**SIU Lumberjacks Trim Woods**

By Wade Roop

While students meandered through Thompson Point Woods, two men perched high above the ground humbly trimmed limbs from the big trees shading the winding paths. Removal of dead limbs and mending damaged trees is their job as members of the Dynamic Party.

Bill Hollenbeck, head of the Physical Plant crew, shuffled around in the leaf-covered woods strapping on his equipment as apprehensive squirrels looked on from their high perch where he was soon to climb.

"We generally climb around 60 to 70 feet from the ground," Hollenbeck said as he made a "bullet" out of one end of his rope. "The bullet is used to throw the rope over the first limb," he said. "This is a "bo'sun's seat," he said describing his belt with two large metal rings in the front. "It is much like the one sailors use except theirs is made of wood and this one leather and dacron," he said as he slapped the rope through one of the metal rings.

While Hollenbeck prepared to climb, a few small limbs crashed onto the bed of leaves nearby. Looking up through the maze of branches pierced by the bright afternoon sun, the passerby could see Walter Kelley high up in a tree trimming small branches.

About all of Kelley that could be seen was his red flannel shirt and his arms rhythmically moving with the sound of his saw.

(Continued on Page 6)

### Audio-Visual Meeting Starts Thursday

**Leonard Denies Dynamic Linkup**

Two weeks ago, the Dynamic Party endorsed Robert Leonard of Warren Hall on Thompson Point as a senator from there, according to a member of Leonard's campaign committee.

Since then there has been a minority faction of non-dorm affiliation with the party. 

Hollenbeck said he was a member of the Dynamic Party or any party but is running as an independent candidate. The Dynamic Party merely endorsed him as a candidate for the office he is seeking, Leonard's manager said.

At the convention of the Dynamic Party, held Tuesday, the members, by way of acclamation, decided to put Leonard on their slate.

**Dynamics Choose Carol Harper as Senator Candidate**

The Dynamic Party has named Carol Harper as candidate for west side non-dorm senatorship in the 22 Campus Senate election.

Miss Harper is a junior majoring in special education from Carbondale.

The Dynamic Party Representative Committee has singled out several senatorial races as particularly important. Top priority was given to the west side non-dorm race.

Bob Carter, Dynamic Party president, said special significance is also being placed on the west side dorm race where Mike Norton will be seeking re-election to the Senate.

The party will distribute pamphlets containing the party platform in Room H of the University Center from 11 a.m. to 5 p.m. today through Monday.

Elections for the Student Senate will be held Nov. 22.

**New Lutheran Center Chapel Plans Opening Service Sunday**

Services will be held for the first time at 10:45 a.m., Sunday in the chapel in the new Lutheran Center at 700 N. University Ave.

The opening service has been postponed several times because of revised construction schedules and delays in the arrival of furnishings.

Dedication of the student center and chapel is planned for Jan. 15.

The chapel choir, under the direction of Robert W. Kingsbury, will perform.

The chapel organist is Martin Webb.

**Leading Brewer’s Boycotts May Affect Grocery Bills Only Briefly**

By Mike Nauer

The efforts of HELP (Housewives’ Effort for Lower Prices) to drive down food prices through boycotts and pressure may have only a temporary effect on prices, according to Robert G. Layer, professor of economics at SIU.

Layer said forces at work in the economy are contributing to the rising prices, and the supermarkets do not have that much control over them. Layer said it is possible that the elimination of the games and giveaways would cause a lowering of prices, but these practices are already budgeted as a part of advertising. The discontinuance of trading stamps and promotions would affect the consumer only if the costs were not kept on the advertising budget.

Another fact HELP should consider is, "If they really have the support of the wives they are trying to help, maybe housewives don’t want the promotions discontinued," Layer said.

As of last week, HELP had collected about 2500 signatures of interested parties in Carbondale.

The housewives have also suggested boycotting only one or two stores indefinitely to possibly cause them to break ranks and lower their prices. It had been theorized this would cause the remaining stores to lower theirs to stay competitive.

Layer didn’t think this tactic would have any lasting effect and that market chains would be able to carry the local store until the crisis blew over.

Another fact Layer brought up was that while food prices are high, so are wages and the standard of living. "People are comfortable today, and thus more complacent. It would be hard to get them mobilized into a sustained and concerted effort," he said. Layer didn’t understand what effect the one-day boycott held Nov. 5 could have had. He said although it might have reduced the supermarkets’ gross receipts for that Saturday, it had no effect on the weekly or monthly sales.

The housewives said the purpose of the Nov. 5 boycott was to demonstrate the pressure their efforts could place on the chain stores.

It was reported that the sales at Kelley’s Big Star Market, one of the four stores picketed, were not affected that day by the boycott. One of the cashiers stated Kelley’s was very busy that Saturday.

Layer said it was to be effective at all, it must recruit the support of the entire community. "This is the only way they will get the attention of the market chains and management and owners." Layer said it is important that the consumer becomes involved in issues like this, "If the (consumer) is apathetic, it is unlikely that retailers will make any effort to lower prices or meet their requests."

If consumers were willing to forego some of the conveniences..." (Continued on Page 6)
October Temperatures, Rainfall
Low But No Records Established

If you think October was a little on the cool side, you’re right—according to the SIU Climatology Laboratory. During the month, 21 days had below-normal temperatures. The other 10 days were above normal with one departure 8.5 degrees on the plus side.

Live Band to Play
For 1st ‘Cafe Night’

Cafe Night at SIU will feature night club atmosphere, a live band and the motif of a bloomin’ English pub.

The event, sponsored by the Activities Planning Board, will begin at 8:30 p.m. Friday in the study lounge on the second floor of the University Center.

The event, along with the night club atmosphere, attendance will be limited to 50 couples. Reservations may be made in the Student Activities Center through Friday.

The Capri Combo will provide live music and will present two shows during the evening. Admission to Cafe Night is free.

Daily Egyptian

CONVERSATION PIECE—There are fences and there are fences. This happens to be an architectural screen designed by John F.H. Loerner, landscape architect, and welded at the Physical Plant. Different? Yes. Unusual? Quite. Termite-proof? Definitely.

American Marketing Association Meeting
TODAY
7:30 p.m. Library Auditorium

Featured Speaker
V. DALE COZAD

Agency Manager and Speke
Director of College Life
Department of America.
1946 graduate of SIU

Topic: "Sales Management"

All interested students and faculty members invited

AMA YEARBOOK PICTURES WILL BE TAKEN TODAY

Class on Poverty
To Begin at Noon

The Free School class on poverty will begin at noon today at the Student Christian Foundation, according to Charles D. Bauman, who is organizing the class.

The course is entitled “The Other America.” This is also the title of the book to be used in the course, Bauman said.

Plans for a trip to community organizations working in poor neighborhoods in Chicago will be made.

All students interested in the course are invited to attend.

what is good?

We search constantly for something good... good things, good ideas, good people, and good times. But we’re seldom satisfied until we begin to understand the only real basis for man’s fulfillment. Jesus described it when He said, "There is none good but one, that is, God" (Matt. 19:17). Hear a one-hour public lecture called "What is the Good That Satisfies?"

by EDWARD C. WILLIAMS, C.S.B., member of The Christian Science Board of Lectureship.

Christian Science Lecture
Sunday, Nov. 20, 4 p.m.
Devis Auditorium, Main Bldg.

Audience of First Church of Christ, Scientist, Carbondale

Admission Free — Everyone is welcome

Activities
Reservists, Engineers To Meet
The American Marketing Association will meet at 7:30 p.m. today in Morris Library Auditorium and Lounge.

A Music Department Orchestera Concert will be given at 8 p.m. in Shryock Auditorium.

Women's Recreation Association Horseback Riding will be practiced at 4 p.m. on the Wall Park field.

WRA Gymnastics Club will meet at 4 p.m. in Room 207 of the Women's Gym.

The Campus Senate will meet at 7:45 p.m. in Ballroom A of the University Center.

Little Egypt Student Grotto will meet at 9 p.m. in Room 216 of the Agriculture Building.

Inter-Varsity Christian Fellowship will meet at noon in Room E of the University Center.

The Activities Programming Board will meet at 8 p.m. in Room 148 of the University Center.

Rehabilitation 485 will meet at 11 a.m. in Shryock Auditorium in the Agriculture Building.

A United States Army Reserves meeting will be held at 7 p.m. in Room 148 of the Agriculture Building.

SIU Young Democrats will meet at 7:30 p.m. in the Family Living Lounge of the Home Economics Building.

The Arab Students meet at 5 p.m. in Rooms 201 and 202 in the Home Economics Building.

Intramural basketball practice will be held at 8 p.m. in the SIU Arena.

Industrial Education will meet at 9 p.m. in Room 116 of the Agriculture Building.

The Student Affairs Division staff will meet at 8:30 a.m. in Room E of the University Center.

The Engineering Club will meet at 9 p.m. in Room 214 of the Agriculture Building.

The Obelisk picture will be taken prior to the business meeting.

The New Darwinian Evolutionary Testing System

The appendix in the foundation for more nearly universal measurement system. The A.Q. (Appendix Quotient) would replace the IQ. The A.Q. eliminates the language barrier; it can be computed even with little knowledge of another language. The examiner cannot be photographed, the IQ cannot, thereby eliminating many of the tricks and deceptions, which have been used to advantage by impostors.

I assume that the appendix is evolving away now, that we shall see those legs. The longer an appendix, the less a person has evolved on the evolutionary scale. The shorter the appendix, the more he has evolved. He might be in the appendix elite, or even the rapid appendix class, or a slow appendix, which is a high scale A.Q., and a long appendix a low A.Q. There is a grade scale.

The A.Q. would be obtained by an examination xy-ray. That would bring to the services of medical doctors, who certainly would give a more decisive and respectable to testing.

Anthropologists would compare cross culture appendix lengths. A book entitled, With a Short Appendix In New Guinea, would be written, understanding the short appendix child in America. It would show potential, at least, even though the child might not perform to capacity, or as expected short appendix children.

Statisticians would classify appendix by a normal curve, because of the variability of xy-rays in obtaining the A.Q. over language methods in obtaining the IQ, the variances and standard deviations used in obtaining the A.Q. would be based on the exact figure and the probability of getting an exact A.Q. would be 100% rather than 0.

I consider the A.Q. the final test of which predominates, long or short appendices, and could warn boys with a short appendix (high A.Q.) what to expect in their education and what to marry a long A.Q.

The child's certificate would have a footprint and an approval, as to how, showing its length. This would prevent people whose child had a long appendix from pushing him to excel, also it can be used in an effort of shortening short appendix x-rays to send to college admission offices. The death and loss of birth certificate, three xeroxed copies of the x-rays would be required for college entrance. It would dub the authenticity could reserve the right to operate. Stories would be told between a short appendix and bald men, and it would reveal a high positive correlation. Bald men would retain their rightful habits, to some extent.

If you feel that there is something of this rather academic data on N.T.L, contact the S.U.L, coordinator (Larry McDonald) at 453-805, in Chicago. He is a most useful character and the writer would enjoy talking to all 18,000 of you about the matter, and the writer is an artist. If you believe Picture if you will veterans of the Deuce (National Security Act), young novices of the current Student Rights Act, and the University and an asserted Vice President standing on the side of the University and Your President stood for 5:30 on a Friday morning waiting to board a bus and be whisked away to the great unknown of an N.T.L. session. The writer predicts at least a few a few of us, suffering from delusions of elitism and the modem disease of shouting into automobiles during a test (preferably for the same destination).

Nonetheless, High Road or Low Road this year, we all eventually arrived at the same destination. Marquette State Park and promising to meet for our annual interaction.

Finally, this "project" was to group ourselves into three more than less homogenized clusters. The "whole" campus leader" found himself in the "whole" group, and the "common" group would include all the others in utter disgust over the obsolescence of sixty year old policies and the low cost of something called a sensitivity lab.

Now, before your eyes go darting off to more trivial concerns (from others and others) in utter disgust over the obsolescence of sixty year old policies and the low cost of something called a sensitivity lab. The "whole" campus leader" found himself in the "whole" group, and the "common" group would include all the others.

Just what the notion of these large clusters of people are competing: to communicate in an effective way. The writer feels that a degree of sensitivity for the difficulty of adjusting new roles on campus to one self-image and even more important, the to the other one's cuteness, is the problem of the "common" group.

In short, a short appendix is expected of short appendix x-rays would be required for college entrance. It would dub the authenticity could reserve the right to operate. Stories would be told between a short appendix and bald men, and it would reveal a high positive correlation. Bald men would retain their rightful habits, to some extent.

Dear Japanese Fly People:

(Those individuals who have not read the novel Candy need not bother with the following piece of semi-fiction.)

Recently, while drinking a cup of something hot and leafing through a most popular paperback, I found my eye resting on a phrase that held my attention for a while. It was: "We Shall Not Perish For Alcides Menalius.

What?"

"CAN'T STUDY IN HERE!" YOU CAN'T STUDY IN HERE! (Loud.) Upon looking up, I found myself staring at the very obviously aroused waitress brandishing a brown-striped cardboard sign that read: "What?"

"CAN'T STUDY IN HERE! YOU CAN'T STUDY IN HERE!" (Louder.)

I'm just attempting to finish this novel called Candy. You see, the great temple has just been struck. The Buddha's nose has slipped forward and..."

"I'LL TELL YOU WHY I'M HERE! (Very loud.) Look, what difference does it make how long your customers spend their time in here?... The Buddha's nose was slipping into Candy's marvelous..."

"IT ISN'T 'SMUT!'. Besides, this place has half the customers of your coffeehouse, and you are not depriving anyone of a place to eat! Your customers support you and make doughnuts..."

"MY BOSS SAYS NO READING OR DRINKING IN HERE! (Very loud.)"

"Look, what difference does it make how long your customers spend their time in here? I'm having with this granddaughter of mine who believes with all her heart and soul that there is a rational limit to such things, and I can well understand a cafe owner being somewhat anxious in someone buying a solitary cup of java and making room for someone to sit down in a comfortable booth and read the entire content of The Haiku and Fall of the Thirty Reich or all 900-plus pages of Thomas Wolfe's Of Time and the River, but evicting someone for reading the last five pages of Red Fool? Candy Good, Daddy—There oughta be a law!"

Dear Japanese Fly People:"

Dear Japanese Fly People:"

What he had done, if necessity be to do it that end: though soft-considered men can be content to say it was for his university, he did it to please his mother, and to be partly proud, which is, even to the altitude of his virtue.

Regional News

Marisza, III. (KA)—Ricky Ticky, SIU Vice-President in charge of Everyone’s Affairs announced one hour finals for two hours that will last to cover three hours during the five day examination week. He stated that a private poll which the students did agree with the decision.

Ticky also announced the use of “blue books” with red paper and white lines. The book color, it felt, will keep the "student mentally aroused and allow him to keep his thoughts together." All this has been presented by the administrative policy to help the students so that he won’t have to help himself.
How does one classify an organism that eats solid food, reproduces like a fungus? Is it plant or animal? The Myxomycetes, a group of slime molds, answers the question. Slippery, amorphous, and highly mobile, the Myxomycetes, Arab Gray, a specialist in the study of fungi, is completing a book on the organisms for publication next year. The book, which was written in collaboration with another specialist on fungi, calls the organisms "protozoa" because it does not place them in either the plant or animal kingdom. Indeed, they are the only group of living organisms that scientists cannot classify as either plants or animals.

The Myxomycetes are commonly called "slime molds" and are found in temperate climates including southern Illinois. The slime molds are usually seen as small, snail-like, amoeba-like creatures that can digest solid food. They do this by surrounding an object with their body and then breaking down the food chemically. The food becomes immobile, and the molds feed by sapping nutrients from decaying, organic matter found in tree stumps and dead leaves. This resemblance to fungi has caused many people to regard them as plants, but the easiest test is to wait until they reproduce. Slime molds never resemble their parents.

The group discussed Friday prayer and a tentative celebration program for Eid-ul-Fitr. "What is the Good that Satisfies?" will be the title of the lecture scheduled Saturday, April 13, in the Davis Auditorium of the First Church of Christ Scientist, in Boston, Mass. Edward C. Williams, C. S. B., a Christian Science teacher and practitioner of Indianapolis, Ind., will speak under sponsorship of First Church of Christ, Scientist. The lecture will begin at 4 p.m., in the Davis Auditorium of the Wham Education Building.

Williams has devoted his full time to the public practice of Christian Science healing since 1942, when he gave up a career in public relations with a large public utilities firm. During World War II he was a member of the Christian Science Ministry for the Armed Services. He is currently on tour as a member of the Board of Lectureship of The First Church of Christ, Scientist, in Boston, Mass.
In order to cover the costs of programming, coding, card punching, computer time, clerical help, advertising, printing, postage, and paper, we are forced to charge a small participation fee of three dollars. When you receive the results from our program, we are certain that you will consider this small expenditure to have been worthwhile. The deadline for sending in your completed questionnaire is FRIDAY, NOV. 18. Mail early and we will be able to get all results back within 10 days. The effectiveness of this program and your satisfaction with the results depends upon you answering the questions honestly and critically. Enter the number of only one answer in each box, even though more than one answer might apply.
Viet Nam, China

Soviet Conference Runs Into Trouble

SOFJA, Bulgaria (AP) — Disagreement developed Tuesday in Communist ranks over two issues, Viet Nam and how to deal with Red China’s nonconformist ways.

On Viet Nam, a difference emerged between Soviet bloc ideas that are taking a quiet line in hopes of getting peace talks started and those reiterating the unfailing demands North Viet Nam.

U.S. Secretary of State Henry Kissinger has been exactly that kind of man. The American administration has been demanding that Viet Nam withdraw from Cambodia.

Hanoi has repeated several times since the Soviet line softened.

Disagreement on China, which Beijing has denounced for obstructing Soviet bloc aid to Hanoi, also emerged from Ceausescu’s speech.

The basic theme was that the Viet Cong and the Viet Minh are defeating the American and the Chinese “with conventional weapons and there is reason why they should resort to the use of gas.”

“By inventing such a story,” the statement said, “they—the Americans—Otto. the Chinese who threaten to wash their own crimes and find a pretext to widen their use of toxic chemicals and poison gas in South Viet Nam.”

The statement offered no explanation of how 1,200 tear gas grenades of Chinese manufacture happened to be in a stack of Viet Cong arms and ammunition seized by 1st Division troops.

American offers said grenades of this type, fitted with wooden handles, were hurled by the Viet Cong against the American troops apparently as a delaying action. The patrol damaged masks and suffered no casualties.

Whisky A-Go-Go

In South Viet Nam

COLOMBO, Ceylon (AP) — Americans in war-torn South Viet Nam are drinking more whisky than water, J.A. Wolfe Murray, representative of the Scottish whiskey-manufacturing firm, James Buchanan and Co., said Tuesday.

Murray, on a sales promotion tour, told newsmen Viet Nam today is the “biggest market for whisky in the East.”

This followed the recent quiet line that, according to Communist sources, indicates a desire to move Hanoi toward peace talks.

The position in Moscow and some East European capitals has been that bombing of North Viet Nam will only bring about the desired response from Hanoi.

Speaking before Braban’s Secretary-General Nicolae Ceausescu of Romania’s Communist party hit the hard line.

He demanded not only a halt to U.S. raids but also “an end to the aggression in Viet Nam” and an American withdrawal from Viet Nam.

This is the position that Hanoi has repeated several times since the Soviet line softened.

Viet Cong Deny Gas Use

OKYO (AP) — The Viet Cong said Wednesday they have no evidence of the use of tear gas against Americans in Viet Nam.

U.S. Army spokesman’s announcement that the guerrilla-held gunboats and armed forces were using tear gas in Viet Nam may only briefly, accusing the United States of aggression, promising Soviet aid.

“Beer Fabrication”

Viet Cong Deny Gas Use

SAIGON, South Viet Nam (AP) — The loss of five U.S. helicopters to enemy gunners was announced Tuesday by the American command. Contact between U.S. and Communist troops was reported only light and scattered.

The Fourth straight day of bad weather limited air missions Monday against North Viet Nam to 58, about one-third the usual number. Eight bridges, eight barges and seven trucks were among objectives officially described as destroyed or damaged. A Hanoi broadcast, unconfirmed here, said one jet was shot down.

American and South Vietnamese planes flew 832 sorties—single combat flights—against enemy targets in the South.

Three of the five downed helicopters were lost in Tay Ninh Province near War Zone C, 60 miles northwest of Sai gon, where the largest U.S. force of the war has been committed to rooting out the hard-core Viet Cong 9th Division.

The U.S. Command said fuselages of the three UHIL helicopters were recovered, but there was no information concerning their mission or casualties.

The two other helicopters were lost to ground fire Monday near Da Nang.

“HAY HAVE ONLY 45 MINUTES FOR YOU, DOCTOR!”

Fakr and mild today with the high in the 90’s. The record high for this date is 86 degrees set in 1931. The record low is 14 degrees set in 1940 according to the SBU Climatology Laboratory.
Next Project... Man on the Moon

CAPE KENNEDY, Fla. (AP) — Suddenly, Project Gemini is history. Now the United States turns full attention to the greatest space adventure of all—the Apollo man-to-the-moon program.

In January or February, if present mechanical problems are solved, the first three-man Apollo crew is to rocket into orbit, starting a long series of flights aimed at a manned lunar landing in 1968 or 1969.

Gemini was a major step toward the moon, spanning the gap between the pioneering Mercury program and Apollo. In 20 months it sent 20 men into space, qualifying them for Apollo trips and teaching them the techniques required for lunar voyages. However, Apollo has its troubles.

Two months ago, National Aeronautics and Space Administration officials spoke optimistically of conducting the first manned Apollo earth orbit flight this month. It slipped to December and now is scheduled for Jan. 17. But many officials expect a further delay until February. The problems lie in the spacecraft, a roomy vehicle that will accommodate three men and even provide them with beds.

En route to the moon, the Apollo will weigh 94,000 pounds, compared with the 8,000-pound Gemini.

A water boiler, designed for cooling cabin during peak heat loads, encountered difficulty with metal plates clogging. The light plates are being replaced by ones made of stainless steel.

Fuel tanks for the maneuvering engine are being replaced because the original ones became contaminated by methyl alcohol during a test.

These troubles, plus a major one with the Saturn 5 man-to-the-moon rocket, have dimmed the possibility of a 1968 lunar landing. But some NASA officials believe it can be done then, nearly two years earlier than the 1970 goal set by the late President John F. Kennedy.

Coroner's Jury

Smith Named Killer

MESQUITE, Ariz. (AP) — While his father sat silently without show of emotion, Robert Benjamin Smith was named a coroners jury Tuesday as the killer of four women and an infant girl.

Retired Air Force Maj. Robert L. Smith talked with his son's lawyer while the six-man jury deliberated less than 10 minutes before returning its unanimous verdict in all five deaths.

After the verdicts were read, the elder Smith then walked quickly from the courtroom without talking to reporters.

Ron Wood, Smith's attorney, issued a statement earlier expressing the parents' grief over "the terrible tragedy wrought upon mankind by their disturbed boy."

"They extended their heartfelt sympathy to relatives and friends of the victims," Wood said.

The accused youth, an 18-year-old accelerated student at Mesquite High School, stayed in his cell in the Maricopa County jail in nearby Phoenix while the coroner's jury viewed the five bodies and heard evidence in the Saturday slayings, Wood said psychiatric treatment of the boy was under way.

Young Smith was found inside the Rose-Mary College minutes after three student hairdressers, a 27-year-old woman patron and her 3-year-old daughter had been shot to death as they lay in a circle.

Electronics Bring New Sound to Music

In SIU's Fledgling $20,000 Studio

By Mary Jane Coffel

In the 20th century—the age of technology, machines and scientific achievement—even music hasn't escaped the help of a machine.

The Department of Music at SIU is keeping up with the times. If new sounds are to be created in music, it's going to have to be done electronically.

Will Gay Bottje, director of SIU's electronic music laboratory, and Gordon Chadwick, assistant director, have developed a basic electronic music studio at 800 S. Illinois. "Basically, the whole idea of electronic music enables the composer to experiment in new sound areas which have been impossible to produce up to his time because of the limitations of musical instruments. But now are available through electronic means," Chadwick said.

Electronic music had its beginnings in the early 1950s. SIU's electronic music laboratory was developed in 1964 with Bottje as its coordinator, and Chadwick, a basic sound source in electronic music, and one of electronic tape recorders are the two primary pieces of equipment in recording electronic music, according to Chadwick.

SIU has one very expensive magnetic tape recorder with four simultaneous tracks; it cost about $4,000. The other tape recorders which are in use are professional ones which range in price from $600 to $1,500.

Control equipment is also very important in electronic music and SIU has invested $4,000 in it.

According to Chadwick, SIU has invested $20,000 in this studio with part of the money coming from personal contributions, part from the Department of Music and part from the Research and Projects Office.

The successful preparation of an electronic music score requires a good deal of mathematical and scientific knowledge on the part of the composer.

"At SIU, we do not make scores. We work with sounds and put them together on tapes. Some composers do write scores," said Chadwick.

The first real recital of electronic music was given in Cologne, Germany, in 1954. SIU gave its first electronic recital in 1965.

There are three basic steps to the process of electronic music which a composer might go through," said Chadwick.

First, a composer must determine his sound source which can be concrete or purely electronic.

The manipulation of sounds is the second basic step. This consists of rhythm, time control, filtering, regeneration, and the mixing of different sounds.

Finally comes the recording of all the sounds and the organization into a unified whole.

"We have developed at SIU a very crude, basic and primitive setup into a sophisticated outfit," Chadwick said.

The University of Illinois, Champaign, also has an electronic music studio with Hiller LeJare director. "I think that there's a lack of awareness of what's going on in the field of electronic music. This type of ignorance, if propagated, is an attitude of nonacceptance. If more people knew about it, they would undoubtedly see that it's not so different from the other popular forms of music," said Chadwick.

"People don't believe that this is an area where there will be any development. To the contrary, people are going to have to accept the fact that electronic music is the only way that we can manipulate new sounds."

Coffee Hour Planned

Coffee Hour Set Thursday
To Honor French Troupe

A coffee hour honoring the Paris Rive Gauche is planned from 11 a.m. to noon Thursday in the River Rooms of the University Center following the Convocation program. The Paris Rive Gauche, a French cabaret troupe, will perform at 10 a.m. and 1 p.m. in Shryock Auditorium.

This group is an authentic French "Cabaret Litteraire" production of songs, ballads, satire and poetry set to music featuring Jacqueline Danno, Bernard Haller, Chantal Laurentie, Jacques Marchais and Paul Villas.

Miss Danno, a woman with many sides, won the Rose D'Or at Antibes with the song, "Non — C'est Rien." She has also appeared on Bell Telephone Hour.

Haller, who has performed in Europe and the Middle East, draws personal sketches through panomime, nonsensical noises and words which present themes that criticize modern living.

Miss Laurentie, who was born in Damascus, Syria, studied art and drama before her vocal teacher recognized her comedy-singing talent.

Marchais, who just cut his first record which won the "Grand Prix International Charles Cros," studied at Raymond Girard's Drama School in Paris. Villas, who joined the cabaret of the Left Bank in 1957, writes and composes all of his own material.

No conversations will be held next week because of the Thanksgiving vacation.

Speech Students to Participate
In Bradley University Parley

Bradley University in Peoria, Ill., will play host this weekend to a number of schools participating in various speech activities.

Southern will be represented by 22 students who will leave Carbondale Thursday. Events will include debate, discussion, oratory, extemporaneous, radio, oral interpretation, listening and after-dinner speaking.

Last weekend, 14 SIU debaters participated at three different tournaments in the Midwest.

At the University of Illinois invitational debate tournament, two teams of debaters finished second and third in a 23 team meet.

Joe Kelly and Win Holden, from Southern, finished undefeated with four victories.

Beverly Church and Gene Clark, lost one match and won three to finish second in the tournament.

The team of Dan Girtman and Grin Bem won two and lost two matches and Dave Bonomo and Rob Swedo won one and lost three.

The four-man team of Ray Lenza, Bill Fogel, Robert Harrison and Terry Peters scored the highest number of points among 26 schools to lead all teams in the speaker ratings at the University of Missouri's invitational debate tournament held Friday and Saturday.

At Purdue University, Kathy O'Connell and Ron Hribenar finished with a 3-3 record among 60 schools in the varsity invitational tournament. Hribenar was given individual recognition for his seventh-place finish in the individual speaking competition.

Dancers Aided by Arts Grant

The Illinois Arts Council has consented to provide financial help in bringing the Martha Graham Troupe to SIU, according to Paul Hibbe, coordinator of special events on campus.

Leonard Pas, executive director of the council, has appropriated $2,500 to the University to help defray the cost of sponsoring the dance company's performance in Carbondale.

The performance will be the third presentation in this year's Celebrity Series.

The show will be at 8 p.m. Saturday in Shryock Auditorium. Tickets can be purchased for $1, $2, and $3 at the information desk of the University Center.

Burnett H. Shryock, dean of the School of Fine Arts, is a member of the council, Hibbe said.
368 Housing Changes Okayed Among 622 Denials Appealed

Tuesday was the last day students could get an interview with the Student Affairs Office concerning University denials on applications to live in unsupervised housing.

As of midmorning Tuesday, 622 students had been interviewed. Of the total, 368 denials had been reversed to allow these students to live in unsupervised housing. 32 of the students' living centers had been approved, 120 decisions are pending and 72 denials remained in force.

Jack W. Graham, University dean of students, was not sure whether another make-up session would be held for those who missed their designated times.

HORATIO HEMOGLOBIN

‘Horatio Hemoglobin’ Joins ‘Walking Blood Bank’ Drive

A blood bank equivalent of “Reddy Kilowatt” has been prepared by a Carbondale woman for use in a campaign to screen potential donors at SIU.

The figure is “Horatio Hemoglobin” and was drawn by Mrs. Donald L. Mayer of Carbondale. One is shown above.

She has prepared a series of five, and they are being used to explain the “walking blood bank” program in the community. Its purpose is to determine the blood types of potential donors, and volunteers are asked to have their blood typed in advance.

Anyone in Carbondale between the ages of 21 and 50 is eligible for screening, members of the committee said. Volunteers can go to either Doctors or Holden Hospital between 8 a.m. and 5 p.m. weekdays, and no appointment is necessary.

To date, only 30 volunteers have appeared at the hospitals for typing, and 25 of these have been accepted as members of the “walking blood bank” to serve emergency requirements in the community.

**U.S. Soccer Interest Grows from College To Professional Level**

By Mike Schwebel

Recent interest in soccer construction shows the sport's campus is not isolated by any means.

Though some institutions such as St. Louis University, Notre Dame and Michigan have included the sport in their athletic program for some time, those who are not familiar with these collegiate teams are being formed and recognized.

The most recognized by the National Collegiate Athletic Association and NFL is NCAA tournament is soon to be played.

One of the biggest soccer news in the U.S. is in professional soccer.

Soccer has been the world scene in a big way for many years, but on occasion, it has people paid much attention to it in the U.S.

Two soccer leagues are planning to start new spring and fall, and rival leagues will come.

The North American Soccer League and the National Professional Soccer League will begin their seasons on the March.

Television rights, official sanctions and rules to lure federations from the fold will be some of the issues.

If all goes well, the U.S. can see the NASL and NPSL as national soccer leagues, by the time.

Any team of a national professional soccer association is associated with the new leagues.

Former Boston Celtic coach Red Auerbach, former Oklahoma football coach Bud Wilkinson, Gabe Paul of the Colorado Rapids, and Bill Bidwill of the St. Louis football Cardinals are just a few of the heads of franchises in the NASL.

If soccer shows any signs at all of growing, it may be the crowd-drawing sport such as professional football has become. It is likely that many other sport personalities will join the bandwagon on their way to the bank.

Irish Coach Discounts Rating As Factor for Spartan Game

By Will Grimsley

SOUTH BEND, Ind. (AP) - Notre Dame's coach Ara Parseghian said Tuesday he had no questions about carrying thermometer's No. 1 college football ranking into the big game with Michigan State Saturday.

"I don't think it will be a strong emotional factor in this case,"

If it were a one-sided game and we were to write by two or three touchdowns, it might be a different story, but Michigan State also is unbeaten.They may regard themselves as the best.

Personally, there are four over-rating emotional stimuli that would be in Notre Dame's Michigan State's last game. They are at home. They want to maintain their record of going 10-0.

"On our side, the determination to average last year's 12-1 may be a stronger urge for our boys," Notre Dame is to be televised over a large section of the country, matches two unbeaten, unified powerhouses in a battle that figures to decide the national championship.

The U of M has been labelled a dream game without any parallels in national interest since the great 1946 Notre Dame-Army game that ended in a scoreless tie.

Both the Irish and the Spartans have big, quick defensive units. Bob Harby, who anchors Notre Dame's front line, weighs 270 pounds and Bubba Smith, Michigan State's left end, weighs 285.

Most fans, however, are expecting an exciting offensive duel involving the Irish's sensational sophomore battery of Terry Hanratty and Jim Seyer, and the Spartans' powerful running, Bob Apiza, on the other.

The two teams, with first place votes in parenthesis and total points in conference ranking:

1. Notre Dame 35 420
2. Michigan State 39 392
3. Alabama 12 1 327
4. Nebraska 282
5. Georgia Tech 241
6. Arkansas 1 206
7. Sou California 172
8. UCLA 130
9. Georgia 102
10. Purdue 37

**Harriers Prepare for NCAA; Moore Ready at Top Strength**

SIU's cross-country team prepares for the NCAA championships realizing that Oscar Moore, the best runner in the United States, is once again in strength.

In the recent mile relay against the University of Kentucky, Moore complained of a side ache. This side ache didn't hinder the 29-year-old Saluki star in the recent Central Collegiate championships. Moore not only took first place in that meet but set a new record, running the mile course in 4:48.2.

Moore will probably be favored to carry the honors in both the NCAA championships and the Western Championships. However, Coach Lew Hartzog was well pleased with the performances of the entire team in the Central Collegiate, Al Ackerman, Jeff Duke, Dave Chisholm and Jeff Charvat have all shown progress during the season and the Salukites look as a contender for the team title, currently held by Western Michigan which also won the Central Collegiate.

The Salukis, who ended the dual meet season with a record of 2-3-1, will compete in the NCAA championships Nov. 21 in Lawrence, Kan., and in the USTFF on Thanksgiving Day.

Moore took second place in the USTFF last year with a time of 29:25 and Ackerman finished 19th with a time of 31:06.

A husband-and-wife team of Southern Illinois University graduates teaching in Venezuela as Peace Corps volunteers last summer conducted Maracaibo's first community sports program for teen-age girls.

Janice and Don Anderson teach physical education in different "liceos" (high schools) but, concerned about volleyball, the average girl tlton-tlton behind, "I don't expect to see any sport except football, basketball, and volleyball clubs proved to be the most popular class. Girls who never thought of joining a softball club were far behind," Jan Anderson has written friend at SIU, "Most Venezuelan girls have never even participated in any sport except volleyball. The average girl sticks more to household activity and the boys.

The Andersons arranged to use the facilities of a new YMCA, and organized the girls into groups of those of a new liceo in the community, then secured permission to use the swimming pools of some of the private clubs in the city. "For some of the girls who come from impoverished homes, just entering these clubs proved to be a new experience," Jan wrote.

"At first we started with a small number of girls from the liceo. As the girls in the neighborhood saw that classes were taught for their age groups, they began to filter in. We hope that the neighborhood girls will continue for continuing their education as a result of the contact with girls of higher education." To celebrate the anniversary of the YMCA part in August, Jan and Don organized a sports festival and competition. "This attracted folks and contemporary dancing, choral and solo singing, poetry recitation. Jim Work was guest speaker. The Andersons taught the girls "la norteamericana" softball.

Finally, Jan added, "to much to our enjoyment, we were asked to accompany the Venezuelan Church group in singing America," in typical of the contrasts in Venezuela, Jan teaches in a new modern school with several fenced-in volleyball and basketball courts, plus a soccer field. Don teaches in a small, overcrowded converted grade school with one small concrete-covered court for physical education activity.

As a photographer rather than a physical educator, Don wrote that I really had second thoughts about spending two years in a low physical education situation in Venezuela." But, he added, "as in many cases with the Peace Corps, a person is limited to a nucleus of girls from the school. We have begun teaching English, and have made school bulletin boards of his photographs of school activities and is planning to start teaching English in his high school and another at the YMCA.

Touring Club Plans Rally For Novices

The Grand Touring Auto Club of Illinois will sponsor a novice rally Sunday. Registrations will be held from noon to 12:30 p.m. at Epps Volkswagen on Illinois 13 east of Carbondale. This event is designed to introduce participants to the sport of rallying. A test of driver and navigator which requires precision, not speed, is scheduled. The idea is to get to each point of the course at the exact time determined by the mileage and the given average speeds.

A rally school covering the terminology and rules for rallies will begin at 12:15.

The course will cover approximately 180 miles and should take about three hours to complete. Both a novice and experienced navigator for experienced participants will be awarded.

Kelley to Be Replacement

Mougey Probably Will Miss Final Game

By Tom Wood

Saluki quarterback Doug Mougey probably has been sidelined for the final game of Saturday. Team physicians do not expect Mougey to have recovered by Saturday from a hip injury aggravated in last week’s game.

Mougey will be replaced by sophomore Tim Kelley, according to Coach Ellis Rainberger. Kelley relieved Mougey against Ball State and engineered the team’s only scoring drive.

It is unusual to find that Mougey’s injury is the only one which will sideline a player this week. The past few games have been played, by what has seemed to be a “supporting cast of thousands” at times.

Commenting on the game itself Rainberger said, “The kids played a good game and the coaching staff felt they did not deserve the fate of losing.”

Rainberger was particularly pleased with the play of his starting backfield, three-fourths of which have spent most of the season on the bench. He said that Keith Leigh and Tom Wirth both did excellent jobs carrying the ball and cited Wirth for his aggressive blocking.

Leigh gained 109 yards in 22 carries in his first starting assignment and Wirth piled up 87 yards in 15 attempts, as a replacement for HJL Williams.

Rainberger praised the defense for shutting off the Ball State running game and, except for one fatal lapse in the second period, containing the Cardinal passing attack.

The Salukis held Ball State to 138 yards rushing, well under their previous average. 80 yards were taken on a pass from Frank Hook in the flat and out run the Salukisecondary.

Too Late—Bill Hohn (81), Saluki end, arrives to late to block this pass by the Ball State quarterback. Although not successful in this effort, Hohn did recover two Cardinal fumbles and helped the Salukis hold Ball State to its lowest game score of the season. But this was not enough as the Salukis lost a close 15-14 contest. SIU will play its final game of the season Saturday against Southwest Missouri State, a team that has already accepted a bowl bid.

Coach Select Six Players

For Weekly Football Honors

The SIU football coaching staff has selected Keith Leigh, Tom Wirth, Ted Schoch, Chuck Korresel, Carl Mauck and Tim Kelley as winners of the Player of the Week award. In disclosing the winners, Coach Ellis Rainberger said the staff would like to honor these players because of their performances, which were either their first starring roles or in a new position.

Leigh and Wirth drew praise for their performances in the starting backfield after both had seen little previous action.

The pair accounted for all but 4 of Southern’s 217 yards rushing. Saturday, Leigh scored the first Saluki touchdown on a four-yard run.

Kelley relieved starter Doug Mougey at quarterback and led the Salukis to their first score. He played the entire second half at quarterback.

Korresel and Schoch started as defensive guard and did “excellent jobs,” according to Rainberger.

Mauck was switched from linebacker to tackle on defense.” He did a good job at an unfamiliar position. “Rainberger had several good words to say about the performance of the defensive line, which held Ball State’s strong running game to 138 yards. He added that Mauck, Schoch and Korresel played a major role in this performance.
