Larry Hill, an iron worker, works on the $7.4 million SIUC School of Law building. The project's supervising architect-engineer, Allen Haake, said he expects the building to be completed in March 1981 instead of July 1981, as predicted earlier. The date was moved up because this week's unusually mild weather aids workers to continue working, Haake said.

**Law School building ahead of schedule**

By Paula Donner Walter

Staff Writer

This year's unusually mild winter has moved up the estimated completion date of the $7.4 million SIUC School of Law from July, 1981, to March, 1981, according to Allen Haake, the supervising architect-engineer.

While long-term construction projects are normally expected to be delayed about two months because of winter, Haake said workers on the law building haven't missed more than two weeks of work this winter.

"We're about one month ahead of schedule because of the mild winter. We have been able to work almost continuously," he said.

Haake said installation of steel framing for walls, the second floor and the roof should be completed in about four weeks so that the roof and second floor decks can be installed. And if all goes well, he said, the walls could start to go up in April.

The underground tunnels that are being constructed to carry heat, air conditioning and electrical power to the building should be completed in about a week, Haake said. After completion, work will begin to restore the parking spaces near the Communications Building that were taken out during the tunnel work.

Prompt delivery of construction materials has also helped the smoothness of the construction work, which began in March.

Thompson aide: Higher ed a priority

By Mary Ann McNulty

No one can accuse John B. Bremer of being a relative of Millicent F. Emerson, the controversial snow shoveling ordinance by appealing to the U.S. Supreme Court.

Brewster says Mr. Bremer doesn't see where the constitution is ever equal to shoveling under the law.

Man's fight against snow law continues

The 38-year-old Carbondale resident will continue his fight w/ City Hall over its controversial snow shoveling ordinance by appealing to the U.S. Supreme Court. A recent Illinois Supreme Court decision that the ordinance is constitutional.

Brewster says it's "unfair" that he is required by law to shovel his walk, and with the help of an SIU-C professor of law, he will file an appeal by the middle of next month.

Brewster, who practices law in Marion, first contested the 1978 city ordinance in late January of 1979 when he and 41 other Carbondale residents received citations for not shoveling their sidewalks.

The ordinance requires residents to shovel at least 30 inches of snow, which is all the law permits abutting their property within 24 hours after snow stops falling.

Associate Circuit Judge George May has ordered the ordinance invalid in February after it was found that the law violated the Fourteenth Amendment's guarantee that no person shall be deprived of life, liberty or property without due process of law.

Edward Kionka, an SIU-C professor of law who is representing Brewster, said he has begun the first step in the process of appealing of the case to the U.S. Supreme Court to review the case by requesting the Illinois Supreme Court to recall the case for rehearing before the appellate court in December.

Brewster said he will do file a rehearing request. Brewster has been asked to hear about 250 cases a year over from over 3,000 requests.

Kionka said the constitutionality of the ordinance is being contested on two grounds.

"In reality it is a tax," Kionka said. "We are also fighting it on the grounds that it inceds into the police power of the state and local governments to pass laws that we can and cannot do."

Although Kionka said it is hard to predict what the Supreme Court will decide without having the case, he said he expects to hear the fate of their appeal "sometime before the beginning of the next term of the court."

Kionka said that although the odds of the Supreme Court agreeing to hear the case are probably against his client, he plans to try the case with the same degree of aggressiveness as possible.

"I would say that the odds are slightly against us unless you have a case of national significance, but we will try to make our arguments persuasive," said Kionka, who is on a one-year sabbatical at St. Louis University.
Title IX panel says women need at least $500,000

By Check Hemstead
Staff Writer

Between $500,000 and $700,000 needs to be allocated to the women's athletics program this year to achieve compliance with state and federal Title IX regulations, Joanne Paine, chairperson of the Title IX Intercollegiate Athletics Evaluation Committee, said yesterday.

However, she said it is doubtful that additional state and federal funds for athletics are forthcoming and it is unlikely that cuts in men's athletics could provide all the money necessary to equalize female athletes with the males that is required by law.

Paine said that a majority of the committee found that an "institutional pattern and practice of discrimination persists in intercollegiate athletics at SUIC.

The committee, which released its report after 11 months of preparation, was composed of Paine, the Men's Athletics Director Gale Sayers, Women's Athletics Director Charlotte West, coaches, athletes, students, faculty and alumni.

Two sets of recommendations were offered by the committee to bring the University into compliance. The preferred option, which is the most consistent with increased support of women's athletics through state and federal state funding and private contributions. The other option is to reallocate existing funds from the men's athletics program to the women's—a move that would require cutbacks in the men's program.

Sixty percent of the women's athletic budget is coming from student athletics fees, according to Paine.

The committee also recommended that the focus team be reduced to 50 members—a same number as professional teams.

The committee report states that the necessary budget recommendation are implemented, about $725,000 could be allocated to the women's program. But it would still be $125,000 short of Paine's most conservative estimate of the women's needs.

A poll of the committee members revealed a "moderate probability of implementation of all the suggestions except limitations on the football team."

In the category of team categories in the report used to compare the cost of the men's and women's programs include financial aid and recruitment, physical facilities, team support and administrative structure.

Regarding facilities, the committee, reported, an inequality that could be rectified by giving top priority to the renovation of Davies Gymnasium, immediate construction of a softball field that has been planned and approved by Vice President for Campus Services Clarence Dougherty, and improving Wham field for women's field hockey.

Dougherty said improvements have recently been made to the football team and for the women's softball field across from the Recreation Building on Grand Avenue.

The Davies Gym renovation appropriation is 13th on the Illinois Board of Higher Education capital improvements list for next year.

In the category of team support, the committee recommended that funds be allocated for athletic training, women's athletes to provide warm-up suits, shoe, practice uniforms and rainwear for field hockey players.

The committee also cited what it called other inequities in the athletics programs in including coaching salaries for women coaches are paid on a month basis while most of the men's coaches are paid on a 12-month basis, equipment allowances, vacation camps, officials and conference fees.

Panel: Palestine is key to conflict

By Andrew Zimmer
Staff Writer

The issue and major stumbling block in the continuing Mideast conflict is the problem of Palestinian autonomy, but many interrelated factors have prevented recognition of that goal. While the Palestinian issue is resolved, the Middle East will continue to be a puzzle.

That was the common view expressed Monday by each of the three members involved in a panel discussion in the Student Center Monday entitled "American Policy in the Middle East: Arabs, Israelis, and the Broader Crisis."

Manfred Landecker, professor of science, said that foreign policy goals must be an attempt to maintain friendly relations with Mideast nations.

Landecker said that helping the Palestinians, giving strong signals to the United States concerning their activities in the volatile area, and stabilizing oil prices were among some high priority items for U.S. foreign policy-makers. Landecker asserted that it is inevitable that the Mideast will remain on the front burner in American foreign policy concerns.

John Hayward, professor of studies, explained what he called the complex religious nature of the Mideast, and said that religion is at the heart of the conflict.

"Religion and politics have been tightly bound since the early days of Mideast history, and, when dealing with the area, an understanding of the religious situation is a must," he explained.

The presence of religious courts, which allow those of the various beliefs to settle certain legal problems, outside the regular Israeli law, creates a problem for the religious authority in Israel, Hayward said.

"There are religious enclaves now which provide certain..." (Continued on Page B25)

Career Opportunities Exploring for Energy

Find yourself... anywhere in the world with SSC. We need individuals with degrees in the physical sciences — F.E., M.E., F.E.T., E.E.T., engineering science, mathematics, physics, geology or geologic engineering — and a spirit of innovation and adventure.

SSC is an important subsidiary of Raytheon Company, one of the world's best known corporations. Our worldwide businesses include geophysical exploration, exploration for oil and gas wells, radioisotope services, and communication and analytical instruments.

Our BIRDWELL DIVISION needs skilled service engineers to help meet its expansion plans.

Our seismic data processing group needs skilled analysts to meet increasing work loads.

If you have the education, initiative, and are willing to work and travel — you can expect the same opportunities for advancement as many of our executives.

Our work is not easy. But it is always challenging!
Campus commission to investigate cost of maintaining athletic events

By Jacqui Kosecsk Staff Writer

Should intercollegiate athletics at SIUC continue to operate at its present level of programming and funding?

That was the question confronting 14 members of a special president's commission established last week to look into the kind of athletic events SIUC participates in and the cost of maintaining athletic programs.

Whether we can keep the athletics program where it is, with the same level of funding for men's and women's programs, or whether changes are necessary will be determined by the commission, Lee said.

The commission may find that cutbacks in programming are necessary, Lee said, but no changes will be made until after the group submits its findings on Nov. 1.

Two targets of the commission's study will probably be the University's compliance with Title IX regulations and the propriety of adding a 12th sport to the men's program in order to keep it at Division I status. Board Chairman William Norwood said.

There is "absolutely no restriction" on the commission's realm of investigation. Norwood said. But he added that he expects the study to entail an evaluation of "how good a job we're doing in funding the women's program," in accordance with Title IX, and "how we might do it better."

The commission will be looking at all aspects of the athletics program, including its budget, and therefore will probably review the data from an external audit of the athletics program set up by Lee in November, Norwood said.

He said the commission's goals will become more defined after its first meeting, which is scheduled for this week. At that time, the commission will make recommendations from Lee, John King, chairperson of the Higher Education Department, and to the president. King said the first phase of the commission's work will probably be an analysis of athletics programs at institutions comparable in size to SIUC, and a study of the history of the University's athletics program.

The task of evaluating the future of athletics may be a difficult one, according to King, since "it is hard to establish a framework for the program" on this campus without having people compare it with that of Big Ten schools.

He said he felt most people want "sports for men and women with free and open competition," but that the type of competition they prefer ranges from competing with other comparable institutions to "competing in the Olympics."

Since a study of the program's status has a tenancy to develop strong emotions and biases, it's possible that the commission will come out of this with a few controversies.

But he added that it "may also result in an increased need for advice and hope" for SIUC.

King said he expects to receive input for the study from the two athletics directors, administrators of the program who have participated in it and students, particularly those who are engaged in the program now or who have been in the past.

Israel opens an embassy in Cairo

Cairo, Egypt (AP) - Israel quietly opened its embassy in Cairo on Monday, its first in an Arab nation. The sight of the blue and white Star of David was greeted with some smiles, some tears and loud wails of mourning.

A dispute over Jewish settlements in occupied land, the Arab boycott of the Egyptian-Israeli peace and questions about the speed of the normalization of relations formed in the backgound.

"I am sure that other Arab leaders will join our peace process," Yaron-born Israeli charge d'affaires Yofe Hadad said in a statement read in Hebrew, Arabic and English. He then uncovered a brass plaque that said "Embassy of Israel" in the three languages.

The brief ceremony marking the opening of the Israeli embassy was attended by about 30 Egyptian Jews, 44 from the United Synagogues of America and the Women's League for Conservative Judaism and several Egyptian diplomats. 

U.S.-Iraq OK commission members

The Associated Press

The United States and Iraq have accepted the membership of a commission to investigate the former shah and the panel will go to Tehran in a few days. The United Nations announced Monday, but there was no word on when or whether this might bring release of the hostages held in the U.S. Embassy there.

Washington, State Department officials said the diplomatic plan for release was "on track," but with no firm timetable. The officials, speaking privately, said the United States probably will not be certain about the freeing of the hostages "until we see the whites of their eyes.

Chicago firefighter recruits start work

CHICAGO-AP - Mayor Jane Byrne vowed Monday not to negotiate again with the leader of striking firefighters as hundreds of replacement recruits reported to work in the five-day-old walkout. She assured residents that the city can "provide protection for an fire.

Both sides of the bitter dispute hardened their positions. Strikers repeated their determination to defy new-to-work court orders. Mayor Byrne is scheduled to put the workers back on the job. The city also suffered the first fire death since the strike began.

At a late-afternoon news conference, Mrs. Byrne assailed a "burning" of six of the striking unions for "terrorism tactics." She said those more than 1,000 firemen were on duty, as opposed in a normal complement of 60 more per shift. and that firemen were returning to work "in increasing numbers.

**New fees not ‘silent partner’**

The Feb. 7 issue of the Daily Egyptian contains an article by Ricardo Caballero-Aquino commenting on the new Morris Library circulation policies and specifically criticizing the $5 charge to graduate students admitted to candidacy for the "courtesy card.

The circulation policies, as published in the DE on Jan. 24, at Morris Library, clearly state that the "Courtey card charge applies only to non-enrolled and non-fee paying persons." Thus, since the library already charges graduate students admitted to candidacy, the card is issued without charge for those who are registered during a semester.

Revision of the circulation policies involved a period of over three years, during that time considerable groups, including the Graduate Student Council of which Mr. Caballero-Aquino was a member and past president—were provided with draft copies and their recommendations were given very serious consideration. The final review and recommendation of the new policies were made by the Library Affairs Advisory Committee, on which the Graduate Student Council has representation.

In adversarial cases of the library policies, it is incorrect that "new fees came along as a silent partner," and it is the decision concerning the courtesy card that is made by an administrator without faculty and student review and recommendation — Kenneth G. Peterson, Dean of Library Affairs.

**Clarifying the situation**

Happily, I regret that I was partially wrong regarding doctoral candidates and the library policies. These characters will receive, every semester, their Courtesy Cards for free if they are currently enrolled. I really blew it, however, with help from the library.

The Circulation Desk Clerk asked me to pay $5 for my "Community Card." After hearing my spring fee statement, and consultation with a supervisor, she still wanted the money. I then tried to get official confirmation of the policy. I read the regulations and found nothing for or against the $5. I phoned the library, sent a memo to the Dean of Library Affairs, on Jan. 30 and asked anyone and everyone for confirmation.

Eventually, Vice President of Student Affairs was informed and re-asked me to phone a memo from the library clarifying the situation. Dated Feb. 5 and addressed to me, the memo advised that I read the regulations again and have no trouble with the memo yet. Maybe since the Campus Directory lists me at the Board of Trustees of all places, really! The memo was seen.

To have documentary proof of my faux pa, I followed the library's advice. I found it, at last, under IV—"Schedule of Assessments for Overdue or Lost Library Materials." I don't know which is more flattering to doctoral candidates, being "overdue" or outright "lost."—Ricardo Caballero-Aquino, Graduate, History

**Gaining valuable experience?**

This letter is in regard to the story of Feb. 14, "Telpro helps students gain valuable television experience." I was a Telpro member last semester. I paid my seven bucks in dues, but I didn't gain any video experience.

For one, the membership was so small that personal individual attention was not a mad rush attempting to get your name on a sign up sheet before all the available spaces were filled. Sign up sheets were used for training with the television equipment. This system turned out to be no more than a disgraced mess. There was supposed to be a public relations team for the organization of the Chicago convention mentioned in the article. I was told they would call me in a few days when they needed me. I never did receive a call and that was the last I heard from Telpro.

Thanks Karen Stanwick and all others. I hope my seven bucks was put to good use Bob Bailey, Freshman, Radio and TV.

**DOONESBURY**

by Garry Trudeau

**Soda prices exploit underdog**

In response to Laura Hansen's letter Feb. 13 DE that sought an attempt to be served ice water in Galbary's, I would like to comment on their policy of serving only soft drinks to 19- and 20-year-olds.

A glass—paper, of course—of ice water at Galbary's and Hangar 9 costs 75 cents, even during happy hour. It might be served 20 cents during happy hour and 75 cents anytime.

Why do the bars insist on charging in 19- and 20-year-olds? And why do 19- and 20-year-olds keep returning to the bars to pay 75 cents for a soda? The bars should boycott bars that have unreasonable prices. More and more of the bars need to realize that they must encourage, not discourage 19- and 20-year-olds to come out to the bars.

Some bars are being more realistic about their prices for soft drinks.

Perhaps when bars such as Galbary's and Hangar 9 realize they are losing business they will follow the lead and begin to take 19- and 20-year-olds for all they're worth. —Jane Miller, Freshman, Accounting

Human life is given as gift from God

Not long ago there were some slides on the abortion issue shown in the Student Center Auditorium. These slides made it crystal clear that life does not begin when the baby leaves the mother's womb. On the contrary, the act of birth is simply a "change" in the baby's environment—from inside the mother to the environment in which we all live.

If this is true, then abortion is a serious moral choice. However, life begins at conception, then subsequent acts as Jan Sleutr's, "we don't believe in compulsory pregnancy," can be translated as: birth is not a free gift giving birth to children, or if they wish, they may cut them to pieces and allow them to die.

In light of this, our advice to women thinking of abortion is: Don't do it. Although giving the child up for adoption instead! The chances are very good that your child will be given to loving parents that truly desire you... —Graduate Student, Accounting

**Viewpoint**

**Church and state headed for collision**

By Mary Harmon

Staff Writer

If Clarence Darrow and John Scopes knew what was going on in the Illinois legislature these days, the poor men would turn over in their graves.

For while the Illinois Senate is a bill, introduced by Sen. Robert Mitchell, R-Oswego, that, if passed by both houses, would require all elementary and secondary schools which presently teach the Darwinian theory of evolution to give equal time to another "theory" of evolution called scientific creationism.

Scientific creationism isn't linked with the decoding of the DNA molecule nor is it really a tangent of the Big Bang theory. In fact, scientific creationism isn't new, at all. It's been around for hundreds of years, its most popular and vocally familiar with it.

Scientific creationism is the teaching of creation, based literally, on the Book of Genesis.

The teaching of the theory wouldn't add unduly to one's curriculum nor would it heavily tax teachers' understanding. His basic assumptions in the power of the state versus the freedom of religion, however, might be seriously jeopardized.

The bill specifically prohibits any religious doctrine or materials from being used in connection with the teaching of this alternative theory, but even the author of the bill admits that some reference to the Christian, Biblical version of creation would be necessary.

That the Illinois government has not established a statewide religion, not even Christianity, nor, for that matter, made the holding of any religious belief a requisite of a state-provided education should be enough to persuade the legislature from further action in this extremely volatile and intense issue.

That the Illinois Constitution states that "...the General Assembly shall not make any appropriations or pay from any public fund whatever, in aid of any church or sectarian purpose... should also be enough to discourage legislative action.

That this legislative directive may seriously run afoul of the First Amendment religious establishment clause of the U.S. Constitution should be, as well, enough to deter further consideration.

But, even the most ardent constituent must yield to the higher wisdom of his legislators. God help them that know what they are doing. For the bill's supporters say, the theory is simply an alternative one which just happens to be religiously-based and all which just happens to be Christian, at that. And, moreover, dissent will not be allowed. For any student demonstrating a "satisfactory knowledge of both theories may accept or reject, either in part or in whole.

No matter that a 1972 Gallup Poll showed that the church and organized religion had the single greatest influence of the institutions listed in the poll and that public schools had the second greatest influence. No matter that the combination of the two might be enough to make religious choice. Like Prohibition, seem like a quirk in the history of American freedoms.

British actor settles in Paducah; will star in University production

By Craig DeViere
Staff Writer

Paul Meier is an accomplished British actor schooled at two of England's well-recognized acting academies, a former member of the British Broadcasting Company Repertory Company and a veteran of radio, stage, movies and television.

But, 18 months ago, Meier abandoned the London stage for the more serene setting of Paducah, Ky. And he's glad he did.

"Paducah was a choice and not an accident. Having survived the jungle of London, I've got all that glamour stuff out of my system," Meier said who will star in the University Theater production of "A Country Wife." The play will be presented Friday through Sunday in the Communications Building Theater.

The most obvious explanation for Meier's presence in the mid-sized Kentucky town is the fact that his wife is originally from there. He met her in 1964 while she was vacationing in London. After years of living in London and elsewhere, he's settled in Paducah.

Meier is now the artistic director of the Market House Theater, a community playhouse. He's selected plays as well as directed and acted in some.

Meier's next project for the Paducah theater will be "A Day in the Life," a one-man play titled "A D. 65," a play compiled from the words of the gospel. He has performed the play nearly 250 times throughout the Midwest.

Meier got his first formal theater training at the prestigious Rose Bruford School in London. After three years of studying there, he moved on to the University of Kent in Canterbury. He also served as an artist-in-residence at the North Carolina School of the Arts in Winston-Salem.

The 35-year-old Meier has been acting professionally for 12 years while also serving as a lecturer and instructor in drama. His last five years in London, however, were primarily devoted to acting.

He appeared in television movies like "Houston, We've Got a Problem!" the story of the ill-fated Apollo 13 mission, and "Marti Curie." He was also featured in several BBC television situation comedies.

As a member of the BBC Drama Repertory Company, he appeared in more than 20 radio dramas with stars like Richard Burton, Paul Scofield and Michael Redgrave.

Meier landed the role of Harry Horner in "A Country Wife" as a matter of chance. He dropped in to check out the NIC Theater Department one day while vacationing through. He said he found they were looking for a professional actor to play the part. "So I auditioned on the spot and they gave me a contract."

Meier said that he's happy with the progression of the production of the William Wycherley Restoration-era comedy, written in 1675. The play is a satirical look at the highness of England during the 1730s. It was the focus of a great deal of criticism during that time period.

"It's shaping up nicely. I'm now convinced that it is well worth doing. I wasn't at the beginning," he said. "I think it's very funny and it also makes a point."

Meier said he has been impressed with the Theater Department, particularly the technical department and the facilities. He has worked with student actors, coaching them in the development of English dialects.

The Internship MBA
"an education that works"

The Internship MBA Program offers college graduates an accelerated one-year graduate business program which combines classroom learning with on-the-job experience. Typically, students work for approximately 30 hours per week with firms in Paducah and other major Southern Illinois cities. The program is a great way to gain valuable internship experience in professional settings while earning a degree.

The program's unique combination of in-class learning and an internship has been designed to help students gain the knowledge and skills needed to be successful in today's business environment. Students are required to complete 51 credit hours to graduate with an MBA degree.

In addition to coursework and the internship, students are expected to participate in the Career Development Program, participate in a week-long National Internship Conference and present a case study at the end of the program. Students are also required to complete a comprehensive, written examination at the end of the program.

The Internship MBA Program is an excellent opportunity to gain hands-on experience in a variety of business settings. Students will be challenged to meet the demands of a rigorous academic program, and they will have the opportunity to develop the skills and knowledge necessary for success in today's competitive business world.

For more information, call the Office of Internships at (618) 564-2500 or send your request to:

Blending of cultures, people is theme of International Festival

By Charity Gould

The world is shrinking—by the use of technology.

But there is a place to go to in the early 19th century are now easily reached in a matter of hours.

Because of this blending of peoples and cultures, the International Festival 1980 is being held, said Emmanuel Duguo, president of the International Student Council, which is co-sponsoring the festival with the Student Center.

"Welcome to the Village called World," is the theme of the festival that will run Tuesday through Thursday. Showing the different cultures of 14 different countries will highlight the week.

The screening of a film from India titled, "Fakiristan," will signal the beginning of the festival on Tuesday at 7 p.m. in the Ohio and Illinois River Rooms of the Student Center.

Another international film titled "The Indus Valley" will be featured Wednesday at 7 p.m. in Illinois River Rooms.

For those wanting to learn more about colleges in Scandinavia, Lilian Kojon, Scandinavian seminar's program director from Finland will give a slide presentation and discuss studying abroad in Scandinavia at the Student Center Sangamon Room at 3:30 p.m. on Thursday.

Chancellor Kenneth Shaw will speak on the topic of "International Educational Exchange and the Future of the SIU System" on Thursday at 7 p.m. in Ballroom D.

"We all need to learn more about the causes and how it works," said Duguo, who is obtaining a master's degree in political science.

There will be a question and answer session after the speech.

The French film "Cousin Cousin" will show in the Ohio and Illinois River Rooms and the Student Center Auditorium on Friday at 7 p.m. All films cost $1.00.

An exhibition of international artifacts will show at 6 p.m. in ballrooms A, B, and C on Saturday.

Each international organization will bring items like clothing, pictures and music to display. Duguo said a reception honoring new international students will begin at 7 p.m. on Saturday. As part of the reception international coffees will be served.

An international disco will highlight the evening beginning at 9 p.m. in the Big Muddy Room.

Viennese beef goulash, lasagna, Greek baked fish, molded garnacho salad and poppy seed rolls are a few of the dishes that will be served at the Student Center Renaissance Room from 10:45 p.m. to 1:30 a.m. on Sunday.

The meal, which cost $3.50 for students and $6.50 for the general public will feature foods prepared from countries like Switzerland, Denmark, Paraguay, France and South Africa.

Advance tickets for the buffet are on sale at the Student Center on Tuesday.

Tickets will cost 50 cents extra at the door.

From 2:30 to 4:30 p.m. a cultural talent show will be held in Ballroom D.

Reagan says his joke was taken out of context; claims cheap shot

HILLSBORO, N.H. (AP) - Ronald Reagan apologized Monday to anyone who might have been offended by his joke about Poles and Italians, but said he intended it as an example of humor he finds objectionable. He stood in sub-freezing temperatures outside an inn and said of the initial news story about the joke: "Frankly, I think it was a cheap shot taken out of context.

"No slur was intended and I apologize to anyone who was offended by it," the former California governor and Republican presidential hopeful said at a news conference in a voice alternately halting and rising in anger. Asked if it would hurt his campaign with the New Hampshire primary a week away, Reagan replied, "It will if people try to make something of it" and if he were unable to explain to "a number of people who don't know what my feelings are." But I will match my stand against prejudice and bigotry against anyone's in the country because we've been at it a long time, before there was even a civil rights movement." He stood in sub-freezing temperatures outside an inn and said of the initial news story about the joke: "Frankly, I think it was a cheap shot!" taken out of context.

The joke, which Reagan told to Sen. Gordon Humphrey, R-N.H., and other aides and supporters as their campaign bus left Keene for Milford on Saturday, went this way:

"How do you tell the Polish one at a cockfight? He's the one with a duck.

"How do you tell the Italian one? He's the one who bets on the duck.

"How do you know the No. 1 comedian? The duck wins." Reagan said he had told the story to display the kind of joke he finds objectionable. "I don't like that type of humor, and in a conversation about stories once, this came about with one of the reporters on the plane, and I had given this as an example," Reagan said in an interview with radio station WCEM in Claremont. "And on the bus, he [the reporter] asked me the other day, he said, 'what was the sequence of that story, and I paused and told him..."
Chicago school problems ease

CHICAGO (AP) — The school system financial crisis — at a boiling point earlier this month when teachers walked out over late paychecks and budget cuts — has cooled at least temporarily.

Officials say the system is financially in the clear for the rest of the school year. But in the month ahead, the Board of Education must consider extending a moratorium on firings and school closings.

A day in the court decision could set back plans to begin selling bonds in early April. Jerome Van Gorkom, finance authority chairman, said he has a moratorium on reappointing any or all of the members, however.

One of the first things the new board is likely to do is hire a new superintendent. The task is expected to be controversial, with black community organizations already pressuring for the appointment of a black candidate.

Then another round of radical cuts is expected, as the board approves a budget for 1980-81. The school finance authority must approve by July 15 a spending plan for the next fiscal year beginning Sept. 1.
Kennedy endorses construction of Perry County gasification plant

CUTLER (AP) — Sen. Edward Kennedy, Delaware, says he supports the immediate construction of a $600 million coal gasification demonstration plant near this Perry County community.

In a statement released by the Democratic presidential candidate’s Illinois office Monday, Kennedy said the Carter administration has been “foot-dragging” on demonstration of high-sulfur Illinois coal. He said he favors construction of both the Perry County Illinois project and a similar one in Noble County, Ohio.

The Carter project, in coal-rich southwestern Illinois, has been on the drawing boards for several years. It is being proposed by the Illinois Coal Gasification Group, a consortium of five power companies. The Department of Energy has said they will decide which project to support, maybe both, within the next few months.

The Perry County plant would produce 18 million cubic feet of pipeline-quality methane gas and 2,400 barrels of synthetic crude oil per day. Proponents say it would use 2,200 tons of high-sulfur Illinois coal daily and want to urge the administration to proceed with construction of both demonstration projects,” Kennedy said.

The statement, released by Kennedy’s Chicago house, urged the administration to move as quickly as possible to start demonstration projects. He said the “recent focus on the hazards of nuclear power points up our national failure to make use of America’s most abundant energy source: coal.”

70 skaters raise $5,000 for benefit skate-a-thon

By Mary Lee Montague

Approximately $5,000 was raised for the American Cancer Society by 70 skaters who participated in the American Cancer Society benefit Skate-a-thon this weekend at the Great Skate Train.

The highlight came when Carbondale Mayor Hans Fischer made an appearance to give a pep talk and commend the participants for skating for such a great cause as the American Cancer Society,” said Stewart, ATU Skate-a-thon chairman.

Stewart said the turnout for the skate-a-thon was, as advertised, in spite of bad road conditions and other problems with construction of both the Perry County Illinois project and a similar one in Noble County, Ohio. The Carter project, in coal-rich southwestern Illinois, has been on the drawing boards for several years. It is being proposed by the Illinois Coal Gasification Group, a consortium of five power companies. The Department of Energy has said they will decide which project to support, maybe both, within the next few months.

The Perry County plant would produce 18 million cubic feet of pipeline-quality methane gas and 2,400 barrels of synthetic crude oil per day. Proponents say it would use 2,200 tons of high-sulfur Illinois coal daily and want to urge the administration to proceed with construction of both demonstration projects. Kennedy said. “We should remove them from any competition for federal funds and use the two existing authorizations to build them just as soon as design work is completed.”

In the Kennedy statement, released by campaign spokesman Terry Michael in Chicago, Kennedy said there “has been too much talk and too little action on these important demonstration projects.” He said the “recent focus on the hazards of nuclear power points up our national failure to make use of America’s most abundant energy source: coal.”

Examiner testifies thirteen victims suffocated to death

CHICAGO (AP) — At least 13 young men or boys allegedly killed by John W. Gacy Jr. suffocated to death from material stuffed into their mouths during the trial in Cook County medical examiner testified Monday.

Dr. Robert Stein also indicated that some of the victims may have suffocated when they were buried in the crawl space of Gacy's home or thrown into rivers.

Gacy, 37, sat through gruesome testimony with no expression and mostly staring straight ahead. He is charged with murdering 33 persons, more than anyone in this country's history.

Stein was asked to identify a chain bracelet found in the crawl-space grave of Samuel Stapleton, who was 14 when he was reported missing in May 1978. The boy's mother, sitting in the spectators' section, sobbed loudly when the bracelet was produced by the prosecution.

Joseph Louis G. Garippo called a brief recess and, with the jury out of the room, told spectators that if Gacy felt he "couldn't handle it" he should leave the courtroom. None left. A rope resembling that used for clotheslines, was identified by Stein as being found around the neck of 19-year-old Matthew Bowman, who vanished on July 5, 1977.

The rope was knotted and twisted with a small loop at the end and Stein testified that its use would cut off oxygen and blood to the brain and the victim would become unconscious, go into convulsions and die.

He said a person could be strangled unconsciousness and not be dead. He said he found a cloth-like material in the throats of at least 13 corpses. He said there was no way to tell if the victims were strangled before the cloth was stuffed into their mouths.

Among four bodies taken from rivers—allegedly thrown there by Gacy when the crawl space became overloaded with bodies—was that of 13-year-old Robert Piest.

Piest, whose parents or brother and sister have been in court each day of the trial, is believed to be Gacy's last victim. The youth disappeared the night of Dec. 11, 1978, and Gacy was charged at Dec. 21 with murdering him.
Machine technology not a glamour program

By University News Service

It may not be a career children dream about, but it is a field with ongoing job opportunities and certain excitement of its own.

"Tool and manufacturing technology is one of the 'glamour' programs offered at the university level, yet the machine tool industry is one of the foundations for all production in our country," said H.R. Soderstrom, director of the division of applied technologies at SIU-C's School of Technical Careers.

"People the fact that car production is down and automobiles are being laid off, business is up in machine tools," Soderstrom said.

"People with the skills we develop in this program are finding work even in the automotive industry," he continued. "We teach the machinist going, revising them and maintaining them. What we teach is at the heart of the whole industry."

Soderstrom explained that the two-year program is not aimed at machinists or lathe operators.

"If a person wants to learn to run a lathe the best thing to do is get a job working on one at companies that take the educational approach to problem-solving — research and technic skills in addition to good hands-on experience. We want to teach an education about machines."

6 bobbies to try Paris-to-London

LONDON (AP) — Six of London's Thames River policemen will tackle rougher waters next month when they attempt to row from Paris, up the Seine and down the River Thames to London's Tower Bridge.

The Easter week stunt is to raise money for the "Help a London Child" charity.

On Monday, the expedition leader, Inspector Chris Patchett, said with chuckle: "It is an idea which was born as a result of too many pints of beer in the wrong pub at the wrong time."

He said the only two things the bobbies could think of that had not been done were: rowing around the world, or rowing from Paris to London. "We chose the one which was possible," he said.

**Pain Is The Signal: Bursitis Is The Problem**

**BY DR. ROY S. WHITE**

**Doctor of Chiropractic**

Recent sports stories have indicated that an ever increasing number of athletes have been sidelined due to bursitis. Is this a new disease caused by modern day diet or stress? Of course not.

For a long time baseball players, golfers, etc. have been taken away from their games because of "torn arms," frozen elbows and "stiff knees." Most of the difficulties were, in fact, bursitis. It's just that only recently the sportswriters have been able to call the problem by its right name.

Of course, bursitis isn't a condition experienced only by athletes. Persons in their thirties and forties, especially the house wife, are particularly vulnerable to attacks.

And it isn't a condition that an individual can effectively self treat through time and neglect. Left untreated, bursitis gets worse with activity and the pain can become so intense that throbbing discomfort can occur even when the limb is at rest.

When persons who are less active than athletes encounter the bursitis problem they are more prone to serious difficulties. The long and short of it is that bursitis can affect almost anyone. And once it is treated it is necessary. Untreated bursitis can lead to serious, permanent ailments such as arthritis.

In other words, don't take a chance with bursitis. Let the pain be your reminder that you need effective treatment. We urge bursitis sufferers to contact a Doctor of Chiropractic.

PALESTINIAN ISSUE KEY IN MIDESTRA STRIF--panel

Christian population, which is substantial, is also divided.

"There is a basic division of the area, noting the secular states, where the official religion, different from the religious state, is Islamic. In the Arab state, which recognizes Islam as the official religion. Secular states include the United States and the United Kingdom. Jordan and Saudi Arabia are among Islamic nations. They have a shared heritage in the differing ideologues of the various nations. Hardenberg said that the national spirit of the producing nations was exaggerated by the United States, and it has misled our foreign policy.

"Non-oil countries like Syria and Jordan are reasonably well-off. If we are to have a better foreign policy, we should not rely on them to get the needs of the people. The U.S. must take a lead in helping other religions.

Higher ed a priority, aide says

"There's so much uncertainty over the economy, the state has no way to maintain a reserve as a hedge. We are only able to keep it in the reserves until it's needed in the future. Our reserves will be presented to the General Assembly in March.

63-year-old 'kid' carves wooden circus

NEW BRAUNFELS, Texas (AP)--Like other kids, Fred Wadkins has carved a circus in his imagination.

But the 63-year-old said the magical big top of his imagination has been painstakingly crafted in real wooden miniatures.

Wadkins, a woodcarver for 40 years, spent almost a decade creating the stunning 8-foot-tall replica of balns wood that he made into the stunning "Francis Wiegand Circus," the "Top Gun" of American Show.

Each of the 17 colorful circus wagons is about 12 inches long. Dozens of elephants, tigers, monkeys and other circus creatures are carved into the wagons.

Although Wadkins is self-taught, the circus is intricately accurate. So intricate and "accurate that it causes the attention of historians at the Institute of Texas Cultures in nearby San Antonio.

Daily Egyptian, February 18, 1986, Page 13
Netters drop three to Big Ten trio
By Ed Dougherty
Staff Writer

The University of Wisconsin-Madison's women's tennis team continued to falter as it lost three matches in a row to Big Ten opponents at Madison, Wis. The Salukis lost for the fourth straight time to win a team match.

The netters lost to both University of Wisconsin-Madison, Northwestern University and the University of Minnesota.

Against Wisconsin, the Salukis lost 7-2. SIU lost the first five singles matches, but won the sixth as Eric Eberhardt beat Rusty Muenz 7-5, 6-4. The other Saluki victory came when the doubles team of Apmon and Steve Smith defeated Rhys Lunn and Andy Ringlisen 6-4, 6-2.

Northwestern beat SIU 7-2. Dave Filer lost off the match with his only victory of the weekend, defeating Paul Reit. 7-6, 6-1. Eberhardt won his second singles match for SIU's only other win over Northwestern, besting Marc Lemman 6-7, 6-7, 6-2.

SIU's best score of the weekend came in a losing effort of the抽检, 6-2.

Grapplers shut out on road
By Dave Kane
Staff Writer

If you've ever experienced the circus-like world of All-Star Wrestling, you know that the men of the ring are experienced and have accepted life on the road as part of the job.

But if you're a follower of Saluki wrestling, you know that SIU's men of the mat, most of them anyway, are inexperienced and not accustomed to three-day road trips. Unfortunately, both inexperience and an extended road trip made them presence evident last week as SIU dropped three dual meets.

Coach Linn Long's squad began the excursion last Wednesday in Charleston against Eastern Illinois University. Although the Panthers are a Division II team, they won all six matches in a 33-12 win.

The next learning match for the Salukis, who now are 3-5, will be at home Feb. 29 against the University of Iowa.

Counsilman stays active in coaching and writing at 59

"Continued from Page 10:"

"The times are starting to plateau and level off," Counsilman said. "We haven't reached the ultimate, records will continue to be broken, but there will be a much flatter curve now than before."

Counsilman was named coach of the 1984 U.S. swimming team for the Olympics in 1984 at Tokyo and in 1988 at Montreal. At Montreal, the team won 12 of a possible 12 gold medals. Athletics he has coached have been members of the last eight Olympic teams.

"I sympathize with the athletes who have been training for the 1980 Summer Games, but feels a bit unnecessary. "I think we have to boycott, but the United States has to do more than that," Counsilman said. "The kids were real resentful at first, but they must understand that we must make a sacrifice."

Counsilman can relate to the problems of the athletes.

"I had the world record in the breaststroke and I wanted to be on an Olympic team myself, but World War II broke out," Counsilman said. "I was disappointed, but I never may have swum the Channel if I didn't go to war."

"I'll keep coaching until compulsory retirement and then I'll probably coach an AAU team. Who can retire now with inflation, anyway?" the coach laughed.

"It's hard to picture me in retirement, just sitting around," Counsilman said. "I just can't imagine it."

Track team second in 'flat' outing

By Rod Smith
Staff Writer

When the SIU men's track team traveled to Madison, Wis., last weekend for a meet with Wisconsin, Minnesota, Northwestern and Northern Illinois, he expected it to be a warmup for the upcoming Missouri Valley Conference meet.

What he didn't expect was that the team would perform so poorly as it did.

"We had a super-hard work week last week and I felt that it would affect us a little," Saluki track Coach Lew Hartzog said. "But everyone was so flat that we didn't do anything."

The Salukis finished second, scoring 45 points. Wisconsin won the meet with 111 points, followed by Minnesota and Northwestern. A second-place finish may not seem bad, but Hartzog isn't happy.

"I don't think Wisconsin is that much better than we are," Hartzog said. "If we are that bad, we are hurting. If that is the case, we'll have more new faces next year than we do this year."

The Salukis did have their bright moments. Senior standout David Lee won the long jump with a leap of 23-6 3/4 and captured the 60-yard high hurdles in 9.4, according to the electronic timer.

Hartzog said Tracy Meridith ran well in the high hurdles.

"His performance gives me more hope for the conference meet," Hartzog said of the senior from Cincinnati, who finished fourth in the hurdles. Freshman Kevin Baker, recovering from a shoulder injury, competed for the first time since the opening indoor meet at Nebraska and finished third in the long jump at 22-3. Baker also finished fourth in the triple jump with a leap of 46 feet.

Freshman shot-putter Ron Marks took second with a toss of 51-4 1/2. Teammate John Smith was fourth with a put of 50-7. Injuries came to the track team as both Lance Peeler and Derek Booker fell to the track during the running of the quarter mile. Peeler injured his knee, but Booker tore a ligament in his leg as he made the final turn and his status for next week is questionable.

Booker aggravated a thigh injury and he, too, is questionable for the conference meet. The Salukis top quarter-milers and they also are members of the mile relay team.

The mile relay team finished second in a time of 3:21.54, despite the absence of Peeler and Booker.

The Salukis now will prepare for the Missouri Valley Conference indoor championships at Columbia, Mo., next Sunday and Monday. The Salukis didn't compete last year because of a snow storm.

"We have 10 days to get ready for this one and we will be ready," Hartzog said.

Tankers rebound to claim first win over IU Hoosiers

(Consolidated from Page 16)

second and the Hoosiers' Anthony Jones third. Indiana Coach Dave Cusimano argued that no changes could be made after the finishes were announced. When a coach discovers he's losing his third dual meet of the season for only the second time in six years, a protest to the Rules Committee.

The mile relay team finished second in a time of 3:21.54, despite the absence of Peeler and Booker.

The Salukis now will prepare for the Missouri Valley Conference indoor championships at Columbia, Mo., next Sunday and Monday. The Salukis didn't compete last year because of a snow storm.

"We have 10 days to get ready for this one and we will be ready," Hartzog said.

Tankers rebound to claim first win over IU Hoosiers

(Consolidated from Page 16)

second and the Hoosiers' Anthony Jones third. Indiana Coach Dave Cusimano argued that no changes could be made after the finishes were announced. When a coach discovers he's losing his third dual meet of the season for only the second time in six years, a protest to the Rules Committee.

The Salukis could have ended all that discomfort if they had won the final event—the 400 free relay. But Indiana won its second of the day. The Hoosiers also won the 400 meters and the 1-mile event.

The pressure was on the Salukis all day long, but they never trailed by more than five points.

"I think the turning point was the 200 individual medley and (Jorge) Jaramillo finishing third," Hartzog said. "In the 200 IM, we made it look so easy our guys could have adjusted their goggles during the turns."

The win pushed SIU's dual record for the season to 3-3-3 and panning it gave Cincinnati Friday night. Now come two weeks of work for the National Independent Conference Meet in Columbus, S.C., Mar. 6-8.
Salukis slaughter New Mexico State

By Mark Pahich
Staff Writer

Abrams and Barry Smith put on a little Barmum & Bailey show Monday night against New Mexico State in the final Arena appearances for the two seniors. Abrams poured in a career-high 37 points and Smith added 22, leading the Salukis to a 114-86 win.

"I wanted to leave the Arena with one big final memory," Abrams said. "Blowing a team out like we did makes for a nice farewell."

Smith, who slammed home his first dunk of his college career in the first half, said he was pleased with his effort, but added that the win was even bigger.

"Scoring 22 felt great, but seeing that we can play a great ball game like this meant even more," he said. "The seniors knew it was the last home game, and Wayne, Compton, Hird and myself went out there to make things happen. And things sure happened for the Salukis. At halftime, SIU was leading 72-29, and as a team, the Salukis shot an incredible 76 percent from the floor. The Saluki finished the game shooting 61 percent."

"Everyone really was loose during the game," Smith said. "That's why everything was falling in for us. We stuck to our defense and our plays, and everyone down the court we seemed to do the right thing."

The Salukis' performance was almost flawless in every facet of the game. Besides the hot scoring, SIU stole the ball 15 times, blocked five shots, pulled down 37 rebounds, and forced the Aggies to turn the ball over 31 times.

Every Saluki saw action in the contest, and everyone scored. Besides Abrams and Smith, teammate Marty Krug actually started the contest the way they thought they would.

"I felt pretty confident about the game," Krug said. "I knew we won it," he said of Krug's first-place showing in the 40-yard dash. "I thought the fans would have booted or something when they (the timers) announced my time." For his first decision.

The original decision declared Indiana's Ken McLauchlin the winner. Krug's time was at 10.01 seconds. Krug's margin of victory was 0.01 seconds.

The Salukis dominated every aspect of the game in the second half after being hedgered under the boards in the opening half. Coach Cindy Scott got the kind of game she sought out for when her senior flames posed the question of national competition, the 57-56 victory over the Hoosiers was the biggest dual meet win for his team in a long time.

Looking at the 50 free realistically, it was just another event that the Salukis took first and third place in. The correction in the finishing times due to a malfunctioning timing device caused an understandable Steeple was convinced.

"In my heart, I knew we won it," he said. "And if I had run at my best, I think the fans would have booted or something when they (the timers) announced my time." "I felt pretty confident about the win. I thought I could have been in the lead, but I didn't do it for the appeal and publicity as much as for my own personal satisfaction."

The women will travel to the University of Illinois Thursday. SIU's record now stands at 14-14.

(Shawn Smith is the only one of swimming with other seniors that can be applied to it)

Channel swimmer Counsilman stays active, productive at 59

By Rod Smith
Staff Writer

Listing the Indiana swimming team's recent accomplishments would fill two pages. The team has won 19 consecutive Big Ten titles, has only lost 11 dual meets in the last 12 years, compiled a swimming record of 322-50 and has won six consecutive national championships from 1968-73.

The man behind Indiana's success is considered a legend in many circles and is known worldwide as the expert in the sport. Even those who have competed against him, the man who coached Mark Bieker, a 35-year-old who was 59-year-old in his 23rd year as the head coach of the Hoosiers, maintains the vitality and vigor of a man half his age.

"I don't know how the heck I stay active," Counsilman said. "Somewhere I've become somewhat of a folk hero in September of 1979, when, at the age of 58, he became the oldest person to conquer the challenge of swimming across the English Channel. A former AAU national swimming champion who has been training for 33 years and is known to have started training for health reasons.

"I wanted to see if a year of hard training would lower my blood pressure and reduce the risk of a coronary," Counsilman said. "Of course, it also meant giving up my ankle and can't jog, which is popular with people my age, but always have loved swimming and the Channel is sort of a classic distance swim."

Counsilman trained for a year, swimming nearly five hours a day during the peak of his training. When he was done, he trained the Hoosiers. He put on 26 pounds to help protect him from the cold Channel waters.

"I felt pretty confident about the swim. The biggest test was to get acclimated to the cold water," Counsilman said. "It was about 60 degrees, whereas the water in a swimming pool is about 80 degrees."

Counsilman couldn't conceal his pride about conquering the Channel.

"It felt great. I couldn't sleep that night. I was so excited. In fact, I couldn't even dress myself because my shoulders were too sore," he said. "I wanted to be the oldest to swim it, but it didn't do it for the appeal and publicity as much as for my own personal satisfaction."

Personal satisfaction. That seems to be a great stimulus to this man who, through his various writings and publications, is regarded as a genius in training swimmers.

Counsilman said the best advice for publication rights to his most recent works.

"I've always been interested in science and like to try to read about the association with swimming with other seniors that can be applied to it like psychology and physiology," Counsilman said. "It's a good feeling to give something to a sport instead of just taking. The personal satisfaction of contributing feels good."

Counsilman currently is writing an article for World Book Encyclopedia and has three books being published.

Counsilman feels that a swimming coach only is as good as the athlete.

"It's hard to evaluate a coach's job," Counsilman said. "Sometimes you do your best coaching job when you have poorer athletes. Swimming is sort of like an auto race. Who wins, the car or the driver? Sometimes the coaches get too much credit for great athletes. A swimming coach's main job is to maintain an athlete's drive and get them ready through training for competition," Counsilman said.

The coach does not know how long swimming times can continue to fall.
