WIDB concerned about large deficits

By Rod Stone
Staff Writer

The people in charge at WIDB and the president of the Undergraduate Student Organization are worried that the consistent deficits WIDB is running are putting the future of the student radio station in jeopardy.

"There is always a lot of pressure on any student group running a deficit," said Nancy Harra, director of the student development office and fiscal officer for WIDB. She added however, that WIDB is unique in that it has large deficits. WIDB's deficit at the end of January was $9,296. That figure had dropped to $7,133 as of Wednesday, according to Harris.

"It fluctuates between $7,000 and $9,000 consistently," Harris said.

Jim Haggarty, general manager of WIDB, said it has been some time, perhaps even several years, since WIDB has turned a profit.

Because of these statistics, he said, it's a possibility that WIDB could go under this summer when advertising revenues fall considerably, unless some kind of change is enacted.

Haggarty and the WIDB staff are exploring different alternatives that will help alleviate the station's financial difficulties.

One avenue that Haggarty procured in Jerry Cook, president of the USO, was the transfer of WIDB's assets to the Radio and Television Department. Cook asked Haggarty to gather more information about the specifics of the move and presented the proposal to him so he could make an informed recommendation to the USO Student Board. As far as $50 and $90, he said, "as it seems it is only a possibility that WIDB is in the long term." Cook also didn't have a lot of specific goals in mind. While he doesn't support the idea of moving WIDB to the Radio and Television Department without maintaining the current level of student involvement, he said, "neither do we want to leave the situation as it stands now. If the problem with the transfer is that it will cost money, which WIDB is running a short of.

Cook said that he would be willing to support a loan to WIDB providing they provide me with a detailed, substantive and justifiable proposal for their plan of action.

The loan would be paid back by WIDB with the station becoming stable and get back on its feet. The transfer of WIDB to the Radio and Television Department has a couple of advantages.

The department would oversee the spending and finances of the station to a point where they would be under control. Haggarty said.

Also, "There is a great deal of expertise among Radio TV.

Primary to cost about $20,000

By John Schrag
Staff Writer

The right to vote has never been freely granted. And although voting is now considered as a natural right, it still has its costs.

Based on figures obtained from the Jackson County Clerk's office, the county will spend more than $10,000 on Tuesday's consolidated primary election and Carbondale High School referendum. For that price, the fate of the high school's plans for consolidating will be determined, candidates in six Murphy physiognomy wards will be chosen and one candidate for the Carbondale City Council will be eliminated.

While it may seem that $10,000 is a lot of money for this, John Jackson, an associate dean of the Graduate School, said it is more important for people to see the value of the democratic process than to focus on the cost of this specific event.

"It certainly looks stupid to spend that kind of money," he said, "but as silly as it seems, I think that when you look at the broader picture, it's a legitimate use of money.

County Clerk Robert Harrell agrees.

"Democracy costs money," Harrell, whose office is in charge of all public elections in the county, echoed, as well as legally, you can't try to talk someone out of running for public office or putting an issue up for referendum.

"The existence of primary elections and referenda grew out of the political reform movement of the 1920's. They are created to allow direct public participation in politics and to remove the decision-making process from the hands of a few elite politicians.

Jackson, who also teaches political science at SIUC and serves on the Jackson County Democratic Committee, said the costs of primaries and referendums are "just another example of government getting more expensive, not a waste of money. He said, "I see it more as a moral responsibility to the people, the voters, but there's a lot more money being wasted in other places.

Illinois' election consolidation law became effective Dec. 1, 1989. It established standard boundaries and specified five dates in a one-year period when public elections must be held.

The law also gave the individual counties control of the dates of elections. It stipulates that the counties pay for them and

Diverse candidates discuss city issues

By Karen Terry
Staff Writer

Elliot Bevis, Keith Tushorn and Matthew Creen all want a two-year seat on the Carbondale City Council. That's where any similarity between the three.

Two of the candidates will win spots on the April 11 general election ballot after the votes are counted in Tuesday's primary election.

Recruit interviews with the three revealed a diverse array of views on city issues and problems.

Bevis, a 44-year-old real estate salesman, is the only candidate who advocates building the downtown conference center if the Illinois Supreme Court upholds the city's method of land acquisition for the project.

Carbondale needs the conference center to encourage downtown business owners to improve their businesses and to stimulate economic growth in the city, according to Bevis, a 35-year member of the Zoning Board of Appeals.

A number of developers became interested in beginning other projects, such as a mini mall across from Lewis Park Apartments, when they believed the conference center would be built, Bevis said.

Bevis conceded that it may be difficult to find another developer with the money and inclination to back the project since restaurant owner Stan Hoye withdrew his support.

But, Bevis said, "The city has expended a lot of money and turmoil to this point. The city owes it to the citizens to push to try to get it done."

Tushorn, 27, a retail buyer and clerk, and Creen, 26, a SIUC pre-law student, both opposed the downtown conference center for different reasons.

Tushorn said the center would knock out two blocks of small businesses, the city's strongest base for a good economy.

Downtown Carbondale does not have enough appeal to draw conventions, and revenue generated by a convention center probably would be reinvested in other areas, rather than Carbondale, he said.

Tushorn also said the center would be "undesirably" by the Marion convention ce-ler-ler which is under construction.

"I don't think the conference center would get the kind of support it needs to stay alive," he said.

Creen said the conference center wasn't a very good idea. He said he didn't think that it would benefit a majority of citizens, because Carbondale does not have enough market for the center.

Creen said he sees a market for a public transit system in Carbondale. He proposed a line to connect people in all areas of the town with businesses and relieve traffic and parking congestion. "I think it could be very large in the town in many ways," he said.

Operational costs of a transit system could be met by selling advertisements displayed on the side and outside of buses, Creen said. Funds to purchase a bus, he said, could be taken from the present city budget without a tax increase, according to Creen. He suggested money also be allocated for the downtown parking structures that are being considered for a transit system.

Also, Tushorn and Creen agreed that the idea was a good idea, but said it could not work in its current form.

Effect of new charge not known yet

By Vicki Olgeazy
Staff Writer

The effect of a new service charge assessed on delinquent bills owed to the University by students is not known yet, but one administration official said Thursday: "It looks like it's doing what it's intended to do." "From comments made at the Bursar's Office a week before the bills for Feb. 15 were processed, there was a lot more payment traffic than normal," said James Belt, assistant to the vice president for financial affairs.

A 1.5 percent service charge was assessed on any minimum amount (due that was unpaid on Feb. 11) on the bills dated Feb. 15 for the first time, Belt said.

USO favors change in unit's name

By James Derk
Staff Writer

The Undergraduate Student Organization's Executive Cabinet supports a proposal to alter the name of the General Academic Programs unit to reflect the functions of the unit, the chairman said.

The General Academic Programs unit oversees the general studies program, the pre-major advising center, the University's Service Center, the University Studies bachelor's degree program, the Center for Professional Development, the University Studies for Adults and several other programs.

The program has a current enrollment of 1,500 original students waiting to get into overcrowded colleges, freshmen or students with undecided majors.

The only major change in the program would be the inclusion of Army ROTC and Air Force ROTC in the unit.

The service charge was implemented this semester to help combat an $800,000 delinquency in tuition and fee payments.

"It is hoped that the service charge will encourage prompt payment," said Belt.

Both Belt and Bursar Thomas Watson said the success of the charge was yet to be known until final reports are prepared.

While a list of students may have paid bills last week, Watson said the cause is not known.

"Any time there is a deadline, there is heavy traffic," Watson said.

This semester, for the first time, graduation holds have been placed on students who owe money to the University.

Belt said the service charge is designed to benefit students only partially cover the 3,500 dollars needed to maintain the station's operation, Haggarty said, while the majority must be generated by the station itself.

WIDB, which is presently located in Wright 1, is a Recognized Student Organization, meaning that it falls under the jurisdiction of the USO and receives funding from student activity fees. Fees only partially cover the station's expenses, Haggarty said.

Some of the problems causing WIDB's deficit are the station's not being able to transmit open air, which limits the its access and, therefore, advertising dollars also.

The 960 per month that it costs WIDB to maintain phone lines to campus over which the station broadcasts its signal; and the rent it that it has to pay for its facilities in Wright 1.

WIDB employs about 130 full and part-time students and is considered an outlet for training and experience, Haggarty said.

He said that the station's goal is to become self-sustaining.

"It would be unfair for 96 percent of the students to have to do without the installment payment plan without paying their bills on time," he said.

If the delinquency were to continue Belt said the university could decide to continue the installment plan.

The university also has considered preventing students whose accounts are delinquent at the last monthly billing of a semester from using the installment payment plan the next semester. Belt said this would be a viable alternative or addition to the service charge if the service charge doesn't encourage payment.

Belt said the reorganization could possibly change its name to the School of General Academic Programs.
12 years to establish public trust in the city have failed, although they were subsidized by a special property tax, Tuxhorn said. Tuxhorn said the public does not feel that the city budget is too light to support one. Tuxhorn believes, however, that the tight budget must be shared with every governing body in the city, and ran their own elections instead of having judges who have proved their services worthy should be considered. Tuxhorn said a tax increase to support social services looks inevitable, but no one will certainly avoid it if at all possible. No one wants higher taxes, but everyone will benefit if the programs are kept afloat.

Bevis disagreed. "You can't increase the tax burden to finance social services. winner take all parties should be eliminated. Revenue sharing funds for social services organizations should be distributed to those that need it the most. Unfortunately, that means you have to divide the tax if there are two of them.

Tuxhorn said social programs should not be eliminated. "The city should try to keep as many as possible. The city is the center of the community where two of the judges are from. County elections should be discussed by the candidates.

"If someone comes up with a more efficient plan for handling elections, the city ought to cooperate in the effort," Bevis said. He questioned the views of some people that too much emphasis will be placed on making money from the election. If people are going to take the time and money for it without "gouging" the celebrating, he said.

Crenn said the present council's unreponsiveness to the needs of many citizens motivated him to run. "I will be able to offer some perspectives the council should have considered," he said. Crenn said he is asking for a younger council member who can bring new ideas to the city. "I will be able to offer some perspectives the council should have considered," he said. Bevis considers this election, which will choose three new council members and a new mayor, a chance to start fresh in city government. "The city has plenty to do without involvement in Halloween. If Halloween is promoted, more people will participate and the need for more security may be reduced," he said. Candidates also gave their reasons for running.

Lights out in D.C.? Reagan didn't pay bill

I bet that would send the White House staff scurrying for the Apple Computer. What would happen if they were a little short that month? I can picture the president and Caspar Weinberger looking over a secret defense outline because of a willingness not to pay the bill. Maybe he'd just tell Nancy they wouldn't be able to fly out to California for Easter after all.

Or he might go down to the friendly banker to arrange a short-term loan. That's not over-the-counter. The banker, of course, would want some collateral from the man who owns the house he lives in. Or, he might try for a business loan. A banker ought to be able to risk a few million bucks on the government, right?

I wonder if the banker would allow the administration to go into cold storage. That's the same kind of cold-stare I get when I ask for 50 bucks until payday. Probably not, because they'll probably go to lunch together later on.

The recent decision to promote Michael Dingerson is the first interesting dilemma for the SIU administration. Ms. Hansen claims that SIU needs to retain key individuals who have earned high honors in their fields. Yet we are not told how that promotion is going to be achieved.

Reports are also circulating that Mr. Guyon has used his discretionary fund to move a career reward selected faculty "star" on an academic basis. The question is, should SIU deciding in faculty or administrative rankings?

Applying, based on operations as opposed to actions as official recognitions, would be a "star" one is capable of retainingelfast them or the other way around. But why must outstanding performers (if indeed they are) be "forced" to "force" the administration to retain the best? If you can't "leverage" and if that tactic is pursued, what criteria are used to disregard the "counter-offer"? Based upon news reports, it appears that SIU is forcing itself to like you.

Now, the dilemma. This administration has incrementally moved toward an "equality" rather than an "merit" approach to dispensing "merit" rewards. For example it was recently decided that since there was only enough merit money to reward 10 of the faculty, "merit" rewards would be withheld, for all practical purposes. But the egalitarian approach is to reward everyone with something (unless we can't find someone to get with a competing job offer). The discretion to allocate money varies at College and Departmental levels appears to be the key issue in the merit component. We all have to share the burden of limited resources equally. The top 10 on the performance scale are granted incentive money. The others are put in-line to ask for special favors when, Io and behold, funds magically appear for the "chosen few."

Of course, one alternative is to specify high level performance standards, and then reward those who exceed. And why not have standards. Thus the stars would not be forced to play a leverage game.

That is, of course, a much easier way of doing "merit evaluation. Administrators apparently are not willing to face the hard decision of deciding who are the top performers — they will let the market decide.

If the administration used a performance evaluation system in deciding who should reward the top 10, the remaining 90 will be upset to be sure. Few academic institutions will allow themselves to believe they don't really belong in the star category.

As a result, the process leaves few satisfied. The majority view the "system" with suspicion, and soon call for "true equality" through collective bargaining. But merely, in an academic setting, philosophical positions rather than political ones should guide decision makers. (Of course cynics know that such prescriptions fail to meet descriptive reality). The question for this administration should be do we have a philosophical position beyond expedience? We have, in our administrative climate, a "market demand. The stars are waiting to hear...

Lawrence R. Jauch, Professor, Administrative Sciences.

C'dale doesn't need new school

Don Stacy is probably quite correct when he said that the school does not need a new school. The community has its own business community. For the "architecture" teachers to consider voters and all those businesswomen who will make a buck off the construction of the wonderful business opportunity.

For those of us who have to pay to send our children to the school, another boon offers that will not affect the vote. Those who will all suffer with for years.

The superintendent is pleased, as he should be, because he says people are saving money and his staff is not on a strong educational system. I assume that means that Mr. Martin believes that the quality of education currently going on at Central Campus is inferior due to the building. This is a curious position Mr. Martin pay some attention to know that there are not going to be able to fair salaries rather than having an aesthetically superior building. Too, he can't say a kids aren't rich. I am also quite aware that there are probably some teachers who will have to build. I would like to buy a new car also — just can't afford one.

Mr. Cherry indicates that the "main thrust" of the way voters is facts. If that is the case we should have what we propose have nothing to worry about. All we have been given has been the "vote" of the school (probably un­stated and assumed to be the cost of required things) of that same facts alone, given the austere economic cir­cumstances of a large portion of the workers in Carbonale, $3.2 million in extra tax money to me that 8.5 million is correct if I am wrong.

Finally, there are a number of questions voters should ask themselves before they are allowed to deteriorate? At the time the building was to be in the school board was sitting on it a million dollars and continue Am dial, $750,000. This kind of money has continued to increase and could be gradually improved into the schools. Why was the school air con­ditioned one year before the board decided to "ditch" the Air Conditioning? The cating? The school is not elementary schools sitting among the highest in the nation. Why? The elementary schools enrollments at the elementary levels. Why do we need a new school? Why are the voters are the students who do not exist?

I have spent my life in education and being educated. I want my son to have a relative less of the environment. My son to have a relatively less connection in education and less connection of the quality of education. As for the of the people to live in Carbonale for school is not the why industry is not here. Mr. Martin believes that the quality of education with substantial problems — high taxes, over-regulation by city government, school board, etc. — the sense, James A. Oberg, Carbonale.
Clean Sweep

With tails and top hat -- traditional dress for the chimney sweep of old -- Jesse Cox of Carterville makes his rounds, tending chimneys from Carbondale to St. Louis.

"I'd go to Alaska to clean one if someone paid my expenses. Travel makes no difference," said Cox, 34, who has been in the chimney sweep business for five years. He sweeps about 250 chimneys during the heavy September to November cleaning season, he said.

Cox got interested in the business while recuperating from injuries he received in telephone construction work. He also does chimney cap work and maintenance on fireplaces, oil and wood stoves.

The Ministerial Conference of Carbondale and Vicinity will present its fifth Black History Musical at 7 p.m. Friday at the Gillispie Temple at 810 Wall St.

A 50-voice chorus will present negro spirituals and hymns in the first portion of the program. Following this will be three productions featuring children, ages 3 to 16-year-old. The productions will be "The Begats," "The Good The Bad" and "Noah." The children will also present three songs from the musical, "Rainbow Express," by Lonnie Wolfe.

The third portion of the program will feature contemporary religious music, with two original compositions by local musicians.

Altgeld basement 'firetrap' work needed, director says

By Phillip Milian Student Writer

Altgeld Hall needs extensive remodeling, according to Robert Roubon, director of the School of Music.

There is a lack of proper space allocation in Altgeld, and the rooms are not acoustically designed," Roubon said.

As a result, students specializing in percussion must practice in the basement of the building, an area described by Mel Siener, coordinator of productions, as "the catacombs."

Percussion students sit wedged in the basement between water pipes and heating ducts, which they must duck under to get to their instruments.

"What is a parent going to think when he brings his kid here and sees this?" Siener asked, pointing out the 6-foot-6-inch ceilings.

"If he really going to want his son or daughter practicing down here?"

One freshman commented on his first impression of the basement: "It wasn't what I expected. Besides, I keep hitting my head on the ceiling and ducts."

The list of problems with the basement continues, according to Siener. "There are cockroaches all over the place that we can’t get rid of," Siener said. "It's really terrible down here."

Part of the basement is reserved for storage of opera props. Dresses hang on open racks in the middle of the room and boxes filled with supplies are stacked over halfway to the ceiling. "This place is a firetrap, but there's a real space problem," Siener said.

Records indicate that the original plans in 1957 for remodeling Altgeld, originally the Old Science Building, did not specify use of the basement for practice. Studies from 1978 and later produced recommendations for building new Music School facilities or extensively remodeling Altgeld.

Roubon said Altgeld's rooms were not designed for music. "The stairs, and shapes of the rooms are not as expected," Siener said.

See WORK, Page 8
Actor fires gun during disagreement

LOS ANGELES (AP) - Actor Herve Villechaize, who stars as Tattoo on ABC-TV's "Fantasy Island," fired a gun into the air en route to house the Art School Music School, Theater Department, and possibly the Vienna and Photography Department, but that doesn't seem to matter.

Villechaize would settle for a major rehabilitation project on Altgeld's east in the winter and the building from top to bot-

tton. "The inside could then be completely redesigned and made accessible," he said. However, he said engineers would have to be brought in to determine if that was possible.

Both Roubos and Siener noted that the University has put some money into Altgeld recently. "We had a lot of painting and paneling done last summer, and the University has been sensitive to our needs," Roubos said.

Siener agreed. "Improvement has been done, but much more is needed," he said.

David Grobe, director of facilities planning, is aware of the problems. The basement there is pretty dismal, but it must be improved because "there has been a lot of growth in the department," he said.

A complete gutting of a building, such as was done to Anthony Hall, hardly occurs anymore - be term "gutting" usually refers to a complete reworking of a building's electrical, plumbing and ventilation systems. "We put a ton of money into code enforcement, and it isn't readily noticed by the public," Grobe said.

The work done on Altgeld cost around $100,000 to $200,000, according to Grobe, and a com-

cipite renovating could cost 10 times that much.

Even if the money were approved by the state, it could take as long as five years to get the funds," he said.

Grobe said the University is pushing for remodeling in Pullman Hall. "We must con-

tend with other pressing situations. Altgeld is not very high on the list," he said.

Remodeling Altgeld has been brought up frequently, Grobe said, but no formal proposal has been made.

Clarence Dougherty, vice president for campus services, said remodeling Altgeld has floated up and down the priority scale over the years.

"A few years back there was considerable hope for a new fine arts center, and as a result, Altgeld's priority went down," he said. Capital now available is being used for housekeeping projects, not major renovations, Dougherty said.

"When our capital position is in such a state that we can consider a major remodeling project, then we'll have some decision-making to do," he said.

"Fingers crossed that if the capital funds situation position does improve, renovation of the Altgeld's priority goes up," Dougherty said.

Inadequate humidity control. Walls were cracked and our band instruments get mildewed about what to do. Cillema & 1101. Department. but that doesn't have to open. Inadequate humidity control. If the walls are cracked. and our band instruments get mildewed Rod Roubos had several ideas to associated to determine if money does. Roubos said. Two students win award in Datsun contest

Cathy Hughes and Joy Russell, seniors in the SIU-C Design Program, have won a $300 award from Datsun Motors.

Hughes and Russell won the money in an advertising design contest sponsored by Datsun and the 13-30 Corp. They submitted an ad for the Datsun 280 ZX Turbo in a competition open to universities nationwide. The 13-30 Corp publishes America's Datsun sponsored travel magazine that is distributed to colleges across the country. Their ad will appear in the magazine.

Richard Perry, assistant professor in design, said creating the ad was part of a class assignment in visual communications.

Perry said the students will be given the prize, plus a mounted copy of the ad in early spring by a representative of 13-30. This is the second year SIU-C design students have entered the contest.

One-hundred-five other schools competed. Perry said two other seniors in design, Clay Shock and Nancy Lambrinos, won honorable mentions in a different division of the contest.

This is the second year students from the Design Program have entered the competition.

Parcel post rules change Feb. 27

The U.S. Postal Service will put simplified parcel mailing regulations into effect Feb. 27.

Under the new regulations, parcels weighing 70 pounds or less and measuring not more than 108 inches in length and girth combined can be mailed from any post office to any destination within the United States. These standards apply regardless of whether the package is shipped by express mail, priority mail, parcel post or another fourth-class service.

Previously, most post offices in the 6,200 largest cities could not accept parcels weighing more than 40 pounds or measuring more than 84 inches.

THE ACADemy:

Women to review years of progress

Women's Services will present a workshop titled "Woman as a Crosier" at noon Wednesday in Quigley Lounge, Home Economics Building. The speaker will be Dr. Barbara Rosenzweig, a professor of nutrition, exercise, physiology, weight control, prevention of heart disease and sports injuries at the University of Illinois. Ms. Rosenzweig will lecture on nutrition, exercise, and health on nutrition, exercise, and health.

What about Life as a Crosier?

Crosiers are Catholic priests and brothers in each other in community life and prayer who serve the people of God through various ministries. This event will introduce the Crosiers, who will speak to community members.

Food, language is seminar topic

The Department of Speech Communication will sponsor a seminar from noon to 1:30 p.m. Friday in Communications 201. Larry Strauss, a professor from Sangamon State University, will speak on "A First Look at the Talking of Linguistic Signs and Text," which concerns the language on food, such as "Happy Birthday" on a cake.

Jackson wants bond issue support

By Thomas Desmond
Student Writer

Voters should support the proposed $17.5 million bond issue to consolidate the two Carbondale High School campuses, says John Jackson, professor of political science and member of a citizens' committee promoting the issue.

Voters in Carbondale High School District 165 will vote on the issue Tuesday.

As it stands now, high school freshmen are at the East Campus, East Walnut while other students are at the older Central Campus on North Springer. Jackson said the split campus system has meant problems in transportation and scheduling — such as freshmen wishing to take foreign language courses having to be bussed across town to the Central Campus where they are offered.

School officials have estimated students lose about 7.5 classroom days a year traveling between campuses. Jackson said.

Jackson said the administrative problems are many.

"A school nurse spends a half day at each campus, and often when the nurse is at the other campus a secretary has to make a decision about how sick a student is," he said. Jackson said he had visited the Central Campus, where the original building was put up in 1923, and he called it "pretty lousy" as a high school facility, probably the worst in Southern Illinois.

Additions were made in 1972, 1948, 1966 and 1967, he said, and have resulted in a "jodge-podge" of building styles with roof leaks, inadequate electrical system, plumbing leaks that cause the gym floor to buckle, high energy costs, asbestos ceilings and general deterioration.

He said the state has mandated that the Central Campus be brought up to health and safety standards, for which the cost is estimated at $3.25 million. He said $100,000 in "patchup work" will have to be done to the Central Campus for the next school year — even if the bond issue passes and work on expanding East Campus begins.

The bond issue would finance a proposed $5 million, 8,000 square foot addition to the East Campus building, constructed in 1967. The building, on a 41-acre site as compared to the 14-acre Central Campus, was designed to be built onto. Jackson said. The school board has set aside $750,000 for the project.

Consolidating the campuses — including closing of the vocational center in the former Richlands High School on East Main — would cut down on duplication of services and make possible, among others, things a more efficient library, Jackson said.

School officials estimate a saving of about $28,000 in transportation costs if the campuses are consolidated, he said.

Jackson said that if the bond issue fails, the $2.25 million to upgrade the Central Campus still have to be spent.

The bond issue would mean a tax increase of about $67 a year on a property with an assessed value of $10,000, or about 18.5 cents a day, Jackson said.

"We had all the students at the East Campus, the school could consolidate a lot of operations. I think the community would benefit from an improved school system beyond the tangible benefits for the students."

Jackson expressed mild optimism that the issue will pass, but noted that "this is not a happy time to be talking about any tax increase."

Steam tunnel romps could be dangerous

By Jennifer Phillips
Staff Writer

The temperature is a sweltering 130 degrees. The air is thick with dampness. The threat of danger lurks in the shadows.

No, this isn’t a scene from a mystery novel. It is, instead, a sight unseen by most people on campus: the network of underground tunnels which give Steam Plant workers access to steam pipes which run the University’s air conditioning and heating systems.

For workers, who know what they’re doing, there is no immediate threat of injury, said Tom Engram, acting director of the Physical Plant.

But ever since the tunnels were built in the 1950s and 1960s, students and other unauthorized persons have been using them for an underground romp in the dark.

“This is a very serious problem and a very dangerous one,” Engram said.

No one has ever been injured to Engram’s knowledge, but he stressed the possibility of injury is great.

SIU-C Security recently received a report that four people were sighted in the tunnels, but Sgt. Robert Drake said the police department doesn’t receive many such calls.

Since the tunnels are an unauthorized area, people caught in them could be arrested for trespassing, he said, and if they caused any damage, they could be charged with criminal damage to state property.

High pressure steam lines run through the six miles of tunnels. The steam in the pipes is heated at a sizzling 300 degrees.

Not only could a person be badly burned by touching a pipe that isn’t insulated, Engram said, but “a lot of people don’t realize that if a line ruptured, they’d be scalded.”

The tunnels, most of which start at the Steam Plant, are either square, rectangular or round, he said. Rectangular ones measure 6 feet wide and 7 feet high and round ones are about 3 feet in diameter.

The tunnels have lights which are controlled by switches at the ends of each tunnel.

Engram said he doesn’t know why people go in the tunnels.

“I don’t know if they’re making it a game, but someday, someone will have an accident. Then they’ll understand,” he remarked.

Engram said the Steam Plant has installed locked gates, but people either break the locks or find a way around the gates. The tunnels connect to the basements of some buildings, but there are also gates at these entrances, he added.

The tunnels are built of steel reinforced concrete and are inspected on a weekly or monthly basis. The steam system in the tunnels produces condensation which is brought back to the Steam Plant so the water can be reused.

All this moisture causes the tunnels to be wet and muddy, Engram said, and a person walking along in the dark could slip and “crack a skull.”

Large handles, valves and other obstructions are also potentially dangerous, according to Engram, who said someone disabled in a tunnel also has to contend with the extreme heat.

The tunnels’ ventilation system works just enough to keep the air moving toward the plant, he said. When plant workers are in the tunnels for long periods of time, fans are used and the area is opened up to provide cooler air.

Engram said Steam Plant workers have been trying for years to solve the problem of thrill-seekers and curious students walking through the tunnels. He said he and other officials are addressing the problem once again.

“Basically, these people have no business being down there, and someone could lose their life,” Engram said.

Travel abroad becomes easier

By Morgan Falnner
Student Writer

Now is a good time for college students to travel abroad, according to Thomas Saville of the International Services Office. Because of the strengthening of the U.S. dollar in Europe and other foreign countries, Saville said college students can more easily afford to travel abroad, especially now that two important discount services are available to them.

One service is the International Student I.D. Card (ISIC). The ISIC is administered and funded by the Council on International Educational Exchange and is a non-profit organization.

According to the Whole World Handbook, a guide for travelers, ISIC offers discounts including price reductions on transportation, student tours, study programs and language courses, reception services and contact with local students, student hostels, holiday centers and city guidebooks.

The handbook notes that not all 53 countries which honor this service offer all the discounts. England has the most discounts available to students, the handbook says.

The I.D. card costs $6 and is available to high school students and full-time college students. Students may apply for the card at International Services Office, 910 Forest St. or directly at the CIE's.

A discount service also is available from the American Youth Hostels (AYH), a non-profit international organization.

Benefits of being a member of the AYH include the right to use 7,000 youth hostels in 50 countries for roughly $5 per night, the right to participate in outings and trips, and a discount for concerts, museums, and other social events. AYH membership costs between $7 and $14, depending on age.

Both memberships have been available at SIUC for two years and about 15 students have taken advantage of the services so far according to Saville.

Health and Fitness Guide

PHYSICAL FITNESS

Open Recreation — Pulliam Gym is open from 11 a.m. to 9 p.m. Saturdays and Sundays until March 6 for recreational activities like basketball, soccer and volleyball. Special times aside for open volleyball play — 3 to 7 p.m. Sundays. Persons desiring additional information may call 536-5021.

Screaming for the Weekend Athlete — Program sponsored by Recreational Sports. Teaches proper techniques of stretching, warm-ups and techniques to prevent injuries. Sessions are still open for 7 to 8 p.m. Mondays in the Recreation Center Dance Studio.

MIND BODY SPIRIT

Herpes Self-Help Group — An informal group for students with herpes to share information, experiences and feelings. Time and place to be arranged, but group will begin meeting week of Feb. 3. Interested persons should arrange pre-group interview by calling the Wellness Center, 536-4441.

Sexuality: The Male Viewpoint — Workshop will cover topics such as sexual communication, myths about male sexuality and ways to feel more comfortable in a role of a relationship. Will meet from 7 to 9 p.m. Thursday in the Mississippi Room, the Student Center. No registration is required. More information is available from the Wellness Center.

Stress Management Group — Relaxation techniques and management of daily stress will be covered. Group meetings from 4 to 5:30 p.m. Wednesdays for three consecutive weeks, beginning Wednesday. Sponsored by the Wellness Center. Pre-registration is required at the Wellness Center.

Bread-Making Made Easy — Professional baker will explain how to knead, use whole grains, and get the bread dough to rise from 5 to 6 p.m. Tuesday. Sponsored by the Wellness Center. Pre-registration is required.

You're maneuvering 445 feet "guided missile frature through the navigational, hazardous, non-stop traffic of one of the world's busiest ports. But you'll dock safely. Because you know your equipment. You know your men. And even when the responsibility weighs in at 3,600 tons... you'll succeed. After four years of college, you're ready for more responsibility than most civilian jobs offer. Navy officers get the kind of job and responsibility they want, and they get it sooner.

Navy officers are part of the management team after 16 weeks. Instead of boot camp, officer candidates receive four months of leadership training. It's professional schooling designed to sharpen their technical and management skills.

Then, in their first assignment, Navy officers get experience that could take years in private industry. And they earn the decision-making authority it takes to make that responsibility pay off. As their management abilities grow, Navy officers can take advantage of advanced education and training in fields as varied as operations management, electronics, and systems analysis. In graduate school it would cost you thousands; in the Navy we pay you. And the Navy pays well. The starting salary is $17,000 (more than most companies pay!). And that's on top of a comprehensive benefits program that can include special duty pay. After four years, with regular promotions and pay increases, the salary is up to as much as $31,000. If you qualify to be an officer in the Navy, chances are you have what it takes to succeed. The Navy just makes it happen faster.

Navy Officers Get Responsibility Fast.
SIU-C graduate dissertation is one of top three in country

By Beth Winner
Student Writer

Patrick Melia, doctoral graduate of the Department of Higher Education, spent about two years working on his dissertation. Apparently he wrote a superior paper.

Melia’s dissertation has been selected as one of the three best in the United States for the 1992 school year. Recently, the National Association of Student Personnel informed him that his work was chosen for the competition. The final ranking of the three papers will be announced later this month.

John King, chairman of the Department of Higher Education, said, “It is an honor to have a dissertation chosen from SIU-C since this is a national competition.”

If Melia’s dissertation is chosen for first place, the NASP will publish his work, and he will be invited to present it at the national conference of NASP during April in Toronto.

His doctoral study was titled “The Contribution, Effectiveness and Future of Student Participation in Institutional Governance.”

Melia and his wife live in Carbondale.

Steel recovering, official says

By Robert Green
Staff Writer

The steel industry in America is in the red and staggering from the two one-two punches of imported steel and a worldwide drop in demand.

But, determined to make a comeback, the industry is undergoing a transformation from which it hopes to emerge slimmer and healthier.

There were some of the observations made by Jeffrey Mills, a project engineer with the Inland Steel Co. in East Chicago, Ind., when he spoke Wednesday to members of the SIUC chapter of the Institute of Electrical and Electronics Engineers.

Mills said before the lecture that imported steel accounted for a record 22 percent of the U.S. market last year. U.S. companies have had difficulty competing against the influx of cheaper foreign steel, primarily from countries such as Japan and Korea, which have just begun making steel at a time when overall world demand has dropped sharply.

The foreign countries have had great success in the U.S. market, Mills said, primarily because steel is much cheaper to produce in other nations. American steel workers are among the highest paid workers in the country, he said, and this puts the price of American steel at a competitive disadvantage.

According to a recent article in U.S. News and World Report, not one of the eight biggest U.S. steel companies will report a profit for 1982, and total losses are expected to exceed 3 billion dollars. As a result, the article states, over one third of the country's 60,000 steel workers have been laid off.

Mills said that Inland Steel, the fifth largest steel producer in the country, did not make a profit in 1982. "And probably won't in 1983," he said. The company has had to lay off or shorten the work week of over one-fifth of its employees.

He said that many of the country's laid off steel workers will never get called back to work, and he said even more layoffs will occur in the year ahead.

"If U.S. companies want to be competitive, we will have to shut down older and less productive facilities, and that will mean fewer jobs," he said. "But when we come out of this thing, we will be somewhat smaller but a lot more efficient."

Mills said he expects the demand for steel to pick up again in about three years, but until that time the domestic steel industry will be "in a state of upheaval."

He said that during this time the industry will try to cope with its problems by boosting productivity, controlling wages and by taking actions to curb the excesses of imported steel.

Last December, Mills said, the eight biggest domestic steel companies and the American Iron and Steel Institute filed a suit asking that the government require the Japanese to reduce their shipments to the U.S. by a third over the next four years and that an import surcharge be placed on Japanese steel.

The suit also asks that a favorable trade agreement between Japan and the European Coal and Steel Community be phased out.

Mills said the steel industry's plight is already producing a "lot of conversation between industry and government officials," and he predicted that the industry's current dark age should be over "by 1987."

Jeffrey Mills, the steel company's laid off steel

CIaun PEEIULL THE BUDEWERES ART COLLECTION AND HELP RAISE $1 MILLION FOR THE U.S. OLYMPIC TEAM.

We're bringing six timed Olympic gold medals to town in a way you've never seen them before on canvas. They are all part of Budweiser's Olympic Art Collection. A special program to raise $1 million to help train our Olympic Team for the 1984 Olympic Games in Los Angeles.

The athletes--Olympic hockey great Mike Eruzione, baseball star Bill Russell, and basketball star Wilma Rudolph--and distance runner Frank Shorter were all commissioned by Budweiser to create original paintings using the tools of their athletic trade--the slates, hocky sticks, running shoes, even a basketball--to create a professional portfolio. The result is truly something unique. And after you've done looking, you can take home a signed high quality lithograph of any one of the paintings. They're available on a carefully controlled, limited edition basis for just $100.00. In addition, we'll select a color lithograph for just $64.00.

There's no more beautiful way to support the 1984 U.S. Olympic Team than through Budweiser's Olympic Art Collection. So come see us at the exhibit. After all, we're Mike Eruzione's said. "Please make more paintings but there's only one Olympics."

Proud Sponsor of the U.S. Olympic Team

The BUDWEISER ART COLLECTION will be exhibited at the University Mall from February 22nd through the 27th.

Union Co. Wildlife Refuge site of public tour Saturday

The Department of Conservation will conduct a wildlife observation tour of the Union County Conservation Area and Wildlife Refuge beginning at 10 a.m. Saturday. The Union County Wildlife Refuge, near Warre, is known for its flock of Canada geese and as a haven for the bald eagle, wild turkey and white-tailed deer. Tim Basman, regional interpreter for the Department of Conservation, said the program is open to the public and those who attend will have a chance to see areas of the refuge that are closed to the public. Basman said the program is limited to the first 30 visitors who register at the refuge headquarters.

The refuge is located just south of Warre on Illinois 3.

FEMALE SUNGLASSES are getting smaller, while accentuate the 「cheek bone」and move in opposite directions. Since larger frames are also popular, low-slung temples are still popular. They accentuate the cheek bones, shorten the face and create a feminine look, Bandy said.

The trend in lens sizes is moving in opposite directions. Optical correction frames are getting smaller, while sunglass lenses are becoming larger. Frame colors are also changing, along with the choice is no longer confined to black, brown and tortoise. Bandy said. She said lavender is in and violet is an excellent color for frames. It makes “brown eyes browner and blue eyes bluer.” Dark frames age any face on which they appear, Bandy added.

She said that the tortoise type frame is making a comeback and that “metal are coming back big” in frame design.

“Make-up tint” lenses are the newest type of fashion lenses available. Five tints are strategically placed on a lens to give the appearance of make-up, Bandy said. These five-color lenses allow women to just put their glasses on and go without makeup because the tint serves the function of the makeup. Plus, she said, the tint will accentuate any wardrobe.

The top of the lens is blue or green and, when worn, gives the appearance of eye shadow. Bandy said. A blush tint is used on the lower part of the lens, darkening in hue as it moves toward the outer edge. The blush technique helps to create cheek bones or to accentuate them, she said.

The color in the center of the five-tint lens depends upon the optical correction needs of the individual. If someone’s nose is unturned, the center of the lens is clear to bring the eye out. For farsighted individuals, color is placed in the center to accentuate any wardrobe. See EYEWEAR, Page 21.

SIU-C grad finds work in Liberian education ministry

A 1982 SIU-C education graduate has taken a job as an education specialist for the Liberian Ministry of Education. Albert Coleman, a native of Liberia, received a doctorate in August from the Department of Educational Leadership. He returned to Monrovia in January to take up his new duties for the Liberian government. He had done post-doctoral study and research here since receiving his degree in August.
Sports Roundup

Gymnasts beat California

The men’s gymnastics team won its first meet of the season at UC Berkeley's 127-20 on 362-29. Wednesday night. Brian Babcock won his ninth consecutive all-around competition, scoring 37.36. John Levy placed second with 34.8.

Babcock took individual event titles with a 9.55 on pommel horse and parallel bars, and tied with Levy for first on the high bar with a 7.5. Tom Slomski won the rings with a 9.6. California’s Randy Windsworth, the defending NCAA vault champion, tied first on floor exercise with 9.5 and vault with a near-perfect 9.9.

The Salukis compete in the UCLA Invitational Friday night.

Campus race to aid Heart Association

The American Heart Association, in conjunction with the Department of Physical Education and the SIU-C Roadrunners, will sponsor a five-mile couples Love Your Heart road race around campus on Sunday at 5 p.m. in front of Pulliam Hall.

Each male-female team’s combined time will be calculated and posted against those in their combined age category. Awards will be given for the first, second and third finishers in each category.

Those without a partner may come to Pulliam before the race and be paired. There is a category for single entrants. Over 300 runners from the quad state area are expected to compete.

Registration forms are available at the J.C. Penney’s Sports Department in the University Mall, or by contacting Pete Carroll in Pulliam Hall, 453-2999. The entry fee is $4 per person, and should be submitted by noon Friday to the Department of Physical Education in either Pulliam or Davies Gymnasium. The cost is $3 the day of the race. Each entrant will receive a Love Your Heart and all proceeds will go to the American Heart Association’s CPR Fund.

Rugby club set for intrasquad game

The SIU-C Rugby club will have an intrasquad game at 1 p.m. Saturday on the rugby pitch behind Abe Martin Field, in preparation for its first game of the season, Feb. 26 in Nashville against Vanderbilt. Anyone interested in joining the team should attend the intrasquad game or call Rob Campbell at 529-3828.

CHHS to battle Herrin for title

The Carbondale Community High School Terriers, 87-24 over the last eight years of conference play, will attempt to win its fourth South Venice Conference Championship when it hosts Herrin at 8 p.m. Friday at the Central Campus.

SWM from Page 27

that Arkansas was rested for that meet and thus had at an advantage it will not have for the dual meet.

Steele also looked at the times and the rankings and is more cautious, giving advantages to each team.

"It will have to be a total team effort, it won't be just one that will make or break this one," he said. "We'll have to win it before the last relay.

Both teams are strong in the relay, as Arkansas has turned in a 3:02 in the 400 free relay, an event in which the Salukis won 3:06 last weekend.

The diving events will also be competitive, with Arkansas having the edge on quality but SIU-C with the edge on quantity. The Razorbacks have a very strong diver in Hanne Meyer, who picked up two wins from judges two weeks ago against Kansas. The Saluki counter with Jim Watson, Nigel Stanton, Jany Conseniu and Tom Westland.

Consenius was injured in practice last week and missed the Saluki invitational, where the other three turned in high-scoring performances. Watson and Stanton have qualified for the zone meet on both boards, while Consenius and Westland reached the mark on one and are close to reaching it on the other.

The Salukis have a definite advantage in the distance races. "We'll kill them in those," said Steele. "They play with Anders Griibbommar, Gary Brinkman and Mike Brown leading the way.

Arkansas has a strong sprint group, with Neil Brooks, Norm Wyatt and Chris Cantwell having turned in times ranking in the top 10 in the country, as has Saluki Kech Armstrong.

Vogel said the Cowgirls are strongest in floor exercise and carry a 9.3 average for five events. SIU-C's top three performers, Pam Turner, Jackie Ahr and Gina Hey, average 8.4 floor, but the team lacks Oklahoma's depth and must carry two lower scores.

"We won't be able to catch up to them in floor," Vogel said. "That's why it's so important for us to stay with them in the first two events, vault and bars, and get a slight edge in beam. We can't run week-to-week with them until floor then pull ahead."

Vogel said his team knows beam will be the deciding event.

"They know how important it is," he said. "If we can approach beam relaxed like we did against Indiana State, we'll be successful and it will be a close meet."

Vogel said Oklahoma will be one of the toughest opponents his team has faced this season. He said the Cowgirls can score 172 or 174, and are capable of notching 186 if they hit their routines.

The Salukis, meanwhile, are coming off two consecutive 170-plus performances. Vogel said he would like to see a minimum 175 point performance against Oklahoma, but he would prefer that the team got into the 175 to 177 range to improve their regional ranking.

The Saluki coach said he won't be concerned to see a few errors because several individuals have added difficulty to their routines.

Lori Steele has added a double back to her floor routine. Vogel said if she completes the trick in the meet it will be the first of her career and the first time it has been completed at SIU-C in ten years.

Ahr has finally completed a layout tsukahara in practice, but has yet to complete the vault in competition. Vogel said Ahr has also added difficulty to her bar routine, as have Gina Hey, Margaret Callcott and Joanne Oppenheim.

A major boost to Saluki scoring has been improvement in the bottom of the lineup. Vogel said Callcott and Mary Runck have steadily improved and have been consistent, taking some of the pressure off the top three gymnasts and giving them confidence in the ability of the others to score.

Vogel said to stay with Oklahoma this team will have to eliminate as many errors as possible and hope OSU is not so fortunate.

**SOUTHWEST**

from Page 28

home, roaring by MVC opponents tired out after the long trip out there. The key thus far has been their rear end 4-3 away from Las Cruces. Coach Allen Van Winkle respects their home court advantage.

"A lot of it has to do with the travel out there," he said.

Van Winkle also suspects that the Aggies have the proper style of play to do well at home.

"Offensive minded teams play better at home," he noted. "You need a little more discipline on the road."

New Mexico State is definitely an offensive minded team. The team is second in the conference in shooting, at a robust 51 percent accuracy rate, and score a healthy 80.4 points per game. They give up a lot of points too, 77.1 per game, but the Aggie defense is actually respectable enough. They are seventh in the Valley in field goal percentage defense.

The New Mexico State defense is powered by one of the best guard combinations in the league. Ernest Patterson scores 20 points per game. second in the league, and running mate Steve Colley is eighth with a 16.7 average. Between them they provide almost all the Aggie points, half the assists, half the steals, and incredibly, fully half the Aggie's three point shots.

They combined for 44 points in the Aggies 87-84 win over in SIU-C back on Jan. 12.

But that was in the sedate surroundings of Southern Illinois, which is not the Death Valley of the MVC. That's in the Great American Southwest.
CAGERS from Page 28

Chair Warning: She'll have her hands full Friday, drawing the defensive chores against the nation's sixth leading scorer (25.5 points a game), Lorri Harrison.

The Bulldogs, however, are a power-laden team, as SIU-C found out when they were somewhat effective in shutting down the senior center in the last matchup. In that contest, freshman guard Wanda Ford snuck into the middle to pick off a season-high 18 rebounds against the Salukis. But it was Kay Ruek (15 points, 9 rebounds per game) that turned out to be the Salukis' major nemesis. After a superb game on both ends of the floor, Ruek sealed the MVP status by calmly sinking two game-winning free throws with 11 seconds remaining.

Saturday will find SIU-C in Nebraska, to engage in a non-conference tilt with uptight Creighton. The Lady Jays have had a phenomenal comeback season after posting a dismal 6-21 record last season. But the Omahaans have turned their program around, compiling a respectable 13-10 slate thus far, including an 81-77 loss to Drake in double-overtime last week.

"They're going to be two very tough games," said Scott. "If we beat Drake, we'll probably get the second seed in the tournament. If we lose we'll stay at No. 3. Creighton can't be overlooked. They've improved tremendously and just look Drake into double-overtime," Scott said.

Drake's win over Creighton may have been a warning to the Lady Jays: CU's top player was picked right out of the Bulldogs' back yard this year. Freshman Connie Yori has taken the collegiate circuit by storm. averaging 21.5 points a contest this season. The Ankeny, Iowa, recruit has hit 55 percent of her shots from the field, and netted 41 points in an overtime win against Iowa State this year.

With Price back in the lineup, the Salukis will begin their final stretch for the second GCAC seeding (they still must beat Eastern Illinois Feb. 21) and, perhaps more importantly, a 20-win season. With at-large bids going at a premium, anything less will not likely impress the NCAA committee. And with a 14-6 record with only five games remaining, Scott will need considerably more than a strong comeback by Price to reach that plateau.

See Faber, the Salukis all-time leading scorer, has been a front-line staple in the absence of top-scoring Connie Price.
Tracksters hope to break out on top

By George Pappas

The women's track team will try to break out of a rut this weekend when it travels to the 11-team Illinois State Invitational in Normal.

So far, the Saluki tracksters have finished fourth among six in their first meet and fourth among six in their second two meets, but regardless of those mediocre finishes, Coach Claudia Blackman is expecting a good show from the women this weekend.

"If we're healthy," Blackman said, "we should finish in the top half." 

However, one of the Salukis' top sprinters, Ann Levine, had a small touch of the flu, Blackman said. The Salukis could heavily rely on her for the relay teams.

Blackman expects Purdue or Ohio State to come away with first-place Saturday. Ohio State beat Purdue by one point in Charleston on Feb. 5, when the Salukis placed fourth. She also expects a strong finish from Illinois State and Southwest Missouri:

"I'm really eager to see Southwest Missouri," Blackman said, "because they're in our conference, and I've heard they have a strong squad."

The Salukis' conference meet is in Charleston on Feb. 26.

Blackman also expects a good top-half finish because some Salukis will be seeded higher than they were in their first two meets. The Salukis were seeded in slower heats because many of them are freshmen and didn't have registered times. But many of the freshmen now have good times so they will be placed in faster heats and will definitely score some points, Blackman said.

"This meet will prepare us for the conference meet because four of the teams we'll be facing this weekend are in our conference," Blackman said.

Those teams are Illinois State, Bradley, Southwest Missouri and Western Illinois. The Salukis have beaten only Bradley.

The meet starts at 10 a.m. Saturday.

Women gymnasts host tough Oklahoma State

By Sherry Chenhall Staff Writer

" Tight" might describe too vast a space to accurately assess the point spread Herb Vogel anticipates when his women gymnasts take on (Oklahoma State at the Arena Saturday night.

Vogel said the outcome of the meet rests on his team's performance at the balance beam. "Beam will tell the story," he said. "Oklahoma is vulnerable on beam, but then again so are we. It will simply be a matter of who bobbles less."

"The first two events are really important," he said. "If we stay with them in vault and get decent mileage out of everyone on bars, we can make it a really close meet."

See GYM, Page 25.

Swimmers on the move to top Arkansas

By Jerry Marczewski Sports Editor

The men's swimming and diving team has a strong chance to change an earlier loss and move up in the rankings when it faces Arkansas Saturday afternoon.

And it's not only Saluki Coach Bob Steele who is feeling that way. His Arkansas counterpart Sam Freas is saying it, too, and with less hesitation than Steele.

The 10th-ranked Razorbacks finished with almost 200 more points than the 14th-ranked Salukis at the Midwinter Invitational in Lincoln, Neb., Jan. 14-15, but the dual meet this weekend should be a lot closer, Steele said.

"It will be a very competitive meet," the SUU coach said, "but according to Freas, 'Southerns has he be considered the odds-on favorite, even though we're ranked ahead of them.'"

Freas based his feeling on seeing the times that the SUU swimmers have turned in since the Invitational and on the fact we stay with them in vault and get decent mileage out of everyone on bars, we can make it a really close meet."

See GYM, Page 25.

Daytona Beach March 11-20

The great poker shoot-out

Here's the 3rd and 4th set of clues in the Busch beer contest

"You were asking me about Doc Holiday," said BUSCH Cassidy as he and the Kid watched the big poker game in the Last Chance Saloon.

"Nothin' about it," said the BUSCH Cassidy.

"Course, I ain't tellin': what that number is, but anybody who's seen that big poster should be able to find it if they let their eyes roam."

A bartender come by with ice-cold glasses of BUSCH beer for all the players and onlookers. Once again, BUSCH Cassidy rolled his glass to Diamond Lil, this time bowing from the waist.

"You got something goin' on with her?" inquired the Kid.

"Now Cassidy laughed. 'It's sort of a private joke. Diamond Lil tells everybody she's descended from royalty, but there ain't so much truth in it. Sure, she's a bit one of the two aces that's been dealt, but they're of minor importance."

"You haven't said much about Black Belt, the Kid said, 'Nothin' much to say. He's always wearing black suits when he plays. Thinks it gives him class."

"Goin'" said Cassidy, 'you got most everybody sized up. But you ain't mentioned Doc Holiday."

"Late" said Cassidy.

Women cagers to meet fate out on High Plains of GCAC

By Brian Higgins
Staff Writer

Des Moines and Omaha hardly seem like fitting places to decide the destiny of an entire season. But those are the stops the Saluki women will be racing on this weekend’s Corn Belt tour, and amidst the sounds of restless livestock, rustling winter wheat and swirling prairie dust, the rerouting of the whimpering basketball will be heard above all.

Drake is the initial stop on Friday night. The Salukis will contest the Bulldogs right to be No. 1 seed in the Gateway Collegiate Athletic Conference’s post-season tournament, a spot they earned in part by slipping past SIU-C 82-79 three weeks ago in Carbondale. Coach Carole Baumgarten’s club has again raced to a 6-1 conference slate, losing only to top-seeded Illinois State in Normal. The Bulldogs are 15-4 on the year.

The Salukis were also victimized by the Redbirds, falling 78-64 in a game which national shooting leader Connie Price was scratched from only hours before due to a hand injury she suffered in a passing drill in practice. Ironically, Drake was the last game in which Price competed. It is also the first game in which she will suit up for since Connie Price is back. The 6-foot-3-inch junior center was given the high sign for Friday’s contest, but will not start, according to coach Cindy Scott.

"Connie will definitely play Friday night," Scott said. "She’s been doing better than I thought she would in practice. She’ll have no restrictions, but Linda Wilson will start." Wilson has given up an inch and a lot of experience to Price, but has done a credible job in her absence. sharing the pivot duties with starting forward Mike Keane will get the call in qualified, as well as Kevin Baker, who long jumped 24-11 in the Salukis’ opening meet Baker, the jumping captain, also tops the Saluki list as the number one triple jumper with a 48-11.

Salukis continue dangerous trek through conference’s Death Valley

By Dan Devine

The Great Americans South-west.

It’s parched deserts and rocky, cactus dotted mountains have been the final resting place for many a pioneer’s dreams. It’s a land that doesn’t treat its inhabitants kindly, whether they be under provisioned settlers, out of gas tourists or struggling basketball teams.

And this great desert just might prove to be the burying ground for the SIU-C playoff hopes, as the Saluki basketball team continued a two game trek through the uninhabited reaches of the Missouri Valley Conference, a conference that knows no reasonable boundaries.

SIU-C will challenge the New Mexico State Aggies Saturday after braving the run and gun West Texas State Buffaloes late Thursday night.

SIU-C needs to pick up a win on this journey, or face the embarrassing possibility of getting shot down into the MVC basement.

With six games, including Thursday’s contest, the Salukis know the time is not yet on hand for the Salukis to get desperate, but they need to continue the playoff drive they started with a win against Creighton last Saturday.

SIU-C’s 3-9 conference record ties them for ninth place (a charitable version of 10th) in the league with Indiana State. West Texas State is 3-4, Creighton is 4-8. Three of those teams will surive the MVC season with a playoff berth.

At the other end of the conference is New Mexico State, a team that has lived up to a lot more than a chance to squeeze into the eight-cut tournament. (League-leading Wichita State is on probation and ineligible for post-season play.)

With a 9-4 record, 15-7 overall, the Aggies are in the thick of the conference, only a half game behind Illinois State and the No. 1 seed.

At New Mexico State, the Salukis expected something like a 14 win season. Instead, the Aggies have swept to a 15-7 overall mark by winning almost every close game they’ve been in. When New Mexico State loses, it’s usually a blowout. When they win, it’s by virtue of last minute heroics.

As in seasons past, the Aggies have fattened up their record at the expense of MVC foes. See CAGERS. Page 26

Winning not everything to Hartzog’s tracksters

By Ken Perkins

The men’s track and field team won’t be aiming for the Central Collegiate Championships in Kalamazoo, Mich. this weekend.

They’ll take the usual am­muni­tion, however, and will probably explode a round or two, but the Saluki number one goal right now is to continue to prepare for the Missouri Valley Championships Feb. 28-29.

“We’re not going after a team championship this week, we’re waiting for the MVC,” said assistant coach Bill Cornel. “Most of the runners will go only in one event. Next week, they’ll double up.

The Salukis will aren’t in top form, according to Coach Lew Hartzog, and trying to run over toughies like Michigan, Illinois State, Wisconsin and Michigan State by doubling runners in events will hurt more than help. Hartzog feels the conference meet is too close for that.

The Salukis, who placed second to Michigan last year, will double only one distance runner and run one relay squad.

Senior Terri Rons will defend his title in the 1000-yard run. He has run 2:12.44 this year. The Salukis will probably try to keep the time out of their hands.

But the Salukis will return a fewplacewinners, junior long jumper David Greathouse, who was third in the ‘82 meet, and middle distance runners George Sutar and Tony Adams.

Sophomore Mike Franks, who tied for the team in both the 100- and 300-yard dashes, finished third in both events and will test his speed in the 300- and 500-yard dash. Lon Marks, who captured a sixth last year, also returns in that event.

So far, SIU-C has qualified only two athletes for the NCAA indoor championships March 11-13 in Pontiac, Mich. Stephen Wray, who is among the top 10 high jumpers in the world, has qualified, as well as Kevin Baker, who long jumped 24-11 in the Salukis’ opening meet.

Baker, the jumping captain, also tops the Saluki list as the number one triple jumper with a 48-11.
