Income tax study finished, but no decisions yet

WASHINGTON (AP) — President Reagan got his first look Monday at the tax-simplification plan he ordered, but a spokesman said he was not expected to make any quick decisions on what could be the most drastic overhaul of the federal income tax system in its 71-year history.

Reagan and his top economic advisers were briefed by Treasury Secretary Donald T. Regan on the 10-month tax study. The treasury secretary is to review various options and recommend recommendations for how Cabinet members on Tuesday before he makes them public.

Reagan has said he favors a "modified "flat tax" system to replace the current tax code, which the president has called "inevitable, counterproductive and all but incomprehensible." A modified flat tax system generally would put individual taxpayers into lower tax brackets but would remove some popular deductions and credits. This means taxpayers would end up owing the government about the same or paying higher taxes in some cases.

One of the president's principal goals is to make the annual chore of filing tax returns easier for taxpayers. Another goal is to eliminate some inequities and make it possible for the government to collect revenues from people who pay little or no tax as an estimated $100 billion that circulates in what is called the "underground economy."

Treasury Department officials said the Reagan study, which the president ordered last January, was completed over the weekend. The president is expected to outline his final plan in the State of the Union address early next year.

Vote on natural gas price limitation challenged

By Lisa Eisenhauer

A Carbondale advisory referendum about government control of natural gas prices was a "political sham" and due to poor wording and influence by election judges, its results should be invalidated, Carbondale resident Linda Nelson told the Southern Illinois University Student Council executive council on Thursday.

"It was a "political sham,"" Nelson said. "I think it was a sham, but I was not sure it was legal." Nelson took her case to the Illinois Community Development Assistance Program and to a $25 million referendum package from the Department of Housing and Urban Development.

Nelson also said that the wording of the referendum was unfair and unjust to the city, and that neither poor wording nor persuasion by election judges can be used to challenge the results of the referendum.

Nelson's suggestions of ways to go about "cleaning up" voting procedures included requiring that elections judges go through training at least once a year, that in the future city referendum ballots exhibit "truthfully and completely" what is at stake and that the ballots be addressed to exactly whom the results will be sent.

In response to Nelson's comments, Mayor Helen Westberg noted that the city took out an ad in the Southern Illinoisan prior to the election describing both sides of the measure. Westberg also said that the referendum was only for advisory purposes and that voting procedures in the city are monitored by the county clerk and the county board, not the council.

Carbondale attorney John F. Gilbert, the council is responsible for the wording of questions put before local voters, Nelson said. She also said that a "political sham" was the referendum, which is under challenge by the Illinois Community Development Assistance Program and to a $25 million referendum package from the Department of Housing and Urban Development.

Westberg also said that the referendum was only for advisory purposes and that voting procedures in the city are monitored by the county clerk and the county board, not the council.

International council to hear complaints

By David Lass

The Undergraduate Student Organization Committee on Internal Affairs has turned its investigation of complaints against the International Student Council executive council over to an ISC advisory grievance committee.

The investigation was turned over after the ISC submitted an apportionment to the SIC outside council.

"If there is an allegation it should come first to the organization," ISC president Aris Kotsioris said. The complaints had never been registered with the ISC, he said.

The appeal was granted during the weekend before Thanksgiving break with several conditions, said John D. Rutledge, chairman of the USO committee.

"The Committee ..., is not relinquishing jurisdiction but has realized the inferiorty of internal solutions," according to a memorandum from the USO committee to the ISC.

One condition, as stated in the memorandum, calls for action on the charges to be completed by Dec. 3.

Two other conditions are that "the USO committee be allowed to observe the ISC advisory grievance committee meetings in a passive role," according to the memorandum, and that, after Dec. 3, "if the complaints are not adequately satisfied with the ISC grievance proceeding and solutions, the committee will resume the investigation."

Rutledge said that the USO committee will "be flexible."
Explosion near U.S. Embassy attributed to drug smugglers

Bogota, Colombia (AP) — A bomb believed to have been placed by drug traffickers exploded Monday under a car parked near the U.S. Embassy, killing a Colombian woman and wounding eight people, police reported. The attack came 12 days after Embassy officials reportedly received a threat from cocaine smugglers saying they would kill five Americans for each Colombian extradited to the United States to face drug charges. President Belisario Betancur has signed orders for the extradition of six Colombians to the United States to stand trial, but none has been extradited so far.

GM agrees to inspections for 3 million cars

Washington (AP) — General Motors Corp., heading off a possible government safety recall order, agreed Monday to call in 3.1 million mid-sized cars for inspection. It determined whether they have axles that might cause the rear wheels to separate. The action, involving 10 different 1978 through 1980 models, was jointly announced by the automaker in Detroit and the Transportation Department in Washington.

Tube draining fluid from chest of heart patient

LOUISVILLE, Ky. (AP) — A second tube was inserted into the left side of the chest of William J. Schroeder on Monday afternoon to remove fluid that was accumulating during his second day of life with a mechanical heart, doctors said Monday. The fluid in the lungs consisted of blood that remained after Schroeder's open-heart bleeding Sunday night and fluid that had accumulated in the chest from the surrounding tissue.

U.S. resumes diplomatic relations with Iraq

WASHINGTON (AP) — The United States, seeking to widen its influence in the Arab world, resumed diplomatic relations with Iraq on Monday after a 17-year lapse. The move was announced immediately after President Reagan met for 35 minutes with Foreign Minister Tariq Aziz, the highest-ranking Iraqi to visit here since the 1967 break. The administration said it was not endorsing Iraqi policies intended to arm the Baghdad government or to mean harm to Israel. Iraq had broke relations with the United States to protest American support for Israel in the 1967 Six-Day War.

Congressman arrested during demonstration

WASHINGTON (AP) — Rep. Charles A. Hayes, D-III., and a U.S. civil rights group leader were arrested at the South African Embassy Monday when they refused to leave the embassy during a demonstration protesting South Africa's recent arrest of 13 black labor leaders. Hayes and Joseph Lowery, were handcuffed and removed from the embassy by Secret Service agents after the embassy closed for the evening and the two remained inside. They were charged with unlawful entry, according to District of Columbia Police Lt. D.B. Thomas. He said Hayes and Lowery were the only protesters arrested.

Centrist scores victory in Uruguay elections

MONTEVIDEO, Uruguay (AP) — Centrist Julio Sanguinetti and his Colorado Party scored a decisive victory Monday in elections to replace a right-wing military regime that has been in power since 1973. The jubilant president-elect appealed for national unity as exhausted celebrants struggled home after a huge street party that was marred by confrontations between rightist and leftist youths. The country needs five years of combined effort to reinforce its democratic institutions," said Sanguinetti, a 46-year-old lawyer and political journalist, in a speech to supporters.

International Harvester plans to sell farm equipment business

CHICAGO (AP) — International Harvester Co., which traces its history to Cyrus McCormick and the invention of the mechanical reaper, is selling its farm equipment business in a $430 million deal aimed at salvaging a company tattered by labor troubles, the recession and debts in the billions of dollars. Tenneco Inc., a Houston-based company, will pay $260 million in cash and $170 million in preference stock in a transaction announced Monday and expected to be completed by next year. Evvester's farm operations will be joined with Teneco's J.I. Case Co. affiliate, headquartered in Racine, Wis. Tenneco has interests in gas, oil, insurance, and manufacturing.
Study of local waste site to begin in spring

By Jeff Curl
Staff Writer

A study to determine the degree of contamination at Crab Orchard National Wildlife Refuge's Sangamo toxic waste site will not start until spring, said refuge manager Wayne Adams. The area has been called the nation's worst federally-owned site. Owned by the Sangamo Electric Co., it has already shown to have polychlorinated biphenyls (PCBs) up to 25,000 parts per million, said Michael O'Toole of the Federal Environmental Protection Agency. PCB levels higher than 50 ppm is considered dangerous and must be disposed of in a hazardous waste landfill, O'Toole added.

Adams said the U.S. Department of Fish and Wildlife, which owns the refuge, will pass through a three-step bidding process before a study on the site can begin. The first step is to notify independent hazardous waste companies that an invitation for bids will soon appear in government publication. This is the stage the sangamo site is in now, Adams said. Next, the formal invitation will appear and finally bids will be due.

"Things are moving in the direction that we want them to," said Adams, who added that the bidding procedure usually takes between three and six months. "A realistic start for the study would be spring."

The study, called a Remedial Investigation Feasibility Study, will determine the kinds and amounts of waste contaminating the site and must be done before cleanup of the site is to begin.

The speed of the Fish and Wildlife Department's movement to clean up the site is "average," said O'Toole, adding that the bidding procedure is necessary but time consuming. He said the RFP's study will probably cost between $300 and $400,000 and will take 12 to 16 months to complete.

Back tax deadline is Friday

The deadline for paying back taxes under the Illinois Tax Amnesty Program is Friday. The Illinois Department of Revenue regional office in Marion will be open until 9 p.m. this week, except Friday when the office will stay open until midnight.

The office is located in the Regional State Office Building 2209 W. Main St. Marion.

George Lochasy, deputy regional administrator for the Department of Revenue, said response to the amnesty program has been greater than expected. He said the state has already collected more than the $2 million projected from program.

Forms for the amnesty program can also be picked up at the Carbondale City Clerk's office in City Hall, 609 E. College St.

World Court to hear Nicaraguan case

THE HAGUE, Netherlands (AP) - Rejecting a Reagan administration move to keep its Central American policy out of the World Court, the international tribunal agreed Monday to hear Nicaragua's complaint that the United States is sponsoring aggression against the Sandinistas government.

By its 15-1 vote to hear the case, the court decided against Washington's contention that Nicaragua is not eligible to bring the case to the court, and also refused a U.S. bid to exempt itself from the court's authority.

The court kept in force its emergency ruling of last May ordering the United States to cease any military actions against the Sandinistas, pending final legal resolution of the case.

The 258-page ruling Monday opened the way to full hearings before the World Court panel on Nicaragua's complaints of U.S. aggression.

But the court limited its jurisdiction in the case to violations of the 1956 U.S.-Nicaragua Treaty of Friendship, Free Commerce and Navigation, which specifies that any disputes arising from the treaty should be resolved at the World Court.

The World Court is backing Nicaragua anti-government rebels based in Honduras and Costa Rica, and the Sandinista leaders of Nicaragua have claimed that the United States is planning and "imminent invasion" of their nation.

Nicaragua termed the court's assumption of jurisdiction Monday a "moral victory," and called on the United States to abide by the court's rulings.

Former USO officer explains part of phone bill

By Karen Wilberger
Staff Writer

Stephanie Jackson, former Undergraduate Student Organization vice president, has explained some of the $767.83 worth of phone calls alleged to be of a personal nature, but she must still account for an "excess of $100" worth of calls, said Bruce Swinburne, vice president of student affairs.

Swinburne said that Jackson, who was graduated in May, has gotten a U.S. bid to exempt herself from the court's authority.

Stephanie Jackson, former Undergraduate Student Organization vice president, has explained some of the $767.83 worth of phone calls alleged to be of a personal nature, but she must still account for an "excess of $100" worth of calls, said Bruce Swinburne, vice president of student affairs.

Swinburne said that Jackson, who was graduated in May, has gotten a U.S. bid to exempt herself from the court's authority.

Swinburne, however, is still pursuing further explanations or reimbursements for unrecorded phone calls, which he said he believes are of a personal nature.

Jackson will be receiving another letter this week asking for payment or additional explanations, he said.

He said that Jackson, who has responded to earlier letters, has not answered the last letter sent on Sept. 13. "That's been long enough, it needs some attention."

He said unrecorded calls include calls to her hometown, of Wilda.Burne and to St. Louis. He declined further comment saying that "we are still dealing with question of fact."

Most of the calls were made to St. Louis, where her boyfriend and Jackson's roommate, which lasted for 145 minutes and cost $56. Several calls were made to Washington, D.C., New Orleans and Waukegan, according to the phone bill.

Swinburne said the calls to Washington, D.C. were either made to business-related organizations or to make arrangements for personal visits.

Some questionable calls, Swinburne determined, were not made by Jackson and have been written off. "We're not seeking reimbursements for some of those calls," he said.

A relatively private matter has become too public, he contended.

"Her concern is that there has been so much in the press," he said. "I indicated to her that I hope we could get it resolved."

USO President Andy Leghtton said the incident is "out of the ordinary," and Jackson may have gotten away with not paying a phone bill.

"But, if you were Stephanie Jackson would you come back to Southern Illinois University?" she's not exactly getting off scot-free if she's guilty or not."
When Michael Novak believed two years ago that some of the Catholic bishops were wrong in their opposition to American militarism, he bashed them as "extremists" who were just doing political and divisive. Apologetically, he said of the bishops who were then preparing a pastoral letter on war and peace: "Men and women of conscience will have to resist them with every force of intellect they possess. For the good name of Catholicism is also at stake.

Novak's alarmism—which was vested in no less than 12 articles in 1982—went for nothing. The following year, the bishops' anti-nuclear letter enhanced—not beamed —the name of Catholicism.

Novak, abashed with fiery talk about "the threat of Soviet military blackmail" and "U.S. strategic nuclear inferiority," made a case that a few bishops found either moral or rational. Since then, the hierarchy has gone on to establish peace-studies programs in their parishes and schools so that consciences can be shaped by both church teaching and reliable information.

HAVING FAILED to discredit the bishops, Novak now after Bishop Francis Arinze of Nigeria. He claims that the first letter of their draft on Catholic social teaching and the American economy, "goes far beyond the bishops' anti-nuclear letter enhanced—not beamed —the name of Catholicism.

Novak, abashed with fiery talk about "the threat of Soviet military blackmail" and "U.S. strategic nuclear inferiority," made a case that a few bishops found either moral or rational. Since then, the hierarchy has gone on to establish peace-studies programs in their parishes and schools so that consciences can be shaped by both church teaching and reliable information.

Novak did the recognizing for them. They shouldn't see this as a victory, as he told them. Last week a man hard to please, was pleased. He had produced a report that is called "An Intellectual Framework." In preparing their statement on the economy and the poor, the bishops were beset from more than 100 people. Being men of grace and intellectual, they must take priority over the rich, and the needs of workers over the maximization of profits.

That thought was a little regard by a commission that urges trust in the economy of the rich and sees goodness in their maximizing of profits. As an employee of the American Enterprise Institute, an $11.5 million-a-year conservative think-tank that receives funds from more than 600 corporations, Novak has been as busy as an altar boy as he sprinkles holy water in praise blessings on the economic beliefs of his patrons.

In a 1981 WERE called "Town and Country," he listed seven "signs of capitalism's "poverty." In these seven ways, corporations offer metaphor for grace, a kind of insight into God's ways in history.

Until Novak, no one, not even the U.S. Chamber of Commerce, went that far. The distance is even greater considering from where Novak started. In 1971, as a left-of-center, liberal, he was scouring corporations for signs of grace. They "divide one's personal conscience to one's corporate role. They divide one's creativity, imagination, vision, and performance for the company.

In those days, Novak had spent 12 years in a seminary, brimmed with zeal for an open church and an open society. He had produced a essay for Religion and Politics and wrote speeches for the McGovern campaign. He had a fixation back then on lecturing the rich. He had produced a book for the rich, "The logic of poverty."

That thought was a little regard by a commission that urges trust in the economy of the rich and sees goodness in their maximizing of profits. As an employee of the American Enterprise Institute, an $11.5 million-a-year conservative think-tank that receives funds from more than 600 corporations, Novak has been as busy as an altar boy as he sprinkles holy water in praise blessings on the economic beliefs of his patrons.
Vogel leads calisthenics at Tumbletown Gymnastics, where she teaches four days a week.

Vogel knows how difficult it can be. She tried out for the Olympics in Chicago in 1962. Vogel said she took twelfth place, and only eight were selected for the final tryouts in Philadelphia.

Today she dismisses her narrow call to fame and glory with a good-natured shrug of the shoulders. “I guess it was just an off day for me,” she said.

Fame didn’t entirely elude the young Vogel though. She recalls the feature photo that Sports Illustrated published 25 years ago, titled “Blondes on the Beam,” featuring her on the balance beam. Vogel said she was pregnant with her fourth child when the picture was taken.

Toy drive helps needy give presents to children

By Sarah Robrs
Staff Writer

Christmas is the time for giving, as holiday commercials say over and over again. For those who don't have the money to buy gifts for their children, Christmas Day can be a sad occasion, as holiday commercials show. The toy drive sponsored by the University Mall and the Air Force ROTC is helping needy families give their children presents this Christmas. The sponsors need help as well, with donations of toys or money to be used to buy presents for children. Edie Crane, marketing director of the University Mall, said that the toy drive began the day after Thanksgiving, and will continue through Dec. 16, although the coordinators of the toy drive have been taking orders for toys for several weeks. Thursday through Sunday, a table will be set up near the front entrance to J.C. Penney at the University Mall and will be staffed by ROTC volunteers. During the week, orders should be taken to the main office of the University Mall, near the public restrooms. Crane said. People can also send tax-deductible cash donations to the main office in the University Mall.

"We are looking for new or lightly used toys, but we will take anything that is in good condition," said Janet Lorenzana, toy drive chairwoman. The mall does not have the facility to clean or repair toys, she said. "People don't need to feel they have to give expensive toys," Lorenzana said.

"When a child doesn't have anything, a small toy means a lot," added Crane. People who can not afford toys for their children can call the main office at the mall, 329-3683 or the toy drive table, 457-7011, from 8 a.m. to 5 p.m. weekdays. The appropriate gifts will be matched to the child's age and sex. Lorenzana said that the coordinators of the toy drive have been taking orders for toys from children in the last 35 days. Now it may take up to a week to get the problem checked. Before the program started, students would go to the emergency room and if the doctor determined that the visit was not an emergency, the student was responsible for the bill. "If we send a student, even though the emergency room doctor said it is not an emergency, we still pay 90 percent of the bill, except for something that is pre-existing," said Holly. The Health Service has six full-time doctors and a psychiatrist. Holly said that students without an appointment who really needed to see a doctor during clinic hours can come through the emergency door.

When the program started in 1983, 46 calls were received the first year. Now, it may take up to 45 calls a month, Holly said. It may be in the process of gathering data on the time of the calls, when the students live, sex, reason for calling, if they'd ever been to the Health Service and where they heard about the program.

"We want students to feel confident in calling, no matter what the reason or how insignificant they think it is. We want them to know we are available," Holly said.

LIVE STAGE PRODUCTION
A SOLDIER'S PLAY
Pulitzer Prize Winner

The original Broadway version of the Pulitzer Prize winner—A Soldier's Play—has been hailed by critics as a dramatic masterpiece. On a hot summer night in 1944, Sgt. Vernon Waters is murdered in cold blood. A special investigator finds that to unmask the killer he will first have to unlock the secrets of the dead man's last words: "They still hate you!"
Fermi lab director to lecture on inner space, outer space
By Susan Sarkauskas
Staff Writer
Leon M. Lederman, director of the Fermi National Accelerator Laboratory near Chicago, will inaugurate the SPU Distinguished Lecture Series with a lecture on "Inner Space, Outer Space" Wednesday night. The lecture, which is free and open to the public, will start at 8 p.m. in the Student Center Auditorium.

Lederman, winner of the 1965 National Medal of Science, is a specialist in high-energy physics. He is presently seeking the National Medal of Science. is a specialist in high-energy physics. He is presently seeking the National Medal of Science. The lecture will be presented in McLeod Theater the next semester, will be held at 7:30 p.m. Nov. 28 and 29 in McLeod Theater in the Communications Building.

"The Member of the Wedding" is a serious and touching drama about the painful experience of growing up. It explores a young girl's need to belong in the world and her relationship to Bernice, the family's black cook, who acts as a substitute mother for the girl.

Parts are available for two black men, two black women and one white male who can play a very young boy.

No special preparations are necessary for the auditions. Actors will read scenes aloud from the scripts, which are available in the office of the Theater Department. More information is available by calling 529-2262.

TUESDAY MEETINGS: Journalism Students Association, 5 p.m. Communications 1246; Pi Sigma Epsilon, 7 p.m. Lawson 221; Jackson County Board of Health, 7:30 p.m. Jackson County Health Department office in Murphysboro. Tossed cigarette causes grass fire

Carbondale firefighters responded to a grass fire call in Thompson Woods on the SIU-C campus Sunday afternoon, a fire department representative said.

The representative said the fire involved dry grass and leaves near a foot path near Morris Library and was started by a discarded cigarette. The fire department received the call at 2:30 p.m. and was at the scene for about a half-hour.

The representative said the fire caused minimal damage.

Slang comes from different groups, prof says

By Belinda Edmondson
Staff Writer

Charger that the Sandinista government in Nicaragua might be planning to invade El Salvador or Honduras are "absurd," says Cass Van Der Meer, a graduate student in political science who has been studying the nation since its revolution began.

Van Der Meer said it would be outrageous for Nicaragua to take such a step when its international problems are so great and so much world attention has been focused on it. "They're having enough trouble with the contras," Van Der Meer said, referring to the American-backed rebels who oppose the Sandinista government. "And, at this point, if someone threw a stone across the Honduran border it would be an international incident."

She said she also doubts reports that Nicaragua is receiving weapons from the Soviet Union that are beyond its normal defense needs. But even if it is, Van Der Meer said, it would not be an unachievable action to be taking if Nicaraguans believe that the United States, "the most mighty powerful country in the world," is about to invade them.

A five-week stay in Nicaragua during July and August of this year showed her that most of the people support the Sandinista government, Van Der Meer said. Even of those people who did not support the government "there wasn't anybody that was supportive of the contras," she said.

Since taking over in Nicaragua, Van Der Meer said, the contras would not exist if they had not been supported by the United States and, Van Der Meer said, as long as the contras are receiving aid that will be very hard for Nicaragua to establish an economy of its own. "If there is not going to be an invasion I would suggest that the United States is just using it to hurt Nicaragua's economy," she said.

Children participate in arts program

By Paula Buecker
Staff Writer

The SIU-C Student Center was the site of a great deal of fun for many disabled and non-disabled children Nov. 15, thanks to the sponsors of a Very Special Arts Festival program.

The program, coordinated by the Illinois State Board of Education and the National Committee on Arts for the Handicapped, gives disabled and non-disabled students the opportunity to show their creativity through the arts. In its seventh year, the festival has been held at several educational facilities throughout the state, including SIU-E and Illinois State University. The stop at the Student Center was the first for SIU-C, said VSAF chairman Susan Swisher.

Throughout the second-floor Ballrooms and River Rooms, students from local schools for the handicapped found about 20 ways to show their creative talents, from puppetry and cookie decorating to drama and button-making. They also had the opportunity to watch the SIU-C Theater Guild’s presentation of “Jack and the Firebird,” an original play by Tim Bryant.

The people who shared their artistic talents with students from schools such as the Anna Mental Health and Development Center and Cobden Grade School were, for the most part, volunteers from SIU-C organizations and groups from surrounding communities. Other people and groups, including weaver Pat Ryan and Story Enterprises, also took part in the festival.

Francine Farina, co-coordinator of Story Enterprises’ participation in SIU-C’s fest, said that the storytellers organization is part of a county outreach program and that students involved are taught in “the oral tradition of telling folk tales.”

While most of the artisans who took part in the VSAF were grade school students, several disabled SIU-C students also showed their talents by displaying their own works of art.

Greg Gizewski, junior in fine arts and advertising, said he volunteered to display his work in blockprinting because of his handicap. “Even though I’m disabled and use a handbrace and wheelchair, I wanted to show that I can still get around and do just as much as the others here at the school.”

Nicolette Morrison, 7, from SIU-C’s surrounding communities.

A group of handicapped children watch “Jack and the Firebird,” a play performed by the SIU-C Playwrights’ Theater.

Lewis School in Carbondale was wearing an “I love you Mom and Dad” button she had made. She said that the best thing she did all day was the art. And Chris, a student from Cobden Grade School, donned a “Chris the sheriff” button. He said that he was going to take home all the things he had made and “show them to my mom and then put them in the window.”

Roy Abrahamson, SIU-C professor in art education and history, said that because of programs like the VSAF, “students are exposed to art. And that makes it worth doing again.”

Sheila McCarthy and James Turner from Washington School have fun at the clay table.
Identity of comatose girl mistaken

SIOUTH CITY, Iowa (AP) — Former state education commissioner and officials thought Patricia Noonan had been killed and her friend, Shawn Lake, seriously injured in a crash that also killed Lake’s sister. Then the injured girl awoke from a coma and confronted her families by saying, “I’m Patsy, Patsy, Patsy.”

Officials said Monday they were trying to determine how the identity of the three-year-old girls had become so confused. Miss Lake’s mother kept a place beside the bed in the comatose girl without realizing it was not her daughter; while the Noonan family held a funeral for the girl they thought was their daughter, and even viewed her body.

“She (Mrs. Lake) sat by her side for two weeks and I don’t know why she didn’t realize it was Patsy,” said Mrs. Boyd McFarland, who is Noonan’s grandmother.

“We’re really stunned,” she added. “We’re so happy for our family, but we feel so badly for Mrs. Lake.”

An Iowa Highway Patrol spokesman said police confirmed through fingerprints Monday that the girl in the hospital was Patricia Noonan, not Shawn Lake.

Three people were killed and FAA: STC has plans for school
Continued from Page 1
accommodate classrooms, dormitory rooms, offices and food service facilities.
Gilbert said contruction of additional wings to the building and the purchase of more property would also be necessary.

The FAA estimates that a training school would generate more than $5 million a year for the community that receives the contract. Between 50 and 70 service jobs would be created, according to FAA figures. The school would also require a faculty of up to 75 teachers.

Franklyn Moreno, Carbondale Director of Economic Development, said there is a potential for the SIU-C School of Business and other academic units to become involved in the school.

“The University sees this an expansion of its mission,” he said.

GRANDMA: Tots learn to tumble
Continued from Page 5
“I was 27 years old, still competing nationally and had three kids by then. Nowadays, my God, that’s unheard of,’’ she exclaimed. Today gymnasts enter the sport much younger and are usually considered past their prime by their mid-30’s, she said.

AS IF TUMBLING weren’t enough to keep her in shape, Vogel runs four miles a day, teaches two aerobic exercise classes a week at Great Lakes, competes in regattas and rows a boat on Crab Orchard Lake in her spare time.

Although she says she likes to do it for fun, she enjoys it so much she plans to keep at it even after she retires. She’d always wanted to have a chain of fitness centers along the Ohio River or be a fitness director on a cruise ship,” she said.

Vogel, of German descent, says all the fun comes from her mentor Turner’s slogan: A sound mind is a sound body.” Always loved that,” she said. “If you’re physically fit, you’re mentally fit.”

16 were injured when a school bus carrying the Aurora High School girls basketball team collided Nov. 10 with a car near Aurora.

Police originally identified the victims as Lewis Lake, 42, of Primghar; John Noonan, 45, of Harlan and Noonan’s daughter, Patricia. Authorities said the Miss Lake was taken to Marian Health Center in Sioux City.

Lt. Jim Hein of the state Highway Patrol said parents established a tentative identification of the crash victims from information available to them at the scene of the accident.

But he said in a prepared statement that later, “members of each family claimed the bodies, made identification and completed the funeral arrangements.”

“Neither of the families were well acquainted, therefore neither had seen the other girl before,” the statement said. “Both girls were the same age, similar build, same hair color and same age, making the identification doubly difficult.”

“I think it’s very interesting that family members and other people didn’t notice,” Krystofak said. “I am surprised it was attended the first day or at least the first week.”

Krystofak said Miss Lake’s face was bruised and swollen.

At Zantigo, great taste comes out because the great things go in.

All it takes is one very bite of any of our crispy Zantigo Taco or flavor-packed Torn Burrito to taste zesty Cheese Chilito™ for you know Zantigo is food special. It’s special because we make our quality Mexican food the way you want—tasty, fresh and fast. We start with the finest quality ingredients, like fresh produce, real cheddar cheese and sour cream, and seasoned ground beef we cook ourselves.

At Zantigo nothing is pre-frozen or made up in advance. We make our food items only when you order, according to our own special recipes. And we serve them up right away with your choice of tasty sauces.

Come on in to Zantigo or use our drive-thru and taste what you’ve been missing. Use the coupons to enjoy special savings while you enjoy the great taste.

Improved job market predicted for engineering, sales grads

By John Dyslin Staff Writer

The job market is better now for college graduates than it was a couple of years ago, said John Schermerhorn, director of the Career Planning and Placement office. Although employment opportunities are still not that great, the economy is better and there are signs it could get better. "I am optimistic," said Gray. The effects of technology on the economy and the rapid changes it causes make it difficult to predict the future, Gray added.

There are many indications of more opportunities for college graduates. Employment in high-technology fields is predicting a better year. The outlook should be improving by spring and next year will be better, Gray said, but there are pitfalls.

Gray said the best markets are most engineering fields, technology areas, accounting and retail sales. Michael Murray, director of SIU-C’s Career Placement Office, said the job prospects for students in most engineering fields are quite good. He said electrical engineering is currently the strongest and "gradable graduates have many opportunities for students. Civil engineering, civil engineering technology and mining engineering are especially coal mining, are struggling. Murray said there is little recruitment on campus and coal mining is very depressed right now so those students will have to look outside of the area. Gray said companies are becoming more selective in choosing possible employees. He said recruiters look at the personal characteristics such as communication skills - both verbal and writing, work experience, if that person is an active member of an organization, the appraisal of the interview and appearance, and if there is any thought by that person as to what he or she wants to do. In addition, he said recruiters are placing more emphasis on grade point average and some recruiters consider only those with a minimum of a 3.0.

The job market is getting better, Gray said, but there are areas that are still struggling. Murray said that civil engineering and accounting are strong fields, but electrical engineering is quite strong.

Uniting farmers, communities
is Illinois South Project goal

By Jim Ludeman
Staff Writer

The scene is a farm. A family has received the notice that foreclosure is imminent. A non-farmer family has received the notice from the FmHA about the loss of their home. The notice gives them very little time to pay their loans or else the FmHA or their mortgage company will repossess the property. The notice is a result of the real problems facing farmers and non-farmers alike.

Such problems facing farmers, and the lack of recent efforts by the Illinois South Project, said Rakha. It was her primary reason for wanting to participate in the project.
The ISP is doing research on the FmHA, its lending records and the delinquency rate on its loans.

"The FmHA has been called the lender of last resort. It lends money to farmers who can't get loans anywhere else," Rakha said.

One aspect of the ISP research deals with how many loans are granted considering the amount of loans requested, she said.

For example, Rakha cited the farm owner's loan, one of the largest granted. In 1980, the FmHA granted 28 percent of the loan requests that came from this area, she said.

Rakha said that ISP statistics show that the situation is bad for any other farming state. Bankruptcies increased 91 percent from 1983 to 1984, she said.

In the 16 southernmost counties, we lost 425 farms from 1970 to 1982," Rakha said.

"Nationwide, we lost 1,000 farms per week," she said.

Some of the reasons for the problem, Rakha said, are low prices and the decline of land value. "When prices were up, the farmers were encouraged to take more land and to take out higher loans. Now they are in debt because of that," she said.

"The government is constantly trying to help the farmer. A lot of it is cosmetic action, though," she said.

She used the payment-in-kind program, which pays farmers not to use all their land for crop growing, as an example of "cosmetic action." In this program, the government pays the farmer not to plant on all his land, she said. The farmer makes the rest of his land more productive, produces almost as much, and the problem of too much farm products is back again, she said.

The ISP is trying to help farmers by researching the FmHA, and make farmers aware of what's going on in their area, Rakha said.

"Farmers don't admit to financial problems until they're on the brink of foreclosure. When a farmer does call us for help, we refer him to lawyers that can help out and to other farmers who have had the same problems," she said.

The ISP is also trying to work with entire communities, and getting the farmers to talk with other community members.

The value of uncovered motorcycles and other vehicles, increased tenfold, from $140 million in 1970 to $1.4 billion in 1980. The report repeated long-standing warnings to lock cars, noting that one of five stolen cars today has the key in the ignition.

Non-farmers who live in farming communities need to know how the problems effect them, she said.

When small farms go bankrupt, they are usually bought by national farm corporations, she said.

"Statistics show that communities in an area like that usually go downhill," she said.

The communities go downhill because the national corporations don't buy anything in that town, she said, so the ISP is trying to get communities to help farmers, by doing such things as putting a lid on prices at the local stores, and getting the whole community together on the problems.
The ISP is also going to be lobbying for a corporate farm bill in 1985, she said.

"This would force corporate farms to report on the acreage they own," she said.

The ISP would also like to see Illinois place restrictions on the land corporate farms are able to own, Rakha said. Eleven other states have such laws, she said.

With such problems as these, Rakha said "Country" was an accurate portrayal except for its ending, where the farmer is granted a deferal on his loan payment.

"The process to get a deferral is long and hard, and 99 percent of the time the FmHA says no. Then that answer has to be appealed," she said.

The ISP is more than willing to give out information about the farming problems, which Rakha said is very real, and has far-reaching effects.

Auto thievery business is thriving

WASHINGTON (AP) — Four of five stolen cars are left unlocked by their owners, but a federal report says that locking up is becoming more futile as auto thieves become more professional.

In fact, the professionals have edged the juvenile joy riders out of position as the primary vehicle thief, and the chances of recovering a stolen car have taken a dive from 84 percent to 55 percent in 10 years.

The report, titled "Vehicle Theft Prevention Strategies," advocates new laws and new procedures by state governments, police, insurance companies and even wreckers to stem the vehicle theft business.

"Vehicle theft is no longer a matter of juvenile joy riding," according to the report prepared by Abt Associates, Inc., for the Justice Department's National Institute of Justice. "People under age 18 accounted for 56 percent of the vehicle thefts arrested in 1970, but only 40 percent by 1981."

"This is increasingly becoming an adult crime involving gangs making enormous profits," James K. Stewart, the institute director, said Sunday. "About 1 million major vehicles are stolen in this country every year, costing us an estimated $5.5 billion." The report said that increasing adult involvement, increasing thefts of trucks and commercial vehicles, and declining recovery rates are strong indicators that vehicle theft has become the province of professional criminals.

In 1970, passenger cars comprised 91 percent of stolen vehicles; trucks, 7 percent; and motorcycles, 2 percent.

African famine continues despite aid

By James R. Peipert
Of The Associated Press

ADDIS ABABA, Ethiopia (AP) — The haunting television images of skeletal, starving Ethiopians burst suddenly onto the world’s consciousness, triggering a flood of sympathy and aid.

But as the images fade, the specter of mass starvation continues to stalk Ethiopia and more than half of the rest of Africa’s nations. Some experts talk of one of the greatest calamities of modern times in the making.

It is not a problem, they say, that won’t go away once the generation of Africans.

I’m a little bit scared, said B.

The rules of safety for travelers in Europe are the same as in the United States. Suggestions are to carry travelers checks, keep a passport right away, and to avoid walking the dark streets of Europe. Coracy said most students she has sent to Europe have traveled with Eurailpasses once in a while. Most hotels are booked by noon. Waiting until the sun goes down could be a problem.

A Eurailpass gives you access to 16 Western European countries without excluding British, nations, which have a similar train pass called Britrailpass.

YOUTH Hostels are the absolutely cheapest sleeping accommodations, with the exception of the night trains snoozing on trains by diehard travelers. YouthHostels, somewhat like dormitory rooms, are often extra rooms in somebody’s house. The cost could be as low as a few dollars per night depending on the location. Best and Breakfast (B and B) inns, a little more expensive than youth hostels, are also an inexpensive way to spend a night. The breakfast included in the price could be a cup of coffee or a full breakfast, depending on the inn and the country.

Common sense makes the difference between adventure and disaster in Europe. Travel experts say visitors to Europe should realize what they are getting into. This type of trip isn’t for everyone, and travelers have to be prepared for surprises.

Eurailpasses may not be a good buy if a traveler wants to see only a few areas in Europe. It’s cheaper to buy individual train passes once in Europe to do traveling in nearby areas. Many travelers attempt to see everything from the tip of Scandinavia to the tip of Greece, and they do — through the windows of a train.

THOSE WHO don’t think they can or want to rough it every day might consider bringing enough money to stay in a hotel and eat at an elegant restaurant once in a while. Most hotels are booked by noon. Waiting until the sun goes down could be a problem.

New program discourages truancy through counseling

By Joyce Vonderheide
Staff Writer

Getting children back to class is one goal of truancy programs. Another is to address the underlying causes of truancy, said Donald Stricklin, regional superintendent of schools for Jackson and Perry counties.

The Illinois School Code states that a truant is "a child subject to compulsory school attendance and who is absent without valid cause from such attendance for a school day or portion thereof."

Valid causes include illness, death in the immediate family and family emergencies. Children who are hamburged about a home without valid cause for 10 of 40 consecutive school days are termed chronic or habitual truants.

Stricklin said the truancy rate in his region is about 5 percent. Although statistics indicate yearly increases, truancy hasn't increased. He reported and availability according to the Illinois State Board of Education.

Although statistics indicate yearly increases, Stricklin said truancy hasn't increased. He said statistics are more accurate because of improved reporting and availability of truants. The program, in operation in Illinois since October 1983, encourages counseling to solve problems leading to truancy. He said response to the program has been positive.

Stricklin said he is surprised that, of about 80 families contacted last year, only two refused counseling. Most were responsive and accepted the suggestion, although not all completed counseling.

From Oct. 1, 1983 to June 30, 1984, 97 students were referred to the program, 79 participated and 40 received counseling, according to a report by Stricklin. The reduction between referral and participation may be due to families leaving the school district or parents refusing to let a social worker see their child.

About 40 percent of truants in Jackson and Perry counties were 10 to 13 years old and about 30 percent were 14 or 15 years old.

Prior to implementation of the new program, when Stricklin received a truancy report from a school official, he sent a letter of non-compliance to the child's parents, informing them that their child must attend school by a certain date or face the after the letter was mailed -- and continue to attend regularly. Stricklin would report the parents to the state's attorney's office. This program was "not terribly effective," he said.

Under the new program, two kinds of reports can be filed. One is designed to point out potential truants and refer them for counseling. School officials who believe it is in the best interest of a child to have counseling -- perhaps because his or her older siblings were chronic truants -- may make a referral to Stricklin. The second report involves chronic truants.

In both cases, a social worker contacts school officials for more information before visiting the home to discuss the child's truancy or potential truancy. The social worker asks for consent to work with the parents and the child and determines what supportive services, such as guidance and counseling, will be most helpful to remedy the truancy.

There are as many reasons that a child doesn't attend school as there are reasons that a child does attend, Stricklin said. Sometimes older children are discouraged when they have fallen behind academically and see dropping out as an alternative. Another cause for truancy may be poor peer relationships.

SIU-C education professor dies

Richard M. Thomas, SIU-C professor of community development and higher education, died Monday at Memorial Hospital in Carbondale. He was 65.

Mr. Thomas, of Carbondale, joined the SIU faculty in 1966 as director of the Community Development Institute. Two years later he was named director of Community Development Services, a post he held until 1974.

He had received national recognition for his work with Indian communities in the American Southwest and for developing villages in India and Africa. He wrote more than a dozen book chapters and journal articles on the theory and practice of community development.

Before coming to SIU, he helped governments of Kenya and Rhodesia in their community development efforts as a specialist with U.S. Agency for International Development.

He is survived by his wife, Barbara Benson Thomas; two daughters, Laurel Thomas-Witt, of Montville, N.J., and Rebecca T. Galmon, of Thomas, of Redding, Calif.

A memorial service will be held at 3 p.m. Sunday at the Student Center Auditorium.

Amnesty program funds may be given to schools

"CHICAGO (AP) - Illinois' tax amnesty program has collected more than $22 million, and state officials say they will ask the Legislature this week to use all the amnesty money for schools.

Under the Illinois program, tax amnesty is available between Oct. 1 and Nov. 30 for individual and business tax owners who have failed to pay before July 1, 1983. "Nov. 30 is the last day," said Secretary of State Paul Rock, who announced the program last June. "After that, there will be no more Mr. Nice Guy. Our tax laws are more than a penal code; increase dramatically, and we are ready to use this collection tools to the fullest extent possible.

Senate President Philip Rock and Education Chairman Arthur Berman said they will ask the Illinois Senate on Tuesday to use all the money collected in the amnesty program for schools.

Rock, who announced the amnesty program at a news conference Sunday, said he hopes the plan will be a deterrent to the threatened Dec. 3 strike by Chicago teachers.

Rock, however, cautioned that the proposal may be viewed with skepticism by the state's 10,000 local school boards. "I am not saying I will not being to close that door," he said.

Berman said a report he prepared in late November was made available in June. $30 million of the anticipated revenue from the tax amnesty was efficiency, state schools.

Senators and others have been working with the state's auditor general to get the money out to schools as soon as possible.

Rock, however, cautioned that the proposal may be viewed with skepticism by the state's 10,000 local school boards. "I am not saying I will not being to close that door," he said.

Berman said a report he prepared in late November was made available in June. $30 million of the anticipated revenue from the tax amnesty was efficiency, state schools.

Senators and others have been working with the state's auditor general to get the money out to schools as soon as possible.

Crisis confronts college football as BYU aims for national title

By the Associated Press

There is a crisis at hand in college football and the only people who can do anything about it right now are the Wolverines of the University of Michigan.

That's 6-5-Michigan.

On Dec. 23, Michigan travels to California - not to Pasadena and the tradition-laden Rose Bowl, the target of every Big Ten team - but rather to San Diego for the more modest Holiday Bowl, a few notches and many dollars below the major postseason games.

Across the field that day, the Wolverines will find the Cougars of Brigham Young University, unbeaten Brigham Young University.

No. 1, Brigham Young University.

Now, if BYU and its formidable offense away air attack beats Michigan that day, the Cougars may be expected, quite justifiably, to claim the national championship for their very own, based simply on having assembled the best record in the land.

Dissenters will argue that BYU comes from the Western Athletic Conference for goodness sake, and few can possibly have a national champion from the WAC, with its less than august athletic tradition.

The fact remains, though, that the Cougars will have beaten everybody on their schedule. Go with that, Nobody's beaten them. Who's better than them if you're No. 1 and you don't lose a game after reaching that pedestal, then you should remain No. 1.

And, if BYU wins in the Holiday Bowl, then where does that leave the New Year's Day bowl games, when this business of who really is No. 1 usually is decided once and for all each season.

But it all could be quite moot by then, unless, of course, Michigan jumps to the defense of major college football and upsets these upstarts from Utah.

A victory by the Wolverines would throw the whole thing wide open on New Year's Day and the bowl folks would delight in the debate over who's got the best matchup to produce a new No. 1.

The Cotton Bowl would argue that it has flamboyant Doakie Flutie and 8-2 Boston College, which plays the survivor of the Southwest Conference, Texas or Houston. The winner of that game will have lost two games this season.

National champions hardly.

The Sugar Bowl has 9-2 Nebraska against theSoutheastern Conference representative, Auburn or LSU. Nebraska blew the Big Eight title by losing to Oklahoma and had bowed before that to Syracuse. Whoever the Cornhuskers play will be also-rans in the SEC, replacing conference champion Florida, which was barred because of its eligibility problems.

Those are not national championship credentials.

The Orange Bowl has Oklahoma, 9-1-1 and Washington, 16-1. The winner will have one loss blemishing its record. Oklahoma was beaten by otherwise ordinary Kansas, and Washington, remember, would be in the Rose Bowl representing the Pac-10, if it had won its conference.

Suppose the Huskies win this game. Could you have a national champion who hadn't even won its own conference hardly.

The Rose Bowl has USC, 8-3, with consecutive losses to UCLA and Notre Dame, against 9-2 Ohio State. Not exactly national championship stuff there, either.

Now you know the burden Michigan is lugging along on its trip west, and just who the folks in Miami, Dallas, New Orleans and Pasadena will be rooting for on Dec. 21.

Judge ends Bulls case with Fishman

CHICAGO (AP) - A federal judge has ruled that Milwaukee real estate developer Marvin Fishman, who won a $12 million anti-trust judgment against the owners of the Chicago Bulls, isn't eligible for punitive damages in the case.

Fishman, who sued the owners of the National Basketball Association team 10 years ago for allegedly thwarting his efforts to buy the club in 1972, was awarded $12 million plus attorney fees by U.S. District Judge Stanley J. Rozanski on June 22. It was not clear at the time if Fishman also stood to collect $4.5 million in punitive damages.

But in a six-page opinion filed last week, Rozanski said that Fishman could not collect both $12 million in anti-trust damages and $4.5 million in punitive damages.

Fishman, 56, who helped found the Milwaukee Bucks of the NBA, tried to buy the Chicago club for $3.3 million, but he said the late Arthur Wirtz, who then owned the Chicago Black Hawks hockey team and the Chicago Stadium, refused to give him a chance to win.

The stadium was the only place at that time where pro basketball could attract large crowds, and because he did not have a suitable place for the Bulls to play, the NBA rejected his purchase bid, Fishman said.

A group headed by Wirtz then purchased the Bulls.

Other current owners of the Bulls include New York Yankees owner George Steinbrenner, and Phillip Klrtnick, who served in the Carter administration as secretary of commerce.

Ditka remembers 'Papa Bear' as Bears clinch NFC Central

By The Associated Press

In a moment of triumph, the Bears' first title of any kind in 21 years. Coach Mike Ditka's thoughts went back to Chicago's rich football past. He remembered Papa Bear.

The year was 1963. The Chicago Bears were coached by George Halas and one of their better players was a tight end named Jim Case. They won the National Football League championship.

Another division title was wrapped up Sunday as the San Francisco Forty-Niners crushed the New Orleans Saints 35-7 to win the NFC West title.

Two other divisions remained close as the season finished its 13th week.

The Seattle Seahawks beat Denver 27-24 to tie in the AFC West at 11-2 and break the Broncos' 10-game winning streak.

In the NFC East, the Washington Redskins beat the Buffalo Bills 41-14 and New York Giants rallied to edge Kansas City 36-35 to tie them with Dallas at 8-5 atop the division. St. Louis, 7-6, remained one game behind with a 17-14 victory over Philadelphia.

In other games Sunday, Pittsburgh crushed San Diego 52-24. Cincinnati beat Atlanta 35-14, the Los Angeles Raiders defeated Indianapolis 21-7, the Los Angeles Rams edged Tampa Bay 34-33 and Cleveland downed Houston 27-10.

Steelers 52, Chargers 24

The Steelers maintained their two-game lead in the AFC Central and scored the most points in an NFL game this year as Mark Malone made a complete recovery from the concussion he suffered last Monday night. Malone connected with John Stallworth on three touchdowns and threw a fourth scoring pass to Louis Lipps as he completed 18 of 22 attempts for 232 yards.

In the Los Angeles offensive show was San Diego's Turk Schonert, making his second consecutive start in place of Ken Anderson, completed 11 of 12 passes in the first half as the Bengals took a 21-0 lead and never looked back. On the game's fourth play, Schonert and wide receiver Eric Dickerson combined on a 57-yard touchdown.

Raiders 21, Colts 7

Marc Wilson threw two touchdown passes and ran for another score as the Raiders, 9-4, kept alive their chances for the second AFC wild-card berth.

Indianapolis 4-9, did not have the ball in Los Angeles territory until the third quarter, and that was on a recovered fumble.

Bills 41, Denver 11

Paul McDonald threw three touchdown passes and Matt Bahr kicked two field goals as Cleveland snapped Houston's two-game winning streak.

The Seahawks' offensive show was San Diego's Turk Schonert, making his second consecutive start in place of Ken Anderson, completed 11 of 12 passes in the first half as the Bengals took a 21-0 lead and never looked back. On the game's fourth play, Schonert and wide receiver Eric Dickerson combined on a 57-yard touchdown.

Williamson keys men gymnasts

By Stan Coff
Staff Writer

Saluki gymnast Lawrence Williamson made it two in a row with a second straight national championship at the Windy City Invitational tournament in Chicago on Nov. 16. He posted a floor exercise title at 9.00 mark with score of 66.95 on the floor exercise, Luttmerman added scores of 9.25. Second-best event was the high bars, as Luttmernan's 9.45 was led by team scored of 46.45. Price and Ulmer each scored 9.35 on the bars.

Led by Williamson and Price, six Salukis topped the 9.00 mark as SU-U.C scored 46.95 on the floor exercise. Luttmernan and Upperman added scores of 9.25. Second-best event was the high bars, as Luttmernan's 9.45 was the way to team scored of 46.45. Price and Ulmer each scored 9.35 on the bars. Ulmer (9.50) and Upperman (9.40) turned in high scores on the rings, and Meade was also very satisfied with David Bailey's 9.20 on the pommel horse and Preston Koald's 9.35 on the rings.

Williamson was at his second national all-around competition, which included routines for the 1980 Olympics, Luttmernan placed fifth with a score of 100.35. Illinois' Charlie Ullman was second with a score of 109.56.

"It was pleased to see Dave score on the bars. He improved on six points on his Big Eight record," Meade said.

SPLIT: Salukis nearly upset Vols

Continued from Page 23

our team. It was a game that could have gone either way.”

Summitt complimented the patience of the Salukis offense, and said the high-low lob play caught the Lady Vols defense off-guard.

At the delivering end of the lob was starting sophomore forward Marialice Jenkins, who led all Salukis in the tournament with seven assists. And at the receiving end was starting center freshman Mary Berghuis, who scored 12 points and grabbed five rebounds in her first college appearance.

Wallace, the 6-1 sophomore starting forward, also hit double figures with 10 and contributed eight rebounds.

Jackson’s 22 points was a career high and led all scorers in the game but she was plagued by seven turnovers.

TURNOVERS CONTINUED
to hurt the Salukis in the consolation game against Evansville.

“We don’t yet know what’s causing these mistakes, but if we continue to average 23 turnovers a game, we’ll be in for a long year,” Scott said.

Despite Saluki errors, Evansville could not take advantage, and the game was tied at 27 at the half. Throughout the game, the lead changed hands five times and was tied seven times. With 15:00 in the second half, the Salukis made a charge which broke open a double digit lead.

Ann Kattreh and Jackson led the offense to the 59-44 victory. Jackson repeated as the leading scorer with 20 points and eight rebounds, while Kattreh scored 17 points. Berghuis once again hit 12 points and pulled in 10 rebounds.

All though Jackson was selected to the all-tournament team and scored 42 points, Scott did not consider her effort up to her potential, citing turnovers, low percentage shots and poor passing as areas Jackson must improve on for the Salukis to win.

Women cagers lose to Vols, defeat Aces at Bowling Green

By Anita J. Steiner
Stafi Writer

The Saluki women's basketball team opened the season with a near upset, losing to 14th-ranked Tennessee, 56-54, and followed with a victory over Evansville at the Bowling Green Bank Invitational Tournament. Nov. 19 and 20.

UT went on to defeat Western Kentucky University, the host of the tourney, 70-62 for the championship. But their toughest opponent was SIU-C. "I forgot what it was like to coach a close basketball game," UT Coach Pat Summitt said. Summit coached the Summer Olympics women's basketball team.

At one point, the Salukis seemed sure to capture an upset, but the Lady Volunteers staged a second half comeback after trailing by 11 points with 17 minutes left in the game. Saluki turnovers helped the Vols close the margin, along with key baskets by Valerie Freeman and Lisa Webb.

With 6:00 remaining, Kathy Spinks had a chance for a three-point play to tie after drawing a foul from Saluki Petra Jackson. But worse for the Salukis, the free throw missed and a jump ball followed on the rebound. The Lady Vols recovered, and Spinks shot again to put UT in the lead for the first time since early in the game.

The lead then changed four times until Webb hit to give UT their biggest lead of the game, 55-50. Jackson countered with a no-look into the lane which pulled the Salukis back to within one at 55-52. But with 30 seconds left, Freeman sank a jumper from the left corner to make 55-52. Jackson closed it to one point with another midlane jumper with 13 seconds on the clock.

The Salukis used five seconds to bring the Vols into the bonus and sent Shelley Sexton to the line, where she missed. Saluki Cheryl Littlejohn went to the line with 1.6 left and connected on the second shot. The Salukis final desperation attempt gave the ball to Jackson, but with the last seconds ticking off the clock, she dribbled the ball off her foot out of bounds, sealing the game for the Lady Vols, 56-54.

Summitt was pleased with the second-half comeback effort of the equally young Lady Volunteers, and she said she was not surprised by the play of the Salukis. "They are well coached, and although it's early, I think they're a fine team," Summitt said. "They certainly impressed See SPLIT." Page 22

When asked after the game if it was the best the Salukis could play, Coach Cindy Scott just smiled. Starting with a tough non-conference schedule, Scott hopes the young team will gel in time for conference action. "We have pride in our program. We don't have a name like Tennessee or Western Kentucky, but we believe in ourselves and we're ready to go," Scott said. Summitt was pleased with the second-half comeback effort of the equally young Lady Volunteers, and she said she was not surprised by the play of the Salukis.

"They are well coached, and although it's early, I think they're a fine team," Summitt said. "They certainly impressed See SPLIT." Page 22
Dave Bock loves football, but not enough to sacrifice a career in engineering.

For that reason, he announced he won't return to the Saluki football team next season. Bock, a 5-foot-11, 230-pound sophomore and a starting guard for SIU this year, said he is quitting in football because it is interfering with his academic work.

"I love football," Bock said. "But I've been fooling myself for three years. I can't do both. These classes demand too much. I had a hard decision to make, but I'm going with the better for me." Bock's decision to leave SIU from Fremd High School in Palatine, was redshirted his freshman year, but started the last two seasons for the Salukis. He suffered a broken wrist late in the year and missed the last two games, but he said the injury had no impact on his decision to leave the team.

Coach Dave Scott supported Bock's decision. He said he admired Bock for choosing academics over football.

"I feel bad about losing Dave because he's a quality person," Dorr said. "But he's dedicated to school. I have a tremendous amount of respect for him. He knows his future's not in football, and he's doing something that will help him be successful in life."

"Coach Dorr is really understanding," Bock said. "He fully supported my decision. I've got to turn another page in my life. Despite Bock's departure, the Salukis should have an adequate offensive line next season. Tom Baugh, tackles Dave Smith and Ralph Van Dyke, and guards Tim Redmond and Mark Banbury all have at least one year of eligibility remaining."

Dorr said Bock's announcement will not change his recruiting plans. He is still primarily concerned with attracting inside linebackers and defensive linemen to SIU-C.

"I don't think we'll be looking for defensive linemen quite yet," he said.
