

Crow also feels the military may separate even further.

"It may seem a little far-out and speculative, but I see another National Security Act that will create a Space Force from the Air Force. They'll control all military action outside the atmosphere and probably be staffed by a different breed of people. I mean, flying a jet at hundreds of mph is difficult. But pushing buttons to turn a ship in a vacuum is actually easier. That means the Air Force will probably consist of scientists and psychologists instead of pilots," he said.

He believes that the reinstatement of the draft would "improve

military quality because many people will decide to stay in the service."

"I think the ROTC is great too," he said. "My father convinced me in 1971 when he reminded me my draft number was 47. He told me that the difference between being drafted and the ROTC was the difference between carrying a M-16 in Cambodia and a briefcase in the United States. People tend to have a nonaccurate feeling about the service, I think."

Crow, now 28, said he enjoyed his earlier experience as a missile control crew commander in a Minot, N.D., missile silo.

"At the launch control center I just sat in a huge, steel-reinforced concrete watermelon, 60 feet underground with big blast

doors around me and waited until someone sent a coded message to turn a few keys. It didn't scare me. They ask you in advance if you feel you're not capable of turning a key to launch nuclear missiles that might destroy millions of people. If you say yes, then you don't work there. It's nice to know that I'm not afraid to do that. It separates me from a lot of other people in a way."

He said he never really did anything at the launch control center other than wait, think and "deter real hard."

"If I had to do something, you would have known it. Everyone would have known it."

# Increased rural health care possible through new program

By Bill Murray  
Student Writer

The Allied Health Career Specialty program at SIU is a welcome solution to the present lack of qualified rural health manpower in Southern Illinois.

The program is three-fold, including instruction in clinical laboratory, respiratory therapy and radiologic (X-ray) technology. The original program, rural allied health manpower project, started at SIU in 1976 and was aimed at training people to be multi-competent (trained in two of these specialties.) However, that program had funding problems, and students now major in only one specialty and minor in one of the others.

AHCS is a somewhat unique program designed especially for the people of Southern Illinois, according to Louise Wheeler, training coordinator for the clinical laboratory specialty at SIU. AHCS provides the 37 hospital region from Cairo to Effingham with trained specialists it desperately needs. Many of these hospitals are literally taking people off the streets and giving them on the job training to ease the manpower shortage.

"Yet these trainees do not receive the structured curriculum of training nor the overall depth of knowledge that an AHCS student receives. Rural hospitals readily welcome the qualified help," Wheeler said. Also AHCS students are well acquainted with the hospital environment as nearly 80 percent of their work is done in the hospital. "The hospital is the real classroom," Wheeler added.

Of the three AHCS specialties, rural hospitals are especially in need of respiratory therapists and technicians, according to Mark Iberg, training coordinator for respiratory therapy at SIU. Respiratory therapy, a much newer field of medicine, is especially important in Southern Illinois because of the incidence of black

lung among the coal miners in this area.

Respiratory therapists are nationally accredited in accordance with American Medical Association standards. There are two levels of accreditation: one is for certified respiratory technicians-a one year program; the other is for registered respiratory therapists-a two year program. According to Iberg, 26, the AHCS program, though unaccredited, is equal to or surpasses the training given to a certified respiratory technician.

The AHCS program remains unaccredited because SIU lacks facilities, Iberg said. "We can't possibly meet the specifications for accreditation listed by the AMA because we lack the clinical space and machinery. The program here is directed towards those interested in working in a rural setting because the quality of education here is recognized by rural hospitals. Our program is geared toward the people in this area who couldn't afford to leave their jobs and go to an accredited program in a larger city such as Springfield or Chicago," Iberg said.

"In fact one could find a job almost anywhere in the country in a rural area because the hospitals are really hurting for people with training in respiratory therapy. You could get a job in a rural hospital and wind up running a department with a lot of responsibility and good pay," Iberg said.

"We're actually training people for employment opportunities in nearly 37 hospitals in the country. A large half of all the hospitals are small, rural, 100-bed facilities," Wheeler added.

Iberg hopes that an external degree program, such as the one in Boston, will be available in the near future at some institution so his students will be able to be accredited in their specialty. Such a program would enable a student to proficiency out of courses in which

he has sufficient knowledge and take only the additional courses necessary for accreditation. The only area in which Iberg feels his students would need further instruction would be those related to very sophisticated intensive care procedures which can't be covered adequately by the AHCS program due to the lack of available training hours.

The AHCS program is a 24 credit hour course completed in 34 weeks. Students receive instruction in anatomy, physiology and chemistry as well as math, speech and English. These credit hours may be applied toward an associate degree, which requires an additional 41 credit hours.

## Kappa Karnival, Career Day set

By Donna Kunkel  
Staff Writer

Attracting up to 8,000 fraternity brothers, alumni, students and visitors from all over the Midwest, this weekend's Kappa Karnival is one of the largest annual events to take place on the SIU campus.

The Karnival, sponsored by the Kappa Alpha Psi fraternity, starts Thursday evening and continues through Sunday.

The theme of this year's Karnival is "The All Electric Magic Funkin' Movin' Disco Show."

Kappa Karnival started in 1951 and its tradition has been carried on each year since. The Karnival has grown from a gathering of about 30 people when it first started as a reunion of fraternity brothers to an event which attracts almost 8,000 people some years. The Saturday Karnival is held at the SIU Arena with other events held at the chapter house at 102 Small Group Housing.

Included in the Karnival for the first time is SIUC Da' 79, an academic and careers day program.

The program for high school students, transfer students, parents and graduating college students is co-sponsored by the fraternity and the University.

Austin H. Triplett, chairman of this year's Karnival, said members of the fraternity have sent about 700 letters to high school counselors in Illinois inviting them to send students to the program.

"Some people view the Karnival as just a lot of partying but we want to show that we are serious about academics and want to encourage black students to perform well academically," Triplett said. "We are giving the students an opportunity to see the academic parts of SIU and also attend one of the largest University functions."

"Kappa Karnival is tradition to the SIU chapter," Triplett said. "It is unequalled across the country. We do it, no one else does. It happens only at SIU."

Triplett said Kappa Karnival takes about nine months of planning and each of the 34 fraternity brothers works in some capacity to help with the events.

Edward G. Irvin, one of the men who founded the fraternity in 1911 and C. Rogers Wilson, author of "The Story of Kappa Alpha Psi," the fraternity's history, will attend the weekend's events.

The Karnival schedule starts with a housewarming party at 8 p.m. Thursday at the chapter house. It continues Friday with the Academic Day from 8 a.m. to 4 p.m. and a Pre-Karnival Set at the Student Center from 9 p.m. to 2:30 a.m. A basketball tournament will begin Saturday's activities at 9 a.m. at the SIU Arena, the Kappa Karnival parade begins at 2 p.m. on Southern Illinois Avenue and the Karnival with games and prizes starts at 9 p.m. at the Arena.

The Karnival will conclude Sunday with an open house at the chapter residence.

Some local bars will stay open until 6 a.m. on Saturday and Sunday for Karnival goers.

The Kappa Karnival Queen will be crowned Saturday night at the

Arena. Fifteen young women are competing for the title. Triplett said the contestants are judged for their contribution to Kappa Karnival, general rapport with fraternity members and their academic standing.

Triplett said SIU Security has been "very cooperative" in helping plan precautionary methods for the weekend.

Dinh-Hoa Nguyen, director of the Center for Vietnamese Studies at SIU and professor of linguistics and foreign languages and literature, delivered a lecture titled "A Survey of Vietnamese Literatures: Genres, Themes and Tendencies," at Northern Illinois University April 12. Nguyen's appearance was sponsored by the Graduate School and the Center for Southeast Asian Studies.

"The Fulfillment of the Book and Revelation and Other Prophecies" will be the topic of discussion at the final meeting of the Baha'i Club at 7:30 p.m. Thursday in the Home Economics Lounge.

The Sierra Club will meet at 7:30 p.m. Thursday in the Carbondale Savings and Loan Community Room. A film about Alaska will be shown and a speech on the Washington Environmental Lobby by Randall Bytwerk will also be presented.

A tug of war, sponsored by the American Marketing Association and Society for the Advancement of Management, will begin at noon Saturday at Crab Orchard Park. Refreshments will be served.

Robert William, professor of Psychology and Black Studies, and Director of Minority Mental Health Programs at Washington University, will give a speech titled "What It Means to be Black on a Predominantly White Campus" from 3 to 5 p.m. Thursday in Davis Auditorium.

The Student Environmental Center and the Prairie Alliance will sponsor two films on the dangers of nuclear power at 5 p.m. Thursday in the Student Center Ballrooms. The films are titled "The Last Resort" and "Danger: Radioactive Waste."

Medical College Application Service materials will be distributed and application procedures discussed at 5 p.m. Tuesday in Neckers A, Room 256 and at 5 p.m. Wednesday in Neckers A, Room 257.

Ben Gelman, Sunday news editor of the Southern Illinoisian, will be the guest speaker at the luncheon meeting of the SIU Women's Club at 12:30 p.m. May 1 in the Student Center Ballroom B. Cost of the luncheon is \$3.50 with reservation deadline April 28. For reservations contact Rosa Hall, 51 Hillcrest, Carbondale or Dorothy Voss, R. R. 7, Carbondale.

The Touch of Nature SOAR program will be going back-packing May 4 to 6 to Karber's Ridge in the Garden of the Gods. Cost of the trip is \$17. Call 547-0348 for reservations. Deadline is April 26.

The Base Camp Program in the Student Recreation Center will close for equipment check-out April 28 and will open for summer semester June 7. Summer hours will be 4 to 9 p.m. Sunday; 3 to 6 p.m. Monday; 2 to 6 p.m. Thursday and 1 to 6 p.m. Friday.

The US Department of Agriculture and Forest Service has cooperative education positions for sophomores and juniors who are majoring in computer science, business administration, business management, civil engineering, mechanical engineering, land surveyors and journalism. These positions begin either summer or fall semester. Interested students should contact the Career Planning and Placement Center, Woody Hall B24.

# Workshop for women offered

By Paula Donner  
Staff Writer

In an effort to familiarize women with the control they can exercise over their health and to help them work with medical care providers to satisfy the health needs that they can't control, the Patient Activation Program of the Student Health Service is conducting a workshop titled, "Move over Marcus Welby: Redistributing the Power of the Medical Care System."

Sponsored by Women's Programs, the workshop will be held from noon to 4 p.m. Thursday in the Home Economics Lounge. According to Tina Smusz, coordinator of the Patient Activation Program, the purpose of the workshop is to help women exercise more control over their health care.

"More control means un-

derstanding more about the female anatomy and how the body functions; being able to tell when something is wrong and knowing when self care is appropriate for minor health problems," Smusz said. "It also means being able to have one's needs met when professional medical care is sought."

The workshop will cover basic female anatomy, common female ailments and self-cures for them, rights of patients and assertiveness training, she said.

According to statistics, Smusz said, women use health care facilities at a much higher percentage than men, but the women's needs are not being adequately met. "Women make over 25 percent more visits to medical facilities than men," she said.

She also added that at the campus health Service, women make 20 percent more visits than men.

"However," she continued, "despite the fact that women constitute more than 70 percent of the whole health care work force, less than 10 percent of the physicians in this nation are women."

"Women's health care needs have really not been met adequately in the past, because a lot of common female problems have not been researched thoroughly and because women are so under-represented at the key levels of health care."

## Language Day set

More than 1,000 students from about 30 Southern Illinois schools will participate in SIU's eighth annual Foreign Language Day Monday.

Special presentations by the schools will highlight the multi-lingual, multi-cultural program planned by the Department of Foreign Languages and Literatures.

"Our aim on Foreign Language Day is to acquaint students with the wide variety of foreign language programs available here at SIU and to illustrate the enjoyment and usefulness to be derived from the study of other languages and cultures," said Frederick Williams, assistant professor in foreign languages and literatures.

Tours of the campus and language laboratories are also scheduled. The activities will begin at 9:30 a.m. in the Student Center.

# Activities

It's so simple to use, then the world's going crazy.

People are fanatics when it comes to their Pilot Razor Point pens. They're reluctant to give them up. And when someone borrows one, what happens is inevitable.

First, they love the way it writes. Really smooth and extra fine. They go wild over its clever metal collar that helps keep the point from going soft. Naturally they "forget" to give it back, although it's only 79¢.

This can be very embarrassing when they're caught in the act.

Others have purchased Pilot's Flair pen. The one with the slightly less delicate stroke. It's only 69¢.

So if you borrow someone's Razor

Point or Flair pen you'd better

be prepared to pay the consequences.

But, for much less than a dollar, you'd be smart

to buy your own.

# Tips on tornado safety provided

**Editor's Note:** This is the final story in a series of articles on tornadoes. By University News Service

Any way you look at it, Dorothy was dumb.

If the Kansas schoolgirl portrayed by Judy Garland in "The Wizard of Oz" had been caught in a real tornado, the movie probably wouldn't have had such a happy ending.

Real tornadoes are deadly and they don't carry people to the Land of Oz.

"It's literally suicide if you're caught standing up in a tornado," according to David L. Jones, professor in geography. Jones, who has studied tornadoes for nearly 40 years, knows what they can do to buildings and people.

Jones said it's not the wind that make it so dangerous outside during a tornado, but the debris carried by those winds.

"Tornado debris on the move is like a cloud of shrapnel traveling at 200 miles per hour," he said.

Most people have enough sense to take cover if a tornado heads in their direction, but, Jones said, there are still some "old wives' tales" circulating about the best place to go for shelter.

"The best place is a basement, if you have one," Jones said. Both in public buildings and at home, a basement offers the best protection against injury.

Once in the basement, it's safest to go to the northeast corner. That way, if the house is pushed off its foundation by the winds, the floor beams will form a partial shelter against debris falling into the northeast corner.

Almost any other spot in the basement leaves open a greater possibility of the floor beams falling on a person, according to Jones.

If there's no basement, the next

best bet is an inside hallway, a small room such as a restroom or closet away from outside walls. The important thing is to get away from windows and be sure it's the smallest room possible away from the storm.

"The danger from windows is flying glass," Jones said. "They also offer very little protection against things thrown by the wind." If a person can't get to a room without windows, Jones suggested covering the openings with a mattress or sheet of plywood.

Jones said studies of damage from the 1968 tornado that hit Topeka, Kan., indicates that people are twice as likely to be injured if they take shelter in the southwest corner of a house than in the northeast or downwind portion of the building.

The best advice Jones can offer people who live in mobile homes is to go somewhere else.

"Many trailer developments have buildings such as laundries or storage buildings which are sturdier than the trailers," Jones said. There is an Illinois law which requires all new mobile homes to be solidly anchored with steel straps and buried anchors, "but you're still probably safer if you get into a permanent building's basement or interior lower level," Jones added.

People caught in their cars by the approach of a tornado should get out of their vehicles unless they are certain they can drive out of the storm's path.

"A car can be picked up and thrown great distances by tornadic winds," Jones said. "A car that can be picked up and literally wrapped around a tree trunk doesn't offer much protection."

If a motorist thinks he can drive

out of the tornado's path, the best odds are to drive to the southeast or northwest, that is, at right angles to the storm's path, he said.

If caught on foot outdoors, Jones said, it's best to get behind a bank or into a ditch and cover one's head with one's arms if nothing else substantial is available.

Jones said it's an individual family decision whether or not it's worth it to build a tornado shelter. He said Illinois ranks sixth in the country in the number of tornadoes that occur each year. This averages out to between one and two twisters per year in each 50-by-50-mile square of land in the state. This system of measurement is used by the National Weather Service to make record-keeping more accurate.

Taking into account the average size of a tornado track on the ground, that means there's about a one in 2,500 chance that a tornado will hit any particular spot during the tornado season.

In spite of these figures, Jones said, Illinois does seem to have a sort of "tornado alley." It's a 100-mile wide corridor that parallels the Illinois River roughly from St. Louis to Chicago. No one knows why, but significantly more tornadoes occur in that zone than in the areas to either side of it.

"I can't associate any physical features on the ground with this 'alley,'" but more tornadoes do happen there," he said.

An area in central Oklahoma holds the dubious distinction of experiencing the most tornadoes each year—between three and four in each 50-mile square each year—about twice the number that hit Illinois.

## Addition to Morris Library planned

By Kathie Krewer  
Student Writer

A proposal for a major addition to Morris Library is being prepared by the Building Planning Steering Committee. The plan will probably be completed at the end of this academic year, according to Sidney Matthews, director of library services.

An increasing shortage of space has resulted in a loss of seating and less privacy for students and staff members, as well as a shortage of space for collections, Matthews said.

Crowded shelves have caused staff members to store books on tables, on top of card catalogs and the microfilm cabinets in the social studies division on the third floor.

### SIU senior awarded grant for study

Gwenna Jo Weshinsky, senior in English and classical studies, has been awarded a \$3,000 fellowship for graduate study by the Honor Society of Phi Kappa Phi.

Weshinsky, who is from Carbondale, was one of 32 persons selected for the honor from a group of 120 of the nation's outstanding 1979 college graduates. She has a straight-A average and plans to seek a graduate degree in library science at the University of Illinois.

The awards are designed to assist

students entering their first year of graduate or professional school. Primary consideration is given to the applicants' promise of success as revealed by previous scholastic record.

according to the 1977-78 Library Progress Report by Kenneth G. Peterson, dean of library affairs. Social Studies, which has more than 2,500 books stacked on the floor and tables, is not the only division suffering from crowded conditions, Matthews said. Every floor is in need of expansion, according to Matthews. Additional shelving is on order and should arrive sometime this month, will temporarily relieve some of the congestion, he said.

The library is on the University's priority list for funding by the Illinois Board of Higher Education, Matthews said, but at this time "money is tight in the state." Although the library has been on the priority list for several years, he said, current funds are being used

for repairs on Davies Gym. The Building Planning Steering Committee, which was appointed in December 1977, meets about once a month and will probably complete the proposal at the end of this academic year, Matthews said. It will then be submitted to Frank E. Horton, vice president for academic affairs and research, he said.

The 10-member committee includes one undergraduate student, one graduate student, a civil service worker, and seven faculty members.

# Court says no to racial steering

By James H. Rubin  
Associated Press Writer  
WASHINGTON (AP)—Residents of a community and the community itself have the right to sue real estate brokers who "steer" customers to specific neighborhoods because of their race, the Supreme Court ruled Tuesday.

In a decision that could significantly expand the liability of real estate firms in discrimination cases, the court said a community and its residents can challenge racial steering, a practice that violates the federal Fair Housing Act of 1968.

The 7-2 ruling favored four whites in Bellwood, Ill. In the court's words, they claimed "the transformation of their neighborhood from an integrated to a predominantly Negro community is depriving them of the social and professional benefits of living in an integrated society."

The Supreme Court did not rule on the merits of their claims, which now goes to trial. But it gave them legal standing to sue two real estate firms that allegedly steered blacks to their neighborhood and away from other predominantly white sections of the city.

In other decisions, the court: —Unanimously held that tenants who are forced to move when the federal government shuts down a rundown housing project are not entitled to federal aid for relocation.

In separate cases in Indianapolis and Washington, D.C., the court gave a narrow interpretation to a federal relocation law. It said the government must reimburse tenants only if they are forced to move as a direct result of a government takeover of housing for a federal project.

—By a 5-4 margin, upheld a New York state law permitting officials

to prohibit aliens from teaching in public schools. The majority said since teachers can influence student attitudes toward government, the state has the right to bar anyone who has not demonstrated a primary allegiance to the United States by becoming a citizen.

The dissenters said the New York law was a throwback to World War I when "parochialism and fear of the foreigner were the order of the day."

—Ruled that six-member juries must return unanimous verdicts to be binding in criminal cases in state courts. The court overturned an obscenity conviction in Louisiana returned by a jury that split 5-1.

—Overturned a lower court ruling that struck down a music industry copyright practice. The high court said the practice, known as blanket licensing, was not automatically illegal.

# State plans to expand fish hatcheries

By the Associated Press  
State biologists hope a major revamping of the state's fish hatchery system will mean a 10-fold increase in the number of fish available to stock lakes and ponds in Illinois.

Money for construction of a new hatchery at Sand Ridge State Forest and improvements to the existing hatchery at Little Grassy Lake south of Carbondale will come largely from increased fishing and hunting license fees which went into effect March 31. The Department of Conservation also is looking for some state budget money and federal funds to make the job easier, said Fred Tetreault of the department.

By revamping the operation, the state will be in a position to produce some 48 million fish, said Tom Johnson, a fisheries biologist.

Last year, the Little Grassy Lake hatchery and the Spring Grove

hatchery, which would be phased out under the plan, produced only about five million fish for stocking.

The big winners in the deal, Johnson said, will be farmers and sportsmen and Scout groups which own or lease land which has on it lakes and ponds.

"Our first obligation, of necessity, always will be toward the public and state-owned impoundments," Johnson said. "Nonetheless, our studies have shown us just how important private waters are to us, that we cannot afford to ignore them, and that perhaps they should have a greater share of the available fish."

Work on the new hatchery in Mason County and repairs to Little Grassy Lake is expected to get underway by early 1980, he said.

Under the departments plan, more than 5 million of the 48 million fish produced in the new system would go to private ponds those owned by sportsmen's clubs, homeowners' associations and Scout groups. That would be five times the amount stocked in those impoundments in recent years.

Nearly one-third of the fishing in the state takes place on private ponds or those operated by organizations.

Most of the fish produced in the system will go to public areas such as Carlyle, Shelbyville and Rend lakes, Lake Michigan and state-owned waters, he said.

The new hatchery is expected to produce 15 species of fish, twice as many as are produced presently.

# Alumni association taking nominations

Nominations are being accepted for the 1979 class representative and two alternates to serve on the SIU Alumni Association Legislative Council.

The legislative council is the basic governing body of the Alumni Association and meets each year at Homecoming. The delegates represent every graduating class, every alumni club and every constituent society.

To be eligible, students must be graduating in either May or August at any degree level. Interested persons should submit their resumes to the Alumni Office, Fanner Hall, Room 2179, before April 25.

A campus-wide student Steering committee will narrow the nominations to a five or six-person ballot which will be voted on by the entire 1979 graduating class.

# A short course in Bonded Bourbon.

First lesson:  
Bonded Bourbon is so unique that it took an act of Congress (in 1897) to establish the standards for Old Grand-Dad and other Bonded whiskeys.

100 is perfect. Bonded Bourbon must be 100 proof. No more. No less.

Final exam:  
You need only one sip to recognize the clearly superior quality and taste of Old Grand-Dad. Cheers!

Old Grand-Dad Bonded is authentic Kentucky sour-mash Bourbon, made with pure limestone water, the finest grains, and aged in new charred-oak barrels.

Only Bonded whiskeys have a green tax stamp. It's your guarantee that the whiskey is at least four years old. Old Grand-Dad Bonded is always aged longer.

# Symposium on Jews planned

By Fayllis Matters  
Staff Writer

How the Christian world views Israel and the "new Jew" is the theme of the third annual symposium sponsored by the Israel Student Union and the Hillel Jewish Students' Foundation as part of Israel Week.

The symposium will consist of a panel discussion at 7 p.m. Thursday in the Ohio Room of the Student Center. The participants will be Christian and Jewish scholars, clergy and laymen of all denominations, according to Matthew Freund, professor of philosophy.

"We want to bring together participants that represent a broad range of scholarly opinions on academic and religious cultural topics," Freund said.

John Hayward, chairman of the

religious studies department, will serve as moderator of the symposium. Also participating in the discussion will be Sister Alfred Noble, a faculty member and former president of Fontbonne College in St. Louis; Miriam Freund, a Jewish historian and former president of Hadassah, the Women's Zionist Organization in St. Paul, Minn.; Earle Stibitz, professor emeritus of sociology; and the Rev. Duane Lancheater, pastor of the First Presbyterian Church in Carbondale.

The discussion will deal with the following four topics: How has the Holocaust influenced Christian-Jewish relations? What obligation does the Christian world have towards the security of the State of Israel? Has the existence of Israel affected Christian-Jewish relations in this country? What are the ramifications of a reunited

Jerusalem as the capital of Israel?

Freund said that the past 31 years have seen enormous changes in the lives of Jews. From 1948 to 1967, Jerusalem was a split city, with the Old Temple occupied by the Kingdom of Jordan which would not permit Jews in that part of Jerusalem. In 1967, Israel conquered that part of Jerusalem and since that time, Jerusalem has been an open city for all religions, Freund said.

"All religions have been able to come to the holy place," Freund said. "This has brought about the 'new Jew.' A Jew who has gone back to having a state of their own." Freund said students are interested in religion and the Jew has definitely changed.

Last year's symposium topic explored the Jews and the Skokholm incident, when the Nazis wanted to march in the predominantly Jewish suburb, Freund said.

"At the end of that symposium, all issues had been discussed and all sides had been explored," he said. In 1977, the symposium discussed the impact of Nazi propaganda on people, Freund said.

"We try to pick topics that are stimulating and concern current issues," he said.

# Conference scheduled to probe coal problems

Sharon Hutcherson  
Student Writer

The coal reserves of Illinois are the second largest in the country. The use of the state's coal has declined in the past several years because its sulfur content is above federal requirements.

A conference sponsored by SIU's Coal Extraction and Utilization Research Center on May 9 and 10 in Carbondale will probe this problem and discuss many others facing the coal industry, particularly in Illinois.

The enactment of the National Energy Act of 1978, which mandated strict requirements in the industry, including sulfur content levels and the utilization of energy sources, will be discussed at the conference, according to Lyle Sendien, director of the research center.

**BIRDS NUMEROUS IN JAMAICA KINGSTON.** Jamaica (AP) — Jamaica is a bird-lovers' paradise. In nearly 300 different varieties in an area roughly the size of the state of Connecticut. The swallow-tail hummingbird is known in Jamaica as the "doctor bird" because of its long, forked, black tail, reminiscent of the black frock coats worn by physicians in Jamaica a century ago. The U.S. turkey vulture is called "tody" and Jamaica's "John Jay" is more familiar to North Americans as "robin redbreast."

## Jobs on Campus

The following jobs for student workers have been listed by the Office of Student Work and Financial Assistance.

To be eligible, a student must be enrolled full-time and have a current ACT Family Financial Statement on file with the Office of Student Work and Financial Assistance.

Applications should be made in person at the Student Work Office, Woody Hall-B, third floor.

Jobs available as of April 18:  
Typist—nine openings, morning work block; three openings, afternoon work block; seven openings, to be arranged.

Two openings for a receptionist. Must be able to type 35 words-per-minute. Time: 8 a.m. to noon. One opening for clerical. Must be able to type 40 words-per-minute and have had previous office experience.

Time to be arranged. Two openings for receptionists. Must be able to type 50 words-per-minute. Time: Monday, Wednesday and Friday, 8 a.m. to noon and 8 to 11 a.m. Tuesday and Thursday.

Miscellaneous—One opening for an animal caretaker. Time to be arranged. Several openings for summer work. Must be going to summer school. Six openings for mail clerks. Time: 8 a.m. to noon and 12:30 to 3:30 p.m.

The conference is open to all industry representatives and interested citizens. Registration forms are available at the Coal Research Center in Randleman Hall, formerly the Center for Basic Skills. The conference fee is \$40 if paid by May 1 and \$50 thereafter.

The four industry-related topics to be covered at the conference are the basic research areas focused on by the research center. These areas are Illinois mining and minerals resources, coal utilization, social, political concerns and environmental and health concerns.

Sendien, a professor in geology, said, "Through our programs, activities and research we aim to identify research needs and facilitate solutions to the problems faced by the industry. We know that the state is facing some tough political problems but I tell my staff to draw an internal line—to stay out of politicking and find the best solution for all concerned parties."

The center has been part of the University since 1974.

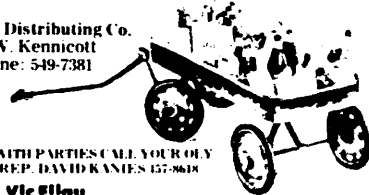

The center is also working with degree-granting units of the University to develop instructional programs.

### Fulfillment of Prophecy

Subject of Bahá'í Presentation

The final public meeting of the semester sponsored by the Bahá'í Club will be held tonight (Thursday, April 19) in the Home Economics Lounge at 7:30 p.m. The topic will be "The Fulfillment of the Book of Revelation and other prophecies." The guest speaker will be Mr. Joel Smith, a resident of Carbondale.

The Bahá'í Faith proclaims that the Promised Day of God, foretold in all the sacred religious scriptures of the world, has come. Bahá'u'lláh, prophet founder of the Bahá'í Faith, comes as another Messenger of God revealing to mankind God's Will for man.

These Divine Truths, proclaimed from Age to Age by the founders of the great religions of the world, are actually in complete harmony with each other; the outward differences appear due to the social requirements of the age in which each religion was revealed.

The Messengers of God are always sent at a time when civilization is deteriorating, and the people have always rejected them because the new teachings are threatening to the established theologies or way of life. They expose the hypocrisy of the religious leaders of the day.

The Bahá'í view of man is not one of a fallen being. Truly, man is not evil by nature and incapable of good, but rather he is "the noblest and most perfect of all created things." He is "a mine rich in gems of inestimable value," and "in him are potentially revealed all the attributes and names of God..." The low qualities of men, he says, are the result of turning away from the spiritual teachings and exaggerating the importance of worldly desires.

The presentation by Mr. Smith will be followed by an open discussion which will provide a forum for questions. Refreshments will also be served.

sponsored by the Bahá'í Club

## NAVY OFFICER. YOU GET RESPONSIBILITY THE MOMENT YOU GET THE STRIPES.

A lot of big corporations offer you a big title. But how many offer a young college graduate a really important job?

As a Navy Officer, you don't have to wait to do a job that counts. We give you one as soon as you've earned your commission. A job with responsibility for the lives of others, and for millions of dollars of complex equipment. A job that requires skill and leadership. A job that Navy Officers have been doing proudly for 200 years.

If that's the kind of job you're looking for, speak to a Navy recruiter. You'll find that Navy Officers have unequalled opportunities in fields like Nuclear Power, Aviation, and Engineering.

Or call toll free 800-841-8000. (In Georgia,

toll free 800-342-5855.) Early responsibility. It's what being a Navy Officer is all about.

## NAVY OFFICERS GET RESPONSIBILITY FAST.

# Attorney: Keep quiet if arrested

By Bill Crowe  
Staff Writer

Students who are arrested should keep quiet and wait to talk to an attorney before they make statements which could be incriminating later in court, according to Jeff Plesko, a staff attorney with the 5th Appellate District defender's office in Mt. Vernon, and Jeff Weiss, former assistant Jackson County public defender.

Weiss and Plesko spoke Tuesday night at a symposium entitled "Before and After Arrest," which was sponsored by the Students' Legal Assistance Office in cooperation with the National Lawyers' Guild.

Weiss said an attorney cannot help a defendant very much if the defendant has already admitted to or tried to talk his way out of the crime he or she has been charged with. He added that this is what happens in 90 percent of the cases he has handled.

"If the police stop you, keep your mouth shut and ask for an attorney," Weiss said. "If that means you have to spend a night in jail, by all means do it. It'll save you a lot of grief."

The two attorneys tried to center their discussions on situations which are most likely to happen to college

students. Questions concerning drug and alcohol-related arrests dominated the symposium.

If students are going to drink, smoke marijuana or take drugs while driving a car, they should "practice preventive law," Weiss said. "Preventive law" means keeping up proper maintenance of one's car and not committing any traffic violations, he explained.

Police officers will often stop a car for a traffic violation or a broken tail light or a noisy muffler and discover a more serious offense taking place, said Weiss.

"Most people get picked up because they're stupid, because they don't think or they don't care," Weiss said. "Try to break only one law at a time, don't get crazy. Don't get carried away."

If an officer does stop a car and the occupants have open liquor, marijuana or drugs in it, Plesko said the occupants should immediately hide the substances. He added that police officers do not have the right to search locked briefcases, toolboxes or glove compartments. Plesko suggested that students drinking beer in a car who are pulled over by the police should try to "chug" the beer to destroy the evidence. However, they have to be careful to drink every drop or they

can still be arrested and charged with driving a car with open liquor in it, he warned.

He added that Illinois law does not require a drunken driving suspect to take a breathalyzer test, which measures the percentage of alcohol in the bloodstream. Drunken drivers will offer to consent themselves by consenting to take the test, Plesko said.

Drivers can have their licenses suspended for three months for refusing to take a breathalyzer test, Plesko said. However, persons convicted of driving while intoxicated will lose their license for a year. They must then reapply to recover their driving rights. Persons convicted of drunken driving will also never be accepted into any graduate, law or medical schools and cannot receive a teaching certificate or get a civil service job.

Weiss suggested that if their car is stopped by the police, the occupants of the car should always get out.

## SIU organization named superior student chapter

The SIU chapter of the Society for the Advancement of Management has been named the top student chapter in the nation.

Officers of the SIU SAM chapter will receive the 1978 Campus Chapter Performance Award at the society's national convention scheduled for May 7 through 9 in Newport Beach, Calif.

The 91 member chapter was one of about 160 SAM campus chapters vying for the award, which is based on the number and quality of activities, including professional programs, recruitment and fund-raising endeavors.

Other campus chapters which achieved high in the competition for achievement points were George Washington University, California

Polyscience Institute, the University of Nebraska at Omaha and the College of St. Benedict.

The SIU chapter was cited for the quality and scope of several professional activities, including career day programs, job interview workshops and recruitment activities.

Student officers of the SIU SAM chapter are Charles A. Marx Jr. of Downers Grove, president; Nick Matras of Carbondale, vice president; Rick Musser of Peoria, vice president for awards; Kevin Ilges of Carbondale, vice president for public relations; Charles F. Moser of Arlington Heights, vice president for activities; and Randi Kaplan of Glenwood, vice president for finance.

## Florida-bound students compete in College Bowl

Five SIU students will be heading for Miami in June to participate in an international College Bowl tournament.

Sponsored by the Association of College Unions-International, the College Bowl tournament is patterned after an old television program of the same name which aired in the 1950s. The question-and-answer game covers general knowledge, the liberal arts, science, mathematics, sports and current events.

The SIU team lost to Notre Dame University by only a few points in regional competition earlier this spring. Because of its strong

showing, the SIU team was chosen as the national "at-large" team and will compete with 15 regional winners June 4 through 9 in Miami.

Members of the team are Brian Cook, senior in the president's degree program; Michael Blum, graduate student in music; Joshua Notowidigdo, sophomore in mathematics and computer science; Ken Greenfield, graduate student in English; and Jim Higgenbotham, junior in engineering. They were selected after campus-wide competition at the Student Center last fall.

Last year, \$25,000 in scholarship money was distributed.

16-mile walk-a-thon to benefit the Archway down the new Airport Road and reverse the course after reaching Route 13 to end back at the Ramada Inn in Carbondale. Participants will pick up New Era Road, past the SIU Airport.

## Walk-a-thon to benefit school

Phil Metzger, Post Writer

200 people can walk 10 miles today, the Archway School is to benefit a great deal. Each mile walked in Archway's annual walk-a-thon means money for the school, located on W. Willow St. in Carbondale. The walk-a-thon is sponsored by the organization of Volunteer Efforts (V.E.) and will begin at 8 a.m. Saturday at the Ramada Inn. Registration for participants is at 7 a.m.

We usually raise \$7,000 or \$8,000 for the walk-a-thon," said Phil Metzger, director of the Archway School.

Archway Inc. is a private, not-for-profit organization dedicated to providing services for developmentally handicapped children from birth to three years of age. The Archway Program is supported by public and private funds,

so there is no direct charge for services, according to Beulignann.

"About 70 percent of our funding comes from the Department of Mental Health and Developmental Disabilities," she said. "We also get federal funds from Title XX, and from the Funds Initiative Program, which is federal funding generated locally."

In addition, funds are donated by various clubs and organizations, as well as by individuals, according to Beulignann.

The money collected helps fund services the Archway School provides.

"Any child from birth to three years of age with any type of developmental delay, no matter how mild or severe, is eligible for services," Beulignann said.

"Each child's program plan is determined by his or her individual needs," she continued. "The total program plan for the child involves

goals in the areas of fine motor skills, gross motor skills, speech and language development, self-help skills, socialization and cognition."

Archway tests children to determine whether they are functioning normally for their chronological ages, Beulignann said.

"There is also a child roundup in public schools," she added. "Notes are sent home to the parents telling them to bring their children in for assessment and evaluation. From this developmental evaluation, you can determine if the child is functioning normally."

Referrals are made to Archway by medical professionals, local social service agencies, parents and ministers.

Two programs are available for the children. One is home-based and the other is a center-based program. The home-based program is available for those parents who wish

# Students learn the art of living as simulated society fluctuates

By Jacqui Koszrak  
Student Writer

Early in February, Simsoc society at SIU was headed for ruin. Rich industrialists exerted power over the poor; resentment grew among the unemployed and minority groups. Labor was unorganized and uncooperative. Waste levels in environmental resources grew, and national economic indicators dropped steadily.

Three weeks later, SIU students instituted a new government in Simsoc. National indicators rose, and society was sustained.

Simsoc is a social process game originated by William A. Gamson, a University of Michigan sociology professor. This semester, Jack McKilip, SIU psychology professor, incorporated Gamson's teaching method into a class called Group Dynamics. Simsoc, Psychology 489.

Gamson created a simulated society with only a rudimentary structure and an unequal distribution of wealth and power. Participants are divided into four groups or regions, and randomly assigned typical social roles. Some acquire power and wealth as corporation heads or as political leaders. Others work in the labor force or for the mass media; some have minority status, others are unemployed.

As in a real society, the main objective for Simsoc society is to achieve social cohesion, and to increase total available income by raising national economic indicators. Society must continually invest in public programs, maintain the environment, and keep the unemployment rate low. If indicators drop below zero, the society collapses, and the game ends.

"At first, most of the power people acted just as they have been con-

ditioned to act, in pursuit of personal gain," said Marwan Burgan, SIU psychology senior. "So the labor force refused to cooperate with industry." Rather than negotiate with labor, the small minority of corporation heads did all the work themselves. In Simsoc, citizens work by unscrupling groups of letters into words.

"After awhile, fear was the atmosphere," said Burgan, 23. "Fear that the indicators would drop too low, and the society would die off." Dying in Simsoc meant finishing the rest of the course with lectures and exams.

Then, government emerged in Simsoc, and the course of events began to change. "We formed a council of representatives from each region," said Steve Paoli, SIU radio-television sophomore. "The council met in a different region every session to insure equal representation for each region."

"Each region pooled their money and resources together, and in a way, created four mini-socialist groups," said Mary Wirtz, SIU sophomore. "Gradually, we began to share as a whole society. A couple of the power people held out for quite awhile. They didn't want to give up their money or their positions."

"In the end, it was the majority that made decisions, and not just the rich and powerful," said Burgan. Richard Carrier, SIU public relations junior and a Simsoc corporation head, was not happy with the new government. "When the government took care of all the subsistence needs of the people, they didn't have to worry about making a living anymore. They got bored with the game and wasted time. I no longer had any control over my labor."

According to McKilip, the most typical result of the Simsoc game is

a mixed welfare state in which the rich are taxed to give subsistence to the poor. "But I don't think the communist type of government that resulted was preconceived," he said. "The students first decided the best way to organize the resources was to pool them. They acted practically, and discovered the ideal, communism, afterward."

McKilip said that one shortcoming of the game may be a tendency toward an unrealistic resolution. "This society evolved into a communist state and yet there are no communists in the group. These same students would not vote in a communist government for Southern Illinois or Carbondale," he said.

At one point in the game, Wirtz acquired all of the society's munche tickets, which could be traded in for pop or real food. "I gave them all away," said Wirtz. "I know in a real-life situation I would have kept more for myself."

With the economy stabilized, and over-all health and welfare sustained, Simsoc citizens had ample time to chat or to play backgammon. One student brought in a slide presentation for the group. McKilip called for a group discussion. Society had discovered leisure time, and according to Gamson, the game was over.

**BOOSTING BLOOD**  
NEW YORK (AP)—Athletes might improve their performance if they got "high" on their own blood rather than turning to vitamins, according to a recent report.

Studies on blood boosting the removal and subsequent reinfusion of the athlete's blood can improve exercise time and performance by as much as 40 percent, according to the report in The Physician and Sportsmedicine magazine.

Under the boosting program, a physician removes up to a quart of blood from the athlete. The blood is then frozen in a process that prevents red blood cells from dying. The athlete trains normally until the body has regenerated.

## Symposium on air pollution to be held by science academy

By Jerry Fallstrom  
Student Writer

A symposium on "Air Pollution Awareness" will highlight the annual meeting of the Illinois State Academy of Science to be held at SIU on Friday and Saturday.

The symposium will be held from 2 to 4:30 p.m. on Friday at Brown Auditorium and will feature speakers concerned with various aspects of air pollution, said George Gass, professor of physiology.

David Jones, professor in geography will speak on "Fundamentals of Air Pollution Meteorology." Following Jones will be Howard Hesketh, SIU professor in thermal and environmental engineering. His topic will be "Air Pollution Controls."

Robert Beck, of the SIU School of Law, will speak on the legal aspects of air pollution. The director of the Division of Air and Hazardous Materials for Region 5 of the Environmental Protection Agency, Robert Duprey, will discuss "Air Pollutants and Their Effects."

A public lecture will be given at 2

p.m. on April 20 at Brown Auditorium by Norman Doornbos, dean of the College of Science. His topic will be, "Nature's Healing Hand."

According to George Gass, presentations of scientific papers will be given on April 21. The 15-minute presentations will be held in the Agriculture Building starting at different times in the morning.

The meeting of scientists from universities and industry is open to the public, said Gass, who is the vice-president of ISAS.

# Conference to promote art program as general educational requirement

Jeff LaRose  
Staff Writer

A one-day conference to make the public aware of the goals of the arts in General Education State Plan will be held April 26 in the Student Center.

The plan was recently adopted by the State Board of Education in Illinois and encourages school districts to establish arts in general education programs for all students, according to Cecelia Muckelroy, program services consultant for the Illinois Office of Education.

The conference is entitled, "Spring Celebration: Excellence in the Arts" and will include presentations in music, visual arts, media arts, theater, literary arts and dance movement.

Sponsors for the conference are the Southern Illinois Regional Office of Education, the Region V Arts Advisory Committee, and the Illinois Project for Educational Application.

The conference will begin at 9 a.m. in the Student Center auditorium with Muckelroy, conference chairperson, bidding goodbye to the Old Way of Looking at the Arts.

Sylvia Wallach, an artist, composer and teacher, will then speak on "Arts in General Education: What It Means for Schools." Wallach is affiliated with Urban Gateways, an arts and education agency whose resources are available to all schools in the Chicago metropolitan area.

All conference participants will have the opportunity to attend a short session which will represent the components defined in the state plan needed for a comprehensive arts in general education program, Muckelroy said.

At noon a luncheon will be held in Millroom D. The keynote speaker will be Louis Rubin, professor in the College of Education at the University of Illinois. His topic will be "The Importance of the Arts in Education."

Rubin has served on the National Advisory Board of Business and Industries for the Arts and has worked with David Rockefeller on the "Rockefeller Report of the Arts in Education."

Special displays will be presented by Mitchell Museum of Mount

The above illustration represents "Spring Celebration: Excellence in the Arts," a conference designed to encourage schools to incorporate arts programs within their general education requirements. The conference will feature various art presentations.

Vernon; the University Museum and Art Galleries, SIU-C; the Marion Cultural and Civic Center; and the Illinois Art Education Association of SIU-E.

Demonstrations will be given in spinning by Renie Mavigliano, an art instructor from Gallatin, and in painting by Arlene Green, an artist from Sparta.

Performers will include Namora Williams, a folk singer from Vergennes, and the Creative Dance Troupe from the School of the Hearing Impaired from Marion.

A registration fee of \$10 is required for the conference and luncheon. Muckelroy said students are welcome to the conference for free if they do not eat lunch.

## Come hear a demonstration of the new Technics 'Silver Edition' Amplifiers this week at Grand Central Stereo.

### Technics

We'd like for you to think of Grand Central Stereo as your kind of stereo store. Where you can hear a demonstration of the new Technics 'Silver Edition' amplifiers or any of over 50 lines of audio components any time you'd like.

Grand Central Stereo is a store where the salespeople know what they're talking about. We sell nothing but hi-fi, so our salespeople can concentrate completely on keeping up with the latest hi-fi technology.

# Surgery practices questioned

Robert Wilson, Staff Press Writer (CAGO) (AP)—Outside investigators will probe charges that experimental surgery was performed on Manteno Mental Health patients and that severe abuse occurred at the center, an official said Wednesday.

Robert De Vito, director of the Department of Mental Health, said the Department of Law Enforcement agreed to conduct the probe, and the new Guardianship and Health Advocacy Commission will investigate the charges.

De Vito said he has conducted an investigation of his own and found allegations to be groundless. But said the outside inquiry was needed to prove that the department was telling the truth.

De Vito said he has asked the Guardianship commission to investigate charges that experimental

and unnecessary breast and gall bladder surgery was performed in the mid-1970s on patients at Manteno.

The allegations of experimental surgery were made in a memorandum written in 1977 by Dr. Anne M. Seiden, now chairman of the Department of Psychiatry at Cook County Hospital. Her memo labeled the Manteno facility as a "human dog lab."

Dr. Seiden now says the memo was a "misunderstanding," "exaggerated, and based on 'second-hand rumors.'"

Dr. Seiden's allegations were based on statements made by Dr. Patti Tighe, a department consultant, who has refused to comment publicly on the charges.

De Vito also said he has completed an investigation into charges that 25 to 100 Manteno patients had their adrenal glands removed during experimental surgery by the University of Chicago in the 1950s and 1960s.

He said that only five Manteno patients were operated on—all in 1951—and that the families of each patient had given consent. The allegations were made in a lawsuit filed by the public guardian of Cook County.

De Vito said the consent forms would meet present-day standards. However, he added that he was "quite sure" the surgery could not take place today.

De Vito said he has asked the Department of Law Enforcement to conduct the investigations of allegations of abuse at Chester, where criminally insane persons are housed.

SHELLFISH HIGH

## Flooded Illinois families watch river waters rise

The Associated Press  
Families displaced by month-long flooding along the Illinois River flooded and waited Wednesday as water level continued its slow steady retreat.

Officials say some of those who ousted their homes in the flood will begin moving back next week, following heavy spring showers which reverse the river's fall.

The Illinois at Peoria fell to 25.7 feet Tuesday, 7.7 feet above flood stage. The river crested Tuesday at Johnston at about 14 feet above flood stage and will fall along its entire length over the next several days, according to the National Weather Service.

"We anticipate it will keep going down unless we get some rain and it could have to be pretty heavy rain to slow the decline of the river," said Angelo Zerbonia of the U.S. Army Corps of Engineers.

The Illinois, which has spilled into low-lying communities and surrounded hundreds of homes is above flood stage from LaSalle south to its confluence with the Mississippi River.

The weather service predicted that it would fall about half a foot each day through the weekend, although there was a chance of showers in the forecast by Friday night for portions of flood-ravaged central Illinois.

The Mississippi River has crested down to Cairo and isn't expected to cause any problems along the Illinois border in the days ahead and the Rock River, which has fallen below flood stage except at Joslin, continued to drop. The weather service predicted that the Rock would slip below flood stage at Joslin by Saturday.

# Walk-a-thon for Archway planned

(Continued from Page 21)

to work with their children in the home or for those children who cannot be transported to the center via the bus service that operates within a 40-minute radius of the school, Beulignann said.

"We also encourage the home-based program for children under a year old," she said.

"The home-based program centers around certified teachers who train parents to become more effective teachers of their own children," she said. "The parent is considered the primary teacher or programmer and plays a very important role in children from birth to three years of age."

The home-based program has two teachers who visit the children one or two days a week for a couple of hours a day, she said. The teachers work with the parents to set up a program and help them follow through with it.

"The teacher comes back the following week, checks the program and problems, and sets up new objectives," Beulignann said. "The objectives set up are small enough so they are obtainable in a week."

"The center-based program is set up five days a week," she said. "The center is open from 9 a. m. to 2 p. m. five days a week. However, a child

may not come in every day. It varies according to the individual."

The center-based staff consists of a certified teacher, two paraprofessionals and one teacher aide, Beulignann said. There is also a full-time physical therapist who makes home visits and two speech therapists who come in four days a week and work individually with the children.

A number of volunteers help out at the school. These include students from the departments of special education, child and family, rehabilitation, early childhood, recreation, psychology and music. Design Department students also get experience designing equipment for the school.

"Both the center-based and home-based programs are open to children from Jackson, Union, Perry, Franklin and Williamson counties," Beulignann said. However, starting July 1, the center-based programs will be available only to children from Jackson, Union and Perry counties.

There are 11 to 20 students in the center program and 24 to 30 children in the home-based program. Children can be enrolled in both programs, depending on their needs. And both of these programs are available to the parents at no cost.

The "birth to three" program has been in operation for five years.

"Seven years ago the Archway School was started through a group of interested parents with children with a range of disabilities or handicaps who weren't being served in public schools," Beulignann said. "It is now mandated that public schools have to service these children."

These programs have been fairly successful in helping children, according to Beulignann.

Research has shown that early intervention cannot only alleviate disabilities but it can also prevent further disabilities or other disabilities from occurring," she said. "The earlier you work with parents with children that have disabilities, the better adjusted the parents are to accepting the disability and participating in alleviating the disability."

## ANNUAL "SUPER SALE"

SATURDAY, APRIL 21st  
10:30 am to 6:00 pm

**Come in and register for a free Takamine Guitar & Case - \$250 value**

No purchase necessary—just register Friday or Saturday during the sale, drawing held at closing at 6 pm on Saturday.

**FEATURING: SUPER SAVINGS FROM 10-50% on ALL ITEMS IN THE STORE**

**Also look for Red Tag Specials at even extra super discounts!**

SOME EXAMPLES:	Reg.	Super Price
Martin Hardshell Guitar Case (fits any standard dreadnought guitar)	\$ 115.00	\$ 79.95
Grover Tuning Machines	\$ 33.00	\$ 21.95
Moog Satellite Synthesizer (DEMO)	\$ 795.00	\$ 395.00
Intersound 8x1 P.A. Mixer (last one)	\$ 475.00	\$ 325.00
Vega Rosewood Guitar (By C.F. Martin)	\$ 510.00	\$ 299.00
W. L. M. Portable Organ	\$2,795.00	\$2,195.00
Neptune Real Time Analyzer (Shows ya how to set up your graphic E.Q.)	\$ 550.00	\$ 299.00

★ Manufacturers sales reps. will be on hand to help you with questions about their products.

★ All Items are 1st come, 1st served.

★ Trade-ins will be limited.

★ We feature name brands like: Alvarez, Ibanez, Music Man, Gretsch & many more!

★ ★ Remember, "Everything" will be on sale!!!

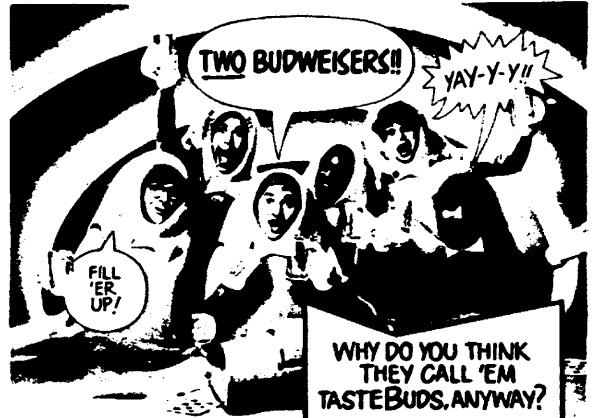

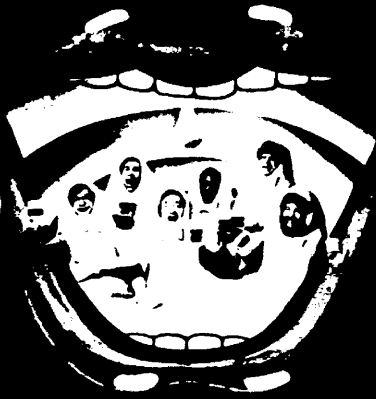

PLUS MANY, MANY MORE!!

# Lady golfers seek sunshine, victory

By David Glick

Staff Writer  
With all sorts of good luck charms draped over them, members of the women's golf team left Carbondale Wednesday to look for sunshine at Huntington, W. Va., site of this weekend's Marshall University Invitational.

Weather permitting, the Salukis will try to get in 36 holes of golf at the 1,500 yard Riviera Golf Course. Previous attempts to open the season, once at Crab Orchard Golf Course and the other at Illinois, failed. Ram was the culprit on both occasions.

Despite the lack of practice, Coach Sandy Blaha feels her team has a strong chance of winning the invitational, which begins Friday and ends Saturday.

The Salukis will be entering their

strongest team at Marshall. Junior Sandy Lemon will again try to launch her charge for a berth at the AIAW national meet. The two-time state champion needs to average 79 on each round to make the tourney. Lemon averaged 81.3 during the fall season.

Because of the pressure involved, Blaha said she is expecting a good tournament from Lemon. Blaha said that Lemon has a good shot at the individual title.

The Salukis will be looking to improve a string of eighth-place finishes at Marshall. SIU has finished eighth in each of the previous three tournaments. Blaha believes the Salukis are capable of shooting a 64 team score, which is 10 shots better than Penn State's winning total last year. Experience is the key to this season's team,

according to Blaha.

Lori Sackman, the team's No. 2 player, Sue Fazio, Judy Dohrmann, Penny Porter and Jo Idoux are expected to be the Salukis' top players in the 10-team tourney. Each scored in the majority of the fall meets.

Blaha hopes to put the team through a practice round on Thursday on the par 74 layout, charting the greens to see how the ball rolls and allowing the team to become reacquainted with the Riviera course.

The only thing that may have Blaha upset is the weather. When the Salukis competed at Marshall last year, it snowed. Blaha hopes all the natural elements but sunshine will stay away from Huntington this weekend.

# Brewers top Red Sox; White Sox blast Toronto

By The Associated Press

Greg Pryor had three hits and drove in four runs to spark the Chicago White Sox to a 12-5 victory Wednesday over the Toronto Blue Jays. The win allowed the White Sox to sweep the three-game series.

Richard Wortham, 30, went eight innings for Chicago. He allowed seven hits while striking out six and walking just two. Dewey Robinson pitched the ninth in relief.

Wortham was backed by an 18-hit attack which featured three hits each by Chet Lemon, Alan Banister, Eric Soderholm and Mike Squires.

Jim Clancy, 1-2, started for Toronto, but left in the third inning with the bases loaded and Chicago leading 3-0.

Bill Nahorodny greeted reliever Tom Murphy with a run-scoring grounder to short and Pryor followed with a two-run double down the left field line.

Chicago had scored two unearned runs in the second inning when first baseman John Mayberry bobbled a

grounder by Soderholm. Squires, Nahorodny, Pryor and Ralph Garr followed with consecutive singles.

In other American League games: Rob Picciolo's bases-loaded single in the seventh inning lifted the Oakland A's to a 5-2 victory over the Seattle Mariners in Oakland.

Paul Molitor and Sal Bando hit consecutive home runs in the seventh inning to help right-hander Larry Sorensen and the Milwaukee Brewers beat the Boston Red Sox 4-1 in Boston. The two homers, plus Cecil Cooper's long triple which followed the blasts, came off Red Sox reliever Bill Campbell.

Gary Alexander slammed a three-run homer to give the Cleveland Indians a 6-4 victory over the Texas Rangers in Cleveland.

Sid Monge, 1-0, got the victory in relief of rookie Eric Wilkins. They combined to limit Texas to seven hits. Doc Medich, 0-1, took the loss.

Medich, who came on in the fourth inning, left with Texas ahead 4-3 with two out and one on in the seventh.

# Cards nip Cubs on 14th-inning hit

CHICAGO (AP) — Tony Scott's second single of the game drove in Keith Hernandez from third base with two outs in the 14th inning Wednesday, lifting the St. Louis Cardinals to a 3-2 victory over the Chicago Cubs.

Hernandez doubled to the center field wall with one out against loser Donnie Moore, 0-1. Ted Simmons was issued an intentional walk and Hernandez advanced to third when Dane Logg rapped into a force play.

Scott, who had scored the game's tying run in the seventh inning, then lined a single to left field to drive in Hernandez and give the victory to Tom Bruno, 1-0. Darold Knowles retired the final batter in the 14th and earned his first save of the year.

Dave Kingman's run-scoring double in the third inning gave Chicago a 1-0 lead, and his RBI single in the fifth made it 2-0 against St. Louis starter Pete Vuckovich. The Cardinals rallied to tie the game in the seventh.

**BELL'AGIO**

"BELL-AH-JOE"

The ancient Greeks and Romans, those supremely civilized peoples, believed the gods drank neither water nor ordinary wine but nectar. This was a delicious and invigorating beverage made from fruit juice, naturally sweet, lightly fermented, and sparkling like the constellations of the Zodiac.

It was nectar that supplied the energy, the super-natural force needed for heroic and godlike deeds. Supposedly, it was the same rare nectar that promoted immortality.

Of course, this heavenly liquid is not for us earthlings. But Villa Banfi, U.S.A., importer of Rianite and the leading authority on the wines of Italy, in its search for rare wines, has found Bell'Agio, a most mortal and very natural wine of distinction.

Drinking Bell'Agio is a sensuous experience. One can say the wine is soft, meaning both that it is a luscious and low in alcohol. But at the same time it is vibrant with life. It has the haunting fragrance and flavor of the grape harvest... a cluster of giant sun-ripened Muscat grapes beaded with morning dew, their mysterious overtones of flowers and spices waiting to be liberated by the genius of the winemaker.

Since Villa Banfi specializes in wines that are pure and natural, let us bring the subject down to earth with a few facts...

- Bell'Agio is a completely natural grape wine. It contains no chemical additives.
- The sweetness in Bell'Agio comes entirely from natural grape sugars. ("Fructose," scientifically speaking!)
- When chilled, the exceptionally moderate degree of alcohol in Bell'Agio makes it a refreshing beverage, but one that is not cloyingly sweet.
- Bell'Agio literally means "easy-going." You'll find it easy going and delicious when chilled... perfect for dining or entertaining.

University of Missouri-St. Louis, which they won, and at the University of Illinois Invitational, where they placed 11th.

This is the team's last competition before the Missouri Valley Conference tournament: April 30 to May 2. The MVC is a qualifying tournament for the NCAA championships.

# Golfers in tourney at Wichita

Rained out of the Bradley Invitational, which they were favored to win, the Saluki golfers now will face some of their toughest competition this season in the Wichita State Invitational Friday and Saturday.

The Salukis have competed only twice and have practiced only a few times because the rainy spring has kept the courses closed. But, undaunted, Coach Wal Siemsglusz has hopes for a high finish in this weekend's 54-hole tourney.

SIU will take a five-man team consisting of Larry Emery, Butch Poshard, Jay Smith, Doug Clemens and Jim Reburn.

Top-ranked Oklahoma State and host Wichita State may hurt the Salukis' chances of winning, but Siemsglusz said he is hoping for a finish in the top four or five teams with a team score under 900, which he says the team is capable of.

Larry Emery is capable of winning it all, although Oklahoma and Wichita State both have some top golfers," Siemsglusz said of the Salukis' No. 1 man.

The two tournaments in which the Salukis have played were at the WINE UP.

NEW YORK (AP) — The consumption of wine will register the highest annual growth rate among America's favorite beverages from now until 1990, according to an industry magazine.

# Men's athletics budget dries up, strands track team

By David Gafrick  
Staff Writer and  
Brad Bekker  
Sports Editor

A shortage in the men's athletics budget has forced Athletics Director Gale Sayers to cut part of the competitive schedule of most spring sports to save expenses.

"We overestimated the income we thought we were going to produce," Sayers said Wednesday.

George Mace, vice president for University relations, said the department expected \$584,933 in income from gate receipts, contractual guarantees (as from television revenue), and "carryover dollars from last year.

Actual income was \$84,000 short of that figure, Mace said. The shortfall represents about five percent of the \$1.7 million men's budget.

The track team will be hit hardest by the money crunch. The Salukis will miss the Kansas Relays this weekend, and most likely will miss the Central Collegiate May 25-26.

Coach Lew Hartzog said, however, that every effort will be made to compete in the Drake Relays, the Illinois Intercollegiate, the Missouri Valley

Conference meet, and the NCAA meet.

"I don't know how we're going to get there, but you can bet that the maroon and white will be there," Hartzog said. He said the Salukis may use a car pool to get to Drake April 27-28.

Mace said cutbacks were arranged so that each spring sports team will be able to attend its Valley conference meet. Normally, a win in that meet is required for a team or an individual athlete to advance to the NCAA meet. The NCAA pays expenses to its meets.

The tennis team is less affected by the cutback because the rest of its regular-season meets are at home. Two golf meets, at Evansville and Peoria, were rained out this season. The golfers are in Wichita, Kan., Friday and Saturday for their final match before the Valley meet.

The golf team's budget this year was \$14,890; the tennis team's, \$15,215.

The cutbacks will not affect the baseball schedule — the Salukis, after Wednesday's games at Nashville, Tenn., are at home for all but three of the remainder of their games, and must compete in the Valley tournament in Wichita May 17-20 to have a shot at qualifying for the NCAA tournament.

Also affected by the money problems

are phone calls. Long distance calls now will be charged to the callers' home phones.

"We can't make any long distance calls," Tom Simons, sports information director, said.

The money troubles that forced the cutbacks were not unexpected, Sayers said. "I've seen it coming," he said. "I told the IAC (Intercollegiate Athletics Committee) and Pr. Mace about it, but we didn't think it would be this soon."

Part of the reason for the money shortage, Mace said, was that basketball, a major revenue-producing sport, went over its \$90,660 budget by about \$6,000 or \$7,000.

Mace said the main reason for the cutbacks, however, is that the projections for self-generated income — attendance and television revenue for basketball and football, for example — were wrong.

He said, though, that the projections could have been thrown off by "one big rain at a football game or one bad snow at (the time of) a basketball game."

The men's athletics coaches, while not happy with the cutbacks, appear to be accepting them.

"My coaches, they fight for their

programs," Sayers said, "and I expect them to fight or I wouldn't want them to be here. Yes, they're upset... but that's understandable. But they understand..."

Then Sayers added with a wry laugh: "I'm not the most popular guy around here right now."

Hartzog said he was quite upset when he was informed of the cutback Tuesday, but said he now has accepted it.

"We're going to have to make some readjustments, but I think we have enough left to do what we need to do," he said. "We have enough money in our budget to do the things we need to do, but not enough for the frills. I think we have enough to bring in our recruits."

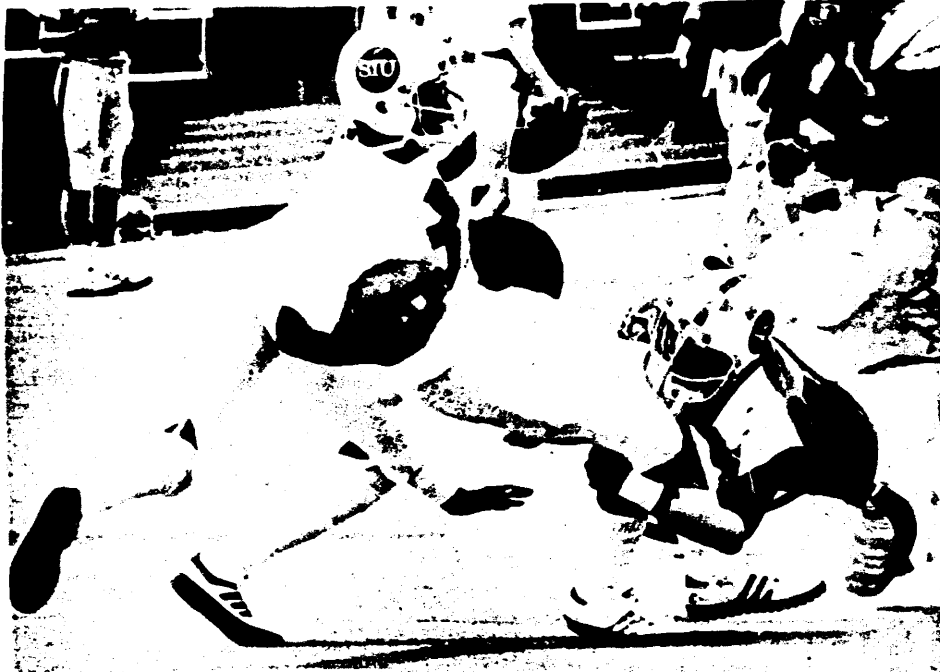

The budget for cross-country and track is \$51,175.

"We're going to the Illini Classic (this weekend) instead of Kansas," Hartzog continued. "We think we'll save about \$2,000. I will figure out a way to go to Drake. We'll have to tighten our belts, but we're going to do it."

"I've been part of the SIU family for 19 years," he said, "and it's not anyone's fault. I know it's not going to be a long-range thing. I think we're going to get our normal (budget) raise."

## Hanging on

Quarterback Arthur Williams starts to fall to the McAndrew Stadium turf in the grasp of a defensive player who isn't letting a knee in his face mask stop him. Spring practice continued Wednesday with an intrasquad scrimmage. Williams, Gerald Carr and John Cernak are the returning lettermen who will be battling it out for the No. 1 quarterback's job when the season begins in the fall. The quarterbacks and the rest of the Salukis will continue to work until the spring session closes with the annual spring game on April 28. (Staff photo by Phil Bankster)

# Softball team wins twice, but hitting woes continue

By Ella Reilly  
Staff Writer

The women's softball team is still being plagued by its hitting — or rather, by its lack of it. The Salukis doggedly pulled through for two wins against Southeast Missouri State Tuesday, despite its total of seven hits in both games.

The Salukis defeated SEMO, which had 16 hits, 5-4 and 3-2, raising SIU's record to 13-4.

In the second game of the doubleheader all runs were scored in the first inning. Pitcher Sharon Gerken walked her first batter, followed by two pop-fly outs. Gerken, who said she did not adjust to the umpire's narrow strike zone in the first inning, allowed a single, a walk and another base hit for SEMO's first run and another walk for SEMO's second and last run.

In the bottom of the first, left fielder Lisa Dennis singled and advanced to second when Rolin Deterding walked. Deb Stamm made it to first on an error when second baseman Sue Woker bobbled the ball, which loaded the bases. First baseman Gena Valli connected for a double for two RBI's, while Stamm came in for the final run when Helen Meyer was thrown out at first.

Tight defense kept the Salukis in both games. SIU made two errors in the first game and one in the second.

In the first game, left fielder Lisa Dennis saved the ball game for SIU when she fielded a deep hit by SEMO's Mary Jane McClenning. Dennis quickly threw the ball into the infield to hold McClenning to a triple and prevent SEMO from tying the game.

In the second game, with the score 3-2, center fielder

Robin Deterding made what her teammates called "a beautiful play" when she fielded what looked like a home run. She raced to the ball and threw to Stamm, who threw to Meyer to get the runner out at third.

But as Coach Kay Brechtelsbauer has said the "hitting is just not there."

The hitting slump, seemed at first to be only the beginning season blues. The rain had kept the team inside well into the season and it had little opportunity for batting practice. But three weeks and eight games are left before the state playoffs.

Brechtelsbauer said the team showed its hitting caliber in a doubleheader last Sunday when SIU defeated Illinois State 6-0 and 9-2 with 24 hits. But in four games at the Illinois State Invitational last Friday and Saturday, the Salukis couldn't get more than five hits per game.

"All our power hitters are thinking big hits and not singles," pitcher-third baseman Meyer said. Meyer is tied with Stamm for the team leadership in batting average, each hitting .285.

"I don't think not having practice is a good excuse anymore," Gerken said. "We don't have a good mental attitude towards hitting. We're not concentrating when we get to the plate."

SIU shortstop Mary Biendi leans into a throw across the infield in the first game against Southeast Missouri. Despite making only seven hits, the Salukis defeated SEMO 5-4 and 3-2 in Tuesday's doubleheader. (Staff photo by George Burns)
