## Official says data recorder malfunctioned

By John Racine  
Staff Writer

Flight data and voice recorders stopped functioning prior to the crash of an Air Illinois plane near Pincckeyville last week an official said Monday.

"We know that both the flight data and voice recorders stopped prior to the crash and we know that the tapes were slowing down before they stopped," said Brad Dunbar, a spokesman for the National Transportation Safety Board in Washington.

Dunbar would not speculate on what caused the cockpit recorders to stop functioning, and he declined to comment on whether that problem could have been related to electrical problems of an unspecified nature that were reported by Flight 710 pilot Capt. Lester Smith shortly after takeoff from Capitol Airport in Springfield on Oct. 11.

Capt. Smith reported the electrical problems shortly after departing from the Springfield airport but did not identify what the nature of the problem may have been. He requested and received permission to change his altitude from 9,000 feet to approximately 3,000 feet.

The recorders, Dunbar said, contain a 30-minute continuous magnetic tape which must be deciphered by a computer.

The fact that the quality of the tapes has been affected has not deterred investigators, he said. "The lab can do a great deal with the recorder tapes," Dunbar said.

"We didn't expect anything when we got these tapes," he said. "Obviously, though, the recorder tapes are our most important tool in this investigation."

The recorders were found early Wednesday morning.

Ron Schleede, chief investigator with the NTSB "go team" in Southern Illinois, said Monday that a report stating the twin engine Hawker-Siddeley was not attempting an emergency landing is erroneous.

Schleede again stressed that it is too early in the week-old investigation to speculate on what may have caused the crash. He would only say that the plane was descending.

An investigation team of about 25 people will remain in Southern Illinois through the end of the week, Schleede said.

He said the investigation team will "be examining electrical and engine components, checking maintenance records and proponents at the site and will be gathering records on the flight crew's training and experience."

## Dump-site pact revised

By Karen Torry  
Staff Writer

An amended version of legislation that would form an agreement between Illinois and 14 other states to share a disposal site for low-level radioactive waste will be voted on Tuesday by the Illinois Senate Agriculture, Conservation and Energy Committee.

The committee, which held a statewide series of hearings on the proposed Midwest Interstate Compact on Low-Level Radioactive Waste, has made extensive revisions to the bill critics have said is too vague and would not adequately

protect states which would host dump sites. The bill may be called to a vote in the Senate later this week.

The major change in the compact is the addition of a clause which would require a host state to establish an Extended Care and Long-Term Liability Fund. The fund, generated by fees the host state would collect from other party states, must provide "sufficient fee revenues" for the following: — compensation to any person for medical and other expenses incurred from damages to human health, for damages or losses to real or personal property, for any necessary corrective measures

or clean-up on real or personal property caused by radioactive releases from a dump site.

— decommissioning and other procedures necessary for "proper closure" of a dump site.

— monitoring, inspecting and other procedures required for "proper extended care" of a facility. The compact defines extended care as continued observation of a site after it is closed to detect possible need for maintenance and ensure environmental safety.

— and for "undertaking any corrective actions or clean-ups necessary to protect human health and the environment from radioactive releases from

a regional facility."

The amended compact also requires a dump-site operator to purchase the maximum amount of liability insurance available. The compact encourages dump-site operators to try to obtain insurance payments to cover damages before using money from the liability fund.

Costs not covered by insurance or the liability fund would be shared by all party states, based on the volume of waste dumped at the site by each state, according to the amended compact.

Other changes made to the

## Reagan becomes official candidate 'in the eyes of the law'

WASHINGTON (AP) — President Reagan, still refusing to say whether he will run for re-election, became a presidential candidate Monday "in the eyes of the law," and his campaign chairman said he was "a solid favorite" to win.

The president signed two letters at his desk in the Oval Office. One authorized Sen. Paul Laxalt, R-Nev., to establish a campaign committee. A second informed the Federal Election Commission that he was "hereby authorizing this committee as my principal campaign committee."

While Reagan refused to say whether he will seek a second term, his senior aides and advisers have said they have no doubts.

The president told reporters who witnessed the signing that he might announce his intentions "by the first of the year." Asked whether his signature in black ink on the letters meant that he was running, the president replied with a smile, "in the eyes of the law."

After the president signed the letters, Edward J. Rollins, his assistant for political affairs who is leaving the White House

staff to direct the committee to re-elect Reagan and Vice President George Bush, said, "We're 100 percent confident the president is running."

Larry Speakes, the president's spokesman, said he interpreted the step Reagan took Monday to mean "he's running and the only thing that remains is the formal announcement."

Reagan has said that he is reluctant to declare his intentions because if he does not run, he would become a lame duck. If he does run, he has said, he fears that each step he takes would be seen in a political context.

In his letter to Laxalt, a longtime political ally and personal friend, the president referred in a less-than-certain way to his re-election plans and said, "The work of your committee will be of great help to me at such time as I may make a formal decision to seek a second term as president."

Laxalt, who watched the low-key ceremony over the president's shoulder as the letters were signed, said: "Thank you, Mr. President. God bless you."

## USO to distribute student directories

By Bruce Kirkham  
Staff Writer

The Undergraduate Student Organization received 9,000 copies of the 1983-84 student directory Monday afternoon, and distribution is set to begin Tuesday.

Off-campus students can pick up one directory per residence Tuesday through Thursday from 10 a.m. to 3 p.m. outside the USO offices on the third floor of the Student Center, said Mike Greathouse of the USO.

Alpha Kappa Psi will handle the off-campus distribution, Greathouse said.

Delivery to on-campus residents will take place Tuesday, when directories are put in students' mailboxes. Residents will receive one directory per room.

The directory contains addresses and phone numbers of undergraduate and graduate students attending SIU-C.

In addition, the directory contains a University calendar, registration deadlines, athletics schedules, maps of Carbondale and the SIU-C campus and Night Safety Van routes and schedules.

The directory also contains a campus services information

section which includes hours and phone numbers of commonly-used campus facilities such as the Student Center, Morris Library, Woody Hall offices and the Health Service.

Greathouse said the original delivery date for the directories was Oct. 4. Production was delayed, however, when 12 students asked that their names be omitted from the directory, he said.

The directories were printed in Dallas, Texas, and shipped by truck on Oct. 10. The directories arrived in Mount Vernon on Oct. 14, where they remained throughout the

weekend, according to a McLean Trucking Company representative.

Information Publication Inc. of St. Louis, Mo., produced the directories at no charge to the USO. The directories were paid for by advertising from local merchants, most of which is contained in a yellow pages section.

Mary Chybicki, USO public relations director, said that if next year's USO administration chooses IPI to produce the directory, IPI will increase the number of directories printed by 1,000, and so forth, for each year IPI is chosen.

The Office of Admissions and Records supplied the names, addresses and phone numbers to IPI in the second week of August.

Gus Bode

Gus says maybe the University ought to have the USO also do the faculty and staff directory, which isn't out yet.

# Report may reduce SIU-C energy funds

By Anne Flasz  
Staff Writer

Although University administrators and energy experts consider it inaccurate, an energy use report by the Illinois Board of Higher Education on energy use and costs at state universities may have a negative effect on state appropriations for SIU-C.

According to the report, which covers the fiscal years 1977-83, the University has had the least reduction of energy usage among state schools in one area of measurement, and is one of only two state universities that has increased usage in another.

SIU-C has had the largest cost increase percentage in natural gas among state universities over the past six years, and in fiscal year 1983 had the third-highest unit cost for gas.

University officials responsible for University energy usage say they do not dispute these figures, but the report does not accurately represent the strides taken in energy conservation by SIU-C prior to the base year used for the report, fiscal year 1976.

Clarence Dougherty, vice president for campus services, said that because of the way the report was compiled, SIU-C is not represented as being "conservation conscious."

"Our energy use was very low to start with," Dougherty said. "To me the report indicates that prior to 1976 some of those (other institutions) were wasting."

David Stewart, associate director of fiscal affairs for the IBHE, said that if a university did not fare well in the energy progress report, it may not get the full amount of cost increases for utilities when the IBHE sends its budget recommendations to the state.

Stewart said the IBHE believes the report is a fair representation of energy usage in state universities and community colleges, but admitted that there can be problems when comparing institutions.

"It's very difficult to compare institutions," Stewart said. "There are so many factors involved. That's why it's im-

portant to look at energy usage over a period of time for a particular campus."

The age and condition of buildings and their heating and cooling systems and an increase in research activities may have a bearing on a university's energy usage, Stewart said.

In the report's summary of energy usage, SIU-C is one of two state universities which increased the number of British Thermal Units used per thousand gross square feet of space.

While the BTUs used decreased for most schools, SIU-C's has increased 3 percent.

The report said SIU-Edwardsville reduced its BTUs per thousand gross square feet by 34.3 percent, fourth best among schools studied. Sangamon State had a 54.6 percent reduction, Governors State 49 percent and Chicago State 36.3 percent. The Chicago Health Sciences Center of the University of Illinois was the only school beside SIU-C to report an increase — 14.1 percent.

The University has also had the smallest decrease in the number of BTUs per gross square foot per degree day used — down 7.3 percent. According to the report, the degree day measurement provides an approximate basis for controlling the effects on energy consumption of extreme variations in weather.

Dougherty said these figures give a false impression. According to Thomas Engram, utilities superintendent, the 3 percent increase in BTUs per thousand GSF is due to the University's reliance on coal as a source of energy. Engram said that although the amount of energy needed for heating and cooling might appear to be high, the relative cost is low.

In FY 1983 SIU-C's energy cost per GSF was \$1.07, the third lowest of all state universities.

Engram said that although the university was experiencing some energy loss through underground tunnels used to circulate heat, the University is taking steps to combat the problem.

In fiscal year 1983, the University paid about 56 cents per therm for natural gas it received from Central Illinois Public Service. Sangamon State University, paying 57 cents per therm and the SIU School of Medicine in Springfield, which paid 58 cents per therm, were the only institutions paying more.

"We have no control over the rate that we're charged," Dougherty said. "It's unfortunate that it is so high — it adds to the overall cost of running the University."

In a response to the report, the administration states "since the early 1960's SIU-C has implemented many energy saving programs which were new and innovative to the field."

Examples cited include the central campus utility control system and the street light replacement program.

Charles Williams, SIU-C's coordinator of energy conservation, agreed with Dougherty and Engram and cited the fact that the University has added three buildings and added air-conditioning to others during the years the progress report examines.

He said SIU-C will be asking for state funds for energy conservation projects, but admitted that capital project funding is tight.

"There's more competition for existing funds," Williams said. "Before they fund a project, there has to be a definite payback period."

According to Williams, it is easier for a university to get funding for a project with a shorter payback period.

Conservation measures implemented in 1974 which the administration cited in its response to the report include modification of space utilization and scheduling, a reduction of 30 to 30 percent in hallway lighting and reductions in exterior decorative lighting.

## News Roundup

### School autonomy recommended

SPRINGFIELD (AP) — A new state panel on improving education was told Monday that a good school system cannot be forged by state or federal laws, and that only substantial local control guarantees quality education.

"Edicts and directives, no matter how well-intentioned, stifle the creativity and effectiveness of people on the firing line," said Harold Seamon, executive director of the Illinois Association of School Boards.

### Court upholds creationism order

NEW ORLEANS (AP) — The Louisiana Supreme Court ruled Monday that the state Legislature had the right to order creationism taught alongside the theory of evolution in public schools.

The ruling, by a vote of 4-3, did not consider the merits of scientific or religious questions about creationism — questions which both sides now expect to argue in federal court.

Instead, the court focused entirely on whether the Legislature could pass a law saying what can be taught in public schools.

### NCAA control of games challenged

WASHINGTON (AP) — The Supreme Court said Monday it will tackle a billion-dollar dispute over whether the National Collegiate Athletic Association or individual schools should control the televising of college football games.

The justices, in a case they were told might revolutionize sports on TV, agreed to review rulings that the "CAA's 30-year control violates federal antitrust law."

The court's decision is not expected until next year and therefore will not affect contracts, worth \$74.2 million, for the current football season.

### Professor wins economics prize

STOCKHOLM, Sweden (AP) — Gerard Debreu of the University of California at Berkeley won the 1983 Nobel Prize in economics Monday for showing mathematically how the market system achieves a balance between supply and demand.

The 62-year-old professor's studies once were rejected as too theoretical to have any practical application. However, they laid the groundwork for a generation of economic researchers and now are cited in every modern economics textbook.

### Suspect to face extortion charges

CHICAGO (AP) — Jury selection began Monday in the attempted extortion trial of James Lewis, who is accused of trying to exploit last year's Tylenol murders by demanding \$1 million from Johnson & Johnson to "stop the killing."

U.S. District Judge Frank J. McGarr warned nearly 50 prospective jurors that Lewis, who recently was sentenced to 10 years in prison in an unrelated case, had not been charged in the Tylenol deaths.

# COMPACT from Page 1

compact include a clause which calls for the compact commission, made up of one representative from each party state, to adopt policies mandating reduction of waste generated within the 14-state region. The original compact required the commission to only consider reduction policies.

The amended compact also would require the commission to adopt treatment, storage and disposal methods designed to minimize or eliminate the amount of waste buried in shallow landfills. Environmental groups, noting that five of six shallow landfills in the United States are leaking, feared that dump-site operators would prefer shallow land burial because it is the cheapest disposal method.

The initial membership fee paid to the commission by party states would be changed by the amended compact to \$50,000. The original compact calls for party states to be charged \$50,000 or \$1,000 per cubic meter

of low-level waste shipped from that state in 1980, whichever is lower.

While the compact's senate sponsor called the amendments "devastating," Kathleen Kusick of Illinois South Project said Southern Illinois groups opposed to the original compact are pleased with the changes.

"I think it's a really good start," Kusick said Monday, adding that she will propose additional amendments to ensure citizen participation and access to compact documents to the senate committee on Tuesday.

Kusick, who will represent Illinois South, Southern Counties Action Movement and Save Our Shawnee, said one amendment calls for the compact commission to set up guidelines monitoring the acceptance of contributions. The compact, as presently written, allows any individual or corporation to donate money, equipment, supplies or services to the commission, which

Kusick said could bias the commission.

Other amendments Kusick will propose would mandate public hearings in each party state before the regional management plan, which would spell out how the dump sites are operated, is adopted and would require the plan to be ratified by the state legislatures.

Kusick said the groups she represents also want the commission's annual report made available to the public and want public document rooms containing all materials related to the commission set up in each party state.

State Sen. Virginia MacDonald, R-Arlington Heights, recently called the amendments proposed by the Senate committee "ludicrous," and contended that Illinois is "totally protected" by the original compact.

MacDonald said that if the General Assembly does not pass the compact unamended, Illinois, the fourth largest

nuclear waste generator in the United States, will have to bear the full cost of disposing of its low-level waste. She argued that the four states which have already ratified the compact will be unwilling to consider a new document.

Although the compact would supersede any state and federal legislation that contradicts it, MacDonald maintains the proposed Curry Bill would address the concerns of compact opponents.

"Our thinking is that the Curry Bill is so practical that if it were presented to them (the commission), there is a good chance they will accept at least part of it," MacDonald said. "We may not have it all our own way. The commission will work that out."

MacDonald conceded that "there are going to be errors" made in the disposal of low-level waste, but called it an "atrocious and abominable error" not to approve the compact.

# McFarlane named to post

WASHINGTON (AP) — President Reagan named Middle East special envoy Robert C. McFarlane as his national security adviser on Monday, saying the former Marine officer "shares my view about the need for a strong America."

It was an appointment that dismayed hard-line conservatives who waged a strong lobbying campaign on behalf of U.N. Ambassador Jeane Kirkpatrick.

Reagan declined to be drawn into predictions of Mrs. Kirkpatrick's future role in his administration during a brief news conference and said "as far as I know she's happy" with her U.N. job.

There have been persistent reports in recent days that Mrs. Kirkpatrick was eager to return to Washington, where she formerly was on the faculty at Georgetown University.

McFarlane, a 43-year-old former Marine lieutenant colonel and foreign policy professional who worked in the Nixon and Ford administrations under Henry Kissinger, immediately took over the job from William P. Clark, nominated as secretary of interior. The White House job does not require Senate confirmation.

McFarlane does not have the longtime insider status with Reagan that Clark enjoyed, nor is he likely to champion Pentagon and CIA views in battles with the State Department as much as Clark did.

## \$34 taken from handicapped man

Carbondale police are investigating the strong-arm robbery of a Carbondale man Saturday night in front of Lewis Park Apartments, 800 E. Grand Ave.

James E. McElroy, 24, told police the robbery occurred at 2:00 a.m. when a black male approached him and demanded money.

The man took \$34 cash from McElroy, who is confined to a wheelchair.

# Membership drives planned

By John Stewart  
Staff Writer

The Carbondale Federation of University Teachers and the American Association of University Professors are gearing up for membership drives in response to the possibility of collective bargaining at SIU-C.

Gov. Thompson signed two bills Sept. 23 granting Illinois public employees collective bargaining rights. Thompson's amendatory changes to the bills are expected to pass easily in the current session, said Emil Spees, higher education professor and AAUP president.

On Nov. 1 CFUT and AAUP will co-sponsor a campus-wide informational meeting on collective bargaining. Three AAUP officials will be featured speakers: Charles Zucker, executive director of the Illinois conference, Gerie B. Bledsoe, national director of collective bargaining, and John A. Slosar, central region officer. Another AAUP-CFUT co-

sponsored informational meeting with CFUT speakers will be held in February, according to Lawrence Dennis, professor of educational leadership and CFUT vice president.

Herbert Donow, president of the CFUT, is pursuing a collective bargaining election and the CFUT has begun a membership drive.

AAUP leaders surveyed their membership to see if there was support for collective bargaining at SIU-C, and if so what group would members favor as a bargaining agent. Two-thirds of the AAUP members that responded were in favor of collective bargaining at SIU-C, according to the survey released Monday.

The AAUP survey, conducted Oct. 3 through 14, had 44 respondents and indicated a moderate to strong desire for collective bargaining at SIU-C, Spees said. This response came from a group he describes as relatively conservative on most issues.

Emil Spees, higher education professor and AAUP president, said the group is overwhelmingly in favor of AAUP becoming the faculty bargaining agent should a campuswide representation election determine SIU-C employees want collective bargaining.

Before a representation election is held, though, the employees to be represented must be defined. This "bargaining unit" could be made up of just faculty, educationally-minded administrative professional staff and faculty, such as department chairmen, Spees said. Representation elections let unit members decide if they want collective bargaining, and if so what group will represent them in negotiations.

The CFUT is also planning a membership drive in anticipation of a collective bargaining representation election. The CFUT is a part of the American Federation of Teachers, an AFL-CIO affiliate.

Dennis is leading the CFUT's effort to form an alliance with AAUP for the purposes of joint representation for SIU-C's faculty as a bargaining agent. Donow said he anticipates a collective bargaining representation election in the coming year.

The AAUP will have a meeting at 3:30 p.m. Thursday at Faneer Hall Museum's auditorium. The featured speaker will be AAUP Illinois director Charles Zucker, who will focus on membership development at SIU-C in light of collective bargaining. The meeting marks the start of AAUP's fall membership drive and all interested in joining the professional organization are invited to attend, Spees said.

Predictions as to the effects of collective bargaining on campus vary. Spees said it would provide the impetus for SIU-C's administration to include faculty in more decision-making about academic and financial issues.

## Opinion &amp; Commentary

Signed articles, including letters, viewpoints and other commentaries, reflect the opinions of their authors only. Unsigned editorials represent a consensus of the Daily Egyptian Editorial Committee, whose members are the student editor-in-chief, the editorial page editor, a news staff member, the faculty managing editor and a Journalism School faculty member.

Letters for which authorship cannot be verified will not be published. Students submitting letters must identify themselves by class and major, faculty members by rank and department, non-academic staff by position and department, others by residential or business address. All letters are subject to editing and will be limited to 500 words. Letters of 250 words or fewer will be given preference for publication.

A complete statement of editorial and letters policies approved by the Daily Egyptian Policy and Review Board is available in Communications 1247.

Student Editor-in-Chief, Rod Stone; Editorial Page Editors, Jay Sma; and Jeff Wilkinson; Faculty Managing Editor, William M. Harmon

## Woods communication

THE CHAIN SAWS have stopped. The communication has started.

The formulation of the Natural Areas Committee may once and for all silence the controversy surrounding the management of Thompson Woods. It is an intelligent, logical medium for dealing with the long-term problem concerning undeveloped, natural areas on campus. It is too bad that one-third of the Thompson Woods cleanup is already completed and that, at least as some of its critics believe, irreparable damage may have been done.

But it is better to stop the work now, though it makes completion of the project impossible before cold weather sets in, than to continue without discussion and compromise with those most affected by the cleanup — researchers who have projects in the woods and those most knowledgeable of the rare species and delicate ecosystem that the woods represents.

BUT THE THOMPSON WOODS controversy illustrates a problem that is broader than the removal of dead trees and honeysuckle. It concerns members of the University community — faculty, administration and students, working together as a team for common goals.

There would have been no controversy if administration officials had consulted members of the faculty before work began. By not consulting them, they have not only offended those faculty members — which causes further breakdowns of communication — but they have sabotaged their own project.

AN ORDERLY, informed cleanup of Thompson Woods could have been beneficial to all by clearing out some of the tangle of underbrush that is clogging the woods — thus making the woods safer and more appealing — and controlling a detrimental growth that threatens to take over the woods. By going off half-cocked, the administration caused a controversy that should not have occurred.

The new Natural Areas Committee should be able to solve this problem, and we hope, put any animosity resulting from the controversy behind them. But more important, it should be a lesson to the rest of the University community that the only way to achieve our common goals is to work with each other and not against each other.

## Buy Baptist center

Now that we have meticulously determined that the Baptist Student Center building is unfit to store books and even more unfit to store convicts, will enlightenment occur? Will the administration suggest that SIU purchase the building for the office and research space we desperately need on campus?

SIU tradition suggests that we first try to do everything contrary to a reasonable action before we discover rationality. Dare we hope that tradition will now work again and the administration will take the next step of buying the building for student and faculty use? — Richard L. Lanigan, Professor, Speech Communication.

## Letters

## Would elected trustees be sensitive?

The meager two-inch item on Page 6 of the Oct. 4 Daily Egyptian, "Trustees cancel October session" at Carbondale, raises interesting questions. What business do they consider "pressing" and what functions are trustees supposed to fulfill? They are to be at Edwardsville in November. Is absentee "ownership" a good way to run a University?

Front-page headlines that day were, "Job classes, salaries framework under fire" and "600 sign petitions to halt brush cutting." The first referred to the Hay Associates fiasco to which people are slowly

awakening, and the second to the costly vandalism in Thompson Woods by a supposedly impoverished University.

Other recent news has been the plan to turn the University into a prisoner work center. Fortunately the Mayor fought that one, and the Governor had to step in to help the situation. Where do we stand on the unintelligible and widely opposed proposal for putting a new library facility (Bracy building) nearly 20 miles away forever in Marion? Are our Trustees modern-day Nero, fiddling while Rome burns? Suggesting we wanted more

evidently responsible trustees, what could we do? Except for a non-voting student trustee, not one lives within 50 miles and only one within 100 miles of the Carbondale campus. Would elected trustees who are sensitive to the real rather than the agenda needs of the University be a logical answer? Elections offer a chance to illuminate issues and to have some accountability to the taxpayers and voters. Would pressing for elected trustees be a way to light a candle of hope before too many ill-considered Administration plans are allowed to sabotage a once-proud University? — William C. Ashby, Professor, Botany.

## Why run body bag photo in paper?

It was a sorrowful occasion to hear of the air disaster last Wednesday. It was shocking to see the victims lined up in body bags that evening on a local newscast.

The next morning, over breakfast, it was a devastating shock to see that our university-affiliated newspaper reprinted the morbid body bag shot on the front page. This insensitive act seems akin to the network newscast several years ago that broadcasted the murder of one of its camera men.

Such insensitive journalism is usually justified by profit. It has been argued and statistically proven that the public will not purchase "good news." This justification is inapplicable to a non-commercial newspaper like the D.E. Furthermore, since two of our beloved faculty members were among the victims, it seems to me that the D.E., of all the newspapers in the world, would be more considerate. Considerate of the friends and relatives who would not like to remember them in

such an unpleasant way.

The space could have been used to cover their many good works. I am of the personal belief that the printing of this photograph was both insensitive and unnecessary. Many students share in this belief.

It is unfortunate that the victims' children will have, perhaps as a final memory, such a photo. It certainly will not be a welcomed addition to a family scrapbook. — Sharon Hutcherson, Student Trustee.

## Asian, Pacific nations face transport woes

A RECENT United Nations Economic and Social Commission for Asia and the Pacific (ESCAP) report shows that there are less than two meters of paved road for every person in those regions, and only half of their rural populations have access to motorized transport.

This situation, ESCAP predicts, will change little by the year 2000. ESCAP's prediction is based on three major problems bedeviling road and transport development in most of Asia and the Pacific:

— A serious lack of funds for road construction, maintenance and transport development.

— A lack of skilled and experienced people for efficient management and planning of integrated road and transport systems.

— A need for expertise in finding more economic and efficient alternative systems.

IN ITS economic and social survey of the region last year, ESCAP noted that railways and

Jack Prasai  
Staff Writer

roads are the principal means for the internal movement of people and goods in developing countries. Asia is home to half of the world's four billion people.

Road transport predominates except in China and India, which have developed and expanded their rail transport systems. These systems now carry over 50 percent of on-land passenger and freight traffic in those countries.

In the last decade, most developing nations have poured substantial public funds into

construction of modern road networks. The investment enabled road networks to expand at annual rates of up to 10 percent (15 percent for paved roads) from 1970 to 1980. Despite these efforts, road facilities remain woefully inadequate in the region — the road density is one-tenth that of the United States.

INCREASING operations and maintenance costs of gasoline-fueled road transport systems have also brought the importance of rail transport to the attention of developing countries. ESCAP reports state that rail transport is becoming more important in Bangladesh, Burma, Indonesia and Malaysia — all of which, among others, neglected railways in past efforts at transportation development. These four nations have lately been joined by Pakistan in speeding up rehabilitation of their railroad tracks and locomotive fleets, seeing in the system a more economical means of moving

both people and cargo.

ESCAP also notes that electricity — a cheaper, more efficient means — is replacing petroleum-based fuel in the running of locomotives. China now runs its first electric double-track line, which links Taiyuan and Shijiazhuang and has become a major transporter of coal mined in Shanxi province.

ESCAP likewise cited the Philippines and South Korea for efforts in preparing master plans for transportation. Their planning "not only covers all modes of transportation but also their interaction with other sectors of the economy."

The Asia-Pacific nations should also pay more attention to developing inland waterways to modernize their transport sectors. Long neglected but still with the potential to provide cheap and efficient means of transport, the waterways are ideal to move bulk cargoes like ore, coal, fertilizer, grain and timber.

Waterways proved ideal for the movement of both people and cargo in many of these countries even before engines were introduced. The ESCAP report shows, however, that only three nations still emphasize inland waterways: China, which moves one-fifth of its total cargo via waterway transport; Bangladesh, 65 percent cargo and 40 percent passenger; and Thailand, which has borrowed \$53 million from the World Bank to improve its inland waterways.

IN OTHER developing countries, ESCAP states, use of inland waterways for transport continues to decline because of competition from the more flexible road transport.

The ESCAP report and others show that more attention should be given to exploiting the potential of various modes of transportation to help reduce universal transport costs and to ease the pressure on the road systems of developing countries.

# Do teacher strikes mean better schools?

**Editor's Note:** The following commentary was written by David Everson, Joan Parker and Jack Van Der Slik of the Illinois Legislative Studies Center at Sangamon State University.

Football games, the smell of burning leaves, and teacher strikes — they mean that summer is over and fall is upon us. Fortunately, there have been fewer actual strikes than the number threatened. Many families nonetheless have been unsettled by lingering concern about unresolved teacher contracts.

A new wrinkle in some places has formed: some teachers returned to classrooms this fall though negotiations were incomplete. Families bought the new sneakers, jeans, tops and underwear. Working parents renewed their arrangements for car pools, baby sitters and day care centers.

Teachers picked up a couple of paychecks as they got the first learning units under way. Then negotiations stiffened, strike votes were debated, and in some notable instances across the state — including Chicago — strikes were called. Family schedules were knocked askew and community people chose up sides. Letters to the editor columns filled with invective while reporters tried to keep their stories balanced.

**PUBLIC** schools have serious problems. Some, but not all, are being addressed through negotiations and bargaining among teachers, boards and administrators.

Teachers nationally do not make very

big salaries. In 12 cities with populations over a half million, the range of starting salary schedules for an inexperienced teacher with a bachelor's degree was \$11,600 (Philadelphia) to \$16,000 (Houston). Chicago, which has experienced six strikes since 1969, was on the low end at \$13,800. Median starting salaries in Illinois were \$13,300. The maximum salaries in large U.S. cities ranged from a high of \$29,000 (Detroit) to a low of \$21,300 (Los Angeles). Chicago pays a maximum of \$27,400 while the median for top scheduled salaries around the rest of the state is \$23,500. Moreover, salary increases over recent years have lagged behind the rise in the Consumer Price Index.

**ANOTHER** hard fact is that tax revenues from state and local sources are not increasing. Indeed, in many communities they are dropping. Property values and tax assessments have flattened out. Unemployment and high interest rates have stopped economic mobility. The decline in school-age population has begun to turn around, so in many Illinois communities costs in elementary schools, at least, are on the rise again. Because these growth patterns are uneven, certain city schools have vacant space while some suburban administrators are consulting their architects.

Meanwhile, the National Commission on Excellence in Education has given the public little satisfaction concerning the instructional accomplishments of its schools. There are complaints about an absence of discipline, weak instruction in basic sciences, and a disproportionate

use of resources for the kinds of courses states require — physical education, driver education, consumer education and the like. Graduation standards are based on years spent in grades, not on performance.

**IF COLLECTIVE** bargaining and an emergence of politics in school problems will lead to solutions, Illinois' future is bright; but we are not sanguine about that prospect.

The newly adopted state law for public employee unions is expected to stimulate union memberships substantially. Another fresh element is the statewide election day for non-partisan elections. On Nov. 8, for only the second time, school board candidates across the state will be up for election on the same day. And the recently established biennial election schedule set by state law means that board members will run for office every other school year, soon after the time of grueling contract

negotiations and sometimes bitter strikes. Increasingly organized and aggressive, teachers and their unions will have the opportunity to press their case upon the voters in the electoral process.

**WILL THIS** process of public conflict unify parents, teachers, students and the rest of the citizenry to improve the schools? We think it is ridiculous to build salary schedules on the assumption that, during a career of personal growth in the teaching profession, a person should only expect to approximately double his or her salary. But schools need more than well-paid teachers — they require community support and parental involvement.

We are not convinced that strikes make that happen. Perhaps the consolidated election will improve public debate and lead to closer connections between the people and their public schools.

## VIRGIL

By Brad Lancaster

## Let's look at both sides of Thompson Woods issue

This is not of concern to those supporting or opposing the "clearcut" of Thompson Woods, but rather to those so called "semi-concerned" individuals who would like to pick a side, but know very little about what composes a true forest ecosystem.

After discussing the situation with many of my forestry colleagues, I tallied up a list to help those of you choose which team you wish to support ...

**Pros (Reasons for supporting the clearcut):**

1. Provides a well deserved change of pace for the maintenance workers.
2. Allows those of us who like to study behind the Student Center to blow off our work in order to observe extensive forestry practice in action.
3. The gentle murmur of the chain saws and wood chippers creates a positive atmosphere before a calculus exam.
4. All sarcasm aside, it has security benefits (i.e., the University finally realized that

it is cheaper to thin the woods than to light the Brightway Path.)

**Cons (Reasons for opposing the clearcut):**

1. It's one way of getting your picture in the DE to send home.
2. It's a vain attempt to wipe out the Japanese honeysuckle that is already uncontrollably spreading at the speed of light throughout 260,000 acres of the Shawnee National Forest.
3. The University is liable to be sued if a wood chipper throws a chip into someone's eye.
4. All sarcasm aside, it is a disturbance to the natural forest ecosystem that so many hate to see destroyed by the swift sword of progress.

Which weighs more — security or preservation? Personally, I like the best of both. Let's stop stabbing each other and come to a mutual agreement. I've lost too much sleep already ... good day. — David Mercker, Junior, Forestry.

## Letters

### Letter-writer misread article on Koreans' views of America

In his letter (Daily Egyptian, Oct. 3), Joseph Gutierrez took issue with the general comments of Mr. Shim and Mr. Choi on the United States and its people. He criticized the reference frames for their views as limited and suggested that the two Korean journalists "lack common sense and manners." No doubt, his intention to reprove what the Koreans said about America is quite understandable; as a good U.S. citizen he defended his beloved country.

The problem with his criticism is, however, that he misreads or misunderstands the article at issue. Indeed, Gutierrez should have read it once more before taking a pen to unnecessarily dress down Mr. Shim and Mr. Choi. His subjective understanding of the article is quite evident throughout his letter.

Gutierrez takes a naive one-

dimensional approach toward the article. That is, he hastily concludes that Mr. Shim's and Mr. Choi's mildly unfavorable comments on America are the opposite of Korea, or vice versa. He should know better than that. Just because the Koreans reportedly stated that Americans "don't get along with their neighbors and there is a lot of violence and noise," they didn't necessarily imply, in strong contrast to the way Gutierrez understands, that their fellow Koreans always are neighborly or nonviolent. Rather, they just made a judgmental observation, without making a one-to-one comparison between the U.S. and Korea.

Second, I read the article in question over and over again. I repeatedly failed to understand Gutierrez's interpretation of it. For example, he said in his letter: "he (Mr. Shim) likes the

Korean culture better because the girls are 'modest and womanly.'"

Gutierrez should carefully read the last paragraph of the article again, which he has apparently distorted to argue his unconvincing point. Mr. Shim just said that he likes his country and its culture as a Korean. He, as a Korean man, just characterizes Korean girls as such.

In sum, it goes without saying that understanding a verbal expression should start from objective and common-sense grasp of the context in which the expression is used. It ill becomes a university student to forget this and to stretch his own reasoning beyond logical limits. This simple and clear guide should have been observed when Gutierrez read the article. — Kym Ho Youm, Doctoral Student, Journalism.

## Watt critics unjust

There has been great rejoicing by liberals over the resignation of James Watt. They have done a great injustice to Mr. Watt and the rest of us Americans.

Sensing he was doing a terrific job as Secretary of the Interior, they did their best to drive the poor man out of office. As usual, the liberals refrained from criticizing his record. How could they? It was impeccable.

Instead, they resorted to their usual mud-slinging and at-

tacked his character. They pounced on every slip of the tongue and biew them out of proportion for their own cheap advantage and political advancement. I hope President Reagan is not swayed by this nonsense of our nation's bleeding hearts and appoints another capable secretary to proceed benefitting nature, the private sector and all of us Americans. — Bogdan Medrek, Sophomore, Biological Sciences.

# Monty Python writer, actor to stage Shryock comedy show

Monty Python-style humor will come to Shryock Auditorium at 8 p.m. Tuesday when Graham Chapman will provide antics and film clips from the British comedy troupe.

Chapman is a writer and actor for the group that formed in the shadows of the Cambridge Footlights Club at Cambridge University. Chapman met John Cleese there and later connected with Michael Palin, Terry Jones, Eric Idle and one American, Terry Gilliam.

The troupe began with an idea for a series called "Owl-Stretching-Time," and ended up with "Monty Python's Flying Circus" to communicate their humor.

Chapman has not spent his entire life making people laugh, however. He is a certified medical doctor, and was educated in such places as Eton and St. Swithin's Hospital, London.

But he became addicted to humor when he won a place in the elite Footlights Club at Cambridge University. He has written with or for such wits as David Frost, Marty Feldman, Peter Cook and Peter Sellers.

He helped found Britain's "Gay News" and wrote for the television series "Doctor in the House" and was an actor-writer for most Python movies, including the leading role in "The Life of Brian."

This list of accomplishments does not chronicle his life, however. The darker side of his humor has been a life of chronic alcoholism. He has depicted his roller coaster life in "A Liar's Autobiography," which moves from bizarre fantasy to true adventure to human experience and back again.

Chapman will also provide an opportunity for discussion about the comedy troupe during the evening performance.

Tickets are still available for \$5.50 and \$7 at the Student Center Central Ticket Office. Tickets will also be available at the door. The event is sponsored by SPC Expressive Arts.

## Reading program donations sought

By Jay Schmitz  
Student Writer

It's time for area businesses and organizations again to help teach Johnny to read.

For the fifth year, the Jackson and Perry Reading is Fundamental program is sending letters urging area businesses and organized groups to contribute to the program.

The Jackson County program buys books to distribute to 3-, 4-, and 5-year-olds and high school freshmen. The Perry County program distributes books to kindergartners and first and second graders.

This year, about \$3,000 is needed from donors to buy the paperbooks that are distributed, according to John Hawkins, assistant regional superintendent for schools in Jackson and Perry counties.

A federal reading program contributes about \$3 for every \$1 raised locally. If the local goal is reached, this will give the Jackson-Perry program about \$10,000 to work with this year. All funds go to purchase books, Hawkins said.

The reading program is conducted by volunteers, mostly teachers and former

teachers, parents and high school students. The volunteers are involved in book selection, reading motivation, book distribution and the finance committee, Hawkins said.

"It's not just the idea, here's the books, and then we forget about them," Hawkins said.

The motivation committee suggests activities to the teachers who distribute the books, trying to spark interest in reading. This is especially helpful, Hawkins said, for the preschoolers and first and second graders in the program.

Hawkins said the program has been effective, in terms of the number of books distributed and in encouraging children to read. The program has distributed about 10,000 books in each of the past two years. Hawkins said he hopes to do about the same this year. Each child may take three books to keep.

Several teachers replied to a questionnaire distributed by the superintendent's office that keeping the books is a major stimulus for the children. Hawkins said that teachers have told him the children read the books given to them by the program more readily than they would a library book,

because the program books belong to them.

The books will be ordered as soon as the money is collected, Hawkins said. The organization orders the books from suppliers approved by the national reading program.

The books will be distributed to day-care centers, elementary schools and participating Jackson County high schools in March, April and May.

Hawkins said he was unsure why ninth graders are included only in the Jackson County program.

However, he said, the Jackson County program allows the high schools to get involved because preschoolers aren't the only ones with reading difficulties.

**BEGIN YOUR FUTURE AS AN OFFICER.**

Many college courses prepare you for a job in management. Sooner or later. But successfully completing Army ROTC will place you in a management job right after graduation.

It's definitely not a trainee job. You could be accountable for millions of dollars worth of equipment. And responsible for many of the Army's top technicians.

You might find yourself supervising a staff of computer programmers in Heidelberg. Missile technicians in Korea. Or satellite trackers in Samoa.

To qualify, you take a few hours of ROTC classes weekly, along with the subjects in your major. You'll receive financial assistance — \$100 a month, up to \$1000 a year — in your last two years. And you might even qualify for a scholarship.

For more information on what could be the most important planning decision

you'll ever make, see your Professor of Military Science. Or write to: Army ROTC, P.O. Box 9000, Clifton, New Jersey 07015.

# At 71, she's at work on teaching degree

By Debra Colburn  
Staff Writer

In the fall of 1929 Eva Potter came to Carbondale to work on her degree. Now 54 years later, she might actually finish it.

Potter, who left SINC (as SNU-C was known in those days) in 1931 with a two-year teaching certificate, is now taking courses toward a degree in occupational education from SNU-C.

"It has always been a thorn in my side that I didn't get a degree," she said during a telephone interview from her home in Riverside, Calif.

Potter is taking courses from the University through the vocational education studies military program. She attends classes every other weekend at March Air Force Base in Riverside.

She decided to try again for a bachelor's degree after a friend — also in her 70s and who holds a Ph.D. — inspired her, said Harold Bardo, instructor in

guidance and psychology.

Potter said she hopes to be able to get her teaching credentials so that she can qualify for substitute teaching in California.

In order to participate in the vocational education studies military program, a student must have an occupational specialty. Potter's is real estate. When she finishes school, she will be qualified to teach post-secondary classes in real estate.

When Potter was a student, she lived in Anthony Hall, at that time a women's dormitory. Living in campus residence halls then was very different from living in them today, she said.

When a young man came to visit his girlfriend, she said, he would be met at the door by a matron. The matron found out who he wanted to see and rang for the woman to come down to meet him — men were not allowed in women's rooms.

The women had to sign in and

out of the dormitory. During the week, they had to be in by 10 p.m., but on the weekends they could stay out until 10:30 p.m.

Lights went out at 10 p.m. during the week. At 7 a.m. the women were awakened by the sound of the matron hitting a Chinese gong.

"I liked it. A lot of girls didn't though. They thought it was too strict," Potter said.

The period between dinner and 7:30 p.m. was known as free time. At 7:30, the women would begin studying. But Potter said that many spent the time between dinner and study time dancing.

Noting one comparison between the way women dress on campus today to what was proper in her time, she said, "The matron would have a fit if the girls wanted to go without stockings in the summer."

The area known as the strip didn't exist when Potter was a student in Carbondale. But even though prohibition was being enforced, she said, there was a

lot of bootleg and homemade brew available.

Potter said students today are a lot like they were when she went to school, only students were more serious then.

The cost of tuition for a year was \$28 when Potter attended SINC and that included tickets to the season's sporting events. Potter remembers one basketball championship victory that was celebrated by students parading through town to a popular cafe for a victory celebration.

# Grandmother wins \$6 million prize

Associated Press

A 51-year-old grandmother who is a private investigator was certified Monday as the winner of \$6 million in the Illinois State Lottery LOTTO game.

Betty Gloss of suburban Glen Ellyn became the biggest winner in state lottery history, officials said.

For matching the winning numbers drawn Saturday night, which were 04, 12, 17, 19, 32 and 33, she will receive 20 annual installments of \$300,000 each.

At the certification, Gloss kept repeating, "I can't believe it. I can't believe it."

She said she arrived at her winning combination this way: "The 4 is for April, my birthmonth. The 12 is the result of adding the five members of my immediate family, plus my two grandchildren, plus my five dogs."

"The 19 and 32 come from the

year 1932 in which I was born. And since I never win at Bingo because the winning numbers are usually one or two away from the ones I have, I picked a 17 — two less than the 19 I picked, and 33, one number above the 32 I had already picked."

Although Gloss knew Saturday she had the correct numbers, she did not know until Monday that she was the only Grand Prize winner. When there is more than one winner, the prize is divided equally among them.

She said she was too "numb" to think of how she will use the money.

The previous record in the Illinois State Lottery was \$3.6 million won in May by Findley Mahaffey of Matteson, Ill.

Gloss has been a bookkeeper and currently conducts investigations for Gloss Guard and Investigation Services Inc. Her husband, Arthur, is

president of the firm. The odds of winning a LOTTO game are about one in 3 million, said officials.

Sandy Hartline, of Trueblood Cafeteria, prepares a batch of grilled cheese sandwiches.

## Meal plans drawn year ahead, but current tastes are included

By Scott Dalzell  
Student Writer

It's suppertime on Monday, and 1,800 hungry students are about to invade Trueblood Hall cafeteria, expecting to eat their fill of tasty food.

The cooks, bakers and other kitchen workers have been working for hours to ready this meal for the wary customers. The preparation of this meal really began last spring. Menu planning for dormitory residents is a year-round job.

Planning the menu for students coming to SIU-C in the Fall begins sometime in the Spring.

According to Lois Brumitt, assistant director of housing-food service, menu planning doesn't start from scratch.

"We pull out what we did a year ago. We look at the meats that were selected at that time and review to see what changes we want to make," Brumitt said.

Brumitt is in charge of planning the meat courses for Lentz, Grinnell and Trueblood

Halls. The meats are usually planned first and the rest of the meal is planned around that.

When deciding what changes should be made, Brumitt said, there are several considerations that must be taken into account. These considerations range from the people cutting and preparing the meats, to whether or not students will like the meats.

She said that after the meat

course is decided, the central bake shop in Trueblood has to be considered.

"We have to review the items that are for the bake shop to produce, looking at it from the standpoint of the amount of skill required, the number of employees required, the work load in the area and the possibilities of transport," Brumitt said.

See MEAL, Page 9

## Fishing trip ends in tragedy

SAUK CITY, Wis. (AP) — A report that walleye pike were biting near a railroad bridge on the Wisconsin River attracted three Chicago fishing buddies — all police officers — on an outing that ended in tragedy. They arrived at the river, hauling their small motor boat, on Saturday.

Waves from an open dam upstream began building soon after the men left shore and the boat capsized. Detective Fred Capetto, 42, clung to a seat cushion in the turbulent water and fought his way to the marshy shore. He and a sleepless night before finding help.

Sheriff Alan Shanks said Capetto's friends, detective Lawrence Ferenzi, 51, and patrolman Charles Schaffer, 38, were missing. Rough waters forced an end to the search

Sunday night. The effort was resuming Monday.

Shanks said Capetto was found by a jogger Sunday morning, and that Sauk County deputies had located only the boat and two life preservers.

"It all happened so fast, just survival was on my mind," Capetto said.

# MEAL from Page 8

Food service has its own truck and ships things from its storage areas to the cafeterias.

All of these considerations are taken into account so difficult tasks are not scheduled one meal after another, Brumitt said.

The menu then goes before a committee, which is composed of a test kitchen dietician, interested students from each of the three residence halls, a cook who looks at the work load and equipment involved, and a unit manager from one of the cafeterias.

The committee also pulls out the menus from the year before and discusses what food to put on the menu. At this point a cohesive menu is decided on.

Dorothy Trueblood, who has been unit manager at Trueblood Hall since 1978, said there are many things to take into account when planning a menu.

"Color, texture, likes and dislikes and combinations are many things to take into consideration," Trueblood said.

The menu is kept as current as possible in relation to residents' tastes, Brumitt said.

"We have the gyro sandwich, which is becoming a little bit

popular and Mexican food. There are more people who are not eating meat, so we have broadened that aspect of our menu planning," Brumitt said.

Brumitt said the menu planning committee is helpful in finding out what students' current likes and dislikes are. Aside from the menu planning committee, students' likes are measured by what students are eating outside of the cafeterias.

"I picked up the idea for the baked potato bar from other universities. We serve baked potatoes and offer various toppings. Sour cream, whipped butter, bacon bits (not imitation) mushrooms and grated cheese. They can top it the way they want," Brumitt said.

In addition to the menu committee, each unit manager meets with students who are

served by the cafeteria. Brumitt said this is a sit-down-and-discuss meeting in which the students approach the managers with ideas. The ideas are then evaluated as to whether they can fit into the menu and what the cost value is.

"That's how we got carbonated beverages into the dining halls in the first place, because for several sessions students asked, 'Why can't we have carbonated beverages?'" Brumitt noted.

Being registered dieticians, Brumitt and the managers were afraid that students would start drinking too much pop and too little milk.

"Finally we gave in and found out those who really, truly like milk will drink it anyway," Brumitt said.

### Peoria restaurant closed; botulism suspected in foods

PEORIA (AP) — At least 10 people who ate at a popular Peoria restaurant over the weekend have been hospitalized — three in critical condition — for suspected botulism poisoning, health officials said Monday.

Seven of the victims were reported in serious but stable condition, officials said at St. Francis Hospital and Methodist Medical Center, where some of the ill were taken.

The restaurant, the Skewer Inn in Peoria's North Woods Mall, closed voluntarily "as of today," a city health department official said.

Foods suspected of causing the illness were pickles, hamburger meat and cheese. The meat and cheese all had been eaten when health officials arrived at the restaurant after being alerted by area hospitals, but remaining pickles were confiscated and flown this morning to the Centers for Disease Control in Atlanta for testing, said Sam Churchill, a health department sanitarian.

# Students get taste of prison

CHICAGO (AP) — "Guards" took a brutal stance and some "prisoners" who couldn't take the insults, solitary confinement, strip searches and night harassment of an intense high school prison project risked dangerous escapes. DeEtta Rader, 16, another "prisoner," jumped from a second-story window to the street.

She became confused in a frenzied search for a friend's house and a passerby who noticed her prison garb — hospital scrubs — pointed her out to the class teacher, John Blake, who was searching for her by car.

Blake cornered her in a back yard and placed her in "solitary" where she stayed until 3 a.m. Sunday, the end of the project.

The project was designed to give 95 participating students, who chose to be "guards" or "prisoners," a simulated insider's view of the U.S. prison system.

Overacting by the guards was not anticipated by those who had chosen to be inmates.

Michelle Rohde, 15, had to run the gauntlet of guards en route to solitary.

An "assistant warden" snarled: "Think it's funny? Look at that wall and wipe that smile off your face!"

She had disobeyed prison rules by looking out of her "cell" in the corner of a classroom at Immaculate Heart of Mary High School of suburban Westchester, which participated in the project with St. Joseph High School of

Chicago.

Blake said he started the project Friday evening after considerable discussion among teachers and administrators, and written parental consent was required. The experience was meant to teach, not to scare, he said.

# Company babysits children

SKOKIE (AP) — Workers at Fel-Pro Inc. don't have to worry about where their preschool children are. They're just half a block away at a company-sponsored facility.

It's the first manufacturing company in the state to provide the on-site care.

Parents pay \$40 a week, which the company matches.

But David Weinberg, vice president for manufacturing, says that more companies don't provide the service because "it's expensive."

"Even when it's split with the employee, it's still bound to cost several hundred thousand dollars a year."

Fel-Pro, which makes gaskets and sealing products, is a "family-held corporation" that feels "a sort of commitment," Weinberg says.

About one-third of the com-

pany's workers have preschool children, and the idea was met with enthusiasm.

The day-care center opened in July with 21 of its 22 slots filled by 2- to 4½-year-olds. The program eventually will be able to accommodate 150 children.

Scott Mies, director of the state-licensed facility, is the former director of a day-care center in Evanston. Mies, who has a bachelor's and master's degree in early childhood education, heads a staff of four.

Parents can visit during the day, and officials hope to be able to work out a schedule that allows children and parents to eat lunch together.

"Just the security of knowing their kids are close, if something does happen, gives (the parents) a good feeling," Mies said.

**THE CAPE** Girardeau Area Chapter of the Ninety-Nines, Inc. International Organization of Women Pilots will meet at 6:30 p.m. Thursday at The Prime Time. Jerry Reynolds, meteorologist with the Geography Department, will be the guest speaker.

# U.S. firms make Soviet sales

**MOSCOW (AP)** — With yellow Caterpillar bulldozers gleaming in the Indian summer outside, Soviet and American trade representatives called for increased commerce between the two nations Monday at the start of the first U.S. trade exhibition here in six years.

U.S. officials said 105 firms were represented in the show, called Agribusiness-83, which is aimed at opening the Soviet market to American farming and food-processing techniques and equipment.

The show could bring American firms millions of dollars in orders, and it was heralded by both its U.S. and Soviet organizers at opening ceremonies that drew Soviet Deputy Foreign Trade Minister Vladimir N. Shushkov, U.S.

Ambassador Arthur Hartman and Dwayne Andreas, chairman of Archer-Daniels-Midland Co.

"Our trade efforts may be even more important than arms control," Andreas said. "The most important development from this is to expand good relations and thereby reduce tensions in the way that trade can do."

Andreas, who is an executive committee member of the U.S.-U.S.S.R. Trade and Economic Council, the show's sponsor, said all the U.S. equipment, from giant combines to laser devices for keeping earthmoving equipment on a steady course, was not subject to trade restrictions.

# Women ruggers plaster Mizzou to tune up for regional tourney

By Sherry Chisenhall  
Sports Editor

A 36-4 pounding of Missouri Saturday afternoon should pace Women's Rugby Club for a strong showing in the Midwest Union Tournament and possibly the club's first invitation to the national championships.

Club spokesperson Maria Erickson said the team wanted a win Saturday to go into the Midwest regional in East Lansing, Mich., next weekend. The SIU-C club racked up the momentum it wanted, at the expense of the club from Columbia.

SIU-C was led by Anita Coleman, who put 12 points on the scoreboard by cashing in on three tries in the first half. Erickson added three conversion kicks, while Missouri managed only one try, off of a line out just inches from the goal line, giving SIU-C an 18-4 lead at halftime.

The Tigers never recuperated from their rest at the half and failed to put any points on the board the remainder of the match.

SIU-C didn't take a vacation the second half, though, with Coleman adding another try and Erickson another conversion. Club President Barb Cavoto added another four points for SIU-C, while the scrum also came up with a try in the second half.

Erickson said the team played well Saturday. "We played really well, really together," she said. "Columbia beat us last season. This time we were in a lot better shape, though, and ran them into the ground. They were really getting tired."

Erickson said the team was tackling aggressively, which hasn't always been the case this season. She said the club shuffled its lineup, with injured scrum half Shannon Maulding sitting out the match.

Laura Michalek, who had never played at scrum half, stepped in for Maulding and played a good game, according to Erickson.

SIU-C efficiently shut down Missouri's running game, while the Tigers were unable to retaliate.

"One of our biggest assets is our quickness," Erickson said. "We ran over them (Missouri). We have some fast people, like Anita (Coleman). Our speed is one of our strongest areas."

Erickson said the team still had some problems Saturday. "Our line outs were really sloppy," she said. "Instead of pulling the ball down and getting it to the scrum half, we were slapping it around and hoping someone on our team would come up with it."

SIU-C got strong support from the scrum and back line, which Erickson attributed to the strength of the players.

"Our scrum is pretty big and really strong," she said. "P.J. Jordan is one of the better hookers around, and Laura Michalek and Renee Plotman are both strong. We were a stronger team than Missouri, and better conditioned."

SIU-C will play five matches in the Midwest Union Tournament in Michigan next weekend. Erickson said the top two teams advance to nationals, and the closest SIU-C has gotten was an alternate in 1982.

# Royals' pitcher pleads guilty to drug charges

KANSAS CITY, Kan. (AP) — Vida Blue, a Cy Young Award winner who pitched for the world champion Oakland A's in the 1970s, pleaded guilty to a drug charge Monday, then appeared before a federal grand jury hearing evidence in a cocaine investigation.

Three of the pitcher's former Kansas City Royals teammates pleaded guilty last week to similar drug charges.

Blue, 34, who won the American League Cy Young award in 1971, pleaded guilty to a federal misdemeanor charge of possessing three grams of cocaine.

The grand jury went into session a short time later, and Blue was seen going into the

jury room early Monday afternoon.

Willie Wilson, the 1982 American League batting champion, first baseman Willie Aikens and outfielder Jerry Martin pleaded guilty last week to attempting to possess cocaine.

All four have been released on \$5,000 unsecured bonds and face maximum penalties of one year in prison and \$5,000 fines. Sentencing for the four is scheduled for Nov. 17.

The government said plea agreements with the players charged last week included stipulations they would not be prosecuted further in the government's seven-month probe.

## GYMNAST from Page 16

team to Budapest.

Until a few weeks ago, Meade thought he was going to have two gymnasts in the World Games. Former Saluki Brian Babcock qualified for the U.S. team, but tore the patellar tendon in the front of his right knee and is sidelined indefinitely. He will not be able to compete in the World Games.

Meade said Babcock is on the road to recovery.

"He's coming along well," Meade said. "He's doing a lot of strength work, and I don't think his recovery will take as long as his other knee did."

Babcock had redshirted a season when he tore ligaments in his left knee in February of 1982.

After coming back from the injury, he's bid for a berth on the 1984 U.S. Olympic team is again threatened. Meade said Babcock's right knee has always been tender, but he doesn't doubt the gymnast will again work his way back to competition.

"Even though he won't get to compete in the World Games, something came of it," Meade said. "It was satisfying for him to find out he belongs at the top of the heap."

# Spikers finish tournament 0-4

By Sherry Chisenhall  
Sports Editor

No phrase could pinpoint the Saluki volleyball team's problem more than the words of assistant Coach Tino Reyes: "You can't gain momentum by losing."

The spikers dropped all four of their matches in the Texas-Arlington Classic over the weekend to lower their record to 6-16, far below Coach Debbie Hunter's pre-season goal of .500. Hunter and her coaching staff have tailored the team's training toward one ultimate goal — the Gateway Collegiate Athletic Conference championship. Hunter's club opens its conference schedule Friday at Wichita State, but the team failed to pick up the momentum over the weekend that could be necessary to finish at the top of the GCAC.

Hunter said last week that the Texas-Arlington tournament would be a crossroad for the team, where it would have to go

one direction or the other. The squad certainly didn't go the direction Hunter had hoped.

SIU-C opened the tourney with a five-game loss to Houston. The Salukis lost the first two games 9-15, 4-15, but came back to tie the match up at two apiece with 15-13, 15-5 wins. Houston took the decision in the last game, though, claiming a 6-15 win for the match.

In their second match of the invitational, the Salukis took on a powerful Louisiana State club, which had dumped SIU-C once already this season. LSU blasted the Salukis in straight games, 1-15, 5-15, 5-15.

Saturday morning was supposed to be the big match for SIU-C. The Salukis were paired with host Texas-Arlington, a team which handed Hunter's club a key loss in the Brigham Young University Preview and was instrumental in dropping the team to the bottom of the standings.

Hunter said last week her

team was eager to avenge that loss, but the club came up short again. Texas took the first game 7-15, but SIU-C came back to claim a 15-9 win in the second game. Arlington recaptured the momentum, though, as well as the final two games and the match, with a pair of 3-15 wins.

SIU-C closed the tournament by dropping a four-game decision to Lamar. The Salukis opened by winning the first game 16-14, but Lamar came back to sweep the last three games 13-15, 10-15, 5-15.

Hunter was not available for comment, but Reyes said the source of his team's struggle in Texas was evident.

"The teams we played down there have improved all season," he said. "They've been moving upward while we've been moving down. Everything is relative. Most teams have been improving each week, but for us it's like starting over in the middle of the season."

Reyes said the conference goal is far from out of reach.

"It doesn't matter if we lose every game until the conference rolls around," he said. "There is still hope. I hope this slump hasn't turned the kids into mental cases. We can regroup."

"Losing doesn't help build confidence and it doesn't gain momentum. We did play better (in Texas) than we did against Ottawa. It's just that the other teams have been improving."

Most of the team's difficulties are reflected in the stat sheets. For the season, the Salukis have only a .176 attack percentage. The club has struggled with consistency from the service line, averaging 7.3 service errors per game.

SIU-C has also experienced problems with setting. Hunter said setter Lisa Cummins has had difficulty adapting to the pressure of directing the team's 5-1 offense, but she hopes the sophomore can adjust the mental aspect of her game in time for the conference showdown.

hands on the guy and causing a pass interference call."

Jackson went into the game after an injury to starting cornerback Tony Haywood. Haywood went down late in the first quarter with a sprained ankle. He was carried off the field, had his ankle wrapped on the sideline and went to the locker room on crutches. Ironically, Haywood started the game in place of an injured Terry Taylor. Taylor was held out of the game because of a knee injury, which Dempsey said was a little worse than originally thought.

Dempsey said Taylor is "one

of the best guys on the team" and is tough to replace. Haywood is also tough to replace.

Besides being one of the top substitute cornerbacks for the Salukis, Haywood is also the team's top punt returner.

Prior to the Southwest game, Haywood was ranked fourth in punt returns in the MVC. Haywood has returned 16 punts for an average pickup of 7.6 yards.

Besides missing Haywood and Taylor with injuries, the Salukis were without other key players for the game.

Guard John Heitbrink has a

separated shoulder and is not expected back until the end of season. Tailback Everett Wilson was still suffering from a hamstring pull from early last week and did not play. Center Tom Baugh missed the Southwest game because of an illness that had limited his practice time last week. Split end Cecil Ratliff and tight end Richard Blackmon also missed the Southwest game because of injuries.

In addition to those injuries, defensive end Dan Wetzel suffered a sprained ankle and strong tackle Brad Pilgard injured his left knee.

## APPEAL from Page 16

arguments were heard from the club and the Travel Service. Representatives of the sports clubs approved the recommendations on a 14-8 vote in which 22 of 34 club representatives were present.

Cathy Rankin, coordinator of recreational sports, approved the recommendations and forwarded them to Bill Bleyer, director of intramural and recreational sports. Bleyer made the final approval of the five recommendations, which

the club appealed.

The club filed the appeal to Student Life and a final decision will be made by Will Travelstead, assistant dean to Student Life. Travelstead said he will reach a decision by Wednesday at 3 p.m. Travelstead said he can deny the whole appeal, make modifications on the original recommendations or completely delete the recommendations.

# Salukis remain No. 2; MVC honors Collins

By Jim Lexa  
Staff Writer

The Saluki football season is beginning to become just a little repetitive.

For the second week in a row, SIU-C received the No. 2 ranking in the NCAA I-AA poll. Eastern Kentucky, 5-0, was idle over the weekend and held onto the No. 1 spot.

For the fifth time this season, a Saluki player has been named a Missouri Valley Conference Player of the Week. Linebacker Fabray Collins was awarded the defensive honor, the fourth time this year a Saluki defender has won the award.

For the seventh consecutive weekend, the Salukis won. The Salukis beat Southwest Missouri State Saturday and raised their record to 7-0 with the 24-6 victory.

Against Southwest, Collins recorded 13 tackles, caused an interception and deflected a pass. For the season, Collins leads the Salukis in tackles with 85 and is tied for the lead in fumble recoveries with two.

Jeff Miller, quarterback for Indiana State, where the Salukis play Saturday at-

Fabray Collins

ternoon, won the Offensive Player of the Week Award for his performance against Wichita State.

Miller completed 14 of 28 passes for a career-high 249 yards and a touchdown in the No. 14-ranked Sycamores' 24-22 victory. He also rushed for 38 yards and scored on a 1-yard touchdown run.

The Saluki defense yielded

only 17 yards passing and 175 yards in total offense against Southwest. It almost completely shut down the Bears' passing attack, allowing just two of 15 passes to be completed, while intercepting two passes.

Fourth-string cornerback Tony Jackson recorded his first interception of the year in the Southwest game, while B.T. Thomas intercepted his third pass of the season.

"Tony Jackson played an outstanding game for a young player," Saluki Coach Ray Dempsey said.

Jackson, a freshman, made two tackles and, at the beginning of the fourth quarter, broke up two Southwest passing opportunities. The first one occurred when quarterback Tom Leeker threw to split end B.J. Torbert in the end zone.

On the next play, Jackson covered halfback Keith Williams and just missed intercepting his second pass of the game.

"They were going after him," Dempsey said. "He didn't get nervous, such as by putting his

# Gymnast qualifies for World Games

By Sherry Chisenhall  
Sports Editor

Saluki gymnast David Lutterman, a sophomore from Nelson, New Zealand, has qualified to compete for New Zealand in the World Games Oct. 23 to 29 in Budapest, Hungary.

Lutterman last competed in the World Games in 1981 in Moscow, but has been on the SIU-C campus during the qualifying meet at the end of August the last two years.

Lutterman is the top-ranked gymnast in New Zealand and won the all-around competition two years ago.

Saluki Coach Bill Meade said Lutterman is in shape for a good meet in Hungary.

"David has looked very good, and I'm pleased with his progress," Meade said. "The meet will be good for him, and it can't help but be good experience."

"His preparation has been good, and he has the confidence needed to carry out a successful

David Lutterman

competition." Meade said he was confident Lutterman would qualify for the team, but the question was whether New Zealand would raise enough money to send a

# Rugby Club appeals results of hearing

By George Pappas  
Staff Writer

The SIU-C Men's Rugby Club on Oct. 7 filed an appeal on recommendations made by the Executive Council of Sports Clubs in a hearing which stemmed from charges filed against the club early last month.

The ruggers were charged with having alcohol and illegal substances in a University vehicle during a bus ride from Macomb to Carbondale on Sept. 3. The charges were made by Recreation Center officials after they received a letter of complaint from the SIU-C

Travel Service. The Travel Service received the complaint from the bus driver.

The Executive Council recommended that the club not be allowed to schedule matches away from SIU-C, that the club should be barred from use of Travel Service vehicles and that the All Ghoul's tournament Oct. 28-30 at SIU-C be cancelled.

The Council also recommended that the club be placed on probation until 1985 and that funding from the Rec Center be withdrawn for one year.

The recommendations were made by the five-member Executive Council after

## NCAA I-AA Football Rankings

Ranking	Points	7. N. Texas St. (5-2)	52	14. Indiana St. (5-2)	28
1. Eastern Ky. (5-0)	80	8. Furman (4-1-1)	47	15. Delaware St. (5-1)	22
2. SIU-C (7-0)	75	9. Eastern Ill. (6-1)	45	16. Nevada-Reno (3-3)	19
3. Jackson St. (7-0)	71	and Idaho St. (5-1)	45	17. Weber St. (5-1)	12
4. Holy Cross (6-0)	70	11. Middle Tenn. St. (5-1)	43	18. McNeese St. (4-2)	10
5. S. Carolina St. (6-1)	63	12. Tenn. St. (4-1-1)	42	and Southern U. (5-1)	10
6. Northeast La. (5-1)	57	13. Colgate (4-2)	30	20. Boston U. (4-2)	7

Rankings are decided by a board of four NCAA officials, representing four geographic regions. After pooling information obtained from advisory panels, the officials award votes for positions. A first-place vote is worth 20 points, while a 20th-place vote is worth one point.

# Golfers earn stunning second in tournament

By Sherry Chisenhall  
Sports Editor

A team has really accomplished something when it catches even its coach by surprise.

But women's golf Coach Mary Beth McGirr couldn't have been more pleasantly surprised than when her team grabbed a phenomenal second-place finish in the Lady Kat Invitational over the weekend.

McGirr had predicted her team could finish in the middle of the 15-team field, but only if the squad managed to put together its best three rounds of the season.

The first round of the 54-hole tourney was rained out, but the Salukis surged in Friday to fire a 311, which they followed Saturday with 307. SIU-C's 618 was two strokes ahead of third-place Mississippi State, but well behind host Kentucky.

The Wildcats blew past the rest of the field, blasting rounds of 305 and 292 to outdistance SIU-C by 21 strokes and claim the title in its own tournament for the first time.

Michigan State and South Carolina finished in a tie for fourth, nine strokes back of

MSU, while North Carolina was one stroke out of the running for fourth.

The Salukis scrambled the lineup in individual finishes, too, with the team's No. 5 qualifier finishing No. 1.

Senior Sue Arbogast, who played No. 1 for the team last year, has struggled through much of the fall season and has played at the bottom for the last two tournaments.

Arbogast turned it around in Kentucky, though, firing a four-over-par 76 and a 77 to finish in a tie for sixth place overall among a field of 78 golfers.

Kentucky's Paula Davis kept a firm grip on the lead, carding an even 72 and an outstanding four-under-par 68 for a tournament record. Davis' 68 included five birdies and a bogey on the backside, which was also a record.

For SIU-C, senior Lisa Bremer was one stroke behind Arbogast to finish in a tie for eighth overall with a pair of 77s.

The team's other senior, Barb Anderson, finished No. 1 for SIU-C the last two outings, but settled into third on the team last weekend. Anderson started slow in the tourney with a disappointing 82, but came back

to fire a one-over 73 the second day and finish 11th overall, one stroke behind Bremer.

Sophomore Jill Bertram was fourth for SIU-C, opening with a 76 and finishing up with an 80. Bertram kept the gap close behind her teammates, finishing one stroke behind Anderson at No. 3 and only three behind Arbogast at No. 1.

Junior Lisa Kartheiser, who has kept the team's second slot locked up, broke her streak and finished at the bottom of the Salukis' slate. Kartheiser carded an 82 and 83 to finish nine behind Bertram.

McGirr said the team's performance caught her by surprise.

"This ranks right up there with our second-place finish at regionals in '81," she said. "You can go out and win a small tournament, but this kind of thing means so much more."

"I've kept saying this team is good and I know they're good, and I'm happy they finally went out and showed it. After the first round the other teams thought it was a fluke we were in second, so it was a good feeling to play even better the second day."
