Override vote looks like ‘too close to call’

By Mark Edgar
Student Writer

The override vote in the Illinois General Assembly to restore more than $3 million in vetoed or reduced funds for SIU-C is still too close to call, area legislators say.

Sen. Kenneth Buzbee, D-Carbondale, said Tuesday he would introduce a motion to override a coalition on more than $4 million in appropriations for the whole SIU system as soon as possible after the convening of the General Assembly Wednesday.

Rep. Bruce Richmond, D-Murphysboro, said he would sponsor a bill in the House to restore the funds cut by Gov. Daniel Walker in July, but he said the override motion must begin the Senate.

Buzbee said, "I will now have to do quite a bit of personal lobbying for the vote."

"The battle line have been drawn and many legislators have already made up their mind on yes or no," Buzbee said.

Richmond said he expects "a little resistance from both sides of the aisle, but I don't think we will have a partisan battle."

After Walker's vetoes in July, SIU-C received only $56 million, of the more than $71 million in state appropriations approved by the legislature.

Since reduction amendments can be added to the motion during this session, Buzbee cautioned, SIU-C may not receive all of the funds it seeks.

Buzbee said students will suffer most from the cuts. Walker won't get the money to pay teachers, if we don't get the money to fund new programs, then it all flows downhill. And it seems that all students end up being hurt," Buzbee said.

Buzbee also cited "the seriousness" the legislature wants to continue to override the governor's vetoes on a bipartisan motion.

The fall session gives legislators a chance to override the governor's vetoes of legislation passed last spring.

Walker cut some $200 million from the $10.4 billion in appropriations passed by the legislature with $170 million of those cuts in areas which are supported by general funds. Walker met privately with legislative leaders of both parties and urged them that all of his budget decisions be upheld.

Under the Illinois Constitution, each house has 15 days to vote to override vetoed bills before sending them to the other house for consideration.

Last year's dramatic veto session fighting took place two years ago. The Illinois State Chamber of Commerce, a statewide business-oriented group that monitors state finances, said its analysis "shows that voting of additional spending by the legislature would be inappropriate at this time in the face of continued state budgetary deficits."

Higher education officials don't agree. They are urging restoration of at least some of the $24 million in cuts Walker made for colleges and universities.

Walker, Thompson ask support for vetoes

By Skip Wallenberg
Associated Press Writer

SPRINGFIELD (AP) — Both Gov. Daniel Walker and Gov. elect James Thompson urged upholding the governor's vetoes of $300 million in spending at Wednesday's convening of the fall General Assembly session.

Gus says one nice thing, at least, about the override is that we've got nothing to lose."

Competition to continue

AAUP turns down CFUT coalition bid

By Bonnie Gamble
Daily Egyptian Staff Writer

The local chapter of the American Association of University Professors (AAUP) to form a coalition with the Carbondale Federation of Teachers (CFUT) to form an AAUP coalition with CFUT.

By Herbert Donow, CFUT president, said the local chapters to engage in this relationship with other nationally affiliated organizations.

"We want to be absolutely separate," Kleinau said Wednesday. He said his organization wants the faculty to recognize the AAUP's approach to collective bargaining.

Donow said the letter he received from Kleinau did not indicate to him that the entire AAUP membership had been consulted in the decision against forming a coalition.

In fact, Donow said, he has a copy of a letter sent to Kleinau by an AAUP member urging affiliation with CFUT.

"I suspect others in the AAUP feel the same way," Donow said.

Donow said it "doesn't really make things much different." If the AAUP does not want to form a coalition, "I think we'll wind up winning," Donow said.

The invitation to form a coalition was a "disinterested gesture" to settle rivalries and get the two groups working for the same thing, Donow said.

Kleinau, who was once a CFUT member, said there is no animosity between the groups. "We plan to work right up to the end," Kleinau said.
Campus groups form liaison unit

By Joan Pearlman
Daily Egyptian Staff Writer

In an effort to bring the office of Student Affairs closer to students, the council plans to work with the Student Government as a coordinating body for the Student Trustee.

The papers also state that the council will aid in the clarification of, and suggest changes in, diversity policy as it pertains to students.

Chris McMullen, executive assistant to Student Government, was elected recording secretary of the council. Other undergraduate representatives on the committee are Tom Jones, Student Government president; Wheeler and McCaponi, executive assistant to the Student Government vice president.

GSC officers named as representatives on the committee are: Ray Hueschmann, president; Lloyd Worley, vice president; Jerry Haynes, treasurer; Wayne Stahl, executive secretary; and Jan Baretton, secretary.

Lying room only

By Lawrence L. Kutzon
Associated Press Writer

Bylaw, Ga. (AP) - President-elect Jimmy Carter asked Congress Wednesday "to direct me to make the executive branch efficient."

Carter said he wants Congress to enact the so-called Hoover reorganization act which permitted the President to change the federal bureaucracy, subject to a congressional review.

Carter commented after a three-hour meeting with some of the key leaders of Congress in the stately mansion of Georgia's senior Democratic senator, Herman Talmadge.

Rep. Thomas "Tip" O'Neill, D-Mass., who is almost certain to become speaker of the House in the next session, said that Carter "will have 100 per cent cooperation from me."

"If the meeting this afternoon is any indication of what lies ahead for this country... the omens are all good," said Sen. Hubert H. Humphrey, D-Minn., who is retiring as Senate Democratic leader.

Carter said that the House and Senate members received "a pledge to do the part to do everything I can to restore harmony between the White House and the Congress."

He said Vice President-elect Walter F. Mondale, who was present at the meeting, will be an "equal partner with me" before the transition and the coming administration.

Those present at the session included Sen. Robert Byrd, D-W.Va., Senate majority leader; and Rep. Richard Gephardt, D-Mo., who was House majority leader.

FBI investigated KKK after King's death

WASHINGTON (AP) — The FBI investigated Ku Klux Klan after Martin Luther King's assassination, newly disclosed FBI documents reveal. Four days after King was slain in Memphis on April 4, 1968, FBI headquarters ordered an investigation of all known members of the Klan, the rightwing Minutemen, "other hate group members, rabble-rousers and any other individuals known to have violent proclivities located within your territories."

The order was sent to FBI field offices in Memphis and Knoxville, Tenn., Birmingham and Bessemer, Ala., Jersey, Minn., Milwaukee and Minneapolis.

The memo is part of about 18,000 documents compiled by the FBI during its investigation. The FBI released 442 pages to comply with requests under the Freedom of Information Act. Officials are screening the rest of the files to determine what else will be released.

Gilmore conscious after suicide attempt

SALT LAKE CITY (AP) — Gary Gilmore, who sought to end the delays in his execution and face a firing squad as soon as possible, regained consciousness Wednesday, a day after he took a sleeping pill overdose. But Gilmore is expected to die in a coma in critical condition, hospital officials said.

The stay of execution ordered by Gov. Calvin L. Rampton, just days before Gilmore was to face the firing squad, was continued until the Utah Board of Pardons meets. The board rescheduled hearing for Dec. 6; the execution cannot be rescheduled before then. Even though Gilmore says he wants to die, Gilmore, convicted of killing a motel clerk in a robbery attempt, and charged in another robbery-slaying four months ago, was to appear before the board on Wednesday.

Consumer beef prices expected to rise

WASHINGTON (AP) — After declining this year, consumer beef prices will go up soon and probably set new records in 1977, an Agriculture Department economist said Wednesday.

Richard J. Stearns of the department's Economic Research Service said beef will cost a record average of $1.40 a pound next year. After soaring to a record of $1.48 on an all-cut basis in 1976, consumers this year are paying an average of $1.30 a pound. The estimated beef cost is an average of choice-grade meat from grain-fed cattle and is based on various cuts, such as steak, prime rib, and hamburger. The USDA made no breakdown for each cut. The USDA said the reason prices will climb again soon is that cattlemen, who are suffering financially because of a glut of beef, already have reduced their herds sharply.

Carter asks help to streamline bureaucracy

WASHINGTON (AP) — The FBI investigated Ku Klux Klan after Martin Luther King's assassination, newly disclosed FBI documents reveal. Four days after King was slain in Memphis on April 4, 1968, FBI headquarters ordered an investigation of all known members of the Klan, the rightwing Minutemen, "other hate group members, rabble-rousers and any other individuals known to have violent proclivities located within your territories."

PLO indicates willingness to settle in U.N.-backed area

By Serge Schmemann
Associated Press Writer

UNITED NATIONS, N.Y. (AP) — The foreign affairs spokesman of the Palestine Liberation Organization said Wednesday the PLO has accepted a Palestinian state in the Gaza Strip and the West Bank of the Jordan River, Arab territories now under Israeli control.

Diplomatic sources at the United Nations said the initiative by the PLO, the recognized political organization of the Palestinian people, was "largely symbolic" because it would have no effect on the ground.

"We accept establishment of a state in the West Bank and Gaza Strip," Farouk Kaddoumi, head on the PLO's political department, said in an interview.

He is here for the U.N. debate on the Palestinian issue.

Fired fireman amends suit against newspaper

A libel suit against the Southern Illinoisan Inc., filed by former Carbondale fireman Glenn Stearns and dismissed last month in Jackson County Circuit Court, has been rescheduled to an amended form.

The amended suit, filed Tuesday, names only the Carbondale-based newspaper as a defendant and asks $100,000 in punitive damages.

Kaddoumi claimed the position is not new and that it is implicit in the Palestinians' "National Charter" adopted in 1969. That charter also calls for replacing Israel with a secular state of Arabs, Moslems, Christians and Jews. Kaddoumi's concept, Jewish spokesmen say, tantamount to obliteration of the Jewish state.

Diplomats said Kaddoumi's outright acceptance of a West Bank-Gaza state would have been the equivalent of the conciliatory speech he made Monday in the General Assembly in which there was no reference to a secular state.

Instead, Kaddoumi focused his speech on proposals set out by the U.N. Committee on the Exercise of the Inalienable Rights of the Palestinian People.

A libel suit against the Southern Illinoisan Inc., filed by former Carbondale fireman Glenn Stearns and dismissed last month in Jackson County Circuit Court, has been rescheduled to an amended form. The newspaper's attorney, George K. Davis, is scheduled to file its answer Dec. 8.

Stearns' amended suit charges that the newspaper did not take reasonable care to find out if the city manager's statements were true and that they damaged by the article and as a result he was unable to find a job as a fireman.

Defective Puppy

In March we purchased a Chow-Chow puppy from Wildwood Kennels for $297. We signed a statement that read "guaranteed against congenital defects for one year." The dog has had two congenital problems. When he was still quite young he had an eye problem which was remedied by surgery for which we paid $40. The dog then developed a limp. After having X-rays taken our vet diagnosed the problem as hip dysplasia, a serious congenital defect.

The vet is willing to testify that the dog need not be put to sleep yet since he is in no pain. Wildwood Kennels is insisting that we destroy the dog before we can receive compensation for him.

The guarantee statement does not stipulate that we must return the dog to receive compensation. We feel the kennel is trying to skip out on its responsibility in hopes that we'll simply drop the case.

We paid almost $300 for a dog, who we've since become very attached to, and we feel we've been ripped off. We're asking full compensation for our dog, or another puppy, preferably the money.

W.E. and M.K.

The manager of Wildwood Kennels said he had a verbal agreement with W.E. and M.K. to guarantee the puppy against congenital defects for one year. He said he will replace the puppy with another Chow as soon as possible if he has the dog's American Kennel Club papers and verification from a veterinarian that the dog was destroyed. He said that it would be bad business for the kennel to have a dog with hip dysplasia running around.

A spokesman for Central Regional Hospital in Carterville said, after looking at the dog's medical record, that the dog does not have a bad case of hip dysplasia. However, he said it would be advisable not to breed the dog as the disease can be transmitted to offspring. He said the dog could undergo corrective surgery. There are two types. One procedure is to sever the muscles nec-

Essential to relieve the pain temporarily. The other procedure is more complex and would involve removing the head of the femur and letting the dog walk on its muscular sling. He said the decision would be up to the owners and the reception of veterinary advice. If the dog was destroyed, the kennel would sign the puppy to the owners and the dog was no way of saying dogs with hip dysplasia must be destroyed.

If I took my dog to view the dog must be destroyed before it is replaced. There is the humane side of keeping the dog alive if possible: W.E. and M.K. have to make their own decision risking less of compensation.

I took my car into Don's Shell Station in Carbondale for the replacement of the timing gear. Don's had it for two weeks saying they could not obtain parts and that they have worked on it three days straight. Now Don's says the car needs a ring job ($400). The car never burned oil before it went in and the need for a ring job can be detected 5 weeks to one year before it's due. Also several hundred dollars worth of body damage was incurred while the car was in the station. I feel I'm being ripped off. If the car does need a ring job, I think it is because of some bad handling the station did. Also something needs to be done about the body damage.

Don's offered to allow M.R. to take the car to another garage at Don's expense for a second opinion. M.R. took the car to a local Ford dealer who found the timing gear had been put in incorrectly. Don's has filled the reception of M.R.'s satisfaction. The question of the body damage is now being negotiated with Don's Shell.

If the station damage company does not cover the damage, the station will pay M.R.'s $100 deductible.

Cohabitation Information

I would like some information pertaining to cohabitation in Carbondale. Does anyone have it?

There is no real ordinance in the city of Carbondale which prohibits two unrelated persons from living together. A representative from the City Planning Office said that there are three residential districts in Carbondale: low, medium and high density. The low density district permits one family and one unrelated person in two unrelated persons to reside in the same place. As the density of the district increases so does the number of unrelated people who can live together.

Override support uncertain

(Continued from page 1)

of restoring the full appropriation for Jacobus.

Bubbee explained that Walker's cuts resulted in limiting the salary increases for teachers from professional groups to an average 2% per year. That was not acceptable to the legislature approved.

There has been a continuous exodus of teachers from Illinois to other schools with better pay," Bubbee said.

And the people who are left are usually the best faculty members and the one who are most needed.

Rep. Ralph Dunn, R-Du Quoin, said he would vote for the override, "unless it looks as though it would cause a tax increase."

"As Republicans, we have to be twice as careful so we don't get caught in a box." Dunn said. "With a new governor, the R-Dunn exam would jeopardize his chances for re-election."

Dunn said Republican Governor-elect James "Jim" Henson will not be as administration-friendly on a Democratically-con-This is a very personal interest in the future of the state."

"We both are as effective as I think he might like to be. But we will listen to him quite a bit," he said. "To win the override fight, Dunn said, he may have to find some more restoration funds from other universities.

"We call it swapping a favor for a favor, or a vote for a vote," he said. "In order to get people to support us, we are going to have to support them.'" Dunn said Rep. Stanley Weaver, R-Silvis District, is expected to introduce a motion to restore vetoed funds for the University of Illinois, and Rep. David Shapiro, R-Roth District, plans to sponsor a bill for the Board of Regents. Richmond said a possible tax increase, "cannot be tied to," higher education appropriations.

"There are too many items that can cause a tax increase. It would not be fair to blame it all on higher education," he said.

Weather

Thursday mostly sunny and warmer. High in the middle or upper 60s. Thursday partly cloudy with a chance of showers in the lower or middle 40s. Friday partly sunny. High in the lower or middle 60s. West to southwest winds 8 to 15 miles an hour Thursday.

Associate Professor of physics Walter L. Borst, recently chosen as the Robert Morton Guest Professor for 1977 at the University of Wurzburg in West Germany, explains the atomic collision apparatus, which is used in analyzing the earth's atmosphere. Borst will leave SIU for Germany in January, 1977. (Staff photo by Peter Zimmerman)

OPEC might postpone expected price increases

NEW YORK (AP) - A spokesman for the Organization of Petroleum Ex­porting Countries confirmed Wednesday that some OPEC members had called for postponement of a price decision slated for Dec. 15.

Hopes for a delay in any increase in world oil prices provided the impetus for a gradual but broad advance in the stock market.

Analysts said some traders seemed to read that news as evidence that diplomatic pressures might push OPEC into a more modest stance on prices.

President-elect Jimmy Carter, among other U.S. leaders, has said that any significant increase in oil prices would pose a serious obstacle to the economic recovery in the industrial nations.

Science research teams across the country are beginning to manage the control of aging in the elderly. Working on related bodily sets of functions, their ultimate goal is to prolong the healthy middle years of human life.

These modern Ponce de Leon’s are seeking to keep people young for centuries. Extends to people over 3000 years. Researchers would not create a society overwhelmed by old age but rather, as science writer Albert Rosenberg stated, old age would be a population increase continue, world population will double within approximately seven billion people. 2000. Population growth and life extension equals disaster.

Paul R. Ehrlich, Stanford University biology professor, writes that over the last century understanding and utilization of death control has given rise to rapid rise in population. Sooner or later, he adds, this will have to stop with some sort of contraception, rather than simply, then quantity, of human life. Responded, on the other hand, life extension would enable humans to develop to the maximum potential. With more years, he states, wisdom would steadily mature. He would further be able to enable humans to develop to the maximum potential. With more years, he states, wisdom would steadily mature. He would further be able to enable humans to develop to the maximum potential. With more years, he states, wisdom would steadily mature. He would further be able to enable humans to develop to the maximum potential. With more years, he states, wisdom would steadily mature. He would further be able to enable humans to develop to the maximum potential.
Accept Las Vegas for its unreal premises

By James J. Kilpatrick

An acceptance of poetry, or of fairy tales, demands what Coleridge called a willingness to close our eyes to the cause of disbelief. That is what Las Vegas demands. In its own strange, deliberately otherworldly way, the Strip is poetry of a curious kind, and the city's economy is spun from the gossamer dreams that fairy tales are made on. It cannot exist—but it does. Out of the gritty sand a Caesar's Palace lifts its sculptured fountains. Mesquite flowers into castles, gardens, mazes. And just as many fairytale tales report their gristy aspects—billygoats devoured, and maidens put to sleep—it is its morbid overtones. The city bares; it tempels, it draws, it fascinates; and it repels.

What Vegas asks of the tourists—and what the tourists willingly provide—is a suspension of belief in the old conventional values: in the value of money, in the meaning of work, in concepts of worth that can be measured in usefulness or beauty or need. These are the realities that most of us live by, but Las Vegas whispers. Escape them; these plastic tokens are not money; they are merely chips. Come! Try your hand at a toss of the dice; tempt yourself with forbidden fruit—three clusters of cherries all in a row. The seductive voices find a ready response. Despite every economic indicator—despite recession, inflation, unemployment, or perhaps because of these very things—Las Vegas is booming as never before. Last week the State Gaming Control Board released its third-quarter report. In the July-September period, Nevada's casinos won a record $51.8 million. But another way, the tourists lost a record $51.8 million. The tourists seldom seem to mind.

This dreamy madness has to be seen to be believed. At MGM's Grand Hotel, the vast casino rooms are a stage set from a book by Dante, a film by Fellini. Along the busy corridors of slot machines, the hot-panted demons goon rats; lights flash red and orange; bells ring. Here there is no day, no night. Nothing about Vegas is cheap. The city's convention bureau estimates that, at current rates of $60 per person per day, exclusive of gambling losses, the figure is probably low. A typical tab for dinner and show, for example, will run $40 a head, and if the shows are superlatives, the dinners are often of one's own choosing. A guest who dined last week at the Riviera has had a choice of hamburger patty, tired trout or chicken sauteed in a sauce of library paste. That was the total menu: $18.50, and take your pick.

Under the asthetical spell of Vegas, few tourists feel the pain. Visitors pour in by bus, commercial jet, and charted plane. Hotels are running at occupancy rates of 90 per cent or more. The city boasts 8,000 hotel rooms now; another 2,700 rooms will be available next year. The newspapers overflow with help-wanted ads, for maids, waiters, dealers of cards, counters of coins, weavers of an opulent enchantment. By any rational measure of values, it is all false, as hallow as the plastic columns, as phony as the glittering, plastic tidbit. The roulette wheel rolls its glittery, bloodshot eye, as mesmerizing as the one-eyed monsters of Homeric legend. What strange odyssey brings the traveler to find a Cyclops here?

Whatever the lure of Vegas, it works phenomenally well. Last week saw the wholesale druggists and the defense reeling in Nevada's fantasy land. In recent weeks, Vegas has played host to automobile dealers, tobacco distributors, optical wholesalers, the American Society of Bariatric Physicians. In 1975, the city counted 9.1 million visitors. This year, despite a costly three-week strike of culinary workers in the state, the count is higher still.

Monetary identity crises trouble U.N. University

By Kathryn Tolbert
Associated Press Writer

TOKYO (AP) — The United Nations University has no campus, no degree system and no courses of study, and isn't looking for any. But, on its first birthday, it is having financial troubles and wants some money.

"We are still in a time of difficult financial conditions," said James Hester, the American rector of what was formally created a year ago as a world-wide research agency.

He told a news conference Monday that the university still was not understood around the world and that the use of the word "university" was confusing.

"We are a university that is not a university, has no degree students, campus or course of study," he said. "Our method of operation, as a network of associate institutions, is not familiar to most people."

It is intended to examine international problems from a scholarly, non-political viewpoint, coordinating the work of worldwide, specialized institutes. The Tokyo headquarters is the coordinating center.

Hester noted that in addition to Japan's pledge of $100 million, Venezuela pledged 150 million and Ghana $2.5 million. The United States may contribute 500 million during the coming year, he said.

Hester had said earlier he hoped to raise $100 million in the first five years of the university.

"We still don't know how much or when other countries will contribute. The ultimate success depends on those contributions," he said.

Hester said the 1973 oil crisis made many countries feel too poor to contribute. Criticism of the United Nations in some parts of the world also discouraged contributions, he said.

Hester said he wrote two months ago to Jimmy Carter explaining the university's situation and Carter, now U.S. president-elect, replied that he would do everything he could.

The university chose as its first three areas of concern world hunger, human and social development and management of natural resources. It held working meetings in the fall of 1973 with 50 experts from 30 countries to decide on a program of activities. The initial programs are with Central America, Panama, India, and the Philippines.

"We are eager to demonstrate the university can help scientists of developed countries as well," said Hester. "Within a month we will appoint a vice rector in the area of natural resources to develop a program in energy of interest to developed countries."

On and off-campus jobs listed by Student Work

The following jobs for student workers have been listed by the Office of Student Work and Financial Assistance.

To be eligible, a student must be enrolled full-time and must have a current ACT Family Financial Statement on file with the Office of Student Work and Financial Assistance. Applications may be picked up at the Student Work Office, Woody Hall B, third floor.

Jobs available as of Nov. 16:

Fall openings—

Chemistry, one opening, morning hours; one opening, afternoon hours; one opening, night hours. Needed to type play-by-play of athletic events. Monday-Sunday, Mondays 8 a.m.-noon, other hours to be arranged. Two openings, general office work. Graduates students acceptable. Located at Little Grassy Lake at Giant City, mileage will be reimbursed at a rate of 10 cents per mile, one opening for 8 a.m.-noon one openings for noon-3 p.m. one opening, typing and clerical work, must be able to type at least 40 words per minute, prefer a student majoring in zoology, biology, or life science. 8 a.m.-4 p.m. one opening, 11 a.m.-3 p.m.

Janitorial—one opening, two and one-half hour work blocks between the hours of 10 a.m. and 4:30 p.m. one opening, 12:30-4:30 p.m. one opening, 8 a.m.-noon.

Miscellaneous—five openings, mail carriers, one opening for morning hours, one opening afternoon hours; one opening, translation, must be at least 15 years old, morning work hours, two openings, tutors, seniors or graduate students, need one for math, one for study skills, time to be arranged.

Food Service—one opening, heavy work, 1:45 p.m.-one opening, waitress, Mondays through Fridays 10 a.m.-3 p.m.

Off Campus—two openings, yard work, $2.50 per hour, times to be arranged, for more information call 453-2800 one opening, demonstrate for the Oster Corp., in a local store, evenings and weekends until Christmas, times to be arranged, for more information call 453-3311 between the hours of 10 a.m. and 9 p.m.

Spring openings—

Clerical—one openings, morning work hours; one opening, typing and clerical work, prefer a student majoring in either biology, sociology, of life sciences, 1:30 p.m. one opening, typing and clerical work, prefer a home economics major, one hour work blocks, times to be arranged; one opening, clerical and typing work, prefer a freshmen or sophomore. Mondays through Fridays 1:30 p.m.; one opening, typing and switchboard work, afternoon hours; one opening, typing and shorthand work, morning hours.

Crafts shop will ask for funds

A small storage and dishwash area adjacent to the Big Muddy Room in the Student Center will be converted to a crafts shop by spring if SIU's governing board approves a $37,000 renovation plan.

The University will take a proposal to SIU's Board of Trustees. Dec. 9 meeting asking for $23,000 from the SIU Student Welfare and Recreation Fund (SWRF) to renovate the proposed shop site. The other $5,000 would be allocated from the Center's budget, said James Sheppard, Student Center assistant director.

About $5,000 worth of arts and crafts equipment has already been purchased by the Center. Sheppard said. He said the shop would "meet the needs and interests of students, staff and others by providing them the chance to participate in formal and informal arts and crafts exercises."

The shop would include facilities for ceramics, picture framing, painting, printing, macrame, embroidery, mixing, stitching, glass staining, wood re-finishing and leather work.

Music educators convene at SIU

District Six of the Illinois Music Educators' Association will hold its annual convention on the SIU campus Saturday.

Registration lasts from 8 a.m. to 10 a.m. in the Economics Building, where Paschendag Music House of New York, Frankfurt and Chicago will have a display of free coffee and donuts.

The day's activities will be devoted to clinics and festival concerts. The Junior High School Workshop consists of introductory lectures to video workshp at a section campus. "We'll be working mainly with one-half-inch video equipment."

There will be a "hands on" section where the participants will use one-half-inch video equipment. "We'll be working mainly with production and how to set up tape on campus," Ongold said.

Ongold also estimated an attendance of about 300 at the convention with about 30 participating in his workshop.

European organization will hold its annual convention on the SIU campus Saturday.

Registration lasts from 8 a.m. to 10 a.m. in the Economics Building, where Paschendag Music House of New York, Frankfurt and Chicago will have a display of free coffee and donuts.

Ongold also estimated an attendance of about 300 at the convention with about 30 participating in his workshop.

WSIU-FM will air opera company show

WSIU-FM, a member station of the National Public Radio System (NPR), will broadcast in stereo two internationally acclaimed opera performances by Italy's nationally acclaimed opera company, the Teatro alla Scala. The performances were radioed from LaScala's recent engagement in the Kennedy Center's Arts Center. It was the first time LaScala had appeared in this country in the company's 20-year history.

"La Cenerentola," by Gioachino Rossini will be broadcast on 91.3 FM Sunday at 1 p.m.

"Simon Boccanegra" by Giuseppe Verdi will be broadcast on 91.3 FM Sunday, Nov. 28.

Ongold also estimated an attendance of about 300 at the convention with about 30 participating in his workshop.

Economically disadvantaged

President James Fox addressed the need for alternative programs to meet the needs of economically disadvantaged students. He said the Student Center is "working to provide a facility where the needs and interest of students, staff and others by providing them the chance to participate in formal and informal arts and crafts exercises."

The shop would include facilities for ceramics, picture framing, painting, printing, macrame, embroidery, mixing, stitching, glass staining, wood re-finishing and leather work.

Study shows ‘mathophobia’ more common among women

By Pam Bailey
Student Writer
Mathematician and sex. Recent studies have shown there may be a strong relationship between the two.

This is the substance of the theory that mathematics is an acquired fear of women. This theory is supported by the work of Ernest, who received his Ph.D. in mathematics from the University of Illinois in Champaign, Illinois.

One cause offered for such a phobia is parental role models. Ernest found that before entering the sixth grade, both boys and girls went to their mother for help in math homework. After the sixth grade, they began to go to the father for help in math and the mother for help in English.

"Females have no role models to follow in the mathematics and mathematics-related professions. Because of this, they don't know how to prepare right," said Katherine Pedersen, assistant professor of math and discussion leader for the women's seminar on math anxiety.

The compiled A.C.T. results for the 1975-76 school year show that of the incoming freshmen, 30 percent of the males had four or more years of high school math while only 16 percent of the females had four or more years. One out of 10 of the incoming freshmen women had either no math or only a half-year of math. There were no males in this category.

But, said Pedersen, "math anxiety exists across the board. Both men and women experience math anxiety. Anybody who teaches math is aware of this. There is frustration built into mathematics. The secret is to not be afraid to be wrong and make mistakes."

Although studies on the topic were conducted as early as the 1930's, Ernest's comprehensive study conducted in 1973 and 1974, has touched off a flurry of discussion and evaluation. This flurry was brought to SIU when Women's Problems sponsored a recent seminar on math and sex as part of their women's seminar series.

In his study, Ernest documented a lack of participation by women in the mathematics program at the University of California.

Even though women were in the majority of the classes studied, Ernest found that women earned less than half as many degrees in mathematics as men. Tracing these classes back, he found a barrier of attrition, or drop-out, rate among women.

Ernest found this same trend mirrored in the progression through the graduate program.

Imogene Beckemeyer, assistant professor in the SIU mathematics department, said that there seems to be a similar trend at SIU.

Of the seniors this semester, there are 27 male math majors and 8 female math majors.

The same trend in attrition is indicated here. Of the freshmen math majors, 10 are male and 12 are female. Of the sophomores, 13 are male and 12 are female. Of the juniors, 10 are male and 7 are female.

While these figures may seem like an ideal replication of Ernest's results, Beckemeyer cautioned that the figures do not take into account students who may simply have transferred to another university.

She also added that one has to remember that there is a surplus of males already in the university enrollment as a whole.

Whether these figures are dependable or not, Beckemeyer said this fact remains that there is definitely a preponderance of men in elective mathematics courses and in the mathematics field.

The result of this dearth is illustrated in the composition of the SIU mathematics faculty, which includes professors, associate professors, assistant professors, lecturers and instructors. Of the 45 to 50 members, only three are female. None of these three are full professors.

Math Professor Theodore Burton, explained, "I think that women channel themselves into traditionally male careers. I think that women believe that they have"

Student charged with leaving scene of accident; two cars damaged in lot

An SIU student was arrested on charges of leaving the scene of an accident after he allegedly collided with two autos in parking lot 108 on South Wall Street, University police said Wednesday.

Terrance M. Gordon, a freshman in aviation technology, was arrested Tuesday night after police investigated a call from another student who said cars were damaged in a hit and run accident, police said.

Two autos were struck in the lot, police said. One was a white pickup truck sustained severe rear end damage and an orange Camaro suffered damage to the left rear wheel and the rear end, police said.

Gordon's car was found at Wilson Hall with damage to the front end, police said. Gordon told police the car had not been driven since 7 p.m. that evening, and Gordon did not drive at night because of a previous collision, police said.

University police also reported the theft of a foot locker and two empty suitcases from a storage room on the fifth floor of Schneider Tower.

Studies show relationship between sex and math ability

(Continued on Page 6)

The primary role of raising children and, whether they admit it or not, I think most of them want to get married and start a family. That is better carried out in areas other than math.

A slightly different perspective was offered by the female members of the family, however. Mathematics lecturer Ann Miller said that she "definitely doesn't consider it the lack of incentive in women to study math innate. It's caused by a cultural influence and it happens from the very beginning."

Miller related how one instructor at St. Louis University started out class by lecturing against enrolling in the university honors program because he said it took time away from one's major. The instructor concluded with, "If there's one thing worse than a math major in the honors program, it's a female math major.

By Mark Edgar
Student Writer

Fourteen years after the Cuban missile crisis, SIU still has enough civil defense food stored in campus buildings to feed every student for two weeks during an emergency, local civil defense officials say.

Hundreds of metal canisters filled with crackers, biscuits and candy plus first aid kits and radiological equipment are kept in various locations around the university, according to Lou Ditzler, Carbondale coordinator of the Emergency Services and Disaster Agency, and Oliver Halderson, director of SIU defense operations.

Most of the canisters are in the miles of underground tunnels which run beneath campus, the Student Center and the basement of large classroom buildings.

Although the food was first issued to SIU in 1962, civil defense officials estimate that 90 per cent of the rations are still edible.

The rations were originally part of a government disaster program to build fallout shelters and stockpile emergency supplies for protection against a nuclear attack.

But recently Halderson and Ditzler said some groups have urged that the food be used as part of an overseas poverty relief program for needy countries.

Despite the moves by these organizations to send the food to the hungry people of the world, none of the supplies on campus have been moved.

Ditzler said some of the food has turned rancid and spoiled, but it cannot be disposed of until he receives federal government permission.

Since some of the food is spoiled, "it is possible that we may give some to certain food firms and livestock growers," Ditzler said.

The food can also be used to accommodate a community's welfare needs, according to a statement from the Illinois Office of Civil Defense.

Halderson said that in the event of a disaster, "a stale cracker is better than no cracker."

"People will eat anything if they are hungry enough—maggots and all," he said. "Sure, they could get nauseous but it is better than starving."

The civil defense program was initially set up as a safeguard against nuclear disaster but Halderson said protection against an enemy attack in recent years "got buried in people." Some officials like U.S. Sen. William Proxmire, D-Wis., called the program a "government boondoggle" promoted by planners solely to deal with the possibility of a nuclear attack.

However, that apparently proved too costly, and last September the federal government told states to use their matching civil defense funds only for preparation against a nuclear strike.

Noting the danger of a "growing nuclear family," Ditzler said more attention should be placed on protection against an enemy attack.

"Several more countries are now capable of building a nuclear device and building a delivery vehicle," he said.

Halderson said guarding against a nuclear attack "astronomically prepares us for a natural disaster."
Professor says evaluations hinder teaching performance

By Steve Hahn
Daily Egyptian Staff Writer

Teacher evaluations should be used as a tool to help instructors, not as an administrative device to judge an instructor's performance, according to Donald F. Hoyt, professor of psychology and education at Kansas State University.

Speaking in the Morris Library Auditorium Tuesday, Hoyt, founder of the National Center for the Improvement of Teaching and director of Kansas State's Office of Educational Resources, told an audience of about 30 people, "Don't use teacher's ratings for administrative purposes. You tell teachers they are there to help them teaching and then administrators cut them - the teacher's threats with them."

Hoyt was the first of three speakers sponsored by the St. Education Department's "Evaluation and Improvements of Instruction" series. Hoyt spoke on how to use student opinion to improve teaching.

Hoyt told the audience there is not one model of good teaching for all situations, but that different disciplines require different qualifications in the instructor.

"A teacher can tell if he has taught a class well when the students have learned what he is teaching" Hoyt said. But what each instructor is teaching is quite different from one class to the next, he added.

He said one teacher, for example, might be trying to instill creativity in students and another might be trying to transmit factual knowledge. To be successful at teaching creativity would be quite different from successfully transmitting factual knowledge, he said.

Teacher effectiveness is not the only factor helping students learn, Hoyt said. Students must also have the motivation to learn.

Donald F. Hoyt, professor of psychology and education at Kansas State University, stresses the importance of using teacher evaluations as a tool to help teachers improve themselves rather than as an administrative device to judge performance. Hoyt spoke at Morris Library Auditorium Tuesday. (Staff photo by Marc Galassini)

"You must first ask the student if or how much they wanted to take the class," he said. "That very much colors how they learn."

Hoyt said that when he first began developing methods to help instructors become better teachers in 1970, only 48 of 195 instructors would allow him to evaluate their classes. He said they were very reluctant, because they feared administrative reprisals if they didn't measure up. But after the instructors found out that he was there to help and that results of the evaluations would be confidential, several hundred participated.

Hoyt said that since he began his program at Kansas State, teaching has shown an improvement among instructors who have used his method extensively.

Good teaching can be measured through evaluations, Hoyt said. Since Kansas State has been using teacher evaluations, it was found that there was more improvement among lower ranking teachers and in departments that do not offer doctoral programs, he said.

Press Council views letters policy, sabotage safeguards

By Gail Wagner
Daily Egyptian Staff Writer

The Daily Egyptian's policy regarding same-day responses to letters to the editor, and the paper's safeguards against sabotage of page proofs were discussed by the University-Community Press Council today evening.

The clarification of the letters policy was spurred by a letter which appeared in the Sept. 22 issue of the paper criticizing an advertisement for Goldsmith's clothing store, which the writer said was "nastt." The letter was followed in the same paper by a reply from Carol Goldsmith, owner of the store. The council questioned the letter-reply procedure involved.

Joan Taylor, student editor-in-chief, repiled that the Daily Egyptian Policy and Review Board has discussed how the letter and reply were handled. The board decided that the policy will now be to notify a specific person or group critic and a letter to the editor that the letter is going to appear in the paper, Taylor said.

P.E. Department offers water safety retraining

The Department of Physical Education for Women will offer an American Red Cross Water Safety Instructor Refresher course on Dec. 3 and 4. All water safety instructors must complete this course by Dec. 31 or automatically lose their certification.

The course is 12 hours in length and will be the first retraining course in this area prior to the expiration date. The sessions for the course are from 4 p.m. to 8 p.m. on Friday, Dec. 3, from 8 a.m. to noon on Saturday, Dec. 4, and from 10 a.m. to 2 p.m. on Sunday, Dec. 5. Attendance at all sessions is mandatory.

All university personnel, students, staff and faculty as well as area people who hold a current Water Safety Instructor certification may enroll in the class. The fee for non-students is $5. If a person has an expired certification, he must receive approval through an individual appeal.

Those who would like to register or want more information should contact Julie Diener at 106 A Davies Gym or call 453-2196.

**516 South Illinois**

**Daily Egyptian, November 18, 1976, Page 17**
Pulliam Hall will be the site for a number of games, including the final game to Illinois State, 68-60, after beating SIU just a week earlier in the regular season. After dropping two games at the regionals, the team finished with a 12-3 record. Only two starters were lost from the team through graduation, leading scorer Jan Winkler, a forward, and guard Pam Belden, a guard. SIU Coach Mo Weiss feels that her team can replace the graduated with six new players and a well-rounded offense. "We're going to use a man-to-man defense a little more this year," She said. "We haven't had one yet, and our offense was geared to be a balanced attack," she said. Weiss, who is in her second year as coach at SIU, played college ball at the University of California at Santa Barbara. She is looking forward to a tough schedule. The first game for the team is away against the University of Missouri at St. Louis. "That will be a good game. We don't know that much about them, but they showed a lot of our opponents this year and did com­parably well, if that is any indication," Weiss said. "Our first home game against Memphis State will also be tough," she said. That game will be played in the Arena on Jan. 25 and is one of two the team will play there. The remaining home games will be played in Davies Gym.

Unbeaten ‘Canadian’ teams clash for floor hockey title

By Jim Misunas

The SIU Soccer Club ended its fall season Saturday with a 4-2 win over Southeast Missouri University. SIU was the first to strike on a shot by Ahmed Abbas that rebounded off the goalie and was driven in by Xenophon Xenophontos to give SIU a 1-0 lead. At halftime the score was tied 1-1, as SEMO scored near the end of the half.

In the second half SIU came out firing, scoring two goals in the first ten minutes. The goals came on Pulliam Hall, Arena, courts closed for break

Thursday night will be the last time the Pulliam Hall court will be open until the Middle Intercollegiate meet on Thanksgiving break.

The Arena will also close Thursday night and will reopen on Sunday morning.

The handball-volleyball courts will also close Thursday night but will be available at the recreation facilities at 8 a.m. Monday through Friday, and Saturday and Sunday.

To make court reservations call 535-5251 or 455-2360 after 3 p.m.

Anwar Haj’s perfect pass to Xenophonos who scored, and moments later Xenophonos gave Abbas a break away pass to make the score 3-1. Later in the second half (SEMO) scored to make the score 3-2. In the last few minutes Abbas scored SIU’s fourth tally on a shot, curving around the goalie to make the score 4-2.

Wirtz says Black Hawks will have new coach in ‘77

CHICAGO (AP)—The Chicago Black Hawks, back in the National Hockey League, are said to have new coach, Billy Wirtz being promoted to general manager and Bill Wirtz, president of the National Hockey League team.

Wirtz said recently that by next September long time General Manager Tommy Ivan will be named a vice president of the club, in his 13th season as coach of the Black Hawks, or would retire to the front office and be succeeded by an as-yet-unannounced man with NHL playing experience but not especially coaching experience in the NHL. Black, 56, has compiled a 341-176 mark in regular-season play to become the dean of NHL coaches.

SIU could not have won without the strong defensive play of forward Tom Guenther, halfback Muham­med Al-Saleh and fullback Aziz Shehab, Roy Inglis, John McKenzie, Erza Swearinger and Tim Zaharopoulos. Goalie Dick Aldrich allowed 3 goals on 31 shots.

With this win, the SIU Soccer Club improved to 9-6 for the season.

Wirtz said, "We feel we have the best general manager in the new business and the best coach in the business, but not at all embarrassed about what our club has done lately.

"We are just abiding by a timetable that we established three years ago, when we decided that next year would be the outside possibility of making a change. He said a move had been con­templated in 1973 but was shelved. Ivan, 61, would benefit from a change of jobs in that he has health problems, said Wirtz, adding that whoever follows Ivan as coach will be some 15 to 16 years younger.

He said four or five persons are being considered.

The pressure was the key factor for that loss, but we'll be out for revenge this year."

Soccer Club ends season with 4-2 win

By By Jim Misunas

The names are the same in SIU’s men’s intramural floor hockey final at 4 p.m. Thursday at Pulliam Gym. That’s because Canadian Club 19-0 and Team Canada 19-0 also met in last year’s intramural final which Canadian Club won 9-4 as center Paul Kasner scored five goals and forward Adam added three more.

For part, Canadian Club has won 36 games in a row enroute to three con­secutive intramural floor hockey titles. They need to be taken down a notch, "Team Canada Coach Tom Sidor said. Sidor said he feels that this year’s Team Canada team can defeat Canadian Club.

"We have 10 new guys in our lineup so we have a combination of team and in­dividual efforts," Sidor said. "The keys for us is to score first, and keep our penalties down."

Sidor said that in last year’s game Team Canada was hurt by penalties. "We’ve got to control the puck in the corners to get an advantage. We hope we can outshine them in the puck," Sidor said.

"I expect a low scoring game," Jim Arlington, Canadian Club coach, said. "Because both team’s defenses are strong.

"The team that gets the early lead will have the advantage," Arlington said. "But because the defenses are strong I feel that 4 or 5 goals will probably win the game," he said. Both coaches cited their respective defenses as keys to the outcome of the contest.

"Our defense has got to control the puck in the corners to do well," Sidor said. "We’ve also got to check them closely because if Canadian Club’s players get open they score."

"We get the puck out of our defensive zone pretty well," Arlington said. "If we play as well as we have in the playoffs we'll have no problem.

"Team Canada has a real good defense," Arlington said. "And if they hold our offense down they deserve to win. But we’ve only scored less than four goals once in four years," be said.

"Canadian Club’s biggest strength is their offensive shooting," Sidor said. "They have real good shooters, and even when our defences have scored occasionally, when the puck is on the outside of the floor hockey," he said.

Club won defeat Canadian Club, 4-2, Goals 5-4, and Delta Leopold 6-1 to advance to the finals.

Wirtz said, "We feel we have the best general manager in the new business and the best coach in the business, but not at all embarrassed about what our club has done lately.

"We are just abiding by a timetable that we established three years ago, when we decided that next year would be the outside possibility of making a change. He said a move had been con­templated in 1973 but was shelved. Ivan, 61, would benefit from a change of jobs in that he has health problems, said Wirtz, adding that whoever follows Ivan as coach will be some 15 to 16 years younger.

He said four or five persons are being considered.

The pressure was the key factor for that loss, but we'll be out for revenge this year."

Buck doesn't stop anywhere in money-crazy sports world

Editor's Note: Top professional athletes keep signing astronomical contracts and sports owners are looking around at the rising cost of athletic talent. It seems that the richer the teams, the higher the salaries. This has prompted a lot of discussion and debate about how to control costs and keep sports affordable for fans.

The only way to keep sports salaries down might be to lock up the owners' books. The buck stops at the top, but it also flows from there. Some owners of professional sports teams must blame someone for the high cost of athletic talent, let them point the finger at themselves.

"Who's going to protect the owners from themselves?" Marvin Miller, executive director of baseball's players association, once asked. He wasn't expecting an answer because there was none. Sports owners are businesses. They want to save money but they also want to win. And to win, they have to pay money. Lots of it.

"Can the players really get more than they're worth?" Miller asked. "Baseball is a business, a business of the one who are the owners who pay the players.'"

Earlier this year, Julius Erving, perhaps basketball's most exciting player, wanted to renegotiate his contract with the New York Nets. Roy Blunt, owner of the Nets in the American Basketball Association, had just paid a steep price to gain entrance into the National Basketball Association. He said he couldn't afford to pay Erving more money.

But talent is for sale, some owning team is always available. F. Eugene Dixon, the new owner of the Philadelphia 76ers who is rumored to be worth $120 million, was willing to pay the price. He gave the $3 million and Erving $2 million for five years.

Pete Stoller, vice president and general manager of the 76ers, said he had no trouble convincing Dixon to spend his money.

"I told him ticket sales, payroll, exhibition, game money, licensing, media income, cable television, novelty sales and sales of programs and yearbooks will pay for it," said Williams.

Baseball New York Yankees made a large investment in Catfish Hunter. In 1974, he gave him a five-year contract worth $5.5 million. The Yankees led the American League in attendance this year. They won the AL pennant. In the years Hunter has been with the club, he has won 46 games. "I don't think he's worth it," said Gayle Miller, president of the Yankees. "He got his money and we got ours.

The Hunter episode is very instructive for how sports owners operate. Hunter became a free agent because Oakland owner Charles Finley breached the star pitcher's contract. Representatives from a dozen teams journeyed to little Abbeville, N.C., to talk turkey with Hunter's lawyers, while 11 other clubs put in their bids by phone.

In 1973, the average sports salaries were $48,000 for major league baseball, $39,700 for the National Basketball Association; $26,000 for the American Basketball Association; $75,000 for the National Hockey League; $60,000 for the World Hockey Association, and $42,000 for the National Football League.

In comparison, policemen and firemen average less than $15,000 for 1973. The fallacy of comparing athletes' salaries with other professions is that it makes a stupid assumption, says Miller. "A ballplayer made less, would a teacher be paid more?" Absolutely not. If a ballplayer makes less, then the rich owners will make more.

The death of the World Football League proved that the public won't pay top dollar for an inferior product. It will pay to see a winner, even if the high salaries for the winning team ultimately get passed down to the fan in the form of more expensive tickets.

"Who is to determine what any group of people makes?" We make what the market bears," says quarterback Fran Tarkenton of the National Football League, who makes an estimated $1 million for three years from the Minnesota Vikings. "Should an athlete make a half million dollars a year or should Elvis Presley make a quarter-million dollars a night to sing?"

ABC television hired away Barbara Walters from NBC by giving her $1 million a year for five years. Many top business executives, thought to be the best in their field, make salaries over $200,000 a year. It's just that now the same economic theories have carried over to the athletic fields.

"Don't think athletes are overpaid," said Arnold Palmer, whose earnings on the U.S. golf tour are nearly $2 million.

"Look, if you're the best at what you do, all you have to do is ask, 'You think you're worth what you get?"
**Best record in years goes to grid winner**

*By Rick Korch*

*Daily Egyptian Sports Editor*

If the Saluki basketball team will play its last intrasquad game of the season against Missouri in St. Louis, there is a sliver of hope that some of the players may be able to face the Missouri team.

Tenace and Baylor

**PROVIDENCE, R.I. (AP) —** Catcher Gene Tenace and outfielder Don Baylor feel inside instead of just treating you as a game. It can't be luck, because in the past three games they've been behind-and-win-it-at-the-gun games.

As Rich Koster, once wrote, and I paraphrase: "I have no regrets about leaving, but the steady hand at the helm is the one who can give us the most flexibility will play the most."

Tenace goes to the San Diego Padres and Baylor to the Chicago White Sox. For both Tor four points.

**leave A's**

"We're beginning to see the light at the end of the tunnel—" Lambert said the team is a little but the players who can give us the most points, the players who can give us the most respect for the game. It is 't.'

Tenace and Baylor are a physical game and I didn't want to just say goodbye. They worry about trivialities such as setting up and throwing the ball with an overhand motion. Hart just waddles back into the game. It is the guts, but the steadying hand at the middle of a rebuilding program here.

There's still a lot of things to do, but the team is starting to tie things together," Coach Paul Lambert said. "We want to win and see the light at the end of the tunnel—is that a good cliche?"

"I think we need to have something further ahead in some things and a little better in others." Lambert said the team is a little behind in others. A change is in store for the final Saturday against Los Angeles. Paul Lambert said the freshmen: "We're the only one season in Oakland after being traded that same day." Lambert will play on one team, according to Lambert, will be a physical game and I didn't want to just say goodbye. They worry about trivialities such as setting up and throwing the ball with an overhand motion. Hart just waddles back into the game. It is the guts, but the steadying hand at the middle of a rebuilding program here.

**Cardiac Cards' are a weekly Hart attack**

*By Doug Durris*

*Assistant Sports Editor*

"Cardiac Cards." Busch Stadium has one crew of attendants whose sole job it is to roam the bleachers during the fourth quarter and remove with meat hooks any seats before they accumulate and block the view of other paying customers.

Terry Delaney, watching the heart and soul of the Cardinal's big-play offense, and the offensive line is the guts, but the steadying hand at the heart of the Cardinals' defense. Frazier has slipped from the limelight, due more to the ineptitude of his New York back team than to any erosion of his own skills. Hart is probably SIU's best known alumnus.

Hart still holds 16 SIU offensive records, including 12 passing marks and all records for interceptions. Hart twice threw six interceptions in a game and quarterbacks the Salukis. From 1962-1965, with Hart at the helm, the Salukis did not have a winning season. Their best record was 4-5 during Hart's sophomore year.

Hart tried out for the Cardinals in 1966 (he was not drafted by any pro team) and was signed primarily because the 250-pound pound kid from Southern Illinois could throw a football out of sight, just not supposed to happen like that. He still can. I've seen the best quarterback a few times.

As Rich Koster, once wrote, and I paraphrase: "I have no regrets about leaving, but the steady hand at the helm is the one who can give us the most flexibility will play the most."
