McAndrew study proposal completed

By Rod Stone
Staff Writer

A proposal for an investigation of the structural safety of Memorial Stadium has been completed by a Springfield engineering firm, a University official said Monday.

Clarence Dougherty, vice president for campus services, said the proposal, which was prepared by Hanson Engineering, was received Monday. But he had not had a chance to look at it.

Dougherty said that he and other University administrators would decide whether or not to move forward with an investigation based on the proposal sometime this week.

Dougherty also said that McAndrew Stadium will not be used this fall unless SIUC receives some qualified reassurances that it is safe.

Dougherty declined to comment on what an investigation of the stadium would find.

William E. Brower, an associate professor in engineering mechanics, said last week that the chances are good that McAndrew Stadium could collapse under the stress created by a capacity crowd.

Brower said that a one-in-a-thousand chance of the stadium's collapse was his most pessimistic estimate.

In a report given to University administrators 14 months ago, Brower listed several structural faults in the east stands of the stadium.

The report says that arrays of bolts were missing in the support structure and structural maintenance appeared to be nonexistent.

The report also says fatigue fractures in the main support beam of the east stands could result from vibrations caused by uneven foot-stomping of a capacity crowd.

Brower said in the report that he witnessed a inch peak-to-peak bounce in the beam during a football game in the near-capacity crowd in 1981. A 2-inch bounce occurs more than twice the fatigue-endurance limit on the beam, he reported.

Dougherty said last week that the University had done the repairs it felt were necessary. He said Brower had recommended another in-depth study in his report, but the University was waiting for results of a feasibility study based on three reports of other qualified engineers.

The study was safe, another report said.

One report, released in 1981, was done by a Northbrook consulting firm and a second was performed by Engineers Collaborative, the company which designed the stadium in 1953. Dougherty said.

One, a visual inspection was conducted by Nowacki, a professor in engineering mechanics, Dougherty said.

Dougherty listed several items that the investigation will need to focus on to determine the structural integrity of the stadium.

First, Dougherty said, the investigation should determine if the stadium was unsafe.

Dougherty said that the investigation had not been moved up in time for any necessary steps to be made before the football season.

Dougherty said last week.

Student trustee vote bill introduced

By Terry Luceke
Staff Writer

Student trustees on Illinois' higher education governing boards may have the right to binding votes if a bill introduced by state Rep. Lee Preston, D-Chicago, becomes law.

"The decision of these boards affect students in many ways, but students have little input into important decisions affecting them," Preston said.

Several bills of this nature have been introduced in the past but were unsuccessful. Preston's bill differs from previous ones in that it establishes a collective vote for student trustees on each board instead of granting binding votes to each trustee. This means that if the student trustees agree on an issue, their vote will count, but if they disagree, their votes will be only advisory.

Tom Hasse, of the Illinois Student Association which worked closely with Preston and ISA President Larry Cohen on the bill, said the bill is an incremental step in getting the comment or input from students.

Hasse said that granting each student trustee a binding vote was not politically feasible because it would alter the structure of the boards. Preston's plan has been received much better in the Illinois House, he said.

One argument supporting the advisory vote is that there is no way to judge student sentiment when the student trustees disagree, Hasse said.

Southern Illinois University has two students on its board of Trustees: Sharon Hatfield, a senior in engineering, and John Kendleman, a senior in electrical engineering. The ISA, an organization of student leaders representing public higher education, has been established to provide input to the University.

Represents from the Undergraduate Student Organization, the Graduate and Professional Student Council, the Illinois Public Interest Research Group and some student organizations are scheduled to attend the day-long conference. USO President Jerry Cook, a former ISA president, said the caucus is vital, since if Gov. Jim Thompson's so-called doomsday budget is passed, SIUC could lose as much as $12.8 million in state funds.

Today's tuition increase next year for students at SIUC, said student trustee president, would be in addition to the 10-percenter cut recommended by the SIU Board of Trustees in February.

The student representatives are scheduled to meet with legislators from their local districts, as well as other student leaders from throughout the state. The students will lobby for additional funds for higher education and for support for federal education tax increase package.

"These funds are vital if we are going to continue to provide access to quality higher education," Cook said.

Hearing slated for rental housing views

Students living off campus can air their opinions, complaints, and suggestions about the quality of rental housing in Carbondale at a public hearing at 7 p.m. Tuesday, to 607 E. College St.

The hearing, sponsored by the Carbondale Citizens Advisory Committee, will be held in an attempt to discuss problems landlords have encountered with tenant relations and tenant-landlord relations.

CAC members will present their concerns of a Carbondale landlord survey and discuss rental housing policies implemented in other cities, according to JAC Chairman John Foster. John Vow, director of the city's Division of Code Enforcement, and Gilbert Swinburne, vice president of student affairs, will also speak.

Citizens who wish to speak are asked to be present in time to discuss their views. Public comments will also be made by the CAC in making recommendations on rental housing to the Carbondale City Council, Foster said.

Students to go to Springfield to lobby for education funds

By James Derk
Staff Writer

About 25 SIUC student leaders will be in Springfield Tuesday to lobby for additional funds for higher education.

The students will be attending a statewide caucus sponsored by the Illinois Student Association.

The ISA is a statewide organization of student leaders representing public higher education.

Representatives from the Undergraduate Student Organization, the Graduate and Professional Student Council, the Illinois Public Interest Research Group and some student organizations are scheduled to attend the day-long conference Tuesday. USO President Jerry Cook, a former ISA president, said the caucus is vital, since if Gov. Jim Thompson's so-called doomsday budget is passed, SIUC could lose as much as $12.8 million in state funds.

Today's tuition increase next year for students at SIUC, said student trustee president, would be in addition to the 10-percenter cut recommended by the SIU Board of Trustees in February.

The student representatives are scheduled to meet with legislators from their local districts, as well as other student leaders from throughout the state. The students will lobby for additional funds for higher education and for support for federal education tax increase package.

"These funds are vital if we are going to continue to provide access to quality higher education," Cook said.

At least 39 die in U.S. Embassy attack

BEIRUT, Lebanon (AP) - A pick-up truck packed with explosives blew up in the middle of the U.S. Embassy's main section during the lunch hour Monday, and Lebanese authorities said at least 39 people were killed, including five Americans. Police said 120 people were wounded.

A police official said five American deaths had been confirmed and six other Americans were unaccounted for. He said 22 Americans were wounded.

The American dead reportedly included a Marine, two soldiers and an employee of the Agency for International Development.

It was the worst attack against a U.S. target in Lebanon, and a pro-Iranian terrorist group, Mojbed Holy War, claimed responsibility.

Police official, who declined to be identified in accordance with government regulations, said eight of the confirmed dead were Lebanese and the other 26 had not been identified. He said 98 Lebanese were wounded.

Police said the front of the embassy was blown out by 500 pounds of explosives packed into a vehicle which was described as a " GMC pickup."

An earlier police report said the vehicle was a gray car used by the Lebanese security police. U.S. military personnel said one U.S. Marine and two U.S. soldiers were among those killed when the car exploded in a ball of flame shortly after 1 p.m. (6 a.m. EST) on the embassy's circular driveway.

At least 11 injured were reported at University Hospital. 63 people suffered smoke inhalation and 14 people were taken to Stockholm, the only hospital in that area.
The Graduate and Professional Student Council (GPSC) President Ann D8IMS said Monday that she felt faculty, professional staff and student appointees would contain a provision giving the board this authority. The Faculty Senate and the Graduate Council have strongly opposed the proposal.

GPSC President Ann Gerecke said Monday that she felt graduate students should be excluded from the proposal because of the difference in the salaries paid to graduate assistants as compared to other employees. On the average, graduate students on assistanships make about $5,500 a year, she said.

"I wasExceptions are the lack of specificity in the document," Gerecke said, agreeing with Senate President Herbert Donow. "The vagueness allows for more flexibility than most constituency groups want to give." Gerecke said that because of concerns expressed by Donow at the last board meeting, the process of the proposal was slowed down, making it possible to get written input from campus constituency groups. The Faculty Senate is scheduled to address an alternative plan drafted by its Committee on Financial Exigency at a special meeting later this month.

In other business, the GPSC will consider a resolution stating that in the event of a vacancy in the office of the council president, the vice president would assume the position. Presently, the elections rules call for the vacancy to be filled by a special election. The resolution states that the Executive Board, including the former vice president, would elect a new vice president by majority vote. The GPSC will also address several proposals from the Health Service Advisory Board. Gerecke said one of the proposals would establish a user fee for students who use the Health Service. The fee would be charged in addition to the $300 semester fee paid by all students.

Samuel McVay, director of student health programs, is expected to answer questions from constituents about the proposal. Gerecke said that the proposal would force all students to pay a user fee of between $3 and $5.

"I don’t think anybody is wild about having the user fee," Gerecke said. "It’s my opinion that fee increases won’t be tolerated at this time."
Blue, gray clash as battle is relived

By Jennifer Phillips
Staff Writer

The cannons sounded, the crowd cheered, and the battle began.
And, although a little cold for spectators, the weather made the 121-year-old Civil War reenactment of Fort Donelson, Tenn., that much more realistic.
It was the Fifth Annual Civil War Battle at Makanda, which started early Saturday morning with an arts and crafts fair, mood-setting country music, and blue and gray campsites dotted the fields of the R.B. Hartline farm south of Makanda.

CSC candidates must submit forms

Civil service employees who wish to be candidates in the Civil Service Employees Council election, scheduled for May 11, must submit their statements of candidacy no later than Wednesday, April 30.
The statement of candidacy forms, which were mailed to civil service employees last week, should be returned to Joann Marks at the Office of the Dean of the College of Liberal Arts.
Any full-time permanent civil service employee is eligible to run for a seat on the civil service board.
Four representatives will be elected from the career employees, one from financial affairs, two from student services and one from University relations.

Five arrested after incident at bar

Five people were arrested early Saturday morning on various charges following an incident at T.J. McFly’s, 318 S. Illinois Ave., according to Carbondale police.
Police were called at 1:28 a.m. to investigate a disturbance at the bar.
When police arrived, the people involved were throwing rocks at them and one officer was hit in the leg, according to police.

Arrested for battery was Daniel Prather, 23, of Christopher. Kenneth E. Minkie, 21, of Makanda, was arrested for damaging property and assault and battery.
Donald G. Green, 19, of Du Quoin, was arrested for battery and unincorporated consumption of alcohol and James L. Carpenter, 17, of Galatia, and Beverly Flowers, 18, were arrested for underage consumption.

In a separate incident, Bobby G. Jordan, 27, of Carbondale, was arrested at 12:47 a.m. Sunday for battery and assault and battery/alcohol. Jordan allegedly hit a Carbondale man.

Jordan reportedly entered the Police Department lobby wanting to file a complaint against another person. He was on his way out the door when a radio dispatcher and an officer were called to the scene.

Jordan allegedly hit him and was charged with battery.

The officer arrested Jordan to the ground and arrested him for battery.

commander of the 31st.
He said the 31st also won the annual competition, in which members demonstrated how well they knew their guns by explaining each part to the inspector. There were also firing and firing demonstrations.

Lt. Danny Leach of the Sixth Illinois Cavalry won the cavalry competition, as well as the Third Kentucky Infantry in the drill competition.

F-Senate elects 17 new members

The Faculty Senate elected 17 members Friday to serve on its new senate.
The new members will take their seats on Tuesday, May 10.
The new members are: Ruth Baumer, library affairs; Thomas Brooks, human development; Richard Cannon, aviation technology; Lawrence Danso, educational leadership; Darrel Duncan, law school; William Tyrer Finch, School of Medicine; Frank Fettig; Stuart Frank, School of Medicine; William Gregory, zoology; John Gregory, mathematics; Robert Griffin, English; George Magliano, art; Robert Meyers, School of Medicine; Pediatrics; Springfield; Roger Poppens, electrical engineering; James Smith, electrical science and systems reliability; Paul Vinnette, forestry; these members were elected to a two-year term.

Matthew Koby, philosophy, and Gola Waters, finance, were elected for a partial one-year term.
Hang on Mavericks; ‘84 race almost here

ONE GOOD THING about elections is that there’s always one more around the corner if you didn’t like the way the last one went. Don’t despair. The end is not yet, and a majority party of some substance will spurn senate action. The nine Mavericks who wrestled seats undoubtedly will act as loyal opposition ready to return fire if they should be shot dead in the effort to win the course. This essential element of representative government was savagely cut on the council when students repudiated the Maverick Party, overwhelmingly Wednesday. It is in the students’ interests that the Mavericks stick together and give the Sanjays a run for their money in the next election as well as during the next USO term.

MAVERICKS ALSO SERVE warning to Trojan leaders that what voters give, they can take away. Voters had their say, which Trojans must bear in mind. But how many of them accurately can be described as a message that students, rather than endorsing either Maverick or Trojanism, are not voting at all. Students will be well served if the Trojan Party victory leads eventually to a healthy two-party competition in student government. And with another election looming, the way, Trojans should be well advised to mull over the consequences of their actions, mirth that they can expect Trojanism as easily as they repudiated Maverick-nomics.

President-elect Bruce Josephs has enthusiastically expressed determination that voters now be promised, tamed student government more responsive to student needs and demands and every Trojan’s rights as individuals and organizations. Enthusiasm is fine, but come May 16 when the next control of student government is expected, the movement is more likely to be confusedly in its second year of student government, than enthusiastic won’t amount to much, as presently is evident. Students are only interested in what student government is doing for them.

TROJANS HOPEFULLY kept notes on the lesson they taught the voters and Maverick Party, that political parties cannot rest on their past promises and deeds. Regardless, students will have a choice the next time around. And a rejected party will be around to keep an eye on the party in power.

The 1984 campaign is underway.

Tuxhorn represents new life for council

WHILE HELEN WESTBERG’s overwhelming election as mayor of the City of Carbondale might be taken as an important endorsement by voters of past city council actions, the election of Keith Tuxhorn to a two-year seat on the council was equally important. Tuxhorn’s victory will give the council a younger, less experienced member.

Tuxhorn at 27 years of age will be the youngest council member in recent memory. As a recent graduate and retail clerk this will bring a perspective that hasn’t been well represented on the council in the past. Write-in candidate Samuye Aikman, whom Tuxhorn defeated along with Elliot Beavers, disagreed that Tuxhorn will bring refreshing, younger ideas to the council.

In the past, council members seemed very close on most issues, which may have worked well for good things done, but hasn’t done much in the way of diversity of viewpoints. Tuxhorn represents a departure from the opinions of past council members and his election, besides being a personal triumph, promises a more representative city government. Tuxhorn may find himself in some of the same issues the council will take up. It is not as important that he is right or wrong as that the council hear other perspectives on the issues facing the city.

WHILE WE APPLAUD the election of Tuxhorn good for the council and the city, we don’t agree with his opposition to the proposed conference center. Despite being criticized for going along with quid pro quo land acquisition tactics in the past, the city is renewing interest in the project as is private developer Stan Hori.e. It is just this sort of public-private cooperation that will be needed to review Carbondale’s downtown, a business district and economic life, which is as important to Carbondale as is renewed political life. Therefore knowing his stance to the council, Tuxhorn must be prepared to listen to some that differ from his own.

Spring has sprung (and other puns)

AFTER A MOST unreasonable leave of ab-

senteeism, Spring has finally done its duty to Carbondale. With nature in a good mood, a student decided to leave off moping about the students and sorry state of the universe for some time and instead talk about Spring.

(1 was in a quandary as to whether to call Spring a him or a her. I knew that ships and countries and hurricanes are females, but I could not figure out where the distinction lay. Finally I decided that since most things which are big and powerful are feminized, then anything which is small and mini must be male. Now I will call Spring a "he" — that is logical for you)

The arrival of Spring has brought out every corny thought or cliche I ever had about it — and I am happily wallowing in all of them. Too bad if readers cry "ugh!" "yuck!" or "hard out!" at any of these yearly-used analogies, because — heh heh! — I’ll be cramming them down their throats at this time of year.

Having a weakness on my part is a norm; biological phenomenon which happens to all animals at this time. Consider: Marcia Hare "Alice in Wonderland" fame) for instance. All we know he’s a loony coming up. It’s the same thing with me too — who has not heard of that sage saying, "in spring a young man’s fancy turns to thoughts of frisbee-throwers, roller-skaters and barefoot walkers about the parks? It is the last group that latter group always interests me the most — like, what’s the purpose behind walking barefoot? I mean, is the idea to create the "single-parade" effect you know, the "we-children-of-nature- running-around-in-our-natural-state" sort of thing? or what? Is it their idea standard wear (or non-wear) for tropical weather? I hope not. I’m a tropical person. The only people who walk around barefoot are madmen and tourists — no one else feels it’s worthwhile getting their feet fried.

BUT FAR BE it from me to crucify anybody — I aim in too good a mood to gripe. That is perhaps the Loveliest Thing About Spring (another clever phrase!) — everyone becomes suddenly cheerful. Over the last two days or so, all those muddling mesothes who muddled past me in winter have now blossomed into Big Friends, and keep shouting "hello!" at me even if we pass one another 10 times.

Somehow, it makes me feel happier about the entire universe to see the rejuvenation of nature when it (ugh!) Springs back to life like this. (Perhaps when there is a "winter" in the affairs of the world, new life can grow out of that too, don’t I?) I know Springtime every year but permit me in one last worn-out phrase to say that it (sigh!) seems like the very first time.
Dear [Name],

I hope this message finds you well. I am following up regarding the recent meeting we had to discuss the Illinois prison system and its impact on female convicts. As we discussed, the challenges faced by women in the correctional system are significant and require urgent attention.

The Illinois prison system is directed towards dogs and cats, and has a reputation for having thousands of animals on its books. This situation is shocking, and it seems that the Illinois prison system is in big trouble. This is a sad situation, and I believe that we need to take action to improve the conditions of these animals.

I am planning to organize a protest rally to raise awareness about the plight of these animals. I would be grateful if you could support this campaign by either attending the rally or spreading the word to your network.

Thank you for your attention to this matter. I look forward to hearing from you soon.

Best regards,

[Your Name]
Program aids servicemen for 10 years

By William Jason Yong
March 24, 1983

A group of students in 1973, the occupa-
tional education for military personnel program has grown to about 2,000 at present. The occupational education program, part of the Department of Vocational Education Studies (VES), was created April 15, 1973, at Scott Air Force Base. The person responsible for the program's existence and growth is former President Raymond E. Bittle.

Last week marked the 10th anniversary of the military program. Bittle, a faculty member in VES, said the 10th anniversary of the program was a time to celebrate its growth from a little-known program to one of a kind in the nation.

"SIU-C is the only university that has this program," said Bittle. "He who is coordinator of trades and industry programs in the department. "Our main purpose is to deliver instructional services to military bases throughout the nation. Students in the program may earn a bachelor of science degree upon completion."

Those who enroll in the program in military bases receive the same instructions as those who enroll in it on the campus. Bittle said. The students take the same test, study the same material and are taught by the same professors, he added.

"I'm not very concerned about the students on campus because they have easy access to our program," Bittle said. "I'm more concerned about those people who are far away from SIU-C and who are interested in our program, but have no access to it.

The sequence of courses is delivered in military bases with minimum interference on work schedules, he said. The courses are taught on a weekend format.

Instructors from SIU-C travel to the bases to teach for six hours on Saturday and Sunday every two weeks.

"The whole purpose of this program is to provide educational services at military installations for persons unable to leave their jobs and study on campus," Bittle said. "It's far more accessible and convenient to send one professor to teach about 30 students than have the students travel to SIU-C."

The program has 19 instructors at the military bases. Between 25 and 35 professors from SIU-C fly to those sites during weekends throughout the year. California has the most military installations where the program is taught. Bittle said the bases at San Bernardino and San Diego have received the most training.

"The basic structure of the program is to train experienced installations for persons unable to leave their jobs and study on campus," Bittle said. "It's far more accessible and convenient to send one professor to teach about 30 students than have the students travel to SIU-C."

Since its inception 10 years ago, at least 2,000 persons have completed the program. Because of the opportunity offered, many people were able to obtain a bachelor's degree and proceed to graduate school in other fields, he added. However, over the past 10 years, the University administration had to allow VES to develop a graduate program in occupational education for military personnel. Bittle called the refusal "terrible," but said he is still fighting to get a graduate program created, saying that "it can be done."

Bittle, 65, came to SIU-C in 1969. He came up with the idea of a military program in 1970 but it took him three years to create it.

"I had to convince the University administration to get the program approved," Bittle recalled. "I had to sell the idea to the administration and to the Air Force."

The program is not financed by the University but is self-supported through enrollment fees. Student Center, he added.

"When the program first got off the ground, many people said it was a waste of money," said Bittle, who has spent 28 years in the Navy. "But the program has grown and has boosted the University's reputation."

Renowned photographer to present slides

Kenda North will lecture at 7:30 p.m. Wednesday at Davis Auditorium in the final session of the Contemporary Color Film Series. North, a noted color photographer at the University of California at Riverside, will host a slide presentation of her work and a discussion that will follow. The Department of Cinema and Photography will conclude the series, which has been funded for by SIU, the National Endowment for the Arts and the Illinois Council for the Humanities.

A Celebration of American Heritage in Folksong

Fri. Apr. 22 1983

The Student Center in cooperation with Southern Illinois University will present the American Heritage in Folk song. The students and members of Southern Illinois University Concerts Incorporated will attend the 1983-84 Dinner Concert Series.

Keith and Rusty McNeil will present 'A Celebration of American Heritage in Folk song.' The students perform with over 30 instrumentalists, including folk music collection of rhythm instruments from around the world.

Their areas of expertise include folk music from Colonial America, the American Revolution, the War Between the States, Turn of the Century, Roaring Twenties, the Great Depression, and contemporary periods. In addition to presenting folk music passed down through the generations of their own family, the students have researched the folk music of the immigrant groups which have enriched America, the songs which reflect America's major social movements, and America's religious history during the past two hundred years.

Menu:

Norwegian Salad
Vegetable Salad
Provencial Potato Salad
Salad Love Bowl
Oriental Style Beef and Noodles
Pastrami Sandwich

Spring Vegetable Salad
Sicilian Style Broccoli
Long Island Roast

Crescent Rolls and Whipped Butter
Apricot Crisp
Macedonia Red Pla
Orange Carmel Custard

This show consists of a buffet dinner served in the Old Main Room (second floor, Student Center).

Prices:

56.75 Buffet and Concert-Students Only

56.00 Buffet Only-Dine in Public (For reservations call 536-6633 during the day).

52.00 Concert Only-Students Only (Tickets available at the Student Center).
Vegas Night was gambler’s dream
By Lisa Nichols
Staff Writer

It was an opportunity to throw the dice and play the cards or shoot the billiards with a legend—all for fun.

"Vegas Night—Saluki Style," a benefit for SIU-C's School of Music and men and women's athletics, was a gambler's dream: a chance to take a chance with no risk.

The event, held Sunday at the S.I. Bowl, included bowling, craps, blackjack and entertainment by the School of Music.

For a $10 donation, participants were given $50 in play money to use to gamble and buy prizes donated by area businesses.

The event also featured billiards expert Minnesota Fats, who donated his time to take on challengers at the pool table.

Several of the challengers were able to beat Fats, who would good-naturedly ask "What happened?" every time he missed one of the fancy shots which made him famous.

Fred Huff, SIU-C's assistant athletic director was in charge of taking the bets and paying the winning challengers. Huff said that early in the evening, Fats spotted a boy of about 10 years watching him with a long face.

When Fats asked him what was the matter, the boy explained that he wanted to challenge Fats to pool, but was out of play money. Fats reached into his own pocket and handed the boy a play $5,000 bill and proceeded to shoot a game of pool with him.

"The kid won the game," Huff said, "because Fats scratched on the eight ball. He's a heck of a guy."

Bill Korneman of Chester won both of his games against Fats. Brad Mabry of Benton beat Fats three out of four games. "I think he's letting me," Mabry said, as he won his second game.

David McNeill of Carbondale, who won two of his four games against Fats, said that win or lose "it's for a good cause—and it's also a good time."

Those lucky high rollers who won the big money were able to buy prizes ranging from a puppy to T-shirts to an autographed Chicago Blackhawk with their play money.

At the evening's end, grand prizes were auctioned off to the highest bidders. The prize which brought the most play money—$10,000—was a weekend for two at a St Louis hotel.

Grimm said he was very pleased with Vegas Night, which drew a crowd of about 300, and thought it was safe to say that no one who attended had a bad time.

The actual profit won't be determined for a few days, but Grimm estimated that at least $2,500 will be split three ways between the School of Music and men and women's athletics.

Discussions on black community slated

"The Quality of Life and Health Care in the Black Community," will be discussed at noon Wednesday in the Quigley Lounge. Jean Dorsett- community: The Impact and Robinson, executive director of Quality Services Inc., will be the speakers.

This is the second in a discussion series sponsored by the Black American Studies Program.

The third program,"Social Services and the Black Community: The Impact and Challenge of Reorganization," will be held April 27. Speakers are drawn from the SIU-C faculty, administration and the community.

Career Enhancement Week

On April 11, SIU-C students and graduates will be able to attend free workshops at the Women's and Men's Business Center.

Workshops will be held from 10 a.m. to 3 p.m. in the Women's Business Center, 201 Administration Building.

The workshops are open to all SIU-C students and alumni.

The workshops are:

- "Job Search Skills for Women," presented by Mary Lou S. Haskins of the Women's Business Center, 10 a.m.
- "Career Development," presented by Mary Lou S. Haskins of the Women's Business Center, 1 p.m.
- "Networking," presented by Mary Lou S. Haskins of the Women's Business Center, 3 p.m.

For more information, contact the Women's Business Center at 453-2700.

U.S. aid prolonging violence, Salvador revolutionary says

By Belinda Edmondson
Staff Writer

By giving military aid to the government of El Salvador, the United States government is partially responsible for the deaths of roughly 46,000 people in that country. So stated Guadalupe Gonzalez, an official representative of the Revolutionary Democratic Front of El Salvador (FDR), who spoke Sunday in the Student Center.

"If the United States was not participating in the violence (in El Salvador) it would not be prolonged," she said. "The United States is not helping towards a peaceful solution." Gonzalez, whose Revolutionary Democratic Front advocates a political rather than a military solution, said the U.S. government is involved in El Salvador primarily to support its economic and defense interests.

Gonzalez said there is "no problem" with American or European industries setting up plants in El Salvador, but such situations should be "based on mutual respect between peoples and governments," and not on military domination, as the United States is trying to do. Gonzalez dismissed the idea of Cuban or Soviet infiltration of the FDR in the event it should come to power. She said "The United States is trying to put on other countries what they are doing themselves."

Gonzalez said the government election which took place recently in El Salvador under surveillance of the United States and other countries was not considered a "real election" by the Salvadoran people. "There was a feeling," Gonzalez said, "that the election was held so that the United States people would not object."

Gonzalez said that since 1977, when the first elections were held and a victory of a coalition of opposition parties was overturned by the military ruling class, there have been no fair elections in El Salvador. One thousand people were killed during the elections, she said.

According to Gonzalez, the army of El Salvador, which she described as being organized to guarantee the position of the ruling elite, cannot defend its position against the people "because they know they are not defending the people's interests, but those of a small group."

Gonzalez said there is an oligarchy of 14 families in El Salvador which has created a situation where there is "lack of jobs, lack of basic needs — any conditions needed to have democracy in the country," Gonzalez said.

Gonzalez said the United States government grants visas to assassins for the Salvadoran government to stay in this country.

Dan Hellinger, of the St. Louis Latin America Solidarity Committee, which was responsible for bringing Ms. Gonzalez to SIUC, commented that the American government is denying visas to any members of any opposition parties from El Salvador for entry into this country.

Aside from effecting a peaceful solution to the present conflict, Gonzalez said the aims of the FDR were to influence political and agrarian reform, and to pursue a policy of non-alignment in El Salvador.

Gonzalez appealed to the American people to work against genocide in her country, and to support a political solution to its problems.
Cast makes 'Sondheim' a treat

By Cynthia Rector

The revue reviewed major works of one of America's most important composers—lyricists, Stephen Sondheim.

Under the direction of Michael Blum, a group of six singers and dancers performed on 30 musical numbers with only one intermission.

Groups of songs taken from Sondheim's major productions, with each show and period of Sondheim's creative life receiving an introduction by one of the performers.

The stage was simple, providing tables where the stars waiting to perform could sip water and enjoy the show. Costuming was equally simple.

Performers were all equally talented, but there was diversity in approach. Even though there wasn't consistency in characters, the strong points and personalities of the cast shined through.

Although she had plenty of chances to disparage the typescast, languid, blond and beautiful soprano Brenda Sanders was often put in traditional dumb blonde roles or parts that emphasized her star-quality beauty.

It was easy to guess that Jeff Gurley might be an accomplished dancer. Gurley was the only cast member to perform elegant turns, drop sideways into the arms of cast members, etc. In his solo number, "Johanna" from the musical "Sweeney Todd," Gurley let us know he could sing. If there was one total showman in the play, it was Gurley.

The comic side of Eric Ewan was consistently apparent; he almost looks like a younger thinner version of Jackie Gleason. Ewan was cast as the sarcastic optimist in "We're Gonna Be Alright," a song from "Do I Hear A Waltz," where a man tells his wife that with all the marital problems of their friends, they have no worries.

The last full song "Conversation Piece" was combined favorite lines from the evening's numbers and ended the night with a bang. The finale "Side by Side" was short, basically a classy way for the performers to walk off the stage, only to enter again for an ovation-well-deserved.

Aside from fitting well into the types of characters they seemed to get cast most often as, there was a great deal of trading off and the cast worked well as an ensemble.

Actor: From: SIUC Students

To: Student Work and Financial Assistance

WooDy Hall, B wing, third floor

It's true that it is after April 1 and students who mailed their 1983-84 ACT/Family Financial Statement (ACT/FFS) before April 1 will be given priority consideration for the Campus-Based Aid Programs. Campus-Based Aid funds are limited and therefore are distributed to eligible students on a first-come first-serve basis.

Although April 1 was the priority date for Campus-Based Aid consideration, It is not too late to apply for the other financial aid programs. Students should mail their ACT as soon as possible to apply for Pell grant, ISSC Monetary Award, and Student Work. Early application to these programs will allow for early notification of eligibility status and awarding of monies. COMPLETE THE FORM CORRECTLY THE FIRST TIME. Having to make corrections will delay the processing of your financial aid.

To apply for Pell Grant, mark "yes" to questions 74 and 75b. To apply for ISSC, mark "yes" to questions 74, 75a and 75b. For student work consideration, mark "yes" to 74 and 75b. Be certain to list SIUC's school code #1144 in question 76 and include the ACT processing fee.

Students interested in applying for a Guaranteed Student Loan should contact their bank for the loan application. Student Work and Financial Assistance will begin accepting 1983-84 loan applications May 2.
"Flashdance" showcases new talent

By Donna Schneibert
Staff Writer

She rides her bicycle through the streets of Pennsylvania as the song "What A Feeling" picks up momentum on the soundtrack.

The camera focuses on her as she works as a welder.

At night, she performs as a dancer in a local club to the beat of pulsating music.

And so we are introduced to Alex in "Flashdance," a film which begins with a flicker, catches fire quickly with a hot production number and doesn't stop radiating heat until the final credits roll.

Although the film is predictable, "Flashdance" is slick filmmaking.

Director Adrian Lyne has filled her film with catchy music, exciting production numbers and flashy costumes and sets.

In one scene, Alex, played by Jennifer Beals, stuns feverishly across a stage only to be drenched with water near the end of the song. Not only is Beals sensual when wet, but the production number is provocative.

Another production number has Beals dancing around the fro.1. of a television set which she eventually smashes. It's scenes like this which make "Flashdance" glide across the screen with originality and excitement.

When "Flashdance" isn't being loud and riveting, it is a sensitive film about Alex's dream to be a famous dancer.

On her way to stardom, she is sidetracked by Michael Nouri, who plays her boss at the welding plant.

After countless rejections, Alex finally accepts his dinner invitation and the two begin a standard Hollywood romance full of casual sex and trite arguments.

By expertly juxtaposing government propaganda excerpts from television and radio shows, cartoons and long-forgotten "Reefer Madness" cartoons, the film has created a cinematic testimony of the official lunacy of the period.

Images of this lunacy include cartoons warning of drug use, clips from "You Are What You Eat" and "Amerika," a cartoon that shows a person with a bomb. The film ends with a montage of US government efforts to control the public's minds.

Released in 1982, "Flashdance" was painstakingly produced by Jay Weiss and brothers Kevin and Pierce Rafferty. The three young filmmakers spent five years bringing their dream to life.

The film is not only a story of love and ambition, but also a cautionary tale of the dangers of government-controlled media.

It is Nouri's character, however, that eventually helps Alex obtain her goal.

Full of spark and vitality, Beals captures the fervor of Alex the dancer, as well as the vulnerability of Alex the woman. Beals is fascinating to watch, bringing depth and humanity to the role.

The only facet of Beals's performance that doesn't ring true is her attempt to persuade us that she is an amateur dancer. Beals is definitely a star, and as she proves several times during the film.

Nouri doesn't have as much character development as Beals does, but he nonetheless does an adequate job capturing the mood of his strong-willed character.

While "Flashdance" lacks the maturity of "Fame" or the humor of "Saturday Night Fever," it is an entertaining and likeable film which showcases an exciting new talent.

Canoe races slated for Campus Lake

The Student Programming Council and the Student Recreation Center will hold the Wacky Canoe Races from 2 to 6 p.m. Wednesday at the Campus Lake boat docks.

Prizes will be awarded in several categories, including backwards, back to back, wacky paddle and blindfolded. Volleyball and other contests and activities, including live entertainment, are planned.

Registration is free and begins at 1:30 p.m.

Trumpet recital will be presented

Daniel Kaiser, graduate student in music performance, will present a trumpet recital at 7 p.m. Tuesday in the Old Baptist Foundation Chapel.

Assisting Kaiser will be Anita Hutton on piano, Ruth Kaiser on bassoon and members of the SIU Brass Quintet.

The performance is free and the public is invited to attend.

U.S. pro-nuclear propaganda is the fare of 'Atomic Cafe'

By Robert Green
Staff Writer

Propaganda American style is the subject of the highly acclaimed comic nightmare "Atomic Cafe." The film is shown 7 days a week at 11:30 a.m.-2:00 p.m., Monday through Friday, all you can eat 57 cents, never expire.

"Atomic Cafe" lampoons the American style radio shows. While "Flashdance" lacks the maturity of "Fame" or the humor of "Saturday Night Fever," it is an entertaining and likeable film which showcases an exciting new talent.

Experiences

Outsider's view of prison intimidating

By Jennifer Phillips  
Staff Writer

The bars clanked shut once, twice, then a final time, accompanied by a voice saying, "Gumball!" We were to hear.

Well, so far so good. I thought to myself.

The sound of the bars closing—the three massive gates at the Menard Correctional Center in Chester—wasn’t as chilling as I had expected. But then I imagined that if it had a different ring to it, one not sure when they would next pass through them going the opposite way.

I was touring the maximum-security prison with an SIU-C Administrator. We put on Class A uniforms and anxiously for a glimpse at mass murderer John Wayne Gacy or the famed 13th killer, both on Death Row. As if a glimpse would undo the members of their lives.

But a rendezvous on Death Row, which 42 prisoners now, was not on the agenda so we settled for a tour of the prison with Guard Carl Tiller and discussions with the counseling supervisor and six prisoners serving life sentences, mostly for murder.

It was a raw, rainy morning, adding to the depressing effect, as we started climbing the stairs to the building, which was constructed in the late 1800s.

The building that houses Death Row and minimum-security prisoners sits ominously on a cliff, towering over the confluence of the rivers which rests next to the Mississippi River.

Before starting the main part, we were told to get rid of our cigarettes. One man gave me a key to a locker. Women were then ushered to the left, and men to another. We were padded down for weapons.

We were no closer to the regular visitors, such as family, are searched much more thoroughly than we because contraband can be hidden in various parts of the body and clothing.

The tour started. A group of young girls should be in the front of the group. We could watch the girls.

"Last tour, we lost three. Found two later, though," he said.

Nevertheless, I glanced arm in arm with 14 corrections officers usually on duty at one time. There are about 750 employees altogether with about 500 in uniforms.

The walls of the Menard Correctional Center in Chester are designed to allow people in and out of the prison.

Tiller explained it candidly enough. "With about 2,600 inmates, we’re outnumbered."

Nothing like building confidence. But the guards on the ground, carrying no weapons, are protected by the guards in 15 towers, who carry high-powered rifles.

Walking and prisoners was about what I expected. Intimidating. Uncomfortable. Embarrassing.

Wherever the group went—10 girls and 11 guys—there were stares, whiskers and unashamed remarks.

Tiller tried to keep the group at ease. "It must be the way I’m walking today," he said.

As I glanced at prisoners’ faces peering out the barred windows of the segregation building, which houses problem prisoners and those requesting protective custody, I thought about each of the 3,600 prisoners costing taxpayers from $10,000 to $100,000 a year.

How many of these prisoners really did belong on the outside and how many on the outside really did belong in here?

The highlight of the tour was talking to six members of an experimental group about 30 prisoners serving life sentences.

When told some prisoners were going to talk to us, I had a sense of déjà vu. Tiller said, "It varies with the individual."

The group gloomily talked about their time spent in Menard.

"You may see a smile on a man’s face but deep within there’s no smile," said one convicted murderer who’s been there years.

"The first four years, I was up at 7 a.m. every day, my bed made, my hair combed, just knowing I was getting out any day. I continued."

never make my bed and comb my hair.

Another convicted murderer added: "You adapt to the environment to be effective in the environment. That’s a reflection of the society they relate from."

"One day to you; a month to us," another added.

There was a general consensus that the corrections system is not always an effective deterrent or a solution to crime as a whole.

"They say, ‘Look, we’re gonna lock you up so you don’t cause problems in society. But it’s not always the case.=" one explained.

"But you lock a man up for 15 years, take away all his responsibilities, then let him out with a bus ticket, a new suit and $100 in pocket—the world has changed a lot in 15 years."

"You’re a kid again," said another.

"Whether or not society wants to, they have to deal with it through their tax money and when they let us out."

Although attempts to see the rest of the prison, my class seemed disappointed when the meeting wend, the lifers ended the tour with them for a few minutes, exchanging personal thoughts and asking how long they had to go in the system.

We toured a mess hall and more of the prison grounds.

See MENARD, Page 13
TEACHING AND TESTING for Problem Solving will be the topic of a Learning Resources Symposium workshop lecture from 2 to 3 p.m. today.

FREEA will meet at 7 p.m. Tuesday in the Student Center. Lunch Severn of the SIU School of Journalism will discuss how to improve a portfolio and sell it to employers.

GLPU will hold a potluck dinner at 6:30 p.m. Tuesday in Quigley Lounge. Quakers from the Gay Community Alliance of Washington University are expected. Interested persons may call Ray, 549-4701, for more information.

BREAD FOR THE WORLD group will meet at 1:30 p.m. Tuesday in the Student Center. No. 32. Illinois. A report will be given by Pete Wall on the de-wogemper work he has been doing in Haiti 1982-83.

PSI CHI Psychology Club will tour Robert7ens and Doug Smith's Animal Laboratories at 7 p.m. Tuesday. Members are asked to meet outside Life Science II, Room 96.

THE REORGANIZED Church of Jesus Christ of Latter Day Saints' Association will meet at 7 p.m. Tuesday in the Student Center, Room 105. Members are asked to meet outside Life Science II, Room 96.

Robot plays blackjack at show

CHICAGO (AP)—Step into the looking glass and into the land of robots—320 of them—and wake up in a light-blinking contraption. One big one-armed guy is dealing blackjack.

The Robots 7 Conference and Exposition opened Monday in McCormick Place in conjunction with the 13th International Symposium on Industrial Robots.

Billed as the biggest show of industrial robots in the world, the exposition has drawn robots from 19 countries worth of engineers from 173 major builders of robots and their components from Europe.

MENARD from Page 12

acting oblivious to the stares and comments of prisoners milling around the yard, was much aware of them.

When we visited a cellhouse, the counting supervisor pointed out black marks on the ceiling, formed when the gurneys' marks from shots fired to contain disturbances.

As we were leaving the prison yard at the finish of the tour, we spotted some of the lifers, now renovated into the prison population, and waved goodbye.

After the fifth or sixth head count was made and "girls first" shouted for the last time, we listened with relief at the clank ... clank ... clank.

We were free to go.

The 1983 SIU-C Radio-Television Dept. Convention and Banquet begins this Thursday featuring:

Robert Ferrante—Executive Producer
CBS Morning News, New York
Peter Desnoes—General Manager
WLS-TV Chicago
Illinois News Broadcasters Association
Larry Patrick, the leading national authority
on new technologies in communications

TWO ROOMS - Summer. Included. Nice, clean, 12 mile south of I-55. Call 457-5276.
Sherry Chisenhall

NCAAs are finally here. SIU's Salukis have a lot to prove. First off, SIU-C finishes its second tournament in the 12-team tournament with a 930 total, while Tulsa, 2-12, and Bradley, 26th, finished opposite end of the finishers.

Tulsa took 10th place, 18 shots behind the No. 8 team, 2-12 SIU-C. SIU-C's 239 tied for No. 7 team, 2-12 Kansas City. The Salukis hold the nemesis

Tulsa's Fred Powers, who finished fifth last year, Powers, a senior, led the MVC conference with a 74 stroke average prior to the tournament in Wichita, but dropped his average to 75.3.

Tulsa Sports Information Director Gil Swalls said Tulsa doesn't stand much of a chance of successfully defending its 1982 conference title, with Powers being the only returning player from last year's championship event.

West Texas and New Mexico are the favorites to finish behind Wichita State, but the rest of the field is open.

McGirr said her team's nemesis throughout the season has been playing conditions, but SIU-C's only opponents this week will be golfing clubs, if Tulsa coach Don Zimmerman's weather forecast holds.

Zimmerman said the temperature in Oklahoma is around 70 and should remain there through the week, with little or no rain expected.

Despite the weather, some of the teams had some really good rounds. The weather didn't seem to affect everyone - just us, mostly.

To say the least, I'm very disappointed with how they were disappointed with how they played. I don't think they really have something to prove to themselves. We can do this if we don't do this or that, we should do okay in the conference meet.

If the Salukis have something to prove, the conference meet will be the place to do it. The Big 8 tournament runs Wednesday through Friday and will be in Austin, Texas. The Salukis are the No. 11 team in the nation.

I really want us to peak for the conference championship, Zimmerman said. 'That's where it's all at, and we're approaching it that way. We're going to be aggressive in the conference meet.'

The Salukis will need more than an aggressive attitude to finish at the top of the pack. McGirr said she wanted the team to improve on last year's seventh place finish, preferably ending up between third and fifth.

Wichita State figures as the most familiar to claim the title, led by senior Greg Kopf, who finished second in last year's MVC tournament. The only other returning top 10 individual is Tulsa's Fred Powers, who finished fifth last year. Powers, a senior, led the MVC conference with a 74 stroke average prior to the tournament in Wichita, but dropped his average to 75.3.

Tulsa Sports Information Director Gil Swalls said Tulsa doesn't stand much of a chance of successfully defending its 1982 conference title, with Powers being the only returning player from last year's championship event.

West Texas and New Mexico are the favorites to finish behind Wichita State, but the rest of the field is open.

McGirr said her team's nemesis throughout the season has been playing conditions, but SIU-C's only opponents this week will be golfing clubs, if Tulsa coach Don Zimmerman's weather forecast holds.

Zimmerman said the temperature in Oklahoma is around 70 and should remain there through the week, with little or no rain expected.

Despite the weather, some of the teams had some really good rounds. The weather didn't seem to affect everyone - just us, mostly.

To say the least, I'm very disappointed with how they were disappointed with how they played. I don't think they really have something to prove to themselves. We can do this if we don't do this or that, we should do okay in the conference meet.

If the Salukis have something to prove, the conference meet will be the place to do it. The Big 8 tournament runs Wednesday through Friday and will be in Austin, Texas. The Salukis are the No. 11 team in the nation.

I really want us to peak for the conference championship, Zimmerman said. 'That's where it's all at, and we're approaching it that way. We're going to be aggressive in the conference meet.'

The Salukis will need more than an aggressive attitude to finish at the top of the pack. McGirr said she wanted the team to improve on last year's seventh place finish, preferably ending up between third and fifth.

Football team's progress stalled

By Dan Devine
Assoc Sports Editor

For the first time this spring, the first team SIU-C offense went against the first team defense at a football scrimmage.

The results Saturday morning left Coach Rey Dempsey displeased. His defense performed well, it seemed, but maybe too well.

"I like them being real good but I don't like them being good at the wrong time," said Dempsey, who works primarily on 1st offensive side during scrimmages.

"We're not solid on defense," he said. "On the strong side of the offensive line we're half-decent, but on the other side we're not solid and it's hurting. I want to develop a strong running game. It looked like it was inconsistent."

The inconsistent offensive showing overshadowed some intense hitting by the Saluki defenders.

"I think we should be better," said Dempsey's overall assessment of Saturday's workout. "I think we're behind.

Part of the lackluster offensive effort could be traced to the absence of quarterback Rick Johnson, and minor injuries among running backs that put the backfield artillery on the sidelines.

Johnson had another commitment and was excused from practice.

"He makes things look better," allowed Dempsey who was not all that impressed by Johnson's stand-ins, Darin Durrence and freshman Rick Spetman.

With most of the running backs unavailable for duty, fullback Bruce Phipps went the whole way.

"Bruce Phipps made a lot of errors, but he's like a big bulldozer type," said Dempsey. "He runs hard."

The freshman fullback was complemented by fullback Derrick Taylor, who Dempsey said was becoming a better inside runner. Taylor, Tony Anderson and Everett Wilson were formidable in the battle for running back jobs.

They didn't get much help Saturday from the offensive line, although guard John Hoehn had a good day.

The offensive line - a sore spot most of last season - stalled Saturday after making noticeable strides the week before.

And the defense took advantage of it, especially, players like defensive tackle Ken Foster, linebacker Fabrey Collins, and defensive backs Greg Shipp and B.T. Thomas.

"Those guys are making big hits," said Dempsey. "Their defense is coming along. They're starting to get more solid and do their thing exactly. They progressed more this week than the offense.

The Salukis have two weeks left in this spring practice session and Dempsey hopes to weed out the mental errors that have plagued this offense, as well as to continue teaching the Saluki system to all younger players and junior college additions."

"We're working on fundamentals and working off our offense," said Dempsey. "We've got most of it in."
Malaysians win tournament

The Malaysian team repeated its performance of the fall semester by winning the International Soccer Tournament Sunday. The team, on a goal by Ruslan Awan, plus good defensive play by Mohd Ibrahim Maarif, defeated the Venezuelan team 1-0. In the consolation game, the Holocaust team took third place by defeating the Chinese team 5-0. Scoring for the Holocausts were John Krougans, John Posenar, and Constantine Papadantioti, who scored three. Above, Malaysian Aras Mohammed gets one past a Venezuelan defender.

Women ruggers suffer loss

The SIU-C women's rugby team evened its record to 3-3 last weekend as it lost to a St. Louis city team, 4-0, at the St. Louis rugby pitch.

Becky Larkin, wing forward for the Salukis, said the loss was a result of the team not practicing the entire weekend because of bad weather conditions.

Ex-Salukis make diving team

Former Saluki divers Rick Theobald and Tracey Terrell were named to the U.S. National team after placing in the top eight at the U.S. Indoor Diving Championships in Indianapolis this weekend.

Theobald placed fifth in ten-meter and Terrell placed eighth on the platform.

"Rick did his best platform performance ever," said Coach Denny Golden. "He looked great, and did an excellent job. For Tracey, it was her first time in the finals of springboard, being traditionally a platform specialist, and she did a great job."

400. SIU-C strung together a bunch of one-run innings at Kentucky but didn't get any big explosions.

"I don't think we're going to get a lot of big innings," said Jones. "I think we're going to nickel and dime it to death, and get up a run at a time and get a big inning once in a while."

The bad weekend Saturday hasn't changed Jones' goals for this weekend and for the season."We've got to get on some winning ways," he said. "We have the intention of winning two games at Evansville."

But the rainouts will make another 20-win season that much more difficult.

"Teams are going to have to hustle like hell to win 20-25 games," said Jones. "We're going to have to get hot and play exceptionally well. We're capable of it, because we've done it. We have to remember that they are good athletes."

Staffing NOW for Summer Positions AVAILABLE for SUMMER COUNSELORS

Who love children and have strong skills & ability to teach one or more of the following activities:

Baseball • Arts & Crafts • Athletics • Dramatics • Dance • Percussion • Computer Science • Dramatics • Drama • Swimming

General Counsels • Guitar • Gymnastics • Narration

Soccer • Writing • Photography • Piano • Rocketry

Swimming • Sports-101 • Track • Tennis

Tripoging • Video Tape • Water Skiing • Woodworking

FULL SESSION: JUNE 23 TO AUGUST 22

MINIMUM AGE: 20

To apply, resume, letters of recommendation. Write today or stop by the Hollywood Ticket Office.

**Diver working toward Olympic goal**

**On the road to '84**

**Editor's note — From July 28 to August 12, 1984, millions of eyes will focus on the hundreds of athletes competing in the 1984 Summer Olympic Games. Although their time in the spotlight is brief, the training period for these athletes is much longer. The commitment has been made by these athletes, including several present and former SIU-C students. This is the first in a series featuring SIU-C athletes who have aspirations to compete in the 1984 Summer Olympic Games in Los Angeles.**

Tracey Terrell enjoyed herself as she competed in the U.S. A. Diving Championships this weekend. Not only because she performed well, placing eighth on three-meter springboard, but also because there wasn't as much pressure as there usually is.

Though competing against the best female divers in the United States, she was performing for herself, and not representative training. There was a lot of pressure off, according to Terrell, and competing without pressure is what she'd like to keep.

She'll be back to make it at least until early summer of this year, when she'll compete at the Olympic Trials in Colorado Springs (for a spot on the U.S. Team). Only two in each of the two events, three-meter springboard and 10-meter platform, will earn the right to represent the United States, and Terrell, who's been diving since she was 8, has worked her craft out for her.

"The Trials are really going to be tough," Terrell said. "Everyone there will have known success. At nationals, there are 12 divers, and some people are just beginning. But everyone at Trials will be there for one reason and they'll be very good." They'll be really physically, Terrell thought, mentally can have a bigger effect on the turnout. Terrell has made strides in her career. That took a lot of work and some sacrifice. But everyone at Trials will be there for one reason and they'll be very good.

"I think if I can get in the top eight and I need to show that I'm consistent and can stay there," Terrell said. "I'd be happy with a top eight at Trials." Terrell is very close to making it, Terrell said. She'd like to go to the Olympics, compete in four by Trials and then shoot herself.

In her goal to place highly, Terrell will need a combination of concentration and consistency. Consistency is always the key for a diver, but when all the divers perform well, that's when Terrell says thes
