Democrats taking aim
Gov. Edgar's proposed
two-tiered registration
process questioned.

By Donita Polly
Daily Egyptian Reporter

Democrats will visit SIUC today
to criticize Gov. Jim Edgar's two­
tier motor voter plan, which will
register voters for federal elections
but not state and local elections.

State Representative David
Phelps, D-Eldorado, and Cook
County Clerk David Orr will criti­
cize the plan at a press conference
at 4:45 p.m. in the Mississippi Room
of the Student Center.

"Other states have already passed
and implemented the plan. Their
governors didn't drag their feet
like Edgar did."

Clara McClure
Carbondale Township Supervisor.

Women Voters, agreed with Chew
and said Edgar's system would con­
fuse voters into believing they were
registering for both elections, not
just the national elections.

Chew said the reason for Edgar's
two-tier motor voter plan is Edgar's
fathe more democracies would be
registered to vote under the one­tier plan that Orr, Phelps, and the
League of Women Voters support
rather than under the two-tier plan.

Carbondale Township Supervisor
Clara McClure said the League of
Women Voters has been trying to
pressure the government and legis­
lators to get legislation of the one­
tier plan passed in Illinois.

"Other states have already passed
and implemented the plan," McClure said. "Their governors
didn't drag their feet like Edgar did.

Eric Robinson, spokesperson for
Edgar, said the reason Edgar sup­
pports the two-tier plan is because
Edgar is concerned about election
fraud under the one-tier plan.

"Many safeguards already pre­
sent are not held under the (federal)
motor voter plan," Robinson said.

Communities

to protest

incinerator

By Alan Schnepf
Daily Egyptian Reporter

Carbondale environmentalists
opposed to a controversial toxic
waste incinerator at the Crab
Orchard Wildlife Refuge will gath­
er in Times Beach, Missouri tomor­
row, for a joint protest with people
from other communities that are
near incinerator sites.

Times Beach was an envi­
nmental catastrophe area in the late
seventies and early eighties, when
dioxin, a by-product of the inciner­
ation process, contaminated a dust
suppressant spread on the roads
near the town. Dioxin is known to
cause cancer and is suspected to be
linked with several other health
problems.

Times Beach has since been
evacuated. The buildings that used
to be Times Beach are set to be
incinerated along with soil scraped
up in the area. Rose Rowell, a rep­
resentative for the Southern
Coalition on Protecting the
Environment, said the protest will
draw people from all over the coun­
try to oppose the burning of toxic
waste.

"It's kind of a sharing thing.

Student reaction to weekend committee ideas mixed

By Kristi Delority
Daily Egyptian Reporter

Student reaction is split on whether the new weekend program­
ing committee's ideas will prove successful.

The new committee was formed
by SIUC President John Guyer to
discuss and propose programs and
activities that may be scheduled for
Friday or Saturday nights of the
1995 fall semester.

Some programs suggested so far
are outdoor concerts, laser light
shows, bonfires, comedy acts and
organized attempts to break interest­

CANADA REJECTS U.S. ENVIRONMENT REFORM — TORONTO—Deputy Prime Minister Sheila Copps has sharply criticized the proposed legislation in the United States that the Canadian government opposes. The bill, sponsored by Senator Edward Kennedy, would require that all new energy projects meet certain environmental standards. The Canadian government opposes the bill because it would impose significant costs on the Canadian economy, particularly in the mining and forestry sectors. The Canadian government argues that the environmental standards in the bill are too stringent and would lead to increased costs for businesses and consumers. The Canadian government is concerned that the bill would also lead to a deterioration of the relationship between the United States and Canada. The bill was introduced in Congress in March and has since been referred to a number of committees for examination.

BUDWEISER LAUNCHING CAMPAIGN IN CHINA — WUHAN, China—Budweiser is preparing to launch a new beer in China, adding to its existing portfolio. The company is hoping to tap into the growing demand for foreign beers in China, where the market is estimated to be worth $5 billion annually. Budweiser, which is owned by Anheuser-Busch, is one of the largest beer producers in the world and has a strong presence in many countries. The company is investing heavily in China, where it has been operating since the early 1990s. Budweiser has already launched two beer brands in China, and is now looking to introduce a new one. The company is working closely with local distributors and retailers to ensure a smooth launch.

NATION

NEW IMMIGRANTS COULD BE DENIED WELFARE — WASHINGTON—Many new U.S. citizens could be denied access to federal benefits for years under a new policy that could affect some unconstitutional—Element of the Republican drive to balance the budget. Advocates argue that the purpose is to discourage immigrants from becoming naturalized citizens for the sole purpose of obtaining federal help, much as some states have kept social service benefits low in hopes of discouraging an influx of welfare recipients. Critics say the measure would force Americans who sponsor immigrants to think harder about serving in the military because they would be financially responsible for the newcomers for a longer time. Any foreign national immigration to the United States must have a citizen sponsor. "We want them to naturalize because they want to vote or be part of the body politic—not to get benefits," said Richard Day, chief counsel of the Senate immigration subcommittee. "What this does is make an immigrant earn his way into the American welfare system.""...—from Daily Egyptian wire services

Concurrent degree program installed in Graduate School

By Rebecca Hutchings
Daily Egyptian Reporter

A concurrent degree in agribusi- ness and business or in telecom- munication and business may soon be an option for students at the University.

The Illinois Board of Higher Education will make a decision on the concurrent degree any day now, according to Bill Elliott, associate dean of the College of Mass Communication.

"It's not official yet but I know we're about to get approval," Elliott said. "I think they'll look at it sometime before the end of sum- mer semester.

The concurrent degrees will allow students to obtain a master's degree in two different areas in a smaller amount of hours.

"The reason this is being pro- posed is to provide graduate stu- dents with a little more flexibility," Sarah Blackstone, chair of the graduate council, said. "Students get a better education by learning more about different courses. It makes them a lot more employable.

Lyle Solversen, associate profes- sor in agricultural economics, said many of the students in his depart- ment work in agribusiness companies.

"It's a nice combination to teach them two different areas — as much as the joint program," Solversen said.

In order for students to be eligi- ble for the concurrent degree pro- gram, they must be admitted to both programs and then apply for the concurrent program, according to Harry Daniels, associate dean of the graduate school.

"In the concurrent degree pro- gram, students have to take 21 hours in each of the programs and six hours of electives, for a total of 48 hours," Daniels said. "In order to get a student a master's degree in both programs without the concurrent degree, it takes a total of 64 hours.

Funding is not a deciding factor in approval of the concurrent degree program, according to Blackstone.

"The program is coming from already existing programs," Blackstone said. "Faculty and staff won't be added.

The primary setback for the pro- gram has been giving students two degrees fairly, and in a shorter amount of time, according to Solversen.

"The mechanics of the degree were formulated by the education- al policy committee through the graduate council," Steven Kraft, chair of agribusiness economics, said.

"It is my guess that more and more concurrent degrees will be presented (by different depart- ments) in the next few years, particularly with Blackstone's twoday course and the graduate program, Solversen said. "So, students will have a broader education.

Morris upgrades old databases, government document retrieval

By Rebecca Hutchings
Daily Egyptian Reporter

New and upcoming services available in Morris Library include a combined database and electronic access to government files.

In the fall, a new electronic resources library (ERL) will combine Morris Library databases onto one server, allowing for simultaneous research of databases in a shorter amount of time.

Currently, there are separate databases for each electronic resource server. Morris Library databases are accessible through a computer.

These services are available through the government document retrieval office, according to Walter Stobbs, Morris Library documents specialist.

"Right now, we're using soft- ware the federal government sent us to access the information, but it is also available through the ERL," Stobbs said.

There are six terminals capable of accessing the services on the first floor of Morris Library, Stobbs said.

"Eventually, (the library) will probably be migrating to the ERL so students will have more access for students," Fox said. "It is the better way to get the information.

If students are interested in accessing the government files through the World Wide Web the uniform resource locator is http://www/daily-egyptian.com/ daily-egyptian/ARCH/ARCH-5.html, according to Eric Weststein, assistant social and studies librarian.

Sculptor uses beauty of female body to create art

By Dustin Coleman
DF Features Editor

Several artists and art buffs believe the male body is just as artistic and beautiful as the female but not Thomas Gatlin.

Gatlin, a graphic illustrator-carto- nist at the Center for Archeological Investigations at SIUC, supports the belief that there is a collection of female sculptures now being exhibited at the University Museum.

"I had so much to choose from," Gatlin said. "There is nothing else in the world that has that capability of a power to hold my attention.

Gatlin has a total of six statues — almost all nude females — and all his works "hold my attention."

Gatlin has a total of six statues — almost all nude females — and all his works "hold my attention."

The collection shares a com- pelling personal vision of woman as both strong, beautiful and intelligent, according to Gatlin.

One of the statues, "Summer," is of a pregnant woman with long streaming hair standing on top of a lotus bull, connected to the lotus female icon of nurturance and desire, Gatlin said.

"It is refreshing to do a piece that delights my eye, and I won't apologize for anything," Gatlin said.

Gatlin said he saw the girl on her bronze sculptures Tuesday afternoon at University Museum. The exhibit will be on display until July 30.

Thomas Gatlin explains the ideas behind his bronze sculptures Tuesday afternoon at University Museum. The exhibit will be on display until July 29.

The other statues have names like "Improvisation," "Intimate Vertex," "Queen of Saturday Night," and "Pabokokent," which comes from two words meaning ancient and movement. Each statue specifically fits the character of the statue, he said.

Whether Gatlin takes a more liter- al thought process in creating a piece, or whether the inspiration is spontaneous moment, both satisfy a need, he said.

"One is abstract, and one is total feeling," he said. "I do pieces that delight my eyes, and I won't apologize for anything."

Gatlin said he feels he has to get his fix of the more artistic side of metal.

"If I was just a scientist, I would probably wet his head and I like to do the scientific side, but there is still the need for the more artistic side of metal," Gatlin said.

The process of creating the statues takes many steps. Gatlin said it all begins with an idea he believes will make a different way, he said. Gatlin said he starts from the more artistic side of metal, but there is still the need for the more artistic side of metal,

"It is very, very important to get the inspiration," he said. "It is very, very important to get the inspiration, according to a Bridge street from the center line of Widdiford Street to the point 190 feet

City council votes to remove certain parking spaces

By Rob Neff
DE Government/Politics Editor

The City Council voted 5-0 Tuesday to eliminate parking along certain sections of Carbondale streets to make room for the new mass transit system.

Mayor Neil Dillard said the council changes in parking regulat- tions were necessary in the system,

which is scheduled to begin opera- tion Aug. 16.

The ordinance eliminates 10 parking spaces along the north side of East Willow Street between the center line of South Wall Street to a point 120 feet west.

The ordinance also eliminates parking on the north side of East Willow Street between the center line of South Wall Street to a point 100 feet west.

The ordinance also eliminates parking on the north side of East Willow Street between the center line of South Wall Street to a point 100 feet west.

According to the summary, the changes may impact some busi- nesses on Route 51, but the parking changes in the residential neighbor- hoods should not effect the students.

Mayor Dillard said the ordinance will be responsible for supplying the new parking and the city should be responsible for installing them.

Councilman Jack McManus said the council changes in parking regulat- tions were necessary in the system,

which is scheduled to begin opera- tion Aug. 16.

Parking increase legitimate, needed

AFTER WITNESSING COUNTERLESS REACTIONS to fee increases, SIUC students may oppose the Board of Trustees decision to increase parking sticker fees. After all, opposition to the decision seems imminent when the increase means paying $30 a year compared to the current $10 fee. Complaining over the drastic increase may be justified. However, parking costs at SIUC are relatively low compared to other state universities. After comparing opposition to the decision seems imminent when the hour. Like other state universities, while fines doubled to $4.

TheBOT also approved an increase in metered parking fees and parking fines. Meter costs doubled to 50 cents an hour, like other state universities, while fines doubled to $4.

The increase means paying $30 a year compared to the current $10 fee. Complaints over the drastic increase may be justified. However, parking costs at SIUC are relatively low compared to other state universities. After comparing parking costs at SIUC is among the best in the state.

TheBOT also approved an increase in metered parking fees and parking fines. Meter costs doubled to 50 cents an hour, like other state universities, while fines doubled to $4.

The increases were necessary in order to improve parking on campus. The student body at SIUC will pay far less than many other Illinois universities. For example, at Illinois State University, the sticker increase is a good decision. Students have demanded better parking facilities. However, along with that demand comes the responsibility and willingness to share in the cost of those facilities.

Unfortunately the fee increase has to come directly out of the pockets of SIUC students—the only source available for parking improvement funds, according to Brewer. He said the state will not provide any money when it comes to improving or operating parking at universities. So, naturally those funds have to be generated through parking increases and the sooner the better. In fact, changes in parking have already taken place in the last 10 years, and in the last 10 years, fees have increased from $30 a year to $44 for a one-year permit. Granted, those funds have to be generated through parking increases, so those fees have to be paid by students.

DESPITE THE STICKER INCREASE, STUDENTS at SIUC will pay far less than many other Illinois universities. For example, at Illinois State University students pay $44 for a one-year parking permit. At Northern Illinois University students pay $44 for a one-year permit. At Illinois State University, the only source available for parking improvement funds, according to Brewer. He said the state will not provide any money when it comes to improving or operating parking at universities. So, naturally those funds have to be generated through parking increases and the sooner the better. In fact, changes in parking have already taken place in the last ten years, and in the last ten years, fees have increased from $30 a year to $44 for a one-year permit. Granted, those funds have to be generated through parking increases, so those fees have to be paid by students.

So, new newspapers are springing up in the suburbs. Big-city newspapers like The Times are trying to figure out how to serve suburban readers better. And in the city, it gets harder and harder to find a newspaper. New York Times Newswatch was an act of confidence not only in a city and its newspapers but also in newspapering. That's breathtakingly rare, (USA Today is the big exception. You can like it or you can scoff at it, as many in newspapers love to do, but it is the biggest and most powerful act of faith in daily newspapers.)

Oh, there are other future-oriented moves in the newspaper world. The Washington Post took an intriguing last step in launching Digital Ink, its electronic advertising service. But what of the mother ships, the newspapers themselves? In too many cases, they are sorely embarrassed.

Change, badly needed, is hard to come by in this environment. Pay is falling behind, newspapers are less able to attract talented people, and the издай проводит все свои действия правильно. Я, конечно, не шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги всех пошаг, а значит, они не делают шаги все...
Protest continued from page 1

They’re invited people from several at incinerator sites so we can show light on each place," she said.

Richard Wulffy, a law student at SIUC, said the issue unites people from different areas targeted by it.

"We’re all basically in the same light — the light against incineration. And it’s a way for us to come together to dispel of toxic waste.

The incinerator at Club Orchard is being built to burn municipal poly-chlorinated biphenyls (PCBs) from four areas in the region that were contaminated from industrial dumping by Sangamo Electronics, Sangamo said in a recent lawsuit.

PCBs are a group of compounds that occupied buildings built by the government in World War II to the south of the water tower.

Schnuburger Industries, a Texas environment firm, recently bought Sangamo and inherited the contaminated site. After studies in the mid-1980s revealed the extent of contamination the area eventually became eligible for clean-up under the Superfund list 1989.

Critics of the incinerator said the process will release harmful amounts of dioxin into the area near the incinerator.

"You can stop anything if you really want to do it," he said.

Richard Davis, Schnuburger’s project manager for the Club Orchard site, said test runs of the incinerator are planned to begin next spring. He said the burning of the contaminated dirt will immediately follow a successful test run.

Schnuburger’s scientists released Animal rights groups say the burns are not safe.

"There will be some dioxin released from the incinerator, but it will be in concentrations within the limits the EPA has deemed to be acceptable through their studies," Davis said. He added the incinerator will be monitored constantly and will be shut down if levels exceed the acceptable limits.

Schnuburger vowed to protest the only step in the fight against the incinerator, which he believes is far from over.

"There’s going to be a huge public outcry before this is over," she said.

"They misinform the public and don’t tell the whole truth. People need to know dioxin can cause them to have an illness they otherwise wouldn’t have.

with the materials first,” Gatlin said. “I like to make sure I know what I am doing before I jump into it.”

Next, he may have a model come for the artist’s final step is creating a system of channels that will be used to sprue. The entire statue is then dipped into colloidal silica and coated with fine silica sand. Then, liquid bronze is poured down the sprue, replacing the wax. “Every piece is nerve-wracking,” he said. “You have worked on a project this long and then you make a drastic change. It makes you very nervous.”

Gatlin said though the exhibit is of six women, he never tired of doing similar statues because of the diversity of each. “It is always a new and learning experience,” Gatlin said. None of the pieces on display are for sale. Gatlin’s collection will be on exhibit from July 25-29 at the University Museum at the end of Finer Hall. A reception for the artists will be on Friday July 28 from 5:30 to 7:30 p.m. Gallery hours are from 9:00-3:00 p.m. Tuesday through Saturday.

College of business revamps its administrative positions

“...exciting curriculum. ...”

By William C. Phillips III Daily Egyptian reporter

Adjustments this fall in chairperson positions in the college of business will create a more centralized administration, according to Thomas Keon, dean of the SIUC College of Business and Administration.

Arlyn Melcher, chairman of management for COBA, said all of the department chairs are being replaced and administrative changes will be made in the dean’s office.

“The department of management has appointed Charles Stashan, an associate professor in management, as acting chair, replacing Arlyn Melcher.”

During this year the department of finance and management is planning in held national searches for the chair position, Keon said.

Positions in the dean’s office are being restructured include the development offices and the computer staff, Melcher said.

The new accounting department director will be Alan Barnes, an associate accounting professor, replacing Richard Rivers.

The new marketing chair will be Zarek Lambert from Auburn University, replacing Gordon Bruner.

The new finance chair is Hussein Elsaid, a finance professor, replacing Iqbal Matar.

Keon said he hopes the changes will produce stability in the college.

“The college has not had a permanent set of chairs and for some time the acting chairs were working with an acting dean,” Keon said.

“IT think the college is at the point where it is ready for a new set of ideas and this group will be able to give a fresh perspective.”

The changes are associated with budget reallocations to the dean’s office to support the administrative appointments, Melcher said.

This all will work out very well and substantially strengthen the college, but the immediate effect creates difficulty for department functions and limits the administration of research and service,” he said.

Marcia Comeri, associate dean of the college of business, said after three years without a permanent dean the college needs to update and change.

“Businesses out in the world are constantly changing and it is important that colleges sending students out into the employment world update themselves as well.”

Comeri said.

Comeri said a revamping of the undergraduate, master’s and doctoral programs will provide students with the most up-to-date knowledge in the business field.

Melcher said he believes the changes will prove to be harmful and the college is going in the opposite direction in the way business firms handle things.

“The dean’s decision to build up the central administration and shift resources from the department to the dean’s office is the opposite of strategies followed in business firms,” he said.

Keon said the students will not see any immediate effects, but the changes will ultimately produce positive outcomes.

“The long run, those new ideas will generate a more exciting curriculum,” Keon said.

“We will see course work and program content that have theoretical and pragmatic aspects.”

According to Melcher, the changes have resulted in eight undergraduate classes that the college must either staff or cancel.

“This shift is a burden to students since the availability of classes may be reduced,” Melcher said.

Important Information About Refunds

Beginning with Fall Semester 1995, the proceeds from Federal Direct Student Loans, as well as, grants, scholarships and tuition waivers will be disbursed through credits to students’ University Billing/Receivable accounts. An improved refund procedure will be implemented beginning August 14. The refund processing will begin for ANY student when a credit balance appears on his/her account. Refunds will be processed more rapidly than currently being done and will be mailed to the student’s LOCAL ADDRESS (permanent, if local is missing) as recorded on the SIUC Student Information System. Be sure to update your LOCAL Address (if not currently correct) by completing the form below and mailing it to the Financial Aid Office, Woody Hall, Mailcode 4702, SIUC, Carbondale, IL 62901.

**LOCAL ADDRESS:** The Local Address is your primary residence while classes are in session. It is used by the University to direct correspondence during the semester. Refunds are mailed to this address.

Human egg donations new way to aid infertile women

Los Angeles Times

It wasn’t exactly the part-time job Rebecca Weis was looking for last year while scanning the jobs bulletin board at Sacramento City College.

“Ovum Donors Needed,” read the notice from Pacific Fertility Center in San Francisco.

“I am applying to medical school, so I’m interested in all this stuff,” says Weis, now 23, married and pregnant. “And I thought it would be nice to help somebody else out.”

Weis is an egg donor, a woman who donates some of her own eggs for infertile couples who are unable to conceive naturally.

But she also represents what perhaps second only to surrogacy in its potential to stir controversy in assisted reproductive medicine: the market for donor eggs.

The demand for donor eggs is so great the shortage is, but there aren’t as many donors as (doctors) who would like to have,” says Dr. Geoffrey Sher of the Pacific Fertility Center.

Sher and others, such as Dr. John Robinson of the American Society for Reproductive Medicine (ASRM), a professional organization that has issued voluntary guidelines for egg donation, say the practice is acceptable.

Still, he says, “Our field is without accountability. There are no checks and balances that are enforced. Yet, there is no field in medicine that is more emotionally charged and subject to more fallout than human reproduction.”

In a recent survey of 700 medical professionals, 80 percent said they would not donate eggs, even if they were offered $2,500.

“Controversies also have raged during the past year on how much to pay egg donors (2,500 is standard) and whether they should remain anonymous to the recipient or reveal their identities,” said Sher.

The demand for donor eggs is “considerable,” according to the national population estimate of childlessness, or the percentage of women who are unable to become pregnant on their own.

More women in their 40s and broken windshield of an SUV van at 10:30 a.m. June 18. Police said the estimated damage is $100 and the incident is still under investigation.

Human egg donations new way to aid infertile women

University Police

Fredric M. Qualls, 43, of Carbondale, was arrested and charged with unlawful possession of a weapon by a felon July 24. SIUC police said they responded to a report of a suspicious person in a Southern Hills parking lot, and a subsequent investigation of the suspect’s vehicle revealed a steel pipe in the driver’s seat. Qualls was taken to Jackson County jail and was still in custody Tuesday.

A 13-year-old juvenile told police that he found a stolen bike at 7:13 p.m. July 24. The juvenile said he located the bike on the south side of the Student Recreation Center. Police said ownership of the bike could not be confirmed and it was transported to SIUC Police until the owner could be identified.

An employee of SIUC Touch of Nature told police a participant in the Spectrum program became angry, denied the rear door and broke a windshield of a SIUC van at 10:30 a.m. June 18. Police said the estimated damage is $100 and the incident is still under investigation.

ABC, NBC split playoffs

Daly continued from page 12

Daly and Costantino Rocca—helped lift ABC’s final-round British Open margins 24 hours higher than the Sunday
overnight ratings last year.

As Daly was alternately
calmed and stymied into the
fourth hole, NESN relied on the
gritty British Broadcasting Corp.
feed. The leader ship was exchanged, Andy North
also managed to tap the shots, but viewers weren’t
cheated. Among the top
timelines—Jack Nicklaus’
animated commentary on Daly, who plays with his
uncle, and Abdonando Nicklaus’
diary, Nicklaus who
highlighted the term “course manage-
ment” to new heights. Started
scolding as Daly went to No.
16 with three-looked. A flustered Nicklaus repeatedly
questioned Daly’s strategy, arguing that if
Daly just played par on the
last three holes, he would win
because the challengers would
fall back. He shouted at Daly
to “put the driver away” on Nos.
16 and 17 and later criticized him
for playing a wedge.—The historic
vignettes, especially those of
Robin James and narrated by Jack
Whaitaker, subbing for Jim
McKay—one of the un-
affected and unadulterated
on the face of Daly and his wife as Rocca
said this was the first time he had
seen the shot, but viewers weren’t
“drawn” as the series
was drawing to a close. On Saturday,
how about the pictures of Michael Campbell’s
shot caroming off the bunker
wall to the pin? Reminded me of
how I almost did a sand wedge.

The Tour is meaning about
understanding and money again,
so a receives grateful player
was still out of the forest.

After walking away from
Daly’s strategy, arguing that if
Daly just played par on the
last three holes, he would win
because the challengers would
fall back. He shouted at Daly
to “put the driver away” on Nos.
16 and 17 and later criticized him

Daly continued from page 12

fou" constituted, but he didn’t have
to. Sober, he says, for almost three
years, Daly is not at all reluctant to
922-9393 and the man
who carried Curtis Strange’s bag for
both his U.S. Open titles.

And for most of the past two
years, he’s also been with Pauline,
his third wife. She is a former
model he met at the Bob Hope
Classic and married in January in
Las Vegas. The couple recently
had their first child, and in
March he made a point in his victory
speech to thank his wife for all of
this tremendous.

"It’s not me, he destroys all the
critics," said Daly Sunday night.
"I just try to be there for everybody
can for him. He’s worked so hard
on his game, on not giving up, the
patience, everything, and he is the
perfect, perfect, perfect. Also, he
drinks a gal-
lon of Diet Coke and as much
chocolate as he can stomach, but
we’re working on that.

"If I ever get an urge (to drink),
it doesn’t matter if I’m down or up,
I always want it," Daly said Monday.
But I have people who help me. 
Golf makes me want to drink more
because it’s so stressful.

Spo00tS

Coaches continued from page 12

have a coach.

"We’ve just clicked," Walker said.
"The coach and the swimmer have
to think as one, as the swimmer has
to believe the coach is behind him,
and sometimes it takes years to
come down to whover works
the hardest between now and then.

Come said the road for McGee
would be rough as he feels the

MVC could be the toughest high
jumping conference in the country.
In order to improve enough to
get to the Olympic trials, McGee said
have to improve on certain aspects
of his jumping style.

"Through video tapes and
listening to the coaches I’m in the best
position to work on my approach because
I allow me to fine-tune my leg," he said.
Besides the coaches, McGee said
his parents and associates are active in
giving advice to each other.

"Actually, we help each other
on the level," McGee said. "We all have
two coaches and there are so many dif-
ficult things that they have to work
with."

McGee teamed with one of his
fellow jumpers, All-American
Cameron Wright at Marion High School.
This versatile athlete played basketball
and was quarterback on the
football team, besides compet-
ing for the track team.

In Marion, McGee said he
was practically produced into running
athletics because of his other
sports interests.

"Basically, in junior high if you
played basketball you had to run
track because the coach was the same
for both sports," he said.

Hoops continued from page 12

Division II Florida Atlantic will be
heading into town on Dec. 9 to make
their first ever appearance against
the University of South Florida.

On Dec. 28 the Sakura
squad will be in Hawaii to battle in the
Hawaiian Bowl tournament. Team
Oklahoma besides Hawaii-Hilo have
can removed confirmed yet, according to
Huff.

**Dawgs face tough start**

By Jason E. Coyne

Daisy Egyptian Reporter

One of the four returning starters, senior forward Scott Buzynski, is hopeful the young Saluki basketball team will gel quickly so the team does not lose the fan support it has relied on in the past.

"By losing Carr, Timmons, and Lusk, we're going to need people to step up and I hopefully will be one of them," Buzynski said. "We're going to need people to step up in the clutch."

The three-year Saluki basketball player said this year's wins are going to be a team effort.

"It's going to be a collection this year," he said. "One night it'll be one guy and the next night another guy is going to have to step up."

**High jumper hopes for more spring after leg injury**

By Eric Helbig

Daisy Egyptian Reporter

While Saluki head track coach Bill Cornell said McGee showed promise early in the season but McGee could not quite get it put together.

"I thought for sure he would make seven feet last year," Cornell said. "He had a bit of a nagging injury, but I'm not sure he'll do quite well." McGee said he hopes to improve greatly on his performance from last year, hopefully becoming more competitive in the conference.

**High jumper hopes for more spring after leg injury**

By Cynthia Sheets

DE Sports Editor

SIU coaches Rick Walker and Dave Arday are getting a chance to coach more than just their respective Saluki athletes, as both are scheduled to coach exclusive swimming and diving meets this summer. For the second consecutive year, Walker, the SIU men's swimming coach, has been invited to coach at the prestigious Pan Pacific Games.

These games are known to swimmers as the third most important event, ranked just behind the Olympics and World Championships.

Walker qualified for the competition by training Chuck Wiley, who will be the 25,000 meter national champion. Wiley will be up against athletes from nations that border the Pacific Ocean, the prerequisite for the competition.

The three-year Saluki head coach said he met Wiley about eight years ago, when the swimmer did not know him or his reputation, but was the only thing Daly members about that summer evening was packing and I just didn't have that," he said. "I could walk on it but I couldn't promise early in the season but McGee could not quite get it put together.

"I thought for sure he would make seven feet last year," Cornell said. "He had a bit of a nagging injury, but I'm not sure he'll do quite well." McGee said he hopes to improve greatly on his performance from last year, hopefully becoming more competitive in the conference.

**Daly relaxed, sober key to Open victory**

The Washington Post

ST. ANDREWS, Scotland—On the far end of the table were two unopened bottles of Highland Spring water, one sparkling, one without the fizzy. They were there just in case John Daly, sitting a long reach away, wanted to quench his thirst Monday during the British Open champion's traditional Monday morning news conference at the Old Course Hotel.

Daly isn't drinking much of anything these days aside from Diet Coke by the case, which he uses to wash down the MM's or anything else with the sweet chocolate taste he now craves as much as he did beer and boozes before he checked into alcohol rehabilitation almost three years ago. Sunday night he said he celebrated winning the 124th Open championship with "two strip Mcakes and a huge bowl of chocolate ice cream" after "devouring Italian Costantini Rocca in a four-hole playoff out the winfy Old Course at St. Andrews."

The night after was far different at his first major victory, that stunning triumph as an unknown ninth alternate in the field at the 1991 PGA Championship at Crooked Stick near Indianapolis. About the only thing Daly remembers about that summer evening was packing a half-dozen people into a newly hired chauffeur-driven limousine and ordering "drive-through from the fried at McDonald's" for everyone, then washing it down later "with a few beers."

He never said how many "a
